Stell is leaving soon to be just Mrs. Turan. We are proud of our Ruth Ascher, and the prizes her dogs took in the Baltimore dog show. She received high praise for the animals and will soon have some more champs.

The girls have a good basketball team and are being aided by the nurses. Allen and Skinner deserve a pat on the back for their good playing. As for the bowling team, even shoes don't help! As the girl from the heart of Maryland, I'll see you.

How to Act When Home

Many Servicemen now in Korea soon will be returning home. Others have already come back to the strange land of America. For all these returnees, AFPS has compiled the following warnings:

- 1—Don't use a grenade to open doors. The natives have developed a primitive but effective gadget called a knob for that purpose.
- 2—Don't tell native girls your thoughts in pidgin English. American education systems have taught them to understand your language without use of ordinary expressions you've learned in service.
- 3—Don't crawl on your stomach when crossing an open field. The natives will hurl catcalls and gibes at you until you've given some explanation (suggested: you've lost a \$100 bill; they'll join in while you escape.)
- 4—Try to avoid the usual procedure of dumping your entire meal in one pile. Separate the ice cream, brussels sprouts, meat loaf, and jelly on the plate. The natives do it and like it.

For seven years the NEWS has been offering pin-ups for the male contingent of NNM. The editors believe it is about time to give the ladies a break. Charles Finch, is the leading contender for "Mr. YMCA" and "Mr. District of Columbia" physique titles. A member of the Washington Central Branch of the YMCA, 22-year-old Finch stands 5 feet 11 and weighs 170.

Mrs. Hogue smiles happily as she examines the framed letter from the President's secretary describing her excellent performance. Present at the ceremony in her honor were (l. to r.): CAPT C. H. McMillan, Executive Officer, NH; Mrs. Tressie E. Bowman, clerk-typist, NMS; CAPT J. L. Enyart, Commanding Officer, NMS; Mrs. Margaret H. Garrett, Military Personnel Section, NH; Mrs. Helen T. Tew, Record Dept., NH; Mrs. Frances J. Ryan, Executive Office, NH; Mrs. Grace H. Hogue, Information Desk, NH; RADM W. J. C. Agnew, Commanding Officer, NNMC; Mrs. Lillian G. Offutt, Record Dept., NH; Mrs. Catherine R. O'Connell, clerk-typist, NMS; Mrs. Helen R. Price, Record Dept., NH; and CAPT B. W. Hogan, Commanding Officer, NH.

Secretary to President Sends Praise To Lady With the Answers--Mrs. Hogue

Mrs. Grace H. Hogue presides at the Medical Center's busiest spot—the information desk in the main lobby. Using two phones, her up-to-the-day files, and her knowledge of the Medical Center, she answers hundreds of questions daily for the people who come to NNMC.

As to how well she performs her job, Mr. William D. Hassett, Secretary to the President, has his own answer. In a recent letter to CAPT Hogan, he said, "Mrs. Hogue is not only thoroughly efficient, with a prodigious memory for names and faces—she always can give instant and accurate answers to the flood of questions with which she has to deal."

"So in her quiet way it may be said truthfully in the language of the well-known phrase that Mrs. Hogue daily performs those little acts of kindness and courtesy which are 'above and beyond' the routine obligations of her job."

The framed letter was presented to her by RADM Agnew recently at a ceremony in her honor.

Mrs. Hogue helped to open NNMC, coming here Feb. 5, 1942 and working in the Ship's Service office for a month before assuming her present duties.

Her Navy life is not restricted to her job by any means. She was a Chief Yeoman in WWI and her husband, the late Chief Pharmacist Hogue, served in the Hospital Corps for 34 years.

Her daughter was the first cadet nursing program graduate to win an NNC stripe and saw duty on the USS Consolation before marrying a Navy line officer. The young couple now live in San Diego and have a small daughter.

Mrs. Hogue's son, 1st Lt. Harvey Hogue, is an Air Force pilot, but he comes from a Navy background, being a Pharmacist's Mate and a graduate of the Naval Academy Class of 1950.

ENS Connery Writes Best Safety Slogan

"Wet Decks, Slip, Flip, Wham, Bam,—" wham-bammed its way into first place in Operation Goose Egg, NNMC's Safety Slogan contest. ENS H. J. Connery, MSC, of NH's Psychology Department, wrote the winning slogan which netted him the first prize of \$25 in merchandise.

Winning second prize (\$15 value) was LT James A. Mitchell, of NDS, with "Let's Add Another Freedom—Freedom from Accidents."

Mrs. Helen W. Martin, Civilian Personnel Division, took third honors (\$10 value) with "Why be unconscious when you can be safety-conscious?"

The four prizes of \$5 value each were awarded for: "Safety is the Way to a Happy Day," by Paul J. Shugart, HM1, NNMC MAA Office; "Alertness Plus Caution Equals Safety," by Lucile Thompson, HM2, NNMC Personnel Office; "Drive Carefully, You May Meet a Fool," by Rosa Lee Tavenner, Navy Exchange; and "Don't Risk Your Neck on a Slippery Deck," by LT C. L. Waite, MC, of NH.

Selecting the winners out of the 79 slogans submitted were: LCDR E. R. Stovall, MSC, NNMC Safety Officer; LT J. O. Atkinson, MSC, Special Services Officer, and Mr. Robert L. Williams, Chief Quartermaster.

The contest closed Feb. 15. All hands attached to NNMC, civilian and military, were eligible.

Falls Church Group Brings 'Kiss & Tell' To NNMC Tomorrow

The rollicking comedy "Kiss and Tell" will be presented in the auditorium by the Falls Church Community Theatre tomorrow night, Feb. 26, at 1930.

Since F. Hugh Herbert wrote this play in 1943 it has enjoyed a lengthy run on Broadway, road companies have toured the country, and amateur groups have produced it many times, but its delightful humor is still fresh and highly amusing.

Mrs. Lawrence Smith of Falls Church, known in theatrical circles as Ollie Smith, is directing the production. A carefully chosen cast will make the very most

Mrs. Lawrence Smith

of every hilarious line and situation.

The cast includes: A. D. Lynn, Sue Blocker, Dianna Godfrey, Robert Dennis, Vicky Wallace, Jock Beebe, Laura Lee Morgan, Bill Soboroff, Dick Titus, Hope Robinson, George Goodrick, Elise Strotmeyer, Paul Carmi, Tom B. Blocker, and Bob Herman.

West Coast Convenes Course Similar to Ours

The first course of instruction in Medical Aspects of Special Weapons and Radioactive Isotopes, under the auspices of the Bureau of Medicine and Surgery, to be given on the West Coast, will convene at the Naval Station, Treasure Island, San Francisco, Calif., on Mar. 3, 1952, RADM Lamont Pugh, Surgeon General of the Navy, has announced.

A similar course of instruction has been carried out at the Naval Medical School here during the past three years.

Dr. Silliphant Leaves NMS to Become Deputy Director, Institute of Pathology

CAPT William M. Silliphant, MC, USN, Director of Laboratories for the Naval Medical School, was detached Feb. 15 to assume his new position as Deputy Director of the Armed Forces Institute of Pathology at 17th Street and Independence Avenue, Washington, D. C.

CDR V. E. Martens, MC, USN, has replaced the Captain as Director of Laboratories.

During his time at the Naval Medical School, CAPT Silliphant saw the school improve in many ways and saw it take on many added responsibilities in the form of new laboratories and technical schools. He served under four different Commanding Officers, and gradually witnessed a complete change of personnel in his own department.

The doctor says he is especially proud of the record of the Naval Medical School in the training of residents in pathology. Of the 22 residents who were in training in the department during his tenure of office, eight became eligible for certification with the American Board of Pathology. All eight successfully passed the examination and were certified.

The soft-spoken doctor, who was

Opera Guild Chorus Brings Talent Here

The Washington Opera Guild Chorus will present a program in the main auditorium on Mar. 3 at 1930. The program, sponsored by the DAV, King Chapter No. 4, will consist of solos and choral arrangements of both classical and popular music with audience participation for which prizes will be awarded.

The Washington Opera Guild Chorus, directed by Miss Dorothy Remington, is composed of promising young artists, both male and female, who intend to make music their career.

This fine group of talented young people are not strangers at NNMC as they have presented many excellent programs throughout the wards of the hospital.

This will be their second appearance for a full concert in the auditorium. Those who remember their previous concert last November will vouch for the entertainment.

Language Courses Offered by Sanz

The Sanz School of Languages is willing to offer instruction in Spanish and French at NNMC. These courses can start in March in the auditorium.

All ambulatory patients are invited to enroll and plans are afoot to carry the course to bed patients via the public address system.

The courses will be conducted by the teaching staff of the school at no cost to the patient. Staff members are eligible to join the classes at a cost of \$15.00 per month.

It is expected that the one-hour classes will be held twice a week. Times and dates will be announced later and in the next issue of the NNMC NEWS.

The Information and Education Officer is in the process of determining the demand for courses of this nature. If you are interested, fill out the questionnaire which is now available through your Ward Nurse, or call the I and E Office—Ext. 547—to indicate your interest and choice of course.

CAPT W. M. Silliphant

a Japanese prisoner of war for 37 months before coming here, said, "I have had the full support and cooperation of the lab staff at all times. It was a real pleasure to work with them."

"I grieve to leave the everyday scenes of nearly five years of my life, and though I accept my new assignment with great honor, I end my tour here with deep regret and reluctance."

Dr. Silliphant is not entirely severing his connections with the Medical School as he has been ordered to additional duty at NMS.

Crew's Library:

New Books Depict Ring, War, Humor

February's supply of new books in Crew's Library has an unusually varied subject matter and appeal. For instance, Gene Schoor has written a biography of **SUGAR RAY ROBINSON** in which we follow the misfortunes and hardships of his boyhood and admire the courage of his mother as she struggled to hold the family together.

Ray's progress from the amateur to the professional class and his success in winning the welter-weight championship has all the fascination of the old story of rags to riches. The grandson of slaves stepping into the Hall of Boxing Fame has been called the world's greatest fighter—pound for pound.

Lowell Thomas' exciting new book is called **BACK TO MANDALAY**, a record of the exploits of General Wingate and of the American Air Commandos who fought in

the first all-airborne invasion in history.

No fiction book could compete with the hair-breadth escapes from treacherous villagers, glider crack-ups in the jungle, hand-to-hand combat with Japanese, pythons, or the daredevil flying forays.

On the hilarious side, there is **THE APE IN THE HOUSE**, Cathy Hayes' account of the experiment that turned into a circus when she and her husband adopted a two-day-old girl chimpanzee to be raised exactly as if she were a child of their own.

They dressed, fed, burped and cuddled little Viki; loved, praised and at times could have committed mayhem, as other parents before them. But, at two, Viki passed child study tests with flying colors which indicated that acquired behavior can be developed to an extraordinary degree.

Plays 2 Numbers; Gets Two Addresses

"It teaches dexterity of fingers, appreciation of music, and how else could I obtain the addresses of two of the girls in the Evening Star Revue," said Steven E. Beasley, HN, when asked about his interest in the piano.

Steve, a Lab 18 student, appeared with the Evening Star Revue Sunday, Jan. 27, playing Rachmaninov's Prelude in C Sharp Minor and Malaguena.

The 19-year-old corpsman has been playing the piano for nine years. Besides enjoying music, he feels that the piano develops finger dexterity which will be valuable to him since he plans to become a research doctor.

One day, as he was practicing in the auditorium, (where he is often found during his free time) he was overheard by Special Services Officer LT J. O. Atkinson who invited him to appear on the Evening Star Revue.

Steve is from Bethesda, and graduated from Bethesda-Chevy Chase High School where he played in the band and ran track. Before the Navy he was enrolled in Pre-Medicine at the University of

Steven E. Beasley, HN

Maryland. He plans to continue his medical studies there after his present hitch.

He requested lab school to gain practical experience in laboratory technique before re-entering college.

New Citizen Gives 48 Pints of Blood

Having a preliminary blood check is nothing new to Mrs. Kaley as she chats with Blood Bank technician Louise Miller before donating her 48th pint of blood.

NMRI:

Three Men Arrive While Four Depart

by R. Conaway

Latest arrivals at NMRI: LT W. B. Hull from Guam; L. T. Smith from Receiving Station, D. C., and R. Karr from USNAS, Jacksonville. LT (W) M. B. Mitchell also reported aboard for two weeks training duty.

D. C. Barker, HMC, transferred to Receiving Station, D.C. and N. R. Freeze to FMF, Camp Lejeune.

G. Batey was released to inactive duty and for W. H. Elles, an honorable discharge.

HMC Allen reenlisted for four, HMC P. E. Thompson reenlisted for six, and L. Williams reenlisted for four.

Any gals interested in a Toni home permanent just see "Mr. Charles" (Ashcraft). I hear he is quite adept at making curls.

We hear that one of the Researchites was fined \$10.00 for illegal parking the other night. That was the same night Mabel Eller's new car was christened.

And then there was the fellow (chief) who took an Admiral's daughter home, spent \$23.00 for cab fare that night, and was told he needed a tailor-made suit.

Hammy Brooks and Scotty Conaway celebrated their joint birthdays on the 13th. 'Twas an all-Navy affair, with the exception of Barbara, an Army gal!

Did you ever walk off and leave five dollars on the bar in payment for one beer? I know one Chief who did.

Who said: "It's for the better! So now you have to stand boot watch?"

If you should ever go to Homestead, Pa., be sure you knock on the right door there. They say people up there are "45" minded.

That little green thing that Mabel Eller was chasing around the Wave Barracks was really a bird. (Bird, that is!)

There's a certain chief around Research these days known as "cuddles" who I hear has a new interest—bowling?

Has anyone been down Nashville (WSM) way recently? Some of the people around here were wondering when "Lonzo" sings out, if it is the missing Link in the Old Twosome over the "Grand Ole Opry."

One of our departments appears to have a coffee mess which belongs to the "League of All Departments." Here matters of all descriptions are discussed by a prominent chief whose primary interest in life is satisfaction to others both from physical and mental standpoints.

Yes, She's Scotch But Not With Blood

There's a small, timid lady with a sweet face and graying hair who is often seen at NNM. She has been seen here on at least 48 different occasions we know of because the records of the Blood Donor Center show her as top on the donor list, having contributed 48 pints of blood.

Her name is Mrs. Alexander R. Kaley of 4537 N. Chelsea Lane, Bethesda. Born in Scotland, she crossed the Atlantic in 1928 to visit the United States.

She met Mr. Kaley here but was unable to marry him because she was not a citizen. So the young couple crossed the Canadian border for the wedding.

Since her husband's job necessitated constantly moving from city to city, Mrs. Kaley was what she describes as a "woman without a country" until 1942. At that time she was able to stay in one community long enough to become a citizen.

She didn't wait until she was legally a citizen to start assuming the job of one. When the Red Cross started its appeal for blood right after Pearl Harbor, Mrs. Kaley was ready.

She had no children to go to war, but her husband is an Army WWI veteran, and her nephew was killed in France while serving with the British Army in the early part of WWII.

"I wanted to help," she said, "and that was the only way I could."

Since that time she has gone right on doing her bit. She even made two donations in Canada. After her 15th donation here, she received a letter from a Marine at Paris Island who had read about her and wrote to congratulate her for her efforts.

Asked if she had ever experienced any fear or pain while donating, she replied in her Scotch accent, "Never had any bad feelings whatsoever."

Class in Shakespeare

Mr. Frank R. Adams, instructor in English at the University of Maryland and at the Naval School of Hospital Administration, has volunteered to participate in Shakespearean reading evenings.

Personnel on Monday evenings, "Henry IV, Part I" and "Hamlet" are the two selections that will be covered. It is estimated that there will be a total of eight sessions of one and one-half hours each.

FEBRUARY 25, 1946

The Chaplain's Corner

by Chaplain John J. McGowan

How Do I Look?

We often hear that question. Dapper Dan rigged in his new Sunday-go-to-meetin' tweeds . . . Susie "Q" in her new Easter Parade bonnet . . . or even the Chaplains in their newly added half stripes can easily be imagined asking the oft-heard question, "How do I look?"

It could be a most effective aid to better living if we would sometimes change the question a little and direct it towards ourselves, namely, "How would I look?" It would keep us from doing lots of things we ordinarily do wrong in the dim quiet of our own secrecy. Imagine a man with a flash camera near you ready to take a picture. Would you want others to have a picture of what you are doing at the moment? Or is it something you would be ashamed of?

Some years ago, during the days of sugar and meat shortages, the Quartermaster of one of our western ports discovered that the sugar and meat in his warehouse were disappearing much more quickly than the commissary needs of the post seemed to require. The matter became so serious that the FBI men were called in to help crack the case. They came and set up cameras with telescopic lenses in a nearby barracks and took pictures of everybody that entered and left the warehouse.

After a few weeks the guilty people were called in to look at some movies of themselves. As you might expect, when they saw themselves on the screen stowing sugar and beefsteaks in their jalousies and shoving off with same, they were thoroughly ashamed of themselves. They readily admitted that what they had done was wrong.

If they had asked themselves before the deed, "How would I look?" they would have spared themselves much shame and a stiff sentence for defrauding the government. They could have stayed on their jobs for years instead of losing both job and reputation. Evils like that are fond of secrecy. They thrive on darkness and hate light. That's why the thought of publicity can very often check a wrong before it is done. At any rate it will never do us any harm to ask ourselves, "How would I look?"

NNMC News All-Intramural Basketball Team

First Team

NNMC Intramural Champions

Second Team

First Team

Center

Clockwise) Bernard S. SYN. R. center, (Dental Officers) — age, 24; weight, 170; height, 6 feet; hometown, Columbus, O. Synder, plug of the Dental Officers, a threat inside and outside the and outstanding off the boards.

Forward

Jwen C. PECK, forward, (Cardigy) — age, 26; weight, 170; height, 5 feet 9 inches; hometown, Kansas City, Kan. Once Peck steals the key, he locks the score at other two. The former All-American is a hard driver and over ball handler with a variety shots.

Forward

London C. DURHAM, forward, (Dental School) — age, 21; weight, 155; height, 5 feet 10 inches; hometown, Belgrade, Mont. This All-Intramural forward is the hook at artist of NNMC. This, plus smart floor game and hard, fast moves, made him the top scorer in the intramurals.

Guard

Wester K. FAST, guard, (NSHA) — age, 35; weight, 195; height, 6 feet 11 inches; hometown, Havi-Kan. The heaviest man on All-Intramural, Chief Fast is a setter; excellent rebounder, dly off the key, and top defensive player.

Guard

Frank E. FRATES, guard, (Dental School) — age, 41; weight, 190; height, 6 feet 1 inch; hometown, San Francisco, Calif. The oldest on the All-Intramural, he used experience as a playmaker — a long shot artist, and strong defensive man.

Winners of the Intramural Crown, the undefeated Dental School team are—(Front row): J. L. Lust, CAPT L. D. Mitchell, Commanding Officer, NDS, CDR F. E. Frates, coach-player, CAPT A. H. Grunewald, Executive Officer, NDS, and L. C. Durham.

Editors Pick NNMC All-Star Intramural Basketball Team

As the basketball season draws to a close, across the country writers and coaches are in the throes of nominating their choices for the different All-Star teams in every section of the United States.

NNMC NEWS has also jumped on the band wagon (head first) and picked an All-Intramural basketball team for NNMC.

In the choosing of the individuals, the points made, their defensive and offensive ball on the court, and the aggressiveness displayed on the floor were the determining factors used in selecting the first

Second row: B. L. Beaversdorf, D. L. Sullivan, J. E. Carter, O. Munroe, and F. T. Powers.

Third row: H. J. Bacon, D. H. Strehle, B. J. Ken-nemur, J. L. Brookshire Jr., and R. W. Malone.

and second string.

In the selection of the two strings, Dental Champs, the intramural winners, lead with three choices—two on the first squad and one on the second.

Also on the first team is Dr. Peck, who was chosen All-American in 1947 when he played for Kansas State.

The squads selected have all the attributes of a well balanced team: deadly shooting from all parts of the court, fine ball handling, excellent defensive playing, and plenty of collegiate and service ball experience.

Second Team

Forward

(Counter Clockwise) Richard G. HETHERINGTON, forward, (NP Service) — age, 20; weight, 155; height, 5 feet 8 inches; hometown, Washington, D. C. Good ball handler, fine inside shot, and elusive on the court.

Forward

Richard R. GUTEKUNST, forward, (Lab School) — age, 25; weight, 150; height, 6 feet 2 inches; hometown, Allentown, Pa. Deadly from the corners and side, and shoots either jump, push, or set.

Center

Jerry L. PETRO, center, (NP Service) — age, 21; weight, 155; height, 5 feet 11 inches; hometown, Hibbing, Minn. Fine rebounder; plays an excellent center slot, and shoots well from off the key.

Guard

Loyal J. LUST, guard, (Dental School) — age, 21; weight, 185; height, 5 feet 11 inches; hometown, Klamath Falls, Ore. Fine jump shot. Clears the board in good fashion and good rebounder.

Guard

Paul J. SHERIN, guard, (NSHA) — age, 30; weight, 157; height, 6 feet 2½ inches; hometown, Montgomery, N. Y. Excellent on the boards, good hook shot off the foul circle.

NNMC Intramural Bowling Highlights

Naval Hospital still maintains a firm hold on first place as the Intramural League enters the final week.

CPO is still in the race for first, having won seven points in the last two matches.

X-Ray may be the team to beat next season. Ruby Salloum, HN, (Wave) stole the show with games of 183-180-151-514 for an average of 171. Her scores compared with the best in the league. P. Martin pounded the maples to the tune of 532 with games of 177-187-168.

Oxford of NSHA, bowling with the CPO team, found the strike pocket to the tune of 245 in the third game against the Dental Grads and thereby took over high individual game honors from Wilkens of Dental Interns who has 237.

As the bowling season draws to a close, final plans for a combination single and double tournament are being readied. All bowlers with an established average in either the Intramural or the MDW League are urged to enter. A call to HMC Meitl at Ext. 343 or LT Jaeger at Ext. 680 is all that is necessary.

The different league records are:

Bowling League Records . . .

	INDIVIDUAL	TEAM
High Game	Oxford (CPO)—245	Naval Hospital—897
2nd High Game	Wilkens (Dental Interns)—237	Dental Staff—867
3rd High Game	O'Keefe (NH)—224	CPO—858
High Series	Meitl—(CPO)—607	CPO—2389
2nd High Series	Vinson (CPO)—551	NH—2389
3rd High Series	McCarthy (NH)—546	NH—2386

Games of 200 or better: Colby—217, Niiranen—210, Vinson—207, Meitl—205-204, Hobbs—211, Zack—210, Wilkens—237-208, O'Keefe—204, Alligood—211, Van Belois—200, Vaupel—206, Witowski—213, Myers—203, Cox—218, Cartier—200, Shipley—201, Pierce—211.

The big ten in averages (must have bowled at least 16 games): 1. Meitl—170; 2. Vinson—167; 3. McCarthy—161; 4. Jaeger—157.1; 5. Wilkens—157.0; 6. McMillan—156; 7. O'Keefe—152; 8. Hobbs—151.7; 9. Nelson—151.4; 10. Ferguson—151.0.

Security Station Secured by Admirals

NNMC, 72; Naval Security Sta., 64

NSS showed up Feb. 12 with just six players, two of whom fouled out in the later stages of the game and were banished from the floor. The host team asked the officials to permit their further playing; irregular, but a nice gesture which almost backfired.

Ronald DeVice, playing without his partner, Cornell Brothers, was the only Center cager to hit the double figures in a somewhat loose ball game.

Quantico Trounces Admiralettes, 46-39

The visiting Quantico Marines celebrated their ninth anniversary by topping the Admiralettes 46-39 Wednesday, Feb. 13, in the NNMC gym.

Trailing 8-14 at the end of the first quarter, and 12-25 at the half, the local gals had reduced the margin to 30-32 at the end of the third.

The fourth saw the lead shift back and forth several times before the red-clad visitors turned on the power to establish their seven-point lead and freeze the ball during the closing seconds.

Crouch injured her leg in the second quarter and was replaced by Allen. Madsen and McQuarrie played the full four quarters chalking up 19 and 13 points apiece while Crouch scored 6 and Allen 1.

Link, Jarvi, DeBerry, and Skinner handled the defensive end with Lawton and Salisbury in reserve.

Waves to Replay Match

The Admiralettes won their protest against the Andrews Field game of Feb. 6, ruling that the two male referees were unqualified to call women's rules, the Waves entered formal protest to the Women's Service Athletic League. When the Central Planning Committee of the League met Feb. 11 ruled that the game be replayed March 10 at Bolling Field.

Coach's Corner

Bob Jaeger, who took over the chores of totaling the team handicaps from Tom Floyd of Cairo in the intramural bowling league, has received the blessings of the Athletic Committee to run a doubles and singles tournament upon completion of the present schedule. It's wonderful that there are always a few around like Bob, Chiefs Meitl, Jackson Reynolds, Hollis Murphy, who are willing to get in and work nights in order that our athletic program can go through without too many obstacles.

Speaking of hurdles reminds one of the popular cinder star from the University of Indiana, Jim Crawford, who took his departure a few days back. Jim was one of FIVE who volunteered to show up on the golf course at MIDNIGHT every night for fifty-one days a few summers ago.

Montgomery County at that time was faced with a critical water shortage—hence the enactment; that the only watering on golf courses would be confined to putting greens and that between the hours of midnight and 5 a.m. . . . So the boys would show up, take a pair of pliers, fifty feet of hose and start watering, generally ending about two-thirty.

Now you can understand why the Golf Committee is up in arms over a recent act of vandalism on the golf course: the deliberate divoting of the putting greens, the tearing of flags, towels from the pins and ball washers. Depending upon the weather, the green's forces will aerate and top-dress the putting surfaces around the middle of March, permitting tournament play to be started during the early part of April.

Most Maryland clubs commence their tournament schedule during the first week in May, but to engender interest in the sport, the Golf Committee feels an early start will help the ball to roll.

At the Maryland State meeting a few weeks back, feelers were put out regarding home and home competition, but although the stymie has been officially abolished from the Rules of the United States Golf Association, we were stymied by the lack of dressing facilities for visiting teams. You can hardly offer a fellow, who has driven fifty or more miles to compete for his club, a basket.

Center basketball hopes were shattered with the recent injury of Cornell Brothers, easily the outstanding athlete in the past five years to wear the maroon and gold. Cornell has placed on every all-opponent and PRNC team for the last three seasons. Tommy is quick on his feet, thinks well, can move into the pivot position, plenty of courage, a rubber-legged rebounder and has an off night when he can't hit two for three.

His activity has not been confined to the cage sport; played short-stop for Gaithersburg on the weekends while during the week held down the signal calling position on the Center Commanches, undefeated in five years.

A season ago, while working football in the Eastern Intercollegiate League, failed to come across a single passer who could excel Tommy in propelling the pigskin into a receiver's arms. In his first season of golf, Cornell went from 119 on the first round he ever played, to an even 80 while playing with the Coach. His many friends wish him a speedy recovery, and an early return to the mailroom with Porter and associates.

Admiral W. J. C. Agnew has certainly made the post office a nicer place to work in, as well as doubling the efficiency of that all-important hub in the wheel of Center morale.

Speaking of baseball, hardball hopefuls will have to sign up with the local semi-pro outfits in order to play their favorite sport, as once more Center participation in the MAISAC League has been deferred. This action is easily understandable. A few years back, Admiral L. O. Stone, then Captain, and, while in college a major league prospect as guardian of the initial sack, walked out into what it now the fairway of Number Three and plotted out a hardball diamond.

The infield was a little rough in spots but with men like Chief Thomas at third, Chief LaBlanc at short, Elias Bell, Chief Harris and Paul Beno on the mound, all bad hops nestled in the respective gloves with ease . . . beat Quantico that year . . . attendance often hit the three hundred figure—personnel in the four-thirty avalanche would turn around, drive back and stop to watch a game in progress for a few innings. Came the golf course and the establishment of an athletic field just west of the tennis courts. One hardball diamond, one softball layout plus one fairway . . . tall fence in left field at considerable expense, the loss of at least seven horsehides per day over the fence, complaints from property owners as to broken windows, small children running across Jones Bridge Road to retrieve errant balls, softballers not being able to play on their diamond while hardball games were in progress, golfers hitting players, and what few spectators there were . . . basketball we could practice at night; in baseball we had to hit the diamond at three . . . spikes on the playing surface of the tennis courts while chasing foul balls.

So now, instead of fifteen men enjoying the athletic field, we have fourteen softball teams representing the many departments of the component units of NNMCMC. There are fifteen colored jerseys, caps, and a full bag of equipment issued to each team with two paid officials for every game.

A total of 215 players starting the season . . . add to this wonderful representation the Waves' team with some twenty players, Varsity with a like amount . . . two diamonds, going four afternoons a week. Add to all of the foregoing the irrefutable fact that every nearby military installation includes on their diamond roster established big league stars, not some guy who played in a school of fifty boys, sixty girls, and walks around the Center with a 12-inch letter emblazoned on his chest or who made All-Navy on some coral atoll while the rest of the fellows engaged in reminiscencia under the palm fronds.

Last season Fort Myer fielded a team boasting four major leaguers on their starting lineup. At Quantico a former college captain, who batted .410 in his senior year, playing in Big Nine competition, was not good enough to run onto the field when the umpire cried, "Play Ball!" No, when big leaguers decide to peer through a microscope rather than a gunsight, we might be able to meet on equal footing with our allies.

The Varsity journeyed to Bainbridge, the former site of the Tome School for Boys, and received a lesson in Casaba Wizardry, a major during the spring semester at all schools, coast to coast. Interested spectators at the classroom demonstration of motor skill, as an organized pattern of perceptions and physical movements, were the ever popular Center cage adherents Torchy Murphy, Moose Barker, Clark Devol, whose occasional outbursts could not disturb the composure of Prof. Summitt, the Bainbridge Coach.

Winter Hits the Wacs; Snowed by 13 Points

The Admirallettes fought their way back into the winning column last Wednesday night at Arlington when they snowed the Wacs 35-23. They stand with three wins and three losses now.

Following Allen's opening goal, the Waves snatched the lead, and by the end of the first quarter had established a 12-5 lead. It was 19-12 at the half and 23-16 at the end of the third.

In the last quarter the bench was cleared, and the Waves still piled up 12 more points to the Wacs' 7. Breakdown of the tallies showed Madsen 18, Crouch 15, and Allen 2.

The spirit of the team was greatly enhanced by the addition of the newest guard, "Boots" Carlson. "Boots" set the pace with her steady stream of chatter as she raced around the defense, guarding more than her share of the Wac scorers.

Rotating in the defense were Deberry, Jarvi, Skinner, and Lawton. McQuarrie was benched because of a bad foot.

The Waves edged out the Wacs on the foul shots, too, making 7 out of 18, while the Army gals took 5 out of 17.

Team 1 Dumps Team 2 As Wave Teams Clash

Wave Team No. 1 outbowled Team No. 2 on all four points Wednesday, Feb. 13, in a regular league match in the NNMCMC bowling alleys.

Salloum of Team 1 was high individual scorer with 152. Eller, Conaway, and Green filled out the rest of the squad.

Rolling for Team 2 were Schrader, Clarkson, McElfish, Tillotson, and Scott.

Both teams finished the season last Wednesday with Schrader's team playing host to the Ft. Myer Wacs and Puffer's team traveling to Henderson Hall.

Admirallettes' Basketball Schedule

WHEN	OPPONENT	WHERE
Feb. 28	Ft. Myer Wacs	Here
Mar. 6	Bolling Field	Here
Mar. 10	Andrews Field	Bolling Field
Mar. 13	Ft. Myer Wacs	Here
Mar. 18	Quarters K	There

Local Cagers Smear Gun Factory by 40

NNMCMC, 77; NGF, 37

The bench was cleared over in the Recreation Bldg., Feb. 7, to keep the score down against a hopelessly outclassed quintet from the Gun Factory.

Cox, living up to this reporter's expectations, rapped in 19 with ease and keeping the pace should remain in double figures the remaining games of the schedule.

Straight of the visitors played a nice floor game setting up Jeffries and Taggart.

Like a watch without hands, a person without the habit of saving has nothing to show for his work. Buy U. S. Defense Bonds regularly, on the Payroll Savings Plan.

Bainbridge Dumps Admirals, 70-50

Bainbridge, 70; NNMCMC, 50. Johanessen of the NTC had a field day Feb. 5 against the casabans in racking 21 points against the 15-pointer pointed by Big George Funk, capable Center rebounder, as the Admirals went down before the Bainbridge heavy guns.

The game today is too fast to expect one man to control both boards and supply the scoring punch.

Ron DeVice and Cox performed well after Cornell Brothers was forced out of the game injured ankle in the initial center.

FEBRUARY 25, 1952

Surviving Co-Pilot Navy P4M Crash Describes Ordeal

was four hours out on a night training flight from Nicosia, Cyp., in a Martin Mercator, a P4M-1, on Feb. 6, 1952.

The port engine began surging. Acting plane captain, one of the crew aboard, reported that the engine was throwing oil. All gauges reported normal. No indications of trouble.

The pilot headed for a near alternate airport. Impossible to land because of communication difficulties. They headed for their home base.

Six-and-a-half hours later ice began to form. One jet engine started to rise above the icing clouds. Fuel ran low.

At 2200Z, they were able to contact a British civilian airplane. The plane radioed position and direction to their home base.

Unable to lose altitude. Left main wing went dry.

At 2240Z they crashed into the sea, five miles north of Cape Arado, the western tip of Cyprus. The equipment was ejected. All crew were able to escape, by cutting hatches. The plane broke into four parts and soon went down.

A patient on T-14 was the co-pilot of this plane. LTJG Richard Parsons, recovering from injuries resulting from the accident, related that the most alarming aspect of this crash was lack of knowledge of what would happen. It was the first time a Martin Mercator had ever crashed.)

After the crash Mr. Parsons and continued on page 6, col. 2)

Enlisted Men Plan Irish Shenanigans

For the third month in a row the dance committee has made plans for a dance. The date: March 17; the occasion, St. Patrick's Day.

The committee has guaranteed that there will be no snakes on the dance floor. Also, by the use of Irish persuasion, special arrangements have been made with the little people to allow Navy Blue and other alien colors at the dance.

The music will be furnished by a group of leprechauns brought over especially for the occasion. However, they will be dressed as members of the Navy Band in Washington to eliminate jealousy on the part of other stations not as fortunate as we in obtaining them.

Naturally refreshments will be served, and also present will be a group of colleens from the nearby city.

The shenanigans will get underway promptly at 2030 so sure and don't be a'missin' this.

Bonds Paying Interest An Additional 10 Years

Congress has passed a law which makes it possible, now, for your Defense Bonds to earn interest ten years longer than originally planned—with no effort on your part.

For example: A Series E Bond which cost \$18.75 in 1942 will pay \$25.00 in 1952. But if you hold it ten extra years, it will pay you \$33.33, an average of 2.9 per cent.

And there is nothing for you to do. You simply keep your Bonds as you have been keeping them.

News Shorts From The Editor's Desk

Herbert K. Cooper, D.D.S., Director, Lancaster Cleft Palate Clinic, Lancaster, Pa., will deliver the next Naval Medical School guest lecture Monday, March 28 at 2015 in the auditorium. His topic will be "The Integration of Services Necessary in the Rehabilitation of Cleft Palate Patients."

Frank E. Frates, Head, DTR Division, Enlisted Training, NDS, accepted his appointment to Captain, DC, USN, on Feb. 25. CAPT Frates' date of rank is Jan. 1, 1952.

Robert F. Jaeger, OinC, Bacteriology Department, NMS, was appointed Lieutenant Commander, MSC, USNR on Mar. 1. His date of rank is Mar. 1, 1952.

Bernard R. Sherman, HMC, of NMS received a letter of commendation from his commanding officer, CAPT J. L. Enyart, Feb. 16, commending his performance during his 32 months here in the fields of general chemistry and personnel administration. Sherman was transferred to the Receiving Station, Washington, D. C. for temporary duty under instruction in BuMed and for further transfer.

Congressmen Debate On Military Bills

(AFPS)—The following bills of interest to Servicemen were recently introduced in Congress:

1. A bill to provide reduced postal rates on parcels of books, newspapers, and periodicals mailed to members or units of the Armed Forces overseas.

2. A bill to facilitate voting by members of the Armed Forces and certain others absent from their place of residence.

3. A bill to amend the Universal Military Training and Service Act so as to provide that members of the Inactive or Volunteer Reserve who served during WWII shall be released from active duty upon completing 12 months active duty.

4. A bill to grant persons serving in the Armed Forces during the present hostilities certain educational, employment, loan, and other benefits provided for veterans of WWII.

5. A bill to amend the Dependents Assistance Act of 1950 to provide punishment for fraudulent acceptance of benefits.

6. A bill to provide for the posthumous award of the Purple Heart to members of the Armed Forces of WWI.

Proposed Pay Increase Stands at 3% As Senate Prepares to Continue Action

Washington (AFPS)—A three per cent across-the-board base pay increase has been approved for Armed Forces personnel by the Senate Armed Services Committee.

The Senate is expected to vote on the measure within a few days.

Oriental Officers Visit CAPT Enyart

Gen. Pwee and Capt. Liu

Two high-ranking members of the Chinese Nationalist (Kuomintang) Armed Forces visited the Naval Medical School Tuesday, Feb. 26.

General Peter Pwee, of the Chinese Nationalist Army, has been the military attache in the Chinese Embassy in Washington, D. C. for more than three years.

Captain H. T. Liu, of the Chinese Nationalist Navy, is the new naval attache for the Kuomintang government. He recently arrived from the Chinese headquarters in Formosa where he was stationed under the command of Admiral Kwei Yuang Ching, Commander in Chief of China's Navy.

The visitors came specifically to renew their acquaintance with CAPT J. L. Enyart, CO, NMS. CAPT Enyart first met the two officers in Nanking where he was a Medical Member of the United States Naval Advisory Group to China, serving as Advisor to the Surgeon General of the Chinese Navy from July 1946 to August 1948.

Give!

Thousands of servicemen wounded in Korea are alive today because whole blood and plasma, collected through the Red Cross from voluntary donors, was flown across the Pacific to the battlefronts.

This program is being expanded greatly by the Red Cross and the Department of Defense. To maintain it, so that no fighting man need suffer for lack of blood, make a generous donation to your Red Cross 1952 Fund Campaign.

In addition to the base pay boost, the Senate group also made provisions for cost-of-living increases in quarters and allowances for officers and enlisted men.

Richard B. Russell (D., Ga.), chairman of the committee, explained that the Senate group felt it should increase the items directly related to the cost of living rather than give a large across-the-board pay increase.

It was also pointed out that some enlisted men with families would fare better under the Senate version of the bill than under the House-passed bill which provided a flat 10 per cent across-the-board increase.

Pertinent changes the Senate committee approved:

1. Subsistence allowance for officers—now \$42; Senate bill, \$54.

2. Subsistence for enlisted personnel authorized to mess off the post—now \$2.25 a day; Senate bill, \$2.75 a day.

3. Rental allowances for officers not furnished housing—no increase; with one or two dependents, \$10 a month increase; with three or more dependents, \$20 a month increase.

4. Quarters allowances for enlisted men not furnished housing—now \$45 a month for all grades for men without dependents; Senate bill, \$51. (This applies to men in pay grades 1, 2, and 3 with one dependent.)

For enlisted personnel with two dependents in the lowest grades or one or two dependents in the top enlisted grades—now \$67 per month; \$80 in the Senate bill. Enlisted personnel with more than two dependents—in all grades—now \$85 a month, and \$100 in Senate bill.

"Hey Buelah, Kukla,—hey Fran. Come here. Come here!"

"Ollie, what's wrong? What's all the shouting for?"

"We're going to join the Navy March 18th."

"Join the Navy? Fran, I think Ollie has been working too hard!"

"But he's right, Kukla, we're going to NNMC on March 18 at 1500 and put on a show in the auditorium for the patients and staff. Right Buelah?"

"Right. All of us—Kukla, Fran, and Ollie, and the rest of the cast of the Kuklapolitans. Even Burr Tillstrom is thinking of coming along."

Recruiters Take Time to Recruit Blood

Left to right: Robert Stevens, YNC, Technical Sgt. George Carr, Master Sgt. Earl H. See, and LT Margaret Kloetzli, NC.

The smiling four are from the Navy-Marine Recruiting Station, 400 Pennsylvania Avenue. A group comes out here regularly to donate blood. Miss Kloetzli has organized the staff of about 40 and Marine Corps furnishes transportation.

While they have no quota, the entire staff has volunteered to donate. Master Sgt. See typifies their attitude when he says, "I may do it myself in a couple of months."

Moon Goddess

Pale golden moon — on your throne in the sky
Serenaded 'til dawn by night's lullaby,
Proud, silent beauty, you reign all alone
Serene in the knowledge of secrets you've known.

How long will men worship; slaves at your court?
Bewitched by the magic your beauty has wrought.
What words do they whisper to you from below,
What dreams are forsaken in morning's cold glow?

Through time eternal, oh queen of the night,
You've wooed young lovers with soft gleaming light.
Enchanted by knavish stars from your domain,
Forever your servants they're pledged to remain.

And so from your kingdom, your pale shining ray
Will rule all your subjects 'til breaking of day;
Then gathering your moonbeams, you flee from the sky,
To hide from the sunlight, 'til evening is nigh!

Then once more in splendor, you'll shine from above
To touch with your madness, all those in love;
To bind them securely, so bewitched by your spell
That slaves of the moonlight, forever they'll dwell!

—R. CONAWAY, NMRI

Five-Day Mission Starts Next Week

The Reverend John T. Tracy, a member of the Missionary Oblates of Mary Immaculate, now stationed in the Oblate Community at Petersburg, Va., will conduct a mission at NNMC from Mar. 17 to 21.

During the week of Mar. 17, Monday through Friday, the mission services will be held in the main auditorium from 1730 to 1830—one hour and no more. Each service will consist of the recitation of the rosary, a short instruction, an interesting sermon, and

Rev. John T. Tracy

benediction of the Most Blessed Sacrament. Special music will be provided.

Each day three Masses will be celebrated: 0600, 0715, and 1205. At each Mass Father Tracy will deliver a short instruction. All military personnel and friends are cordially invited to attend the mission.

Father Tracy preached parochial missions in many cities throughout the United States and Canada from 1936 until 1940. At that time he volunteered his services as a chaplain in the Air Force.

For many months he was attached to the Eighth Air Force Headquarters in England. He distinguished himself as a zealous priest and a daring airman, sharing the strain of bomber crews on many of their hazardous missions over Germany. At the close of hostilities he had reached the rank of Colonel and then returned to civilian life and resumed his missionary labors.

"A man of his wide experience," says NNMC's Chaplain McGowan, "will certainly have much to offer by way of instruction and encouragement in our encounter with the distressing problems of living good, moral, and upright lives."

Here at the Medical Center we are dedicated to the 'healing of the body and the strengthening of the soul.' At this time then, in our untiring and most unselfish efforts to heal the bodies of others, we should seriously engage ourselves in the work of strengthening our own souls during this very special occasion of abundant spiritual blessings."

Diaper Derby

Feb. 11—Donna Lynn Baker, 7 lbs., 12½ oz., new daughter of Donald E. Baker, HM1, Tower 4, NH.

Feb. 21—Elizabeth Ann Vaupel, 9 lbs., new daughter of LCDR George E. Vaupel, MC, USN, Chief, Physical Medicine, NH.

Feb. 25—Jeffery Alan Smith, 7 lbs., 13½ oz., new son of Todd M. Smith, HM3, Tower 15, NH.

The Chaplain's Corner

by Chaplain H. Grady Gatlin

The Mother of All

The Red Cross on the wings of charity traverses the entire globe and gives succor to those who have been stricken by calamity and disaster. This Mother of All follows in the path of catastrophes with the same mercy and benevolence. Born in the moment of need this great organization has encircled the world and has given aid to millions in distress. The Red Cross has no sectional or color line and knows no creed, nationality, nor national boundaries. Its motto is SERVICE.

The primary purpose of the Red Cross originally was to care for the sick, the wounded, and prisoners in time of war. In late years, however, this movement has shown a world-wide tendency in the alleviation of human suffering wherever found.

The American Red Cross was founded in 1881 under the name of the American Association of the Red Cross and was incorporated in 1883 as the American National Red Cross. The President of the United States became its president and the War Department its auditor.

The Red Cross Campaign is now on and everyone will have an opportunity to have a part in this great program of mercy.

My Secret Ambition

Have you a secret ambition,
One that just could not be told,
That you dream about every evening
When you come back home to the fold?

Well, I have a secret passion
That I have nourished for many years.
If I told you my secret ambition,
You might laugh till you burst into tears.

Do you think it's to star in the movies,
With a billing very near to the top;
Or would I want to be a torch singer,
Wailing "Rag Mop, Rag Mop, Rag Mop"?

Would, perhaps I be a politician,
With portfolio, vise, and such?
No, to be a famous lady
Does not interest me very much.

Would I be a society leader
With social position and money?
No, that does not attract me at all;
I guess you think I am funny.

Fame and fortune are not for me;
Perhaps my I.Q.'s laggin'
For I yearn to drive the tail-end wheels
Of a hook-and-ladder wagon.

—MILDRED HYNES, NMRI

Pardon Me, May I...; Theme at Glenbrook

Cutting-in at the USO Open House at the Glenbrook Club. John Bochino, of NDS, is cut in on by Pfc. Herb Ridgeley from Belvoir, while dancing with USO Junior Hostess Pamela Shillan.

Some of the best and most inexpensive liberty lies within walking distance of this station. Have you ever been to the USO Open House at the Glenbrook Club, 8600 Wisconsin Ave., across Wisconsin Ave. from the south end of NNMC? Any Thursday night from 2000 to 2300 you'll find dancing, cards,

and refreshments there with junior hostesses to share the fun.

On the second Saturday of each month there's an orchestra dance at Glenbrook. On the fourth Saturday of each month professional callers will be at the club with a square dance to really make the club jump.

0830—Mass—Main Auditorium

Jewish

Congregation Beth El of Montgomery County will hold services every Friday night at 8:15 p.m. in the Social Hall of the All Saints Episcopal Church, Chevy Chase Circle. All Service Personnel are invited to attend.

The services of Rabbi Harry Kaufman, representing the Jewish Welfare Board, are available to all Jewish Personnel and Patients at the National Naval Medical Center. Rabbi Kaufman may be reached by calling the Chaplain's Office, Ext. 324, or by call direct—Office: RA. 5371—Home: GE. 0755.

Protestant Choir Seeks More Voices

If you heard the five young ladies rendering "Prayer Performed" by Stenson following the scripture lesson in the Protestant services yesterday, perhaps you had the same thought they did: Sound good, but would sound better with more voices (especially male) added.

So, if you can sing, like to sing, and can even slightly read music, you're just the one they're looking for, and are invited to contact Chaplain Gatlin's office immediately. (Rm. 203, Ext. 324.)

The choir is still in the throes of organization and no definite time for rehearsals have been established with organist Mrs. Reynolds. Plank members include Waverly Lucile Thompson, Delores Arnold, Mary Casillas, Marcia Scott, and Peggie Wilkie. Patients, staff, or civilian workers are all urged to join.

Success consists of getting one more time than you fall down. We all can shout, but it's the fellow who's heard when he whispers that goes places.

MARCH 10, 1946

Research's Format Editor Has Talent With \$30,000 in Prizes to Prove It

Do you need aid in developing a thesis or winning a contest? Or possibly you require assistance in submitting an article for publication or you're looking for a person who can converse in Spanish or Portuguese or write in Braille.

Do you want information about the Americas? Mrs. Francis Maune Gilchrist, the Format Editor of NMRI, a woman who believes that life is to be lived fully, has a singular knowledge in all of these fields.

At the age of 13, she entered her first contest, submitted a drawing and article about a mythological character, and won the first prize of \$100. Since then she has netted over \$30,000 in prizes (including Packards, one Buick, a fur hat, two TV combination sets, a trip to Europe, a cruise to the West Indies, three \$1000 checks, as many others) in every type of contest—tall stories, 25-word statements, recipe, and Eastman-Kodak photographic contests.

During her trip to Europe she sent back daily reports of her experiences which were carried by newspapers in the States.

In the West Indies she paid a piggie 25 cents to pose for a picture and entered it in 17 photographic contests. She won 17 prizes totaling \$500.

Her knowledge of South America and particularly Brazil was greatly expanded when she accepted a job in WWII with the Rubber Development Corp., doing publicity and photographic work in Brazil. Although most of her work was in the quaint town of Manaus, located 1000 miles up the Amazon, she traveled by air to every section of the continent.

A choice collection of her Brazilian photographs was displayed on her return at the Pan American Union and was seen by a record crowd. She has given over 100 illustrated lectures both locally and in numerous other cities in clubs and educational organizations on different aspects of Brazilian life and culture.

Brazilian students coming to this country on scholarships have found, in her house, a home away from home. She continues to interest herself in Brazilian charities and mission work.

Recently a Brazilian midshipman from the SS Almirante Barroso, studying at the Naval Gun School, became seriously ill and was admitted to this hospital on March 3-A.

Sylvio dos Santos, an honor student of the Brazilian Naval Academy,

Mrs. F. M. Gilchrist

enemy and recently decorated by the Secretary of his Navy, could not speak a word of English. The nurses and doctors could not speak Portuguese. Mrs. Gilchrist was located. She translated back and forth—doctors-nurses-patient, etc.—until all questions were satisfactorily answered.

She visited him daily, cooked up some local Brazilian recipes, called in some local Brazilian students, and soon Sylvio was seeing the sights of the Nation's Capital from the window of the prize Packard. Writing Braille is another facet of this remarkable woman's ability. An interest in the blind spurred her to study this medium and, for 20 years, she has written articles for the blind.

Retiring soon, she wants to continue with her first love—writing. Already many of her features, illustrated with her own photography or drawings, have been sold to national magazines.

When Mrs. Gilchrist first came to NMRI, she was the widow of CAPT Frederick Graves Irwin, one of the "Flying Irwins" of WWI fame. In 1947, eight years after CAPT Irwin's death, she married Mr. A. R. Gilchrist, a native Washingtonian. Mr. and Mrs. Gilchrist now reside at Pooks Hill in Bethesda.

Red Cross:

RC Asks Your Aid in 1952 Campaign

To maintain the overall Red Cross program for the coming year, at least \$85,000,000 is needed. Due to the growth of the Armed Forces and veteran population, extended programs of morale and welfare are needed. The Blood Program is essential to maintain continuous supplies of blood for the Armed Forces and civilian hospitals.

The inevitability of natural disasters necessitates a constant state of preparedness. And last, but not least, the hazards of everyday living plus the possibility of a national emergency has placed upon the Red Cross the responsibility of training citizens in first aid, water safety, home nursing.

During the last fiscal year in the United States alone the number of military installations staffed by Red Cross workers rose from 142 to 170 and the number of field offices increased from 578 to 1039.

By the end of the fiscal year a total of 138 military hospitals in the United States and overseas were receiving the service of a

resident Red Cross staff—an increase of 27 hospitals during the year.

With this growth of the military, there will be a concomitant increase in the veteran population in the United States. In 1952-53 the Red Cross will spend of its total budget \$38,400,000 to meet these needs of servicemen, veterans and their families.

Field directors with combat units and at military installations, professional hospital workers aided by trained volunteers, and chapter Home Service workers serving GI's and their families in local communities combine to maintain a network of service from the Red Cross to our Armed Forces.

Last year, Red Cross spent \$26,800,000 on services to the Armed Forces. Financial assistance to servicemen and their dependents totaled \$10,129,071. Your donation to the 1952 Red Cross Fund Campaign will help carry on this necessary work.

Your Navy Belles

by George

This being Leap Year we Waves felt we were justified in having holiday routine on Feb. 29, but no luck.

Newest welcomes are extended to Mary L. Cox, PNSA and Doris Dickerson, PNSA, for Center Command, and Jean Stoltz, HA and Ethel Hammett, HA for Hospital.

Scenes from a typical Wednesday night: Connie knitting . . . Petie getting in the mood to hold field day in her locker . . . Boots writing letters . . . Delores fighting a cold . . . Josh reading a book . . . Joan Madsen running the buffer (or vice versa?) . . . Jane tormenting everyone . . . Ellen and Nadine making plans to take Clark to the airport after he is discharged.

Minnie and Salty absorbed in the Corpsbook studying the chapters on Field Sanitation (are you planning a trip with the FMF?) . . . Shirley teasing Mary while she cleans the apartment . . . Snowflake, Ann, and Web working out a budget so they can get a car for spring.

Lou out of the hospital (are you back in the hair cutting business yet?) . . . Norma out putting miles on her new Dodge . . . Mary Jane home on a short leave . . . Possi and Ault watching a good TV show . . . and Casey waiting for the fights to come on . . . Ruby listening to records in the front room . . . They tell me she is going to be our next bride.

The basketball team is sorry to lose Maggie as a player but her help from the sidelines is great. We're glad you're around again after your surgery. Guess you won't be conducting any more broad jumping antics in the wash room for a while.

Wrapped Up in Work

Intense interest has developed in a course recently begun at NDS for DTG 2½ entitled "Technique of Film Projection." The course is replete with down-to-the-ground material for the projectionist.

Instructor W. Groce, DT1, shown here in some of the more involved processes of determining the direction of film flow, states categorically, "In projecting film of the narrow gauge, semi-transparent type, it is imperative that some portion of the film pass through the machine to produce visible results."

D. C. Volunteer Information Services Can Help You See Washington's Sights

Over four million people traveled thousands of miles last year to come to Washington to see their Nation's Capital and its handsome monuments. If you are only seven miles away, how's about it?

Maybe you haven't seen Mt. Vernon—George Washington's beautiful home—or the magnificent U. S. Capitol. You could spend days getting acquainted with Washington and what it stands for.

'Tennessee' Wave Tracks Down Germs

Pat DeBerry prepares a specimen for inoculation into a guinea pig—part of a test for tuberculosis.

If you walk past the bacteriology lab late some night, chances are you might see an industrious Wave peering into her microscope. Her name will be Patricia DeBerry, a reserve HM2, who often stays overtime to finish up her work.

To this brown-eyed Wave, a test tube, bunsen burner, microscope, or platinum loop is just as familiar as a tube of lipstick.

Pat comes from Humboldt, Tenn. While she was attending a lab school in St. Louis, Mo., she became very interested in bacteriology. In 1950 she completed a bacteriology major and walked away from the University of Tennessee with her diploma.

An inactive reservist, Pat was recalled last July and now has 22 months of active service. She enjoys her job of isolating and analyzing organisms which cause infection.

Pat likes to analyze people too—not in a cold, scientific way, but because as she says in her warm southern drawl, "I like people. I like to get an insight into what they are thinking."

This interest is reflected in her choice of books, too, as she prefers novels which portray character studies.

This year Pat turned out for basketball—a game she had never played because her mother considered it "unladylike." The Admiralties will tell you that what Pat lacks in skill, she makes up in determination. She has learned to play guard as well as many who have played for years.

One of her chief civilian interests is Soma Id Sigmund. That's a big name for a little Boston terrier of hers who stays with Pat's mother now. "Soma," as he is called for short, was named by a college roommate (a psychology major). Translated, the dog's name is a combination of Latin for body and ego and Freud's first name.

IDEAS ARE WORTH MONEY

You can read, if you like, the very Declaration of Independence itself that put into words the causes of the Revolutionary War. (It is in the Library of Congress across the lawn from the Capitol.)

If you have a weekend liberty, and decide to go to Washington to have a look-see, the Volunteer Information Service of the Armed Services Hospitality Committee can help you plan your time.

They can include dances with plenty of junior hostesses, refreshments, sometimes free hot suppers. They know how to tell you how to find inexpensive lodgings—clean and well kept. They can give you advice on shopping, watch repairs, and tailor shops.

They can help you find a room for your wife and children if they come to town. They work only to help you enjoy your stay in Washington. Look them up and you'll no longer be one of the window shoppers who never knows where to go or what to do.

Clip these addresses and put them in your "little black book"—Volunteer Information Service desks:

USO-TA Lounge, Union Station, NA 5374, open 24 hours a day.

USO-Lafayette Square Club, 719 Madison Place, N.W., ST 9363, 0900 to 2230.

Armed Forces Center of the Episcopal Churches of Washington, 1317 G Street, N.W., ME 5787, 1300 to 2200.

Lutheran Service Lounge, 738 Jackson Place, N.W., DI 7736, Monday through Thursday, 0900 to 1800; Friday, 0900 to 2200; Saturday, 0900 to 2300; Sunday, 0900 to 2100.

The Evening Star Lobby, 11th and Pennsylvania Avenue, N.W., RE 0495, Saturday, 1300 to 2000; Sunday, 1000 to 2000.

Jewish Community Center, 16th and Q Streets, N.W., DU 6162, Thursday and Sunday, 1930 to 2200.

Soldiers, Sailors, Marines and Airmen's Club, 1015 L Street, N.W., AD 0141, Saturday, 0930 to 1600; Sunday, 0930 to 1300.

USO-YWCA, 17th and K Streets, N.W., ME 2100, 1830 to 2200.

YMCA, 1736 G Street, N.W., NA 8250, 2030 to 2230.

For hotel reservations, RE 2600, Monday through Friday, 0900 to 1700.

Especially recommended is the Saturday P.M. dance and hot supper at the Armed Forces Center of the Episcopal Churches, 1317 G Street, N.W. (right down town) Saturdays, 1630 to 1930—orchestra.

VA Insurance Payments Coming Slow but Sure

If you're wondering when your check for your NSLI 1951 dividend is coming, just be patient. Because of the complications brought on by the enactment of "The Servicemen's Indemnity and Insurance Acts of 1951" last April, the payments have been greatly slowed down.

It is difficult to predict when the in-service dividend payments will be completed. It may be after April 1, 1952, target date for completion which was established last year.

Considerable progress is being made, and more than 1,000,000 accounts have been certified to the Treasury for payment. It has been estimated that there are nearly 3,000,000 in-service NSLI policies on which the 1951 dividend is payable.

Author, Lecturer, and Former Countess Says She Prefers Role of Navy Wife

Being the wife of a "wonderful, handsome Navy Captain" is the part of her life that Irina Skariatina, once a member of the Russian royal family, and now a noted author, lecturer and war correspondent, looks back on as the most priceless experience of her life.

Known to her friends as Mrs. Blakeslee, widow of the late CAPT Victor F. Blakeslee (Navy Class of 1920), the 54-year-old lady's life story reads like an exciting novel. Her own story, as a matter of fact, has furnished much of the material for the seven books credited to her in the 1950 Who's Who.

"Gentle, kind, efficient, wonderful..." are a few of the adjectives the Russian-American author uses to describe Dr. T. E. Atkinson of EENT who performed a delicate eye operation for her in February.

A doctor herself, Mrs. Blakeslee was given a local anesthetic and watched with fascination her own operation. A patient on Ward 128, she was always cheerful, and grateful for the care she received. She confesses that she is partial to the Navy, and feels right at home at NNM.

Born in St. Petersburg, Russia, the daughter of General Wladimir and Princess Mary (Lobanov of Rostov) Skariatina, Mrs. Blakeslee received the liberal education offered to members of the royal family. She was maid of honor to the Empress of Russia.

She obtained her M.D. from the St. Eugenia School of Red Cross Nursing and Medical Institute. Although she never practiced medicine, she saved her own life with her degree.

When the Tsar's government was overthrown members of royalty were mercilessly slaughtered. Mrs. Blakeslee was imprisoned for several months and sentenced to death. A group of American doctors became interested in her and because of her M.D. degree were able to get her safely out of the country.

It was in 1923 that she became part of America's "melting pot."

She earned her own way as a French instructor, living in one of "those amazing American apartments" of which the tiny, efficient kitchen was always a source of amusement to her.

She married CAPT Blakeslee in 1926, and three years later became a naturalized citizen. Happy with her new country and new life, the words poured out. Her seven books deal mostly with the contrast of Russian and American life. She has lectured from one side of the U.S. to the other.

During WWII she returned to Russia—this time as a foreign correspondent for Collier's. She describes her return in her book, "First to go Back."

Through Africa, Egypt, Palestine, Iraq, Iran, and Russia she followed the fighting sending back human interest stories depicting the medical corps, and the role of women in service. Meanwhile, CAPT Blakeslee was traveling throughout Europe and the Pacific with the Navy.

Returning to America, after having witnessed the Russian revolution, two world wars, seeing death and tragedy at every turn, the spirited writer had yet to face the greatest tragedy of her life. CAPT Blakeslee died of a heart attack, after being warned that to continue his vigorous Navy life meant certain death for him.

Now Mrs. Blakeslee lives alone in Washington, still writing, and active in a long list of literary, geographic, and social clubs. She still radiates her personal happiness with her adopted country and the Navy, and says of Bethesda, "I love to come here; I feel as if I am still sharing part of my husband's life."

I and E:

USAFI Offering Over 300 Courses

Taking part in the education program of the U. S. Armed Forces Institute can help you in a good many ways. For example, experience in World War II showed that better educated servicemen were generally able to do their jobs better and advance in rating more rapidly.

Naturally, high school, technical school or college credit can help you succeed in civilian life later on. More than 300 correspondence and self-teaching courses are available to service personnel through USAFI.

Though many people at this activity are now taking advantage of this opportunity, more are urged to consider participating in this civilian type educational program. Long-term patients, in particular, have an unequalled chance to use their convalescent time constructively.

The following personnel have successfully completed USAFI courses at this station since Dec. 1, 1951:

Sgt. John B. Benedict, USMC, of Ward 136—The Small Business I (completed with distinction) and The Small Business II (completed satisfactorily).

Augustine Condetti, BM2, USN, Ward 5-C—Bookkeeping and Accounting I (completed with distinction).

Lloyd E. Davis, HN, USN of NMS—Plane Trigonometry (completed satisfactorily).

Donald O. Morrow, ADAN, USN, Ward 3-A, Writings of American Authors I (completed satisfactorily).

Two more men who have successfully completed GED tests since our last report: Ray A. Norris, HN, USN of NH and Sgt. Harry Northcraft, USMC, from Ward 107 passed high school level GED tests.

Information about USAFI courses and GED tests is available at the I and E Office, Bldg. 102.

Mr. Anderson Explains Food Inspections

Left to right: John E. Joy, HMC, NSHA student; Bernard V. Hildebrand, HMC, NSHA student; Mr. W. W. Anderson, guest lecturer, and LT Earl F. Hickey, MSC, officer in charge of food services, NSHA.

Energetic 'Jackson' Manages CPO Club

John M. Reynolds

Energetic is perhaps the one word that fits Chief John M. Reynolds better than any other descriptive adjective.

Where things are happening you can bet that the mind behind the scenes that sees they happen on time and are run right is that of the busy chief of the Special Services Department.

He has just taken over the job of Manager and Treasurer of the CPO Mess (open) which was vacated Feb. 22.

His academic background is well suited to the new task, as he has an AB in Economics from Providence College, R. I. After WWII he attended Northeastern University at night for two years studying accounting and later he studied insurance for one year at the University of Rhode Island.

Casting his lot with the Navy in 1942 he saw the war from both the Atlantic and Pacific, serving on the net tender USS Adario and the transport USS West Point (now SS America). It took him only three of his four Navy years to become an HMC.

Called back in the fall of 1950, Chief Reynolds has done more than his share in helping NNM's sports program. Besides being a strong golf enthusiast, a top-notch bowler, and a constant threat across the ping pong net, he takes an active interest in all team sports.

Whether it be football, softball, or basketball, you will often hear the booming voice of "Jackson" calling the decisions as he officiates. And sports participants will testify that those decisions are called fast and accurately, terms which apply to everything the chief does.

It will be back to "Mr." Reynolds in a few months. When his reserve time is up he plans to re-assume the job of Supervisor of the Accounts and Collection De-

Mr. W. W. Anderson, Supervising Inspector of the Fresh Products Standardization and Inspection Branch, U.S. Department of Agriculture, presented two very informative lectures on Standards of Inspection of Fruits and Vegetables, together with illustrative matter, to the students in the Food Service Course at the Naval School of Hospital Administration recently.

Mr. Anderson is the Senior Supervisor of Maryland, Delaware, Virginia, and West Virginia and has over 400 other inspectors under him. His work is of such nature that he is subject to go anywhere at any time.

He pointed out how the government is protecting the public by providing these inspections of fruits and vegetables to determine their fitness for human consumption and assigning the various grades to insure that the public is receiving the most for its money.

Dental Explorer

by C. Connor

ORDER OF THE DAY: One service flag (complete with star hand-embroidered by Maggie) for Nick, who having been at the old homestead for such a long while is finally weighing anchor and shoving off for the deep blue sea. (It will have to be a mail order love affair from here on in.)

It certainly is good to see Mrs. "Mac," Chuck Farthing, and Dick Strouth back to duty again. Welcome home.

It looks like Milty McKline (serving a 229-day stretch) will finally be getting his sea legs. Every member of the naval service should spend a hitch at sea—it says here in small script.

With all these orders to sea we Waves had better start hiring rowboats on Sundays and test our sea legs (it could prove fatal).

Magliocco will no doubt be a very sad sack, as I understand he has to leave his blonde at home. Wonder if she's housebroken yet? Oh, I might mention the "blonde" is a real sweet little cocker spaniel.

Just discovered that Moyser and Larson are two great coffee lovers. Wonder what lies behind it all? This can prove interesting; we must investigate these coffee rendezvous.

Skinner has just come into a small fortune. You know the old saying Shirl, "Share the Wealth." Hint, hint—I can see that Easter outfit now.

Well, that's it for this round, so till next time smooth sailing to all hands from The Gal from the Hub.

partment of the Providence Washington Insurance Co. in his home town of Providence.

MARCH 10, 1952

Honorman Prone to Take It Lying Down

Jefferson W. Hamby, HM2, is the first Blood Bank Technic student to receive his Certificate of Special Instruction in bed. LT Edna E. McCormick, OinC of the Processing Room, stands by while CDR V. E. Martens, new Director of Laboratories, presents the certificate to the honorman of the class.

Hamby Gets Top Honors Despite Week's Illness

Although Jefferson W. Hamby missed one week of the eight-week course in Blood Bank Technic due to illness, he still emerged honor student with an average of 95.1. The new Blood Bank technician has been assigned to NMRI to work on research in this field.

Also graduating from this specialized course for lab techs with field experience were Anthony Howard, HM3; Hobart L. Craft, HM2; and Charles J. Speigle, HM2. Howard has orders to the USS Columbus, Craft to USNH Philadelphia, and Speigle to USNH Bainbridge.

Social Security Sought For Members of Service

(AFPS)—Members of the Armed Forces may soon be covered by Social Security. A bill about to be introduced in Congress would grant Social Security coverage to numerous occupations not already covered, including the Armed Forces.

Social Security coverage that was credited to personnel who served during WWII would be further extended to men who serve until Dec. 31, 1952. At the beginning of 1953 Servicemen would then have to pay for their coverage.

Did You Know That --

To feed patients and staff of NNM, 7,000 gallons of bulk milk and 50,000 to 73,000 ½-pints of milk are required each month, 900 dozens of eggs each week, and 220 pounds of flour each day.

The NNM reservation covers 242 acres.

NH Personnel Office handles about 70 transfers and 105 changes in rates a month.

Central Dressing Room loans 150 syringes a day to wards and different departments.

There are 5 miles of roads, exclusive of parking areas and 4½ miles of sidewalks within the NNM's boundaries.

The Post Office here at NNM handles about 200 No. 1 sacks of mail each and every week. This is exclusive of parcel post shipments.

NNM's water consumption averages approximately 18,000,000 gallons per month.

The Mess Hall serves 198,000 rations a month.

The Blood Bank dispenses 450 pints of blood in the hospital each month. Last year, the Bank received a total of 5,334 pints of blood from this and other military activities in the area.

The Library, with a total of 11,279 books, loaned almost four times that last year. The total books loaned were 40,500.

The Pharmacy fills approximately 1,750 prescriptions a month for dependents and the same number for in-patients.

The linen room hands out 2,400 pieces of linen each day.

Coach's Corner

With the golf season just around the corner, Admiral W. J. C. Agnew has initiated the following improvements to the golf course—the present starting tee to be enlarged, just short of the creek. This will create a terraced effect, allow easy maintenance and when the markers are placed, serve to make the first hole a real dog-leg . . . out-of-bounds markers to be placed in the newly planted trees along the fairway, coming up from the first tee. With a loss of stroke and distance as the penalty for an errant mass of gutta percha, very few balls should trickle to the creek, let alone caressing the windshields of parked cars. Playing number one from the top of the hill as a par 3 during the week when parking lot is filled will also serve to prevent body dents.

The logs on seven's fairway just across the pond will be snaked up to the woods. If ever there was a factor on the golf course which held play, this was it. The woodpeckers would fly from this corner when automatic slicers like Woody Noble, Harry Gold, Stretch Gardner and Ablo Wells crossed the bridge, and, speaking of logs, everyone has admired the benches on 7, 8, and 9 made by Bob Williams and the crosscut guys. Their handiwork is soon to appear on the remaining tees. The metal benches could be painted every week and seven days later would look like a bad case of sunburn. Furthermore, they were always covered with dust and in the middle of summer a bit warm. A log bag-parking rack is to be placed to the left of the starting tee, with room for twelve bags. Starters and players coming from number nine will alternate bags and thus preserve an even flow of play. Funny, isn't it, that the only arguments ever heard on the first tee were never among local personnel but always some visiting firemen.

For the past three months, the sport sheet of the NEWS has been devoted in a large part to the cage performances of the Center hoopsters. Arnell Brothers sliced across the key for a one hand push . . . Big George rebounded, pivoting in mid-air to burn the twine for two . . . Annie DeVice sliced on a lateral screen set-up by Hands Davis and checked a mid-court for two markers. So, the other evening I hid myself over to the gym to observe the Admiralettes in action against the Fort Myer contingent. An enthusiastic group of bleacherites greeted the blue and whites as they ran through their warm-up paces with Coach Margaret McQuarrie confined to the bench with an injured heel. By final count 51 rooters were in the stands plus two young ladies in the balcony, one of whom golfs with a glove on either hand. Fort Myer's coaching staff was ably represented by two WAC lieutenants who had their charges in a nice warm-up play with three ball handlers, a simple hitting of the post, effective in that there is plenty of movement, something that the Varsity never did have all season.

In girls' basketball there are six players on a team with three players being restricted to each half of the court. When a team makes a basket the opponents are awarded the ball in mid-court for a pass into their scoring territory . . . Carlson of the Admiralettes is moving into the center circle to await the referee's whistle. There's the toss, taken by Abrams of the soldiers using a high dribble toward the sideline. Carlson moves in with a nice defensive glide, Abrams passes to Fellows and the Fort Myer center takes a one hand push shot from the corner which is rolling around the rim and off as Carlson moves in clearing the boards, throws to the side with Skinner bringing the ball up to the middle stripe. Madsen is moving along mid-court, in an attempted over- and pass. Skinner's pass is intercepted by Fort Myer, a pass from Abrams to Fellows with the tall center faking left and pivoting to the right as she lets a push shot fly which rims the hoop . . . Carlson and inner double-team Abrams allowing Carlson to get the ball . . . Carl-whips it to DeBerry dribbling out to the middle and on an attempted row-in has the ball intercepted by Argue of Myer . . . Madsen closes on Argue who is trying to pass off. There's a bit of a scuffle and the referee calls a holding penalty against Madsen . . . Argue does not shoot but tosses to Fellows who calmly walks to the charity line, misses the ball three times, shoots and gathers in a one-pointer.

Fort Myer takes the ball on the sideline. Abrams throws in to Fellows who pivots and, using a jump shot, misses the hoop . . . Abrams rebounding but as she comes down with it, Carlson neatly steals the ball, passing to Skinner, hovering on the sideline . . . Skinner starts up floor as Madsen moves over. There's the pass to front court with Skinner feinting the Fort Myer defense out of position, what a beautiful shot she drives in toward the key with Allen pulling out of the free-throw lane. Nice maneuvering. That's better than the men's team did all season long . . . Madsen stops on the fifteen-foot line, arches a push shot off the backboard, hits the rim and Argue, a plenty tall reaches up with prehensile arms, gathers in the ball, dribbles up center, passes to Fellows at the mid-court marker . . . Fellows pivots and bounce-passes to Abrams who has cut across the key. Up she goes with a push shot which misses . . . Carlson is moving in to rebound. She hits it. What a rebounder! . . . Abrams following her own shot ties up Carlson and there is a whistle on the play with a toss-up . . . Abrams controls the tap to Fellows who takes a jump shot and makes it. What a beauty. The way she is handling herself on the floor makes it evident that the girl comes from a family of at least six boys; looks like a center . . . Madsen has the ball at the middle. Her potential receiver are closely guarded. She passes and Argue moves in, attempting to steal the ball, but Madsen is neatly faking her out of her shoes, tosses the ball to Allen . . . Allen to Crouch with a return pass to Madsen hitting up the key. Madsen takes the pass, pivots and there is a bucket for the Admiralettes.

Fort Myer has the ball at the middle stripe; a pass in to Abrams who dribbles past Skinner and is going up the middle . . . passes over Fellows who comes across the key, up with a two hander and in . . . Madsen has the ball. Madsen to Crouch, a return to Madsen and a pass to Allen as she drifts across the key and we have another one-pointer for the Blue and White . . . Fort Myer has the ball on the sideline, closely guarded by Skinner . . . Abrams passes off to Fellows who pivots and shoots . . . Carlson clears for Bethesda and in bounding is called for a hiping foul . . . Abrams, a forward who shows considerable vigor in masticating the mastic, saunters to the free-throw line, accepts the ball from the referee, bounces once, a push shot . . . hits the backboard, the rim, is hesitating and drops in. Space does not permit a recant of the entire game but the girls are GOOD and in losing play more teamwork and spirit than the Varsity.

RCB 10, 1952

Allen Goes Up for Two as Admiralettes Pause for One

Left: Ester "Al" Allen sends one up from inside the key. Right: Latest roster of the Admiralettes stands behind Sports Coordinator and player Maggie McQuarrie. (l. to r.) Louise Miller (timekeeper), Ester Allen, Beverly Carlson, Joan Madsen, Lorraine Link, Pat DeBerry, Joyce Crouch, Shirley Skinner, Mary Cox, and Doris Salisbury (manager-coach). Blue-and-white members not pictured are Miss Helen Jarvi, Nonnie Hawkins, Billie Lawton, and Phyllis McElfish (scorekeeper).

Bolling Takes Waves Via Six-Point Lead

Fighting all the way, the Admiralettes dropped a close 38-32 game to the visiting Bolling Field Wafs last Thursday night in the NNM gym. Although the Wafs held the lead after the first five minutes, the margin never exceeded eight points.

Allen and Madsen chalked up 10 tallies apiece with "Boots" Carlson claiming 7 and Crouch 5.

Holding down the guard spots were Skinner, DeBerry, Jarvi, and Carlson. Carlson shifted to forward in the third quarter with both Crouch and Madsen taking a turn at guard. New forward Ellis was held in reserve.

The Waves will face the Andrews Field Wafs in a replay at Bolling Field tonight, and Thursday they will welcome the Ft. Myer Wafs in a home game at 1930. All spectators are urged to come and support the gals.

Smallest Member Of X-ray Bowlers Amazes Everyone

Smallest member on the X-ray intramural bowling team this year was only five feet, three and a half inches tall, weighing 120 pounds. But size wasn't what made this player different, for you see X-ray's second highest scorer was a Wave—the first Wave ever to participate in NNM's intramural program.

Ruby Salloum, HM3, former student and now X-ray staff, volunteered to help form a team when the Lab 17 team dropped out and X-ray filled in.

If anyone had any doubts about the capabilities of the quiet Wave they were quickly dispelled the first match. Ruby hit the pins for 183, 180, 151, totaling 514 and averaging 171—scores which compare favorably with the best men bowlers in the league.

But true to the Corps, she rolled her best game of the season—a cool 207—for the Waves' team of which she was already a member.

Ruby's bowling began in earnest in her hometown of Detroit. While working and playing for the telephone company there, she won a trophy for high series.

In the Navy for less than two years, the Wave third class has big plans for next month. On April 5th she plans to say yes to Charles Padgett, Lab 17 student, in the Protestant chapel here.

They Could Happen!

Dillies in Sports

(AFPS)—Did you know a golfer could beat an opponent's hole-in-one? That a boxer could win his fight while lying unconscious outside the ring? And a ball carrier in football can score a touchdown without crossing the goal line? It's all true and covered by the rules. None of these dillies have happened yet, but they're all possibilities.

Here are a few instances: Two opponents are tied going into the 18th hole in golf when B sinks his ball on the first stroke. What can A do? Simple—he aims his swing at B's caddie and is awarded half the hole if his aim is good. The rule states that if an opponent or his caddie interferes with the ball in motion, his side loses the advantage.

Speed merchant A, a shifty halfback in football, breaks into the clear on his own 20-yard line and romps beyond his pursuers down the sidelines. A substitute tackle on B Team, unable to restrain himself, leaps from the bench and tackles A on the B 45. The referee could give A's team an additional 15 yards, but that wouldn't be fair for A could have made the whole distance. So, he gives A the touchdown and the hero's role in the contest.

Towards the end of a slugging fight, two boys land simultaneous right hand punches. Fighter A sails through the ropes and B drops in the middle of the ring. B gets up just a little too late for the 10-count, but A is still out. The referee continues to count and at 14 A shows signs of life. At 18 he's on his way back to the ring, and at 20 he's standing in it. A wins under the new ruling. It allows a man knocked out of the ring a 20-count to get on his feet and return to the ring.

This sort of thing could go on forever, but it's not necessary. There's nobody like A.

Up-and-Over in a Forward Somersault

Twelve boys from the Trinidad Boys' Club put on a tumbling show in the NNM auditorium Feb. 21 at 1800. All the boys were between 9 and 16 years of age.

Standing on his head, above, is Fred Nalley, instructor of the group, who also performs with them.

NMS Honors Thirteen Men at Inspection

At the Feb. 16 inspection, CAPTs J. L. Enyart and E. B. Coyl of NMS presented 13 awards to enlisted members of NMS.

Those not designated otherwise received the Presidential Unit Citation for action with the 1st MarDiv in Korea from Sept. 15 to Oct. 11, 1950.

Left to right: Richard C. Knobel, HM1; Stuart L. Baltimore Jr., HN (Navy Unit Commendation for sea duty in Korean waters); William R. Rauschelbach, HM3 (Good Conduct Medal—first award); Donald W. Personette, HM2; Sherwood Syverson, HM1; Goethel L. Gary, HM2; Leroy Lewis Jr., HM3 (Good Conduct Medal—first award); Ronald R. Bolton, HM1; Franklin M. Moeschlin, HM2; Harvey R. Jackson, HM2 (Gold Star in lieu of second Purple Heart); Albert F. Marks, HM3 (Good Conduct Medal—first award); George W. Diack, HM2, and James B. Sturdavant, HM3.

NDS' Interns Conclude Duty Tour Here With Extensive Series of Field Trips

Twenty-four dental interns made a series of field trips to various government facilities in this region during the week beginning Feb. 11. These trips marked the completion of that part of their year's internship which is spent at NDS.

Under the direction of CDR J. V. Niiranen, DC, USN, the visits were made to provide the interns with a broader picture of other units in the Armed Forces, and to acquaint them with other governmental agencies.

Beginning with a visit to the National Bureau of Standards, the interns were the guests of Dr. I. C. Schoonover, Chief of the Dental Research Laboratory, who described the work of the Bureau in relation to dental materials.

At the Naval Gun Factory, CAPT F. G. Ulen, DC, USN, Staff Dental Officer for PRNC, arranged for them to visit first the dental clinic and then the entire activity.

Brig. Gen. Oscar P. Snyder, Director of Dental Facilities at Walter Reed Army Medical Center, showed them the dental facilities there, and joined them in a group photograph.

At the David Taylor Model Basin, CAPT A. G. Mumma, USN, Commanding Officer, was their host. In a tour of the Basin which he arranged for them, they learned the nature of the work which was being done there.

Their trip to the Academy in Annapolis occupied an entire day, in contrast to all other visits of a half day each. RADM H. W. Hill, Superintendent of the Academy, and CAPT M. M. Maxwell, Dental Officer, made arrangements for the interns' visit.

During their tour of the Academy, they obtained information regarding the history of the institution, and the messing, berthing, and training facilities available to midshipmen. Special attention was given to dental facilities.

On the final trip of the series, the interns visited the FBI, where Mr. J. Edgar Hoover, Director, made arrangements for them to learn something of the functions and methods of operation of that Bureau.

The group making the visits included the following interns, all of whom hold the rank of LTJG: Ethan C. Allen, Fred M. Amman, Richard V. Barrickman, Charles W. Cogar, Harry J. Dennis Jr., John A. Dever, John H. Eck, Thomas E. Eilderton, Theodore H. Erck, Paul E. Farrell, Louis T. Foley, and Raymond "W" Millbourn.

Also, Lawrence H. Peterson Jr., Joseph A. Pettit, James H. Scrib-

Parsons

(continued from page 1)

the pilot, LT Robert L. Hager, inflated their Mae Wests and began swimming. Spotting a raft they headed towards it. This was the last time LT Hager was seen.

Twenty feet from the raft LT Parsons was unable to continue. He was pulled onto the raft by one of the occupants. By then time everybody was present on two rafts except the pilot.

Ships and a plane had been notified by Nicosia and a British ship, the HMS Ocean, sent out a Sea Otter to look for the crew. This plane crashed on take-off because of heavy swells.

A few hours later a plane flew over and saw their flares. It radioed their position to a nearby destroyer, the HMS Chevron, which sped to the area. Locating the rafts by whistles carried as a part of the rescue equipment, the ship picked them up at 0300Z on Feb. 7.

The destroyer stayed out that night looking for LT Hager but was unable to locate him.

The plane crew was taken to a British dispensary at Cyprus the next day. Friday, the following day, they were taken to the dispensary at Port Lytautey, and after an examination all but Mr. Parsons were returned to duty. He had suffered a fractured vertebra and was returned to the States and transferred here.

Asked about the experience, Mr. Parsons remarked, "It isn't something you wish to repeat, but in all we were very fortunate except for the pilot, LT Hager."

Wife: "What'll I do? Baby's swallowed the matches."
Chief: "Here, use my lighter."

Then there was the television fan who got up one morning, absent-mindedly turned on his radio, and thought he'd gone blind.

ner, Scott M. Smith, Bernard S. Snyder, John W. Talley, George W. Thompson Jr., Carl H. Wilkens Jr., Thomas M. Wilson, Maury E. Wortham, Andrew Wyda Jr., and Frank Zack.

NMRI:

Chief's Club Site Of Research Party

by R. Conaway

The NNMN Chiefs' Club was the site of a Research Staff party on Feb. 25. The gobs and gals were all decked out in their party-going gear and danced to the music of the Navy Band from the Naval School of Music at Anacostia. Guests of honor were CAPT Wilbur E. Kellum, Dr. K. S. Cole, LT I. V. King and LT G. J. Sabbag.

A "buffet style" luncheon and "bar style" refreshments were served to a most appreciative gathering.

Some hidden talents were brought to light during the course of the evening's fun. LT G. J. "Skippy" Sabbag brought down the house without his rendition of "Without a Song" and "Old Man River."

Ken Hartman, the Club's own singing bartender, was loudly applauded as he sang "Temptation" and "Danny Boy," following which Dick Kutchara and Bob Gay gave out with "Shanty in Old Shanty Town." Billy Carmack's romantic "Prisoner of Love" had all the gals a-swaying and a-swooning.

"Boats" Goodhue was really hep to the jive out there on the dance floor.

"And what cigarette do you smoke, doctor?" asked T. Nordquist, our own inquiring photographer, as he approached CAPT Kellum's table.

What well known chief was heard to whisper, "I don't know you people well enough to tell you this, but —" and then proceeded to tell all!

There's a certain stenographer at NMRI whose secret ambition is to drive the tail-end wheel of a hook-and-ladder wagon!

Red "Sleep-Time Guy" Davenport—five down and just one dented fender. My! My!

Maurine Gilchrist came in the other day with her normally severely combed hair all fluffed and curled. Wonder if "Mr. Charles" Ashcraft had anything to do with it?

Who was the gal who spent the morning after the dance drinking pineapple juice and vowing "never again": Was T.M.M.* to blame? (*Too many Martinis.)

Everyone missed Roy Kelley who turned in on sick list last week. We hope to see you back to duty soon, fellow.

Four new men reported aboard since last issue: A. Ruberg, HMC from NMS; E. T. Leakins from NavPhoto Center, Anacostia; D. W. Raw from USNH, NNMN; and R. Karr from Jacksonville. Also, LTJG A. Y. Werner, USNR-W, for two weeks training duty.

S. A. Goodhue reenlisted for six while J. M. Pearse signed for just four. J. P. Junkin walked off with an honorable discharge and C. D. Lemunyan was released to inactive duty. A. G. Wallace was transferred to NMS, NNMN, and Phil Menard left for New London and the USS Penguin.

So, with this last bit of news, I'll sign off until next time.

"Well, don't just stand there. Do something!"

"And You'll Need Something Old, New"

ENS Mary Lou Yarrison, (left) who was married Feb. 23, is just a few weeks ahead of her co-worker on T-4, LT Betty Randolph (right) who plans to take the step on Mar. 14. Picture was snapped by Peggie Wilkie, HM1, at the party given by the staff for the two nurses Feb. 15.

NDS' New Machine Slices Teeth Thin

by C. J. O'Donnell, DTI

A specially designed circular saw used to section teeth into slices 0.003 inch thick, or thicker if desired, is in use at the Naval Dental

training aid and research tool.

Its design is such that it can be used for many tasks requiring precision and could probably be adapted to services in fields other than dentistry. The saw facilitates the preparation of calcified sections of hard dental tissue for microscopic study and photomicrography.

When tooth sections are examined under the microscope in serial order, the progress of decay is graphically demonstrated. Such sectioning also aids in the study of details of the structure of teeth.

The unique machine is being used now in the Chemistry Lab in Bldg. 122 under the administration of LT Robert S. Leopold, MSC, of the Medical Dental Science Department.

School. This machine was built by Mr. P. H. Tanner of the Dental School machine shop for use as a

Ledbetter Steps Up from HN to Ensign

R. K. Ledbetter receives his appointment to Ensign, MSC, USN from CAPT Wilbur E. Kellum, CO, NMRI.

from HN to Ensign was the step taken by R. K. Ledbetter at a brief ceremony held in the presence of the Commanding Officer of the Hospital Corps School at the Lakes, CAPT Wilbur E. Kellum. Ledbetter, whose home is in Memphis, Tenn., enlisted in the U.S. Navy in August 1950 as a recruit.

After completing Boot Camp and Hospital Corps School at the Lakes, Ledbetter, then an HN, was transferred to the Annapolis Naval Hospital where he worked in the Radiology Department. Coming to NMRI in July of 1951, he was assigned to Bacteriology and worked in the TPI Laboratory under the supervision of LT Nelson.

Since his enlistment in the U.S. Navy, Mr. Ledbetter was graduated from the University of Tennessee with a B.A. in Bacteriology. He is a member of the Phi Kappa Alpha, Phi Omega, and Biologia, and a member of the Society of Biologic Sciences. Ledbetter is now in charge of the TPI Laboratory located at the Naval Medical School, NMNC.

Camera Contest Open to Servicemen

Washington (AFPS)—Attention! Servicemen! The April issue of the National Science Magazine has announced a "Craftsmen in Uniform" photo contest giving servicemen an opportunity to win cash prizes and merchandise for their work. Beginning with the April issue, the magazine will feature photographs of craft work by men on duty with the Armed Forces. Pictures should be of work that is original and "eye-catching" in order to compete for the cash prizes. Photographs and captions should be addressed to the Craftsman-in-Uniform Editor, Popular Science Magazine, 353 Fourth Avenue, New York 10, N. Y.

Ex-NNMC Chaplain Wins Annual Award

LCDR Dennis R. Kerrigan, CHC, USN, former NNMC Senior Catholic Chaplain, received a citation at a dinner given in the Waldorf-Astoria Hotel, New York, Feb. 3.

The Chaplain Alexander D. Goode Lodge, B'nai B'rith, of New York, in cooperation with the Armed Forces Chaplains Board, Washington, D. C., presents the Annual Award to one Chaplain in each branch of the armed forces, whose consecrated service and high idealism have contributed to interfaith.

Chaplain Kerrigan's citation reads: "Chaplain Dennis R. Kerrigan has manifested steadfastness in the face of adversity by his buoyant spirit in dealing with the problems that confronted the ship and the Navy Eastern Atlantic Mediterranean Staff in the early days of organization in the Naples area."

"He showed courage when circumstances tended to promote fear and discouragement by his forthright facing of the difficult problem of arranging religious and welfare activities with little equipment in the face of language and cultural differences."

"He showed charity manifesting himself in service to all men regardless of race, creed, or position by arranging for Jewish personnel to observe the High Holy Day in Naples, by conducting General Services for the Protestants prior to the arrival of a Protestant Chaplain and serving all men according to their needs."

"Chaplain Kerrigan shows a spirit of sacrifice by making himself available any hour of the day or night to the personnel he serves and by doing more than he is ordered or requested to do for the welfare of all individuals and the command as a whole."

Father Kerrigan reported into NNMC in September 1948 and was Senior Catholic Chaplain here until December 1950.

The 100-piece Cleveland Heights High School Band will appear on the NNMC auditorium stage Apr. 10, at 1900 prior to the scheduled movie.

Bob O'Connor Show Brings Humor, Music

The Bob O'Connor troupe will bring its one-and-one-half hours of variety entertainment to the NNMC auditorium on Thursday, Apr. 3rd at 1900. This is the group's first appearance at Bethesda, having just completed a one-year U.S.O. tour of the service camps in the Washington area.

Bob O'Connor, versatile young

Bob O'Connor

MC, comic and director of the troupe, has built a loyal following wherever he's appeared by virtue of his riotous personality and talented troupe. Bob, in addition to handling camp shows, has appeared in night clubs and on radio and TV.

The troupe also features the vocalizing of two feminine singers—both named Mary. Mary Manoukian, sultry finalist in this year's Miss Washington contest, handles the classical "chores," while the co-star Mary Murray provides the pop chirping.

Dancing numbers star Judy Thompson, vivacious young tapster, and a modern dance group from American University. Another Judy—Judy Aptaker—injects novelty into the show with her record mimicry. An added star attraction is Howard Litt's swing band, the Five Sharps.

Give!

The Red Cross this year must raise \$85,000,000 to continue its services to the Armed Forces and to veterans, its national blood program, its vast civil defense commitments, its disaster relief operations, and its expanded volunteer activities. Help keep essential Red Cross services in operation by contributing to the 1952 Fund campaign.

HM2 and 5-B Patient Enter Politics; Vie for Honorary Mayor of Conn. Ave.

Cpl. Everett L. Gettles

William N. Conran, HM2

William N. Conran, HM2, of the Staff Clinic, and marine patient Cpl. Evert L. Gettles of Ward 5-B will vie with Army and Air Force candidates for the title of Honorary Mayor of Connecticut Avenue in the Fourth Annual Easter Parade sponsored by the Businessmen's Association of Connecticut Avenue.

Each year, four men, representing the four Services, are selected, and one is elected as the Honorary Mayor. Walter Reed is entering the Air Force and Army candidates this year.

CDR Bigelow Feted At Officers' Club

CDR and Mrs. Allen F. Bigelow, MSC, USN, were honored recently at a party held here at the NNMC Officers' Club.

Given by the Medical Service and Hospital Corps officers, active and retired, the party was held on the occasion of the Commander's retirement after completing more than 44 years of continuous active service in the U.S. Navy.

In a letter to CDR D. J. O'Brien, MSC, USN, BuMed, CDR and Mrs. Bigelow expressed "... deep appreciation for the thoughtfulness of the Corps in giving us such a memorable and delightful evening. We want you and all other officers of the Corps to know that we are grateful ..."

Before retiring, CDR Bigelow was Executive Assistant to the Inspector General of the Navy Medical Department.

CDR and Mrs. Bigelow plan to remain in Washington—3726 Van Ness Street, N.W.

Mr. MacGinnes Receives Longevity Pay Increase

Mr. Archibald A. MacGinnes, a clerk-stenographer in the X-ray Service, received a Longevity Step Increase on Mar. 2. This is the first one given to an employee at NNMC.

Longevity Step Increases are increases above the maximum rate of the grade equal to a full step of the grade.

Mr. MacGinnes is the father of LCDR Michael J. MacGinnes who is a Catholic Chaplain. Father MacGinnes was stationed here in 1949.

The Easter Parade will commence at 1300 on the afternoon of Apr. 13. A panel of approximately 40 judges chosen from prominent personages in Washington, will ride up and down Connecticut Avenue from K Street to S Street, selecting winners in the 16 fashion categories to be judged.

One of the high lights of the day will be the election of the Mayor. Anyone contributing to the Cancer Crusade will be eligible to vote for the candidate of his choice. Balloting will start the week before Easter. Booths will be set up in the lobby of the Mayflower Hotel for the voting. Last minute voting will be accepted from donors up until the investiture.

Judy Savage and Alice Lane of the Howison, Savage, Freeman, and Dwyer Inc., advertising agency, are handling the publicity in cooperation with Cody Pfannstiehl, publicity director for the Cancer Crusade. Contestants will be publicized in the local newspapers and radio and TV stations.

The winner of the election will select the Princess of his choice from a group of 35 beautiful models and will be awarded a free plane trip. As yet, it is not definite whether the prize will be a round trip home or an all-expense vacation trip to Bermuda.

Last year's winner was Cpl. Carrol S. Hartley, a marine patient from Bethesda. He won a round trip plane trip home and one hundred dollars to cover expenses.

The Chaplain's Corner

by Chaplain Peter J. Marron
The Hoodlum Saint

When is your birthday? When is your saint's name-day. Mar. 25 was the feast of a saint. Would you know who he was? Not many do. Of course, you know the saints. In the calendar of saints, Mar. 25 commemorates a man named Dismas. There is not too much information on this fellow. St. Luke seems about the most accurate reporter at the Crucifixion on Good Friday. It was here that Dismas took the rap.

Dismas was a thief. Whether he was a high-class stickup man or just an ice-box robber, an alley bum, used-car lot gangster, or a pool-room loafer, we don't know. Well, the fact is the law slung the books at him one spring day on Calvary along with another sticky-fingered fellow named Gestas.

The typical mob! I can just see the crowd on top of the hill that day. I've seen them outside Cook County Jail in Chicago, at Sing Sing, any of those spots when it's somebody's night for the hot seat—half drunk, lascivious, and full of blood lust. This gang wants to see suffering that is inelegant.

One of Them Weakened

Gestas seemingly went soft, and which of us wouldn't, suspended naked from a cross. I have seen big strong sailors and marines hit the deck as the result of a tiny tetanus needle. Imagine being nailed through hands and feet to a couple of crossed two-by-sixes.

No wonder Gestas wilted and screamed while the crowd laughed. Gestas couldn't take it, so he turned and snarled at the Man—young Man, that is—in the center: "If you're the Christ, you say you are, why don't you get us down from these crosses, beat this rap?"

It was at this point that Dismas put in his two cents, that St. Luke so well recorded. The real story. "Why don't you 'knock it off?'" said Dismas to his buddy in crime, or the equivalent in the slang of their day. "We asked for this, but this man between us is here on a bum rap and is taking it pretty good." Then to the middle Convict, Dismas uttered his never-to-be-forgotten request. It was a prayer—"Remember me"—and received the quiet answer—"This day thou shalt be with me in Paradise."

An Unadvertised Saint

That is a simple story, but great. It's not new; it goes all the way back to the First Good Friday on Calvary. A man, MacMurphy by name, first put it in the Chicago Daily News. MacMurphy liked this fellow Dismas—he was such a modest, unheard of sort of bum. On Mar. 25 each year "Murph" would write the homely praises of his favorite saint:

"There are so many better advertised saints—all specialists—that few mortals bother much with this gangster saint, who roams the out-field of eternity making shoe-string catches of souls; a saint who has no following, to speak of, no medals, no propaganda. In fact, there's nothing to recommend him, really, except the fact that to no other saint on the calendar did the Son of God make the witnessed statement: 'You fill the bill,' which helps explain why those who believe in Dismas believe in him all the way."

I have chosen Dismas today because he is so much like men and he is so much like you. We are all gangsters or hoodlums in a lesser or greater degree. Yes, we are all sinners. And like Dismas, too, we can all make the grade; we can "fill the bill" if we have the courage and the faith and enough confidence in God to turn and say, "Remember me." It all happened first on Good Friday; it is happening today, and it will happen tomorrow—yes, every day. It's just God's love with an extra helping of His mercy.

Dr. George Docherty Delivers Easter Message At Fifth Easter Dawn Services Held at NNMC

Left: Dr. Peter Docherty will speak at the Easter Morn Services. Right: The Bethesda-Chase A-Cappella Chorus will sing at the service.

Holy Week Services

Protestant

Holy Week will be observed at the National Naval Medical Center with daily services at 1200 in the small Protestant Chapel. These services will be broadcast over Channel "C."

On Maundy Thursday Communion will be given in the small Protestant Chapel from 1200 to 1300. Holy Communion will be administered to bed patients upon request.

Good Friday, which comes on Apr. 11, will be observed here at the Center with a service at 1000. The service will be held in the auditorium and broadcast to the wards over Channel "C."

In addition to the Sunrise Service on Easter Morn at 0630, Services will be held in the auditorium at 1000.

Jewish

Congregation Beth El of Montgomery County will hold services every Friday night at 8:15 p.m. in the Social Hall of the All Saints Episcopal Church, Chevy Chase Circle. All Service Personnel are invited to attend.

The services of Rabbi Harry Kaufman, representing the Jewish Welfare Board, are available to all Jewish Personnel and Patients at the National Naval Medical Center. Rabbi Kaufman may be reached by calling the Chaplain's Office, Ext. 324, or by call direct—Office: RA. 5371—Home: GE. 0755.

One Hundred-Voice A-Cappella Choir And Navy Band Will Provide the Music

The grounds of the National Naval Medical Center will be the setting for a special Easter Morn Service at 0630 Sunday, Apr. 12. The service is sponsored by the Bethesda Council of Churches and the National Naval Medical Center. A Navy Band and the A-Cappella Choir, with one hundred voices, of the Bethesda-Chevy Chase High School, will provide the music.

Diaper Derby

Mar. 8 — Christine Ruth Miller, 8 lbs., ½ oz., new daughter of LT-JG Charles O. Miller, MC, staff, NH.

Mar. 11 — Maureen Shan McLaughlin, 6 lbs., 11½ oz., new daughter of Walter E. McLaughlin, HMC, staff, Medical Photography, NMS.

Mar. 14 — Gerald Edward Prise, 8 lbs., 10¾ oz., new son of Edward W. Prise, HM3, Plastic Surgery, NH.

Mar. 15 — Rene Richard Campbell, 6 lbs., 13 oz., new son of Robert W. Campbell, HMC, student, NSHA.

Mar. 20 — Patricia Ann Berry, 8 lbs., 9 oz., new daughter of LCDR Richard G. Berry, MC, OinC, Neurology Service.

The Easter message will be delivered by Dr. George M. Docherty, of the New York Avenue Presbyterian Church, the successor to the late Dr. Peter Marshall. Dr. Docherty, who was born and educated in Scotland where he practiced the ministry until 1939, will speak on "The Dawn of Easter Day."

This will mark the fifth year in which this community service is held at the National Naval Medical Center. It will be held on the grounds immediately south of the main entrance. In case of unfavorable weather, the service will be held in the gymnasium in the recreation building.

The Easter Morn Service will be broadcast to the hospital wards.

My Easter Bonnet

With joyful step and a smile on my face,
I boarded the trolley and started the chase
To shop for a hat so to church I could go.
Tomorrow was Easter. I must join the show.
After looking and shopping for an hour or so,
On each side of the street, to and fro,
Gazing at this one, and trying on that,
Finally I found my new Easter hat.
Feeling pleased with myself, and my money all spent,
I hailed a taxi and home I went.
Easter morning I dressed with unusual care,
Knowing full well that people would stare;
But my joy was short lived with my beautiful hat.
For my husband exclaimed, "Oh no! Not THAT!"
—MILDRED HYNES, NMRI

Think it Over!

Time was when Service Man Joe could violate a traffic law, scurry back to the base with the local police hot on his trail, and find sanctuary behind the walls of his military establishment.

No more. It's still true that the civil law can't follow the man onto the station and make an immediate arrest. But he can turn the license number in to the O.O.D. The O.O.D. has the number checked through the Security Officer, and the offender is turned over to the civil authorities.

There are still those who fail to realize this, just as they fail to realize that being in the Service does not exempt them from the responsibilities of civil traffic laws.

Traffic regulations are imposed to protect, not to harass. When you stop to consider that automobile accidents destroy more lives than any other single threat, including war and disease, you begin to realize why we have to have rules.

Statistics show that in almost every accident, there is some sort of traffic violation involved. Makes sense doesn't it then, that if we would all obey the rules which are made for our own protection, the mounting number of traffic deaths could be curbed.

Next time you read a traffic sign, don't consider it a waste of time—think of it as a potential life saver—maybe your own!

MARCH 31, 1953

Latest Class of Community Volunteers Graduate at NNMC

The latest Gray Ladies Class which graduated 62 members on Feb. 16 included: (front row) Mrs. Goetna Ames, Mrs. George O'B. Bailey, Mrs. Henry Barker, Mrs. Edward W. Barrett, Mrs. George Martin, Mrs. William H. Beck, Mrs. Franklyn E. Byers, Mrs. Victor L. Carone, and Mrs. John C. Colie.

Second row: Miss Wave Culver, Miss Virginia Cusick, Mrs. W. C. Dreessen, Miss Annette Edwards, Mrs. Curtis Everett, Mrs. Richard Factor, Mrs. John D. Fitzgerald, and Mrs. Karl Habel.

Third row: Mrs. George F. Hannaum, Mrs. Augusta G. Iovino, Mrs. Howard C. Johnson, Miss Agnes Kavookian, Miss Corinne Kranz, Mrs.

Chester Lindstrom, Mrs. Charles P. Lukens Jr., and Mrs. Charles J. Mack.

Fourth row: Mrs. St. Clair C. MacKay, Mrs. Orville C. McBride, Mrs. John S. Miller, Mrs. Joe R. Moring, Miss Maureen Mulqueen, Mrs. Theodore P. Noyes, Mrs. John A. Parish, Mrs. Leonard Peterson, and Mrs. William G. Pierce.

Fifth row: Mrs. Spencer Reitz, Mrs. Arthur C. Rohn, Mrs. Ruth Sandell, Mrs. W. G. Schindler, Mrs. William A. Schmidt, Mrs. Robert L. Taylor, Mrs. Vernon G. Taylor, Mrs. S. Kent Voss, and Mrs. William F. Ward.

Sixth row: Mrs. Paul Watson, Mrs. Frank C. White, Mrs. Nicholas Draim, Mrs. John H. Ludwig, and Mrs. William McNair.

Sixty-two Gray Ladies Receive Veils

The Gray Ladies of the Red Cross of this hospital have worked in this particular Naval Hospital since 1928. Tradition has been that these volunteers give one full day's work per week for carefully planned work useful to the command.

Currently there are 150 active Gray Ladies recruited from the community. New recruits are brought every fall after the Gray Ladies themselves have decided how many members are needed after the command is consulted about the services that they can give the Gray Ladies to do.

Currently the Gray Ladies shop all bed patients three times a week. They assist the librarian serving the wards twice a week at the book cart.

Almost all the diversional craft work on the acute wards is done by the Gray Ladies although the materials are bought half by Red Cross and half by the Navy Recreation fund. They serve as receptionists in their own office where wrapping and mending is done. They assist with recreation and also aid as receptionists in the X-ray department.

Gray Ladies largely come from the local community around the hospital. They are trained in specific duties by many members of the hospital staff and then probationary periods before receiving their veils.

Patients and Staff Enter O.T. Contest

The Annual Armed Forces Occupational Therapy and Hobby Competition will be held at the Philmont Club, Philmont, Pa., on Wednesday, Apr. 2, 1952.

This contest, being held for the third year, open to all members of the Armed Forces, is divided into two groups—for the hospitalized and for the non-hospitalized servicemen.

Last year, in the same contest, patients and staff from NNMC were awarded over 50 per cent of the first prizes plus three seconds, and one third and fourth.

The contest this year is being divided into 12 classes for both of the two group entries: ceramics, painting, textiles, jewelry, leather, weaving, plastics, woodwork, photography, hooked rugs, sculpture, and prints and drawings.

Patients have entered almost every class while the staff has entered the majority of their works in the prints and drawings, painting, and photography classes.

'Million in Uniform In Navy and Marines'

(All Hands)—More than one million men will be in uniform on active duty with the Navy and Marine Corps by June 1952, according to a statement by SecNav Dan A. Kimball covering the strength of today's Navy.

"Since the present rapid expansion of the Navy began, following the Korean crisis, more than 500 ships have been added to the active fleet," SecNav Kimball stated.

"By mid-year, we will have added to the fleet three battleships, 12 aircraft carriers, six cruisers, and more than 100 destroyer-type vessels. Our submarine strength will have been increased by more than 25 modern combat types and the necessary transports, tankers, and fleet auxiliaries to support a truly mobile naval force will be available."

In addition, more than 300 new ships of various types are under construction and prototypes of new escort vessels, minesweepers, and submarines have been adopted.

Grading and Inspection Topic of Meaty Lecture

Recently, two of the top men from the Department of Agriculture gave lectures at NSHA.

Mr. C. E. Murphy, Assistant Chief of the Standardization Section of the Department of Agriculture, delivered a lecture on Meat Grading.

Mr. Murphy, with USDA for over nine years, was the professor in charge of meat instruction at Texas A & M for seven years.

Dr. J. S. Stein, Chief of the Inspection Facilities Section of USDA, delivered a speech on Federal Meat Inspection.

Dr. Stein pointed out that some of the purposes of the present system of meat inspection are to search out and destroy diseased and otherwise unfit meat, to see that the meat is kept clean during the stages of preparation, and to guard against the use of harmful preservatives.

Dr. Stein is in charge of meat inspection in 15 western States and has been with the Department of Agriculture for over 15 years.

Rapid Expansions Now Underway In Several Navy Exchange Facilities

Expansion and improvements are now underway for the Navy Exchange fountain, retail store, barber shop, tailor shop, and laundry and dry cleaning service in Bldg. 2. All the innovations should be completed around May 15.

Fountain

More booths, faster service, and music are three of the improvements soon to be seen in the Ship Service fountain. The fountain will be expanded, utilizing the space now occupied by the retail store. The retail store will be relocated in the basement across from the Post Office.

With the new booths, waiter service will be available for the evening meal. Navy Exchange Officer LT Paul J. Metcalf says, "The fountain will be made as attractive as possible. When completed, it will be a nice place to bring visiting families and friends."

Steps will be taken to alleviate the congestion now existing at breakfast and lunch. A tentative solution is the installation of a counter selling only coffee and doughnuts. May 1, has been set for the completion date. The patio will open around May 15, depending on the weather.

Retail Store

The retail store will have a larger sales floor area in its new location, and several items will be added to increase the variety of merchandise. For example, children's wear and sporting goods will be greatly expanded.

New features will include a watch repair shop and speedy pick up and delivery service for photo finishing. Magazines and other items will be selected by self-service which should facilitate better selection and eliminate lengthy lines.

Barber and Tailor Shops

The barber shop is also undergoing expansion. The four-chair barber shop is moving to the space previously occupied by the tailor shop and will be exclusively for enlisted personnel. A two-chair shop will be installed in the adjoining room for officers.

The tailor shop moved to its new location in the basement Mar. 17, and will soon include the laundry and dry cleaning issue room.

Audio-Visual Gal 'Too Tall For TV'

"Miss Knox, go over to the library and look up everything on the effects of alcohol on fatigue in driving." This is a typical job assignment for Miss Elizabeth L. Knox of the Audio-Visual Department.

Miss Knox is secretary to Mr. F. E. Blake, Chief, Special Programs Division, and Mr. John C. Rose, Chief, Health Education Division.

She helps compile the material for the Naval films on medical training, preventive psychology, and preventive medicine.

The daughter of a retired Army Colonel, Miss Knox was born in Hammond, Ind., but has called numerous spots home from New

Miss Elizabeth L. Knox

York to California, Canada to Mexico.

After graduating from Bethesda-Chevy Chase High School, Miss Knox attended the Washington School for Secretaries for six months. At the same time she was learning and teaching dancing at Don Pallini's Dance Studio where she specialized in rumba, tango, samba, and mombo.

"I just couldn't fit on the screen," said the 19-year-old blond, speaking of her tryout on a TV dancing show. Being five feet nine seems to be quite a drawback in the new field which prefers its women five feet one or two.

A year ago last month, "Liz," as she is often called, began working in Audio-Visual. Said job keeps her on her toes as she says, "There's something different every moment."

Liz is one gal who seems to enjoy every moment of life as she lives it, and at the same time plans and works for the future. Since last spring she has completed 18 units of college work here at NNMC, taking advantage of the night classes offered by GWU.

Right now she is delving into philosophy—another three units toward that degree in Business Administration she hopes to bring home in a few years.

"That sailor across the street always reminds me of you." "But he's short and fat—and I'm tall and thin." "I know—but he owes me ten dollars, too."

NDS Gives Diploma To Turkish Captain

CAPT Mitchell congratulates Capt. Altinsel.

Capt. Hasip Hüsnü Altinsel, of the Turkish Army, received his diploma on completing the six month's post graduate course in prosthodontia at the Naval Dental School. CAPT Louis Mitchell Jr., CO, NDS, presented him the diploma Mar. 18.

Capt. Altinsel plans to return to Turkey in a short time to resume the practice of dentistry in the Turkish Army. He was granted one year's leave in order to pursue his studies here.

William Hoover Takes Honors in ECG

As of Mar. 12, the Hospital Corps has another five Electrocardiograph and Basal Metabolism Technicians. Honor man of the first class of 1952 is William C. Hoover, finishing with an average of 97.4. First row: William C. Hoover, HN, retained as staff; CDR John MacGregor, MC, head of Cardiology; and Sarah Hanks, HM2, USNH Portsmouth, Va. Second row: John C. Macey, HMC, instructor; Glenn E. Neely, V, retained as staff; James O. Witherspoon, HA, retained as staff; and Harry N. Fronista, HN, to USNH, Quantico, Va.

MCH 31, 1952

"April Fool, Sir."

"April Fool, McGinley."

The Quality of Rumors is Not Maimed They Droppeth in spurts from Rupert

Many of you have labored under the misconception that Navy scuttlebutt starts any old place and is disorganized and harmless. Sorry, Doc, you're wrong. It has been found that at NNMC, scuttlebutt comes direct from the offices of one Schuyler Rupert, a sinister man of a thousand sizes and faces. (Actually there are only 999, as he lost face once, but let's don't quibble.)

We first became aware of this sinister character when field day was held in Barracks 112. A room was found. In the room was a wardrobe with uniforms ranging from HA to full Admiral. In a bureau drawer was a collection of medals and bars dating back to the Battle of Champaigne.

We became suspicious. NNMC was notified. A team (two men and a small boy) was detailed to check the room closer. A file was located in the middle of the room by the diligent crew. In it were thousands of scuttlebutt possibilities, arranged alphabetically:

"A.—Arctic duty for those failing to comply with station regulations. B.—Bay windows will be outlawed for all chiefs in the coming physicals. (This one almost caused heart failure at the Chiefs' Club.) C.—Commissioned Officers will stand two weeks mess duty upon reporting to new stations. (Next to this was a footnote: Spread this in the Officers' Club; it will cause a panic.) Z.—Zebra meat is being served in the commissary."

Also found was a collection of reference books—Naval Customs and Traditions, Station Orders, The Rover Boys and Their Sailboat, and a complete list of the Don Winslow series including some off-color 7th and L St. numbers.

The truth was out! The mask was off scuttlebutt advertising. His name was discovered. A book mark in one of the books had on it, "This book is rumored to have been owned by Schuyler Rupert." But Rupert was never found.

Soon after rumors again began to fly: "Ships are put together with rubber cement due to the steel shortage. . . . Night duty lists are being posted two weeks early this month. . . . Everybody is going to be extended. . . ." These were a few of the foul, underhand, low, dirty remarks that were scattered.

Rupert was almost caught another time. There was a member of the Waves basketball team named Sadie Bustleberry. Sadie had a few peculiarities. Between halves she enjoyed weight lifting. Between quarters she insisted on donning a pair of gloves and daring members of the audience to spar with her. At the end of each game she always wanted to play a couple games of snooker.

People became suspicious. However, nothing was done. You must remember that Sadie was making 30 points a game.

Finally the last game of the season arrived. The home team was ahead in the closing minutes. Their rivals attempted a basketball cushion shot, using Sadie's head as the cushion. Sadie was knocked unconscious.

All she could do was mumble. Over and over again she was heard to say, "Med School is going on port and starboard, Med School is going on port and starboard." People became more suspicious. The two men (and the small boy) were called. Questions were asked. Same asinine, silly, foolish reply. Suddenly panic de-

veloped.

Med School students began to mob the exits. They were attempting to put in special liberty chits. (Not that they believed this silly rumor, but it is better to be safe than half safe.) In the excitement Sadie escaped.

However, she dropped a letter. On the letter was a name—Joshua Feezelberry. A name like that must be an alias. Therefore, it must belong to a sinister character and the only such character on the base was Rupert (we hope).

Wanted!

Editors' Note: Some people want the oddest things!

This is rumored to be the only picture of the sinister, evil, depraved, diabolic character, Schuyler Rupert.

Late Bulletin: Developments have developed in the Rupert case. A face was reported leering at a woman from the under-water lights in the swimming pool. A suspicious character was discovered in the main quarters (gets up before reveille to do his detail). We were told about another corpsman who was aiding in field day on Ward 134. All of these suspects will be checked further.

In the meantime, if you see the scrounge (pardon me, — scourge) of NNMC that looks like the above picture, please, for our sake lay off any strong beverages for at least two weeks.

If by chance you were sober when you saw it, don't tell us. Keep it to yourself, take a hot toddy, go to bed, and maybe you'll be over the shock the next morning.

Editorial

How Do I Write Thee?

by Otto ven Shot

In da old country dey don't, like ere, play. Sometime it will take maybe to understand your games.

In dis time of der year dere is three sports dat I see here around. A first one is a funny one. Baseball. Dey take a ball und throw it back und forth. Dat's good. But ere is always some fellow who pulls the works up. With a stick I wood he is getting in the middle und tries to futz the works. When he das the people watching ave to chase the ball to throw it back.

Another ting I tink that they tink too much of sex when dey ere. You hear always, "Come on, let's get hot. Let's get hot." Dis no time for dat.

Swimming. Dis I like. It's good, at dere's also a dumazzle here, so. He jumps in the air on a yard and then tries to stay dere twisting und turning. What is nutz maybe? Dere's laws against dat. Some fellow-he call him to do a pike. In my country a pike don't look like dat, den we only have walleyes.

Dere is anudder game they play in the base around. Goof. Und it's a good name for it. It's y. Wid a little white ball und stick, wid a glob of metal or od dey smack da ball. Auctions must have out dere too on account of some fellow is trying to y something for four bucks, all r time he is callink "four, four," aying in der sand dey must like (such a game!) on account of ere is all da time around piles of nd.

For anudder two weeks I look und and see you next week.

32nd of March

the SMO should call you in And across his face you see a grin And then he questions, "How y'been?" Is it April Fool?

Chief MAA beyond belief Listens as you spill your grief And for your watch, he'll find relief Is it April Fool?

en you pass an officer His arm swings to salute And do nothing — just stay put He never calls you BOOT Is it April Fool?

ould the Navy discard beans And no more duty with the Fleet Marines

I we can live within our means Is it April Fool? And how it's April Fool!

—J. F. MEEVIN, Special Services

MARCH 31, 1952

Quoth the Waves, 'Nevermore!'

As cheers resounded from the stands, the NNMC Ensignettes (second string of the Admiralties) began their basketball game against the Hubbard School for Girl Horseback Riders under 13.

It looked bad for the Ensignettes from the starting whistle because the Hubbard girls arrived on horseback and galloped through 20 points before any member of the home team would venture near enough to tell them differently.

Due to the fact that the angry Hubbard girls tore the electric scoreboard off the wall in one of their fourth quarter tantrums, there is still some contention as to the final score.

Asked for a statement at the end of the game, first string forward Maggie stamped her foot and screamed, "Well, goodness gracious!" Allen offered no opinion whatsoever, just sat with her face to the wall and pouted.

The irate Waves immediately submitted a formal letter of protest to the League demanding a replay. They charged that the officials were negligent and failed to call the plays closely.

In a huffy letter of rebuttal, referee Sallie Taturah, retorted, "There is entirely too much superstructure in the gym and no adequate seating facilities thereon. I found it extremely difficult to focus my attention on the plays and still cling to a shaky crossbeam."

The League Council spent 63 minutes of hot debate on the issue and then adjourned to make the 7th at Bowie.

A Pretty Tune Is Like a Malady

Through diligence and hard work the editors of the NNMC NEWS have compiled the favorite tunes of the corpsman at NNMC for 1951. The Hospitalman's Hit Parade is:

1. Gall or Nothing at All.
2. Alexander's Ragtime Gland.
3. Tissue or Tissue Ain't My Baby.
4. Moonlight or Neurosis.
5. On a Biceps Built for Two.
6. Saline, Saline, Over the Bounding Main.
7. Yessir, Asthma Baby.
8. The Object of My Infection.
9. Has Antibody Seen My Gal?
10. All the Tincture Are.
11. Papule will say We're in Love.
12. There Gauze That Song Again.

The favorite orchestras and bands were Paul Vitamin, Cab Calorie, Tommy Dorsal, his thrombosis and orchestra plus Art Gum and his Rubber Band.

For Sale

Many of our readers have asked us to run a For Sale column in the NEWS. This issue then begins a new venture in the history of the NNMC NEWS—we are going to comply with a reader's request. (Really, readers, your former requests were silly—there isn't a lake in miles and it is a little chilly to go leaping at this time of the year.)

FOR SALE

One green sock (pea green)—different—able to stand up with or without you in it.

An address book—Contains a good assortment of numbers in Canberra, Australia, Bombay, India, and Nejd, Saudi-Arabia. (There is one error under Nejd—under Fatima, change the telephone number to 581.)

A blueprint for a tattoo, used.

One script for a sea story.

One pair of long underwear with attached escape hatch (recommended for submarine duty.)

An assortment of chits: One book of "where to go" chits reading: You _____ (name filled in) can go straight to _____ (destination filled in). Also 864 other assorted chits of various colors. If you are buying a home these are perfect for a novel wallpaper.

Two ears (different)—found in the barber shop. Slightly spoiled (see picture). Exactly as illustrated.

One pair of raised eyebrows found at the Chief's Club after the last stag party.

Place of sale: Main Lobby, Animal House.

Charles A. McCalla Hold Down 4 Jobs

If the HM1 seems to be saying, "Class come to attention!" it's not imagination. Charles A. McCalla, HM1, is the senior instructor in the Tissue Bank School, the Anatomy and Physiology instructor in the Hospital Corps Training School, and a member of the Medical Center Education Committee plus being the senior corpsman in the Tissue Bank.

Mac recently lectured before the Medical Technologists' Association of the District of Columbia on "Tissue Preservation." The talk dealt with the preservation of bone, skin, and blood vessels and covered the histology of time preservation and transplantation.

Before entering the Navy, Mac graduated from Florence High in Florence, Ala. His initial entry in the Navy was in August 1941 after which he spent 44 months at sea and on foreign shores. Released in 1945, he resumed his schooling at Alabama State College where he received his A.B. degree with cognate majors in Chemistry and Biology. He then did graduate study at Kentucky State Teachers' College where he received his Master's Degree in the field of education.

In 1950 he again enlisted in the naval service and was assigned here. He is presently working on his Doctorate in Educational Psychology and expects to finish the necessary requisites in the next three or four years.

Hobbies? When he has time he enjoys photography and wood-working. He also is the Scoutmaster of the Bethesda Boy Scout Troop No. 204.

Mac's wife, a Navy nurse, is stationed here in the Pediatrics Clinic.

ELECTION

(Continued from page 1)

a native of New Orleans, La. In high school he was a member of the track, swimming, football, and baseball teams, winning two letters in the first two and one apiece in the latter.

He has served at San Diego, Portsmouth, and spent 26 months with MSTs—Military Sea Transportation Service—with which he traveled extensively and took part in the Inchon landing. Bill wears a Korean Campaign ribbon with one battle star.

In his spare time he swims, plays basketball, and now that the weather is warmer, plans to spend a good deal of time on the tennis courts.

Gettles

Gettles, the marine contender, is from Detroit, Mich. Before joining the Corps, he attended Michigan State College at East Lansing, Mich. In the Marines for five years now, he saw duty in Korea with the 1st Marines from September 1950 to April 1951.

Gettles was transferred here from the 8th and 1 Marine Barracks where he was a member of the Marine Honor Guard. To be discharged in July, he has no definite plans for the future.

Tissue Bank Celebrates Second Anniversary Next Month

In the past decade great strides have been made in scientific fields at NNM. In these past ten years personnel stationed here have contributed much to the field of medicine.

It would be impossible to gauge the relative importance of these developments but certainly the research on the preservation of tissues would rank high.

Five years ago, a patient requiring tissue-skin, bone, etc.—at NNM or almost any hospital—was operated on twice; once to remove a healthy section from one portion of the body and secondly to utilize it where required.

Today, through the experiments carried on here, tissue, when required, can be drawn from existing supplies at a tissue bank. This Tissue Bank, now under the direction of Dr. Thomas C. Turner, LTJG, USNR, established in May 1950, carries almost every

Dr. Thomas C. Turner, Officer in Charge of the Tissue Bank, and C. D. Crayton, a technician, check the deep freeze where the bone is kept prior to processing.

type of tissue—bone, skin, fascia, cartilage and blood vessels. This Tissue Bank, the most complete in the country, also acts as the pilot bank of the Navy.

The history of this bank began with the establishment of a Bone Bank in 1949 by Dr. George W. Hyatt, then LT, USN. Dr. Hyatt, a Resident in Orthopedics, studied bone bank technique at the Lahey Clinic in Boston. At that time the bone was preserved by refrigeration—after being removed from the donor and placed in a sterile container it was put in a refrigerator having a temperature of -20C.

Dr. Hyatt and associates, using the facilities of NMRI and NMS, developed a type of preservation called "freeze-drying." This technique consists of drying the bone under vacuum at low temperature. The bone, looking like a dried sponge, can be kept at room temperature for prolonged periods of time and easily transported.

Dr. Turner checks a blood vessel that has gone through the freeze-dry process. To the rear is the Stokes Freeze-Dry Machine.

Though no bone is equal to autogenous bone (bone taken from your own body) this "freeze-dry" bone was found to be superior to that preserved by refrigeration. The specimen adapted itself readily to the host, the number of infections was no greater, and, as mentioned before, was easily transported.

The success of the experiments led to research in the preservation of other tissues. Skin was considered. In the case of an atomic war where much burning of human tissue could take place a stockpile of skin would be an invaluable aid.

Dr. A. R. Marrangoni and Dr. Hyatt were the two who did the original work on skin. Their method is as follows: A small section of skin is removed from the donor and wrapped around a glass cylinder. This is placed in a sterile jar and the combination is

dropped into a second jar containing a solution that acts as a food for the tissue and contains a waste product neutralizer and antibiotics. This jar is kept in the refrigerator where it is allowed to hibernate until needed.

This homogenous skin (skin from other bodies) after proven experimentally, was used on patients. The results were better than expected. The skin provided a living bandage, kept the wound from becoming infected, and minimized the pain. Also, the patch of skin seemed to act as a stimulant and aided in the fostering of the growth of the patient's epithelium around the area.

At the present time experiments are being carried on by Dr. C. A. L. Bassett and Dr. Turner to determine if freeze-dry skin could be used instead of live skin. Tests have shown that in all cases it seems

The removal of a metacarpel in the Operating Room that will eventually become a deposit in the Bone Bank.

to be almost equal. The use of freeze-dry skin would allow the transporting of skin, now an almost impossibility because of the rigid temperature control that the skin requires.

Dr. Bassett, here since November 1951 is also doing research in the possibility of growing skin with the hope of eventually producing cells that would survive even when transplanted to a host.

While these studies were progressing the preservation of blood vessels began to interest doctors here. The freeze-dry technique for the preservation was attempted. First done by Dr. Marrangoni, it is currently being perfected and evaluated by Drs. James W. Pate and Phillip Sawyer of NNM.

The results seem to be better than the former methods of preservation—by a solution or storage in dry ice after quick freezing.

As the methods were devised for the preservation

This is a skin graft with the container labeled with the size, date of deposit, and deposit number.

of these different tissues, a need was seen to have a designated area for the collection and maintenance of tissue, so in May 1950 a Tissue Bank was formally opened. Bone, skin, blood vessels, fascia, and cartilage (used by the EENT Surgeons) are all collected here.

Where do these tissues come from? The answer to this lies in the motto of the Tissue Bank—Ex Morte Vita (from death life). Some from amputations—material once thrown away. But this does not meet the need. The only other answer was and is the use of tissue from individuals soon after death not suffering from infections, malignancies or infectious diseases. Of course the next of kin's permission is required. People must realize that in the bodies of the deceased lies the opportunity of some patient to walk again or even live again.

New Navy Directive Affects Pay Grades

Washington, (AFPS)—Cedron Navy advancements in rating to temporary pay grades E-5 and E-6 have been confirmed as permanent by the Bureau of Naval Personnel.

BuPers Circular Letter No. 8-52 instructs commanding officers to screen service records of personnel in grades E-5 and E-6 who were advanced during the period from Jan. 1, 1951 to Dec. 31, 1951. If they were advanced as a result of the following they are henceforth considered permanent:

1. The January 1951 or July 1951 Service-wide examinations or examinations delayed because of operational difficulties.

2. Meritorious advancements by the Chief of Naval Personnel under special advancement quotas issued to the Commanding General of the First Marine Division.

3. Having qualified while on inactive duty or on continuous active duty with the USNR prior to current tour of active duty with the regular Navy.

Commanders must finish all action pertaining to the change by Apr. 15, 1952, after which the provisions of the letter are cancelled.

Qtrs. K Dumps Waves By 10-Point Margin

Wave cagers took a sound 44-34 defeat at the hands of the Quarters K Waves Mar. 18 on the rival courts. The Admiralties played good ball, but were outclassed by the well-practiced string of excellent ball handlers from across the river.

Madsen and Crouch played the full 32 minutes as forwards, bringing home 16 and 14 tallies apiece, while Cox, who replaced Allen in the second half, scored 4.

Nonnie Hawkins sparked the guards again with DeBerry, Skinner, Jarvi, and Link supporting her. The guards maintained their zone well, but could not stop Quarters K's fleet-footed James, who broke through for 22 points.

Your Navy Belles

by George

Living in Bldg. 123 is still improving in many ways. Cox, our new MAA, helps Norma now and Norma spends her afternoon at recreation—working that is.

Changes in the personnel: Shirley Kruger back to civilian life and Mary Jane Price still hoping. Ruth Ascher has gone to the Receiving Station (we hope you get your dream trip, Ruth). Mary Larson left for Treasure Island.

The girls in the Lab Class have their orders and we have girls already lined up for their bunks. Welcome to a gal from Texas (who calls Maryland home). Glad to have Betty Herrod aboard—and Baltimore is not very far.

Hop-along Boots sure gets around with her east on, but her poor roommate, Amott, suffers more than she does—she has to take an upper bunk now.

Ruby wants to know the distance to West Virginia. Ann, Web, and Lux are seen out often—spinning around at 20 miles per. In another car you find Casey as pilot, Ruth Clarkson as navigator, and both lost in a fog at the busy corner.

Lou Zimney is on 20 days in South Dakota. Butler has started a new fad upstairs and has all the girls wondering whether to try or not. Oh! What happy spring days now as the weather is getting beautiful in MY Maryland.

P.S.: Ask Lucile Thompson what she gave up for Lent.

MARCH 31, 1952

Intramural Bowling League . . .

The final figures of the Intramural Bowling League have been compiled and Naval Hospital leads the pack with the CPO team in second place.

The final standings and honors are:

Pos.	Team	W-L	Pct.	Total Pins	Games Rolled	Team Avg.	Pts. Forf.	Pts. Won By Forf.
1.	Naval Hospital	38-13	.745	29340	39	752	0	12
2.	CPO	34-14	.708	27404	36	761	0	4

Miniature Gym Opens in Bldg. 12

The bar bell adherents, basketball devotees, volleyball enthusiasts, and table tennis fanatics have a new location to perform their gymnastics. Barracks 12 has installed some new equipment that has made the main quarters the second mecca of the sports fans at NMC.

Located in a room that was formerly a gear locker is the weightlifting equipment. Formerly incomplete, it has been augmented by a purchase of a new set of York Bar Bells.

The room where this equipment has been kept has been turned over to the hoopsters and the net hustlers. Baskets have been installed and balls are available for the basketball zealots. Nets and balls are ready for the volleyball specialists and can be checked out through the Master-at-Arms Office on the first deck.

Tennis tables lie in wait for the 5 boys with recently refinished billiard tables for the snooker fans.

If you are looking for a good time and a little exercise, take a look around the basement of the main quarters and, if you like, join the grunt and groan fans or the hoopsters. The cost? Only a few hours of your time.

Available Jones'

Spring is the season when a young man's fancy turns to golf and again Bill Downing, the "Available Jones" of the golf course, is ready to help on those mashie wieldings or those putting problems. Just to be sure that he is in practice Bill, the local golf pro, is trying a few putts of his own.

ARCH 31, 1952

Hobbs, Williamson Win Bowling Doubles

In rolling the second highest scratch game of tournament play—a 225—(Chief Meitl had rolled a 232 the night before) Hobbs carried his partner, Williamson, to a first game win over Hickey and Cartier on Mar. 20, the final night of the doubles tournament.

In the second game Williamson came through with a 205 and Hobbs a 194 to sew up the championship. The winning combination showed their championship caliber by winning their last three matches from scratch against such bowlers as Meitl and Nelson, Oxford and Vinson, and finally Hickey and Cartier.

In the final match the winners put together games of 425 and 451, including handicaps, to the runner-up team's 373 and 390.

Hobbs compiled a tournament average of 187.5 from scratch. Williamson carried an average of 175.

Intramural Softball

The intramural softball league will begin play on or about the 15th of April. All entries must be submitted to the Special Services Office no later than 1600, Apr. 7.

Yes, It's Spring Again With Golf A'Wing Again

Spring is not, as many people think, the season of the birds and the flowers but is rather the time when a person's fancy turns to the course and court games—tennis and golf. On the weekend of the 15th and the 16th of March over a hundred people were on the golf course trying their woods and irons.

On the weekend of the 21st and 22nd, 95 people were putting and driving on the green carpet.

The tennis courts also had their share of the foursomes and twosomes with the racket wielders practicing up their drives and serves.

Wafs Torpedo Waves In 2nd Half, 28-38

Winding up the 1951-52 Women's Interservice Basketball League on Mar. 20, the Admiralties bowed to the visiting Ft. Myer Wafs 28-38 in the NNMC gym. The blue-clad visitors are tied for first place in the League.

The Waves got off to a good start, leading 10-8 at the end of the first quarter, but the powerful Wafs took over in the second and were out ahead 24-14 at the half.

The Admiralties held their own the rest of the game, but were unable to make up the ten-point margin. Nonnie Hawkins played her usual graceful and effective game at guard but could not stop Baxter, who towers 6 feet 2 inches, and has little trouble dropping them in.

Madsen rang up 15 counters for the home team with Allen and Crouch taking five apiece and Cox sinking three. Skinner, Jarvi, and DeBerry all took a turn at guarding, with the latter playing her best game of the season.

The Waves will enter the Interservice League Tournament tonight as they again face the Ft. Myer Wafs in the Ft. Myer North area gym at 2100.

Waves Take Wafs In Replay Tilt

Capturing the most sought-after victory of the season, the Admiralties downed the Andrews Field Wafs by a slim two-point margin, Mar. 10 on the Bolling Field courts.

Protesting the original Feb. 6 game, in which the Waves trailed 29-33, on the grounds that the male officials were unqualified to adequately call the match, the League granted the Waves a replay with women referees.

Allen, Crouch, and Madsen on the forward end and Carlson, Salisbury, and Skinner on the defense started off the tussle. Nonnie Hawkins replaced Salisbury in the first quarter and the team stood pat for the rest of the fray.

In the first quarter, Madsen sank two goals and a free shot for five counters. Meanwhile, the Airgals had rung up ten tallies, leading 10-5.

The second canto told the tale, as the Admiralties displayed the most frenzied activity of the season. Madsen sank 11, while Allen slipped in two, and Nonnie Hawkins main-springed the guards, holding the opposition down to eight. Score stood 18-18.

In the third, with both vying for the lead, Crouch rimmed a long beauty for the only score, and the Admiralties led 20-18.

The last quarter was nip and tuck. Crouch stationed herself under the basket, and with Madsen and Allen feeding her, matched the Wafs goal for goal as she ran up eight points before the final buzzer.

With Hawkins back in the center guard slot for the first full game in many weeks, Carlson and Skinner completed the smooth clicking trio making the strongest defense the Waves have sported thus far.

Spirit was also greatly enhanced by a record number of rooters.

The NNMC swimming pool will be closed at 1500 each day from Apr. 15-19 inclusive as the pool will be used for the current YMCA Learn to Swim Campaign.

A Scotsman, leaving on a business trip, called back as he was leaving: "Goodbye all, and dinna forget to take little Donald's glasses off when he isn't looking at anything."

Ron Uses Board to Get Up in World

Ron DeVice, HN, lifeguard at the NNMC pool and one of the finest boardmen here, goes through a few of his bag full of dives for the photographers. His specialties include the half-gainer (left), the jack (upper right), and the one-and-a-half tuck (lower right).

Coach's Corner

Sometime, when you are caught in the four-thirty ebb flow through the southwest gate, take note of the craftsmanship of the square and crosscut department—the log bench sitting on the tee, a rustic reminder of Bob Williams, Pappy Keesecker, Chips Poole and the boys of the maintenance force. Soon to appear on the first tee, in true mountain lodge fashion, will be a single sign, in place of the four white placards currently in position. The lead and linseed welders with Bud Maltesta have promised early delivery . . . as a matter of fact you can stroll by the loading platform of Bldg. 15 and observe the remaining tee benches in telophase . . . Jones Bridge gaters can mark the work of Benny Harding, Raymond Echison, Paul Shipe, Pancho and Red with the enlargement of the teeing ground. NOW, all we need is a putting carpet across the creek from the present clock, connected by a pair of Japanese bridges and surrounded by flower beds.

Mark in your golfing calendar the weekend of the fifth of April . . . a Monkey Foursome event is on the schedule. Each member of the foursome carries a single club, a wood, four iron, nine iron, and a putter. One ball is played by each member in rotation from wherever it happens to lie, with whatever club he has chosen to carry . . . thus a player may be forced to putt with a driver and drive with a putter.

This puts me in mind of last year's event. CAPT Bart Hogan, popular skipper of the hospital, played in a group made up of Jack Dunn, Jim Crawford and the campus fashion plate, third plane Giorgio, finishing 2 strokes behind CAPT Grunewald, Whisper Parker, Brick Blackstone, and the Coach. On both rounds Alvin sank the last putt on six with his four iron, that left the nine ironer tee shot on seven . . . small conference . . . the niblick carrier teed off to the lower tee . . . up stepped Brick with his small putter and kissed the gutta percha to the brow of the hill, a two hundred yard carry. He did that twice. Just try getting out of a sand trap with a driver and putting with a nine. Now is the time to get your foursome together, so drop in and see Ralph Platter or Hawkins Downing, the club professional, for further information . . . Have you noticed the blue and white life-rings over in the natatorium? . . . Makes the whole place look shipshape under the watchful eye of Ronnie DeVice, ace hoopster.

NDS Team Wins Intramural Basketball Cup

The undefeated members of the Dental School team, who copped first place honors in the Intramural Basketball League, received their trophies on Mar. 17 from RADM W. J. C. Agnew.

Front row: CAPT L. D. Mitchell, Jr., CO, NDS, and RADM Agnew present the team trophy to CAPT F. E. Frates Jr., player-coach.

Second row: D. H. Strehle, B. J. Kennemur, J. L. Brookshire, Jr., D. L. Sullivan, and L. C. Durham.

Third row: R. W. Malone, B. L. Beaversdorf, J. E. Carter, J. L. Lust, O. Munroe, and H. J. Bacon.

Former CPO Club President on TAD

CAPT B. W. Hogan administers the oath to Chief Eischeid.

Victor W. Eischeid, HMC, of NH's Pharmacy Department is now on TAD orders with the Marine Office of Officer Procurement, 1400 Pennsylvania Avenue.

He will work for five months as part of a four-man team traveling to different schools which have no ROTC units, conducting physicals for prospective officers.

At NNMC since August 1950, the chief served as President of the Chief Petty Officers' Mess (Open) for a year until he was replaced this January by Chief Murphy, the present President.

With 16 years in now, the chief shipped over for another six on Mar. 4. A native of Iowa, he has served at various State-side hospitals, seen duty with MOB 2, LION 3, and DREW 1. He also sailed aboard the USS California and the USS Repose.

Completing his extra duty, the well-known chief will return to the Pharmacy Department.

CAPT Murray Talks On Medical Council

CAPT A. W. Murray, MC, USN, a member of the Armed Forces Medical Policy Council, Department of Defense, recently gave a lecture on the organization of that council to the officer students of NSHA.

He pointed out that the council is a relatively new staff agency of the Department of Defense, and has the responsibility of providing basic policies, plans, and programs in the medical and health fields. The council furnishes guidance to agencies and enables the military departments to prepare and execute detailed policies or programs.

A member of the District of Columbia Medical Society, CAPT Murray was an associate instructor at the George Washington Medical School a number of years ago.

CAPT Speaks at NSHA

CAPT J. M. Bachulus, MC, USN, from the Office of the Chief of Naval Operations, presented an informative discussion on Medical Intelligence to the officer students at NSHA on Mar. 20.

NMRI:

Dr. English Adds Fourth Gold Stripe

by R. Conaway

Things have been slow around the Institute—at least as far as liberty hours are concerned. I did hear that two First Class from Bacteriology (won't mention any names) took a trip to Morgantown, West Va. to get tattooed—or was it to see Nancy Brown?

Thought we had broken into someone's boudoir the other night—but all the time we were right behind Bassin's! How about it, Frankie?

There were many red faces after the celebration of "The Wearing of the Green."

Wonder why Canterbury and Carncross always carry a good supply of tea bags with them?

ENS W. J. McCarville, MSC, recently arrived from Great Lakes; J. C. Terry, HMC, from Oakland, Calif., and D. W. Row, HM3, from USNH, NNMC.

R. K. Ledbetter made Ensign and we lost him to NMS, NNMC. CAPT C. A. Schlack left for the Aloha Isles, MCAS, Kaneohe Bay, T.H., to be exact, and H. S. Rienstra to Newport, R.I. Master Sgt. G. H. Austin, USMC, left to join an all-Marine outfit in D. C.

W. O. Wood and R. Lemunyan were released to inactive duty on March 24. C. R. Biles, HMC, and E. A. Harvey, HMI, signed over for another six.

Another officer who recently joined the ranks of "four strippers" at NMRI is CAPT James A. English, DC, USN. Dr. English, who hails from Harrison Valley, Pa., was graduated in 1932 from Pennsylvania State College, School of Chemistry and Physics with a B.S. and from the University of Pennsylvania School of Dentistry with a D.D.S. in 1936.

Entering the Navy that same year, Dr. English has seen duty both in the states and abroad and on the U.S.S. Dobbin and the U.S.S. Cincinnati.

He received his M.S. from the University of Pennsylvania Graduate School of Arts and Sciences in 1948 and in July of that year reported to NMRI for duty. At present Dr. English is Head of the Dental Division of this Institute, with additional duty as Head, Dental Branch, ONR, and Head, Dental Branch, Research Division, Bu-Med.

Railroads Extend Offer

Reduced fares on railroads for service personnel have been extended until 30 June 1952. Personnel must travel in uniform, and have written authorization for leaves such as a liberty card or leave papers.

Dental Explorer

by C. Connor

Dr. Conglis of the present PG class has really been relating some hair raising sea stories of late. His experiences seem to make "Dick Tracy" a mere amateur at the game.

It looks as if someone discovered who it was beneath all the tangled film in the last issue because Groce suddenly came up with orders to Motion Picture School at Norfolk. Now maybe he'll be able to get out from under it all the correct way.

Cunningham and Mulligan (true to their names) chose St. Patty's Day to say "I Do" at their double wedding ceremony. Wonder if they played McNamara's Band in preference to the Wedding March? Congratulations from all of us.

The old expression that said "Kilroy was here" has been brought up to date to read "Beaver and Mac were here." They seem to be giving the local natives quite a time. At the rate they are going folks will begin to feel that they are the Navy's latest secret weapon as they sure hit with a bang.

What Wave in the record office has been sporting band-aids lately? Not only that, but she sure is trying to convince us that it was all due to a basketball game—hmmm (not very convincing from what a little bird told me.)

CAPT Grunewald, LT Lyon, and Dr. McBride all mustered at Colorado Springs on TAD. CAPT Kyes came over from Bldg. 122 and kept law and order in Bldg. 1.

In our last issue we neglected to mention that Stella Turan had left us. Yep, she traded her blues for her favorite housedress—she's going to be just Mrs. Turan HOUSE-WIFE from here on in. Good luck Mrs. T.

Well, that's all for now, so till next time smooth sailing to all hands from the gal from the HUB (Boston that is).

FENCED IN!

Virginia Mayo of Hollywood doesn't seem to be a bit frightened at being "fenced in" by a few rustic wooden props. But then, why should she be frightened?

Dress Blues Used Instead of the Green

Faith, and 'tis there a better day for the Cunninghams and the Mulligans to take their colleens in holy matrimony than on St. Patrick's Day? On the 17th of March Thomas Cunningham, DN, and James Mulligan, DT3, of Dental Repair School took as their brides the former Miss Joan L. Ruetten and Miss Carol J. McKenzie, both of Wonebec, Wisconsin.

L. to R. are: Paul Beno, DT3, the best man; Thomas Cunningham, DN and his new bride, the former Miss Joan L. Ruetten; the former Miss Carol J. McKenzie, and her husband James Mulligan, DT3, and Mrs. Eileen Beno, the bridesmaid.

The wedding was held in St. Matthews Church and the reception was held at the Hamilton Hotel in Washington.

Correspondence Training Division Celebrates First Year at Med School

On Mar. 15, 1952 the Correspondence Training Division celebrated its first anniversary under command of the U.S. Naval Medical School.

The Reserve Correspondence Training Activity was transferred from the Bureau of Medicine and Surgery Mar. 15, 1951 and established as the Correspondence Training Division under the Commanding Officer, U.S. Naval Medical School.

The division plans, produces, and administers Medical Department correspondence courses for medical personnel of the Regular and Reserve Components of the Navy.

These correspondence courses afford Medical Department personnel the means of acquiring detailed knowledge of those professional and technical subjects peculiar to the Naval Service, and provides a means for Reserve personnel to acquire promotion and retirement points under the provisions of Public Law 810, 80th Congress.

At present there are two officers, three enlisted men, and two civilians assigned to the division. The director is CDR C. F. Park, MC, USN, and LCDR C. Shearer, MSC, USN, is the Administrative Officer. Enlisted personnel include D. W. Nightingale, HMC; J. H. Austin, HMI; and R. A. Pugh, HM3. The two civil service clerkstenographers are Mrs. I. J. McEntee and Mrs. K. R. Stang.

Much has been accomplished during the first year of existence of the Correspondence Training Division. On Mar. 15, 1952, ap-

proximately 1,625 courses had been completed by personnel of the Medical Department. During the year, three new courses were worked up with objective-type completion examinations: Pharmacy and Materia Medica; Frigid Zone, Medical and Dental Practice; and Special Clinical Services—Blood.

Two of the courses have been submitted to BuPers for publication, and it is hoped that they will be available for enrollment in the near future. By March 15, 1952, the division had graded approximately 13,000 assignments which were received during the past year.

It is believed that this field offers practically unlimited possibilities in the training of Medical Department personnel, and that in coming years, much greater credit can be accomplished towards advancing personnel to further their proficiency in the Naval Service.

The division is very fortunate in having a good cook among its personnel—Mrs. McEntee, who graciously offered to bake a coconut cake for the anniversary.

Instructor: "I want you to explain this exam paper. Why do you have all answers in quotation marks?"

HA: "Just a bit of courtesy to the man seated on my left, sir."

Have you heard about the big Indian chief, Shortcake? Shortcake takum squaw. Shortcake Squaw bury Shortcake. (Repeat again; you'll get it.)

MARCH 31, 1952

Queen Juliana Of Netherlands Welcomed At NNMCC

NNMC Staff and Patients Bring Home Fifteen Prizes from O.T. Competition

Patients and staff of NNMCC were awarded eight first prizes and seven seconds at the 3rd Annual Armed Forces Occupational Therapy Competition held at the Philmont Country Club, Philmont, Pa., 2 Apr. 1952. The competition, which drew entries from all branches of the service, was divided into two general classifications: hospitalized or patients, and able-bodied or staff.

Rear Admiral W. J. C. Agnew, Commanding Officer, NNMCC, presented the awards to the Medical Center personnel 7 Apr.

The Occupational Therapy Department, which is under the direction of LCDR G. E. Vaupel, MC, USN, is one of the Center's facilities for rehabilitation for regular patients and Korean casualties. (See page 4.)

The contest was divided into 13 classes for both group entries this year: ceramics, jewelry, hooked leather, miscellaneous, paintings, plastics, prints and drawings, photography, sculpture, textiles, and weaving. NNMCC entries took prizes in eight of these classes.

Awards to staff were as follows: **Other**—LT Arthur R. Taylor, MC, USNR, now on duty on the USS *Albatross*, first prize for hand-carved relief case.

Miscellaneous—Lee Green, MC, USN, of Medical Photography, NMS; second prize for book cover of brown wrapping paper and in-tan suede leather.

Prints and Drawings—Allen R. Finley, HN, USN, of Audio-Visual, first prize for hand-carved relief case.

(Cont. on page 6, col. 1)

Rates Announced For Enlisted Men

The long-awaited announcements of advancements for enlisted men began coming in toward the end of March. Rates will become effective this Wednesday, 16 Apr. Names are listed below according to command and rate:

NNMC
TE2 to TE1(T)
 R. M. Hansen
DK3 to DK2(T)
 F. N. Winn
SD3 to SD2(T)
 F. S. Romero
TE3 to TE2(T)
 D. E. Fleming (W)
PNSN to PN3
 F. E. Gallagher (W)
HN to HM3
 J. J. Alligood, R. J. Locke, and A. A. Tillotson (W).
NH
HM2 to HM1(T)
 C. E. Bice Jr. and S. C. Phillips
HM1 to HM1(T) (Substantiating)
 R. A. McEwan
HM3 to HM2(T)
 H. Aldridge, H. L. Davidson, G. (Cont. on page 6, col. 3)

Left: Her Majesty greets Sgt. David E. Ingram, USMC, from Chattanooga, Tenn., at his bedside on Ward 3-C. Ingram wears the Silver Star and the Purple Heart for duty in Korea. Right: Upon arrival,

Queen Juliana is welcomed aboard by RADM G. H. Fort, Commandant, PRNC, and RADM W. J. C. Agnew, Commanding Officer, NNMCC.

Military Personnel To Have 2 ID Cards

The reason that the personnel of this and other commands are being issued two I.D. cards is the recent article added by the Geneva Convention for the Protection of War Victims.

The I.D. card (the DD2N), now carried, will still be used as the standard identification card and will be retained at all times even in the case of capture.

To provide a duplicate card for surrender to authorities in the event of capture, members of the Armed Forces will be issued a second I.D. card (the DD528-Geneva Conventions Identification Card).

This card will be a 3½ by 2¼ white card printed in black ink with space provided on the front for name, grade, branch of service, service number, and date of birth and will be laminated if possible. The card issued to medical or religious personnel will be stamped, on the front, with a red cross with either the word "Medic" or "Chaplain" inserted.

In the event of capture, the white card (DD528) will be surrendered to the capturing authorities for the compilation of prisoner of war lists which will be turned over to the home country of those captured.

The DD2N (the card now carried) can be shown on demand but in no case may be taken from the prisoner.

If the personnel receiving the cards are stationed in the States, the DD528, upon being prepared, will be placed in the service jacket. Upon orders to a ship or overseas, the card will be removed from the jacket and issued to the individual.

April's Staff Dance Offers Shep Fields

Enlisted staff and students will dance to the music of Shep Fields and his well-known "rippling rhythm" orchestra in the NNMCC gym Friday night, 25 Apr. The dance will get underway at 2030 and conclude at 2330.

Before the dance, at 1830, Shep

Shep Fields

Fields will play for a one-hour show in the main auditorium which will be broadcast to the wards.

RADM and Mrs. W. J. C. Agnew have been invited as guests of honor. RADM Agnew, Commanding Officer, NNMCC, will retire from active naval service 1 May.

Dress for the dance will be uniform or civilian clothes with coat and tie. Refreshments will be served.

"Rippling Rhythm" was the musical innovation that first put Shep on the map as a qualified conductor and musician. While the rhythmic style is older than

Her Majesty Visits Ward 3-C Patients

On Friday, 4 Apr, NNMCC played host to the Queen of the Netherlands who came to visit servicemen wounded in Korea. Arriving at 1705, the gracious Queen was greeted by RADM G. H. Fort, Commandant of PRNC, RADM W. J. C. Agnew, Commanding Officer, NNMCC, and COs of the component commands.

Following the welcoming ceremony, the Queen was escorted directly to Ward 3-C to visit hospitalized Korean veterans.

On a planned 16-day coast to coast visit in the United States, Queen Juliana and Prince Bernhard departed from Washington the following morning for Philadelphia.

Help Combat Cancer

Contributions are being taken now for the current cancer drive which will be completed 30 Apr at NNMCC. All personnel are urged to contribute. In the words of RADM G. H. Fort, Commandant, PRNC, "Not only should we all join in the united effort to combat a foreign enemy, but we should also unite in the effort to combat cancer, one of the worst enemies of mankind. The American Cancer Society will receive the full support of this Command."

most of the current band interpretations, it has endured through the years due to Shep's never-ending drive for improvement.

Variety Show Slated for Wednesday

"20th Century Players," a group of variety artists under the direction of Mickey Miller (center—polka dot shirt) will give a one-and-one-half hour variety show Wednesday night, 16 Apr, at 1900 in the main auditorium.

The show will consist of male and female singers and dancers, magicians, jugglers, western acts, comedy, and burlesque skits, line of dancing girls, lovely models, plus an audience participation radio quiz type giveaway program, and featuring the hottest jazz combo in the Washington area.

Lullaby of Dreams

Sweet baby, it's twilight and time for bed,
You seem to be nodding your curly head.
Your blue eyes are drowsy, they want to sleep;
To dreamland you'll go with Boy Blue and Bo Peep.
Your fairy-godmother and her magic wand
Will guide you with care to treasures beyond.
You'll play with your friends from fairy-tale books;
Romp on the clouds and sail starry brooks.

To the city of dreams made of cookies and candy,
A mountain of ice cream and soda-pop handy.
Where nursery rhymes live and elephants are pink,
To the jolly old moon who'll smile and wink.
Angels will sing you soft lullabies
And bless you with smiles from heavenly skies.
Sweet baby, the dusk of twilight has ended,
Around your wee bed the sandman has wended.

Sleep baby, sleep, in peace all the while
Your rosy cheeks are dimpled in a smile—
A chubby hand doubled 'neath your chin—
You've been kissed goodnight and tucked gently in.
Sweet baby, your doll snuggles by your side
To share the secrets of your magical ride,
So slumber in peace by the light of moonbeams
And softly I'll sing a lullaby of dreams.

—GLORIA GOSNELL BURGESS, NMRI

The Chaplain's Corner

by Chaplain Newell V. Brink

Voices Needed to Spread God's Word

We sometimes wonder if our Christian religion has not become too intellectual. Former generations saw the cross of Christ and were fired by what it meant to them. They took that fire and proceeded to go out and turn the world upside down. Today we are devotees of the survey. We survey, discuss, and define the problem and too often we leave it there.

There seems to be a sense of satisfaction and feeling of warm accomplishment when the wheels have been turned over and oiled, but they return to the same position they were in before. If our religion is good for us, we ought to be willing to tell someone else about it.

When we buy a new "Speedy Eight" sedan and we like it, we are not hesitant in telling our neighbors that the "Speedy Eight" is the best car on the road. When we get a new television set we like, we are apt to tell even casual acquaintances and recommend the same kind to them.

Somehow, when we have the opportunity to tell the good news of what the power of the Eternal God can do for weary and troubled souls who need something to tie to, we become strangely shy and speak of God with deprecation and embarrassment, if at all.

God needs men to tell others about Him and what He can do for them. Not tiresomely, routinely, or with a lavish use of out-moded terminology. But simple, direct, warm-hearted testimony as to exactly what God can do. If you have found in your religion a worthwhile experience, tell someone else about it and help him to find the same thing. Don't be ashamed and don't hide behind a survey. God needs witnessing Christians.

Crew's Library:

Books Offer Fuel For Political Fire

Here are a couple of books of facts to back you up in the political arguments in which all of us will be joining within the next few months.

A book which will have political repercussions in spite of Mr. Truman's decision not to run for re-election, is **MR. PRESIDENT**, edited by William Hillman. As Mr. Truman expressed the purpose of the book, "I want the people to know the Presidency as I have experienced it and I want them to know me as I am."

In the latter part of that wish, at least, he has succeeded and we see the President as he sees himself.

Whether your opinions about Taft are pro or con, you will want to read his new book titled **A FOREIGN POLICY FOR AMERICANS**. Taft criticizes the administration for inconsistency in foreign affairs, for sending troops out of the country and for the weakness of the United Nations. His proposals are aid to Nationalist China, a large Navy and Air Force and more propaganda for democracy.

There is no substitute for a well read man! Did you hear about the fellow who was described like this?: "He attended high school but has no diplomas. He is a GRADUATE OF THE PUBLIC LIBRARY." Think it over.

Diaper Derby

23 Mar—James Eugene Hatch, 8 lbs., 3 oz., new son of Emery James Hatch, HM1, Personnel Office, NH.

5 Apr—Terry Alvin Real, 7 lbs., 12 1/4 oz., new son of Alvin Woodward Real, HM2, of Guard Mail, NNMC.

7 Apr—Jaye Arlene Peck, 8 lbs., 7 1/4 oz., new daughter of Lewis E. Peck, HMC, NSHA student.

8 Apr—Gary Thomas Cook, 7 lbs., 2 oz., new son of LCDR Francis W. Cook, DC, USN, Post Graduate Officer, NDS.

8 Apr—Michael Defiel Minard, 7 lbs., 11 oz., new son of LCDR David Minard, MC, USN, of Physiology Dept., NMRI.

Congregation Beth El of Montgomery County will hold services every Friday night at 8:15 p.m. in the Social Hall of the All Saints Episcopal Church, Chevy Chase Circle. All Service Personnel are invited to attend.

The services of Rabbi Harry Kaufman, representing the Jewish Welfare Board, are available to all Jewish Personnel and Patients at the National Naval Medical Center. Rabbi Kaufman may be reached by calling the Chaplain's Office, Ext. 324, or by call direct—Office: RA. 5371—Home: GE. 0755.

Techs from NMS' Tissue Bank School Trained to Originate Other Banks

Students in the Tissue Bank School listen attentively while instructor Charles A. McCalla, HM1, discusses one of the slides. (r.): H. A. Haggett, HN; C. T. Stephens, HM1; C. R. McCance, HN, instructor; R. F. Erwin, HN; J. A. Smeraglia, HM2; R. L. Fair, HM1; T. I. Gross, HM1; and J. A. Gerrion, HM3. Students not in picture are D. L. Carter, HM3, and C. L. Farras, HM3. Left insert: "Mr. Bones" pays strict attention too. The skeleton (actually kept in the closet) is used for studies in osteology.

Next month, the Tissue Bank School at NNMC, the only school of its kind in existence, graduates its seventh class since its establishment. Originally begun by some students gathering on their own time with Dr. George W. Hyatt, who also established the bone bank, the school later received official recognition and was established as a bona fide Hospital Corps school.

In January 1951 the course was revised and the instructional material was placed on the first and second year college level. Charles A. McCalla, HM1, the present senior instructor of the school, for his work in organizing a new curriculum, was awarded a Letter of Commendation by Capt. B. W. Hogan, then Commanding Officer of NMS.

Other instructors include: B. C. LeVeque, HM3, C. R. McCance, HN, W. L. Butler, HM1, and LT Caroline Scharf, NC, USNR.

This school, rated in the upper five in the Hospital Corps, is a four months' course, covering both the practical and theoretical.

The course, under the direction of Dr. Thomas C. Turner, LTJG, and Dr. C. A. L. Bassett, LTJG, and supervised by Charles A. McCalla, HM1, offers a wide range of subjects with emphasis placed on the administrative and surgical procedures peculiar to the tissue bank. The student receives a detailed course in descriptive anatomy and histology with a background of embryology, cytology, bacteriology, chemistry, genetics, and blood grouping added to aid him in the work.

The student is rotated to the different departments of the tis-

sue bank during the four month course for the practical experience that is an important part of the course.

A period in the tissue bank operating room, a period in the office, and time spent in the NMRI experimental labs, plus field trips to National Institutes of Health and the Armed Forces Institute of Pathology all aid in showing what work is going on in this field.

Each student is required to write, prior to graduation, an original research paper on some phase of tissue preservation.

The prerequisite for the course is operating room training. The Tissue Bank Technician is required to serve during operations when tissue is received from or supplied to operations.

Upon graduation the student can be sent to any part of the world and is qualified to set up and maintain a tissue bank.

Graduates from this school have been instrumental already in the locating of tissue banks in some of the principal naval hospitals in the country—Philadelphia, St. Albans, San Diego, and Oakland. Also a good number of the graduates are retained here as staff in the tissue bank.

Exercise Your Right

What greater gift could our forefathers have given us other than the right to be a free people?

With the world in chaos and the destructive forces united in a common plan for world domination, we of a free world realize fully the values of our heritage, one of which is voting.

LT D. H. Baker, the voting officer for this station, in the following statement, has shown how easy it is for a man in service to take advantage of his right as a free voter:

"A person's interest in the affairs of his government is not diminished by reason of being in service. Most states recognize the problems of servicemen and have enacted legislation to facilitate voting by service personnel.

"In many instances, absentee voting by service personnel is permitted, although such privileges are not always extended to civilians.

"The procedure for a serviceman to cast his vote is comparatively simple:

"1. The man in service procures a postal card application from his voting officer.

"2. After filling out the card, the serviceman or woman mails the card (free of all postage) to the Secretary of State in his home state.

"3. The voting officials will then mail the applicant a ballot which is to be acknowledged and sealed in the presence of the voting officer.

Detailed information concerning the voting rights of personnel in service may be obtained by contacting LT Baker, room 213, main building.

Spring Arrives
At Research Too

by R. Conaway

With the unmistakable signs of spring everywhere, one becomes accustomed to the sight of birds—thousands of them—returning on their winter home in the north. This brings to mind an important question: What kind of birds don't fly? I hear Frankie Mac knows the answer to that.

It looks like Hammy Brooks' car is partial to green; that's the only color it ever runs into.

I slipped up on this one: At Personnel Inspection on 28 Mar, Davenport and B. Carson are presented with a Unit Citation for bravery in action with the Marine Division reinforced in area.

Advice to Nick: Next time use your fingers. I'll bet it was a meat pie in Morgantown.

People are beginning to wonder where Vic Carnecross got the nickname "Doshel?"

Did you hear that B. Carson's car presented him with a baby on April Fools Day? On April two years ago, it was a boy. Somehow it isn't a joke anymore.

Why does Mable Eller keep retting, "I must have had a good reason because—"

This is to inform three certain fellows on the third deck that we are wise to all that sign language have been using lately. Bet that play was more effective than T formation.

A hearty welcome to the new members of the Research family: A. L. Parnham from Oceanside, Calif.; R. R. Jennings, USNH, Quantico, Va.; E. J. Lynch, San Francisco; and Ralph Kidwell from USNH, NNMCM. A fond farewell to those who have departed: J. M. Conley to inactive duty; J. Conley, honorable discharge; and J. F. McDell, transferred to USNH, NNMCM for duty.

Editor's Desk

Fred D. Miller, D.D.S., F.I.C.D., will be guest speaker at the special lecture to be held by the staff of Naval Dental School Friday, 25 Apr at 1400 in Bldg. 122, Rm. 202, Dental School Annex. Dr. Miller will speak on "Replacing Single Anterior Teeth."

Stepping up from ENS to LTJG on 4 Apr were Thomas E. Wheeler, MSC, of General Chemistry, NMS, and William H. Wells, MSC, of Parasitology, NMS.

Baldwin Lucke, M.D., will deliver the next guest lecture in the current Naval Medical School series in the main auditorium at 2015, 25 Apr. Dr. Lucke, who is Chairman of the Department of Pathology at the University of Pennsylvania, will speak on "The Pathology of Viral Hepatitis in Man and in Birds."

Jonathan H. Johns, HN, and Jack E. Colley, HA, of Naval Hospital, received Letters of Commendation from their Commanding Officer, CAPT B. W. Hogan, on 3 Apr. Both corpsmen were commended for their exceptional vigilance, understanding, tact, and sympathy in dealing with patients while assigned to T-12.

Dr. Jean Botts and Mr. Joseph Blum have recently been elected to full membership in Sigma Xi, the national scientific honor fraternity. Both young scientists had previously been honored by awards of research fellowships of the U.S. Public Health Service for their studies on muscle while at NMRI.

Later this year they are slated to report recent findings at international meetings in New York and Europe. Dr. Botts has her Ph.D. from the University of Chicago, and Mr. Blum is scheduled to receive his doctorate from the same institution this summer.

I and E:
GWU Now Offering
English and Speech

Registration for two intensive college courses to be given at NNMCM under the auspices of George Washington University will be held at the Information and Education Office, Building 102, on April 21, 22, 23 from 0800 to 1630.

These concentrated courses will last for seven and a half weeks and carry three semester hours credit. The schedule for these courses is as follows:

English I, Tues., Thurs., 1830-2100, Building 131; Effective Speaking, Mon., Wed., 1830-2100, Building 131.

Although these courses are planned primarily to meet the needs of patient personnel at this activity, all Navy and civilian staff members are cordially invited to attend.

Both English I and Effective Speaking are required courses for those who are interested in working toward an Associate in Arts Degree at George Washington University, and will be, it is hoped, the beginning of a long term program which would fulfill all requirements for such a degree at George Washington.

The cost of each course is \$30.00 for service personnel and \$36.00 for civilians. Full tuition must be paid, either by check or by money order, at the time of registration. If, however, enrollment is not sufficient to begin a class, the payment will be returned in full.

All patients must secure the permission of their Ward Medical Officers before being allowed to enter the classes.

The first sessions of each of these classes will meet during the week of 28 Apr. Further information concerning this program is available on bulletin boards throughout the Center as well as at the Information and Education Office, Bldg. 102.

All persons desiring to take advantage of this opportunity must register at the I and E Office on Monday, Tuesday, or Wednesday, April 21, 22, and 23.

Audio-Visual Artist Contributes
Chuckles for NNMCM NEWS Readers

Left: An artist often sees people in a different light than they see themselves. Right: Allen R. McGinley, HN.

A gift for both caricature and serious works supported by a hard-to-find quality of originality has and is resulting in some of the finest cartoons that have appeared in the NNMCM NEWS.

The "Chain of Command," the "It's amazing what you can do with these ozalid machines," and "The morale is getting low," cartoons have all resulted in numerous requests for additional copies.

These black and white drawings, a ludicrous study of life, are the work of a Navy artist in Audio-Visual, Allen R. McGinley, HN.

Though he has been drawing since grade school, the Navy first became aware of these talents after his recall to the service in 1951. While awaiting orders at the Philadelphia Naval Receiving Station he requested that a technician's rating—Medical Illustrator—be placed in his record.

The chief handling the request knew of an officer who was in need of such talent and introduced the two. After the officer saw Al's samples he requested that Al be transferred to the District Medical Office in the City of Brotherly Love where he was detailed to the illustration section designing posters for training aids and sanitation.

Al took second prize at the Annual Armed Forces Occupational Therapy Competition 2 Apr (see story on page 1) for a portrait he made of Admiral Agnew.

His free time is mainly occupied gathering material for a portfolio to use as samples in acquiring a job on release from the service. He also wants to attend school and do free-lance work.

HUNTING HINTS
How to catch a rabbit: Find a stand behind a tree, and make noise like a carrot.

Lab 17 Graduates Forty-five New Laboratory Technicians

Medical School's Lab 17 Class graduated 11 Apr 45 students receiving diplomas. Honor student G. M. Trovato with J. E. Hollifield and J. F. Galt taking second and third spots.

Front row: W. C. Coles, HMC, instructor in parasitology; M. F. Kelly, HMC, instructor in hematology; R. R. F. Jaeger, OMC; CAPT J. L. Enyart, Commanding Officer, NMS; CAPT E. B. Coyk, Executive Officer, NMS; CDR V. E. Martens, Director of Laboratories, NMS; E. L. Lampley, HMC, instructor in bacteriology; and R. Hamill, HM1, instructor in histology.

Second row: R. Gutekunst, HM1, instructor in bacteriology; J. M. Dew, HN; G. C. Maynard, HN; M. L. Illas, HN (W); V. M. Young, HN (W); P. R. Igou, (W); V. R. Henton, HM2; C. A. Stahley, HN; and Reed, HM1, instructor in histopathology.

Third row: D. C. DeGeorge, HM2; R. F. Desmarais, HM2; R. L. Chellew, HN; W. A. Dewes, HN; G. P. Hastie, HM3; E. M. Harrison, HM3; E. L. Schoegel, HM2; H. D. Mitchell, HN; J. F. Metcalf, HN; E. R. Pugh, HN; and W. L. Barron, HM3.

Fourth row: R. W. Boyd, HM3; D. S. Tolin, HM3; W. G. Peterkin, HM3; R. F. DeVecchio, HM3; C. E. Martin, HM3; R. L. White, HN; B. Goldstein, HM1; R. W. Trimmer, HM1; A. J. Kotonias, HN; J. E. Tibbets, HN; W. W. Chapman, HM2; F. N. Pensce, HN; and D. J. Konecki, HN.

Last row: T. W. Feary, HN; S. A. Beaudoin, HN; M. R. Corbett, HN; D. J. Cups, HN; J. E. Hollifield, HM3; B. H. Randall, HM2; C. W. Padgett, HN; J. V. Wheeler, HM3; H. L. Hance, HM2; A. E. Liles, HM2; and N. D. Park, HM2.

Your Navy Belles
by George

The day before pay day song fest or "Are you as broke as I" turned out to be a nice evening. Our neighbors next door came over, and with singing, records, and dancing everyone spent an enjoyable evening.

Our April brides are Ruby Saloum (now Mrs. Charles Padgett) and Peggie Igou. Lab school finished, and Peggie is going to Research to do a hitch. (She is working her way around the commands.)

Grace is going to Jacksonville. Ginny Young is going to Phillie, and Joan Osterhout has been asked to come back to the Marines, so she is going to Quantico.

Our four neighbors are beaming as they go to the third deck for practical. . . . Sandy has been in sick bay again. . . . Allen, our new night MAA, sure tops all alarm clocks when she beams you out of bed in the morning.

SPORTS—Our girls finished basketball and started softball. Need some more players so sign up. We have four nice new bikes which are used daily. The full tennis courts and ball games out back tell us spring is here.

Welcome to Pat Welly, PNSA and Marion Achley, PNSA, who reported in last Tuesday for Center Command. Joan Madsen has gone to New York on TAD to attend school.

Mary Casillas sings in church and Scotty gets praises for it. Lucile Thompson sings in church and I get the praise. But we know who the lovely voices belong to and how much the music helps the church services.

The girl from the heart of Maryland hopes Harvey came to see you all.

Dr. Gezon and Crew
Combat Epidemic

Many of you have heard about the epidemic of influenza and streptococcal sore throat at Bainbridge during February and March. To five doctors and four corpsmen from NNMCM it was more than just news from another station. They made up the emergency crew which worked from 3 Feb to 20 Mar to curb the Bainbridge epidemic.

CDR Horace M. Gezon, MC, USNR, Head of NMS's Epidemiology Department, selected four doctors from his department: LT Robert Magoffin, MC, USNR, LTJG John Cook, MC, USN, LTJG Charles Miller, MC, USN, and LTJG Ned Wiebenga, MC, USN.

Enlisted men selected were: Ansle King, HMC, Epidemiology Dept.; Richard Gutekunst, HM1, and Donald Myers, HM1, Bacteriology Dept.; and Joseph Metcalf, HN, Lab 17 student.

Setting up a series of labs, the crew administered penicillin and sulfadiazine to thousands of the affected with excellent results. At the peak of the epidemic there was a total of 32-8 doctors and 24 corpsmen—treating the patients.

Cultures were taken on 25,000 people. One pint of blood was extracted from 30 sheep for use in isolation of the streptococci. All the crew became ill themselves, but nevertheless continued working.

Dr. Gezon gave a preliminary report on the episode at the Joint Commission on Streptococcal Diseases, Armed Forces Epidemiological Board, in Cleveland 2 and 3 Apr.

Members of O.T. Departments Give Patients Professional Guidance in Arts and Crafts

(1) The use of sand blocks, designed to meet the patient's individual needs, help in designing pieces of furniture in the woodworking shop.
(2) First a pupil . . . then a teacher. Hospital corpsmen learn the fundamentals of applied carpentry under the

watchful eye of their instructor.
(3) Ceramics. Incorporating the fine qualities of design and originality, the patient puts the finishing touches on a vase.
(4) Patient using a wrist-roller attachment on a hand loom.

(5) An adaptation provided for bed patients enables the patient to read while in a reclining position.
(6) Under the watchful guidance of qualified personnel patients are introduced to the art of leathercraft and design.

Rehabilitation Program Conducted by Occupational Therapy Restores Patients to Health

Emphasizing its functional value for the patients at this hospital, the Occupational Therapy Department, under the supervision of LTJG E. M. Carver, NC, USNR, boasts several well equipped shops.

In these shops physically impaired bodies are rehabilitated through the introduction to weaving, leather craft, copper tooling, metalry and carpentry, under the guidance of qualified personnel.

Among the enlisted personnel in the various departments of Occupational Therapy are T. F. Williams, HMC, and J. E. Goff, HM2, of the plastics division; M. L. Scott, HM2 (W), proving her talents in the printing department, and H. S. Bartholomew, HM1, teaching the principles of photography and ceramics.

Mr. Kanning, O.T.R., head of the woodworking shop, displays a genuine interest in his field.

The specialty shop, covered by Miss Kerr, O.T.R., and Miss Greenlie, O.T.R., guide the efforts of the patients in the art of copper tooling, leather work, and the weaving of

intricate designs on the looms.

Artistically designed and executed articles of silver and copper are made in the metalry shop under the direction of Miss Stapin, O.T.R.

Realizing these expenditures are a worthwhile investment, this hospital has made a policy of equipping the departments in an exceptionally fine manner. Anything and everything required for the field of Occupational Therapy will be found here.

Though the patient, busy with the design which he is creating upon the loom, seldom understands the underlying factors involved, or the psychological approach in his case, they are nevertheless apparent.

Far from the field of fantasy, Occupational Therapy serves a logical and practical purpose.

Hand looms and foot treadle four-harness looms aid in the strengthening of muscles and tendons of the upper and lower extremities. To help in the support of muscles too weak to sustain a working position, the arm sling suspension is part of the department's standard equipment.

Once considered the art for the master craftsman, ceramics today, as evidenced by the work turned out by patients undergoing therapeutic rehabilitation, is within the reach of many individuals. Though molds are often used, it is the desire of the therapists to guide the patient's inventive genius by suggesting the detailed thought behind originality.

At one of the tables in the specialty shop, the patients select, design, and finish small articles from leather. Small objects such as wallets, have priority for the beginner, who later graduates into the class of "master craftsman."

Everything that the budding photographer needs may be found in the dark room. Well equipped with a full sized Kodak enlarger, viewer, and roller dryer, the neophyte photographer soon acquaints himself with the elements of the profession.

"Show me a man whose eyes won't glint when he sees his name, in full, in print."

The printing press, long valued as a means of gaining individual attention through the printed word, is seldom idle in the shop overseen by M. L. Scott, HM2 (W). Whatever the need in the line of printed matter, may be found by those interested in the art.

Manual powered presses and hand presses with added resistance increase the muscle strength and range of motion in the elbow joints. Pulleys and weights attached to the handles afford additional weight and controlled resistance. Foot powered presses for grading range are popular with the advanced student-patient.

A print shop, complete in itself, also carries a com-

plete stock of artist's materials. Oils, tempera colors, and other mediums of art expression may be found here. Articles from the smallest pen to the largest brush; from the scratch paper used in preliminary sketches to the huge canvases are found in this sub-division.

"With hammer and saw he must be good to fashion designs from Nature's wood."

Mr. Kanning's position in the woodworking department has afforded him the respect from those seeking his advice. The carpenter shop, complete with hundreds of dollars worth of tools and equipment, offers the patients obstacles, but with careful planning and close alliance between the therapist and patient, such obstacles are overcome.

LCDR G. E. Vaupel, directly in charge of Physiotherapy and Occupational Therapy, has shown a deep interest in these departments. Carrying out the jobs allotted them, his subordinates are proving their beliefs in functional therapy as demonstrated in the department and its subdivisions.

Patient using the Bicycle Saw with added resistance which provides increased strength and range of motion of hip and knee.

The neophyte carpenter selects tools of the craft from a display in the shop of Occupational Therapy.

APRIL 14, 1952

Coach's Corner

A few nights back, the raconteurs were gathered round spinning anecdotes. . . Wiffy Cox, nationally known professional from Congressional Country Club out on River Road, told of scoring an eagle and a birdie on the same hole. Seems that Wiffy was touring the sporty shoe Tavern layout on the shores of Lake Tahoe, nestled high in the Nevada-California corner. His second shot on a par 4 strayed into the pine needles, a cottontail scampered across the carpet, off a granite ledge swooped a diurnal bird of prey, a low recovery shot spanked into the wind, sent the taloned member of the family Falconidae winging frustration as the gutta-percha trickled into the cup, pin feathers tumbled to the Australian bent and rabouillere scurried to safety. In the Pacific Northwest, in the environs of Yakutat, Cordova, Sitka, Kodiak when the salmon are running there is sport to be had for all; the naturalist, to marvel at the homing instinct of the Quinns, Blueback and the Red as they return to spawn, for the angler, fifteen pounds of salmoned fury but this is not the end of the story. . . RADM Alfred Chandler, an athletic name at the University of Pennsylvania, moved the conversation at this point. . . one day while playing a golf course in the Puget Sound area, he finished holing out and while the caddy was scoring, putter in hand, reached into a stream bound the green and hooked a struggling King in the gills. The shaft of the putter showed strain but salmon steak was the order of the day upon return to the wardroom. . .

From the pages of the Caducean, the house organ of Tripler General Hospital out where the palm fronds rustle in the tropic zephyrs the sibilant whispering of the surf, we note with pride the winning golf championship by CDR T. Alexander Lesney, shooting two under par for the 36 holes. . . in a few days Big George Funk, a wonderful athlete, will be leaving the Center locker room to return to civilian life. George is trying out with a major league club for a backstop position. An iron arm, a gent with a healthy cut at the horse, a physical endowment of 200 pounds of coordinated muscle tissue and a healthy mental attitude of 'never say die,' will start the veteran poster with five quick buckets on the outside.

Over in the Dental School are a couple of fellows whose digital dexterity, fashion auricular appendages of vinyl resin, acrylic eyes, numerous other items in the field of maxillo-facial prosthesis, who have now turned their collective talents to the hempen enclosure. Vic Hansen, a former tackle at the University of Minnesota, and Herbie Biele, a Jumbo from Tufts, have developed a fighter's mouthpiece which is the theme of conversation from coast to coast whenever pugilists and scribes gather. The other day Norvel Lee, the nation's ranking feather heavyweight, asked if he could give it a try in the fights at the Center this week. The genial gents obliged and with the help of their ace mechanics, Big Ernie Biele, Dominic Zaia, and Romeo McCline read-accommodated D. C.'s fistic pride. Only last night, Phil Anderson of Portland, Maine called to say that he had fashioned a Niiranen-Towle mouthpiece for Rocky Graziano and the latter was highly enthused in having something protecting his teeth, that would not loosen on any breath let alone a good rapier right to the inferior border of the body of the mandible. . .

Duty permitting, a steady threesome crosses the fairways every weekend: CAPT Earl Evans, whose son BUFF hopes to fill the shoes of Dad as a snapper back on a Tulane eleven, Jiggs Canada, whose dress with the wand when the pin is removed accounts for eight ar hubeaps and Cathode Cole, a long ball hitter, who one day lost Sweet-swinging Willie King kissed a four iron, a theodolite sured bit of yardage, 200 yds. to the pin on number Nine. The best duo on the campus are Chiefs Hotvedt and Sumner, who hit starting tee daily at four-thirty. Returning to the tree lined avenue of Seven, Eight and Nine is a former member of the Ink Foundation, and now local gendarme, Ernie Huffman. A year or so ago, Huffman discussed the Rules of the Road with a Rockville bus driver, although he will not be able to cavort in Chief lane's infield the badge-wearer states that his short game is as good as ever. . .

Last winter, the Maryland Golf Association in an effort to treat all clubs with fairness in so far as handicaps are concerned set up with the thought to have a committee evaluate the posted handicaps at the various member clubs. George Dittenbaugh of Kenwood, brought on Prince Georges went over the local layout with Bill King, our home professional, and here's what they came up with on the basis of difficulty for the average golfer in summer time on the course plays short. . . Hole 1-4.0, Hole 2-3.5, Hole 3-3.5, Hole 4-4.0, Hole 5-3.5, Hole 6-3.5, Hole 7-4.0, Hole 8-4.0, Hole 9-4.0. . . now when this is totaled, PAR for the nine holes reads 34 against a yardage count of 35 strokes. . . will explain more fully in next issue as the Coach allows no more than 57 minutes to write and edit this column.

According to the book—the man's arm—in a voice—you're under ar-

Waves End WIAL League Taking 2 Middle Slots

The WIAL League final standings in the 1951-52 bowling season show the two Bethesda Wave teams in seventh and eighth places in a league which included 13 entries.

Puffer's Team No. 1, which copped seventh position, included Eller, Salloum, Conaway, and Green. Team 2 was composed of Schrader, McElfish, Clarkson, Scott, Connor, Pietrangelo, and Tillotson.

Salloum pulled down the highest score of the two teams—a 207—only six points below the 213 which took honors for the League.

Attention all Wave officers, Nurses, and enlisted women who are interested in helping create a winning softball team! Contact Norma Schrader, ESB1, at Ext. 239.

Softball Roster Sports 9 Teams

As spring gets well underway, almost all the intramural softball entries have their teams lined up for the coming season.

During the third week of April the familiar sound of "Play Ball!" will echo throughout the station area. Seasoned players and amateurs alike will display their talents on the diamond to the spectators.

To date the following teams have taken advantage of Special Services' bid to take their places in the softball lineup: Dental Internes, Center Command, Lab. 18, X-ray, Pharmacy School, Naval Hospital Doctors, Bks. 12, Dental School, and Cardiology.

Last year in the softball league, nearly 20 per cent of the total personnel stationed here at the base were competing in the softball tourney. The first game of the season was a no-hitter tossed by Commissary's Henry White against the Barracks 12-A team that ended the game at 8-0.

By the later part of June only one team had maintained its 1000 and by July the same team—Commissary—had reeled off 10 straight victories with the nearest team—Qtrs. 12-A—holding second place with an 8 to 2 record.

At the end of the season, Commissary still held the top deck with 1000 on the baseball meter while the NDS team and the Qtrs. 12-A team were tied for the second position.

In the play offs, Qtrs. 12-A pulled a four-point lead in the opening frame and were able to maintain the lead until the fifth inning. In the fifth, NDS finally grabbed the lead by two home runs and were able to hang on to one of them until the end. Final score: 9-8.

Smiling Racketeers

From the broad smiles it's hard to guess who won this match, played on the enlisted courts near Bldg. 23. On the left is Joseph Deidesheimer, HN, and on the right is Bill Conran, HM2.

A Taking Girl

She took my hand in sheltered nooks
She took my candy and my books
She took that lustrous wrap of fur
She took the gloves I bought for her
She took my flowers, rich and rare
She took my words of love and care
She took my time for quite awhile
She took my kisses, this maid so shy
She took, I must confess, my eye
She took whatever I could buy
And then she took another guy!

—J. F. MELVIN, NNMC

Hospital Putters Tee Off on Green

Robert J. Novotny, HN, of NH's EENT Clinic, looks on while Robert Armeson, HN, of NH's GU Clinic, sizes up a short putt. Both men have been walking the greens for three years.

Schrader Elected Sports Coordinator

When the ballot box was opened and the votes counted on 2 Apr, it was discovered that Norma E. Schrader, ESB1, USN, had been elected Waves Sports Coordinator.

The election was held to relieve Coordinator Maggie McQuarrie. McQuarrie had held the job since last September.

The main duty of the Sports Coordinator is to act as Enlisted Wave Representative to the Women's Inter-Service Athletic League which meets downtown once a month. This League sets up a sports program for all military installations in the area.

Known to the 70-some Waves as "Ma," Schrader is CMAA of the Waves Barracks, and works in the Special Services Office in the afternoons. Here since last August, NNMC was her first permanent duty station since being recalled in 1950.

Wafs Defeat Waves In WIAL Tourney

NNMC Waves were eliminated in the first round of the WIAL tournament Monday night, 31 Mar, at the Ft. Myer North Post gym, bowing out to the Ft. Myer Wafs 46-28.

The Waves were putting up a stiff struggle against the winners of the WIAL round robin completed the week before, trailing 15-20 at the half. Ace-guard, Nonnie Hawkins, was injured in the closing minutes of the second quarter, and her loss was greatly reflected on the scoreboard as the Wafs slipped in 26 points in the last half.

Miss Jarvi replaced Nonnie, and Salisbury replaced Skinner in the fourth, while Pat DeBerry played the full 32 minutes on the defense end. Crouch accounted for 12 of the Wave tallies, both in lay-ins and a few of her long beauties, while Madsen took 10 and Allen 6. This winds up the season for the Admirettes who turned in their uniforms and are getting ready for spring softball practice.

Tobacco is a filthy weed—
I like it,
It satisfies no normal need
I like it,
It makes you thin; it makes you lean—
It takes the hair right off your bean
It's the worst darn stuff I've ever seen
I like it.

—J. F. MELVIN, NNMC

Newly Formed Group Discusses Problems

With the coming of spring, women personnel on the station are displaying an increased interest in athletics and recreational facilities. Names are being taken for the spring softball team, the four new bicycles are used daily, tennis fans are making regular appearances on the courts, and a few of the girls are brushing up on their golf strokes.

To provide added stimulus, and to increase the interest and participation of women personnel in these activities, a committee for Women's Athletics and Recreation has been named.

Comprised of two Wave officers, two nurses, and two enlisted women, the committee will meet twice a month with the Women's Personnel Representative (LT E. C. Wilson). Recreational problems will be discussed and suggestions made. Miss Wilson, in turn, will take the suggestions to the NNMC Athletic Board.

The committee held its first meeting Monday, 7 Apr, and planned an informal get-together for the members of the Waves basketball team to be held this Wednesday at the home of Miss Wilson at 2000.

The newly formed committee includes: LT Edna McCormick, MSC, LTJG Barbara W. Garland, MSC, LCDR Roberta A. Ohrman, NC, LT Margaret B. Binkley, NC, Norma Schrader, ESB1, and Margaret Wilkie, HM1.

I Wonder

I wonder as I watch the moon
Bump noses with a star
"Are you watching, too, or is it
Dark and raining where you are?"
And when I turn the radio knob and
Hear a song that's new,
I wonder, if off where you are
You might be listening too.
Do you day dream as I day dream
And miss me too my dear?
And when I'm wishing I were there . . .
Are you wishing you were here?
Your letters help an awful lot;
Each page is full of charms.
But, darling, they aren't quite enough
For letters have no arms.

—J. F. MELVIN, NNMC

Wash. Acad. of Sciences Honors 3 NMRI Doctors

In recognition of their accomplishments in the field of atomic medicine, CAPT R. H. Draeger, CDR R. H. Lee, and CDR E. P. Cronkite were recently elected to membership in the Washington Academy of Sciences.

This honor was awarded to CAPT Draeger for his work in the engineering of equipment for the exposure of animals to atomic bomb air blast, thermal and ionizing radiation; to CDR Lee for his research in night vision and the biological aspects of the testing of atomic weapons; and to CDR Cronkite for his contributions in the use of blood derivatives in clinical medicine, hematologic effects of radiation, hemolysis in normal and irradiated animals, and hematologic and lethal effects of atomic bomb radiation.

O. T.

Visual Department, NMS: second prize for scratch board black portrait of Admiral Agnew.

Sculpture—Walter J. Ender, HM3, USN, of Medical Illustration, NMS: second prize for "Mother and Child."

Textiles—LT Florence Frazier, NC, USN, Physical Therapy Department, NH: second prize for knitted bed spread.

Weaving—Lee Green, HMC, USN, of Medical Photography, NMS: first prize for hand-woven white table cloth and second prize for woven scarf.

Awards to patients were: Ceramics—ENS Henry E. Holt, T-8: second prize for ceramic chess ash tray table.

Leather—LT Glenville F. Brown, USCG (Ret), out-patient: second prize for hand-carved pocketbook.

Miscellaneous—Cpl. Isiah Henderson, USA, former patient on Ward 132: first prize for occupational therapy poster; and first prize for copper tooled plaque of Paul Revere.

Plastics—James Braden, AM3, USN, patient on Ward 107: first prize for silver and plastic lamp and lamp shade. (Braden's work was entered with the able-bodied entries since he did the work while stationed at Patuxent.)

Plastics—Ernest Blake, GM2, USN, patient on Ward 108: first prize for plastic fly box and display of flies.

Sculpture—Cpl. Isiah Henderson, USA, former patient on Ward 132: second prize for "Old Salt" bust.

Weaving—CAPT George Hermann, MC, USN (Ret), out-patient: first prize for woven green rug.

The entries were set up at the competition and transported there and back by M. L. Scott, HM2, (W) and H. S. Bartholomew, HM1, of the O. T. Department.

Mr. John S. Lucas

Ups and Downs of Job O.K. with Mr. Lucas

Since his position on board this station demands that he travel the route of the cables, Mr. John S. Lucas places little significance in the old saying that "life is full of ups and downs."

Born in the year 1897 and a true native of the D. C. area, Mr. Lucas is a product of the local public schools and a graduate of the Washington Baptist Seminary.

Past president of a local P.T.A. board for ten years, he has also assisted as scout master for two years.

Happily married for 35 years and the proud father of five daughters and two sons, Mr. Lucas added to his happy life in the capacity as deacon for St. Luke's Baptist Church, 14th and Peabody Streets, N.W.

Baseball and the reading of heavy literary material offer much in the way of relaxation but Mr. Lucas admits that much of his enjoyment comes from playing with his grandchildren.

Although he believes that we can never settle world disorders until we settle our own here at home, Mr. Lucas feels assured that people are definitely turning toward the church and the acknowledging forces of religion.

Piloting an elevator for 11 years would, to anyone but Mr. Lucas, seem like routine. To him the love for such duty comes from his daily contacts and in the knowledge that behind him are years of "a job well done."

Dr. Beall Speaks Here

Doctor Paul R. Beall recently gave a lecture on Communications—"The Expression of Clear Ideas to Employees and Other Groups," to the officer students at the Naval School of Hospital Administration.

Dr. Beall is on leave from Pennsylvania State College, where he is a professor in the Industrial Engineering Department of the Engineering School.

Leap Year

This is the year when it's O.K.
For any lovelorn girl to say,
"My sweet, I want to marry you."
But where's the man to say it to?
Except by letter which must go
To tell him via F.P.O.
And such proposals ain't so hot.
You need your victim on the spot.
—J. F. MELVIN, NNMC

Navy Dental Film Wins Silver Award

The Navy Medical Department's Dental Training Film "Complicated Exodontia," produced by the Bureau of Aeronautics under the direction of the Naval Dental Corps, has been awarded the 1951 Silver Award (first prize) for dental films at the International Exhibition of Cinematographic Art held at Venice, Italy.

This is the second time that a Navy Dental Film was awarded the Silver Award. The first, "Endodontia," was awarded this high award for the year 1949.

Technical advisors for the production of the winning film were: CAPT Arthur R. Frechette, DC, USN, of NDS and CDR Theodore A. Lesney, DC, USN. Technical Consultants were: CAPTs Benjamin W. Oesterling and Frank M. Kyes, DC, USN, of NDS.

The project supervisor was LCDR James Bishop, USNR, of the Naval Photographic Center, while the commercial producing agency was Byron's Inc., of 1226 Wisconsin Ave., Washington, D. C.

The Venice Film Festival is an annual event sponsored by the Biennale of Venice and is held under the auspices of the Italian Government.

Cultural, documentary, and scientific films submitted over all the world are reviewed and awards are made on the basis of excellence of quality and imaginative treatment of the film submitted.

Bronze Star Winner

Gordon W. Sumner, HMC, staff in Optical School, is congratulated by CAPT J. L. Enyart, CO, NMS, after receiving the Bronze Star Medal with Combat "V" at the Saturday inspection 5 Apr. Chief Sumner received the award for meritorious action in Korea during the Inchon invasion.

The same morning, three Presidential Unit Citations for Korean duty with the First Marine Division, Reinforced, from 15 Sept to 11 Oct, 1950 were awarded to Harvey R. Jackson, HM2, student in X-ray; James H. Ogle, HM3, student in Physical Medicine School; and Colon E. Cox, HMC, staff, Serology.

Microscopic studies show
Water teems with insects queer
What a comfort it is to know
Such things are never found in beer.

Dental Explorer

by C. Connor

Well, a good time was had by all at our latest "get together" of Al Jolson that was nothing but a terrific, and MacGeary party with his polkas, but unfortunately our only casualty was a Wave.

One D. J. A. tried parachuting from her upper bunk. Can't figure out why she didn't make it except that she didn't have a parachute. Better luck next time, D. J.

A path is being worn between the Dental Dept. and smallmouths these days; the most popular being of course "3rd class ratings badges." Congratulations one and all.

Welcome aboard to all the new prosthetic students and of course our latest staff members. Room 168 is certainly a popular spot lately. Wonder if Clarice has anything to do with it.

The softball team has been screaming for a good pitcher lately. Can't understand why Maguire doesn't volunteer. (Could he be she's conserving her "speed" for the Waves' team.)

CAPT Grunewald, when asked why he doesn't have ulcers, replied, quote: "You're supposed to give ulcers, not get them." end of quote.

Oogey (Monroe) most any Sunday or Sunday, now-a-days can be found zooming around in a Piper Cub from the local airport. Maybe that's why he looks like his "wing tips" are dragging some Monday mornings. How about that Oogey?

Well that's it for this go-round, so till next time smooth sailing to all hands from the gal from the HUB.

New York Architect Lectures at NSHA

The officer students at the Naval School of Hospital Administration attended a lecture given by Mr. Isadore Rosenfield, B.S. Architect and Hospital Consultant of New York. Mr. Rosenfield talked on the "Development of Plans for New Hospitals and Major Additions."

In his thirty years of professional activity, Mr. Rosenfield has designed or directed the design of many hospitals. He has won prizes in international hospital planning competitions, and has contributed a great deal to hospital literature.

He is the author of a book on hospital planning entitled "Hospitals—Integrated Design."

Tollis Acts as Monitor

The Bureau of Medicine and Surgery's scientific exhibit "Genital Diseases of Skin (gonorrhea, syphilis, etc.)" was displayed at the meetings of the International Medical Museums and the American Association of Pathologists and Bacteriologists joint meeting held Apr. 9-12, 1952 in New York City. CDR John L. Tollis, MC, USN, monitored the exhibit.

"I see that you've been soaking your foot as I suggested."

RADM Agnew Retires After Thirty-five Years Service

MS Commemorates Golden Anniversary

In the latter part of May, the Naval Medical School of NNMC will celebrate its golden anniversary. On this occasion, dedicated to the 50 years' history of the Naval Medical School, will feature an open house with all the facilities, equipment, and exhibits displayed to the public. There will also be two motion pictures, produced jointly by the Radio-Visual and Medical Photographic Departments, showing the recent phases of the school. Lectures will be held both to acquaint the public with the school and to show the work involved in preparing medical officers, nurses, hospitalmen, and medical technicians for duty ashore and afloat in the Navy.

Service Pay Bill Awaiting Committee

(AFPS)—A bill vitally important to members of the Armed Forces—Armed Forces Pay Bill—will probably have to wait until May for any definite compromise. Passed recently by the Senate, the pay bill is now awaiting the action of a joint conference committee. Both Rep. W. Sterling Cole (R., N.Y.) and Rep. Overton Brooks (La.), who have served readily on such conference committees, viewed their opinions "that an agreement will be reached on the actual raise somewhere in the middle of the rate set by the bills (House and the Senate)." This means that service personnel can look forward to an increase of 10 and ten per cent of base pay. The compromise were carried through the same way on the raise allowances, some features of both would be adopted. The Senate bill, in some cases, increases up to 30 per cent while the House bill maintains a 10 per cent increase. Rep. Gilday (D., Tex.), one of the leading sponsors of the House bill, hopes that the bill is passed by May at the latest. Rep. S. (R., Ill.) shares this hope. Congressmen expressed assurance to all servicemen that some table bill will be passed. Meanwhile, even the possibility of passing the bill by 1 May was questioned by some congressional observers. The joint conference will not be scheduled until sometime after the House reconvenes at the end of its Easter recess.

Music, Maestro!
Laughs, music, and refreshments will be the order of the day—or rather of the night—when the Scottish Rites of Washington bring their Variety Show to the NNMC Auditorium, 1900 Wednesday night, 30 Apr. The variety show, featuring Myer Goldman's orchestra, was arranged by the Hospital Service Committee of the Scottish Rites of Washington. Following the show refreshments will be served.

Chief to Warrant For Second Time

Mr. Wayne C. Aubrey

Another NSHA chief exchanges the "Three and one" chief's insignia for the golden warrant officer's stripe. This is the second time that Mr. Wayne C. Aubrey, of the MAT-4 Class of NSHA, has put his chief's uniform into mothballs and donned the suit with the gold stripe. The first time in 1944, was while he was stationed at Jacksonville, Fla. In 1946 he reverted back to chief. Mr. Aubrey has served, since his entry into the Navy in 1937, in nearly every billet where corpsmen are found. Duty with the FMF, duty at Naval Air Stations, VP Groups, aboard the USS Bunker Hill, the USS Sicily, at the commissioning of the Naval Hospital at Houston, Tex., and he was stationed at Pearl Harbor at the time of the attack in 1941. Mr. Aubrey will be retained at NSHA until the end of the present Medical Administration Course which ends in June of this year.

News Shorts From The Editor's Desk

Tell you what Special Services is going to do. Absolutely free and at no cost to the customer, Special Services will, again this year, make funds and equipment (picnic bags) available to departments and commands who wish to organize a picnic. So why not round up your buddies and arrange an outing. A good time couldn't be had for less.

Personnel wishing to attend the Army-Navy baseball game at Lawrence Field, United States Naval Academy, Annapolis, Md. on 24 May, may make application for tickets by inquiring at the Special Services Office, Bldg. 23.

Enlisted instructors of any rate are needed for duty at Recruit Training Commands for basic instruction in Naval Orientation and fundamentals of the three Rs.

The person must be a high school graduate, GCT of 55 or better, and experience in teaching. Further details will be found in BuPers Circ. Ltr. 212-51 (NDB, 15 Dec. 1951).

OCS School—Mathematical requirements for entrance of unrestricted line candidates into the Naval Officer Candidate School at Newport, R.I., have been suspended.

The following bills of interest to Service personnel recently were introduced in Congress:

1. A bill to provide that certain combat veterans of WWII may receive constructive credit at the ratio of two to one for time served on active duty in the Korean hostilities for the purpose of computing the duration of their required service.
2. A bill to provide WWII POWs \$1.50 daily for work they were forced to perform or for inhuman treatment they received. (This has been approved by the House and now goes before the Senate.) The money would come out of the War Claims Fund.
3. A bill to provide for the training of candidates for appointment as nurses in the military services.

Command Changes Hands Wednesday With Impressive Ceremonies, Parade

Rear Admiral W. J. C. Agnew

Rear Admiral William J. C. Agnew, Commanding Officer of the National Naval Medical Center, will be detached from this command on 30 April 1952 and will transfer to the retired list of the U. S. Naval Service effective 1 May 1952.

Letter Outlines Ens. Requirements

(AFPS)—Navy BuPers Circular Letter 35-52 outlines eligibility requirements for annual appointments to ensign in the administrative and supply section of the Medical Service Corps.

Eligible under the program are personnel of the regular Navy whose status in the Hospital corps is commissioned warrant officer, chief hospital corpsman, chief dental technician, hospital corpsman first class and dental technician first class. Requirements that would make them eligible are:

1. Be over 21 and under 32 at time of appointment.
 2. Have completed a written examination satisfactorily.
 3. Have served as petty officer, first or higher, for a period of one year prior to examination.
 4. Have successfully completed two years of college or USAFI Educational Qualification Test 2CX.
- Eligible applicants who desire appointments must submit a request in writing to their commanding officer to be considered.

On the date of detachment, a change of command ceremony will be held to pay tribute to the retiring Medical Admiral upon completing more than 35 years of active service in the Navy; and to welcome aboard the new commanding officer, RADM Bertram Groesbeck, Jr., (MC), USN.

At the change of command ceremonies, ranking officers of the Bureau of Medicine and Surgery, commanding officers of various PRNC activities, and other dignitaries will be the official guests. Officers and enlisted personnel attached to the several commands of the National Naval Medical Center and an honor guard of Marines will participate in the ceremony.

Medical officers and friends honored the popular retiring Admiral and Mrs. Agnew with a party and reception yesterday evening at the Commissioned Officers' Mess here.

The Chief Petty Officers of the station will hold a party in his honor tonight at the NNMC Chief Petty Officers' Mess (Open). Admiral and Mrs. Agnew were also the guests of honor at the enlisted staff dance held in the NNMC gymnasium, Friday night, 25 Apr.

RADM W. J. C. Agnew entered the Navy two years after his graduation from Medical School at the University of Vermont College of Medicine when he was appointed Assistant Surgeon, Medical Reserve Corps, with the rank of LT

Pipe Dreams

When I retire from my public life
I have dreams of doing so much:
Of sailing the seas and seeing the world
And meeting romance, and such.
At the end of my tour as a government girl,
After thirty long years in the saddle,
I should like to pack my extra shirt
And to the West skeedaddle.
I would make my home where the buffalo roam,
On the edge of the Navajo Trail,
Where the rattlesnakes lie in the desert sun,
And at night the coyotes wail.
But when I cut loose from Uncle Sam
And have no further care,
I suppose I'll simply settle down
In my good old rocking chair.
I'll spend my days in some dull way,
Safe in my three-room flat,
With a TV set, and plenty to eat,
And a nice old green-eyed cat.

—MILDRED HYNES, NMRI

The Chaplain's Corner

By Chaplain Warren D. Trumbo

What's Your Batting Average?

That all-American sport known as baseball has once again become the center of attraction for millions of sports enthusiasts. Whether you are a lover of baseball or not, you cannot help overhearing some of the numerous speculations as to who will win the pennant, various discussions about individual players, descriptions of games which have been played.

Baseball is a game in which team spirit and cooperation is the all important thing. Of course the records of individual players are important, especially among the crop of rookies who are up in the big leagues for the first time. But more important is that the entire team have that winning attitude and spirit. A few outstanding players on a team cannot win ball games unless the other players are giving their best to the game. A pitcher must be backed up by good defensive plays but his team must get hits if he is to win the game. There are also times when a batter must lose his opportunity to get a hit, and sacrifice in order that a man on base might advance.

The game of life is similar in many respects to the game of baseball. There are many analogies which could be made. We all hit foul balls occasionally and we also get clean solid hits. There are times when the sacrifice play will work to greater advantage for the team as a whole. On these occasions, we can perform acts of kindness which will not particularly increase our own batting average, but which will certainly add to the comfort and happiness of others. Many years ago, the Master Teacher expressed this idea when he said, "For whosoever will save his life shall lose it; but whosoever shall lose his life for my sake and the gospel's, the same shall save it."

In the game of baseball and in life, it is important that each man fill his position to the best of his ability. This is the only way that we can have a winning team. We are active players on a great team—the AMERICAN team. We are also in the World Series. Our nation has a tremendous role to play in world affairs. Therefore, it is exceedingly important that each person on our team fill his position in the best possible manner. In this way we can have a winning team and preserve those principles for which we are living and dying.

Joan Madsen, JO3, the managing editor of the NNMC NEWS, is on TAD orders to the Armed Forces Information School at Fort Slocum, New York, until approximately 1 June.

Rev. Brinks, Trumbo Join NNMC Staff

Occupying the space allotted to them in Ward 102, Chaplains N. V. Brinks, LT, USNR, and W. D. Trumbo, LTJG, USN, are carrying out their duties in the traditionally fine manner familiar to all in service.

Born in the little town of West Union, Iowa, in the year 1916, Chaplain Brinks graduated from the local public schools and a neighboring high school. After earning his B.A. degree from the University of Upper Iowa, and his B.T.H. degree from Debut University, Chaplain Brinks joined the Navy in 1945, taking his first duties in the Brooklyn Naval Hospital.

An eye-witness to the atom bomb tests at Bikini, he viewed the tests at distances of twenty miles and twelve miles. Chaplain Brinks reported to NNMC after completing a tour of 18 months on Guam.

The town of Fulk's Run, Va., in the year 1927, welcomed a new personality destined to be a member of the Chaplain's Corps, USN. Chaplain Trumbo, having graduated from basic educational courses, advanced to Shenandoah Jr. College in Dayton, Va. and later to Lebanon Valley College in Annville, Pa., where he received his B.A. degree. Upon receiving his B.D. degree from the Bonebrake Theological Seminary in Dayton, Ohio, Chaplain Trumbo joined the Navy in Oct 1951.

Serving in a temporary duty status in the Third Naval District's Chaplain's Office, Chaplain Trumbo was scheduled for Chaplain's School at Newport, R. I.

Both of Protestant faith, Chaplains N. V. Brinks and W. D. Trumbo are combining their talents to offer the best in religious guidance at NNMC.

Do Your Banking With Uncle Sam

March and April herald the beginning of Spring and in this page from his book, if we haven't already, and start planting a few dollars each week in bonds.

You harvest a crop—a return—in many different ways. Each dollar fight inflation and thus holds down the cost of living. With your money is insured and replaced if stolen, lost, or destroyed.

Bonds are an interest bearing security that can provide quick relief to meet an unforeseen difficulty. Therefore, these purchases do not reduce your take-home pay as some savings plans do. Quite a job for a dollar bill but one invested in bonds does all of this. Therefore, by saving up for a systematic purchase of bonds, you are helping your country, and your family.

A little money saved systematically soon accumulates into a sum. Let's imagine that you can save only \$3.75 a week. In five years you have \$1,004.51 in cashable securities. In ten years—\$2,194.28 at maturity—\$2,600.00. If you wish to retain these bonds for 20 years a return of 177 per cent of the original investment is yours. A \$1000 bond would be worth \$133.33 in 20 years.

Look over your present method of saving. Compare it with the above. Is it doing a comparable job for you? Naturally not. Why not see your Finance Officer if Service personnel, or your civilian representative, if a civilian worker, and make arrangements for a systematic withdrawal for the purchase of bonds?

Personality, Regard for Co-workers, Nets Shepherd Respect of Subordinates

Displaying every qualification of a true Hospital Corps representative, Samuel Eugene Shepherd, HMC, seems to enjoy life as he finds it to its full measure. Born in Webville, Kentucky, on 12 Nov 1920, Shepherd attended public schools and graduated from a local high school.

Donning the familiar attire of all Naval Recruits after the Navy had taken him under its wing, Shepherd soon learned what such an outfit demanded from her pint-sized admirals. Having suffered the ordeals at Great Lakes Training Center, he later transferred to the Naval Hospital at the Lakes and onward to O.R. Technicians' School.

Acknowledging the call to the Fleet Marine Force during the period of World War II, Shepherd paraded in the habiliment selected for him and joined forces with a few thousand other corpsmen destined for such a fate. Having qualified in the subjects afforded him in the Medical Field Technicians' School at Camp Lejeune, N.C., Shepherd went into battle with the Third Marine Division and saw Guam and Iwo Jima.

Returning to the States, he was sent to the Naval Training Center at Great Lakes where he instructed recruits in the subjects of Minor Surgery and First Aid.

Later, while on board Admiral Connelly's station ship, the USS Hamul (AD 20), Shepherd sailed from Plymouth, England to a spot on the globe 300 miles beyond the Arctic Circle on a mission of submarine rescue. Upon reaching his destination, Chief Shepherd was granted TAD orders to board the USS Samuel B. Roberts, a destroyer, and aided in the rescue work then being carried out on the submarine USS Cochino.

Returning to the USS Hamul, Shepherd traveled to the Korean area of operation.

Returning stateside, Shepherd reported to this station in May 1951 and has been carrying out the duties assigned to him by the Hospital Command. Taking advantage of every spare moment afforded

him, Shepherd made his rating the following June as a result of the previous fleet-wide competitive examinations.

Samuel E. Shepherd

Proving that there is still meaning in the word "shipmate," Shepherd is an active member of the Fleet Reserve Association in the D.C. area.

Having a sincere appreciation for the great outdoors, Shepherd is an active member of several rod and gun clubs throughout America. He has spent many hours teaching the art of fresh water fish fly tying and lure making.

Selecting hunting and fishing as his general hobbies, Chief Shepherd also enjoys carpentry and gun collecting.

He finds duties at this station much to his liking. Having worked in the receipt section of the personnel office, Shepherd is at present keeping tabs on the laundry situation in the linen room located in the basement of the main building.

Congratulations in Order!

Below are excerpts from a letter from the Honorable Herbert B. Askins, the Assistant Secretary of the Navy, to all civilian and military personnel of the Navy:

"The blood collection reports for the Navy Department in 1951 clearly show that our military and civilian personnel have generously responded to the vital demand for blood. We should all be proud of the part they have played in this nation-wide campaign.

"The need for blood is a continuing one. In order for the Navy Department to maintain its excellent donor participation record and to meet the increased need, it has been necessary to raise the minimum quota of donors from 1 per cent to 2 per cent per month of the total personnel in each activity. The opening of new blood collection centers in the past months has made it possible to obtain the necessary collections under these new quotas.

"Only persons doing the actual work in the donor program can have any conception of the additional work involved in meeting the increased quotas. However, I am confident from the record of 12,455 pints of blood donated in 1951 that the job can be and is being expertly done."

28 APRIL 1952

Mrs. Clarke's Devotion to Servicemen Results in 34th Pint of Blood, Gifts

Mrs. Charles Clarke gives some cigarettes to a patient on Ward 5-C, Chief Andrew Kruk, HMC.

Mrs. Charles H. Clarke of Thurmont, Md., called "Mother Clarke" by the patients of two service hospitals in this area, donated her 34th pint of blood here at NNMCM on 15 Apr and followed this by visiting patients in the hospital wards, distributing thousands of gifts including candy, gum, flowers, radios, and stationery that she had collected herself. Mrs. Clarke, the mother of 24 children, gave the pint of blood in response to a plea from one of her sons, a Navy man aboard the USS *Wa*. Her previous 33 pints were given at mobile blood units, Fort Howard Hospital, and Walter Reed Hospital.

The gifts are the result of her requests to persons and organizations all over the United States.

Mrs. Clarke first began her blood donations and her work for the wounded servicemen in the period of WWII. By the end of the war, she had donated 11 pints and distributed hundreds of gifts to hospitals.

Since then, she has donated an additional 23 pints plus distributing thousands of gifts to hospitals in this area.

With her devotion to servicemen, her fame spread. She was brought to Hollywood once to appear on the *Queen for a Day* show. On another radio program, Mrs. Clarke was declared the *Mother of the Year*. On one of her trips to New York, making a request for gifts, she was invited to speak on a TV show to lead in the blood drive. Francis

Cardinal Spellman heard her plea and asked to meet her.

"You're one woman who should never be forgotten," he told her and gave Mrs. Clarke his blessing and a medal. When she knelt to kiss his ring, the Cardinal said:

"Mother please stand up, I should kneel to you."

Mrs. Clarke lives, with her invalid husband, on a six-acre farm in Thurmont, Md. Of her 24 children, 12 are alive, ranging from 11 to 35 years in age.

One of her sons, Vincent, an Engine Tender First Class in the Navy, while serving in Korean waters last year, became ill with a liver infection and was transferred home.

Mrs. Clarke wanted to greet her son upon his return to the States but, due to lack of funds, was unable. A veterans organization, hearing of this and familiar with the work she was doing in hospitals, donated the funds necessary for her to meet her son when he arrived in San Diego.

Mother Clarke says, "My happiness is seeing others happy."

I and E: Insurance Holders Confused by Terms

There is a good deal of confusion in the minds of many service personnel who are the owners of permanent plan National Service Life Insurance policies in regard to the meaning of the term "waiver of premium." At this point, even though a serviceman has filed for a waiver of premium on a permanent plan policy, the actual premiums paid either by allotment or direct payment to the Veterans' Administration are identical to those he has always paid, and will continue in this manner until further notice by the Veterans' Administration.

Some time in the future, the VA will determine what portion of these premiums is to be considered the "pure risk portion." When that decision has been reached, holders of such policies will receive a refund for this "pure risk portion."

It is essential that all permanent plan policy holders understand that there is no real possibility of complete waiver of premiums. Mere stopping of allotment of direct payment means that the insurance policy lapses, and is thereafter extremely difficult to reinstate. The only other option for personnel holding these permanent plan policies is "cash surrender."

SOS on High Seas, Navy Doctor Answers

(AFPS) A young, soft-spoken Navy doctor recently performed two emergency operations and emergency first aid treatment in the North Atlantic gale that probably saved the life of a soldier, a civilian, and the captain of a storm-battered ship.

LTJG Saleem Antoon, 27, of New Kensington, Pa., was the unassuming hero while aboard the *MSTS Gen. Maurice Rose*.

The ship was returning from Bremerhaven, Germany, with soldiers and their dependents, when it ran into foul weather of gale velocity. During the storm LT Antoon performed his first operation—an emergency appendectomy—on utility engineman Casper Eck.

He had just finished this operation when Pfc. John Gittlemacker of Philadelphia, Pa., also needed an immediate operation after an appendicitis attack. During both operations the ship was held into the wind to keep her from rolling too much.

The same night an SOS was received from the freighter *Rachel Jackson*. The Coast Guard cutter *Mendota* and the *Rose* responded and stood by. Forty-eight hours later the distressed vessel radioed that the master of the vessel, CAPT William R. Thomas, needed immediate medical attention by a qualified doctor.

LT. Antoon and William H. Brown, HMC, of Allenwood, N.J., volunteered to make the perilous journey to the freighter.

"The waves were 15 to 20 feet high," LT Antoon said, "and in the open motor lifeboat I was sure we'd be swamped several times."

The first thing the captain said when LT Antoon entered his cabin was, "I'm sorry to cause all this trouble." He was suffering from a compound fracture of the right ankle, a severe laceration on the right forearm, possible rib fractures and other cuts.

The injury occurred when a mountainous wave crashed over the freighter and swept the captain across the wheelhouse, through the port door, and on to the lower port wing of the ship.

High Pressure Campaign Wins Award As New Honorary Mayor of Conn. Ave.

Rewarded with a kiss denoting his nomination as Mayor of Connecticut Avenue, a serviceman from NNMCM assumed the arduous duties of his new station. William N. Conran, HM2, the second serviceman from this command to cop the honor, was elected by ballots cast by spectators of the annual Easter Parade sponsored by the Connecticut Avenue Businessmen's Association.

William N. Conran, HM3

Bill, in competition with representatives from the Marines, Army, and Air Force, was also awarded a plane ticket to and from his home plus a check for \$100.

Each of the candidates was escorted by a model from the Shy, Inc. model agency. As his campaign aid, Bill had the curvaceous Mary Conover. This top flight model, wearing a hat topped with the Cancer Fund symbol, the hand and sword, and measuring two feet in height, was as Bill said, "Quite an aid in persuading the potential voters."

Conran introduced his campaign with TV appearances. Art Lamb's program, Jim Gibbon's TV show, and the Tony Wakeman program were a few used to introduce the Navy candidate to the Washingtonians.

When asked about his experiences, Bill remarked, "It was one of the biggest surprises of my life when I won. I had an enjoyable time and had the chance to meet some wonderful people."

His Honor the Mayor, a native of New Orleans, may be seen at any time without an appointment at the staff clinic where his station office is located.

Package Limitations On Air Parcel Post

Washington (AFPS)—Limitations have been placed on the size and weight of air parcel post mailed to military and civilian personnel served through military post offices overseas and on naval vessels, the Department of Defense has announced.

These limitations apply only to air parcel post and do not affect parcel post packages sent by surface transport.

Under the new regulations packages must not exceed 30 inches in length and girth combined and two pounds in weight.

Affected under the new rulings is non-official air parcel post addressed to Army and Air Force post offices in care of postmasters at New York, San Francisco, Seattle, and New Orleans.

The limitations also apply to non-official air parcel post addressed to Navy and Marine Corps units, in care of the Fleet Post Offices at New York and San Francisco and to Navy numbers in care of the Postmaster, Seattle, Wash.

Restrictions were made because of the lack of air transport space which must be carefully apportioned to assure prompt delivery of high-priority supplies.

'High Quality Work' Awarded Citation

Mr. Jack T. Sanders, a Fiscal Accounting Clerk in the Finance Department of NNMCM, was recently awarded a Letter of Commendation and a Superior Step Increase by RADM W. J. C. Agnew for his "high standard of work," for his "performance of additional duties," and his "high quality of work" in the Finance Department.

Originally a corpsman at the old and at the present hospital, Mr. Sanders was hired, after his discharge, for his present duties in the Finance Section of NNMCM.

Sorority Gives TV Set to Ward Patients

The patients on Ward 107 are the lucky recipients of a RCA TV set presented to the hospital by the alumnae of Region One of the Alpha Sigma Alpha, a national sorority.

This sorority has presented two other sets, one on 3-C and the other on 5-C, to this hospital and, last year, presented a number of radios to the isolation wards.

Mr. Ferguson Cary, instrumental in acquiring the set, made the presentation. Mrs. Cary, standing to the right of the set, is the regional director of the sorority.

Employees Presented Awards, Increases

On 21 Apr, seven civilian personnel of NNMCM were presented awards by RADM W. J. C. Agnew. The personnel were: (l. to r.) Mr. Robert L. Williams and Mr. Joseph M. Almond, Chief Quartermen, who received Step Increases for "outstanding" Performance Ratings; Mrs. Grace H. Hogue, Receptionist, Mr. Robert N. Corbin, Master Mechanic, and Mr. George R. Hantzmon, Head Machinist, who were awarded Meritorious Civilian Service Awards; and Mr. Stephen K. Brooks, Mess Attendant, and Mrs. Maggie Gaither, Chief Mess Attendant, who received cash awards for beneficial suggestions, \$30 for Mr. Brooks and \$50 for Mrs. Gaither.

Prize Winners Line Up for Inspection

These are the 15 entries from NNM patients and staff that were awarded eight first prizes and seven seconds in the third annual Armed Forces Occupational Therapy Competition held at the Philmont Country Club, Philmont, Pa.

Your Navy Belles

by George

JUST AROUND OUR HOUSE: Lots going on around here but when you look for it, no can find! The new Rec Room received a face lifting. Now you can recline and watch TV. Now all we need is a ladder to change the channels.

New spring details have come out. The experts in the various departments are: Pegg— for the latest in ice cream, Maggie or Al— for the way to carry trays in one hand, Mabel— for ringing up cash registers, any of the girls— for baby sitting, and one Wave especially for marching and singing.

Then we have the candy technicians: Candy—Ann; Jelly—beans—Jean Lux; Choc—Beth, any kind at 0630.

Catch—Boots and Delores; Golf—Posie and Mary; Books of learning—Roz and Millicent; Bikes—Cathy, Ruth and Tillie; Tennis—Josh and Nonnie; Butterflies—Jean Lux.

Welcome to Clarice Hailey, and Anne Schuricht, for Dental, and June Sakmar and Ruth Warlum for Hospital.

SPORTS: The girls of the softball team are on the field twice a week and should have a hotshot team this year.

DOD Re-establishes Retirement Policy

Washington (AFPS)—Enlisted personnel of all Services who have more than 20 and less than 30 years' service now fall under a uniform retirement policy.

A Defense Department directive establishes a policy which makes those who apply for inactive duty after 20 years of service subject to recall. Here's the way it works:

Upon application, enlisted personnel of the Navy, Army, Air Force, and Marine Corps with over 20 years' and less than 30 years' service will be transferred to the Reserve, or in the Navy and Marine Corps, the Fleet Reserve.

Depending on the needs of the service, personnel in this category may be recalled for a period of 24 months. The policy also provides for those who wish to volunteer for active duty. They may do so for any period of time depending upon the needs of the particular Service.

The policy outlined in the directive always has been in effect in the Navy and Marine Corps, which has consistently maintained a Fleet Reserve. However, authority for the policy always rested with the secretaries of the Services. Now all vagueness has been removed by the directive.

Editors Take Five

Have you heard about the fellow who was caught in a fire which burned most of the skin from his leg? The doctors went to work on him, removing tissue from his head to graft to his leg. Now whenever the poor guy meets a girl on the street, he has to tip his knee-cap.

The problems of real estate are becoming more acute as time passes. Two fellows were talking about the small houses which they occupied in town, and how crowded conditions were.

"That apartment I've got," one remarked, "is so small that my dog wags his tail up and down instead of sideways."

Overheard in one of the local movie houses: He had been sitting alone for about a half hour, when a girl strolled down the aisle and paused at his seat. There were empty seats on either side of him which caused some concern on the girl's part.

"Pardon me," she called in her delicate tone, "but does it matter to you on which side I sit?"

"Heck, no," he replied, "I'm ambidexterous."

When girls went swimming long ago

They dressed like Mother Hubbard.

But nowadays you may have seen
They dress more like her cupboard!

First Cook Retires After 18 yrs. Duty

Mr. Edwin Thomas Cross, upon completion of 18 years as cook in Civil Service, will retire on 1 May.

Born in San Francisco, during the year 1902, Mr. Cross satisfied his urge to travel at an early age. Serving as cook for various restaurants and hotels, Mr. Cross also worked on boats traveling the Great Lakes as well as having had duty aboard the ocean liners of the Matson Line.

On duty as first cook at this station for ten years, Mr. Cross made his initial entry into Civil Service in 1939.

An active member of the Elk's Club, Mr. Cross expects to settle in the Washington, D. C. area.

'What the Military Expects in Disaster' Theme of Medical Deans' Orientation

The Council on Medical Education and Hospitalization, American Medical Association, some time ago advised the Armed Services to set up a program for the purpose of orienting deans of medical schools to what the military expects in time of national disaster.

Deidesheimer Rates Bowling Top Sport

Nervously thumping the space bar of the typewriter before him, and sitting with a transfixed stare as his mind wandered back over the years, J. L. Deidesheimer, HN, brought to mind his tender years in the town of his birth and early life: Cincinnati, Ohio.

Introduced to the hectic way of life in the year 1931, and surrounded by five brothers and four sisters, Deidesheimer could look forward to a full and happy life as a member of such a family.

Attending parochial grade schools, he met the requirements to advance to Xavier High where he learned to appreciate the finer things in life.

Baseball and football rate high on his sports manual. Bowling, as evident by his constant 160 average and league playing for a two-year period, holds priority on his sporting program.

Upon being graduated from high school, Deidesheimer entered the field of the elite: that of magazine copy work and paste-up advisory operation for a trade publication, "Building Witness," a magazine catering to the construction line.

The United States Navy was increased by one man when, on 10 Jan in the year 1951, Deidesheimer saluted the colors, and raising his right upper extremity, took the oath.

One of the few thousand new recruits in the Naval Training Center of San Diego, Calif., Deidesheimer soon learned the whys and wherefores of the service which qualified him for the arduous duties of Hospital Corpsman.

The basic sciences to which he was introduced at the Hospital Corps School in Bainbridge, Md., offered an incentive to further his stride with those of other corpsmen.

On duty at this station for the past seven months, Deidesheimer works as a bookkeeper in the Special Services Department.

Jotting down this ditty
I find that it's a pity
That I ain't so fulla info as I thought.

My slang is quite atrocious
My 'jectives more ferocious
And in the middle of a sentence I get caught.

Taking all precautions
I lift from books the portions
That're good enough to satisfy my need.

I'm sure that all the guys who scribble

Although they'll never quibble
Will swear I'm hopped on

Happy Weed.

— J. F. MELVIN, NNM.

It has been fully realized that additional subjects cannot be added to the already over-crowded undergraduate curriculum. Therefore, the Medical Services of the Armed Forces are being called on to make such proposals and recommendations as may be compatible with the already organized curriculum in the medical school.

There are certain aspects of medicine and surgery that will be encountered in case of national emergency that are peculiar to themselves. Much has already been learned during WWII and the Korean hostilities. These problems encountered by the military have not been experienced in civil life.

Therefore, the American Medical Association is taking steps to obtain information from the Armed Forces as to incorporate findings pertinent to national emergencies.

The AMA and the Association of American Medical Colleges have requested the Medical Services of the Department of Defense, Civil Defense, and the U.S. Public Health Service to present an orientation program for a subcommittee.

The program has been set up and will be presented during the week of 28 Apr to 3 May 1952. This will be attended by the representatives of four pilot schools.

The first day will be spent at the Walter Reed Army Medical Center; the next day and evening, at the National Naval Medical Center; the third day at the National Institute of Health; the fourth day in local field trips; and the fifth with the U.S. Air Force.

RADM AGNEW

(Continued from page one)

(J.G.) in 1916. He was transferred in that rank to USN in 1917.

Before assuming the command of NNM, RADM Agnew was the District Medical Officer of the Ninth District, Great Lakes, Ill. In September 1951, he was ordered to report here as the commanding officer and on 3 Oct of the same year he assumed command relieving RADM Clifford A. Swannum (MC), USN.

RADM Agnew wears the Legion of Merit, the Victory Medal, the Destroyer Clasp, the American Defense Service Medal, the American Campaign Medal, and the World War II Victory Medal.

RADM Agnew is a fellow of the American College of Surgeons and a member of the Alpha Kappa Kappa and the Theta Nu Epsilon fraternities.

Following detachment from this command, RADM and Mrs. Agnew plan to proceed to the west coast and make their home in Coronado, California.

New Course Catalogs Ready for Personnel

Two new catalogs, listing courses offered by the U.S. Naval Correspondence Course Center, are now available to all naval personnel. They are: "Catalog of Enlisted Correspondence Courses, NavPers 91200" and "Catalog of Officer Correspondence Courses, NavPers 10800." In addition to the title, there is a brief description of the content of each course and, for enlisted men, the rating for which course is applicable.

Personnel desiring personal copies may obtain them from the U.S. Naval Correspondence Course Center, Building "RE," Brooklyn Navy Yard, Brooklyn, N. Y.

28 APRIL 1952

'... And Over on Your Left, Gentlemen, We Present ...'

MAT-4 class looks over some incoming vegetables

"This is the way we prepare our foods" is the subject of this lesson in food preparation.

All enlisted students enrolled in the Medical Administrative Technic at NSHA are presently attending In-Plant training classes at the Food Service Division of the Naval Hospital. This training, adjunct to their classroom lectures in Food Service Procedures, is given to acquaint the students with

galley operations in this section of a naval hospital. During the training classes, the students will visit all parts of the galley from the incoming stores to the final food serving on the wards and in the galley plus an examination of the administrative procedures peculiar to a galley.

Coach's Corner

Opening day of the NNMC Intramural Softball League saw diamond 1 and the adjoining bleachers filled to overflowing with rooters and players from Research and Center Command. Tommy Brothers handed them between the knees and shoulders while Ace Ash was the man blue on the base paths. On the sidelines Falstaff Reynolds and Lincoln Fisher, the former—the well known beer puller from the Chief's club, and the latter—deskman for J. Duane's hotel, were handling a few slants. L. C. Kelly, barkeep from the club, handled right field research while Porter of the refurbished mailroom held down the home spot for Center.

In the few innings I saw, Chief Terry on the mound for Research showed plenty of promise with a little more work under his belt. Chief O'Keefe in the first inning thought he was once more back on the pileways where he was one of the topnotchers, by taking three healthy hits at Terry's inside ball and posting a strike in the first frame. Lebert made a beautiful catch running back into the sun from the end base spot and, not losing a step, caught what should have been a single. Strictly mid-season on that one. Shutters Clinton of Stringer's sodium thiosulphate department should come up with plenty of good action shots.

On diamond No. 2, there was plenty of 782 gear floating around with Ferguson, a sweet chucker, smoking them in off the hill for the Pharmacy squad as they faced Barracks 12. Ackerman, sharp fielding third baseman for the main quarters team, came in fast on an attempted bunt, right and threw to second for a double play all in one motion, quick taking and well-executed. Three bats were broken in the first inning.

Chief Meitl handled the plate while Tebodieau covered the bags in old fashion. The mortar and pestle crowd had plenty of rooters sitting in the bleachers.

In an extra inning game the other night, the Hospital Doctors had to go all out to post a win in their first encounter. The golfing clothes and anesthetist sports on the fairways is enough to make his partners in their Nassau on the greens but his baseball ensemble the other broke up the game with a two run scoring triple to right field. Porting in the neighborhood of the second sack for the Officers was PT Carl McMillan. Really is something to beat; CAPT Bart Hogan, lal skipper of the Hospital, mentors to divoteers, and CAPT Carl Millan, executive officer of the same command, mentors the ball club.

Jim Atkinson came up with a letter from Vic Obos who along with well Sperry did such a fine job in running the golf desk. Vic was ended last month while on night patrol; two hours to traverse 200 is. Vic is at present on the USS Consolation. Drop him a line, boys.

Along about this time of the year, we devote a few lines to golf notions, rules, and the like. Speaking of golf, RADM W. J. C. Lewis has given the green light for the construction of a second putting green across the creek from the site of the postage stamp green now in use.

Connected to the main bank by a rustic log bridge, this will enhance beauty of the present hillside. Patient play is running from 30 to 5 per day during the week. An additional putting surface will allow players who are unable to hike up and around the hilly layout a chance to get out in the sun and enjoy themselves.

Addressing the ball: A player has addressed the ball when he has taken his stance by placing his feet on the ground in position for and preparatory to making a stroke and has also grounded his club, except in a hazard a player has addressed the ball when he has taken his preparatory to making a stroke. Remember that when you are teeing from a sand trap. Do not sole or allow your club to touch the ground except in the downswing as you are hitting through.

Ball in Play: A ball is in play as soon as the player has made a stroke on the teeing ground. It remains in play as his ball until holed except when it is out of bounds, lost or lifted in accordance with rules or local rules.

Ball Lost: A ball is lost if it be not found within five minutes after player's side, or his or their caddies have begun to search for it. Subsequently found it is not in play.

Ground under Repair: Ground under repair is any portion of the course so marked by order of the committee concerned or so designated by its authorized representative. It includes material piled for removal of a hole made by a greenkeeper, even if not so marked. Stakes and defining ground under repair are not in such ground.

Loose Impediments: The term loose impediments denotes natural objects not fixed or growing or adhering to the ball, and includes stones, twigs, leaves, twigs, branches and the like, insects and other objects or heaps made by them. But that doesn't mean that you can pick up branches from the trees on four and five. Socks Bachar of the 1st has this to say: "A putting green is like a woman's face; it should be smooth and beautiful. You can keep it that way by treating it gently. Don't take your bag onto the green; leave it near the next hole and carry your putter. Don't push your cart up on the shoulder. Don't dent the green with the flag pole and don't get mad at a missed putt and whack out a piece of green." I think he has something there, doesn't you?

With Tournament fever in the air, heed should be given to the following:

Rule 10: Information as to strokes taken. A player who has incurred a penalty shall state the fact to his opponent or marker as soon as possible. The number of strokes a player has taken shall include any strokes incurred. In match play, a player is entitled at any time during the play of a hole to ascertain from his opponent the number of strokes the latter has taken. If the opponent gives wrong information as to the number of strokes he has taken and corrects his mistake before the player has played his next stroke, he shall incur no penalty; if he does so, HE SHALL LOSE THE HOLE.

Rule 11: Disputes and doubts as to rights. In match play, if a dispute or doubt arise between the players on any point, in order that a decision may be considered, it MUST be made before the players play from the next teeing ground, or, in the case of the last hole of a round, before they leave the putting green. Any later claim based on newly discovered facts cannot be considered unless the player making the claim had given wrong information by an opponent.

If a referee has been appointed by the Committee, his decision shall be final. If any point in dispute be not covered by the Rules of Golf or Local Rules, the decision shall be made in accordance with equity.

Softball League Pairs Ten Teams

"Play ball" is again heard around NNMC since the 15 Apr when the NNMC and the Research team plus Bldg. 12 and Med. School paired off to begin the 1952 Intramural Softball League.

This year, with 10 teams entered in the league, four teams trophies will be awarded to the first four teams and oscar will go to the players of the first and second team.

The regulations for the teams, in general, follow those of other years. There will be no transfers from one team to another. National softball rules will apply and umpires, furnished by the Special Services Department, will not be the members of any of the league teams.

Both of the fields will be used—the one nearest to the tennis courts will be designated number one and the further field number two.

The teams entered this year are: NH Doctors; NNMC; Med. Sch.; Dental Sch.; NSHA; Bldg. 12; X-ray; Research; Lab 18; and Cardiology.

'Batter Up' as Softball Gets Underway

John Grant, of NNMC, takes a cut at the ball as Tom Brothers calls them in one of the openers in the 1952 Intramural Softball League.

With the intended opener between the NH Doctors and NSHA rescheduled two days later because of rain, the NNMC-Research and the Bldg. 12-Med. School games cut the ribbon for the 1952 Intramural Softball Season on 17 Apr.

Golf Course Play Heavy During Week

The NNMC golf course is receiving some of the heaviest play since its beginning with an average of 60-65 people using it on the weekdays and numbers in the second hundred walking the course on the weekends.

This year a new rule has been added in regards to the first tee. Any ball falling to the right of the white markers on the first tee is automatically out of bounds, the golfer loses two strokes, and the ball is re-played. Also the rule "teeing off from the top of the hill during ball games" is in effect again with the softball season underway.

In stroke play only, when a competitor is doubtful of his rights or procedure, he may play out the hole with the ball in play and, at the same time, complete the play of the hole with a second ball under what he believes to be his rights under the Rules.

Before playing a stroke the competitor must announce to his marker his intention to proceed under this Rule. On completing the round, the competitor must report the facts immediately to the committee. If it be found that the Rules allow the procedure adopted with the second ball, the score with the second ball shall be the score for the hole. If the Rules do not allow play as the second ball was played, then the score with the original ball is the score for the hole.

The sole purpose of this rule is to enable a player to avoid disqualification when doubtful of his rights or procedure; a competitor is not permitted to play in two ways and then choose his score. The privilege of playing a second ball does not exist in match play.

Trophy Case Lures Mashie Technicians

Again this year, the NNMC nine holes will be the scene of three outstanding tournaments with the niblick and mashie technicians vying for the top NNMC golf awards; (l. to r.) the CAPT M. J. Crawford, the RADM M. D. Willcutts, and the RADM C. A. Swanson trophies.

During the coming season the nine holes of the NNMC golf course will again see the mashie, brassie, and iron specialists in their attempt to bag one or more of the three principal trophies given at NNMC.

CAPT M. J. Crawford was the original designer of the course and was interested in developing players, both scratch and handicap. The CAPT M. J. Crawford Trophy, first awarded in 1950, is given to the winner of a beginner's tournament to foster an interest in golf around NNMC.

RADM M. D. Willcutts, under whose command the course was completed, made possible a trophy for the best golfer at NNMC.

A trophy bearing the name of RADM C. A. Swanson, former Surgeon General and CO of NNMC, who sustained and promoted the growth of the athletic program, will go to the winner of the combined BuMed and NNMC Tournament.

Though the times have not been set for these plays, they will be spaced through the season to allow for practice and engender sufficient competition.

Help Wanted Sign Put Out by Waves

Help wanted... male... female... or what have you? According to the recent jabber-fests around the station, it was learned that the WAVE's softball team is getting underway but they need a coach. Any guy or gal wanna try for that top position? The job calls for someone who can take the ingredients and whip them into a worthwhile crew.

"Boots" Carlson, the little gal who sported a cast not too long ago, may be destined as this season's catcher.

Word has it that Miss Jarvi and several other nurses will be out there tossing curves with the little white sphere.

Game practice gets underway on Tuesday and Thursday of each week on fields one and two. All girls of military status are invited to fill the existing vacancies.

The guys who believe that a woman's place is in the home probably never witnessed a warm-up session of an all-gal team.

During a recent practice session the other P.M., guffaws drawn from the sideline males ceased and gave way to admiration. Gotta hand it to them. The girls know what they want, how to get it, and really understand the meaning of the word sportsmanship.

When that old cry "play ball" rings out, you can betcha life that there will be plenty of representatives from the women's side of the fence contributing their tonsils for sound effects.

Native of Marianas Gift to Maryland U.

CAPT Enyart presents a tortoise to the University of Maryland. On his left is Dave Cianelli and Bob Ward, the co-captains of the Terps' 1951-1952 football team.

On Saturday, 19 April, between the halves of the Navy-University of Maryland lacrosse game, this stuffed tortoise was presented to the University of Maryland, in tribute of their mascot, the terrapin, by the Commanding Officer of NMS, CAPT J. L. Enyart, MC, USN.

This tortoise has a shell diameter of about a foot-and-a-half and was originally presented to CAPT Enyart by a native of the Marianas Islands in 1935, during his tour of duty at the Naval Hospital in Guam.

In his speech, CAPT Enyart remarked:

"Throughout history, families, organizations, and nations have had some identifying symbol—the Navy has its goat, the Army its mule, Princeton its tiger and this great school, the University of Maryland, the terrapin.

"It is my pleasure to present this symbol to the University of Maryland Terrapins, trusting that it will

bring them continued good luck and many victories, except—when in competition with the midshipmen of the United States Naval Academy."

The adoption of the terrapin as a mascot of the University had its origin in 1922 when the student newspaper, then called the "Maryland State Review," was looking for a new name.

Dr. H. C. Byrd, then the athletic director and now the president of the University of Maryland, suggested the name "Diamondback," referring to the diamondback terrapins which were abundant around Maryland.

(Continued in adjoining col.)

Intramural Softball Schedule . . .

Schedule of games until the next issue is:

Date	Team	Field
28 Apr	NH Doctors vs. Dental School	2
29 Apr	NSHA vs. Lab 18	1
30 Apr	NNMC vs. X-ray	2
	Bldg. 12 vs. Cardiology	1
1 May	NH Doctors vs. Dental School	2
5 May	Medical School vs. Lab. 18	2
6 May	NSHA vs. Cardiology	2
7 May	NNMC vs. Bldg. 12	1
	NH Doctors vs. Lab 18	2
8 May	Dental School vs. X-ray	1

Operating Room Graduates 11 Technicians

Naval Hospital's Operating Room graduated its second class this year on April 8 with 11 students receiving diplomas. Front row: Robert E. Clippert, HM3; Gerald W. Harris, HN; and Hugh M. Faulkner, HN. Middle row: Martin D. Misenhimer, HM3; James R. Grimes, HN; and Thomas E. Buchanan, HM3. Top row: Brandon K. Reveau, HN; Harold R. Ward, HN; Ernest B. Reed, HN; Glenn R. Taylor, HN; and Fred C. Allen, HN.

Dental Explorer

by C. Connor

Chuck Farthing and "Mac" MacGeary must've been moved by the "spirit" when they listened to that "shipping over music." Yep, they both raised their right hands again. This time to the tune of six years. Good luck to both of you.

It's wonderful to learn that CAPT Kyes is well again. He had me fooled for awhile—I was sure that we had a "buccaneer" in our midst.

"Operation Smile" was the command when we all mustered to have our pics taken on a sunny Friday afternoon. The shoes were shining, the hats squared, and everyone looked sharp. Why Mrs. Mac even discarded her favorite gown for her dress blues. The thing that puzzles me is . . . who tied her tie for her? You may not know it, but that is a WPA project for her . . .

If any of the Waves are interested in the latest method for entering the barracks I suggest that they speak to Maggie about it. She has a sure-fire method. A little hard on the nylons, maybe, but it works even if it is inconvenient. (What about the gals on the second deck, Maggie . . . ?)

Marchand has acquired a new and different ash tray. How about it Marchand . . . are you going to bring it over for all of us in Bldg. 1 to see?

Since no one else has done anything spectacular (that is . . . stuff we can print) I'll say smooth sailing to all hands, 'til next time, from the GAL FROM THE HUB.

"My first pair of long pants."

Papa Possum: "Delphine, where are the kiddies?"

Mama Possum: "Goodness, I've had my pockets picked."

A leave is a short duration of recreation preceded by a long period of anticipation and followed by a suitable period of recuperation.

There are three classes of women: the intellectual, the beautiful and the majority.

Mama Gnu looked at Papa Gnu, then said shyly: "I've got gnus for you."

(Continued from col. two)

The Washington papers picked up the name to describe the University's teams, later shortened it to "Terrapins" and finally to the "Terps."

By the 1930's the terrapin was accepted as the mascot of the University and by 1935 the student year book, then called the "Rev-elry," changed its name to the "Terrapin," with other campus papers following suit shortly after.

Top Honors in N.P. Class Held by Three

The Neuropsychiatric Technicians class graduated on 10 Apr with three men tied for top honors with a final average of 94. Arvanetes, HN, W. K. Quick, HN, and R. W. Edwards, HN. Front row: CDR C. S. Mullins, officer in charge of N.P. School, Miss E. T. Dorman, instructor of N.P. nursing, and R. F. Kessler, HM2, instructor in N.P. technique.

Second row: W. R. Bessette, HM3; W. L. Lane, Jr., HN; C. W. Terhaar, HN; and E. C. Arvanetes, HN. Third row: C. R. Robinson, HN; D. E. Anderson, HN; J. C. Russell, HN; G. L. Petro, HN; W. R. Britland, HN; R. E. Spradling, HN; J. T. Phipps, HA; W. K. Quick, HN; K. E. Russell, HN; and R. W. Edwards, HN.

Mates Find Way To Salvage Pay

Five men attached to the Pharmacy at NNMC have instituted a method of saving money that is hoped will not become an overall Navy tradition.

Following the recent change in rates that went into effect 16 Apr, four new HM3s and a new HM2 in the pharmacy banded together and, pooling their resources, instead of buying five boxes of cigars, purchased one for the group.

It is feared by many that this might become widespread, cutting down on the free El Smokes that are available at least twice a year.

Do You Know That --

The operating room handles about 500 surgical procedures a month while in the same period an excess of 200 deliveries are performed here.

Roughly one mile of plaster bandage goes into the fashioning of casts every month.

The special diet office handles about 900 diets a day.

The hospital admits between 50-75 patients a day and will probably admit the 200,000th patient in about six months.

The X-ray Department uses approximately 5,800 sq. ft. of film per month in taking in excess of 100 x-rays a day.

The branch of the Bank of Bethesda located at NNMC handled 7,992 checks in the month of February valued at \$413,000.

There are roughly 275 Marine patients here at NNMC.

The X-ray School of NMS graduates about 70 technicians a year.

Haircut and Shaves Researchite Raves

by R. Conaway

A welcome aboard to J. W. Hamby, T. E. Buchanan, A. M. Griffith, and P. K. Eldred. We know they will be happy members of the Research Family.

T. J. Conto and W. L. Sweet returned to civilian life by virtue of their discharge from the regular Navy. Chief R. M. Renfro was transferred to the USS Turkey for duty.

The Research Softball Team won over the Center Team in a 13-5 victory in the first practice game of the season.

It looks like "cuddles" will lose her "Giant Romeo" unless she catches a certain local cabbie from time to time.

Why does "Hammy" Brooks give out with a sheepish grin when asked what she got for Easter?

People are wondering where Joe Rothbauer got that stiff neck. Seems like Nick should have one too.

Why does a certain First Class in Bacteriology get hot under the collar everytime someone mentions "a shave and a haircut?"

Who won first prize for the most charming bonnet on Ward 120? Made it with her own little hands too.

A familiar sight on the golf course is D. E. Teter and R. Van Belois taking up where they left off last season.

Bruntmeyer is having T-shirt trouble. Seems like he doesn't even know his own size.

Have been wondering why no local insurance company will take out a policy on my life. Must be they think I live dangerously. 'Til next issue then; if I should live that long!

RADM B. Groesbeck, Jr. Assumes Command Of NNMCC

Guy Lombardo leads his Royal Canadians on "Your Lucky Strike Hit Parade," while vocalist Kenny Gardner sings.

Hit Parade' Coast-to-Coast Broadcast Originates from the Auditorium, 29 May

For the first time in its colorful seventeen-year history, "Your Lucky Strike Hit Parade" is on a major tour, and one of the stops will be right here in the NNMCC Auditorium, Thursday night, 29 May, where the coast-to-coast broadcast will originate.

The doors in the auditorium will open at 2045, entertainment will begin at 2130, and the actual broadcast will take place at 2200.

Guy Lombardo, America's all-time favorite bandsman, leads his Royal Canadians in the presentation of the Top Seven Songs of the week, according to Your Lucky Strike Hit Parade Survey, and the on-the-air Lombardo style. The Survey checks the sellers in sheet music and graphophone records, the songs heard on the air, and the songs most played on the automatic machines, an accurate, automatic tabulation of America's taste in popular music.

As a special attraction, one of the nation's top girl vocalists takes singing spotlight as Your Lucky Strike Star of the Week in the musical hour of the top tunes of the land. There will be no admission charge the big night when the show goes to NNMCC and everyone is invited to attend the broadcast. Everyone will receive free Lucky Strike Cigarettes. You'll be first hand to learn the top tunes in the land, when Guy Lombardo and his band play the Top Seven Songs on the eight hundred and ninth broadcast of "Your Lucky Strike Hit Parade."

Featured with Guy and the Royal Canadians are the popular Lombardo brothers, Carmen, Lebert, Victor; with Kenny Gardner, Flannigan, Kenny Martin, and Grass, the Lombardo Trio and Twin Planos. Kenny Delmar is announcer on "Your Hit Parade."

Dance, Open House For NMS' 50th Year

The program for the golden anniversary of Naval Medical School has been completed and will begin the weekend of the 24th and 25th of May.

On this weekend, "open house" will be held between 1300-1700 with all the facilities of the Naval Medical School open to the public; two exhibits on Display ("Skin Diseases" and the "African Exhibit" of the Tropical Medicine School); an exhibit of the historical documents of NMS; and screenings of a film on the organization, functions, and services of NMS.

On Tuesday, 27 May, a Harold Wellington Smith Lectureship in Medicine will be presented in the auditorium at 2015. The welcome and opening remarks will be given by CAPT J. L. Enyart, the Commanding Officer of the Naval Medical School.

The Surgeon General, RADM Lamont H. Pugh (MC), USN, will discuss the "Fifty Years of Progress in the Naval Medical School." Commodore Richard A. Kern of Temple University will speak on the "Current Medical Problems in the Far East Theater." This will be followed by a special musical program.

A staff dance for the staff and students of NMS will be held on 26 May, Monday evening, to celebrate the anniversary.

Waves' 10th Anniversary Held in Washington, D.C.

The Waves will hold their tenth anniversary reunion 26-27 July at the Hotel Statler, Washington, D. C. The reunion will feature a banquet and speakers who will discuss the present and past mission of the organization.

Regulars, reservists, and former members are urged to attend. Information may be obtained by writing the Waves Reunion Committee, Anacostia Naval Air Station, Washington, D. C.

Conducted by the enlisted personnel of PRNC, a Gala Navy Relief Ball will take place at the Sail Loft of the Naval Gun Factory on Saturday, 24 May.

A professional floor show, refreshments, door prizes, hostesses, and dancing will highlight the evening.

Tickets, selling for \$1.00 per person, may be purchased at the Dance, or from our own Special Services Department.

Activities commence at 2100 and will continue until closing.

Transportation to the ball and return will be provided for personnel of this station.

Preparations are being made for the forthcoming enlisted crew's dance to be held on the evening of 23 May.

Scheduled for your entertainment will be a local band, and refreshments will be served. The program starts at 2030 and secures at 2330 in the NNMCC Gym.

CAPT Robert Brown Awarded Bronze Star

CAPT Robert B. Brown (MC), USN, the Chief of Surgery of the Naval Hospital, was recently presented the Bronze Star Medal by Admiral Agnew for outstanding services in connection with the military effort against the enemy in the Korean theater.

The citation reads in part, "For meritorious achievement in connection with operations against the enemy in Korea, CAPT Brown served with distinction as Chief of Professional Services and as Chief of Surgical Service in the Naval Hospital on board the USS Repose."

"He rendered outstanding services in the treatment and care of all patients which included more than 9,000 and directly supervised the surgery of all who were admitted to that section."

Eighth Commanding Officer of Flag Rank To Head the Medical Center, Bethesda

RADM Bertram Groesbeck Jr. (MC), USN, relieved RADM W. J. C. Agnew (MC), USN, and became the new Commanding Officer of the National Naval Medical Center 30 April 1952.

Coming from the position of Assistant Chief of the Bureau of Medicine and Surgery for Aviation and Operational Medicine, and Research and Medical Military Specialties, RADM Groesbeck, upon assuming command, directed that all existing orders promulgated by his predecessor would remain valid until officially changed.

LCDR F. S. Haslam (MSC), USN, Administrative Officer, NNMCC, since October of last year, will continue in his present assignment under RADM Groesbeck.

Born in Brooklyn, N.Y. on 19 June 1894, Admiral Groesbeck attended Brooklyn public schools, Brooklyn Polytechnic Institute, and received his medical degree from George Washington University of Medicine. He was commissioned LTJG in the U. S. Naval Reserve on 7 Apr 1917, and transferred five months and a day later to the regular Navy in the same rank, as Assistant Surgeon.

Subsequently advanced in grade to that of Medical Director with the rank of Captain to date from 1 July 1942, his nomination to the rank of Rear Admiral was confirmed by the Senate in Jan 1948, to date from 9 Nov 1942.

Following graduation from the Naval Medical School, Washington, D. C., where he had a brief course while a member of the U.S. Naval

Reserve, and his transfer to the regular Navy in 1917, he reported for duty at the Naval Hospital, Philadelphia.

Serving there until Aug 1917, in Oct of that year he reported to the Naval Medical School after a month's duty aboard the USS Xarifa. He was detached from the Naval Medical School in Apr 1919, and the following month joined the Marine Expeditionary Force at Santo Domingo, for duty until Nov 1921.

Returning to the States in Dec 1921, he was attached to the Naval Hospital, League Island, Philadelphia, until ordered in June of the next year to the Naval Air Station at Pensacola for instruction in aviation (heavier than air).

Duty at the Research Laboratory at Mitchel Field in Long Island, duty at Quantico, Va., and at the Naval Air Station at Coco Solo, C.Z., followed.

For eight months he was attached to the Receiving Ship, N.Y., while under instruction at the New York Postgraduate Hospital and

A Soliloquy on Mother

Who picked the time, (when timid winds
Bring back scented breezes from the south),
To let her know how much we really care,
To honor her, in whom we have no doubt?

Who picked the time, (when summer, yet a dream
Gives promise of the beauty still to come),
To offer homage and a heart of love
To she who understood since time begun?

Who picked the time, (when nature at her best
Demonstrates the glory that is May),
To scatter laurels humbly at her feet,
To sing her praises on this Mother's Day?

Who picked the time, (the lovely month of May),
To place her there forever on a shrine?
It must have been someone who was blest
With a loving Mother just like mine!

—R. CONAWAY, NMRI

The Chaplain's Corner

by Chaplain Newell V. Brink

Mother's Day

Mother's Day is always in danger of being banal. It can be surrounded with saccharine effusions of sentiment that sound beautiful and have little meaning. It can be a time when gifts are bought and given with the feeling that the conventional thing has been done.

One son who told his mother how much he loved her received her rather tart reply. Said she, "Your words would mean more if you would get up in the morning in time to pump and bring in the water and fetch the wood." In many cases our sentiments would mean more if we did a modernized version of the same thing.

Perhaps your mother is lonely. Her children have grown up and perhaps her husband is dead. Perhaps you do not write as often as you might or visit her as much as you should. Perhaps she needs help of a monetary nature. Perhaps you are single and can make her an allotment if she needs it. Practical consistent help can mean a great deal more than airy, verbal sentiments.

It was well said that God could not be everywhere so he made mothers. Usually when things are really bad, many a so-called friend and intimate slips quietly away, but a mother still has her deep faith and concern for her child. She will go to any lengths to help. You may be forty, but you are still hers and she feels the deepest concern of all for you.

On this Mother's Day examine your own relationship with your mother. If there is something you can do for her that will make her happy, some kindness, some help, your more frequent presence, by all means do it. Then you will genuinely approximate the spirit of Mother's Day.

News Shorts From The Editor's Desk

The following bill of interest to Service personnel recently was introduced in Congress:

1. A bill to provide that no person shall be barred from service in the Armed Forces or discharged solely because he has been classified as a "youthful offender" under the laws of New York.

Personnel qualified to compete in the forthcoming fleet-wide examinations for all rates will be interested to learn that the month of July will give them a chance to exercise their rights to take advantage of the opportunity.

5 July—Pay grade 4 to 5
12 July—Pay grade 5 to 6
28 July—Pay grade 3 to 4

In an endeavor to meet the increasing requirements of officers trained in hospital personnel and record procedures, an on-the-job training program has begun at selected naval hospitals. Ensign Lloyd A. Watts, MSC, USN, Assistant Personnel Officer of Naval Hospital, is first at NNMC to study under this program.

Between the dates 19 May and 24 May, over one hundred doctors and dentists will again take the Naval Medical School's Special Weapons and Radio-active Isotope Course which covers instructions in radiations, treatment of radiations, detectors, problems of radiation safety, isotopes in medical treatment, etc.

(AFPS)—The Veterans Administration has reported that the first of its 1952 NSLI dividend checks have already gone out to Service personnel. However it will not be until mid-summer before the checks begin coming out at full speed. Deadline for completion is sometime during July.

Captain Frank E. Frates Jr. (DC), USN, Naval Dental School, delivered the Graduation Address to the Dental Technicians' School at Bainbridge, Md.

Congregation Beth El of Montgomery County will hold services every Friday night at 8:15 p.m. in the Social Hall of the All Saints Episcopal Church, Chevy Chase Circle. All Service Personnel are invited to attend.

The services of Rabbi Harry Kaufman, representing the Jewish Welfare Board, are available to all Jewish Personnel and Patients at the National Naval Medical Center. Rabbi Kaufman may be reached by calling the Chaplain's Office, Ext. 324, or by call direct—Office: RA. 5371—Home: GE. 0755.

The 1952 observance of Armed Forces Day offers an opportunity for Mr. and Mrs. America to know the U.S. Defense Team. It demonstrates the close-working relationship of the Armed Forces, gives the nation a broad view of the Nation's defense strength, and emphasizes the democratic ideals to which our efforts are dedicated.

Third Annual Armed Forces Day

The third Armed Forces Day, with the theme "Unity, Strength, Freedom," symbolizing the unification of the three services into a single fighting force, will be celebrated 17 May. Colorful ceremonies marking the occasion will be held throughout the U.S. and at Service installations all over the world from Tripoli to Korea and from Alaska to Hawaii.

Here at NNMC, "open house" will be held in all of the buildings with movies in the main auditorium on all phases of naval medicine. Demonstrations and special exhibits will also be available to the public.

Secretary of Defense and the Secretary of the Navy recently issued statements stressing the spirit and purpose of Armed Forces Day.

Secretary Robert A. Lovett said: "To our men overseas, and particularly to those who have been engaged in combat in Korea, every day has been an Armed Forces Day in united effort in our common defense of freedom."

"Armed Forces Day this year should serve to emphasize the practical application of unification in action, and to remind us of the continued need for unity in our Armed Forces and among all our citizens in the interests of security and peace."

Navy Secretary Dan A. Kimball stated: "Armed Forces Day gives all Americans an opportunity to join in a merited tribute to the men and women whose first responsibility is the security of the nation."

"We of the Navy play host on that day and we invite our citizens to visit the ships and stations of the Navy and Marine Corps and to see for themselves what we are doing to promote unity, which is the ultimate strength of freedom."

Service installations over the country will celebrate the occasion by holding "open house" and exhibiting their equipment to residents of the communities in which they are located.

Diaper Derby

April 11—James Edward Strickler, 6 lbs. 11 oz., the second son of Mr. and Mrs. J. Strickler. James Strickler, HM1, is on duty at the NNMC.

April 22—Donald E. Brouillette, Jr., 6 lbs. 1 oz., son of Mr. and Mrs. D. E. Brouillette. Donald Brouillette, HM1, is on duty at the Dental School.

April 24—John Andrew Price, 7 lbs. 8½ oz., son of Mr. and Mrs. H. V. Price. Herbert Price, HM3, is on duty in the Hospital Record Office.

April 25—Cynthia Mae Hufstetler, daughter of Mr. and Mrs. P. Hufstetler. Perry Hufstetler, HM3, is on duty in the Linen Room, Naval Hospital.

May 3—Linda Lee Brown, 11 lbs., daughter of Lee G. Brown, HM3, USNR, Bag Room, Naval Hospital.

May 6—Mary Kay Batchelder, 11 lbs. 6 oz., daughter of Lt. Richard M. Batchelder (DC), USN, attached to Naval Dental School.

Dance Studio Presents TV Set to NH

"One, two, three, four. One, two, three, four." The Washington, D. C. Arthur Murray Dance Studio presents a 20-inch TV set to the patients. Presenting the set was Mrs. Ethel Fistere, the manager of the studio, shown teaching Jerry Frederick, AN, the latest in dance steps.

Naval Tradition in Colorful Display Sets Pace for Change of Command

Amid full array of flying colors, summer whites, marching men, Marines, drums and bugles, RADM Bertram Groesbeck Jr. (MC), USN, relieved RADM William J. C. Agnew (MC), USN, as Commanding Officer of the National Naval Medical Center at the change of command ceremonies at 1100, Wednesday, 30 April.

Conducted in the approaches to the main entrance of building No. 1 of NNMCM, the traditional naval ceremony was witnessed by many official guests including FADM E. J. King, RADM C. J. Brown, MAJGEN G. E. Armstrong, ranking officers of the Bureau of Medicine and Surgery, Commanding Officers of the various PRNC activities, and other flag officers and their guests.

Commanding officers of the five subordinate commands, nurses, Waves, and five companies of enlisted personnel from NNMCM plus a Marine Honor Guard and a Marine Drum and Bugle Corps from the Marine Barracks, Washington, D. C., participated in the ceremony.

RADM Agnew in his departing remarks emphasized his appreciation for "the cooperation and services given me as Commanding Officer" by all personnel of the station and extended his best wishes to Admiral Groesbeck in his new command.

Admiral Groesbeck read his orders and with the customary words ("Admiral Agnew, I relieve you of your command") formally took command of the National Naval Medical Center.

The new Commanding Officer's two-star flag was broken from the yardarm with the two ruffles, two flourishes, and the "Admiral's March" rendered by the Marine Drum and Bugle Corps.

In his address to the assembly, Admiral Groesbeck remarked on the achievements accomplished at NNMCM under Admiral Agnew and spoke of his appreciation to the Surgeon General for assigning him as Commanding Officer of "this institute of international renown, the National Naval Medical Center."

The "To the Colors" and the new Commanding Officer's inspection of personnel was followed by the time-honored command "Pass in Review."

With the rendition of martial music by the Drum and Bugle Corps, the companies passed in review before the main entrance past the reviewing stand.

Led by the Battalion Commander, CAPT F. E. Frates (DC), USN; the NNMCM Detachment with LT J. O. Atkinson (MSC), USN; NSHA with LT W. L. G. Cartier (MSC), USN; NMS with ENS T. G. McMahon (MSC), USN; the Waves with LT E. C. Wilson (W); the color guard and the honor guard of Marines; NDS with CDR R. C. Milliard (DC), USN; NMRI with LTJG C. Levich (MSC), USN; and NH with LT T. L. Hollis (MSC), USN; plus the Drum and Bugle Corps and at "Eyes Right," moving in precision, paraded past the reviewing group to honor the retiring and the new Commanding Officer of the National Naval Medical Center.

"Pass in Review!"

Admiral Groesbeck inspects the Waves formation.

The Marines and Waves pass in review.

"The National Anthem"

NMRI's Ex-Professor of Clinical Services Obtains Commission in Medical Corps

LT Louis R. Krasno accepts his commission in the Medical Corps of the regular Navy from CAPT W. E. Kellum, CO of NMRI.

LT Louis R. Krasno accepted his commission in the Medical Corps of the regular Navy, 8 April 1952. Before coming to NMRI as a reserve officer in March, 1951, Dr. Krasno was Assistant Professor in the Department of Clinical Sciences at the University of Illinois Medical School, and in private practice.

Dr. Krasno obtained his M.D. at Northwestern University where he was a letter man in track, and co-holder of the world record for the 40-yard sprint. He interned at the Western Memorial Hospital in Chicago, Illinois.

His interest in the field of cardiovascular research led to his invention of a new method for the administration of oxygen to cardiac patients, and with Dr. A. C. Ivy, the development of the flicker-fusion test for application in heart disease.

During World War II, Dr. Krasno was engaged in research in the field of Aviation Medicine for the Office of Scientific Research and Development. At this time, he and Dr. Ivy also developed an oxygen mask for aviators to fit almost every shape of face, thus solving a most trying problem, in preventing the escape of oxygen.

The invention of a simple method of inhaling penicillin to combat respiratory infection is another of his many accomplishments.

Dr. Krasno is a member of Sigma Xi; the American Association for Advancement of Science; Society of Experimental Medicine and Biology, and the American Medical Association. His name is also listed in "Men of Science."

On the less serious side, Dr. Krasno's interest centers around his excellent collection of records of authentic gypsy folk music.

Two NMRI Scientists Awarded Fellowships

Two civilian scientists employed at the Naval Medical Research Institute here, have been awarded Fellowships to continue their work in medical research, Captain Wilbur E. Kellum, Commanding Officer of the Institute, announced.

A Guggenheim Fellowship, considered one of the outstanding awards in scientific circles in the United States, has been awarded Doctor Terrell L. Hill. Dr. Hill is a Chemist and has been a Staff member of NMRI since 1949. He will work with Professor John G. Kirkwood, Sterling Professor of Chemistry and Head of the Chemistry Department of Yale University, for one year.

Dr. J. J. Blum, a Physiologist, has been awarded a Merck-NRC Postdoctoral Fellowship and will work with Professor Linus Pauling (Chemistry) at the California Institute of Technology for a year. Dr. Blum has been a Staff member of the Institute here since June, 1950.

The young scientist recently earned his doctorate from the University of Chicago on the basis of work carried out at the Institute under Dr. Manuel Morales.

Doctors Hill and Blum, upon completion of the work required by the Fellowships, will return to the Staff of the Naval Medical Research Institute.

Crew's Library:

New Picture Books In Crew's Library

If it is true that "one picture is worth a thousand words," how easily and pleasantly you can reach your week's reading quota by looking at three of the beautiful, new books added to Crew's Library recently:

There are over 1,200 pictures in Marshall Davidson's two volumes, called **LIFE IN AMERICA**, published in association with the Metropolitan Museum of Art. This set, over five years in the making, illustrates by pictorial material contemporary with the events, the history of our country, showing its expansion and development as well as the forces that formed our culture.

The second beautiful addition is **LIFE'S PICTURE HISTORY OF WESTERN MAN**. This book tells the story of our civilization beginning in the Middle Ages. Through the masterpieces of the greatest artists, the most famous sculptors, through tapestries, woodcuts, and illustrated manuscripts, we follow the story of science, exploration, invention, literature and religion. As the spotlight of history shifts from place to place and from age to age, we come to understand and to appreciate the value of our own inheritance in the United States.

The third volume of beauty is the **U. S. CAMERA ANNUAL OF 1952**. Its 200 pages assembles outstanding photographs from all over the world and represents a cross section of photography today. The book is divided into sections, such as color photography, American photography, International and News so as to include every phase and every important name in photography.

Medal for Bravery Given CAPT Coyl

CAPT Edwin B. Coyl, Executive Officer of NMS, is awarded the Bronze Star by RADM W. J. C. Agnew.

CAPT Edwin B. Coyl (MC) USN, Executive Officer of NMS, recently was awarded the Bronze Star Medal for meritorious achievement in connection with operations against the enemy in Korea.

As Officer in Command of the U.S. Naval Hospital on board the USS Repose, CAPT Coyl displayed exceptionally meritorious conduct in the performance of outstanding services. He exhibited outstanding executive and administrative ability, and a thorough knowledge of medical supplies and equipment, while supervising the expeditions and efficient reactivation of the USS Repose.

His exceptional abilities were in large measure responsible for the subsequent smooth operation of the hospital aboard the USS Repose during the early critical months of hostilities.

'I Want a Diamond Ring, Bracelet Too' Is Theme Song of Reopened Exchange

RADM W. J. C. Agnew, in one of his last official acts as CO NMMC, cuts ribbon during opening ceremonies of the new Navy Exchange Store.

With the cutting of the blue and gold ribbon stretched across the entrance, RADM W. J. C. Agnew officially opened the new Navy Exchange Store located in the basement of the main building on 29 April at 1030.

Moved from the first floor for purposes of expansion, the store is unique in design and fully equipped to meet the needs of staff and patient personnel of this station.

Nine Months or Less For New Extensions

An executive order signed by the President has extended enlistments an additional nine months if they are due to expire between 1 July 1952 and 30 June 1953.

The nine-month period, however, is a maximum. According to the Defense Department, personnel will be released earlier depending upon the international situation. The order does not affect the following:

1. Personnel inducted through Selective Service.
2. Personnel whose enlistments previously have been extended.
3. Selective Service registrants who voluntarily enlisted for 24 months.

This order affects all components of the Armed Forces on active and inactive duty including reservists and national guardsmen.

The following is a specific implementation of the executive orders which extended enlistments:

(The first date is the month of normal expiration; the second date is the planned month of release from active duty for the Navy.)

June 1952-April 1953; July 1952-April 1953; August 1952-May 1953; Sept 1952-June 1953; Oct 1952-June 1953; Nov 1952-June 1953; while the rest (Dec 1952-30 June 1952) are scheduled for discharge in July 1953.

G.I. School Bill Ready for Approval

(AFPS)—The K-Vet Bill is finally ready for approval by the House Veterans Committee.

Congressional observers fell confident that the bill will reach the House floor for a vote before the end of May.

The bill will carry free school benefits similar in many ways to those granted WWII veterans. It is expected to cost approximately \$13 billion. The program, however, has been tightened to prevent abuses.

The bill may also contain benefits to include loan guarantees for homes, farms, and businesses, social security and possible unemployment insurance coverage. It is not known, however, whether these benefits will actually be a part of the schooling bill or be contained in later legislation.

"I'll never go back until that girl takes back what she said."
"What did she say?"
"Never come back."

Facilities catering to infant and children's wear have been greatly improved and enlarged.

For the home, the store's household appliance selections are adequate for the discriminating housewife.

Many new items have been added to the sporting goods section, where sportsmen are given the opportunity of selecting the best buys for their investment.

Displayed in the cases of the jewelry counter are diamond rings, wedding bands and costume jewelry of a greater variety.

Special consideration has been given to the toy counter where a year round showing of toys will be on display.

To handle the expected rise in business transactions, a number of sales personnel have been employed and placed in various departments.

COBBLER SHOP

Whatever the need for shoe repairing, the cobbler shop, under the care of Mr. Jesse Moody, and located in the basement area of the main building, is well equipped to handle any emergency.

In many instances, the shop, meeting the demands of personnel from this station, practices "shoe repairing while you wait."

Formerly a teacher of shoe repair at the Carver Vocational School, Mr. Moody is well qualified to hold the position as cobbler.

BARBER SHOP

Meeting the demands of the dozens of customers visiting the shops daily, the area for the barber shops has been enlarged, and new trade has been enlarged, and now covers two complete units outfitted to handle the extensive business.

Moving into its new location 10 April, the barber shop opened facilities to accommodate officers in one shop and enlisted personnel in the other.

Working in unison, five barbers cater to the shops' trade while one barber makes his rounds to the wards supplying the needs of the bedridden patients.

Lecture for NSHA Students

Mr. Fred A. McNamara, Chief of the Hospital Division, Bureau of the Budget, Executive Office of the President, where he has served for the past 13 years, delivered a lecture on "Federal Hospitalization" and "The Bureau of the Budget" to the officer students of NSHA on Friday, 2 May.

Coach's Corner

During the change of command ceremony last Wednesday a new te was established; that of Needle Technician. We ordinarily think of needle in terms of curved, straight, round, cutting, lumen, gauge et al. or about 1111, I was beginning to worry about a slender, sharp-pointed piece of steel used in a phonograph to transmit vibrations from record and wondering if the newly appointed platter jockey was in a te of necromancy . . . 12 long seconds by actual count till a chord the National Anthem struck the assembled tympanic membranes.

Here's what happened: The original plan had been to have the Fine Band but inasmuch as they were playing for the Commander-in-ief that day, we settled for the use of a record and the loudspeaker tem. As you noticed at the time of the ceremony, a northerner was using considerable annoyance to the color guard as well as the head he phonograph . . . the needle would not stay in the groove, until a break was formed by Captain Grunewald and Commander O'Brien, bling the Needle Technician to overcome the force of the elements. Speaking of jumping needles brings to mind a clipping from the waukee Journal. Jumping for the first time in four years, LT Ken esner, DC, USN, Great Lakes, Illinois, high jumped 6 feet 7 inches at Wisconsin AAU indoor track meet at Milwaukee.

A former national collegiate champion from Marquette University, hopes to represent the Navy Olympic squad that will compete in the mpic Games in Finland this summer. Because he has NOT jumped e 1948, LT Wiesner entered the Milwaukee meet merely for practice. took a lap around the track, went through a few calisthenics and ted jumping at 6-2. He proceeded upward until he had cleared 6-7, ing it a day without trying 6-8.

His performance broke the meet record of 6-6½, set in 1937 by Ed ke, world indoor record holder. While in college, the Naval Officer national champion from 1944-46. His record of 6-8¾, turned in at 1946 Nationals, was the best in the world until 1949. Not bad for first time out in four years.

A recent visitor to the Center from Nova Scotia enjoyed touring the ter layout in par figures the other day. Chief Maurice Fortin accom- ted Bill Downing over the local nine. Chips, a fine shotmaker, will n town for a few days and will take on anyone with a bulging pock- ok and a fast backswing.

The Naval Doctors' softball aggregation with the well-known court inary on the slab, Snowbird Peck, is holding the lead in the cur- horsehide race. Always in the bleachers when the pharmaceutical nists hit the diamond are the local apothecary adherents, CDR and Russ Taylor.

Looking better in every mound assignment, Smoke Peters is mak- his bid for league honors. Speaking of pitching, let's settle this once for all. Here is the complete pitching rule, as published in the ial rules by the Amateur Softball Association:

1. Preliminary to pitching, the pitcher shall take his position with body and knees facing the batsman, with both feet squarely on the per. The ball shall be held in both hands in front of the body. He t come to a full stop on the rubber prior to delivering the ball to batsman.

2. In the act of delivering the ball, the pitcher may take a windup ating of not more than one upward, in front and over, or one down- d, and backward swing of the pitching arm, and the hand shall be w the hip, and the ball not more than six inches from the body. pitcher must keep one foot in contact with the rubber and shall take more than one step forward in the delivery of the ball, until ball has left his hand. (The dragging forward of the foot that ld be in contact with the pitcher's plate is illegal.)

3. At no time, in the forward swing or in the final act of delivering ball, shall the arm cross in front of the body. (The ball may be vered with the wrist above or below the ball and the ball may be led, so long as the pitcher conforms to the pitching rule.)

1. At no time during the game shall the pitcher use tape or other gn substances upon the pitching hand or fingers, nor shall any for- substance be applied to the ball, provided that, under the super- m of the umpire, powdered resin may be used to dry the hands.

A popular game on the golf course when the EENT boys assem- the first tee with Dick Gaillard, H. R. Morse and Socks Bachar ngle-Bangle-Bungle. Awesome, isn't it? Three points on each and for you slide-rule boys here's the pitch: one point to the r whose ball first comes to rest on the clipped surface of the green. ond point to the player whose ball is nearest the cup after all play- te on the green. The third point goes to the player who first sinks outh.

On short holes, where it is possible to reach the green from the tee, point is awarded for first on the green, since the player with the r has too great an edge; instead, this point goes to the player whose is second nearest to the pin, after all balls are on the green. In ing up, each player wins the difference between his total points and total points of each player with fewer points. The above was a e favorite of RADM R. Milton Gillett, CAPT Herm Gross, Irv Nor- , Jumping Joe Zuska and Gloves Lesney.

Waves Find Coach For Softball Team

Looks and personality may, in some instances, be the keynote to success in several fields of endeavor, but in the case of one man on this station having at his beck and call the total of 17 devoted followers, it is believed to be a little of both—plus an injection of down-to-earth talent.

Taking his lead at the head of the column of girls, comprising the current flock of girl softball enthusiasts, "Dick" Gutekunst, HMI, an instructor at the Lab School, proudly marches his gang in re- view.

Proving his capabilities in the world of sports, Gutekunst hails from Allentown, Pa., where during his periods in school, he realized his ambitions to take an active part in various athletic programs.

When questioned about his team's standings, Dick stated that he is proud of the manner in which his girls are conducting themselves.

"Many of the players were on the team last year, but several polished newcomers have joined our forces," he claimed. "But," he continued, "we could always use a few more outfielders and pitchers."

Assuming the duty as coach of the Waves Softball Team on 15 Apr, Gutekunst found that he has a good team; one with a true understand- ing of sportsmanship and coopera- tion. With his eye on the future, Dick is certain to lead his team to victory during the coming season.

Doctors Leading With 4-0 Record

With intramural softball near the midseason mark, two hurlers for the locals stand out in their mound work.

James M. Peters, HN, an N.P. School student, with his outcurve, fast ball and raise ball is a threat for any team contending for the top position.

Pitching for the Bldg. 12 team, Peters has taken the mound two times and has copped a two-for- none record.

NNMC saw another top hurler take the mound in the Med. Sch. (NMS)-Lab. 18 game of the 5th of the month.

Paul Frankie, of Lab. 18, who in 1949-1950 pitched for the Jacksonville NAS Varsity, first took the mound in that game and, until the end of the sixth, using a fast ball, maintained the score at 5-1. In the bottom of the sixth, through a series of errors, Med. Sch. loaded the bases and with a double by Millard bringing two runs and Parker in his two at bat clearing the bases for three runs, and 11 others having a chance at the sphere, the final score tallied 8-5 for Med. School.

Bowling Awards Given to Top Keglers

1951-52 bowling awards are presented to the winners by RADM Agnew in the NNMC Board Room.

First row (l. to r.): LT R. J. McCarthy, Naval Hospital Team; LT W. L. G. Cartier, second place doubles winner; LT E. F. Hicky, second place doubles winner; H. M. Marshall, HMC, NSHA Team Captain; J. M. Reynolds, HMC, CPO Team Captain; and J. M. Vinson, HMC, CPO Team.

Second row: LCDR R. F. Jaeger, Bowling Officer; J. S. Bachar, HM3, Naval Hospital Team; J. Meyers, HM1, NMS Lab Team Cap- tain; R. J. Novotny, HN, Naval Hospital Team; L. P. Williamson, HM3, first place doubles winner; W. E. Hobbs, HM3, first place dou- bles winner; P. H. Oxford, HMC, high game, CPO Team; E. F. Meitl, HMC, high series, CPO Team; ENS M. A. Nelson, CPO Team; and J. E. O'Keefe, HMC, Naval Hospital Team Captain.

'Why Doesn't NNMC Have Hardball?'

The favorite question from the NNMC sport enthusiasts since the be- ginning of the sport season has been, "Why doesn't this station have a hardball varsity team as we did last year?"

In previous years, NNMC was represented in the MAISAC league and played against such local service teams as Fort Myers and Quantico. Our win-loss record was better than average and we took second place in the league during 1951.

Results? As CAPT. Frates, the senior member of the sports com- mittee, wrote in this column on 25 Feb:

"The loss of at least seven horse- hides per day over the (left field) fence, complaints from property owners as to broken windows, and small children da...ing across Jones Bridge Road to retrieve errant balls constituted a problem. Softball players not being able to play while a hardball game was in progress . . . golfers hitting players and what few spectators there were . . . spikes on the tennis courts while chasing fouls . . . but most impor- tant, is the number of players we see.

"During former years, one team of fifteen enjoyed the sport—while this season over 150 men are able to use the playing areas with games going four or five times each week.

"Adding to this," he explained, "special meal hours . . . providing adequate meals for visiting teams . . . visiting and home teams tying up the swimming pool dressing room facilities . . . getting men off watches for games home or away . . . all presented problems.

"Add to all these things the fact that every nearby military instal- lation included on their roster well

established big league stars, and not some guy who played in a school of 50 boys and 60 girls . . . or some fellow who made all-Navy out there on some coral atoll, and you will realize the sense of fielding softball teams instead of a single hardball aggregation.

"Another big problem in the field- ing of a hardball team was, as Bob Addie, former sports scribe for the Times-Herald, said, 'Five minutes after liberty call . . . a date . . . Nuff said?'"

"Did I hear some scuttlebutt about 'whites' being in season?"

by Al McGinley

Admiral Groesbeck

(Continued from Page 1)

the New York Eye and Ear Infirmary. In Feb 1928 he reported to the Naval Hospital, Norfolk, to serve until March 1930.

He was then ordered to duty in connection with the fitting out of the USS Houston, went aboard at her commissioning in June 1930, and served in that cruiser operating as the flagship of the Commander in Chief, U.S. Asiatic Fleet, until Feb 1931.

Duty from February to May 1931 in the USS Canopus, tender and flagship of Commander, Submarine Squadron 5, Asiatic Fleet, was followed by an assignment as Patrol Medical Officer, Yangtze Patrol, Asiatic, with additional duty as Medical Officer of the USS Luzon from May to Oct 1931.

For six months thereafter he served as Aircraft Medical Officer on the Staff of Commander, Aircraft, Asiatic Fleet, with additional duty as Medical Officer of the USS Jason, flagship.

In Apr 1932 he was detached to duty at the Naval Air Station, Cavite, P.I. and after a year's service there returned to the United States for a tour at the Naval Air Station at Anacostia.

After refresher instruction from Feb to Aug 1936 at the Naval Air Station at Pensacola, where he was designated Naval Aviator on 12 Aug 1936, he assisted in fitting out the USS Yorktown at the Newport News Shipbuilding and Drydock Company, and served aboard that carrier for a year. He then reported for duty until Aug 1940 at the Naval Air Station, Norfolk, Virginia.

He was serving as Medical Officer on the Staff of Commander, Aircraft, Battle Force, when the United States declared war on the Axis Powers in Dec 1941, and continued in that capacity until detached in March 1942 to return to the United States.

He is entitled to the ribbon for, and a facsimile of, the Presidential Unit Citation to the USS Enterprise "for consistently outstanding performance and distinguished achievement during repeated action against enemy Japanese forces in the Pacific War Area, 7 Dec 1941, to 15 Nov 1943 . . ."

Following his return to the States, and three months' duty in the Bureau of Medicine and Surgery, he reported as Medical Officer of the Naval Air Station, Pensacola, Fla. In April 1943 he also became Medical Officer of the Staff

of Commander, Naval Air Training Center, Pensacola.

From December 1944 until September 1945 he served on the staff of Commander Air Forces, Pacific Fleet. For meritorious conduct as Force Medical Officer during that period, he received a Letter of Commendation with authorization to wear the Commendation Ribbon, from the Commander in Chief, U.S. Pacific Fleet.

Returning to the United States in Sept 1945, for 15 months thereafter he had duty at the Naval Air Station in San Diego with additional duty as Medical Officer on the Staff of Commander, Naval Air Bases, Eleventh Naval District.

On 2 Jan 1941, he was designated Chief of the Division of Aviation Medicine, Bureau of Medicine and Surgery, Navy Department and on 15 Apr 1948, he became Assistant Chief of the Bureau of Medicine and Surgery for Aviation and Operational Medicine and in April of 1951 was given the additional duty as Assistant Chief of the Bureau for Research and Medical Military Specialties. He served in these capacities until the present assignment as the Commanding Officer of NNM.

In addition to the Commendation Ribbon and the Ribbon for the Presidential Unit Citation to the USS Enterprise, Rear Admiral Groesbeck has the Victory Medal (WWI); the Haitian Campaign Medal (USS Kittery); the Yangtze Service Medal (USS Luzon); the Marine Corps Expeditionary Medal; the American Defense Service Medal, Fleet Clasp; the American Campaign Medal; the Asiatic-Pacific Campaign Medal; and the WWII Victory Medal.

Married to Maria Canals de Camellas of Barcelona, Spain, at San Francisco de Macoris, Dominican Republic, on 19 June 1920, he has one daughter, Mrs. Dorothy G. McClintic. RADM and Mrs. Groesbeck reside in Quantico, "A", NNM.

Added to his experience in Flight Surgery and Aviation Medicine, are his special qualifications in diseases of the eye, ear, nose and throat. He is a Fellow of the American College of Surgeons and a member of the Sigma Alpha Epsilon Fraternity, the Army and Navy Clubs of Washington, D. C., and Manila, P. I., and Columbia Country Club, Washington, D. C.

In 1951 he received the Lyster Award from the Aero Medical Association, and is now the President-Elect of that Association.

Dental Explorer

by C. Connor

Our DENTAL DUKES recently took on Cardiology in softball to the tune of seven (7) to five (5) behind the excellent pitching of Paleologo and Purser. The fielding and hitting of such stalwarts as Schanke, Gammon, Pederson and Beversdorf more or less swamped the Cards from Cardiology. The team as a whole did a fine job and are off to a good start. Congrats team, we're all behind you.

Well, with Mrs. Haslam in Room 160 looking like a breath of Spring these days, you don't have to go outside to catch that proverbial "SPRING FEVER" . . .

Did you know that . . . Bob Johnson has finally added his name to the COM RATS list. Yep, the wedding bells chimed out on the 16th and Bob just didn't have his track shoes on that day. Good luck Mr. and Mrs. Johnson from all of us.

While we're on the subject of weddings, rumor has it that a certain corpsman in the crown and bridge lab is married. The thing that practically clinches it is that when asked he will always say "no" (with tongue in cheek). Looks pretty bad Mr. B.

Welcome aboard to all our new staff members. Especially Dr. Rupp who we logged in with one hand, and, with the other, handed him a gown, while the patients formed a line to the right. He sure was a welcome sight. . . .

Seen looking at toasters in Ship's Store of late were D. J. A. and Schneider. If it happens again we can probably expect an official announcement.

By the way, if anyone is interested in the correct pronunciation of PIZZA ask Chief Stinson. He sure can wow you with the latest Italian he's picked up.

Well, that's all for now so till next time smooth sailing from the Gal from the HUB.

"Got 'em in any other colors?"

Two for Only One When DTI Has Son

Beads of perspiration dotted his forehead and a cold chill crept along his spine when Don Brouillette, DTI, read the entries of the hospital's recapitulation sheet on the morning of 23 April.

Not satisfied with the anxiety she had caused the newly elected father the previous day, Fate again intervened in her whimsical fashion and listed Don's offspring on the records as a male on one line and again as a female on the line below.

A rushed phone call to the responsible parties assured Brouillette that his spouse presented him with the usual quota of one male child . . . no more, no less.

Non-Completion of Reenlistment Term Requires Refund of Part or All Bonus

(AFPS)—Enlisted personnel of all Services who for certain reasons do not complete the full term of their reenlistment will have to refund a pro rata of their reenlistment bonus.

NMRI Stag Party All But Blows Up

by R. Conaway

The familiar greeting around the Institute these days seems to be "Hi, what's popping?" Ed Harvey can give out with some first-hand information on "what's popping." So could I, should anyone chance to inquire.

Has anyone asked Mabel what her new theme song is? Well anyhow, we're glad to have her back with us again.

Everyone is getting curious about that "heavy" date Heye is always talking about.

The Dental Division has acquired another golf enthusiast in the person of LT H. W. Lyons, recently transferred to NMRI from NDS. Seems like all the golfers end up there sooner or later.

Latest addition to the Psychiatry Division is LT E. L. Callaway, MC, from USNH, Bethesda.

On the enlisted side, we have W. E. Flanery, M. D. Misenhimer, L. C. Jones, L. J. Gerende, and K. E. Hall.

Orders to the USS Midway takes Chief J. H. Pierce from Physiology Division and Radiation Technology lost J. P. Luciana to the inactive duty lists.

Chief Ashcraft believes that old pals are the best pals—at any rate, such is the case where his friend "Bud" is concerned.

Seems like some of the fellows around the Institute were planning a stag barbecue, but I hear it all but blew up!

Then we had the five seamen who crammed for that final test, only to find out they had studied from the wrong book.

And so it goes until next issue!

Your Navy Belles

by George

The news around our house is the girls. Pretty sharp looking bunch at the change of command ceremonies. Everybody had to look out (even the Marines) when we marched.

New arrivals: Lesley Evans for dental and Nancy McGreevy for the hospital. Nancy is also from the heart of western Maryland. What we can't tell you about Cumberland!

Summer vacations: Aleta Ault and Ester "Al" Allen.

Norma Schrader took Delores home with her to South Carolina. Very interesting picture that they sent us—a garage!

In sick bay were Ethel Hammett, Ruth Ross, and Marion Ackley. Join us again soon.

The Purple Heart candidates are "Tillie" Tillitson for fingers. What's at the zoo?

Jane, Clair, and Betty are deep in Lab Terminology. Have fun. Confusion reigned at the barracks when "Roz" Brandt's twin visited us for the weekend.

This is the girl from the heart of Maryland signing off.

According to a new Defense Department directive, to be implemented by the Services, the law is retroactive to 26 Oct 1951. Funds will be based only on the number of whole years that are completed.

The refunds will affect those who either voluntarily or by their misconduct do not discharge the full obligation for which the bonus was paid. Some of the conditions for which a portion of the bonus must be refunded are:

1. Transfer to the Enlisted Reserves, Fleet Reserves, or Fleet Marine Reserves, and release from active duty prior to the expiration of number of years for which the bonus was paid.

2. Separation for misconduct, disability resulting from misconduct, sentence by court martial, conviction by civil court, or otherwise being found unfit.

3. Early discharge for special reasons, such as to fill own vacancy, attend Service schools, or accept certain assignments.

4. Separation of women who resign for reasons of marriage.

(5) Egg & I (and I) In Radioisotope Lab

Wanted: Somebody well-padded, with fatherly or motherly tendencies, to sit on a pressure ring for a period not to exceed two weeks. If interested, please call Martin Reder, HN, or Margaret Posipanka, HM2, in Radioisotope, the foster parents of five robin eggs.

The parents found their new charges in one of the air conditioners in the lab in Ward 131 about two weeks ago.

At the present time the family is split up. Due to an unexplained reluctance of the MAA of Radioisotope to release a member of his crew for personnel incubation, it was necessary to farm out the eggs to the incubator in urinalysis.

Soon to be required are qualified flight instructors for the latter training of the fledglings. References from any of the naval flight schools are acceptable.

Layettes will be accepted or the young'uns and can be sent to either of the new parents.

Blood Bank Graduates Four Students

On 25 Apr, the second class of 1952 in Blood Bank Technique graduated. Front row (l. to r.): Miss Edna McCormick, LT, MSC, of Blood Processing, Staff; Billy Keith, HN, student; Miss Hilda Martin, LTJG, student; Miss Mary Ann Moniz, LT, student; and Miss Myrtle G. O'Hara, LT, student.

Second row: Miss Dorothy Shaffer, LT, senior nurse of the blood bank school; CAPT J. L. Enyart, Commanding Officer of NMS; and CAPT E. B. Coyle, Executive Officer of NMS.

Vet Bill Approved by House Committee Benefit All Armed Forces Personnel

Washington (AFPS)—The K-Vet Bill has been unanimously approved by the House Veterans Committee. It must now be passed by the House and the Senate.

The measure would provide up to 36 months of free schooling, up to \$150 in mustering-out pay and government-guaranteed loans on homes, automobiles and businesses.

The benefits would be available to all men and women in uniform between June 27, 1950, and a date yet to be set later by either Congress or the President.

Chief benefits are: Education—Up to a month for single veterans and up to \$150 to those with dependents. Students would be entitled to one and one-half days of schooling for each day of service. The maximum would be 36 months, the normal period for a four-year college education. Veterans must pay their own tuition and use whatever is left for living expenses.

Housing—Provisions are the same as those in the WWII bill, except that home builders will be required to give veteran buyers a one-year warranty that the house is represented.

Loans—The government, as before, will guarantee up to 60 per cent of a four per cent loan on a home, farm or business with a maximum guaranty of \$7,500.

Mustering-out pay—Men up to the Army rank of captain get \$100 for service of less than 180 days, \$200 for more than 180 days and \$300 for more than 180 days and seas duty.

Social security—As before, the government will credit each man with \$160 monthly salary during social security benefits.

On-the-job Training—General provisions are the same, except that the government's contribution will be reduced automatically every four years.

The committee provided special safeguards against abuses which plagued the WWII program. It included such vocational courses as typing, dancing and personal development. Any flight training would have to lead to a job. **Who will be eligible for the bill?** According to Rep. Olin E. Teague (Tex.) all servicemen who served on active duty on or after June 27, 1950, anywhere in the world. It includes, as many servicemen think, especially for veterans who served in the Far East.

When asked if the bill would be in time for veterans of the present emergency to register in colleges and universities for the term, he replied:

"We are doing everything in our power to provide educational benefits for veterans of the present emergency and feel confident that it will be passed this session. Congressional sentiment is strong in favor of such a bill and it is likely that a bill reported by the committee will have little trouble passing both houses as quickly as possible."

News Shorts From The Editor's Desk

(AFPS)—The following bills of interest to servicemen were recently introduced to Congress:

1. A bill to provide free postage for members of the Armed Forces.

2. A bill to abolish special pay for physicians and dentists of the uniformed services.

3. The following bills to amend the Career Compensation Act of 1949 were also introduced:

a. To reduce and equalize the monthly rates of certain categories of incentive pay prescribed for members of the uniformed services for hazardous duty.

b. To provide for the reduction of certain station allowances.

c. To reduce and equalize the monthly rates of flight pay and submarine pay prescribed for members of the uniformed services.

d. To extend the application of the special inducement pay provided thereby to doctors and dentists.

Fleet Reserve Association members who are in need of advice . . . personal or military . . . please contact Chief Shepherd, the Association's representative working in the Hospital Linen Room, Extension 221.

NSLI Ins. Dividends Completed by July

The Veterans' Administration advises that certain administrative difficulties have delayed the payment of the 1951 dividend of the National Service Life Insurance to in-service personnel.

The enactment of the Servicemen's Indemnity and Insurance Act of 1951 greatly increased the workload in the Veterans' Administration.

It was necessary to withhold dividend payments to in-service personnel until it was determined whether or not the serviceman had waived premiums under the provisions of the Act.

Since it is anticipated that payment of the 1951 special dividend on NSLI policies will be completed by the Administration by July this year, naval personnel are requested to withhold all inquiries pertaining to this payment until after July 31, 1952. Such inquiries tend to retard the payments of dividends.

NBA Dental Group Invites NDS Doctor

CDR J. V. Niiranen, DC, USN, of NDS, has been invited to serve as an honorary member on the "Dental Advisory Committee" of the National Boxing Association.

The invitation was extended because of his contribution to boxing through his development, with CDR H. J. Towle, DC, USN, of the individualized mouthpiece for oral protection of the participants in the sport of boxing.

The Dental Advisory Committee of the National Boxing Association is a newly formed committee which was organized as a result of the added interest in boxers' welfare stimulated by the ingenuity of CDRs Niiranen and Towle and others interested in providing more effective protection against oral injury.

'Your Hit Parade' Here for Broadcast

Beautiful Eugenie Baird will be seen as Your Lucky Strike Star of the Week, with Guy Lombardo and his Royal Canadians, in a special broadcast of "Your Lucky Strike Hit Parade" from the auditorium, Thursday, May 29.

The doors will open at 2045, entertainment will begin at 2130 and the broadcast at 2200. Admission is

Miss Eugenie Baird

free and free Lucky Strike cigarettes will be given to all.

A popular favorite wherever she is heard and seen, Eugenie Baird joins singers Kenny Gardner, Bill Flannigan, Cliff Grass, and Kenny Martin, with the popular Lombardo brothers—Carmen, Lebert, and Victor—the Lombardo Trio and the Twin Pianos, in the presentation of the Top Seven Tunes of the Week, according to Your Hit Parade Survey, and the colorful Lucky Strike Extras.

Circle this date on your calendar for this is the first time that the "Hit Parade," in its seventeen-year history, has gone on a major tour.

Four Enlisted Men Make Commissions As New Ensign MSC Officers at NSHA

(See Picture on Page Four)

On April 30 and May 1 four chiefs from the Naval School of Hospital Administration changed their titles of address from chief to master when they were sworn in as new Medical Service Corps Ensigns by the Executive Officer of NSHA, LCDR G. W. Wiese, MSC, USN. LCDR Wiese, who was acting Commanding Officer of NSHA while CDR Zimmerman was on TAD orders, offered his congratulations to the new corps officers.

New Pay Increases Effective on May 1

The long-awaited Armed Forces pay bill has been signed by the President and is effective as of May 1, 1952 and retroactive to May 1, 1952. Both the House and the Senate approved the bill unanimously.

The bill is a result of compromise between two bills passed by the House and Senate. The measure includes six important points as follows:

1. The base pay of all personnel in the Armed Forces will be increased four per cent.

LT. J. I. Moon, SC, Disbursing Officer of NNMC, stated that since pay scales must be prepared locally for all increases in all grades in daily rates, the increases in basic pay will not be reflected in regular pay checks until the second pay period of June.

The basic allowance will possibly not be noticed until a later date since the allotments must be re-registered by the disbursing office prior to the addition of the increases.

2. Allowances for quarters and subsistence of all personnel will be increased by 14 per cent.

3. The base pay of midshipmen and cadets at the Military, Naval and Coast Guard Academies, and of aviation cadets of all Services will be increased four per cent.

4. The pay of all persons on the retired lists of all Services will be increased four per cent.

5. A raise in pay of enlisted rates will be authorized for certain members of the maritime service, which is operated under the jurisdiction of the Department of Commerce.

6. Personnel appointed to the Military and Naval Academies prior to 1912 and 1913 will be permitted credit for military and naval service provided they could count that service when they retire.

Of the six points, all are permanent except the quarters allowance for enlisted personnel. This runs concurrently with the Dependents Act of 1950 which expires April 30, 1953.

At that time, Congress may elect to continue the act or let it drop. If they drop it, this would mean that dependents of enlisted men below the rank of E-4 would not receive any quarters allowance.

The four new Ensigns are Cecil R. Johnson, student; Fred E. Liedtke, student; Weller J. Shaffer, student; and David M. Wylie, staff.

Cecil Robert Johnson

Born in Wauchula, Fla., the new officer enlisted in the Navy in Feb. of 1941 in New Orleans, La. He was a member of the original "Bases Roses" which afterwards became Base Hospital No. Two, in the New Hebrides during the last World War.

Fred E. Liedtke

Mr. Liedtke, born in Cleveland, Ohio, attended Garfield High School where he was awarded the Bausch and Lomb Honorary Award for two treatises on original work that he did in psychology and psychiatry.

The new Ensign wears the Presidential Unit Citation, three Good Conducts, the American Defense Service Medal with "A" Clasp, European-African-Middle Eastern Area, Asiatic-Pacific Area, and the WWII Victory Medal.

Weller J. Shaffer

Mr. Shaffer, while in the Navy, has attended two universities—the University of Omaha in Nebraska and the University of George Washington in the D.C. area.

Born in Toledo, he enlisted in the Navy in June of 1942 and made chief in October of 1951. His date of commission is the 30th of April.

David Monroe Wylie

Born in Steubenville, Ohio, Mr. Wylie joined the Navy in June 1940 in Pittsburgh. During the last war he served aboard the USS Cassin, a destroyer, and had duty with the Fleet Marines for three years, making the invasion of the Gilberts.

An instructor at NSHA in Personnel Records, the new Ensign's date of commission is 1 May 1952.

By the Numbers!

(AFPS)—In Williamsport, N. C., Viola Brown, 23, has given birth to quintuplets, quadruplets, and twins since 1946 and now has a set of triplets.

Wife of an Army private first class now in Korea, Viola's birth record is one of the most unusual in medical history, according to the doctors. Her triplets are doing nicely and weigh five pounds each.

A son born in 1946 and the twins born last year are living. But the quadruplets, which were born six years ago, when Viola was 17, and the quint, born prematurely in 1950, lived only a few hours.

Diaper Derby

May 8—Taylor Duane Stott, 6 lbs., 7½ oz., son of Mr. and Mrs. R. D. Stott. Robert D. Stott, LTJG, DC, is attached to the Naval Dental School.

May 9—William Robert Myers, 8 lbs., 11 oz., son of Mr. and Mrs. W. L. Myers. William L. Myers, ET1, is on duty at the Naval Research Lab.

May 13—Cathleen Ann Cumming, 8 lbs., 12 oz., daughter of Mr. and Mrs. R. Cumming. Robert Cumming, HN, is under instruction at the Lab. Tech. School.

May 14—David Alexander Turan, 7 lbs., 5¼ oz., son of Mr. and Mrs. J. P. Turan. John P. Turan, DT2, USN, is on duty at the Naval Dental School.

May 16—Carol Anne Skelly, 7 lbs., the daughter of Mr. and Mrs. Donald J. Skelly. Don Skelly, HM3, is attached to NMRI.

May 19—Judith Anne Grant, 4 lbs., 13 oz., daughter of Mr. and Mrs. J. C. Grant. John C. Grant, HM1, USN, is attached to NNMCM and on duty as Barracks MAA of Building 112.

Sailor Re-enacts 'Boy and Dike'

Off Korea (AFPS)—A quick-thinking sailor recently averted possible disaster by sticking his finger in a live bomb to keep it from exploding.

A jet fighter returning to the USS Boxer from a mission over Korea carried a loose 250-pound bomb that could not be released. As the plane landed, the bomb jarred loose and went bouncing down the deck. Two flight crewmen grabbed the tail of the bomb and, oblivious to the danger involved, began to drag it to the side of the ship.

Aviation Electrician Ralph O'Dell, an expert on bombs and fuses, rushed to the bomb and jabbed his finger between the striking pin and the fuse body to prevent the bomb from exploding. He held his finger there until the bomb was carried to the side of the carrier.

There he inserted a block of wood into the mechanism and calmly removed the fuse.

The Chaplain's Corner

by Chaplain Warren D. Trumbo

'Lest We Forget'

One again we are on the threshold of another Memorial Day when we solemnly remember those who made the supreme sacrifice. This is a day which is observed by all Americans regardless of church affiliation or racial background. In a day when there is a wide divergence of ideas and ideals, we have a common denominator in the sobering implications of this day.

Memorial Day should be a day of tribute and prayer, and not a day of lamentation. Nothing which we say or do can add to or detract from the valor and virtue of our departed heroes. They have lived and died that the principles of freedom and democracy might be perpetuated in the great land of ours. In reality then, the greatest tribute which we can pay to those who have sacrificed their lives for us, is to reproduce and perpetuate their spirit.

One of the greatest perils of our day is that we will fail to exemplify the heroic manhood of those who

have lived before us. If this is permitted to happen, our freedom will be jeopardized. A great trust has been granted to us and it is our responsibility not to betray those to whom we are deeply indebted. The words of the Apostle Paul in his letter to the Corinthian Church expresses this idea. He said, "Ye are bought with a price." We are indeed "bought with a price" and nothing short of supreme devotion to the highest ideals of freedom and democracy will in any way cancel this debt.

Therefore, if we would truly remember our departed heroes on this Memorial Day, we will dedicate our lives anew to the principles of honor and decency. It must be a continuous process and not merely a sentimental vow which is soon forgotten. If this is done sincerely by enough people, we can be assured that the "Government of the people, by the people, and for the people, shall not perish from the earth."

I and E:

English and Spanish Presented by GWU

Registration for two college-level courses to be given at NNMCM under the auspices of George Washington University will be held at the Information and Education Office, Building 102, on June 4, 5, and 6, from 0800-1630.

All interested civilian and service personnel are eligible for enrollment. Patients must secure the permission of their Ward Medical Officers before being allowed to enter classes.

The schedule for these courses is as follows:

ENGLISH 1

Mon., Wed. 1830-2100 Bldg. 131

SPANISH 1

Tu., Thurs. 1830-2100 Bldg. 131

These courses will run for seven and a half weeks and will carry three (3) hours of college credit. English 2 and Spanish 2 are planned for the fall term on a fifteen-week basis. Both of these courses are required for those interested in working toward an Associate in Arts Degree at George Washington University.

Naval personnel may request partial tuition aid for these courses. Because of limitation of Navy funds, however, priority will be given on a "first come, first served" basis. Tuition aid, if granted, amounts to \$22.50 per student.

The cost of each course is \$30.00 for service personnel and \$36.00 for civilians. Naval personnel whose request for tuition aid is granted, must pay \$7.50 either by check or money order at the time of registration. For all other students, full tuition is due at the time of registration. If enrollment is not sufficient to begin a class, payment will be returned in full.

First sessions of these classes will meet during the week of June 9. Further information concerning this program is available at the Information and Education Office, Building 102.

Congregation Beth El of Montgomery County will hold services every Friday night at 8:15 p.m. in the Social Hall of the All Saints Episcopal Church, Chevy Chase Circle. All Service Personnel are invited to attend.

The services of Rabbi Harry Kaufman, representing the Jewish Welfare Board, are available to all Jewish Personnel and Patients at the National Naval Medical Center. Rabbi Kaufman may be reached by calling the Chaplain's Office, Ext. 324, or by call direct—Office: RA. 5371—Home: GE. 0755.

A Night in Korea:

I Counted Fourteen of Us Wounded

Editor's note: Many at NNMCM will recall Vic Obos, better known as "Ski," the overseer of the golf shop last summer. Vic, with a sense of humor and likeable personality, worked with Bill Dumas until October of last year when he left for the Fleet Marine Force at Camp Lejeune. The rest of the story is in the following letter received recently by his former boss, the Special Services Officer:

Dear Mr. A:

I meant to write you a letter a long time ago but since I write three letters a day to my wife I need the remaining hours of the day to eat, sleep, and do my duties.

What prompted this letter to you is a matter of a dual request but, alas, I got hit yesterday morning about 0100 in both ankles and I'm now at a Medical Co. awaiting further evacuation to the Consolation for a little rest I guess.

I happened to meet an old Bethesdaite by the name of Pollizi. He stood around and we talked over a beer he brought to me from his hideout. We happened to mention how interesting the Center News would be here in Korea.

At this time I do feel very uncomfortable but since I will be taken care of by the Navy I should be back to duty in a short time. Incidentally, a Polish doctor removed the shrapnel from me in the O.R. and I say again let's have more Polish Navy doctors. Seriously though, he is 4.0.

You are probably thinking about how I might have gotten injured so I'll try to make it brief. My platoon had a patrol to the enemy lines with a rough objective. We were briefed prior to departure and were informed of our job. We were to capture a mortar tube, prisoners, and then destroy what other enemy were around.

We had one platoon of men reinforced with a machine gun section, ATAs, etc. We proceeded to a rendezvous area and let the base of fire go first to a village raided and demolished by a raid three nights prior. After they made it the two remaining squads with an interpreter, radioman, and light machine gun started out through the rice paddies. We were two inches short of knee deep in mud and slime.

We were the assault section. We snooped and pooped through the mine fields until we reached the ridge which we were supposed to move out of onto the mortar positions. That's when all hell broke loose. (We had 24 men or so.) The enemy waiting for us really set up an ambush. The point man was approximately five feet from the enemy when they started throwing grenades at us. The Lt. (platoon leader) got hit and the first 6-10 grenades got most of us at least slightly.

We were taken completely by surprise. Then they opened up with the BARs, Burp guns, etc., on us to force us back. We had too many wounded to hang around so we started to bug out. Our machine gun couldn't give us any cover due to the terrain.

We fell, stumbled, and were dragged down a rocky slope about 20 feet when they started to really give it to us—five or six heavy ma-

Victor Obos

chine guns, mortars, and artillery had us zeroed in. None of us thought we would ever get out. Our radioman and radio were hit by a grenade. By that time we were or should have been on stretcher cases.

Mr. A, you never saw a more organized, cool, lucky escape. After I got hit I fell down and got my right foot caught between some rocks. After I got my foot out I fell about eight more feet and lost four bottles of serum from my pockets.

I was lucky and glad I carried so many dressings. I used all of mine and the ones carried by the men. The one time I was worried was when the point man got hit through both ankles, side, left shoulder and in the chest. Incidentally, the battle dressing carried over his head saved him. A bullet pierced it and entered his chest over the heart. It didn't penetrate deep enough to kill him, but it would have if he hadn't had something there to slow it down.

After about 30 minutes under complete cross fire and shelling, somehow got a little support. Our 105s and mortars gave us some cover. Every time we moved through their machine guns would open up on us with tracers.

I counted 14 of us wounded. We moved very slowly. It took over two hours to move about 200 yards. We got all our men out except the Lt., who was dead. I got him to the base of cover and two squads of men from another company were sent out to get him. They had smoke and W.P. to get them cover.

Eight of the fourteen men are to go aboard the Consolation in the morning. I'll close now. Give my regards to Bill, Emily, and all my friends. Glad to hear "R. J." Reynolds got a nice job.

Sincerely,

"Ski"

Will YOU Be a Statistic?

According to the Statistical Division of the Navy's Bureau of Medicine and Surgery, the following information concerning motor-vehicle accidents for the year 1950 in which Navy and Marine Corps personnel were involved shows a comparative increase over previous years.

Representing approximately 1 of every 5 new admissions for treatment of accidental injuries during the year, new admissions to the sick list due to motor-vehicle accidents totaled well above the five-thousand figure.

Accumulated sick days from motor-vehicle accidents accounted for more than one-third of all sick days accumulated from all causes of accidental injuries during the year, reaching a point of more than 233,000.

Motor-vehicle accidents accounted for 48.7 per cent of all deaths due to accidental injuries in the Navy and Marine Corps during the year. Of the 5,431 new admissions, 88 per cent involved personnel who were on leave or liberty. This shows an increase of 1.8 per cent over the total for 1949. Nine out of every ten persons involved in motor-vehicle accidents were on leave or liberty at the time of the accident.

The greatest loss of manpower is within the age groups which constitute better than three-fourths of the Navy and Marine Corps personnel.

MAY 26, 1951

The Naval Medical School offers a variety of instruction for the student—both officer and enlisted. (Clockwise) Problems in pathology, microscope techniques in the laboratory procedures, methods of measuring radioactive substances, and the problems of angles in x-ray work are all a part of the curriculum offered at the school.

On the bottom of the page are scenes from the old Naval Medical School located on 23rd and E Streets. In the new school the Blood Bank, the Medical Library, the Tissue Bank, and the Medical Photography Department are all integral parts of this command.

Pictured on the left is the first Commanding Officer of the Naval Medical School, CAPT R. A. Marmon. On the right is the present Commanding Officer of NMS, CAPT J. L. Enyart, MC, USN.

Naval Medical School's 50th Anniversary Honors Five Decades of Instruction, Medical Progress

Tomorrow, the 27th of May, the Naval Medical School, one of the component commands of the National Naval Medical Center, celebrates its golden anniversary—50 years since its establishment in 1902 as an answer to requests over the years from medical directors and officers for a naval postgraduate

and training program.

In these five decades, many valuable contributions to medical research and literature have been made as a result of the work done at NMS; the School was the base for the development of the highly successful epidemiological and sanitary units of the Naval Medi-

cal Department; but most important it has imparted instruction to thousands of doctors and technicians that have made the Navy's medical care the finest in the world.

This School, under the command of CAPT J. L. Enyart, MC, USN, is fundamentally a postgraduate institution. Its chief mission is the training of Medical Officers, nurses, and corpsmen of the Navy for services ashore and afloat with special emphasis upon those phases of medicine and surgery peculiar to the Navy.

World War II is a prime example of this with its variety of geographical areas. During that war, 2,594 officers and enlisted personnel were trained here in various specialties to meet the needs of new geographical medical problems that war presented.

Among these specialties were epidemiology, tropical medicine, malariology, laboratory procedures, pathology, photofluorography, the painting of acrylic eyes, and the several aspects of art and photography peculiar to audio-visual plus short indoctrination courses offered to over 300 naval officers.

Today, for the Medical Officer, the Naval Medical School offers a variety of courses: Basic Naval Medicine, Applied Basic Sciences, approved residencies in clinical pathology and pathological anatomy, a six months' course in epidemiology, and a course in photofluorographic interpretation. The course in Medical Aspects of Special Weapons and Radioactive Isotopes is available to both the Medical Officers and the Dental Officers of the USNR.

For the enlisted men, 12 schools are in operation the year around: Pharmacy, chemistry, laboratory procedures, x-ray and photofluorography, medical photography, physical medicine, occupational therapy, radioactive isotopes, duplicating techniques, tissue bank, blood bank, and optometry.

All the general laboratories essential for the adjoining Naval (Continued on Page 6, col. 1)

NNMC Guard Retires After 25 Yrs. Navy

Mr. R. L. Bray, Captain of the Civilian Guard, presents a fishing rod and reel and a Parker '51 pen and pencil set to Mr. Stevens upon his retirement.

After 25 years of combined Navy and Civil Service, Mr. Monroe Stevens, a Civilian Guard, retired May 1. In his 17 years of naval life, Mr. Stevens saw most of the world and served on all of the seas before leaving Uncle Sam's fleet in 1943 to take a job here.

His eight years in Civil Service were spent at NNMC as Civilian Guard. Before retiring he reached the rating of CPC-5, which is equal to a sgt. on a city police force.

Jovial "Big Steve" will be well remembered by all the staff of NNMC for playing Santa for the Christmas parties for the last couple of years.

What is he going to do upon retirement? In his own words, "Take it easy, hunt and fish, and just enjoy life at my home in Sellman, Md., with my wife and two children, a daughter 14 and a son crowding nine."

Mr. Stevens belongs to the DAV of Washington, the Special Police Association of Washington and is a past-governor of the Loyal Order of the Moose, Lodge 1540 of Rockville, Md.

New Commissioned MSC Officers at NSHA

(Story on Page One)

Four chiefs at NSHA exchanged their three-and-one stripes for Ensign bars when LCDR G. W. Wiese, Executive Officer of NSHA, instructed them to raise their right hand in a ceremony held at the Naval School of Hospital Administration. In the top picture is Mr. David M. Wylie being sworn in. The other three are (l. to r.) Mr. Fred Liedtke, Mr. C. R. Johnson, and Mr. Weller J. Shaffer.

Crew's Library:

Destination Korea; New Book's Subject

It is not often that we receive a book dedicated to one of our staff but such is the case with one of the latest additions to Crew's Library: F. X. Murphy's **Fighting Admiral: The Story of Dan Callaghan**, which is dedicated to Captain Hogan. This book is the story of Admiral Callaghan's career in peacetime and war; a career which should be an inspiration to all Navy men.

A book which will be of great interest to our Korean veterans is by Kate Holliday—**Troopship**, the first eye-witness, day-by-day account of life aboard an MSTs bound for Korea. The author, a reporter, was permitted to take the 11-day voyage along with 3000 servicemen going into action from the Army, the Navy and the Air Force. Through her photographs and her character sketches, we come to know the backgrounds, accomplishments, and hopes of the men aboard as well as their boredom, their griping and their humor; and we are well aware of the way their pent up emotions increase the tension as the ship nears its destination.

Paul Gallico's latest book, **Trial by Terror**, though entirely fictional, catches our interest because it is based on an experience similar to that of Mr. Robert Vogeler. The combination of adventure and suspense, combined with what we know to be truly harrowing and grisly torture, leading up to a "confession," is very realistically portrayed.

Former Hospital CO Promoted to RADM

Mrs. Gillett gives her husband a congratulatory kiss upon pinning the twin stars on her husband's collar.

Ceremonies at Pacific Fleet headquarters on April 30, 1952, honored the former Commanding Officer of the Naval Hospital here, CAPT Robert M. Gillett, MC, USN, upon his promotion to the rank of Rear Admiral.

RADM Gillett was the CO of the hospital from March 1, 1950, until July 16, 1951, when he was relieved by the present Commanding Officer, CAPT B. W. Hogan. From here the new admiral went to the Far East for duty.

Attending the ceremonies honoring the new admiral were numerous high-ranking officers, but perhaps the proudest of all was his wife, Mrs. Margaret Ann Gillett, who had the honor of pinning the twin stars on his collar and giving him a warm congratulatory kiss.

Admiral Gillett recently reported to Hawaii for duty as Fleet Medical Officer, Pacific and U.S. Pacific Fleet, and Medical Officer, Joint Staff, Commander in Chief, Pacific.

The new two-star flag officer reported to CinPac from the Far East where he was staff Medical Officer for the Commander, Naval Forces, Far East.

Intern Class of 18 Graduating in June

First row (l. to r.): LTJG D. C. Tipp, LTJG J. F. Bartlett, LTJG J. H. Simms, CAPT B. W. Hogan, Commanding Officer of the Naval Hospital, LTJG H. J. Pinsky, and LTJG R. L. Krichmar.

Second row: LTJG C. M. Geyer, LTJG O. C. Peck, LTJG W. L. Padgett, LTJG T. S. Johnson, and LTJG A. Kiel.

Third row: LTJG P. M. Lucas, LTJG E. S. Witkowski, LTJG O. Miller, and LTJG T. F. McGuire.

Fourth row: LTJG B. M. Davis, LTJG H. J. Seale, and LTJG J. C. Jones.

Not in the picture is LTJG MacDonald who was on the sick list when this picture was taken.

Representing the nation's leading medical schools, 18 interns will receive instruction at this hospital will graduate on June 30.

Since it convened last July 1, the class has undergone a strict, steady and practical work schedule which afforded the doctors complete knowledge of what the Navy demands of its medical doctors.

Gildersleeve Irks Local Gildersleeve

The naming of radio characters for many of us holds little or no significance, but in hundreds of American homes one night each week, ears perk up, pulses beat faster, and all household chores come to a standstill as the introductory laugh of one of the top favorite comedians greets the listening audience.

Yes, Americans love the character, "The Great Gildersleeve." Millions giggle as the play unfolds . . . Millions enjoy the rich, warm humor of the player and the comical but logical situations he must face.

One man, however, displays a talent for making himself scarce when the program is aired. He huddles into the corner, inserts the distal ends of his index fingers into his ears and tries to overcome the anxiety to grab the nearest axe and go into the wood-chopping business. But what is the reason for this attitude . . . why should one man display a desire to smash the set into a thousand splinters?

Perhaps Roger D. Gildersleeve, a student of the Physical Medicine School at this station, is justified in his thoughts. He recalls being told how his father and uncle were close friends of Don Quinn, playwright and creator of "The Great Gildersleeve," many years ago in Grand Rapids, Mich.

During those early years, writer Quinn showed an interest in playwriting and advanced through the stages until he became one of the top writers of radio comedy. Through the years, the name Gildersleeve remained dormant in his subconscious mind until one day when it burst forth and inspired the popular radio program.

While a hushed silence blankets the listeners in many homes, there in a corner we'll find Roger Gildersleeve with fists clenched and bloodshot eyes, staring at that diabolical monstrosity . . . the radio.

During their studies of medicine the doctors were given specific courses in cardiology, contagious diseases, chest diseases, dermatology, and general medicine.

In the operating room, the doctors have been exploring the mysteries of such fields as plastic surgery, neuro-surgical measures, anesthesia, general surgical procedures, and dependent's surgery.

Pediatrics, neuropsychiatric studies, EENT, and G.U. problems are carefully defined and taught.

Intensive training in laboratory techniques affords the officers a knowledge of the potentialities of laboratory examinations and the aid that laboratories give in diagnostic problems.

Having had duty during the period of WWII, many of the interns left the services to resume their courses of studies in various colleges. Among the members of the graduating class are former line officers, several former enlisted personnel who held ratings of Petty Officer 3c in the Hospital Corps and ex-pilots.

The Army is represented by an intern who served during previous years, and has accepted his rank in the Navy.

Destined to serve the Navy Medical Corps in points throughout the world, one doctor will serve on board the USS Coral Sea CVB-43, and another will travel to Bremerhaven, Germany.

Hospitals throughout the States will use the talents of these men with orders to Texas, Great Lakes, Corona, Coronado, San Diego, and San Francisco.

Dispensaries and Naval Air Stations in Oregon, Oklahoma, New Orleans, Kansas, and Virginia will be the next duty stations for several of the young MDs.

Asked how he compares serving internships in the Navy with that of civilian hospitals, one doctor explained, "Internship, especially at this hospital, has been excellent under the masterful supervision of our superiors. The practice which we get is exceptional."

Coach's Corner

Standing around the first tee last Sunday brought to mind a line by Will the Bard, "Night's candles are burnt out, and jocund day stands tippling on the misty mountaintops." The inner shrine of colors was present in all its glory as the boys lined up to tee off. Quite apart from a consideration of the sources of color and of its component parts, its properties and dimensions, is the question of the effects that different colors exert upon our feelings and emotions.

All people react to color, degree or reaction varies, for some people are more sensitive to color than others. Color has power to attract attention, to cheer, to subdue and stimulate emotion. Each color has its own psychological attributes.

Yellow, red, and blue are the three elementary colors, each with a different effect upon our emotions: Yellow, the symbol of the sun with its power to dispel gloom, the jocund jonquils alongside the putting green; red, the symbol of action, courage and warmth; blue, cold, quiet and reserved. So much for emotions concomitant with color.

The question is raised how does the spectrum affect propulsion of a golf ball, an inanimate mass of gutta-percha. William Downing, the club professional, sporting golden slacks, blue suede shoes and a claret shirt... Doug "Cyclopropane" Giorgio in turquoise slacks, matching shirt... Chief Jettied a splash of forest green... Jack "Tientsin" Atkins in Harbin slacks... Loughlin Johnson, a clothes horse, in oyster white slacks, three thorns off Diamond Head shirt, black and white saddles... Billie B. in blue and white spectators, blue shorts, chartreuse shirt and matching cap... Earl Evans in grey slacks, burgundy wine shirt... guess it all adds up, the aforementioned gentry can smote the pellet.

Last Thursday night, the prescription counter boys took the measure of Cardiology, 21-3, featured by a strikeout and home run all wrapped up in one package. Albright, 1,400,000 grains of avoirdupois, took a three run at the plate, the Card catcher dropped the horsehide on the third strike... Mr. A. lit out for first, catcher made small overthrow of the ball, the ball still within the foul line... hasty retrieving combined with A's sprightly mincing along the basepath all adds up one home run and heads-up ball by the compounders.

CDR Russ Taylor mustered some thirty rooters, turbulent vocalists and all, along the sidelines to hand the Naval Hospital Doctors their first defeat with the scalpel wielders pulling up on the short end of a count. The assigned arbiters had their hands full with this one, in a hotly played contest there are always some homespun interpretations the book.

Clay Sikes, guardian of the initial canvas for the Doctors, suffered a fractured metacarpal, his many friends wish him a speedy recovery. Cowbird Peck, moundsman for the Hippocrates clan, acquired a new handle from the sidelines, that of Noodlearn, despite the vociferous cries from the bleachers, good ole Snowbird retained his usual urbanity. Cornell Brothers, the Center's finest all-round athlete, is handling the ball in big league style during the week and, on Sundays, raps the left field fence with regularity when sampling the deliveries of Ace Miller, Mike Frommelt, Postal Porter, Almy and Burhead Locke of the Center manhandles.

The girl's softball team is rounding into fine shape under the tutelage of the well-known intramural hoopster, "Feed-me" Gutekunst. Dick tutored the girls to their first win over the Fort Meade contingent with Crouch of basketball fame holding down the first sack, Doris Salisy on second, cavorting in the short-patch is Mary Lou Cox, currently gendarme of the Waves Quarters, Helen "Rifle-Arm" Jarvi roams terfield, Marsha Scott scampers alongside the right foul line, Carlson badly forward in casaba time, handles the slants of Margaret McEllison Bramlet, all nifty twirlers from off the mound.

A favorite game when Jiggs Canada, who never two-putts; Cathode who crunches the ball off the tee, Earl Evans, who is as adept and the creeping bent as when he hovered over the pigskin for Tulane, Steve-Mills, who scores well when the top is down, is SYNDICATE. Point to low ball on each hole. If low ball is tied by two or more, no point is won, even though remaining member or members of some took many more strokes. Cumulative Syndicates is the same game, except that points not won on tied holes carry forward and go to the first player to win a low ball. Thus a player may not have been a winner to the tying on two consecutive holes, yet on the third hole have ball and thus win the points of all three holes.

Sam Snead has this to say about playing a ball out of water, and I am king of a shot I saw last season on number four by Sweet-Swinging Sam King, "If your ball is lying in water, you have the choice of playing it from there or picking it out of the water at a loss of one stroke. Danger of playing from moving water is the possibility of your ball swinging while you are swinging down on it. For this reason I recommend the penalty stroke and obtaining a normal lie rather than to chance a futile swings attempting to hit a moving object.

When the ball lies in quiet water, your problem is whether or not ball is lying too deep in the water to risk playing it. Keeping in mind the picture the water may give you regarding the ball's position, it is better here also to accept your penalty stroke and lift the ball out of the water. If you decide to play the ball anyway, approach the ball as you would a buried sand trap lie.

"Open the stance and the blade of the club—a No. 9 iron or a sand wedge—strike only slightly behind the ball. You may have to remove shoes, socks and wade into the water to take your stance for this, but what is that to a golfer intent on saving a stroke. When the ball is in casual water (a temporary accumulation of water not recognized as a permanent part of the hazard) in a trap it must be played from where it lies or lifted under penalty. If the ball is lying in casual water on the green or on the green, the rules allow you to move the ball to any ground without penalty but not nearer the hole.

"The same rule applies when your stance would have to be taken in or through the green (through the green is the whole area of the hole except: Teeing ground, putting green of the hole being played and hazards on the course) or on the green. The ball may be dropped without penalty, but not nearer the hole."

Can recall caddying for Charley Ferrerra of San Francisco, twice national public links champion, in the finals of the California State at Pebble Beach. On one par three, there is about a 175-yd. carry-over the green, Charley misjudged the wind, the ball went into the ocean, he waded down to the beach, waited for the ball to float in and smacked the green stiff to the pin. Lawson Little repeated the same shot a later, guess it's all in how you do it.

Now, as it has in the past, the Special Services Department is making arrangements for a tennis tournament.

Planned for the second or third week during the month of June, the tournament will get underway for interested sportsmen.

The type of tournament will depend largely upon the interest shown by personnel.

For more complete details, call Special Services Department, Ext. 672.

NMS Tackles Docs; NH MCs Drop 2 to 1

Thursday, the 15th of May, was pitcher's day in the intramurals with both fields showing some of the tightest ball seen this season.

On the first diamond, Main Quarters and Dental squared off with Peters on the mound for Bldg. 12 and Purser toeing the rubber for the Extractors.

With Peters allowing only three up in the first five innings, Dental School was kept scoreless until the sixth and the seventh when Perry and Hopkins cut the diamond for Dental's only two.

With Albrecht, Murray, and McDevont each stepping across home for Main Quarters taking the final score to three and two for the lads in Barracks 12, Peters walked away with another win.

On the second field, Naval Doctors lost their first one against NMS with Paterson the winning pitcher and Peck taking his first loss.

Tied at one-one in the fourth, the game went until the eighth when Paterson, working the diamond like he had worked the mound, in the top of the eighth, crossed home to make the game two-one for Med School.

In the bottom of the eighth the doctors came up three times and popped out the three times, leaving the score at two and one with Med School dumping the Medics from the 1,000 box.

Navy Holds 3 Berths On 'Meet the Champ'

(by Armed Forces Press Service)

Navy boxers dominate the championship picture midway through the second 13-week "Meet the Champ" series on television. Three seamen hold titles in the eight weight divisions. The Army and Air Force each are represented by two champions and the Marines have one.

The current champions include A/3 Jesse Herrera, USAF, flyweight; SA Milton Hanson, USN, San Diego, Calif., bantamweight; A/3 Al Coleman, USAF, featherweight; Cpl. Thomas Smith, USA, lightweight; SN Bill Hartman, USN, San Diego, Calif., welterweight; Cpl. Fleming Butler, USA, middleweight; Sgt. Eldridge Thompson, USMC, Quantico, Va., light heavyweight; BM1 Kirby Seals, USN, Coronado, NAS, Calif., heavyweight.

ECG, X-ray Meet; One, Nothing Game

Friday, the 16th, saw tight ball played on Field two when the ECG Techs met the X-ray specialists.

With Skordinski on the mound for the Cardiology team, the heart specialists kept the opposition scoreless, picking up a single themselves in the second to take the game 1-0.

Cardiology ran into trouble in the second when, through two errors on centerfield and third, Williams and Gibbs of X-ray both made bases.

Williams was put out on second with an assist from Martin in left field while Gibbs was stranded on second at the end of the inning.

Cardiology Starts Climbing Win Column

Kenneth Swinsford, Cardiology's first-baseman, brings in the first run in the Lab. 18-Cardiology game.

Collegiate Sports

(By Armed Forces Press Service)

Big Ten baseball is well represented in the major leagues this season. Philadelphia's Robin Roberts (Michigan), Fred Taylor of Detroit (Ohio State), Howie Judson, Chicago White Sox (Illinois), and the Giant's Dick Wakefield (Michigan), are all graduates of the conference's loop.

Expert coaching pays off: In his first year of varsity polevaulting, Van Zimmerman of Pennsylvania has achieved stardom. He's tops on the Penn squad, and gives credit for his success to assistant coach A. Raymond (Boo) Morcom, who competed in the 1948 Olympics as top American in the event.

The great closing play of Billy Maxwell (North Texas State College) helped him retain the college golf title this year. Teammate Buster Reed and Hillman Robbins of Memphis State College had led the field by a wide margin, but Maxwell's 70 in the final round gave him the winning 283 total... Navy golfers under coach Bob Williams will try to keep a record going this season—they haven't lost a match to Army in 23 years.

Karl Kluckhohn, Colgate's outstanding pass-receiver in football, high-scoring forward in basketball and team captain and leading hitter of the baseball squad, receives his ninth athletic letter this spring.

Michigan State's Dale Thomas upset Henry Wittenberg, New York policeman, to gain a place on the Olympic Wrestling Team. He was the first to defeat Wittenberg in 15 years.

San Francisco's Ollie Matson and Val Joe Walker of Southern Methodist aren't content with football headlines. They've been capturing the track and field spotlight in recent weeks. Matson, set for an Olympic bid, won the 100- and 220-yard dash in California's biggest college meet this spring. Walker's time in the 120-yard high hurdles have earned him great respect this season.

With Cardiology sporting a new moundsman, Beckman from O.R., the heart technicians have begun their climb from the bottom of the ladder.

On the 14th, the ECG Techs played the Lab Students and picked up their first win in five starts.

The final score of the game was six-one with Cardiology picking up two in the first and four in the second while the microscope specialists could only secure a single in the third.

SOFTBALL STANDINGS (As of May 21)

Team	W.	L.	Pct.
NH Doctors	5	1	.833
NMS	5	1	.833
NH Corpsmen	4	1	.800
NSHA	4	1	.800
Dental School	4	2	.666
Cardiology	2	4	.333
Research	1	3	.250
NNMC	1	4	.200
Lab. 18	1	5	.166
X-ray	1	6	.142

RESULTS

NH Corpsmen, 13; NNMC, 5.
NH Doctors, 6; Lab. 18, 5.
Dental School, 18; X-ray, 3.
NSHA, 18; Lab. 18, 1.
Dental School, 11; Research, 1.
NMS, 9; X-ray, 3.
NMS, 21; Cardiology, 3.
NH Doctors, 24; X-ray, 5.
Cardiology, 6; Lab. 18, 1.
NH Corpsmen, 3; Dental School, 2.
NMS, 2; NH Doctors, 1.
NSHA, 6; NNMC, 2.
Cardiology, 1; X-ray, 0.

NSHA Ties for 2nd With 4 and 1 Score

With Pergolizzi, NSHA's pitcher, fanning seven NNMCites in the game of the 16th, the lads from Barracks 112 took their fourth loss in five games while the administration chiefs picked up their fourth win with one down, tying them with the Bldg. 12 and Dental School teams.

Klein, NSHA's second baseman, crossed the home rubber twice for the 141 team while Fast, first baseman; Anderson, who covers third, and Tucker, left field, each chalked up a single in the R. column.

Intramural Softball Schedule . . .

June 3	Cardiology vs. Research	1
June 4	Lab. 18 vs. Dental School	1

Naval Medical School

(Continued from Page Three)

Hospital are within the Naval Medical School. These laboratories also serve as a court of last resort for the Navy at large wherever a local laboratory of a naval hospital, dispensary or ship desires assistance.

The general laboratories include facilities of pathology, parasitology, hematology, serology, bacteriology, entomology, epidemiology, physiological chemistry, general chemistry, pharmacy, blood collecting, and blood bank.

The morgue for the Naval Hospital at Bethesda, is a facility of the Naval Medical School, and all autopsies are performed by the School's pathologists. Toxicological examinations for the entire Navy are made upon request. The School prepares for the naval service at large certain biologicals and chemicals such as Kahn Antigen, diagnostic bacterial antigens and colloidal gold solution.

The Edward Rhodes Stitt Library of the Naval Medical School is the central library for the Naval Medical Department and contains approximately 36,000 medical books, journals and pamphlets.

Since the early, or first beginnings, of the U. S. Navy a need for systematic instruction for officers for the Medical Corps has been felt. On May 10, 1823, Thomas Harris, Second Chief of the Bureau of Medicine and Surgery, said in a letter to the Secretary of the Navy, "Many of the Surgeon's Mates, as well as younger Surgeons of the Navy, manifest at present a very laudable anxiety to acquire an intimate knowledge of their profession."

"For this purpose, they are desirous that you would afford such of them as are not on public duty, an opportunity of hearing lectures on nautical medicine and military surgery, as well as of pursuing a course of dissections under the superintendence of some one, whom you deem competent for this duty."

It was thus recognized very early, by the medical officers themselves, that medicine and surgery in the Navy presented many special aspects for which they were not completely and sufficiently prepared by their regular civil medical training.

This letter of 1823 by Thomas Harris resulted in the establishment, at Philadelphia, of a school for junior naval medical officers. This school operated continuously for a period of 20 years with an annual budget of about \$400. The school was closed in 1843 because the Secretary of the Navy found no legal authority permitting this expenditure.

During the period from 1843 to 1874, the Chiefs of the Bureau of Medicine and Surgery and other naval medical officers continued recommending that schools or the specialized instruction of naval medical officers be established. No new developments occurred, however, until 1877 when Surgeon General William Grier inaugurated a course of instruction for junior medical officers of the Navy at the U. S. Naval Hospital, Brooklyn, N. Y.

This course, consisting of lectures in military surgery and naval hygiene, was conducted through the years 1877 and 1878. The course was discontinued and no systematic instruction of naval medical officers was revived until 1893.

In 1893, Surgeon General J. R. Tyron directed the establishment, at the U. S. Naval Hospital, Brooklyn, N. Y., of a Department of Instruction, joined to the U. S. Naval Laboratory located there. The basic purpose of this department was to provide such instruction as might be necessary to familiarize assistant surgeons with the duties of medical officers afloat and ashore.

This was a 3-month course and included the following subjects: Chemistry—general, analytical and organic; hygiene and sanitary science; microscopy and microbiology; military surgery and operative work; clinical medicine and hospital work; construction and ventilation of modern warships; examination of recruits; lifesaving methods; Navy regulations; Navy ration; hospital fund; pension fund; keeping medical records at hospitals, on board vessels of war; and blank forms pertaining to the Bureau of Medicine and Surgery.

The U. S. Naval Laboratory and Department of Instruction functioned until 1898 when it was discontinued due to the outbreak of the Spanish-American War which created an urgent need for medical officers in the field. This factor depleted the instruction staff of the school which was composed entirely of naval medical officers on duty in the area of Brooklyn, N. Y.

The next action toward the establishment of a naval medical school occurred in 1902. Through the efforts of Surgeon General P. M. Rixey, the medical school was established upon the foundation upon which it is operating and working today.

The school was housed in the building formerly occupied by the Naval Observatory located at 23rd and E St. N.W. The school later was designed as the United States Naval Medical School.

When the medical school was reopened in Washington, D. C., the Department of Instruction in Brooklyn was closed, and the Naval Examining Boards were transferred to Washington, D. C.; so that some of the members of the Boards could serve on the faculty of the School. Also, upon moving to Washington, the School was given an instruction staff of its own.

In addition, the School began to utilize the service of distinguished lecturers and consultants from other Government departments and from civilian life. This practice has survived to the present time. Thus the faculty of the School is composed of its own instruction staff, naval medical officers stationed in the local area, and lecturers and consultants from other Government agencies and from civilian life.

Since the establishment of the United States Naval Medical School in 1902, both medical officers and enlisted men have been trained for their duties with the Medical Department, U. S. Navy. Many valuable contributions to medical research and literature have been made as a result of the work in the School.

Although it was feared during the World War that the functions of the United States Medical School would be interrupted, as happened during the Spanish-American War, this did not occur. Actually the instruction work of the School increased and it was the base for the development of the highly successful epidemiological and sanitary units of the naval medical department.

It was during the World War, in 1917, that the School began to provide instruction for enlisted men as well as medical officers. The School trains them as technicians in many fields. In addition, Navy nurses have also completed training as technicians in some departments of the School. The instruction work of the United States Naval Medical School also increased heavily in World War II, and it operated at peak during the whole period of that war.

It was during World War II, in 1942, upon completion of the National Naval Medical Center, Bethesda, Md., that the School was moved to its present location and more modern quarters at the Center. It now operates as a unit of NNMC.

NMRI:

Local Pub Dancers Also from NMRI?

by R. Conaway

I've been hearing so much talk about a "port list" that even I am getting curious. What gives?

The cigars are being passed around the Institute again. This time the proud fathers are Chief T. E. Stevenson of Rad. Tech. and HM3 Donald J. Skelly of Pathology Division. I hear the layettes in both cases are pink.

Don Heye's new nickname seems to be "The Squatter." It might be interesting to ask him how he came by it.

Famous last words: "I can't get the pig Willie; let's go get a beer." So quote Hambone! Along the same lines comes this bit of information. "I'm on the wagon for keeps this time," says Vic Carn-cross. Tongue in cheek I presume.

A certain pair from NMRI were seen doing a solo (or should I say duet) dance at Club Kavakos. Holding down two jobs huh!

Among the newcomers to NMRI this month we find a lone Wave, Peggy Igou from NMS. Also from Med School, we have N. D. Park, R. R. Desmarias, and R. W. Trimmer. LT J. J. Conger, MSC, reported aboard from the Naval Academy, Annapolis. Welcome—one and all.

Enroute to Camp Pendleton for further assignment is Chuck Nethers, and to Oceanside, California goes Ed Harvey. Chief L. J. Louivere leaves for duty aboard the USS Deuel and T. E. Pasquith for duty aboard the USS Midway.

So now I'll take my leave; after all it's 1635!

Teaching Students Learn Instructing

Chief Oxford gives a sample lecture on Malaria to the students of NSHA.

In the Navy with increased emphasis being placed upon the ability to instruct and explain equipment and methods, NSHA has made the course "Instruction in Teaching Methods" an intricate part of the MAT classes.

Under the direction of LT W. L. G. Cartier, the students of NSHA receive 40 hours of instruction in this section of the curriculum and during this time each student must give two original 20-minute lectures before the group. The students are encouraged to present these sample lectures on a subject with which they are familiar.

Some of the lectures recently presented by the students to the students were "Malaria Control," by Chief P. H. Oxford; "Naval Correspondence," by Chief C. A. Thompson, and "NavMed Forms S and T," by Chief J. H. Vinson.

"We've had it men—no food, no water, no air. rescue, and per diem orders ran out today!"

Dental Explorer

by C. Connor

Congratulations to Delores Ammott and Al Schneider on their recent engagement. True to tradition she will be a June bride. So, gals, if you want to take advantage of this being Leap Year, just take him for a stroll through Ship's Store. Those toasters will do it every time. (Won't they Delores?)

The crew in the record office have been running around in circles these days singing "Where or When." West is getting grey, Sullie is getting bald and Shirley is even working on an ulcer, all because some culprit is very busy working on a private filing system.

Well, looks like the Dental Dept. is batting 1,000 again in the baby department. It was a girl for the Batchelders and of course a bouncing baby boy for Stella and Jack Turan. Congratulations from all of us on the new arrivals. (P.S. The fathers are doing fine.)

Not to be outdone by Al Schneider, Dom Zaia also announced his recent engagement. (He's beautiful, he's engaged, he uses Sani-Flush.)

Welcome home to Mrs. Zemo of Room 128. Now we Waves can keep up with all the latest fashions for sure with all those gals in there.

Laugh of the week was when Hans Fetting came up to the desk to inquire as to whether or not we thought he needed a haircut.

Dr. Chapman came up with a very candid statement when he announced that after a hard day at the office he feels like a "mole in a hole" coming up from below in Bldg. 122.

Just found out that the Goudys also have a new addition. She's sugar and spice and, as the saying goes, everything nice. Congrats are in order then for Mr. and Mrs. Goudy, too.

Man about town these days is our own Dr. Anderson who meanders in to see us every once in a while. I might add, looking better every time.

If perchance my face has been looking red lately it's all because of a trip I made recently to the Duplicating Dept. Let me add I made a very hasty retreat.

Former Mass. Lass Tops in Her Class

Holding the position as administrative assistant to the Administrative Officer of NNMC, Florence Ellen Gallagher, PN3, is well satisfied with the strides she has made in the Navy since her formal introduction over a year ago.

Endowed with the fine traits of enthusiasm, self-sufficiency, and generosity, Gallagher made her entrance into the world on April 2, 1930 in the town of Lowell, Mass.

The editors of the Lowell Sun, a newspaper of modest circulation, realizing that Gallagher possessed the ability of natural leadership and determination, placed her on their staff as a bookkeeper. Having prepared for this particular type of position at the Lowell Business College, she remained with the paper until Feb. 5, 1951.

Enlisting in the Navy at Boston, Mass., and confronted with a real strike, then in progress, Gallagher and other Waves were transferred via air to the Naval Training Center at Great Lakes, where she was introduced to the fundamentals of naval lore.

Accepting the role of Recruit Company Commander, Gallagher graduated as honor Wave of her company.

Determined to keep her youthful appearance, Gallagher finds many hours of enjoyment in golf, tennis, and swimming.

First Bronze Star to NNMN Nurse Goes to Mrs. Lange for Korean Duty

Lt. Comdr. Estelle E. Kalnoske Lange, NC, USN, assistant chief nurse of the Naval Hospital here, is the first NNMN nurse to receive the Bronze Star Medal for duties off Korea. R. Adm. Bertram Groesbeck Jr. presented the award May 20.

Mrs. Lange served as chief nurse of the USS *Consolation* for 22 months. With 29 other nurses under her supervision she performed both administrative and nursing duties, which often entailed long hours of work beyond that normally expected.

Chief Samuel Huff Gets Ensign Stripe

Ens. S. L. Huff

Formerly a chief hospital corpsman, Samuel L. Huff, Ensign, MSC, N, has recently received his officer's commission in the U. S. Navy.

Prior to his enlistment in the Navy, Ens. Huff was graduated from Elgin High School, Elgin, Ill., and was employed by Brown's Rest Home, Austin, Tex. Entering the Naval service Nov. 1939, he received his recruit rating at the U.S. Naval Training Center, San Diego, Calif.

During his Navy career, thus far, Ensign Huff has been awarded the Good Conduct Medal with five stars, the American Defense Medal, the Asiatic-Pacific Ribbon, and the European-African Victory Medal.

Aside from his service in the Continental United States, Ensign Huff has been stationed at Pearl Harbor where he was with a medical repair unit at Tripler General Hospital. He was aboard the USS *Trinidad* at the time of its sinking in the Coral Sea, after which he was assigned to the escort carrier *Block Island*.

His next assignment was aboard the destroyer *Endicott* during the war. It was assigned to escort duty in the Yalta Conference, and during its participation in the Normandy invasion of northern France.

Having graduated from Hospital Administration School, Mr. Huff also graduated from the Armed Services Administration Course, St. Louis, Mo. He is presently attached to the Medical Equipment Repair Unit here, and Ensign Huff resides with Mrs. Huff and their three children in Silver Spring.

She was in the Korean theater during the Inchon invasion, the North Korean aggression, and the Chinese Communist aggression. The *Consolation* stayed close in to receive the patients. Mrs. Lange recalls how they were often beneath the line of fire of the cruisers and battleships bombarding the shore.

The tension was relieved occasionally when the ship would deliver patients to Japan. Then the nurses would have a few days to relax in the rest camps there.

Remarking that she "loves to go to sea," the nurse told how she had been requesting sea duty since 1935 when she entered the Nurse

Medal Winner

Lt. Comdr. E. E. K. Lange

Corps. Although this was her first ship assignment, she had already seen duty in Cuba, Guam and Saipan.

Speaking of the Korean duty, she said, "I was proud to be a member of a team that contributed so much to so many in time of need."

Mrs. Lange has been at NNMN since May 1951. She was supervisor of the Outpatient Clinic in ward 130 before becoming assistant chief nurse in December 1951. She resides with her husband, Capt. George A. Lange, USN, in Washington, D. C. Capt. Lange is the commanding officer of the USS *Glynn*.

FMF Corpsman Dies In Saving Others; Wins Medal of Honor

Richard David DeWert, hospitalman, USN, of Taunton, Mass., was awarded a Medal of Honor posthumously for "conspicuous gallantry and intrepidity" in a ceremony at the Pentagon on May 27, 1952.

Secretary of the Navy Dan A. Kimball presented the award to the hero's mother, Mrs. Evelyn DeWert Jones, who resides at Seward, N. Y.

On Apr. 5, 1951, while serving with "D" Company, 2nd Battalion, 7th Regiment of the First Marine Division, the 19-year-old medical corpsman exposed himself repeatedly to rifle fire while aiding four wounded Marines. The company was fighting northeast of Chunchon. Although twice wounded, he refused medical aid.

Furnishing an eye-witness account of the incident Captain Alvin F. Mackin, USMC, commander of "D" Company, said:

"Our company was advancing up a ridge. We were hit by enemy fire and our fire team was sent to make contact with another Marine company on our flanks. We were pinned down by heavy automatic fire.

"One man was seriously wounded and lay in an exposed position. DeWert, with complete disregard for his own safety and intense fire, went to the wounded man's aid. He administered aid, then dragged him to a small depression in the ground.

"Another man was wounded and again he went forward without regard for his own safety. Upon administering aid to the second wounded man, he backed out on the open ridge and helped to bring back the first man. While coming off the ridge with him, he himself was wounded in the leg.

"Then another man was hit out on the ridge and DeWert went out to him. Upon reaching this man he found that he was already dead. It was while checking this man that he was wounded for a second time.

"A fourth cry came from another casualty. Despite his wounds and the heavy enemy fire DeWert went to his aid. While he was trying to administer to this man, DeWert was killed."

Hospitalman DeWert, born in Taunton, Nov. 17, 1931, was a member of the Taunton High School Cadet Corps prior to his entry into service in December 1948.

Following recruit training, he was assigned to the Hospital Corps School, Great Lakes, Ill. and subsequently to the U.S. Naval Hospital, Portsmouth, Va. He served with the Fleet Marine Force, Pacific, from July 28, 1950, until the time of his death in Korea.

Capt. Mitchell Leaving Today For Pearl Harbor Assignment

Capt. Louis D. Mitchell Jr., DC, USN, commanding officer of the Naval Dental School since Feb. 14, 1948, was relieved of his command this morning at 0915 in the change of command ceremonies outside the main entrance to the Dental School.

Capt. R. W. Taylor, DC, USN, the new commanding officer of NDS, reported in from USNH, San Diego, where he held the position of Chief, Dental Service.

Capt. Mitchell will report to Pearl Harbor, T. H., where he will take

Bethesda's New USO Holds Open House Tomorrow Evening

Bethesda's new USO will hold a community open house tomorrow night, June 17, from 2000 to 2300 at the Bethesda "Y" Cottage, 4911 Moorland Lane, Bethesda.

All nearby servicemen and women are invited to drop in during the evening to inspect the new house, and become acquainted with their nearest "home away from home." R. Adm. and Mrs. Groesbeck will be among the guests of honor for the occasion.

The Bethesda USO occupies a 13-room house one block off Old Georgetown Road. It is open from 1000 to 2300 Sunday, Monday, Tuesday, Wednesday and Thursday; and from 1000 to 1930 on Friday and Saturday.

Information service, lounge, television, kitchen facilities, dancing, games, cards, reading room, records, and friendly senior and junior hostesses are there to make a real home for servicemen and their wives.

Fishing trips, week-end camping trips, parties, picnics, and dances are among the projects now being planned by the newly formed program committee.

The regular Thursday evening open house for June 19 is to be a particularly gala occasion since it will be the first in the new USO. All the old junior hostesses will be back in full force, and a lot of new ones will be ready for a turn on the dance floor.

The "cook your own" Sunday breakfasts are back too, and servicemen with wives are particularly interested in the regular Sunday evening suppers with following program and informal dancing.

Hobby classes are being planned, too, and if you want to learn to play bridge or how to wield a camera, let the USO know.

Driver to Calif. Sought

A licensed driver is needed to drive a 1951 Plymouth club coupe from Arlington, Va., to Coronado, Calif. The car will be available after July 1, and must be delivered to Coronado not later than August.

Anyone interested may contact Comdr. A. Konigsberg, SC, USN, District Supply Office, PRNC, Bldg. 200, Naval Gun Factory. Telephone: FRanklin 5700 or Code 142, Ext. 535.

Hawaii Bound

Capt. L. D. Mitchell

over command of the Naval Dental Clinic with additional duty on the staff of the Commander, Naval Base.

During World War II, Capt. Mitchell served as Fleet Dental Officer, Seventh Fleet (Southwest Pacific). He received a Letter of Commendation from the Commander, Seventh Fleet, for his outstanding and heroic achievements as Fleet Dental Officer.

He is entitled to wear the American Defense Medal with Fleet Clasp, American Theater, Asiatic-Pacific Theater, World War II Victory Medals and the Philippine Liberation Ribbon with Star.

Born in La Grange, Ga., Dr. Mitchell received his D.D.S. in 1926 from Tulane University. He entered the Naval Dental Corps in 1927. He has completed postgraduate courses at Georgetown University, Columbia University and the Mayo Foundation.

Commands Giving Exams For Officer Candidates

Nomination of enlisted personnel to take the Navy-wide preliminary examination for entrance to the Naval Preparatory School as candidates for appointment to the Naval Academy is now underway in all commands, the Navy Department announced. The tests will be given July 7.

Candidates are selected and examined according to provisions contained in BuPers Manual, 1948 and the Marine Corps General Order 40.

Ready for Diplomas

TOMORROW'S GRADUATES and members of NSHA staff are, front row: CWOHC R. C. Meyers Jr., Finance instructor; Lt. E. F. Hickey, Food Services Div. instructor; Lt. Comdr. J. M. Rutter, Head, Finance Div.; Comdr. M. E. Zimmerman, Commanding Officer; Lt. Comdr. G. W. Wiese, Executive Officer; Lt. Comdr. H. H. Laramore, Head, Personnel-Records Div.; Lt. W. L. G. Cartier Jr., Head, Personnel Management Div.; and CWOHC F. C. Barbee, Head, Maintenance Div.

Second row: CWOHC N. J. McCurdy, Lt. J. E. Thompson, Lt. A. C. Pullum, Ens. T. N. Scales Jr., CWO L. E. Stamp, Ens. D. E. Feuquay, Ens. E. M. Nicholson, Lt. R. M. Ware, Lt. J. J. Sarsfield, and Lt. L. W. Miller. Third Row: CWOHC R. H. Boyd, Ens. C. A. Carr Jr., Ens. W. G. Marsh Jr., Ens. R. R. Rever, Ens. L. M. Biggs, Ens. R. J. Hanavan, CWOHC K. P. Murphy, Lt. W. R. Cox, Lt. F. H. Belknap, Ens. C. W. Boggs, and Lt. F. A. Bruce.

NSHA Graduates 23 Officers Tomorrow Upon Completion of 10 Months Training

Twenty-two Medical Service Corps and Hospital Corps officers and one medical officer from the Ecuadorian Navy will graduate from the Naval School of Hospital Administration on June 17. Graduation ceremonies will take place in the auditorium of building 141 at 0930.

Diaper Derby

May 10—**Jacquelyn Christine Gaudy**, 7 lbs., 11½ oz., daughter of Jack Wayne, DN, USN, attached to NDS.

May 18—**James Robert Schmit**, 8 lbs., 13 oz., son of Robert W. Schmit, HM3, Pathology lab, NMS.

May 22—**John Michael May**, 8 lbs., 4 oz., son of Carl Russell May, HMC, of NSHA.

May 26—**Patricia Jeanne MacAulay**, 7 lbs., 9 oz., daughter of Lt. Francis X. MacAulay, MC, of NMS.

May 29—**Richard Lee Ricketts**, 8 lbs., 7 oz., son of John Wesley Ricketts, HMC, of NMS X-ray Department staff.

May 29—**Nancy Jane Cline**, 5 lbs., 9½ oz., daughter of John Curtis Cline, HM3, of NMS.

May 30—**Craig Carnell Chapman**, 8 lbs., 6 oz., son of Lt. Comdr. Judge Carnell Chapman, DC, of NDS.

June 1—**Richard Logan Porter**, 7 lbs., 5 oz., son of Richard Forrest Porter, HM3, of the post office staff, NNMIC.

June 4—**Rosalita Francesca D'Angelis**, 7 lbs., 6 oz., daughter of Frank D'Angelis, HN, ward 103.

June 5—**Linda Susan O'Meara**, 6 lbs., 11 oz., daughter of Ltjg Clement S. O'Meara, DC, USNR of NDS.

Basically the naval aspects of the curriculum included management training in finance, maintenance, security, food service, special services, administration, personnel and personnel records, industrial safety engineering, disaster relief planning, commercial law, nutrition, and the Uniform Code of Military Justice.

Civilian members of the faculty aided materially in the training of these officers. Their services were concentrated primarily on the academic phases of instruction, such as the Principles of Accounting, Business English and Report Writing, Public Speaking, Psychology of Teaching, and Personnel Administration.

After graduation, the officers will undergo two weeks of instruction in Biological and Chemical Warfare and Atomic Defense at the Naval Unit, Chemical Corps School, Fort McClellan, Ala. From there they will go to the Marine Barracks, Camp Lejeune, N. C., for four weeks' instruction in Field Medicine at the Field Medical Service School.

Former NEWS Editor Sees it First Hand

"Randy" Eide, HM1, former assistant editor of the NNMIC NEWS, is now attached to the 5th Marines in Korea. As a member of the staff here, Randy's favorite job was writing what he termed "Gung-Ho" stories of the corpsmen who had returned from Korea.

Last October Randy got his FMF orders and laughingly said, "Well, I guess I'll get a chance to see the action first hand now." He was right as shown by the following excerpt from one of his letters:

"On the night of Apr. 8-9, Item Co. made a raid on Taedaksan. It is an enemy held village 3000 meters to our front. In the ensuing action we suffered 2 killed and 23 wounded.

"Obos (Vic Obos, formerly attached to NNMIC) and yours truly collected some shrapnel. Ole 'Killah Obos' is on the hospital ship now. He got it in the ankles. Me, well mine was minor. It was four or five pieces in the arm. Pulled 'em out myself, dabbed it with iodine and right back to work."

In a more recent letter Randy reports that Obos came back to duty, but has now been transferred to the hospital in Japan as a patient again.

'Air' Conditioners are for the Birds' Say Members of Isotope Laboratory

Nature triumphed when science failed in the tracer room of radioisotope lab, ward 131. Early in May the crew noticed that the conditioning unit was acting strangely. Investigation disclosed a nest of five robin eggs.

When the plea sent out (NNMC NEWS, May 12) failed to produce any volunteer experienced hatchers, the eggs were sent up to the incubator in the urinalysis lab. They remained there for two weeks.

Meanwhile the isotope lab acquired an incubator of its own, and decided to reclaim the eggs. After three weeks of patient waiting, nothing happened. One of the eggs was broken and found to contain an embryo but no pulse.

Speculators could only conclude that perhaps the incubator in the urinalysis had been disconnected for cleaning. No one is quite sure what did happen, but the isotope crew thought they were to have no baby birds.

Well, there were no baby robins, but on June 3, five very healthy starlings were extracted from the same air conditioner in the tracing room. While everyone had been concentrating on the robins, Mother starling had quietly utilized the neglected nest and hatched her brood.

Right now, Martin Reder, HN, who was dubbed foster father of the robin eggs, is trying to find time to compose a letter to a little boy from Silver Spring. He received a letter printed on three pages of lined paper with letters one inch high which read:

"Dear Mr. Reder, I saw your picture in the Star. I took it to School and told my Second grade class what you are doing. We have an incubator at School too, only we are hatching chickens. They will hatch May 26. Will you write and tell me how long it will take robin

Playing Coy

ALMOST READY TO FLY—these two starlings were extracted from the air conditioner in the radioisotope lab where they hatched. Both showed nothing but contempt at the chance to be photographed and preferred to stare out of their temporary glass house.

eggs to hatch? Does the temperature in the incubator have to be the same as for hen eggs? How what will you feed the baby robins when they hatch. Some day we might have robin eggs to hatch and we want to know what we should do. Please write me soon. Yours truly,"

To Dad, on His Day

Let us pause a while to say,
Thank you Dad on Father's Day;
Thanks for all the things that you
Did to make our dreams come true.

Fishing trips and baseball games,
Christmas time electric trains;
Mending toys or drying tears,
Standing by us through the years.

Then when trouble came—and care,
You were always near us there;
Lending strength to ease our load,
Pointing to the brighter road.

Looking back on childhood days,
None can count the many ways
That you proved time without end,
To be not only Dad—but friend.

So we pause a while to say,
Thank you Dad on Father's Day;
May our children someday too,
Honor us as we do you.

—R. CONAWAY, NMRI

The Chaplain's Corner

by Chaplain Peter J. Marron

More Open for Business than Usual

Hit by bombs! Many a store in London in the old days put up the sign, "Open for business as usual." One store, blasted apart by a bomb, put up the waggish sign shown above. A brave jest, but with this truth in it: suffering does make us all "more open for business" with each other.

In the face of danger and suffering—mutually shared—beggars, bankers, cockney or king: all are just human beings, sharing one thing together: suffering. "It's not the bombs or guns that upset you," writes an air raid warden from Britain, "it's the loveliness of the people. Neighbors who have never exchanged a word now huddle together for warmth, pity and sympathy. I saw a pale-face boy of 18 with an old lady's head pillowed in his lap. He was stroking her hair. 'You know,' I asked, 'No, sir,' he replied, 'I don't know her.'"

If not bombs, it often takes sickness or death to bring out the richness in human hearts. For, when people share in suffering, they share down to heart of all sham, hypocrisy, pose, and are "more open for (God's) business" with each other.

Movie Star Comes A-visiting

MOVIE WAVE SALUTES the NNMC Waves as Esther Williams, in Washington for the premier of "Skirts Ahoy," visits here. (L. to R.): Esther Williams, Lt. C. Wilson; Lt. Comdr. F. S. Haslam; Joyce Crouch,

HN: Delores Schneider, DT3; Pat DeBerry, HMI; and Ethel Hammett, HA. Right: Cpl. Tommy Ray Skeeter, USMC, Korean veteran on ward 3-C, gets a cheerful hello from the beautiful Miss Williams.

Indefinite Underwater Submarine Trips Planned for 'Silent Service' in Future

(AFPS)—What will the submarine of the future be like? The imagination of man gropes in the dark pit of speculation. It does not extend itself beyond the limits of comfortable reality.

But the men behind the "silent service" quietly plot their course. Whatever the result, one thing is certain—the submarine of the future will be one of the most incredible contrivances ever perfected by the mind of man. Every development in atomic propulsion, guided missiles and electronics will be poured into its tight hull.

The snorkel or breathing tube which enabled one American sub to make a submerged run of 21 days and 5,000 miles may even be improved upon to make it possible for indefinite submersion. With the fuel problem solved by an atomic power plant and more space available on board for supplies, there is no predicting how long a sub will be able to operate without refueling.

As for weapons, new torpedoes might be developed that could track a ship from a distance of many miles and ensure a direct every time. The torpedo might be a speed of up to 80 knots and run on a ship's heat or magnetic. Guided missiles like the experimental "Loon" might become standard submarine weapons.

Even aircraft-carrying submarines are a possibility. The Japanese tried it and failed, but that was more than seven years ago. Submarines of this type might already be on American drawing boards.

As for its shape, submariners envision a submarine that looks like a hardtop and can cut through the water with all the maneuverability of a shark. Size and weight will be no object if the power is available to propel it.

America's best naval brains race against time to produce these fantastic denizens of the deep.

Want to Bet?

(AFPS)—The familiar challenge "want to bet?" goes back at least to the days of the Roman gladiators when "Julius the Lion" was running the third at the Coliseum with support of much Roman currency.

Pancho Villa, the Mexican revolutionist, once wagered war correspondent Floyd Gibbons that he could make the front pages of every New York newspaper. Pancho then staged a battle. But he lost his bet. He had overlooked the World Series, which committed his war to the inside pages.

A Harvard chemistry professor bet a friend during a presidential campaign that he would eat his shirt if his candidate didn't win. The professor lost, and paid his debt by dissolving his shirt in acid, neutralizing the acid and then spreading the solution on bread.

Not quite as scientific was the challenge made by "Titanic" Thompson, who bet a champion that he could throw a peanut over a high building. By pouring lead over the shell and letting it harden, he accomplished his boast.

A Frenchman named Jean de Gunther was once involved in a pistol duel with a German. After coolly surviving his opponent's first shot, de Gunther said to his foe: "I'll bet 10,000 francs I hit you between the eyes." His rival's seconds paid off the victorious Frenchman.

New Navy Exchange Still Adding Items For Better Service

The Navy Exchange Department, extending first consideration to the personnel on duty or hospitalized here will, in the near future, display many new items of interest for its customers.

Park picnics and beach outings this summer will be even more enjoyable with the new barbeque stands, ice cream freezers, and heavy portable coolers.

Sportsmen will find several new additions in the sporting section of the store—croquet sets and badminton games are on hand to offer hours of pleasure.

Photo developing kits, to afford the photographer the opportunity to develop and print his film, and screens to aid in the projection of movie film will provide more pleasure from this particular hobby. New cameras and equipment are on order for early display.

Platter fans are offered the finest selections for their money. New Decca and Hudson recording units have been ordered for sale.

For the quick-trippers or long distance travelers, new luggage pieces, moderately priced, are shown.

Featured in the store's clothing department are new sport shirts made by well known manufacturers. Men's and women's swim sets and new lounging robes will be found in the display cases.

Anticipated for this evening is the opening of the colorful dining room for your enjoyment. Plush, comfortable booths, good food expertly prepared, and the finest service available will offer you and your guests a wonderful adventure in evening pleasure.

Uniform Prices to Drop 15% in July; Basic Allowances to Suffer Cutback

(AFPS)—Beginning July 1, clothing prices for servicemen and women will decline about 15 per cent. With the price decline will come a similar dip in initial clothing allowances as well as monthly basic maintenance and standard maintenance allowances.

Formal Defense Department approval is expected shortly and the Services have already begun publishing new price lists. Basic maintenance allowances for all Services will drop from \$5.10 to \$4.20 per month.

Standard monthly allowances for both men and women will also decline. Women of all Services will receive \$6.00 per month where they formerly received \$7.20.

Enlisted men of the Navy and Air Force will receive \$6.00 where they formerly received \$7.20, but men of the Army and Marine Corps will receive \$5.40 where they formerly received \$6.60.

The Navy's initial issue value will decline from \$223.90 to \$182.25 and prices of various items will come down in some cases as much as 20 per cent. Peacoats will be reduced from \$32.00 to \$25.00, wool trousers from \$12.20 to \$8.80 and dress jumpers from \$12.50 to \$9.50.

The reason given by Defense Department officials for the decline in prices is the fact that in recent months there has been a sharp reduction in the price of wool imports.

News Shorts FROM THE Editor's Desk

Good Conduct Medals were awarded to Wilbert D. Tice, HM3 and Richard J. Kopp, HM3 last month. Both men are Korean veterans and are members of Lab 19, NMS.

Warrant Officer Rowe F. Christopher, HC, USN, was promoted to the rank of Chief Warrant Officer in May. Mr. Christopher serves as Safety Officer, Assistant Security Officer, and Investigating Officer for NNMC.

Comdr. L. A. Barnes, MSC, USN, relieved Comdr. H. C. Dudley, MSC, USN, as Head of the Allied Sciences Section, BuMed. Dr. Dudley, who has held this position for the past three years, expects to be transferred to the Radioisotope Laboratory at St. Albans sometime this month. Dr. Barnes, who is Head of the Bacteriology Division, will perform the duties of this new post in addition to his present assignment at NMRI.

She: "How about giving me a diamond bracelet?"

He: "My dear, extenuating circumstances necessitate my excluding you from such a bauble of extravagance."

She: "I don't get it."

He: "That's what I said."

'Debt of Gratitude To Medical Corps' - Chaplain Griffin

Speaking of his "tremendous debt of gratitude" to everyone in the Navy Medical Corps, Catholic Chaplain Cornelius J. Griffin, now a patient on T-12, says he can never find words to adequately express his thanks.

Ltjg. Griffin served with the 7th Marines in Korea from September 1950 to December 1950. Working with the corpsmen both in the field and in hospitals, he explained how consoling it was when he himself was wounded to be taken care of by Navy personnel.

He was wounded on Dec. 6, 1950. It was during the Marine push out in the Chosin Reservoir. On a mountain side between Hagaru-ri and Koto-ri, he was administering last rites in an ambulance to a wounded boy from the 1st Battalion.

The Chinese opened fire. Sgt. Matthew Caruso, USMC, who had been the chaplain's clerk all through their Korean duty, threw himself over the chaplain's body to protect him. In so doing he lost his own life.

Father Griffin was also struck by the fire, suffering a compound fracture of the mandible and right arm. He was taken to Koto-ri by ambulance and then subsequently to hospitals in Japan, Oakland and Great Lakes. He is here now for plastic surgery.

The marine sergeant was awarded the Silver Star posthumously for saving the chaplain's life. Father Griffin also wears the Silver Star for action in Nightmare Alley a month earlier.

On Nov. 3 at 0130 the enemy conducted a fierce coordinated night attack against elements of the 7th Marines. Chaplain Griffin left the comparative security of the battalion sick bay where he was rendering aid to the wounded, and moved to the front lines.

His knowledge of first aid, coupled with the spiritual comfort he lent, all administered without regard to his own safety, earned him the Silver Star.

Awaiting surgery now, Father Griffin has been assisting Father Marron whenever possible here.

High Ranking Naval Officials Discuss Current Subjects During Annual Conference

SYMPOSIUM OF THE SURGEON GENERAL of the Navy with members of the Medical Department field activities was held at NNMC June 4-6. Held annually, the symposium affords an opportunity for the district medical and dental officers and commanding officers of the Naval medical

and dental field activities to meet and discuss current policies and problems with division operation officers of BuMed. Following the welcome address by R. Adm. Bertram Groesbeck Jr., commanding officer of NNMC, addresses were given by Dr. Melvin A. Casberg, chairman of the Armed

Forces Medical Policy Council, and R. Adm. Lamont Pugh, Surgeon General of the Navy. R. Adm. Clarence J. Brown, Deputy Surgeon General, served as chairman of the symposium and of the medical panel. R. Adm. Daniel W. Ryan, Assistant Chief of the Bureau for Dentistry acted as chairman of the dental panel.

Radiology Techs. Direct Patients Through Channels Toward Health

D. C. DAVIS, HM3, removes radioactive substance from a lead container.

M. C. REDER, HN, transfers radioactive material with a remote control pipette.

The dropping of the atom bomb from American planes upon the cities of Hiroshima and Nagasaki, Japan, during the eventful period in 1945, caused mixed emotions in the hearts of the earth's inhabitants. The sensation of universal supremacy in the hearts of some contrasted strongly with the fears and doubts in the minds of others. World domination seemed to be the key to future security, and yet such was not the plan of a democratic people.

Out of the mushroomed cloud which enveloped the areas over which the bombs were dropped, new miracles came to life. Scientists sought a use for the knowledge they had gained . . . a means of applying this knowledge in medical research and diagnostic studies.

Vitality interested in recent discoveries and in those yet to be made, are the members of the Radiology Department here at NNM. This department, which consists of the x-ray and radioisotopes laboratories, boast strongly of having the finest equipment available with which to carry on its work. Presently being installed is a new two-million-volt machine soon to be put into operation for therapeutic purposes.

Radioisotopes Laboratory

Radioactive isotopes of iodine, gold, phosphorus and gallium are shipped in sealed containers to the Radioisotopes Laboratory on the station from Oak Ridge, Tenn.

A person suspected of having glandular disorders, is given careful preliminary examinations to determine the extent of the disorder. In the case of an overactive thyroid gland, the patient is given a small quantity of radioactive iodine.

During a 24-hour period the system absorbs this element and enables the technician to trace the material with special laboratory equipment. A determination of the amount of iodine absorbed by the thyroid gland indicates the diagnosis and therapeutic treatment the patient may receive.

Comdr. M. W. Mason, Chief of the Department of Radiology, and Comdr. E. R. King, Director of Radioisotopes Laboratory, have as their co-workers Lt. L. W. Brady and W. E. Noel, Commissioned Officer, Royal Canadian Navy.

The enlisted personnel, C. B. Kincaid, HMC; M. C. Posipanka, HM2 (W); D. C. Davis, HM3; M. C. Reder, HN; A. B. Green, HM2; and Robert Wagner, HM1, all qualified in their specific fields of science which offers much to the control of diseases.

At the present time the radioactive isotopes have proved more important in diagnostic studies than in use as therapeutic agents.

X-ray Department

The nature of the x-ray was at first a complete mystery, but is now recognized as a form of radiant energy forming a band of very short waves in the vast family of electromagnetic waves comprising radio waves, infra-red, visible light, ultraviolet, x-ray, gamma rays of radium, and the cosmic rays.

Pushing aside the veil of mystery which enveloped the field of x-ray for so many years, technicians of today are aiming at perfection in this particular branch of medicine, extending a maximum of consideration for the patient and certainly the highest degree of cooperation with the medical officers.

In the capacity of Chief of Radiology is Comdr. M. W. Mason and his co-worker, Comdr. W. S. Cole, Assistant Chief of Radiology. Resident doctors of the X-ray Department are Lts. L. T. Brown, D. W. Spicer, and M. A. Bender.

Fulfilling their obligations toward the Navy and toward the patients who frequent the spaces of the X-ray Department, technicians trained to the highest degree of accuracy carry out their duties most efficiently.

Clerical workers R. E. Gray, HM1; E. B. Furness HN (W); Peggie Wilkie, HM1(W) are responsible for adjusting clerical problems which are presented daily.

J. F. Weddell, HM2, of the fluoroscopic room, works constantly toward the betterment of his specific department, while C. L. Bransford, HM2, in radiographic procedures, and E. S. Hawkins, HN(W), of the therapy room, concentrate on their details.

In the darkrooms, C. E. Bice, HM1, and R. H. Martin, HM2, contribute their know-how in the developing of the films.

Selected for his ability as a leader, J. R. Evans, HM1, acting as general technical supervisor, oversees that the operation of the department is carried out in accordance with Navy specifications.

E. S. HAWKINS, HN(W) (lower left), prepares a patient for treatment under the deep therapy apparatus. Used in the treatment against cancer, the machine emits 500,000 volts.

MEMBERS OF THE DEPARTMENT OF RADIOLOGY (lower center) include: First row: Lt. M. A. Bender, Lt. L. T. Brown, Comdr. W. S. Cole, Comdr. M. W. Mason, Lt. D. W. Spicer, and W. E. Noel, Commissioned Officer, Royal Canadian Navy. Second row: M. C. Posipanka, HM2(W); E. S. Hawkins, HN(W); R. C. Brant, HM3(W); R. S. Padgett, HM3(W); and E. B. Furness, HN(W). Third row: Mr. A. MacInnis, clerk-stenographer; G. H. Ray, HM1 R. S. Thomas, HN; R. H. Martin, HM2; C. E. Bice, HM1; and T. W. Harrison, HMC. Fourth row: D. W. McNeil, HN; C. L. Bransford, HM2; J. R. Evans, HM1; M. C. Reder, HN; D. C. Davis, HM3; and E. L. Gross, HN. Fifth row: J. F. Weddell, HM2; D. J. Cummings, HM2; C. B. Kincaid, HMC; A. B. Green, HM2; R. E. Gray, HM1; and Robert Wagner, HM1.

PREPARING HIS PATIENT, C. L. Bransford, HM2 (lower right), adjusts the Hodges Head Board used in skull work.

DEMONSTRATING THE USE of Geiger tubes and lead shields, Charles Harrell, HM3, and M. C. Posipanka, HM2(W), show the method of localization of possible brain tumors.

D. J. CUMMINGS, HM2, counts radiations of samples of radioactive material.

R. WAGNER, HM1, tests electronic equipment in the isotopes laboratory.

CHIEF HARRISON prepares a patient for chest plate in the radiographic laboratory.

JUNE 16, 1954

Coach's Corner

Satch Bishop, capable backstop for the league leading Naval Doctors and Steve Mills, the roaming centerfielder, were touring the local fairways the other day getting their legs in shape for what looks to be a payoff between Max Zimmerman's college boys and Carl McMillan's spirited hitless wonders. . . . On seven, Steve hooked his tee shot into superko's gardens; his second, played from the bank of the campus creek, crossed the fairway into the fescue on the far side; his third snaked through the trees and brush to wedge the ball between the flagstick and the inner shell of the four and a quarter-inch cup . . . a roundabout way of doing things but the score-card shows a birdie three. . . . That happy tale being sported by the Chief of Medicine, can be traced to a sparkling party Earl Evans posted the other day in company with Capt. Smith from Billy who turned in a 37 for his first trip around the course. . . . The tuble-H boys, Chiefs Hotvedt and Hildebrand, consider their briars an integral part of the golf swing.

R. Adm. R. Milton Gillett, standing on the putting green the other evening, thinking out loud, opined that a good place for a golfer's locker room would be under the ramp which serves as an approach to the O Club, inasmuch as the incline consists of dirt fill and was designed for the use of wheel chair patients . . . sounds pretty good. . . . It is rumored that Irv Norman out at Oak Knoll has increased his golfing library by the addition of nine new publications. Sequoyah Country Club's sporty fairways are in for some par slicing. . . . Burhead Mitchell, Carolina Perry responsible for the carving of the hole number, yardage and par figures on the log benches at each tee . . . Bill Downing, the club professional and a local character, had a best ball for nine holes, five under par. A missed one-footer for an eagle on four would have been the duo a six under.

Russ Taylor's nine took a tumble the other evening from the Dental kees. Sure like the way Med School's Patterson handles himself on the hill and at the plate, a real hustler with plenty of class, in there every minute, winning or losing. . . . Luxon, pint-sized custodian of the torrid corner for the Dukes, looked good, jabbing the horsehide at flying metasals. . . . Schanke, a portsider on the initial square, stabbed a screamer banded and doubled the bag's occupant all in one beautiful nosedive. Purser smashed a triple against the left-field wire in addition to his chores. . . . NSHA baseballers joined the Dental rooters. . . . A Dental win tossed the league into a two-way tie between the pen-pushers and scalpel wielders.

From the pages of Cairo's leading papers, the Egyptian Gazette and Akhbar El Yom, under a May 26, 1952 dateline, comes the following, subject in print being a former member of the Center Golf Committee: "Lt. Comdr. T. Michael Floyd of the U. S. Navy won the club championship at the exclusive Maadi Country Club besting R. Levy, the on-favorite, 8 and 6 in a grueling 36-hole final. The Naval Officer showed no concern over the movements of the large gallery which followed Cairo's finest golfers. As a matter of fact as the crowd grew, the American's game improved. Smashing tee shots which always wound in the middle of the fairway and a smooth stroking putter gave the edge to Levy's opponent. T. Michael Floyd now appears on the bronze plaque in the club foyer following that of Rashad Maraghi Bey." . . . alumni in the news are Kay Bridge winning the Fleet Championship in Honolulu; Ted Lesney, copping the crown at Tripler and Bill G, winning in the Riviera Open.

Sam Snead has this to say about the mental approach to golf: "First foremost you must have confidence—confidence in your equipment, confidence in your ability to operate it. Your second mental problem is one of concentration. Consider each shot individually and think it through in advance before you address the ball. Draw a mental image where you want the ball to go and then eliminate everything else in your mind except how you are going to get the ball to that preferred spot. Playing for position is a major factor in your mental approach to golf. Down the middle of the fairway is not always the best position for a tee shot. On long holes which have dog-legs or turns to the right or left, it may be advisable to play your drive toward one or the other side of the fairway. Plan your approach shots to the green so you are with uphill rather than downhill putts. In emphasizing concentration I would like to point out that it is a mental matter, not a physical one. By that I mean that you should never concentrate on the shot to the extent that your body becomes rigid or taut. Relaxation is a must, and if you have a tendency to freeze when addressing the ball, back and remind yourself of the necessity of relaxing and starting your shot over again."

Lloyd Mangrum along the same vein of thought: "A relaxed attitude doesn't mean a sloppy attitude. Even as you won't applaud the guy who drives a car with one finger on the wheel and his eyes wandering over to the short skirt on the curb, you won't approach the game with sloppy muscles or your mind on something else. The secret is in a relaxed but purposeful attitude. You are concentrating on what you're doing but you are concentrating for efficiency. There is no place for tenseness, apprehension or gnitting of teeth." . . . Anent the foregoing, I wonder the nature of the mental image of the average golfer at the top of number ten.

Day Dreaming

I know whereof the poet was singing
When he raved of temple bells ringing,
And that old Mulmein pagoda looking eastward to the sea.
I can hear those same bells ringing,
And those Burma girls a-singing,
And an awful bit of longing overwhelms me.
I can see the palm trees swaying,
And the waves on white sands playing,
And the sun in splendor sinking in the west,
Though the temple bells are calling,
And the Burma girls are bawling,
I like it here at home with you the best.

—M. Hynes, NMRI

Waves Dump Meade In 16-8 Struggle For First League Win

The NNMC women's softball team scored 16 runs off 18 hits to take a decisive 16-8 win over their first league opponents, the Ft. Meade Wacs, on June 5 at Ft. Meade.

Coached by Dick Gutekunst, the team of Waves and nurses held the lead from the first inning. With a comfortable 9-2 lead in the top of the fifth, the Bethesda gals piled up six more runs before making substitutions.

With one out and McQuarrie on third and Scott on first, Salisbury walked. McQuarrie stole home before Crouch got to second on a center field error which sent Scott and Salisbury home. Cox then made second on a left field error bringing Crouch home. Fowser slammed a homer scoring Cox.

Starting pitcher McQuarrie racked up four strike-outs, allowed three walks, and gave up two hits in the first five innings. Bramlet took the mound in the sixth for two strike-outs, three walks, and three hits.

Cox batted a cool 1.000 with two homers, two doubles and a single to her credit. With Bethesda's substitutes in, Ft. Meade scored one in the sixth and five in the seventh while Bethesda's Carlson stole home in the seventh to wind up the game 16-8.

In the game against the Henderson Hall Marines last Tuesday, the Waves lost 31-10. See next issue for details.

Women's Softball Schedule

17 June—Quarters "K" here
24 June—Ft. Belvoir here
1 July—Bolling AFB here
8 July—Quantico there
15 July—Mt. Myer Wacs here
22 July—Mt. Myer Wacs there
29 July—WRAMC Wacs here
5 Aug.—Arlington Hall here
12 Aug.—Ft. Myer Wac Hqs. there
All games commence at 1830.

Sign Up for Tennis Now

Entries for the forthcoming tennis tournament to be played later this month are now being accepted by the Special Services Department.

Staff and student personnel, interested in participating in the event, should register with Chief O'Keefe, Ext. 672.

If enough entries are submitted, there will be men and women's singles, men and women's doubles, and mixed doubles. Last year there was no women's tournament because too few turned out. It is hoped that the gals will sign up this year.

They Caught 'Em!

STANDING WITH PRIZE CATCHES are Miss Barbara Taurish, Ltjg, NC, and Miss Frances L. Sonsalla, Lt, NC. To the rear on the right is the boat they rented to catch the fish, the Flamingo.

Brown Baggers Snatch League Lead As NSHA Topples Bks. 12 and NMRI

The "Brown-baggers" of NSHA knocked Bks. 12 out of a four-way tie for first place by swamping them 11 to 0, behind the first no-hit, no-run game of the league.

The NSHA hurler, Tony Pergolizzi, was in complete charge all night as he tantalized Bks. 12 with his bag of fast balls, change-ups and the "Pergolizzi slider." In the first inning with two on and no outs, Tony made the next three batters pop up to the infield.

NMS Photographer Pitching Semi-pro

As one of the five pitchers on the semi-pro team of Gaithersburg, Md., Leroy Lewis Jr., HM3, of Medical Photography School, has a win-loss record of 2-0 to date. His batting average fluctuates around the .300 mark.

Right now Gaithersburg is in undisputed first place in the Upper Montgomery County League. Proceeds from these games are used to improve the sporting facilities of the community. Another NNMC man on the roster at present is Tommy Brothers, HM3, who mans the third base sack.

Leroy Lewis Jr., HM3

Lewis, who was raised in the small town of Millen, Ga., has played on organized baseball teams since he was 14. Before graduating from Millen High, he also earned letters in football, basketball and track, playing quarterback, forward, and entering broad jumping, the 100-yard dash, and hurdles.

Enlisting in the summer of 1948, Lewis spent 18 months on Guam. Here he pitched and outfielded for the medics team in an inter-island league.

So far the six foot one athlete has steered clear of marriage. "This single life is killing me," he laughs, "but I love the way I'm dying."

Before the Service, Lewis worked as a general helper in a funeral home. He plans to continue his studies in embalming school after his discharge from the Navy.

Queens for a Day Down Mexico Way

"A word to the wise is sufficient." Any of the local anglers that enjoy bragging about the 17-pound wall-eye or the 14-pound largemouth bass that got away while fishing Lake Lakafish, had better stay away from the surgical wards or wards 103, 104 or 105. Two nurses, Miss Barbara Taurish and Miss Frances L. Sonsalla, work on these wards.

While on leave together in Acapulco, Mexico, each of the nurses caught a sailfish nine feet in length and weighing 90 pounds. The record for the Pacific is only an additional 21 inches.

The two fish, caught about an hour apart on the 27th of April, were hooked, played and boated unassisted by the two nurses. Being easily the largest caught during the day, the two NNMC pectoral experts were crowned "Queens for a Day" at the local fish club.

Destination for their next leave? Naturalmente, the Bahia of Acapulco, off Acapulco, Mexico.

New Rules and Hours Announced for Pool

Latest regulations governing the use of the NNMC swimming pool were announced last week in Administrative Memorandum No. 90-52.

The pool will be restricted to use by active duty military staff and students of NNMC, patients attached to the U. S. Naval Hospital, NNMC, and civil service employees residing on the station. All eligible will be allowed to bring an occasional house guest.

Applications for passes for personnel not included above will be referred to the Commanding Officer, NNMC for consideration and disposition.

The new schedule for the pool is:

Monday through Saturday:

0800-0900 Night Crew
0900-1100 May be reserved for NH patients
1100-1300 Military staff and students only
1300-1630 All hands and dependents
1630-2100 Military staff and students

Friday:

1900-2100 Reserved for military women personnel

Sundays and Holidays:

0800-1300 Military staff and students
1300-2000 All hands and dependents

Notes and Quotes

Dental Explorer

by C. Connor

Dr. Conglis seems to be setting a record for "weddings attended" this year. Maybe he's just testing his luck, this being leap year and all. So far he's been very lucky, but—some female will probably recall the fact that the days are getting fewer and our Dr. C. will have met his Waterloo.

Congratulations are in order this time for Comdr. and Mrs. Reader who celebrated their eighth wedding anniversary on May 27. . . . And for Lt. J. E. O'Malley, who added his set of "railroad tracks" on June 1. There were cigars and almond joys for all hands (how many calories in those candy bars, Dr.?). . . . Also to be congratulated are Mr. and Mrs. Hanson who announced the arrival of a bouncing baby boy on May 24.

Dr. Frizzell, upon reading over the Standing Order Book recently, was seen to have a slow grin steal over his face, and why not? After all it did read that he was to inspect Bldg. 123 at 1630, and he might get by with it even though the Wave Bks. section is not an NDS space. He did follow it through, but only the male half. . . . (Girls, it just goes to show you, Korea is nothing to these men, but a barracks full of women and they'll chicken out).

Looks like the "love-bug" has bitten Clarice, too. Lately she doesn't even seem to touch the steps as she comes down the stairs; she literally sails down. (Rumor has it though that when she has that far-away look in her eyes, it's not for Ted, but for some "CORN BREAD.")

The latest staff enlisted party proved to be quite a success. Even the morning after the night before was enjoyed by all who attended. Capt. Mitchell and Capt. Grunewald were present, and a good time was had by all.

NMRI

by R. Conaway

"We bid adieu to the Navy Blue" sang two more Researchites as they fondly clasped their Honorable Discharges. V. A. Ayling and R. W. Gay (Mr. Ayling and Gay, now) were kept plenty busy making last-minute farewell calls on former shipmates.

On June 5, L. J. Reber, HMC, was a civilian also; but only for a short time. He shipped over for another cruise on the following day. Off to the West Coast and the USS Repose goes Chief V. A. Liles from P&A; M. R. Gilliland (Carpenter Shop), departed for the Receiving Station at Norfolk.

A hearty "welcome aboard" is extended to Comdr. C. M. McCandless, MC, from San Diego; J. A. Milo and T. A. Tubergan from Oakland; G. R. Klair, Great Lakes; I. B. Stacey, Cairo; and R. C. Durant from Pearl Harbor.

You've all heard the song "Asleep in the Deep;" but have you heard the latest hit, "Abed in the Head?"

All hands turned out for the NMRI staff picnic on June 6, held at the American Legion Club on the Rockville Pike. The weather man did his best to make the affair a success by providing a clear, balmy day, complete with blue skies and sunshine.

A swell picnic lunch, soft drinks and Budweiser on tap added to the gaiety of the occasion. With dancing and games for the grown-ups and pony rides for the children, all were assured of, and had, a most enjoyable time.

Navy Belles

by George

Since most of the gals want a fashionable sun tan, the area around our house seems like a popular beach. Working to get her sea duty, Lesley is taking a boat trip to Norfolk. "Al" Allen is a patient on ward 129. I understand she's in need of voice lessons. (I'll help you, Al.)

Expecting a two-week vacation, "Hammy" Brooks is planning to spend the time at Atlantic City. Ann and Cy plan to go up that way on their honeymoon, too.

Josh has been to Alabama to freshen up her southern accent. Hoping to have one always near, Hammett, our night MAA, wears a flashlight around her neck for a necklace. That surprise party the girls gave in the cellar for Ann turned out to be quite an affair.

Ever since she ran off with "Al" to "tie the knot," Delores has been known as the little housewife with dishpan hands. Dorothy Fleming is back in circulation after her vacation in Ohio. The gang in X-ray welcomed Eleanor Furness back to the fold after her vacation.

Doris Dickerson packed her gear and sailed away to Patuxent River. On the same day, Gladys McGaugh, new member of the hospital command moved in. Making two homers and a double in one game, Mary Lou Cox qualifies as our star of the week.

Billie Lawton started N.P. school on June 9. Ruby Salloum Padgett has gone to Florida to be Mrs. Padgett. Question of the week: What is the vitamin Gerry Bourne takes before each meal?

Veteran Supervisor Recalls Old Times

Claiming the town of Washington, N. J., as his birthplace and the year of 1889 as his year of birth, Mr. Claude Valentine gave evidence that he's well qualified to hold the position of Leading Man for the Public Works Dept. at this station.

After serving his apprenticeship in 1911, Mr. Valentine worked for a while as steamfitter for the W. G. Cornell Co. of New York. Much to his liking, this job afforded him the advantage of extensive travel throughout New York and Canada.

As foreman in the construction plants for the J. H. Nellis Co., Mr. Valentine worked with high pressure boilers and piping for steam boilers, feed water heaters, boiler feed pumps, and automatic blow-downs in large schools, factories and breweries.

Outstanding in his memory, Mr. Valentine related how, in the year 1917, an old boiler burned out at

Mr. Claude Valentine

the Overbrook Hospital in Cedar Grove, N. J. The hospital, one of the largest in the States, used for its heating system hot water forced through piping. During the winter months, a complete freeze-up caused havoc among the patients and professional personnel at the hospital. Mr. Valentine, then in charge of reconditioning of the power and heating system, rendered the piping serviceable.

Meanwhile, a call went out to various news agencies requesting whatever help they could afford to cope with such a disaster. The response was most gratifying and large pot-bellied stoves were installed in each ward and dining room to keep the patients comfortable. Within a two-month period, one boiler was repaired and the main heating lines were functioning normally.

Shortly after completing this particular job, Mr. Valentine left the J. H. Nellis Co. to take a position with Civil Service as head steamfitter for the county of Essex buildings. This position he held for eight years before deciding to resign so that he could go into a business of his own.

The year 1942 found Mr. Valentine working in the Government offices here in Washington. Starting with the Social Security Group, he later advanced to the central heating plant.

That same year, 1942, Mr. Valentine transferred to NNMC as pipefitter. Later he qualified as head pipefitter, and is at present holding the position of Leading Man in charge of steamfitting.

Mr. Valentine has been collecting his pay checks from this hospital for the past ten years and hopes that upon retiring he will realize his ambition and settle in New Jersey.

Ex-Dude Rancher Shuns Horses to Hire And Dons the Familiar Naval Attire

Society members of Newark, N. J., welcomed Joseph E. O'Keefe on March 3, 1919. After attending public schools and having been educated from a local high school where he studied academic subjects, O'Keefe later became a proprietor of a dude ranch in the Ramapo Mountain Range.

Realizing his duties toward his country, O'Keefe donned the uniform on December 8, 1941 and took heed of the rhythmical flow of language issued forth from the mouths of the drill instructors at Newport, R. I.

Joseph O'Keefe, HMC

Selecting the Hospital Corps, O'Keefe took training at the Hospital Corps School, Portsmouth, Va., and upon graduating, transferred to Bethesda, Md., for duty. The Naval Hospital at Oakland, Calif., next carried him on its roster until Fate intervened and sent O'Keefe to duty with the Fleet Marine Force.

As a member of the Marine Raiders in the Solomons during 1943, he served the outfit faithfully. Wounded, he was later sent back to the Naval Hospital at Oakland and afterward transferred to Glenwood Springs, Colo.

Serving as Master At Arms, O'Keefe was stationed at Annapolis for a period on limited duty status.

Satisfying his urge for world travel, O'Keefe for the next 18 months visited distant ports of the European theater aboard the Gen. H. F. Hodges (TAD 144), a ship under the supervision of the Military Sea Transport Service.

Reporting to this station during the Fall of 1951, he has served as house-mother of building 12. Presently assigned as CMAA of the Special Services Division, Chief O'Keefe's duties include sports coordinator, chairman of the dance committee, entertainment publicity, and service captain of the Hospital bowling team, a team now holding the NNMC championship.

An ardent golfer and badminton player, he enjoys swimming, horse back riding, and hunting.

Married to the former Ensign Naomi Zwicker, NC, USN, of Pittsburgh, O'Keefe leads a happy life in the town of Rockville, Montgomery County, Md.

Regarding Florida as the ideal spot to retire, Chief O'Keefe is looking forward to buying a rustic rambler-type home and considering accepting the life of a salesman to offset expenses.

Signed Up!

KATHLEEN HUGHES, a willowy blonde with hazel eyes who was born in Hollywood, is the winner of the 1952's first screen contract. Universal-International signed her up after a talent scout spotted her on a radio program as he sat in the audience. She is five feet, eight inches tall.

Autos Bang; Chimes Rang

Miss Doris Burnley from the Patient's Record Office took the vows of "I do" on June 7. The day before the wedding, Doris had to appear in court due to an auto accident.

Mrs. Clara Brown, also of the Record Office, quipped, "I hope the tune was not 'I Wish I Had Wings of an Angel' instead of Mendelssohn's 'Wedding March'."

JOC: "I hear that you've been signed up as skipper on the good ship matrimony."

BMC: "No, my wife is the skipper. I married a widow. I'm the second mate."

"The proper greeting is 'Good Morning Sir,' and not 'Hi there, short stuff!'"

I'm a poet . . . or so they say
My writing's all in rhyme.
I write the things I see and feel
Whenever I find time.

Sure, there're times when I get stuck
For adjectives or worse;
I give it thought . . . and then I turn
Right around and curse.

Writing's fine and it's easy
If inspiration's there—
But half the time you'll grit your teeth
And pull out all your hair.

They say to write, you must feel love;
To me that's kinda funny—
For after all, the stuff I write
Is strictly for the money.
J. F. Melvin, NNMC

You can always pin your faith on a fat man, because he can't stoop to anything low.

Spacious Navy Exchange Dining Room Offers Best in Food and Atmosphere

SOFT LIGHTS, FAMILIAR MUSIC, and excellent food are offered to patrons of the smartly styled Navy Exchange dining room.

The Navy Exchange dining room has played host to dozens of men, officers, Waves, patients, and their guests nightly since opening June 16.

An exquisite rose color covers the span of walls above the decorative draperies. Flowered draperies and soft lights, blending beautifully with the cream and blue coverings, create an atmosphere of enchantment as the dinner crowd partakes of selections from the menu.

Compared favorably with the dining rooms of the exchange hotels, the dining room of the Navy Exchange Department is an evening of pleasure and excellent food.

Large comfortable booths bordering the vast room offer semi-private dining. Music for your enjoyment is selected from an album of one hundred recordings, including top-notch hit tunes, waltzes, polkas, hillbilly tunes, classical and old favorites.

At a moderately priced, a complete dinner features choice cuts of sirloin steak, Southern fried chicken, corn fritters, or baked sugar ham with sauce du jour, and a pineapple ring. Included in the dinner is your choice of entrees, desserts, and beverage. These sultry summer evening special consideration has been given to your appetite. Palatable la carte discoveries proposed in club sandwiches, grilled sirloin steak, grilled T-bone, half-fried chicken, and an assortment of cold cuts.

By the chef will recommend special suggestions. His crisp, expertly prepared salads will be a pleasure to your meal.

For the children, a menu consisting of fried chicken, vegetables, iced tea or milk is available at a reduced price.

17 booths, accommodating 68 guests, and the additional 14 tables, holding approximately 56 persons, have been arranged to give the diners in spacious dining facilities. The atmosphere of welcome is extended to all and your guests. So, come and enjoy the dining room.

Petty Officer Tests Scheduled for July Given in Mess Hall

Approximately 600 NNMC personnel (including eligible patients) will take the petty officer examinations set for three different dates in July.

The examinations for PO3 will be held a week from tomorrow, July 8; PO2 on July 15; and PO1 on July 22.

As in the past, the three-hour tests will be given in the mess hall. Personnel will muster at 0800 sharp and the testing will commence about 0830.

All personnel must be in the uniform of the day, and no one in dungarees will be allowed to take the exams, announced Lt. Comdr. Shearer, senior member of the Naval Examining Board.

The typing tests, which were held after 1630 in the January exams, are expected to be given during the afternoon this time.

There will be no postcards, and examinees will not know their score until the new rates are announced. The examination itself will have a possible score of 80 points while time in rate and service and medals will make up a possible 30 points.

The old 2.5 to 4.0 scoring system has been discarded and a passing score will be determined on the difficulty of each test.

Military questions will again be combined with the professional, and in the case of hospital corpsmen, for instance, it is anticipated that this time they will relate very directly to what a corpsman should know in performing his own duties.

It is to be noted that in previous tests, questions were asked on the Articles for the Government of the Navy. Those articles have been superseded by the Uniform Code of Military Justice.

According to Bupers circular letter 210-51, questions on the UCMJ will be included in this July's exams.

Capt. R. Taylor Assumes Command At Impressive NDS Ceremonies

CAPT. L. D. MITCHELL turns over the command of NDS to Capt. R. W. Taylor on Monday, June 16. Right: The new commanding officer inspects his personnel which includes Navy students and staff and Air Force students.

Capt. Ralph William Taylor, DC, USN, assumed command of the Naval Dental School on June 16 when former commanding officer, Capt. Louis D. Mitchell Jr., DC, USN, was transferred to Pearl Harbor, T. H.

The new CO comes here from the Naval Hospital, San Diego, where he was Chief of Dental Surgery. Specializing in oral surgery, he is a Diplomate of the American Board of Oral Surgery.

Eleanor Roosevelt Gives Guest Lecture

Mrs. Eleanor Roosevelt was guest lecturer at the final guest lecture of the 1951-52 series conducted by the Naval Medical School, June 27 in the auditorium.

Mrs. Roosevelt chose as her subject, "The Emergence of Women in Pakistan and India." The former first lady of the land recently completed extensive visits in both of these countries.

The lecture was held in honor of the Navy Nurse Corps.

Before the lecture, Mrs. Roosevelt was a dinner guest of R. Adm. and Mrs. Groesbeck in their quarters.

Six NMS chiefs served as guides for the occasion while NMS Waves acted as ushers in the auditorium. The chiefs and Waves all wore dress whites.

This is the Captain's second tour of duty at NNMC, as he was a member of the NDS staff here from 1939 to 1943. Although the Medical Center is familiar to him, he remarked that "the faces are all new."

Born in Lyman, Wash., and claiming Bellingham, Wash., as his permanent home, Capt. Taylor came into the Navy in July, 1928, as lieutenant junior grade. He reached the rank of captain in 1943.

Receiving his D.D.S. from the University of Southern California, he later served there as clinical instructor in the College of Dentistry. In 1925 he married Miss Gertrude Gilmore of Los Angeles and he and Mrs. Taylor now live in Kenmore Park.

The captain has had two tours of duty in Hawaii. It was there that he became interested in surf board riding. Watching the sport, he decided to learn, and after mastering the skills involved, he says surf boarding offers a thrill comparable to none.

In 1948 he was assigned to help conduct a clinic in Argentina along with Comdr. (now Capt.) Frates and Comdr. Johnson who were both stationed here. For two months the dental officers demonstrated various phases of dentistry to naval and civilian schools there.

This July Capt. Taylor will have completed 24 years of service, and says, "I think I'll do my 30."

Shoe Shining Service

Setting up his stand in the cobbler shop of Bldg. 1, John Stanmore is delivering mirror-like shines for only 15 cents a pair.

The shoe shine stand will be in operation between the hours of 0800 and 1630 daily. Hours for shines on Saturday are from 0800 until 1300.

Doors Reopen at 'Y' Cottage, Bethesda's USO

SIGNING THE GUEST BOOK at the community open house held by the new Bethesda "Y" Cottage USO on June 17 is Jim Bowers, HM2 of NMS. Seated at the information desk is senior USO hostess Miss Dorothea Sickles. Center: Miss Doris Long, co-chairman of the USO Committee of Montgomery

County, who is in charge of the Bethesda center, chats with R. Adm. Groesbeck and Mrs. Theodore S. Repplier at the open house. Mrs. Repplier is chairman of the Montgomery County USO Committee. Right: Bethesda sailors and USO junior hostesses dance to the popular records available.

Coming Attractions of Corps Book

SEATED AT HIS DRAWING TABLE in the spaces of the Occupational Therapy Department, Melvin Hadden, HMC, displays detailed illustrations, some of which are to be included in the future revised edition of the Hospital Corps Handbook.

Medical Illustrator Prepares Sketches For Revised Hospital Corps Handbook

Familiar to the majority of Medical and Hospital Corps personnel is the name of Hadden. Melvin Hadden was born in 1912 in Kansas City, Mo., where his earliest adventures in the field of art were brought to the public's attention.

The one person responsible for Hadden's early progress was a cartoonist named Wood who created the comic strip "The Intellectual Pup." Though schooling took much of young Hadden's time, he worked Saturdays in Mr. Wood's office and studio.

Since his introduction into the Naval service in January 1937, Hadden has gained recognition through his illustrations in the 1939 edition of the Handbook of the Hospital Corps.

Here now on temporary duty, Hadden has been assigned space in the OT Department where he is working on illustrations for the forthcoming revised edition of the Hospital Corps Handbook.

On Bureau orders during WWII, Hadden travelled many miles through the war zones of the South Pacific. He had been sent to record by illustrations the procedures of operating room techniques aboard the USS Solace. Without the necessary credentials, Hadden met opposition at every turn.

Hushed whispers raced throughout the ship. Such questions as "Who is he?" "What's he doing here?" and "What's his job?" vibrated from every beam of the officer's wardroom to the engine room. But the questions remained unanswered. Hadden was carrying out his assignment from the Bureau, and although his duty was not secret, who would believe him?

There are times in life's hectic pattern that a good bluff usually suffices where truth has little bearing. Since he was a master at the bluff game, Hadden could have passed as an F.B.I. agent, Naval Intelligence Officer, or as a photographer for Life magazine. Yes, he could have passed for any one of these, and he did! Never again would his assignment be questioned. He drew what he saw and his sketches were packed and transferred to Washington for inspection.

Although Chief Hadden is recognized as one of the Navy's leading medical illustrators, he has had no formal art education. The work he turns out and the style techniques are the results of many hours of intensive self-teaching. Working mostly in water colors and

colored pencils, he is capable of presenting excellent detailed drawings for reproduction.

In his book, Atomic Medicine, R. Adm. C. F. Behrens has used many of Hadden's illustrations.

Voicing his opinion on the subject of medical illustrating, Hadden stated that such a field covers much more than is readily suspected. "A mere understanding of art is not enough. A person interested in becoming a medical illustrator must be prepared when called upon to do an exact art study. He must possess the knowledge of the anatomical structure of the human form, have an appreciation for color, and must be able to anticipate the medical officer's next move during an operation.

"It would be advisable," he continued, "that the Navy, finding a corpsman with talent, could send that man through a course of study at Johns Hopkins University for a year. During that year, the artist could familiarize himself with every phase of O.R. technique.

"Upon completion of the study, the man would gain practical experience on board ship or at a foreign station. His practical work finished, the man could be given a post-graduate course after which he'd be well qualified and will have earned the title of medical illustrator."

A visitor to the nursery (tower 6) will find Hadden's paintings which were done for the children. Cartoon figures of dwarfs, monkeys, and imaginary characters amuse the youngsters while they are convalescing.

Chief Hadden resides with his wife and eight-year-old daughter in Hyattsville.

Diaper Derby

May 30—Craig Carnell Chapman, 8 lbs., 6 oz., son of Lt. Comdr. Judge Carnell Chapman, DC, of NDS.

June 9—Jan Allison Sprague, 8 lbs., 4 oz., daughter of Ltjg. Neal Allison Sprague, DC, USNR attached to NDS.

June 13—Lisa Ann Yelton, 7 lbs., 1 1/4 oz., daughter of Raymond Yelton, Jr., HMC, attached to NSHA.

June 16—Tamara Ostapowicz, 5 lbs., 12 oz., daughter of Lt. Frank Ostapowicz, MC, USN, attached to NH.

June 18—Cordelia Ellen Hebble, 3 lbs., 5 oz., daughter of Comdr. Jacob Grant Hebble, MC, NH Staff.

Red Cross Offers Tours, Trips, Games Or Luncheons in D. C.

Would you like to spend the day on the famous Skyline Drive in Virginia? Or maybe a tour of the F.B.I. or a leisurely afternoon in the Smithsonian Institute is more to your liking.

It's nice to get away from the hospital for a few hours in the good ole summertime and the Red Cross Recreation Department offers a wide and varied number of off-post activities to patients. Any patient who is interested in the trip program should check the bulletin board outside Room 102—or talk to his ward Red Cross recreation worker.

Each patient who goes on a Red Cross trip must have his liberty card—most evening trips are regular liberty and your ward recreation worker will get your special liberty for the majority of trips which leave before 1630. Red Cross Motor Service is generally provided for the special liberty trips.

If you're a baseball fan, don't forget that tickets and transportation are provided by Red Cross for all home games of the Senators on regular liberty nights and Saturday and Sunday afternoon and evening. Some Washington games in the near future are: Boston on July 5th and 6th, Chicago on July 10th and 12th, Cleveland, July 13th, and then Detroit plays here.

Another sporting event of interest, to many patients is the wrestling match each Wednesday night at Turner's Arena. Tickets, but not transportation, are furnished by Red Cross.

Many patients have enjoyed having their lunch with their Senators, touring the U. S. Capitol and watching Congress in session. Others have liked the short tour of the White House and a trip through Mount Vernon. Tourists come from all over the world to see the many interesting places in and around Washington, so why don't you take advantage of being here?

If you are a patient and interested in going on some of these trips, or if there is a place you would particularly like to go, talk to your Red Cross worker or drop by Room 102 (first deck near ward 3-B) and let them hear what you would like to do.

Independence Day, 1952

AMERICA'S HISTORIC LIBERTY BELL, the symbol of Independence Day, July 4th, is pictured above amidst sketches of our Four Freedoms. The Freedoms, as described by President Franklin D. Roosevelt in address to Congress Jan. 6, 1941 are Freedom from Want, Freedom from Fear, Freedom of Speech and Expression, and Freedom of Worship.

Hospital Corps Birthday

Members of the various corps of the Medical Department of the Navy joined members of the Hospital Corps on June 17, 1952, in a quiet observation of the 54th anniversary of the establishment of the Corps. From the cold of the Arctic to the humid heat of the tropics, from the foxholes of Korea to the spotless, modern, well-equipped Naval Hospitals within the continental United States, hospital corpsmen were quietly about their work of caring for the sick and wounded.

The Hospital Corps, the only corps in the Naval service composed of enlisted men and former enlisted men, warrant and commissioned warrant officers, was established by Act of Congress June 17, 1898, as an integral part of the Medical Department of the Navy.

Since its establishment, members of the Corps have established an impressive record of devotion to duty, a record unsurpassed. One, whose outstanding heroism in the face of grave danger, was commonplace. That others might live, hospital corpsmen have given their lives.

Outstanding and impressive in the Corps' record of accomplishments is a Commendation by the Secretary of the Navy, the late James V. Forrestal, awarded for outstanding service and devotion to duty during World War II—the only corps within the Navy to be so honored.

The Hospital Corps record during the present Korean conflict is also impressive. Of the two Congressional Medals of Honor awarded Navy personnel, one has been awarded to a Navy hospital corpsman. The Navy's highest award, The Navy Cross, has been awarded to hospital corpsmen for heroism while serving with the Marines in Korea.

The Chaplain's Corner

by Chaplain Newell V. Brink

Many people are desperately searching these days for a religious faith. Many of them reflect Christianity because of some incident that happened long in the past. The pastor was perhaps not sufficiently attentive. Or some church had members who irritated the seeking individual. Or someone, a professed Christian, did not live the good life as the seeker interpreted it.

In response to appeals to think through religion such incidents are proffered as impossible barriers to acceptance of religious faith. Such arguments are compounded of one part melodrama and one part personal egotism on a large scale. If we can't forget an injury and must on nursing old grudges, God will not be able to get down into our souls.

If people will use the resources of the Christian faith they will find that for which they seek. Christ can teach us all to be patient, loving, forgiving and helpful. It is well to remember that if we consider ourselves it is in forgiving that we receive and in doing that there is a return.

Forget old grudges, forget our suspicion of the motives of the fellow. Try a little Christian fellowship and see if the rewards are great and best of all you will be capped with finding God.

JUNE 24, 1952

NSLI Holders Who Waived Their Policy Are Warned on Discontinuing Allotment

Washington (AFPS)—If you have permanent plan National Service Insurance and, under Public Law 23, chose to waive the "pure insurance risk" portion of the premium, then you should have:

1. Filled out a waiver form.
2. Made no change in your Class N allotment.

The Services have uncovered evidence that men with permanent NSLI insurance have waived a portion of their premium but, through misinterpretation, also discontinued their Class N allotment. This would cause the policy to lapse and result in the loss of cash value of the policy and require a large cash outlay for reinstatement and a physical examination.

The Class N allotment is discontinued, the permanent policy will lapse when the cash surrender value of the policy, as automatically applied to extended NSLI insurance, is dissipated. Then a serviceman has lost his NSLI coverage and goes under the grating indemnity insurance. If the Class N allotment is continued, the VA will reimburse the policy holder with interest each year for the money paid on the waived portion. Plans are currently underway to outline all procedures whereby those affected will be able to reestablish their Class N allotments.

Navy Outlines Plan to Accept Reserves

Washington (AFPS)—In a program begun by the Navy a limited number of junior reserve officers will be integrated into the ranks of the regular Navy.

Naval Reserve officers and former enlisted men of the regular Navy holding temporary commissions will be eligible to apply if they possess "outstanding qualifications and sincere motivations for naval career."

Regular Navy commissions will be open to men and women Line, Staff, and Supply officers in the grade of Lieutenant (j.g.) and Ensign. Male officers in the same grade may also apply for appointment in the Civil Engineer Corps. Lieutenants, lieutenants (j.g.), and ensigns of the Nurse Corps may apply for commissions in the Nurse Corps.

Applicants, except for members of the Nurse Corps Reserve, must have received a bachelor's or higher degree from an accredited college or university. Nurse Corps candidates must have a high school diploma and be registered nurses. Application details are contained in the Bureau of Naval Personnel Circular Letter No. 96-52.

Double Occasion

"HAPPY BIRTHDAY, Admiral Groesbeck" is what the cake with five candles said on June 19th. Besides being the Admiral's 58th birthday, it was also his 32nd wedding anniversary. "The party was a complete surprise and very deeply appreciated," said the Admiral, but Mrs. Groesbeck (right) was in on the surprise when the representatives of the Center Command divisions came up to congratulate him.

4th-Enlisted Class Graduates at NSHA

Certificates of graduation were awarded to 117 hospital corpsmen and dental technicians from the fourth enlisted class in Medical Administrative Technic at the exercises held at the Naval School of Hospital Administration on June 20.

The ceremony marked the completion of nine months of extensive training in courses of instruction in Property and Accounting, Bookkeeping, Machine Operation, Clerical Procedures, Typing, Commissary Procedures, Maintenance Office Methods and Industrial Safety Engineering, Personnel Management, Business English, Effective Speaking, Uniform Code of Military Justice, and Teaching Methods.

Comdr. M. E. Zimmerman, MSC, USN, Commanding Officer, NSHA, introduced the guest speaker, Lt. Comdr. L. L. Isert, MSC, USN, Head, Hospital Corps, Enlisted Branch, Bureau of Medicine and Surgery. Mr. Isert gave a very interesting speech after which Lt. Comdr. G. W. Wiese, MSC, USN, Executive Officer, NSHA, handed out the certificates.

Comdr. Gilliland Satisfies Travel Yen In Adventurous Expedition to Arabia

The lure of adventure and travel lies more or less latent in each of us. Not often does one get a bit of each as neatly packaged as did Comdr. Charles H. Gilliland of the Hospital staff, on a recent trip to Arabia.

Detached in December, Dr. Gilliland accompanied the American Foundation for the Study of Man, headed by Wendell Phillips, on an archeological expedition to Southern Arabia.

The party arrived in Aden, after stopping off in Eritrea and French Somaliland. After a colorful journey to Taizz, the provisional capital of Yemen, the party were guests of the Iman, or King, for a three-day "Victory Celebration." Tribesmen from all of Yemen gathered to pay honor to the King in a most colorful ceremony.

The group then went to Marib and joined an advance party already at work on the great Marib ruins, long famous, but never visited by outsiders because of a stringent ban. Here on the edge of the Great Arabian Desert the party excavated a beautiful 2,600 year old "Moon Temple" of finely cut stone, decorated with bronze and alabaster statues, and a magnificent courtyard enclosed by a great wall, thirty feet high and ten feet thick.

Long hidden graves and thousands of delicately cut inscriptions in ancient Himaritic were uncovered. A few miles away are the ruins of the great Marib dam, mentioned in the Koran. Fourteen hundred years ago, it broke, forcing a whole civilization to migrate elsewhere or starve.

Due to local unrest, the expedition was soon forced to withdraw from this area. After a trip through the Wadi Beihan, also replete with ancient ruins of the spice route, the party returned to Aden.

Mr. Phillips and Dr. Gilliland then boarded a Dutch freighter and sailed to Muscat in Oman, South East Arabia. Here they were graciously received by His Highness, the Sultan of Muscat and Oman.

His Highness is a handsome man who speaks English quite well, has visited America, and is very proud of having been received by President Roosevelt with whom he exchanged gifts.

After a week in the Muscat the party joined forces 800 miles west along the coast at Salalah where the expedition is now excavating extensive ruins.

This is the most beautiful part of Southern Arabia. Sparkling beaches, palm groves, and mountains remind one of Hawaii. Gazelle and fish are plentiful. Here the Sultan's wife and 12-year-old son live in one of his palaces.

Tropical diseases are rampant in

Comdr. Charles Gilliland

Southern Arabia. It is indeed fertile ground for medical study and for building good will.

In Yemen, with 4,000,000 population, there are only four trained physicians. There are also four in all in Oman. Salalah is many days journey by camel from the nearest doctor. The most common therapy consists of branding the diseased or painful area with a hot iron. Men, women, and children bear the scars of this formidable therapy.

In Arabia a physician is held in very high esteem. The word for doctor, "Hakim," means "wise one." A small investment for medical care to these people can accomplish a great deal in good will.

Dr. Gilliland spent a week in Cairo and visited Namru 3 Unit there. He reports that Capt. Saperro, Lt. Comdr. Floyd, Dr. Hamilton and the rest are doing a fine job scientifically and diplomatically in that troubled city.

Using a Cine-Special, a Leica and an Exakta, over 2,000 feet of Kodachrome movies and 200 colored photos were taken.

It was with deep regret at leaving new found friends in dire medical need, and elation at returning to his family, that the doctor returned home.

On July 10th, Dr. Gilliland leaves his duties here and accompanied by Mrs. Gilliland and the four "Gremlins" will go to the USNH, Jacksonville, where he will assume duty as Chief of the Department of Obstetric and Gynecology.

NSHA Presents Diplomas to 117 Qualified Enlisted Students at Graduation Exercises

117 NEW GRADUATES OF NSHA and members of staff are: front row—A. W. Espinosa, HMC; A. C. Conner, HMC; C. O. Wimberly, HMI; J. A. May, HMC; J. Beck, HMI; V. H. Jones, HMC; H. B. Wright, HMC; J. T. Alham, HMCA; P. H. Shedd, HMC; G. A. Nyman, HMI; J. Allen, HMC; E. R. Jones, HMC; A. F. Pergolizzi, DTC; N. J. Gambill, HMCA. Second row: H. M. Goddard, HM2 (staff); G. E. Bachert, HMI (staff); H. M. Kempeel Jr., HMC (staff); G. R. Dick, HMC (staff); R. Meili, HMC (staff); E. F. Rogers, HMC (staff); R. C. W. H. C. W. J. Shaffer (staff); CWOHC W. G. (staff); Lt. Comdr. J. M. Rutter (staff); Comdr. M. E. (staff); Lt. Comdr. H. H. Laramore (staff); Lt. G. Cartier (staff); CWOHC F. C. Barbee (staff); D. M. Wylie (staff); Ens. F. E. Liedtke; Ens. C. R.

Johnson; H. M. Marshall, HMC (staff); W. T. Smith, HMC (staff); J. W. Guinn, HMC (staff); W. C. Henderson, HMC (staff); C. E. Wilson, HMC (staff); and N. M. Calhoun, HMI (W) (staff). Third row: J. B. Crawford, HMC; T. J. Hornbuckle, HMC; W. E. Parker, DTC; R. L. Gill, HMC; G. W. Garnett, HMC; E. L. Ralston Jr., HMC; R. W. Sexton, HMC; H. J. Skov, HMC; C. F. Olson, HMI; P. H. Oxford, HMC; E. M. Rock, HMC; M. H. Bye, HMC; J. K. Butler, HMC; G. M. Heath, HMC; R. M. Brewer, DTC; M. D. Hendrix, DTC; W. K. Nelson, HMC; J. H. Vinson, HMC; J. H. Yennie, HMC; W. A. Ryan, HMI; R. D. Maxwell, DTC; T. F. Guinand, DTC; B. V. Hildebrand, HMC; A. D. Holvedt, HMC; D. A. Merklin, DTC; A. F. Wadas, HMC; H. A. Oakes, HMC; J. D. Callahan, HMC; J. M. O'Neill, HMCA (T); R. W. Campbell, HMC; D. H. Sadler, HMC; L. R. Anderson, HMI; W. M. Bird, DTC; E. M. Jones, DTC; J. F. Armstrong, HMC; F. Swanson, HMC; T. A. Sawyer, HMC; C. R. May, HMC; C. K. Fast, HMC; F. V. Smith, HMI; V. L. Hofstetter, HMC; P. M. McCleery,

HMC; F. G. Shields, HMC; J. B. MacDonald, HMC; T. J. McCarty, HMC; L. E. Peck, HMC; and J. M. Brammer, HMC. Fourth row: R. T. Lucas, HMC; G. R. Luvlin, HMI; C. K. Davidson, HMCA; B. H. Stephenson, HMC; E. H. Tibbitts, HMI; A. L. Lane, HMC; R. W. Krollman, HMI; R. L. Reese, HMC; V. M. Roper, HMC; D. H. Davis, HMC; B. M. Kosmicki, HMI; E. T. Snow, HMC; B. Barbo, HMC; L. Hasty, HMC; T. J. F. Costello, DTI; J. R. Conway, HMI; P. F. Bennett, HMI; C. A. Thompson, HMC; J. E. Joy, HMC; V. C. Katcher, HMI; G. G. Forrester, HMI; J. R. King, HMI; T. L. Hughes, HMI; S. H. Jones, HMI; W. M. Jacobs, HMI; R. T. Klein, HMC; S. W. Brown, HMC; R. C. Smith, HMC; D. H. Turner, HMC; C. A. Tucker, HMC; R. Yelton, HMC; M. E. Ehle, HMC; L. H. Weber, HMC; G. E. Weedman, HMC; J. Van Pamel, DTI; G. H. Zegalia, HMI; J. A. Gonyo, HMC; R. C. Jefecoat, HMC; D. J. Loselle Jr., HMC; A. Bosch, HMC; W. Beckley, HMC; L. H. Webb, HMI; D. E. Tapscott, HMC; J. E. Farrar, HMC; B. C. Freeman, HMCA (T); C. W. Miller, HMC; and W. D. Bortmas, HMC.

Navy's Only Feminine Parasitologist Performs Medical Research at NMRI

Over in Bldg. 21, more commonly known as the animal house, works the only woman parasitologist in the Navy—Lt. Margaret Stirewalt, MSC, USN. Dr. Stirewalt and her crew of four are tracing the pattern and mechanisms of schistosomes—that is, they are studying blood flukes.

The resulting infection from these parasites of man's circulatory system is prevalent in the tropics and it has been estimated that one twentieth of the world's population have diagnosed cases of it. So far it has not invaded the States.

The infection itself is as old as the Egyptian mummies, and this particular project has been going on at NMRI for the last seven years. Mice and hamsters are used in the search for a cure or a means of inhibiting the penetration of the parasites, or ways to develop immunity.

Devoted as she is to the job which she says is "just the sort of work I always wanted to do," Dr. Stirewalt also finds time for her other interests. She likes tennis, hiking in the mountains, playing the piano—she prefers the classics—or working around the house she shares with three other women on Jones Bridge Road.

Speaking of houses, faced with the apartment shortage when she arrived in Washington, Miss Stirewalt found a unique solution. She and a friend bought a 40-foot cabin cruiser, kept it near the Washington waterfront and lived in it for seven years.

Life in the "house boat" had its advantages such as a sailboat tied along side, but then as the lieutenant said, "We didn't get any sea pay for it."

With nine years in now, Miss Stirewalt plans to finish out her

LT. M. A. STIREWALT prepares to examine some snails under her microscope. These snails are the intermediate host of the parasites on which she is doing research.

20. She holds a BA, MA, and Ph.D. from Macon College in Virginia, Columbia and the University of Virginia respectively.

Center All-Stars Down Photo Center

The NNMC All-Stars took the measure of the strong PRNC League team from the Naval Photographic Center at Anacostia on June 11 in a 3-2 win in an exhibition game here.

Tony Pergolizzi of NSHA turned in a masterful no-hit pitching performance for the local team. In the seventh, Patterson of Med School took the mound and in a brief but brilliant relief stint, also allowed no hits.

The game was broken up in the last of the seventh when, with the score tied at 2-2 and men on second and third, Brothers of NNMC smashed a solid drive over short stop to drive in the winning run.

'Short Men Live Longer' Says College Professor

(AFPS)—Ripe old age is one advantage short men have over their taller friends. Studies of body types have revealed that on an average, tall men do not live as long as short ones.

Dr. William H. Sheldon, Columbia University researcher, says many physicians are aware of the tendency of short men to live longer. He noted that Dr. William James had speculated on the wisdom of under-feeding small children to prevent rapid growth.

'Boots' Plays a Close One at Home

READY FOR THE HOME THROW, "Boots" Carlson, catcher for the women's softball nine, guards home plate in a close play against the Henderson Hall Marines. Later in the same game, "Boots" collided with the first baseman Fowser, receiving a head injury which sent her to the hospital for a week and a half.

News Shorts from the Editor's Desk

(AFPS) The latest word from Washington says:

The House Armed Services Committee has ruled out action immediately on a combat bonus for servicemen fighting in Korea. The committee completed its work prior to a summer vacation by approving a military construction bill and a bill to continue \$100-a-month bonuses for doctors and dentists who voluntarily enter the Armed Forces.

The Association of American Railroads has extended until June 30, 1953, the cut-rate furlough fares allowed uniformed servicemen traveling at their own expense.

The Government has decreased down payment requirements on the purchase of homes by veterans. The reductions, announced by the Federal Reserve Board and the Housing and Home Finance Agency, range from no down payment on homes costing \$7,000 or less to a 35 per cent down payment on homes costing \$25,000 or more. Time limits for paying off mortgages were not changed.

All of the WWII family allowances granted servicemen under section 515 of the Career Compensation Act, will expire June 30, even if the serviceman is serving after that date due to extension of his enlistment.

The Veterans Administration has announced that only 100,000 NSLI second dividend accounts throughout the Services remain to be paid.

The Navy has approved a standard design tie clasp as an optional uniform item for its personnel. It will be a slender, gold, undecorated bar-style clasp with clasp fastener and should be available at Navy exchanges and ship's stores.

Gals Take 2nd Loss From Qtrs. 'K' Waves

Bethesda's women's softball team took its second league loss on June 19 when they came out on the short end of a 20-8 score against the visiting Quarters K team.

Both blue-clad teams played sloppy ball, and the absence of pitchers McQuarrie and Bramlet and catcher Carlson was sorely noted. Such gross errors as failure to lead off base, failure to take free steals, and failure to tag up and run after a caught fly were common occurrences.

Ellis pitched her first league game for Bethesda. Although she throws a slow ball, she was accurate, allowing only three walks, and playing heads-up ball.

Cox played her usual good game, scoring a double at bat, and running down two of the opponents to tag them out. Crouch was high batter with two hits.

Quarters K took the lead in the first inning and by the end of the sixth had piled up an 18-2 lead. Bethesda rallied in the seventh and sent five home as Quarters K scored two more to wind it up 20-8.

Allen, in as catcher, injured her ankle in the sixth and had to have a substitute runner.

July 1—Bolling AFB	H
8—Quantico	A
15—Ft. Myer Wacs	H
22—Ft. Myer Wacs	A
29—WRAMC Wacs	H

And They Can Still Play Cards?

FINDING THE PATIENTS in the midst of a card game, Eva Gabon, movie and TV star, stops to chat. The actress visited throughout the wards on June 11. Patients are (l. to r.): Master Sgt. Albert Maxey, Master Sgt. Morris Shelton, Evlan Robbins, RM3, and Joseph Blanchard, RMC.

Looking Back

Once when I was feeling lonesome
And my spirits were kind of low
I got to thinking fondly of
Sweethearts I used to know.

There was Dotty with her dimples
She had one in each cheek
I used to hang around her parlor
Almost each night of the week.

Then along came a city fellow
While I was only a country lout.
In a short time I was finding
He was in and I was out.

Then I fell for red haired Gracie
With a face and form divine.
But I lost her to a fellow
Whom I called a friend of mine.

Well, I decided I would take time
To go hunt them up and see
How each one was getting along
How each of them might be.

I found Dotty with her dimples still;
Also seven children now.
She had stringy hair and no teeth,
Had grown bigger than a cow.

Next I hunted up my Gracie
With the face and form divine.
If she had to be somebody's wife
I'm darned glad she wasn't mine.

I was no longer feeling lonesome
And my spirits were on high.
I was glad I stayed a bachelor
And I'll stay one till I die.

Although I'm not the handsome kind
I am glad I missed the chance
To be the father of ten kids
And wear patches in my pants.

—A. H. JONES, Civilian Guard

Mrs. Rosenberg Asks Congress to Divide Service of Reserves

(AFPS)—Assistant Secretary of Defense Anna Rosenberg has suggested to a Senate Committee that active duty and Ready Reserve service be subdivided on an even basis of six years.

This would mean an increase in Ready Reserve time over those limits outlined in the House-passed Armed Forces Reserve Act. Mrs. Rosenberg made her suggestion during the Subcommittee's hearings on the Reserve bill.

The House-passed version would require inductees entering the service on or after June 19, 1951, to serve three years in the Ready Reserve (Active) before going into the standby Reserve. If they elected to remain on active duty for four years they would eliminate their Ready Reserve time and go right into the Standby Reserve.

Enlistees under 26 at the time of enlistment after June 19, 1951, who served four years on active duty would also go directly into the Standby Reserve. Enlistees who serve less than four years on active duty would be required to serve in the Ready Reserve for three years.

Mrs. Rosenberg's suggestion would make the entire active duty-Ready Reserve service a six-year proposition. Inductees would serve four years in the Ready Reserve after two years service.

Docs Complete NMS' Basic Course

TWENTY-EIGHT DOCTORS graduated June 13 from the Officers' Basic Course in Naval Medicine conducted by NMS. Front row: Lt. J. H. Dinsmore, Lt. C. H. Gray, Ltjg. N. V. Cooley, Lt. H. O. J. Silliphant, Capt. J. L. Enyart, Commanding Officer of NMS; Lt. F. G. Osborne Jr., Lt. M. B. Sullivan Jr., retained at NH; Lt. R. P. Smitley, and Ltjg. J. E. Clark, retained at NMS. Second row: Lt. R. W. Spicher, Lt. F. L. G. Lt. G. A. Brennan Jr., Lt. A. Cannon, retained at NMS; Lt. C. E. H. branson, retained at NH; Ltjg. J. W. Lee, Lt. R. C. Drips, Lt. M. G. Wilber, Lt. T. G. Price, and Lt. W. G. Mask. Back row: Lt. C. E. H. liby, retained at NH; Lt. R. G. Ireland, Lt. P. R. James, Lt. J. R. Fish, Lt. T. W. Yetman, Lt. J. P. Allan, Lt. R. D. Otis, Lt. J. R. Fish, Ltjg. F. B. Rogers, Lt. F. X. MacAulay, retained at NMS; and Lt. D. B. Johns.

JULY 30, 1952

Coach's Corner

FROM THE CORNER'S SCRAPBOOK: The Varsity softballers are in undisputed second place in the local service league as this paper is put to bed. Coach Bob Jaeger's boys are hustling on the basepaths with all the speed of a half-mile relay team. Playing host to the birdboys from Patuxent the other night, we were on the short end of 2-1 count in the last frame of the seventh inning, two outs and a man on second. Pat White smacked one off the glove of the chucker and in the chaos, Goda spiked the rubber . . . game tied up. Pat stole second, Rocky walked change of pitchers for the airdales . . . on the first ball pitched Pat burglarized the torrid corner. The flyers' bench at this point was visibly upset which, of course, added to the pitcher's composure. On the next pitch, Pat went home like a runaway stage on Frontier Theatre, and the Admirals chalked up another win.

In the First Flight are such campus notables as Jim Crawford and Jackson Dunn, the fairway twins, who enjoy taking unsuspecting two-somes into camp by such tactics as shooting a best ball six on the first hole and then wind up with even pars after the wagers (friendly) are made . . . Capt. Bart Hogan, genial skipper of the Hospital, finds the course easy after playing Sequoyah in Oakland . . . Cornell Brothers, the station's all-round athlete, who started playing the Scotch game this spring at the insistence of the fellow who can take quarters from him at mid-court . . . Mack Parker, known to his intimates as Whisper, the soft spoken Texan, can waggle a crisp wedge . . . Connors, whose fame with a putter is worrying the Center gendarme Dapper Dorosz, and Woody Teeter from Research, round out the first flight. Second Flight finalists Giorgio and Bachar had no easy path to the showcase. Eide and Homer Warden were witnesses to the anesthetist's irons in motion while Honest John Bachar treated Capt. Evans and Duckworth to a free show of now you see it, now you don't, when the Bachar wand stroked the ball on the carpet. To win the cup, Honest John administered the tee anesthesia to the campus fashion plate, Chartreuse Giorgio.

The Varsity journeyed to Bainbridge, the former site of the Tome School for Boys, and received a lesson in Casaba Wizardry, a major during the spring semester at all schools, coast to coast. Interested spectators at the classroom demonstration of motor skill, as an organized pattern of perceptions and physical movements, were the ever popular Center cage adherents Hollis Torch Murphy, Moose Barker and Clark DeVol, whose occasional outbursts could not disturb the lecture of Prof. Summit, the Bainbridge coach.

A few nights back, the Second Annual Center Table Tennis Tournament was held in the gymnasium. In the upper bracket, Rol Richards, the well known apothecary from the prescription counter of Chief Eischeid, demonstrated mastery of the deep baselines to bench Evans of the NP service. Rol's skill in interpreting the various specimens of penmanship that cross the counter of a pharmacist stood him in good stead in solving the attack of R. W. Morrison of the board room. Sgt. Tolbert of the fly-flies tangled with Rol in an aerial circus, with the ball in one rally being returned 15 times before the Navy gunner walked off with Tolbert's Fifty Mission crusher, sangfroid and all. Swivel-tipped J. C. Woods, a gridiron stalwart of the Commanches, displayed cat-like agility in bouncing from one corner to the other in pursuit of celluloid as Richards banished J. C. to the showers. The lower bracket pitted Cornell Brothers in a ding-dong encounter with Falstaff Reynolds. Tommy opened up with the tactics that eventually carried him through to the top; a hard, deep serve to the far corner, a return to forecourt followed with a smash to the baseline. Having tasted a hard-earned victory, Tom coasted by Scribner to meet Taps Ford, whose marcel is the envy of the other side of Bldg. 123. Brothers threw the book at Taps, with cross-court shots that had Taps on one knee. Forehand smashes drove Ford fifteen feet from the table, with Taps returning ball after ball while Brothers moved in relentlessly for the kill . . . upstate New York elegated the Jersey bounce to the sidelines to meet another tartar from Dental in the person of Ronald Wiffin whose ability to twirl a plaster batula was not up to the wrist action Cornell has developed in handling rubber stamp for Uncle Sam's postal service.

The highly touted Fort Myer rebounders were guests of the Center coopers a few days before the Xmas leave period. Providing a warm reception for the visitors in the form of ego deflaters were the following: George Funk, Ronnie DeVice, Ace Wilson, Hands Davis and Cornell Brothers, whose cherubic Irish countenance was wreathed with sycophantic smiles as he burned the soldiers' twine . . . opening bucket as a charity toss by Cornell . . . side-set by Sheil . . . submarine flip . . . Sheil off the key . . . Cornell through the slot . . . off the boards with a beautiful tap by Funk . . . Ronnie slipped through the defense rebound triangle . . . Funk fish-hooked for two . . . Brothers to Wilson to Funk on a post-split; superb cutting on that one . . . the dog-eaters took a charity and followed with an outside set by O'Keefe . . . Brothers slid under the prehensile arms of Browne.

Bud Maltesta and his brush wielders have decked out the goal posts green and white. Yardage chains, down markers, three officials—all helping to make the tough football program (who said TOUCH?) a hale of a success. The other afternoon around five, saw the Commanches edge out NP with Cornell Brothers tossing the pigskin with the deftness of Whip White, Varsity mound ace . . . Gallucci proved a wer of strength in the Commanche line with Goda and Tiger Mosley meining through the tackle spots with ease . . . George Funk had two on his track most of the afternoon so Fatso had to pick another target. Lefty Sickles, Soeks Bachar and Falstaff Reynolds caught the back's eye with their capable job of officiating.

The first change I noticed in the forest was a sudden silence, a hush at fell on all the singing birds; even the rustling of the leaves ceased. A peculiar whine of an uncoiled automatic reel punctuated the silence, a sharp reminder of a Japanese Nambu. Looking up, I saw a fellow experienced that peculiar feeling we have all known. I felt that something or, something, was 'secretly looking at me. I thought that I might whistle a little tune, "To the Shores of Tripoli," just to encourage my- and the other whistlers. I refrained and slowly inched forward, marking the recurring cheerful chatter of the pool, when I saw two deer, of a size, peering sedately out of a bank of rhododendrons. Their eyes d ears were turned toward a clearing where a vista of grass and violet oves arched between two massive gray rocks, greened by moss. My ling was that of an intruder. I felt I should retrace my steps, but re I stood fascinated by nature's tranquility, like a small boy with up- ned nose pressed against the window pane of a pet shop. I followed

NSHA Captures 1952 Softball Crown As They Play Off Tie with NH Docs

NSHA copped the 1952 intramural softball championship and relegated the NH Doctors to second place when they downed the doctors 9-7 on June 18. When "play ball" was called on field one, the two teams were tied for the winners' trophy with eight wins and one loss apiece. NSHA jumped off to a four-run lead in the first inning. The doctors came back in the second to tie it up 4-4. In the fourth, NSHA scored three times and pounded in two more in the sixth for a comfortable 9-4 lead.

In the last half of the exciting seventh inning, the doctors squeezed in three scores before going down to the final count of 9-7.

the gaze of the deer, my pulse quickening. To my astonishment, I was looking right into an eye gazing over the top of the rocks. Like a burnished oval of copper, this eye blazed me with its power. I made out the jaunty curve of the beast and one or two other details, such as a wattle, but the majestic serenity of that withering gaze fascinated me. Next, there came a shadow on that mossy strip, and at a proud pace my first wild turkey paraded into full view. His bronze wings and glittering chestnut tail, equalled in beauty by the sweeping back, burned against the green like an autumn fire. I slipped away, clothed in that contentment akin to having visited an age-old cathedral. On the road back to the lodge, I came upon my fellow intruder, a sports writer from Gotham, and there ends the tale of my trip to the Tobyhanna.

The above were some of the paragraphs which caught the Coach's memory as he essayed an ALOHA COLUMN.

Tony Pergolizzi, hurler for NSHA, allowed the doctors five hits, while Dr. Peck gave up nine to NSHA. Both pitchers helped their own cause along by garnering two hits apiece.

Thomas, right fielder for NSHA, was leading batter for the night, hitting three for four.

This concluded the 1952 season with Med School taking third slot, and the NH Corpsmen anchoring down fourth.

Notes and Quotes

Navy Belles

As I look for something to tell you, I find that someone painted our front door and porch while we were away.

The girls from Lab 18 spent hours helping Beth get married on June 20. She is now Mrs. Ken Flown. The barracks celebrated all weekend finishing up the ham sandwiches and wedding cake that was left after the reception at the American Legion.

Our softball injury (Boots) is back on duty. Well, Boots, what next? ... Mabel can count backward better than forward these days ... Ruth Clarkison is back from TAD school at Norfolk.

Lesley Evans is collecting fishing tackle ... Ann Livoti is back to duty after setting up housekeeping ... Lou, which color pajama do you like best? ... Mike, I hear you want to drive elevators when you get out of the Navy.

Besides being a first baseman, Elaine Fowser can also cook beans and gravy and work a deep freeze. Another newcomer to Hospital Command is Edith Weatherall, HA, who reported in from Bainbridge.

Also in from Bainbridge (a la 0200) is Patricia Sappe for Hospital Command. Jane Brown took advantage of Leap Year via long distance telephone to California. We hear the answer was yes. Did you say August, Jane?

Mike Bullard is complaining that she doesn't stay the same weight long enough to have her clothes altered.

The new furniture for our lounge has been approved and ordered and we can expect to see plenty of lime, yellow and grey around the end of July.

NMRI

by C. Connor

There always seems to be people coming and going at the Institute. This past week we lost L. W. Williams to the USS Maury; M. D. Misenhimer to the USS Los Angeles; and R. N. Rossan to the USS Passumpsic.

Aboard for duty from Fort Knox, Ky., comes Lt. L. J. Bondenlos, MSC; Lt. J. W. Millar from Boston, Mass.; A. T. Morrison and B. G. Young from Philadelphia, Pa.; and P. J. Vezinat from Naval Medical Unit, Tripler Army Hospital.

A "welcome home" is extended to Lt. H. T. Meryman, who has returned to the staff of NMRI, after an absence of several months with the Army in Korea.

After a pleasant leave spent in Atlantic City, Hammy Brooks is right back to the "old grind." Right Hammy!

"Clear eyes" do not necessarily mean "a clear head" do they, Vic? What's the scoop on these "smart pills" I hear you are taking, Red? Looks like Nick did it again; that poor Renault of his is jinxed all right; or maybe the other driver just didn't see him.

J. Black, HM3, walked down the middle aisle at Chelsea, Mass., to exchange vows with another sailor (Wave that is), on June 21.

I hear that Red and Nick have "things" brewing again. No explosions this time, I hope.

Mabel has turned seamstress in her spare time; what with fixing sleeves for certain people and drapes for the Chief's Club. Think I should take some instructions; my hem line goes up and down like the waves on the ocean.

Dental Explorer

by R. Conaway

Does your cigarette taste different lately? If so consult "Sunglasses" Duff in Rm. 128. Being a man of many talents his latest is rolling his own cigarette (Bull Durham at that). After having walked a mile, exhaled the smoke through his nose, etc., he has finally decided that his own are the best. Chief, it's being able to do it with one hand that counts. Do you qualify?

Mrs. Mac (Oral Surgery) sure has been wearing a great big "Ipana" smile since her husband received his promotion. Who says Christmas can't come in June, Mrs. Mac?

Well, Platter is perched on the edge of his seat just waiting for the word to GO. Yep, only two more days in this man's Navy and he'll be packing his blues away again. Sure would like to know why he grins and turns red when asked what he plans on doing when he returns to civilian life.

Dr. Hughes has earned himself a nickname and so soon too. He can now be called Dr. "Shanghai" Hughes. I suggest you ask him why; it makes for a pretty good chuckle. A good example of strategy and logistics, Doctor.

Will wonders ever cease? Chief Stinson is playing the part of a sea-going farmer. Unlike most sailors his conversation reverts to "radishes and other vegetables" instead of the usual hair-raising sea stories.

Dr. Chaisson is back with us once again; sort of glowing all over too. It's hard to decide whether it is due to radioactivity or the latest picture of Mrs. C. which he has been showing around. Both are capable of causing him to light up the way he does.

Welcome aboard to all members of the new PG class who will be with us for the next six months.

Seen on the green recently, aiming for that hole in one, were Capt. Grunewald and Dr. Blackstone. The results were very interesting. The winner inasmuch as figures were concerned, was Dr. Blackstone, but when it came to the financial aspect of the game, why our Exec. came out on top.

Wherley has only 12 more days to go before he can get started in the fruit and vegetable and Christmas tree business. He has his staff well planned. The only thing he lacks is a lemon picker. How about it "Pancho"? There's only one hitch—lemons and chili don't mix.

Scotty Goes Down, Chow Tray and All, To 'Anchors Aweigh'

The Wafs still think it was the Navy's songs, but "Scotty" (Marcia L. Scott, HM2) swears it was a slippery deck which sent her tray crashing to the floor as she was going through the chow line at Lackland Field, Tex.

Scotty was on a 30-day leave, taking Air Force hops around the country when she stopped at Lackland. Seeing the Navy uniform, the Wafs burst forth with a rousing chorus of "Anchors Aweigh" which took Scotty by surprise.

She and another Wave started on their month's tour of the country last December after graduating from Phys Med school here. Via Air Force planes they visited Boston, parts of Illinois and Texas, and New Orleans, taking the first flight available regardless of destination.

Raised on Martha's Vineyard, a small island off Massachusetts, Scotty graduated from high school there before enlisting in July 1949. After corps school at San Diego and duty at Portsmouth, she came here a year ago to attend Phys Med school.

Assigned to the Occupational Therapy Department now, she is

Marcia L. Scott, HM2

in charge of the graphic arts section which includes printing, painting, and silk screening.

In her spare time, the 23-year-old Wave finds time for enjoying her record collection, dancing, playing left field for the softball team, bowling, swimming, and occasionally writing poetry for her own enjoyment.

With her black hair and dark dark brown eyes, she greatly resembles Mary Casillas, former Lab 18 student—a similarity which often led to confusion and many laughs. For instance, when Mary sang a solo at the protestant services, Scotty received many compliments on her voice.

As for the future, nothing is too definite except plans for another jaunt around the country when its time for leave again.

"No, I've never read the dictionary. I'm waiting until they make it into a movie."

She Smolders!

RITA GAM SMOLDERS a little, to show her "ability to project an appeal without uttering a word," which prompted a movie producer to sign her after seeing her on television. She will appear with Ray Milland in "The Thief," a film in which none of the actors speak. Rita plays a charmer who keeps Milland speechless throughout the film, though she is never closer to him than five paces.

Karos' Nurse Has Nothing But Praise For Work Done by the Senior Corpsman

Puttering around the dressing room on ward 3-C, where he is considered by his nurse as one of the ablest corpsmen she has ever met, George Karos, HN, USN, displays a keen interest in his work and toward his patients. As the senior corpsman of that ward, his

After high school, Karos poured over his books for the next year and a half at Shepherd's College, Shepherdstown, W. Va., where he followed academic subjects.

Realizing that the things in life worth having are those things worth working or fighting for, Karos took part-time work in drug stores during his college days to offset expenses of his education.

The Navy extended her arms to him March 14, 1951, and guided him through that hectic period of recruit training at Great Lakes, Ill. Occupying a seat in the Hospital Corps School at Bainbridge, Md., young Karos pondered over his studies which qualified him for duty here.

A two-letter man in basketball during his public school days and a two-letter man for high school basketball, Karos has also held guard position on the American Legion Basketball teams.

A member of the National Honor Society in high school, and later of the Theta Sigma Chi fraternity in college, Karos has proved his popularity both in the service and out.

At the expiration of this current enlistment, Karos' future plans include returning to a school of pharmacy.

Doctor: "Ask that accident victim his name, so we can notify his family."

Nurse (a few minutes later): "He says his family already knows his name."

"Darling, I have missed you. Her voice was full of pathos. So she lifted the revolver And fired at him again."

George Karos, HN

devotion to duty is matched only by his co-operative manner toward his co-workers.

Introduced to the world on Sept. 10, 1931, George soon gained society's attention in Martinsburg, W. Va.

Butcher: "Here's a nice ham-bone cured."
Mrs. Fatbrayne: "But I want one that's never been ill."

A gambler's funeral was well attended by his professional cronies. "Our friend Rocky isn't really dead," the speaker intoned. "He's just sleeping."

From the rear of the room came a voice: "I've got a hundred bucks that says he's dead!"

Beneficial Suggestion Box Pays Off Cash Awards and Commendations

REIVING CASH AWARDS or letters of commendation for their beneficial suggestions are: Mr. Irving L. Oliff of the Food Service Division, Thomas E. Blue of the Security Division, Mr. Sidney S. Greene of Finance Division and Mrs. Mary A. Hottinger of Food Service Division. The awards were presented by R. Adm. B. Groesbeck (center) Commanding Officer, NNMCC.

pays to feed the kitty when the kitty is the Beneficial Suggestion. On Friday morning, June 27th, three civilian employees were presented with checks and two with Letters of Commendation by Admiral Groesbeck for their suggestions.

Mrs. Mary Hottinger, clerk typist in the Food Service Division, presented with a check for \$10.00 for her suggestion to serve hot food to the wards in thermoset rings.

Twenty-five dollars wealthier is Sidney S. Greene, storekeeper, Finance Division, Material Branch, for his suggestion to install a telephone in Warehouse 152.

A vacation fund is enriched with \$100.00 for Mr. Richard E. Floyd, sheet metal worker, Maintenance Division, because of his idea of constructing a double deck open cart for holding soup and thermos in the Food Service Division.

Thomas E. Blue, Security Division, received a Letter of Commendation for his idea to relocate the sign at the NNMCC gate on Bridge Road.

Angling gooseneck pipes on tables to inside flush necks. Mr. Irving L. Oliff, fiscal clerk, Food Service Division, received a Letter of Commendation.

Address for NNMCC

Do you ever wonder what the street number of the National Naval Medical Center was? Well, nobody wondered a short while ago and it was discovered, after many inquiries to the Montgomery County officials, that there was

last month the Maryland-National Capital Park and Planning Commission assigned a number — anyone asks you, we are located at 3901 Wisconsin Avenue.

VA Advises Waiver Of Term Insurance And Allotment Halt

Washington (AFPS)—Records of each Service reveal that tens of thousands of servicemen are losing money by failing to waive their NSLI term insurance premiums. (Do not confuse this with permanent plan NSLI policies, for which the procedure was explained in the last issue.)

If you are an NSLI term insurance policy holder, you should request a waiver of premium (if you have not already done so) from your personnel officer. At the same time you should discontinue your premium allotment. If you don't, you're needlessly throwing money away.

Servicemen who held NSLI term insurance policies should have waived their premium immediately upon passage of Public Law 23, Apr. 25, 1951. Many did not do so, believing that if they waived their premium they would lose some of the benefits of their NSLI term policy.

This is not so. All the rights and benefits of their NSLI term policy remain intact when they waive their premium.

For those who still remain to be convinced, here are some figures to further prove the point:

If, for example, you're 18 years of age and did not waive your premium, you're paying 64 cents every month for each \$1,000 you have in NSLI term insurance. If you have a \$10,000 policy then you're paying \$6.40 per month.

Because you're still paying your premium, you're entitled to approximately 50 cents a month per \$1,000 insurance in dividends. You paid \$6.40. You get back \$5.00. What happened to the difference of \$1.40?

You lost it without getting any additional rights or benefits. On a yearly basis that would amount to \$16.80 in needless loss. At other times you pay higher premiums and therefore would lose more money.

Army's New Salt Pill Ends Stomach Distress

(AFPS) — A new salt tablet has been developed that is acceptable to all troops. During WWII approximately 30 per cent of the soldiers suffered stomach distress upon trying the standard, fast-dissolving salt tablets. The tablets were required in extremely warm climates.

Each crystal of the new salt tablets is coated with cellulose acetate which permits slow dissolving and avoids release of a sufficient quantity of salt to cause stomach distress.

The new tablets can be stored for long periods without deteriorating, will not absorb moisture from the air, and will withstand high temperatures and rough handling.

Mrs. Eleanor Roosevelt Describes Progress of Women in Far East

ON HAND TO WELCOME Mrs. Eleanor Roosevelt at the final NMS guest lecture were R. Adm. B. Groesbeck Jr., Commanding Officer of NNMCC, R. Adm. H. L. Pugh, Surgeon General of the Navy, and Capt. Winnie Gibson, Director of Nurses. Admiral Pugh introduced Mrs. Roosevelt to the audience.

A little neck craning was excusable Friday, June 27, at the final lecture of the 1951-52 series of NMS guest lectures. The speaker, one of America's outstanding women, and the first woman ever to speak at these lectures, was the former first lady of the land and today's foremost feminine advocate of the United Nations, Mrs. Eleanor Roosevelt.

Korean Vet Bill Awaits Signature

The Veterans' Readjustment Assistance Act of 1952, more commonly known as the K-Vet Bill, needs only the signature of the President to become law as this paper goes to press.

Of major interest to Servicemen are the portions of the bill granting educational benefits and mustering-out pay.

All members of the Armed Forces are eligible for up to 36 calendar months of education or training, accrued at the rate of one and one half days for each day of service on or after June 27, 1950.

Persons who are eligible under the Serviceman's Readjustment Act of 1949 as amended, are also eligible under the new bill and may take advantage of both bills up to a total of 48 months of training.

Monthly allotments will be paid directly to the veteran and he must pay his own tuition, and all other costs involved in his education. Full-time single students will receive \$110 per month; men with one dependent, \$135; and men with more than one dependent, \$160.

The bill provides for mustering-out payments for all men who have served since June 27, 1950 at the rate of \$100 for service less than 60 days, \$200 for more than 60 days, and \$300 for service overseas.

Mrs. Roosevelt's speech, given to an audience consisting of hundreds of nurses and guests, dealt with her recent trip to India and Pakistan with emphasis upon the recent emergence of the women in these countries.

Repeatedly she stressed the rising importance of women in these new states. Lacking governmental welfare funds, the "well-to-do" women repeatedly are undertaking the support of hospitals, clinics, and schools to aid the sick and illiterate.

Even more, these women are working in areas and under conditions which Mrs. Roosevelt describes as "shocking," to bring some measure of medical relief to the thousands requiring it.

She went into great detail of the life of India's women before the emergence to show the great change. Their life was (and the majority's still is) a strict adherence to the pundit law, the Hindu law ruling conduct and actions.

One of the greatest factors in the breakdown of this cloistered existence was the great migrations, following the division of Pakistan and India, of the Hindus to India and the Moslems to Pakistan.

The huge groups of refugees needed aid. Women emanated out of their former lives to aid the thousands of homeless.

A ratio of eight doctors to each nurse, an increase of 5,000,000 population per year, a life span of 28 years for the newborn, a death rate of one of every three births in the first year of life, and a dire lack of medical equipment,

Highway King

Highway king of tattered garb, what dreams burn in your breast?
What stirs your soul to wandering; your heart to wild unrest?
What gypsy spirit beckons you to seek the nomad's way;
Forsake your ties of heritage; alone, forever stray?
While I, (convention's slave) appear quite satisfied to die
Unaware your breadth of liberty and bound to custom's tie,
Am in living plagued with envy of freedom you possess
And the strange desires urging you on to wantonness.

When emerald hands of fairy spring have touched the country side,
You stroll on winding lanes to where the tiny hamlets hide.
The song of birds, breath of flowers are subjects in your court
And no conventional law holds you long within its fort.
Highways pass beneath your feet and cities beneath your eyes,
Fulfilling the whimsical desire that within you lies.
You are scorched by summer wind and sun, drenched by chilly rain,
Half frozen by the sleet and snow of winter's icy reign.
From mountain tops you scan the world, from valleys probe its heart —
Its rivers drown all foolish cares, of you they are no part.

You are a king, the world your court, yet nothing do you own!
You are richer far than any, yet wealth you have not known!
There are castles in your court — in none of these you dwell —
All the queens there are to choose from, not one is your fair belle!
Your kingdom lies unlimited, wherever you may roam
And no one place retains you long for everywhere is home.
You are free of human bondage, of rank, of class, of laws,
Yet, enslaved to wanderlust that deep within you gnaws.

A king of kings, time is your wealth and freedom is your crown,
Yet halls of fame ignore your reign, not one bears you renown.
Only I the slave of social law, wonder if your goal
Will gratify your life's desires and tame your restless soul!
Highway king of tattered garb, what dreams burn in your breast?
What stirs your soul to wandering; your heart to wild unrest?
What gypsy spirit beckons you to seek the nomad's way;
Forsake your ties of heritage; alone forever stray?

GLORIA GOSNELL BURGESS, NMRI

The Chaplain's Corner

by Chaplain Warren D. Trumbo

God's Second Team

Many people are worried and frustrated because they feel that they are inferior to so many around them. They have the idea that whenever there is a job to be done, they cannot do it nearly as well as someone else could do it. Perhaps this line of reasoning is not altogether false.

Let's face it—it is true that whatever we do, there is always someone who could do it just a little better. It reminds us of the psychiatrist who was counseling with a patient who supposedly had an inferiority complex. The psychiatrist said to him, "You don't merely have an inferiority complex; you are inferior."

But even though this is true, it is not a valid reason for us to permit the acids of anxiety to gnaw away at our systems. Regardless of how many people are more successful than we are, there is always something that each one of us can do a little better than many other people. So what is there to worry about with regard to this matter?

A good principle to follow is to do our best regardless of what our job might be, and then be unconcerned about those who seemingly are more successful than we are.

This does not mean that we should allow our enthusiasm to be dampened or lower our sights. We still need a goal and purpose in life. What we are saying is that God always has a second team and the players are just as important as those who might happen to be on the first team.

There is an old saying which sums up this idea. It goes like this: "I am only one, but I am one; I cannot do everything, but I can do something; what I can do, I should do; and what I should do, by the grace of God, I will do."

Library Advocates Humorous Stories For Summer Reading

Just what the doctor ordered for hot weather reading can be found in Crew's Library among the new books: something light and humorous which will not tax the gray matter!

How We Elect Our Presidents, for instance, is not only very funny, but especially timely. This book, subtitled **Politics is Applesauce**, contains all of Will Rogers' funniest political barbs.

Will loved political conventions and was always there with his "lariat and his grin." Here he takes apart the conventions from 1920 to 1935 and his shrewd analysis will help you understand the conventions of 1952.

Honeymoon for Seven, by Alfred Toombs, is a genuinely funny tale of the merger of two families. The groom's three youngsters, plus the bride's two and assorted cats and dogs, all try to fit into a tiny summer cottage on a Maryland farm.

The rural way of life was full of pitfalls and the author was a flop as a farmer, but he managed to write and sell enough articles to feed the family. This warm hearted and merry story conveys a real feeling of family affection.

In Tom Crichton's **Sailboat Tramp**, we follow his adventures as he meanders in his 25-foot sailboat from country to country. For three and a half years and four thousand miles his vagabond voyage goes across Europe and the Near East. As you read, you will envy him his leisure and laughter.

Burglar in the Treetops, by George Heinold, a veteran woodsman, is entertaining and humorous, but still instructive for the sportsmen and naturalists. Full of anecdotes and woodlore, the book tells strange and interesting facts about the mink, the raccoon, the red fox, black bear, muskrat, porcupine and many other animals.

Royal Australian Navy Dental Officer Takes Post Graduate Course at NDS

What would you give if you were in the position to fill out your own orders and transfer yourself to any ship, station, town or country of your choice?

Since he is the only Dental Captain of the Royal Australian Navy stationed at the Flinders Naval Depot in Victoria, Australia, Capt. Richard Woolcott completed his orders and flew here to study dental procedures as a member of the post graduate course now being conducted at NDS in the interest of dental officers.

Born in Sydney, Australia, in the year 1901, Capt. Woolcott received his degrees in dentistry after completing training at Sydney University.

Spending a short time developing a private practice in Queensland, he enlisted in the Royal Australian Navy on August 14, 1924. Capt. Woolcott received his rank of Captain in 1948 and by 1951 was appointed as the King's Honorary Dental Surgeon.

During WWII he was attached to the HMAS (His Majesty's Australian Ship) Australia, and was on board when she joined the task force which took General Douglas MacArthur to the islands in his pursuit of the forces of Japan.

An avid sportsman, Capt. Woolcott finds pleasure in all sports, especially a good game of tennis.

Displaying a keen interest in cartooning, he originated a sports strip on tennis and sold it at the age of 15 to an Australian newspaper. Through the years, Capt. Woolcott has developed a unique style in caricature design, and has sold many of his cartoons to the Bulletin, one of Australia's leading newspapers.

Though he is a world traveler, having traveled throughout most of Europe, this is Capt. Woolcott's introduction to the United States.

At present, Capt. Woolcott is visiting London, England, to witness the marriage of his son, a member of diplomatic circles who will proceed to Moscow soon.

Questioned about the possible

Capt. A. R. Woolcott, RAN

differences between the RAN and our own Navy, Capt. Woolcott stated that the primary difference lies in the term of obligations toward the service at the time of enlistment.

Enlisted personnel of the Royal Australian Navy, at the time of enlistment sign for six, eight or twelve years.

In the cases of boys wishing to make the service a career, comparatively few are chosen from thousands of applicants. A boy, his 14th year, accepted for enlistment by the members of the faculty of the Royal Australian Naval College, must be prepared to serve in the service for life.

Arriving here Saturday, May 3, Capt. Woolcott expects to complete the course of study and introduce to his people the benefits of American techniques in the field of dentistry.

School Ends for 18 P.G. Graduates

THE JANUARY-JUNE CLASS of Dental Post Graduate Officers graduated 18 officers on the 27th of June. The officers are: front row—Richard S. Hay, Lt. Richard M. Batchelder, Lt. Theodore J. H. Bay, Lt. David B. Castner, Lt. Ray C. Rummung, Lt. Roland C. Smith, Lt. Peter C. Conglis. Second row—Lt. Comdr. Eugene C. Walters, Comdr. Arthur J. Loring, Lt. Comdr. Edward R. Hildreth, and Lt. Comdr. Francis W. Cook. Third row—Comdr. Edmund H. Frizzell, Comdr. David A. Hill, Comdr. Howard W. Pierce, and Comdr. Robert B. Lovell. Last row—Comdr. James C. Reader, Comdr. Herbert J. Towle, and Comdr. Richard G. Cooper.

Diaper Derby

June 25—Lawrence Douglas Meitl, 8 lbs., 13 1/4 oz., son of Eugene F. Meitl, HMC, staff, NSHA.

June 26—Edwin John Focht, 4 lbs., 8 oz., son of Edwin L. Focht, HM3, formerly of NMS.

June 29—Susan Jo Hornbuckle, 7 lbs., 6 1/4 oz., daughter of Thomas J. Hornbuckle, HMC, USN, NSHA.

June 29—Anita Marie Lindsley, 7 lbs., 9 1/2 oz., daughter of Benjamin F. Lindsley, HMC, USN, NSHA.

min F. Lindsley, HMC, USN, NMRI.

June 30—Christopher Paul Renard, 6 lbs., 13 oz., son of Joseph Renard, HMC, USN, staff, NH.

July 6—Sandra Lee Clarke, 1 lbs., 7 1/2 oz., daughter of Robert Charles Clarke, HN, USN, staff, NMS lab.

July 7—Kathleen Tibbetts, 5 oz., daughter of Jerrold Tibbetts, HM3, USN, NMS staff.

JULY 14, 1951

Former Italian Intelligence Officer Now Investigates Animals at NMRI

The year was 1933. It was a bright, sunny morning in Naples, Italy when two carabinieri, the Italian police, met Joseph Anthony Milo, then an American student in Naples, and invited him very politely (aided by bayonets) to accompany them to the nearest police station.

There he was informed, again politely, that he was now a member of the Italian Army with the rank of Tenente, a commission equal to our Army captain.

Joe, presently attached to NMRI the Animal Psychology Department, had gone to Italy four years before to add to his education received at Boston University.

When questioned about the right the Italians to force an American into their forces he stressed a lack of appreciation that the Italians had for American passports. They believed that a person of Italian descent was an Italian citizen until the third generation. Many Americans, both during the Ethiopian War and later during the second World War, were pressed into service because of

after induction the Americans protested upon further disagreement, in the Italian Foreign Legion some far corner of the colonial empire resulted. Milo gave little comment.

His first duty with the Italian Army was aboard a ship that traveled between Massaua, near Ethiopia, Barcelona, and Naples to rescue the Italian wounded, from the Ethiopian War and the Spanish Revolution, to their homeland.

In 1935 he was transferred from duty to the Italian Intelligence Corps because of his knowledge of languages gained at American and Italian universities, and given the rank of Captain. With this corps was utilized as an interpreter spy at some of the most important political gatherings in Europe.

In this period he met Churchill, and, naturally, Mussolini to mention a few. His travels for the Italian government took him nearly every country across the European continent, from France to Russia, from Germany to England. By this time he had a villa in Italy, three servants, and an automobile.

Unfortunately for the Italians, he requested him to spy on the Americans on his second trip to England. Reaching Liverpool, Milo continued his trip without authorization to his home in Lynn, Mass.

CHECKING the animal maze graph, Joe Milo, HM2, reminisces about his life under Mussolini.

The former Italian Captain, now an HM2 in NMRI, was born in Lynn, Mass., in 1908. After his graduation from high school (Lynn Classical) he attended Boston University. In school he was a member of the Alpha Phi Delta Fraternity and graduated with a Bachelor of Science with a major in biology.

His studies in Naples consisted of medical subjects, business and languages, German, Italian, French and Spanish.

While still a student and prior to his introduction to the Italian Army he was invited by the Naples Basketball Club to act as their coach. An over-enthusiastic friend had informed them that Milo was at least a former American All-Star.

The team, made up of a prince, a marquis, and other royalty, previously had a poor record. Under Milo's guidance the club took the Italian championship, and later, beat Estonia for the European title.

At NMRI Milo is engaged in a slightly different type of intelligence work from that done for the Italian government—evaluating the intelligence of animals.

In animal psychology he works with rats and rabbits to test their time and responses in traveling a mechanical trap.

First MarDiv Holds Its Annual Reunion In Mayflower Hotel

The First Marine Division Association will establish a beachhead at the Mayflower Hotel in Washington, D.C. when it holds its fifth annual reunion, Aug. 8, 9, and 10.

Program of events for Friday, Aug. 8, include small unit reunions, a concert by the U. S. Marine band, a fashion show and other forms of entertainment for the ladies; dress parade and concert at the Marine barracks, and a moonlight river cruise.

Planned for Saturday, Aug. 9, are a parade of the First Marine Association, a memorial service at the Arlington National Cemetery Amphitheater, small unit meetings, cocktail party, followed by a banquet and dance.

On Sunday, Aug. 10, there will be a two hour association business meeting, followed by a double header game between the Philadelphia Athletics and Washington. Between games there will be a special ceremony planned for your entertainment.

Festivities for Friday, Aug. 8, will begin at 0900 and end around 0100.

Entertainment for Saturday, Aug. 9, will begin at 1000 and secure at 0100.

Sunday's program is planned to start at 1000 and end when the baseball game is over.

Tickets for the events are on sale at \$5.50 each for the banquet, \$1.25 each for the river cruise, and a fee of \$2.00 will be charged for annual dues. Price of tickets for the ball game is \$1.25 or may be less, and will be accepted at the time of checking in at the reunion.

Should you decide to register in advance and purchase both banquet and cruise tickets, deduct \$1.25 from the total and send balance. If you are later prevented from attending the reunion, notify the association and your money will be refunded.

Make all remittances payable to the Reunion Committee, 1st Marine Association, Inc., P.O. Box 84, Alexandria, Va.

Mrs. Roosevelt

(Continued from page 1)
are just a few of the medical problems met in India.

Sanitation, both personal and public, is conspicuous only by its absence in the majority of districts and homes.

When discussing India at large, she remarked that the people of India desire an equal footing with the countries of Europe and the Western Hemisphere.

They feel that their country has too long been exploited both politically and economically and looked down upon as a mere colonial acquisition.

Often in her travels Mrs. Roosevelt was met with the question, "How do you treat your minorities in the United States?" in an attempt to gauge how Americans feel toward all countries made up of peoples with different pigmented skin.

Her answer was, "By laws we have condemned intolerance for many years. That is good, but means little. Now, however, I believe that we are beginning to outlaw intolerance in our own hearts which is the important step."

In concluding she discussed the threat of communism in India. Democracy offers the Indians "personal freedom," an abstract word beyond their comprehension, while communism says, "There is one great freedom and that is the freedom to eat."

She suggested a change in propaganda tactics, aiming our arguments at something the people can more readily understand, saying, "We must show that democracy produces those things which are only promises of the communists."

Art Brown's 'Talent Revue' Features Lovely Women, Women, and More Women

ON THE LEFT is Art Brown, who will star in and emcee the "Talent Revue." Shown on the right is June Klein and five of the lovely "Miss Washington" contestants who will entertain here. Left to right (standing) are Virginia Corbin, Leoma Naughton, and Aileen Mitchell. Seated are Miss Klein, Carolyn Baker, and Iris Fitch.

Donald Raw Awaits Basketball Season

Donald W. Raw, HM3

When it comes to sports, he has one love—basketball. A three-letter man in Browns Valley High School in Minnesota, all-conference in his sophomore year in high school, and high scorer in the intramural hoopster league at Tripler Army Hospital in Hawaii, Donald Wayne Raw, HM3, of NMRI, is awaiting the NNMCM basketball season to return to his favorite recreation.

Born in Browns Valley, a small city about 300 feet from the South Dakota-Minnesota state border, Don is a member of a family of nine children.

Eight brothers and sisters kept him from ever requiring the book "How to Live Alone and Like It." Of nine children five boys are in the services and the four girls are all married to Naval personnel.

Entering the Navy in June of 1948, he has seen duty at Great Lakes, Oak Knoll, aboard the USNS Charles E. Bower, at Tripler Army Hospital in Hawaii plus the usual boot camp and corps school.

His future plans? "This Navy isn't a bad life. I just signed over for six last year while in Hawaii and will probably go all the way. By the way, shipping over in Hawaii was a little rough on the ship—over money; the liberty is too good."

Presently assigned to the information desk at NMRI, Raw is the guard mail carrier for Research and acts as assistant for the chief of the day. In his free time when not playing basketball or headed for liberty, Don likes to doodle with pen and ink in turning out cartoons.

On the 22nd of July at 1900 in the NNMCM auditorium, the patients and staff of the Medical Center will be hosts to an outstanding group of District talent.

Headed by WWDC's favorite morning personality, Art Brown, the package show also features the Miss Washington of 1951 (June Klein), five other lovely Miss Washington contestants, plus prize-winning youngsters from the Art Brown Saturday night "Starlet Revue."

This package show, which will also be shown at the Army Hospital, Walter Reed, will star Art Brown as emcee and accompanist for all the acts.

Art, who has been broadcasting in Washington for the past 16 years, sings and plays the Hammond organ, plus a host of other musical instruments.

The five comely, well proportioned, shapely, symmetrical, lovely (if you think this is an exaggeration, please look at the above picture—that's all, hey, that's all) women who will accompany Art Brown and the Miss Washington of 1951 are Virginia Corbin, Leoma Naughton, Aileen Mitchell, Carolyn Baker, and Iris Fitch.

Remember! Place—auditorium. Date—July 22nd. Time—1900.

Thanks to You

This certificate of appreciation was received by R. Adm. Groesbeck last month along with the following message:

"At a meeting of the Board of Trustees of the District of Columbia Society for Crippled Children it was voted to extend to the personnel of the National Naval Medical Center the appreciation of the Society for the contribution of \$348.14 made by your Medical Center."

"In recognition of this action I take pleasure in sending the enclosed Certificate of Appreciation. Please convey to all hands my sincere appreciation for their contribution to this most worthy cause. Very sincerely (signed) Edward F. Bartelt."

Atom Specialists Finish Classes

WEST RADIOISOTOPES TECHNICIANS graduated July 11. Front row: E. P. Resner, HMC; P. J. Novak, HMI; Capt. J. L. Enyart, CO, NMS; Brant, HM3(W); F. J. Statzula, HMC; and Ens. T. G. McMahon, HMI. Back row: L. M. Jenkins, HM3; G. W. Degen, HMI; R. K. Guidus, HM3; and C. H. Harrell, HM3.

Having satisfactorily completed courses of study since Oct. members of the fourth graduation class of the Radioisotopes Laboratory Technicians School accepted their diplomas July 11.

A comparatively new course of radioisotopes investigation addresses the skill and understanding

of well qualified personnel. X-ray technicians are carefully screened before being accepted for this particular school.

Subjects such as physics, organic chemistry, and advanced mathematics (trigonometry and geometry) are required before advanced training is begun.

Medical Photography . . . The New Eyes Of The Medical Corps

It has often been said that one picture is worth ten thousand words. This is just as true in the field of medicine as in the field of current events. Less known perhaps, to the general layman, medical photography has come to occupy an important place in the field of medicine, and allied sciences.

In the basement of Building 1, at the Medical Photographic School, a part of the Medical Photographic Department, under the direction of Mr. John T. Stringer

Jr., a small group of hospital corpsmen are just completing their training in the methods of applying photography to these fields.

The course is six months. Small classes afford each man a greater opportunity to study the camera, the art of developing, photo-copying, lantern slide technique, photomicrography, color photography, lantern and movie projection, and the production of movies.

During this six months period the student takes hundreds of pictures of pathological specimens, sections, and pictures for manuals for instruction or explanation. Photographic methods and techniques peculiar to the operating room are a part of the curriculum. Even ethics and regulations governing pictures are discussed and put to use.

On the students' initial assignments an instructor accompanies them to check their techniques and methods. After more experience a number of pictures are taken solely by the potential medical photographers.

These assignments may range from a photographic study of a section of tissue to a picture of a graduating class, from a re-touching or copy request to a picture of a sports game.

Not all the photographic work pertains directly to medical sciences. Public relations plays an important part in the outlay of the studio. The student by the end of the course is familiar with the problems met in this and in free-lance photography. An example is this newspaper. A great percentage of the pictures—sports, news and others—used in this paper result from their work.

Through the six months period, the students are given photographic projects as a test of their techniques. At the end of the year (see picture on lower right) the new Medical Photographic Technicians are required to complete a final project on any subject, this being used as a final grade. Many of the students have

received prizes in various contests for these projects.

A History of the Department

The present Medical Photographic Department for the Navy began in 1920 when two men were assigned to this type of work. Their work consisted mainly of making copies and producing lantern slides for instruction and record. Photofluorography, the technique now in universal use for the x-ray, was pioneered and developed in the photography laboratory at the Medical School.

The course for training medical photographers, two or three years ago, was instituted in 1937. This number was maintained until 1940 when the class increased to four and subsequently to its present number of 10 per year.

The Present Medical Photographic Department

Under the guidance of Mr. John T. Stringer Jr., the present Medical Photographic Department has over \$100,000 worth of technical equipment ranging from still cameras to motion cameras, optical cameras, body cavity cameras, spot lights, developing equipment, minute screws and washers used in the maintenance of their equipment.

Under the direction of Mr. Stringer, the department twice has been honored with the Certificate of Merit by the Biological Photographic Association. This association, devoted exclusively to the field of medical photography, has an international membership.

The famous Atlas of Pathology, published by Lippincott Co., received 95 per cent of its color photography and lithography from the local studio. The Atlas of Tropical Medicine and the Atlas of Dental Pathology, soon to be released, will have a large share of illustrations processed and taken by the department.

First row: R. M. Oswald, HMC, uses the copy camera. Second row left: John T. Stringer Jr., Director of Medical Photography, shoots a motion picture in the operating room. Second row right: Anne Lee Green, HMC, does a photographic study of a gross pathological specimen. Third row left: H. N. Offield, HMC, utilizes the oral cavity clinical camera on Leroy Lewis, HM3. Third row right: Floyd

A. Elkins, HM3, checks a projector in the medical photographic film library. Fourth row left: John T. Stringer Jr. films the fundus of the eye with the Bausch and Lomb retinal camera. Fourth row center: P. J. Ellis, HMC, photographs a minute pathological specimen with the photomicrographic camera. Fourth row right: Graduating Medical Photography students display their final projects. Kneeling are: George W. Diack, HM2; Donald L. Marloff,

HM2; and Robert S. Ruffin, HM3. Standing: Leroy Lewis, HM3; Carl W. Clinton, DTC; and Carl J. Stevenson, HM3. The photographic projects, held by the students, are entitled as "finals" by the new Medical Photographic Technicians. The projects are titled, (upper row): "City Mansion," "Wagon Team," and "Symphony in Marble." (Bottom row): "Watergate," "Refreshing Pause," and "Final Rest." JULY 14, 1942

Fielders Alerted with Jarvi at Bat

SOLID HITTER Ltjg. Helen Jarvi, NC, USN, left fielder for the women's softball team, has just slammed one. In this, her second year with the team, the athletic nurse can usually be counted on for some solid hits and good field coverage.

Local Gals Edge Out Quantico Marines in Exciting Seventh Inning Victory

Bringing their league standing up to four wins and two losses, the local feminine nine edged out the Quantico Marines last Tuesday night 4 in 75 nerve-racking minutes of play in the mist of a heavy drizzle.

Trailing 2-4 at the start of the seventh, Crouch made first on a bunt, and advanced to second. While Cox and "Boots" Carlson popped out, Crouch stole to third.

With Fowser at bat, Crouch stole home on a wild pitch. Fowser singled, scoring a runner and tying the game 4-4. "Salty" Salisbury walked and then slid safely to second allowing Fowser to score the winning run on the play.

The last half of the seventh saw the second speedy peg from "Boots" to Walbert on second to get out the threatening runner. Jarvi came racing in from right field to snag a fly for the third out and the game was saved for Bethesda.

Earlier in the evening, Jarvi made a spectacular one-hand catch

and fired it to Fowser for an out on first. In the top of the sixth she tripled at bat scoring Fowser and Salisbury for Bethesda's first two tallies.

In the bottom of the sixth, short-stop Cox fell, blocking a fast grounder near third, whirled around on her knees, and tagged out a runner approaching third.

McQuarrie pitched the full seven, allowing seven hits, no walks, and striking out two of the Marines. The gals will play two more home games this season, meeting the Fort Myers Wacs here tomorrow night and the Walter Reed Wacs on July 29.

Abundant Black Bass, Perch, Flounder Within Car Distance of Medical Center

Warning to all fishermen: If you want to fish in the State of Maryland don't forget to obtain a license. The cost for a serviceman is only \$5; the cost if caught without one is \$10 and up.

Spots, perch, and hardheads are feeding in the mouth of the South River. Black bass fishing is now legal in this state. The season will last until November. Best fishing for these fish is in the Potomac. Luck has been reported around the Key Bridge in the District and in the water around the dam at Great Falls. Bait? Hellgramites or minnows.

Lake Seneca is fairly good for black bass early in the morning. Bats can be rented but it's necessary to bring your own bait. Minnows are it. Remember, on this lake let the fish have a good taste before setting the hook. Lose about two yards of line before the play.

Saturday morning is too late for most fishing tackle over at Special Services. Check out your casting, trolling, or surf rods about Thursday night for the weekend. You'll have to furnish your own hooks and lures. Bait can usually be obtained where you are fishing.

Thomas Holda, HM2, of NSHA, had good luck with flounder on the fourth of July weekend up near Bethany Beach in Delaware by trolling and fishing the inlets. Using minnows hooked through the lips for bait, and fishing just off the bottom, Holda took home seven flounder weighing 3-8 pounds.

To keep the hooks free from crabs he used a trick taught him by one of the local old timers. Put a small cork just above the bait. This will hold the hook about 7-10 inches above the bottom. By the way, it's necessary to fish with the tide there.

Two Phys. Med. students, A. F. Marks and C. E. Monahan, went up and Fletcher's Boathouse on the Potomac the same weekend. Using minnows and bloodworms, fishing the bottom, they boated nine cats weighing three pounds and up. Carp and a few rock bass were also caught.

JULY 14, 1952

Feminine Batters Take Two Victories From Wacs and Wafs

Bethesda's feminine softball team smashed through the Ft. Belvoir Wacs and the Bolling Air Force Wafs to bring their league standing up to three wins out of five.

Meeting the Belvoir Wacs on June 26, the Waves and nurses were trailing 3-4 until the fifth inning when they tied up the match, 4-4.

Bethesda broke loose in the sixth, scoring six runs and held the lead, ending up the contest 10-4.

Miss Bramlet, awaiting discharge, pitched her last game for Bethesda, striking out three and allowing one walk. The team, showing the spark displayed earlier in the season, was behind her all the way, and showed tremendous improvement over their last two games.

The Bolling Field Wafs didn't fare much better on July 1 when they were subdued 9-5.

McQuarrie was back on the mound for the first time since her foot surgery, to strike out seven batters, allowing only two walks. Bolling's pitcher was credited with only one strikeout.

With a 4-3 lead in the top of the fourth, hits by Walbert and Cox sent McQuarrie and Walbert in to take a 6-3 lead. The Wafs scored their last run in the bottom of the inning, and the score stood 7-4 until the seventh.

With two outs, Fowser ran one out to first, Salisbury walked, and both advanced on a wild pitch. Teasing off third, Fowser scored on an overthrow, advancing Salisbury to third. Ellis doubled on a short-stop error, scoring Salisbury and giving Bethesda a 9-4 victory.

Fewer errors, and faster thinking were displayed in this game than any one to date. In the fifth, Boots Carlson, chattering catcher, pegged one to second base Walbert who fired to Fowser on first to trap a Waf in the hot box.

Comdr. Blackstone On Recreation Council

The new Senior Member of the Recreation Council, relieving Capt. F. E. Frates Jr., DC, USN, is Comdr. Clarence H. Blackstone, DC, USN, the Chief of Oral Surgery and Director of Clinical Services at NDS.

Comdr. Blackstone, when discussing his new duties, remarked, "If I can maintain the high standards of the recreational facilities that Capt. Frates in a large part made possible for the personnel here, I believe that my job will be well done."

A devotee of the local golf course, Comdr. Blackstone was formerly stationed at Pearl Harbor where he was the chairman of the tournament committee of the Navy and Marine Golf Course.

NNMC Swimming Pool Drawing Record Crowd

With the new hours in effect over at the NNMC swimming pool, more patients, staff, and students are in evidence than ever before. Last summer if three or four were seen swimming against the tide of little ones, the day was a red letter day on the pool calendar.

This summer it is nothing to see 30-40 of the local patients and crew paddling across the local swimming hole.

Again this year the sun worshippers have taken over recreation's upper level. On the weekends the porch has all the appearance of New York's more populated beaches with all ages, and, no comment, all genders enjoying the benefits of Father Sol.

NNMC Loses Teacher, Athlete, Coach As Capt. Frates Joins Second Marines

All through the barracks, up and down the tower and along the corridors went the word—"The Coach has his orders!". And a sad word it was indeed, for it meant that Capt. Frank E. Frates Jr., DC, USN, station Athletic Officer, would be leaving NNMC for duty with the United States Marines.

Reporting to NNMC in May 1947, the tall coach, player and sports official, soon became active in one of his major interests, the station's athletic program, and subsequently held the positions of Athletic and Physical Fitness Officer, Senior Member of the Recreation Council, and Chairman of the Golf Committee as collateral duties.

His unusual enthusiasm and boundless energy brought many improvements to the station's program and facilities. Not content with just the planning and directing of leagues and tournaments, the Coach took an active part by coaching the varsity basketball teams and participating in intramural play.

He contributed many off-duty hours traveling with teams, supervising station activities and even watering greens after 11 p.m. to comply with municipal water restrictions in dry seasons.

Playing, coaching, or officiating, he is still active in football, basketball, baseball and golf to mention a few. He coached basketball for 16 years in the Navy, and baseball for 11.

In 1946, Grantland Rice picked the "Coach" on his All-American eleven of football officials in a national magazine article. He has been a member of the Eastern Intercollegiate and Southern Conference Officials Association in football and basketball.

As author of the "Coach's Corner," his outstanding knowledge of all phases of athletics, and a gift for portraying vivid thoughts in words and sentences brought many pleasurable hours of reading to subscribers of the NNMC NEWS.

With the primary duty as Director of enlisted training at the Naval Dental School, Capt. Frates was the editor of the "Handbook for General Dental Technicians" and the "Handbook for Dental Equipment, Maintenance and Repair" which was accomplished during his tour of duty here.

Detached July 8 for duty with the Second Marine Division, this is by no means Capt. Frates' first encounter with the Marine Corps. After serving on the USS Vestal, USS Chester and USS Bon Homme Richard, he had duty with both the First and Fourth Marine Divisions.

His first taste of Marine duty came early in his Naval career when he played quarterback for the Marine Corps football team at

San Diego. The San Diego Union described what happened when "Fearless Frank" went into action against the undefeated Fresno State team.

Fresno State was leading with a seven-point margin. Eleven minutes to go: "Frates went into action, took a kickoff back 93 yards, converted, intercepted a pass for forty yards and converted, ran back a punt return 70 yards and converted." Twenty-one points in eleven minutes!

Speak of "Fearless Frank," and a good many people will know that you are referring to Capt. Frates, but very few will know the story which christened him so.

When the Captain was in the eighth grade in a San Francisco grammar school, he was selected as the boy mayor during National Boys' Week. Reigning for one week, he found the city faced with a serious milk strike.

The young honorary mayor went into action. Contacting all the local Boy Scouts by radio, he organized a plan to have them deliver the milk.

Scouts with dairy badges were called to help. Those with motor badges drove the delivery trucks. All others helped. The emergency stations were placed strategically close to fire houses and police stations much to the distress of the strikers.

Two days later the San Francisco Chronicle blazoned the headline, "Fearless Frank, Boy Mayor, Quells Milk Strike." The name, like the spirit which prompted it, stuck.

While at Bethesda, the Captain, who is a fellow of the American College of Dentists, has received offers ranging from full professorships to a deanship of dental schools.

In charge of the enlisted training since his arrival at NDS, such things as the telephone courtesy of the Naval Dental School or the marching of the dental technicians from their quarters to their duty stations can be attributed to the energetic Captain.

'In the 2nd Half'

USING HIS RECORDER, Capt. Frates captures highlights of games that later came to life in his column, "Coach's Corner."

NMRI

When we saw Nick carrying a tripod around the other day, we assumed he was taking up photography as a hobby, but someone told us it was socialized medicine instead.

Our sympathies are with you, Vic. That was some root on the tooth you had extracted the other day. What did the people in Gaithersburg think of it, or did you show it to them?

Willie has decided to seek employment in an abbatoir when his last hitch in the Navy has been served. We think he has great possibilities.

Red thinks he would like to try out for the "Big League." With that pitching arm of his, he'd be sure to make the team. What was this other incident I happened to hear about, Red? Whee!

Talk about the absent-minded professor; we know of one lad who almost tore the side out of his car, and didn't even know it until "that morning after!"

Comdr. J. L. Tullis, MC, USN, bade a fond adieu to all at Research as he left for two weeks leave prior to his departure for his new assignment, that of Medical Liaison Officer, ONR, London Branch.

Comdr. H. C. Dudley was guest of honor at a farewell luncheon given by the personnel of the Biochemistry Division. Dr. Dudley, who was head of that division, was detached from NMRI and will report to the Naval Hospital, St. Albans, for duty.

After a brief taste of civilian life (one day to be exact), Chiefs C. J. Deal, A. S. Evans, P. K. Schork and C. R. Sipe reenlisted for another cruise.

Not so Navy-minded was J. Rothbauer, HM2, who was released to inactive duty on June 27. Joe will really need that rest at home after the farewell party some of his shipmates threw for him.

Also on the outgoing list this month is Ltjg. G. S. Brosky, MSC, off to Tripler Army Hospital; Comdr. C. M. McCandless, MC, his TAD completed; M. E. Lane, HMI, to Receiving Station, D. C.; and J. Black, HM3, to the USS Carrituck. On the incoming list we have J. E. Clancy, HM3, from the USS Severn and H. L. Braun, ET3, from the USS Toledo.

After bringing her contest winnings to near \$30,000 during the past 30 years, Mrs. M. F. Gilchrist (Reports and Manuscripts, NMRI) is busily adding more prizes to her already long list. Within the past three weeks she has won a \$240 air conditioning unit; a \$100 and a \$10 cash prize in two contests; a complete Burpee Flower Garden; and last, but not least, a two-week, all expense-paid vacation, for herself and her husband at the Admiral Hotel in Cape May, N. J. At the rate this very versatile woman is progressing, the \$31,000 mark will be reached in short order.

Another item of interest at the Institute was the receipt of the American Institute of Chemistry Award by Mr. George Imirie Jr. (Radiation Technology Division). This award, in the form of an engraved medal, was presented to Mr. Imirie for his outstanding work in the field of chemistry.

Navy Belles

by George

Last month I was hunting for something to write. This month there's plenty moving—lockers, beds, and displaced persons. With 88 bunks and 90 girls, we found ourselves playing musical beds for a while. Now the "monstrosities" are on the way out, and metal lockers are moving in. Double bunks are installed on the second deck. One girl told me she rearranged her cubicle three times and is contemplating another change.

With Phys. Med. class finished, Cathy Bassham and Ruth Freudenvoll are leaving. Casey is hanging around a week before going north so she can try for first class. Where did you ever get the poison ivy, Casey? Roz Brandt graduated from Radioisotope School and will leave as soon as she takes her second class test.

Welcome to Joan Kalke, Bernadine Frank, Betty Ward, and Claire Pfingsten for Hospital Command. In for ECG School is Mary Lillian Lee, and Terry Turowski reported in for NDS.

Louise Miller, "Fitz" and Chief Green all went on leave. So did Hammett after giving her job of night mother to Ann Schuricht. June Kakmar walks around all day singing, "If you loved me half as much as I love you."

The girls on the softball diamond sure look good these days. If you haven't seen them in action yet, drop by on the 29th of July and watch them take on the Walter Reed Wacs.

Sparkling Eyes, Wit Net Cavey Big Hit

Flashing a ready Irish smile and searching with dancing Irish eyes as she darts from ward to ward in the dependents' department, Lt. Muriel R. Cavey, NC, USN, carries out her duties in the manner typical of one interested in a well chosen field.

Inspired by her sister's progress in the nursing profession, Miss Cavey entered nursing after having been graduated from Mt. de Sales Academy of the Visitation, Catonsville, Md.

Having fulfilled her obligations toward the St. Agnes Hospital of Nursing in Baltimore, Miss Cavey elected to pursue private practice for a year.

Indoctrinated into the Navy in

Lt. M. R. Cavey, NC, USN

March 1945, she was released to inactive duty in 1946, but returned to active duty in November 1947.

Naval duties afforded her many miles of traveling and the pleasure of serving at Naval Hospitals in New York, Baltimore, Bethesda, and in the islands of Japan, Guam and the Philippines.

Possessing a vivid imagination, Lt. Cavey enjoys historical novels, as well as stories along the fictional lines. As a means of escaping daily routine, she enjoys dancing and swimming or attends musicals of the legitimate theater.

Not satisfied with reading about strange places and people, Miss Cavey decided on several occasions to visit the far away lands. She found weeks of fascinating adventures in Hong Kong, Canada, Mexico, Haiti, Jamaica, and Cuba. Memories of her travels are kept fresh with photographs taken with a Japanese 35 mm. camera.

Since her arrival at this station in July 1951 for a second tour of duty, Miss Cavey's duties involve working on the dependents' wards during the mornings, and in the O.B. and Gyn. clinics during the afternoons.

Lt. H. Smith, supervisor of the dependent's wards, considers Miss Cavey a credit to the nursing profession. In her words:

"Miss Cavey has gained popularity with her associates. Her congenial attitude, her charming, unselfish manners have inspired many of our patients."

Man: "If I stopped a man from beating a donkey, what trait would it show?"

Bored girl friend: "Brotherly love!"

A recruit running the obstacle course stumbled and fell. "What's the trouble?" demanded the sergeant.

"I think I've broken my leg," the recruit moaned.

"Well, don't just lie there," shouted the sarge. "Start doing pushups!"

Pedestrian: A man who can be reached easily by automobile.

'It's All Over Now' for Phys. Med.

ACCEPTING THEIR DIPLOMAS on July 11, 14 students were graduated by the Physical Medicine Technicians' School. Front row: F. H. Schuler, HMC, instructor; Lt. E. E. Erickson, instructor; Capt. J. L. Enyart, CO, NMS; Lt. B. R. Bare, instructor; and Lt. R. Moeller, instructor. Second row: M. E. Casey, HM2(W), O.T.; R. E. Bassham, HM3(W), P.T.; and R. E. Freudenvoll, HN(W), O.T.; Third row: W. D. Borroughs, HM3, P.T.; F. V. Sanelli, HM3, P.T.; J. A. Peck, HM3, O.T.; and V. W. Paterson, HM3, P.T. Fourth row: A. F. Marks, HM3, O.T.; H. R. Eber, HN, P.T.; C. E. Monahan, HN, O.T.; and W. M. Dougherty, HN, P.T. Fifth row: J. J. Harp, HM3, P.T.; R. J. Fitzpatrick, HM3, P.T.; and R. D. Gildersleeve, HM3, P.T.

The Other Side

Editor's note: Last month a poem called "Looking Back" by A. H. Jones, a civilian guard, appeared in the NNMC NEWS. The following poem was submitted in answer to it:

There are always two sides to each question;
I wonder if that you know.
But men always criticize women
Because they older grow.

Maybe she did lose her figure —
But, Dearie haven't you, too?
Isn't your chest a bit lower,
And hasn't your stomach "grew"?

Maybe her hair is stringy;
Maybe its color is sad —
But Honey, your hair's a bit thinner;
Where are the tresses you had?

Maybe she has ten children —
But they love her very much.
Methinks, Old Dear, you are holding
Some very sour grapes in your clutch!

—MILDRED HYNES, NMRI

Teacher: "What's a flood?"
Pupil: "It's a river that's too big
for its bridges."

Galley MAA: "This coffee tastes
like dirt."

Mess Cook: "Well, it was ground
this morning."

Heavenly Kick

Paris, France (AFPS) — An American cemetery just outside Paris honors among its heroes a mule named Maggie.

The inscription on her tombstone reads: "Here lies the mule Maggie. In her life she kicked two generals, seven colonels, eight captains, 16 lieutenants, 541 enlisted men and one German mine."

ALL SET for summer in a comfortable and attractive ensemble of blouse and shorts, pert young Paramount actress Marion Marshall takes things easy on a nice cool lawn in Hollywood. Marion seems to be in perfect shape for the season.

Spring has sprung, the grass has riz. I wonder where the flowers is. —Circa 1800 B.C.

"Please, sir, don't dictate so fast!"

Capt. A. H. Grunewald to Great Lakes After Five Years' Service at NNM

After serving on board this station for the past five years, Capt. A. H. Grunewald, DC, USN, Executive Officer of the Naval Dental Center, will be detached on Aug. 1, and will report to the U. S. Naval Hospital, Great Lakes, Ill.

Relieving Capt. Grunewald is Capt. Bernard H. Faubion, DC, USN, who has been serving as Chief of

Capt. A. H. Grunewald

Dental Service, USNH, Yokohama, Japan.

During his first two years at this station, Capt. Grunewald accepted temporary additional duty at the Naval Bureau of Standards, where he participated in a program which proved beneficial to both civilian and Navy dental programs. He completed a graduate course at the University of Michigan, receiving a Master of Science Degree in Dentistry. A graduate of Marquette University in 1931, he served as an instructor at that institution prior to joining the Navy in 1935.

At the onset of hostilities during World War II, Capt. Grunewald was at Pearl Harbor. When the hostilities ended, he was District Dental Officer at Alaska. To date he has served on board three ships and eight stations, both within and outside the continental U. S. limits.

Capt. Grunewald is a Diplomate of the American Board of Prosthetics. Further affiliations with the dental profession include the chairmanship of the Section on Full Dental Prosthesis of the American Dental Association, a member of the Committee on Dental Specialties of the American Dental Association, and secretary of the Advisory Board for Dental Specialists. A fellow of the American College of Dentists, he is also a Fellow of the Academy of Denture Prosthetics, and a member of the American Odontological Society, International Association of Dental Research, and the American Association of Dental Prosthetics. The Academy of Dental Prosthetics held its annual one-week meeting here in 1951.

Capt. Grunewald sparked the interest of his subordinates in the Doherty Program by leading a donation of his own blood. Letters of Commendation from the Surgeon General of the Navy were sent to the School of Dental Medicine in recognition of his participation in the drive.

Continued on Page 3, Col. 5

Mobile Dental Unit Saves Time, Teeth

Now operating in Korea, a Navy Mobile Dental Clinic provides front line dental care to Leathernecks of the First Marine Division. This treatment, rendered wherever the Mobile Clinic sets up shop, is supplemental to that received at stationary dental clinics of the division.

The Mobile Dental Clinic consists of three truck units, three trailers, three dental officers, five dental technicians and the necessary supplies and equipment.

It makes scheduled visits to all elements of the First Marine Division near the front lines or wherever they are bivouacked. This saves the manpower loss previously experienced when dental patients had to be transported to rear area dental clinics for necessary treatment.

It is a self-contained electrically operated unit. Each truck unit tows a trailer; one containing housing equipment, records, spare parts, and the necessary dental supplies; another a water tank; and the other the electric generator to supply power for the clinic.

The two truck units containing dental chairs, instrument cabinets, etc., were designed by dental officers of the First Marine Division. The construction and fabrication of the units was by the Engineer Battalion of the Division.

The third truck unit, a field prosthetic mobile laboratory, was obtained from the U. S. Army.

NH Training Course For Grades HA-HM2 Resumes on Aug. 25

On the 25th of August the Hospital Training Program will resume classes for HAs to HM2s. The course will differ from last year in that the course will be revamped for a higher level of instructional material.

Exemptions from classes will be permitted again this year by students passing the pre-class tests and exemption from further studies in a course will be allowed by those passing the final test in each course.

The schedule for HAs and HN3s is: Aug. 25-Sept. 25, First Aid and Minor Surgery; Sept. 29-Nov. 6, Anatomy and Physiology and Nursing; Nov. 12-Dec. 18, Anatomy and Physiology and Nursing; Feb. 23-Mar. 19, Anatomy and Physiology and Nursing; Mar. 23-Apr. 23, Military Requirements and Materlia Medica; Apr. 27-June 4, Military Requirements and First Aid and Minor Surgery.

The schedule for HM3s and HM2s is: Aug. 25-Sept. 25, Health and Sanitation and Materlia Medica; Sept. 29-Nov. 6, Health and Sanitation and Pharmacy; Nov. 12-Dec. 18, Chemistry and Nursing; Jan. 19-Feb. 19, Anatomy and Physiology and Clerical Procedures; Feb. 23-Mar. 19, Anatomy and Physiology and Clerical Procedures; Mar. 23-Apr. 23, Military Requirements and First Aid and Minor Surgery; Apr. 27-June 4, Military Requirements.

The classrooms will receive a long-awaited instrument — an air-conditioner — on approximately the 22nd of August. Also added is a view graph and an opaque projector. Blackout curtains for projection are ready for the new term.

WAVES Celebrate This Month First Decade of Naval Service

WRITING INVITATIONS to the local party celebrating the 10th anniversary of the WAVES are Lucile Thompson, HM2, Marcia L. Scott, HM2, and Catherine R. Puffer, DKC. Admiring the invitations is the Women's Personnel Representative of NNM, Lt. Elizabeth C. Wilson, USNR(W). These invitations were printed by Miss Scott in O.T.

The WAVES on July 30th will celebrate a decade of service in the Navy. More than 9,000 officers and enlisted personnel will participate in ceremonies at various naval establishments.

At the National Naval Medical Center a party will be held tonight at the local Chiefs' Club. Starting at 2000, the party will include WAVES and their guests from all NNM commands.

Marine Promotion Tests

Marine enlisted promotion tests for the fall of 1952 will be administered Aug. 27 through Sept. 19, for the promotion to the ranks of corporal to master sergeant. Service in-grade requirements are: Pfc.—nine months; Cpl.—10 months; Sgt.—12 months; S/Sgt.—14 months. Service in-grade in either the Marine Corps or Marine Corps Reserve, active or inactive, will be included.

The band regularly appearing at the Club will furnish music for the occasion.

Included in the attractions will be a buffet supper, refreshments, and a beautiful cake donated by the Naval Hospital Food Service Division.

Dress for the evening calls for civilian clothes, dress whites or blues for the ladies, and civilian clothes, whites or blues for the men.

Official ceremonies were held at the Hotel Statler last Saturday and Sunday. Adm. Lynde D. McCormick, Supreme Allied Commander Atlantic, was guest speaker. Capt. Joy B. Hancock, WAVE director, initiated the event with a cake-cutting ceremony.

The history of women selected for active duty with the naval establishment began in World War I when in March 1917, Secretary of the Navy Josephus Daniels inaugurated the Naval Reserve program for "Yeoman F," later to become popularized as "yeomanettes." More than 10,700 yeomanettes served the nation in the first World War.

WAVES (the name originally meant Women Appointed for Voluntary Emergency Service) first entered the Navy July 30, 1942 when Congress authorized the commissioning and enlistment of women in the U. S. Naval Reserve.

With the passage of the Women's Armed Services Integration Act in 1948, women became a part of the Navy on a permanent basis.

Today 36 of the Navy's 62 enlisted ratings are open to WAVES. Their duty is limited only by re-

(Continued on Page 3, Col. 1)

Ranking Officers Attend Intern Graduation Exercise

GRADUATES AND OTHER OFFICERS present at the graduation exercises of the Naval Intern Class of 1951-52 on June 30 include—front row: Comdr. H. D. Warden, of the USS Williamsburg; Comdr. V. E. Martens, Director of Laboratories, NMS; Capt. L. M. Harris, Chief of Obstetrics; Capt. E. F. Evans, Chief of Medicine; Capt. F. Harbert, Chief of EENT Service; Capt. B. W. Hogan, Commanding Officer, NH; R. Adm. B. Groesbeck Jr., Commanding Officer, NNM; R. Adm. L. O. Stone, Assistant Chief of Bureau for Personnel and Professional Operations; Capt. C. H. McMillan, Executive Officer, NH; Capt. E. L. Caveny, Chief of Neurology; Capt. R. B. Brown, Chief of Surgery; Comdr. C. R. Carr, Chief of Orthopedics; and Comdr. J. S. Hanten, Assistant Chief of Neurology. Second row (interns): Ltjgs. J. H. Sims, J. C. Jones, C. O. Miller, P. M. Lucas, C. MacGeyer, J. E. Bartkowski, A. Kiel, H. J. Pinsky, J. M. MacDonald Jr., B. M. Davis, T. S. Johnson, R. L. Krichmar, and H. J. Seale. Back row: Ens. P. J. Sherin, Assistant Personnel Officer, NH; Ltjgs. E. S. Witkowski Jr., D. C. Tipps, W. L. Padgett, and O. C. Peck.

Marine Lt. Receives Purple Heart

PURPLE HEART WINNER Lt. William Moran, USMCR, is congratulated by R. Adm. B. Groesbeck, after being presented the award on July 2.

Alive to relate the story of how a piece of shrapnel from enemy artillery forced its way through his head, Lt. William A. Moran, USMCR, finds it difficult to realize that such an incident could have taken place.

While on duty with a tank battalion on the western coast of Korea, Lt. Moran was assigned to a platoon engaged in battle against enemy forces on April 6, 1952. Tanks of his unit were sending rounds of fire into enemy held territory when the call to cease fire was heard.

Reversing their positions, the cumbersome giants rumbled along the narrow winding road. A tank in the forward position lost its tractor and halted the progress of the trailing armor-plated monsters. To view the proceedings, Lt. Moran opened the hatch of his tank, realizing that the enemy had them "zeroed in" and were pouring shells in their direction.

"scratching" sensation burned his hand. Conscious of the hand wound, he was totally unaware that at the same time shrapnel had entered the right side of his head and emerged from the left. Given first aid in the field by medical representatives, he was flown by 'copter to an aid station and further on to Able Co., 1st Med. Bn. There he remained until transferred to facilities in Japan, and on the States via MATS.

Speaking of the hospital corpsmen he had met in the field, Lt. Moran said, "It's been a pleasure meeting those fellows. They're doing a great job and their talents are appreciated."

Upon separation from the Marine Corps, Lt. Moran will resume his professional duties as a teacher of mathematics in Flushing, Ohio.

Civilian Employee Designs Manipulator To Save Specimens

NEW MAGNETIC MANIPULATOR is used here to place a specimen screen into the cap recession of a specimen holder.

To prevent the occasional loss or deformation of the tiny, fine-mesh stainless steel specimen screens used in the electron microscope, Mr. Emanuel Kafig, civilian employee of NMRI, has designed and constructed a small magnetic manipulator.

The manipulator is a self-contained unit about the shape and size of an ordinary fountain pen. It consists of a brass guide sleeve embedded in a plastic material having a central moveable magnet. When the face of the magnet is moved to approximately 1/64 inch of the end of the brass guide sleeve, a specimen screen can be picked up magnetically without damaging either the screen or the specimen thereon.

The screen may then be placed directly into the cap recession of a specimen holder and released by retracting the magnet within the guide sleeve.

The manipulator, Mr. Kafig said, saves time and specimen screens. These, he added, are not so important as the saving of the one important specimen to be studied that is occasionally deformed or is flipped away by the tweezers—the most widely used method of handling the small screens.

Mr. Kafig, originator and designer of the manipulator, has been employed by the government in research work for 11 years. He has, for the past four years, been employed at NMRI where he operates the electron microscope, its accessory equipment, and the x-ray defraction unit.

I and E:

Future's Guarantee In Education Today

A famous historian once said, "Every man who has risen above the common level has had two educations: the first, from his teachers; the second, more personal and important, from himself."

The Information and Education Program offers you a chance to expand your formal schooling by mail and to prove your educational development through tests.

Practically all the opportunities are voluntary. It will pay you to use them, however. If you plan to make a career of the service, you will find that the Armed Forces are making more and more stringent training demands; they cannot do otherwise in this age of specialization.

If you plan a civilian career after leaving the service, you will find that keen competition makes it difficult to get and hold a really good job. In either case, education in all forms will be of value to you.

In addition, there is the personal satisfaction of knowledge — the appreciation of literature, the explanation of scientific marvels, or just a better understanding of why people act as they do.

An educated man is not necessarily a college graduate. Rather, he has enough intellectual curiosity to be aware of the world about him and to find ways of learning more about it.

If you are interested in improving yourself, the means are at hand. See the I and E officer in Ward 102 for details. Your future may depend on how you use educational opportunities now.

Capt. Grunewald

(Continued from Page 1)

With a happy gleam in his eye when questioned about his favorite sports—hunting and fishing—he remarked, "I've learned that I'll never be a golfer, and, at my age, such sports seem to be the only ones left."

Concerning his tour of duty here, Capt. Grunewald stated, "This is by far the finest duty in the Navy for many reasons. By no means the least being the wonderful, competent, hard-working staff, officers and enlisted, that is maintained at the school."

"Because of their efforts, the Naval Dental School came to be known in many quarters as the finest dental post graduate school in the country. Wouldn't anyone like having an administrative position such as I have had where he can get in on some of the credit others have so diligently earned?"

Capt. and Mrs. Grunewald will reside with their two daughters, Ann and Mary, in allotted quarters at the U. S. Naval Hospital, Great Lakes.

Diaper Derby

July 10—Kathryn Ellen Waite, 7 lbs. 12½ ozs., daughter of Lt. Charles L. Waite, MC, USN, Staff, Pediatric Clinic, NH.

July 12—Edith Jeanette Phelps, 5 lbs. 10¼ ozs., daughter of Sgt. Carl R. Phelps, USMC, Staff, Marine Casual Office.

July 18—John Steven Weddell, 7 lbs., 10 oz., son of John F. Weddell, HM2, USN, X-ray Dept., NH.

News Shorts

dance and party on July 8, to celebrate the second birthday of the Chief Petty Officers' Mess. R. Adm. B. Groesbeck Jr. and Mrs. Groesbeck were guests of the chiefs at the anniversary party.

Lt. James W. Kinder, MSC, will relieve Lt. T. L. Hollis, MSC, as the Training Officer on the 1st of August. Mr. Hollis will be transferred to Tripler Army Hospital as Personnel and Record Officer.

Everything but Proverbial Kitchen Sink Offered in New Refrigerated Chow Cart

THE NEW CHOW CART designed by Chief Barrett has seven sections: (1) area for cups, (2) soup thermos, (3) hot drink thermos urn, (4) area for soup bowls, (5) heated space for hot plates warmed by banquet rings, (6) refrigeration unit, and (7) refrigerated area for cold foods which is separated from the hot plates by an insulated wall.

Today in our civilization, witches, ghosts and alike have disappeared from the modern scene. However, replacing them are a group of highly specialized individuals noted for their fondness for devising difficulties, mishaps, and exasperations — the gremlins. Every installation and division in the Armed Forces seems to have its certain group of these little people.

Our Food Service Division at NNMC is not exempted. Their particular species repeatedly have thwarted the commissary in one phase of their work: the job of transferring food from the galley to the patients on the wards. Often the food carts leave the galley with the hot food naturally hot and cold food cold.

Arriving on the wards soon after, the hot plate feels like it has been re-routed through an arctic ice cap while the cold food has the appearance of going through Neptune's initiation at the Equator.

However, the gremlins causing this have their days numbered. Chief Preston W. Barrett, HMC, the CMAA of the Food Service Division, has devised a cart that will allow hot foods to arrive on the wards still hot, and ice creams and jellies to be delivered to the patient in a state otherwise than the consistency of water.

This cart has a compartment for the warm food and a refrigerated area for the cold foods, desserts, and salads, plus two thermos for coffee and soups attached to the cart.

Today's food cart holds a maximum of 20 trays; this cart of the near future will hold 40 trays. The assembling of the tray on the ward will be a thing of the past for the new invention will permit the Food Service Division to almost complete the tray prior to delivery to the ward.

At the present time 41 food carts plus an excess of another 100 supplementary carts are required to deliver the chow to the wards and towers each meal, creating a traffic problem in the corridors of the hospital. With the new carts only 18 will be required to service the entire on-ward patients.

Chief Barrett has applied for a Navy patent on his new invention. This patent allows royalties on all units sold to non-service organizations. The new cart has been examined and discussed by other commissary personnel plus such groups as the Johns Hopkins Food Service Division and all have congratulated the inventive chief on his new idea in food handling.

In the final planning of the chow cart, Chief Barrett was aided in many ways by Lt. T. V. Bonnell, Head of the Food Service Division. The problem of cleaning was discussed and met by the use of slots for the trays and plates instead of the usual shelves found in chow carts. Use of a hose and ability to scrub all parts are the advantage of this innovation.

NSHA Marks 10 Years

in Field of Education

Naval School Of Hospital Administration

Sunday, Aug. 3, 1952 marks the 10th anniversary of the establishment of the U.S. Naval School of Hospital Administration. It is with a sense of pride that officers and enlisted personnel associated with the School look back upon 10 years of achievement in education.

Through a major world war and an ensuing period of peacetime activity, the School has operated to fulfill its mission—to train Medical Service Corps and Hospital Corps officers as managers of business di-

physical premises of the School.

The Secretary of the Navy officially established the U. S. Naval School of Hospital Administration as a separate command of the National Naval Medical Center on Aug. 2, 1945.

Admiral Ross T. McIntire, MC, USN, Surgeon General of the Navy, officially placed the School in commission, installing Lt. Comdr. Glenn F. Lyon, HC, USN, as the Officer in Charge.

Originally located in Building 112 of the Medical Center compound, the School was moved in January 1946 to its present location in Building 141.

The original group of enlisted students were enrolled July 1948. Courses of instruction included property and accounting, clerical and commissary procedures. On Sept. 23, 1948, the Chief of the Bureau of Medicine and Surgery authorized enlisted classes in clerical, property and accounting, and commissary classes to be consolidated into one class of Medical Administrative Procedures of nine-months' duration.

The curricula and prerequisites for assignment to the course of instruction in Medical Administrative Technique were promulgated in July 1949. The first class (MAT-1) convened on Oct. 7, 1948. Subsequent classes have convened in September of each year.

To date, a total of 571 officers have been graduated from the School. Of this number, 13 officers were from other services: nine represented the Army, three were attached to the Air Force, and one was a medical officer from Ecuador.

Enlisted technicians of all types, totally 649, have been graduated from the School. The last class of 117 Medical Administrative Technicians (MAT-4) graduated on June 20, 1952 to make a total of 368.

Function

Providing intensive training in medical and hospital administration for officers of the Medical Service Corps and the Hospital Corps, the School's curriculum includes courses in finance, property, personnel administration, office management, commissary administration, naval law and procedures, commercial law, maintenance methods, safety engineering, and teaching methods.

A course for enlisted hospital corpsmen in medical administrative procedures is conducted leading to certification as qualified medical administrative technicians.

Organization

The School is a component command of NNMC. The organization functions under an officer of the Medical Service Corps as Commanding Officer.

Within the organization are established two major divisions, Administration and Training, the former concerned with the administrative functions of the command and the latter, as the title implies, with the implementation of the mission of the School under naval and civilian instructors.

visions of naval hospitals, and enlisted personnel as medical administrative technicians.

Origin

The School was established under authority of a letter from the Chief of the Bureau of Medicine and Surgery which provided for "a class for 30 Pharmacists and prospective Pharmacists . . . in the duties of a Naval Pharmacist with emphasis upon property and accounting administration, personnel administration, and commissary administration."

Supervision and instruction of a class of 29 officers began on Aug. 3, 1942.

History

At its inception, the School (then called Hospital Corps Officers School) was administered by the CO, U. S. Naval Hospital, Bethesda, Md., with Lt. Glenn F. Lyon, HC, USN, as the officer in charge of the

Third row: Using an exhibit, another specialist explains the methods of inspecting and grading fruits and vege-

tables to the students. (right) The School of Hospital Administration is located in Building 141. Fourth row: The techniques of mimeographing is another course offered by the School. Fifth row: Comdr. G. F. Lyon, MSC, USN, the first Commanding Officer of the School. (center) The library, with its variety of reference books, soon becomes a must on the list of NSHA students. (right) Graduation day and another MAT class celebrates the completion of their course at NSHA.

The Naval School of Hospital Administration, with its many courses offered to both the officer and the enlisted student, is an integral part of both the National Naval Medical Center and of the Navy as an entirety, with its purpose of educating the student in the administration of the medical branch of the Navy. Top row: problems of the medical branch of the Navy. (left) The present Commanding Officer of NSHA is Comdr. M. E. Zimmerman, MSC, USN. (center) Instruction is given both in the class and in many instances on field trips

Dentist Constructs Private Navy

THE COUNT HYPYKAK is admired by its planner, constructor and worker, Comdr. J. V. Niiranen, DC, USN.

Friday morning, July 11, the following notice was circulated around NNMC:

Special Notice

"The world's fastest speedboat (when towed behind the fastest automobile) the COUNT HYPYKAK (which dare not be translated in print), constructed by the Count Hypykak Shipbuilding Company of which a Naval Dental Officer's President, Vice President, Secretary, Treasurer, General Manager (and the only workman) will be launched onto a trailer in front of building 122 at 1530 today.

"The Champagne will be wasted in the bow of the Count Hypykak by Col. Fearless Frank Frates, who as no fear of flying glass and whose heart does not bleed from wasted champagne."

The NNMC NEWS was attracted, as were a large group of Naval personnel and civilians. For those of you who couldn't be present at the ceremony, we offer a translation of the cryptic notice:

The worlds fastest speedboat turned out to be a Class B hydroplane with a racing hull, which will go between 50 and 60 miles per hour. Made from mahogany plywood, the boat weighs 150 pounds, is 11 feet long, and has a 4 1/2 foot beam. It is painted partly red, with the remainder varnished.

The Count Hypykak can't be translated in print, but we can give you one clue — the word is Norwegian.

The Count Hypykak Shipbuilding Company was revealed to be Comdr. J. V. Niiranen, DC, USN, who built the racer in the basement

of his home. He started the project 10 months ago. Although he had built other boats, this was his first racer.

Will be launched onto a trailer—Comdr. Niiranen assembled the green trailer himself, and it is equipped with a convertible top for traveling.

The champagne will be wasted on the bow—and it was—one full quart, wrapped in maroon and gold streamers representing Comdr. Niiranen's home state of Minnesota.

By Col. Fearless Frank Frates—none other than Capt. Frank E. Frates Jr., DC, USN, who left this month for duty with the Second Marines.

Comdr. Niiranen left on leave the following day for northern Minnesota where he plans to enter the Count-Hypykak in three races. He also expects to race it this fall in some of the Potomac contests, and has hopes of entering the President's Regatta.

Raised near the water, the commander has always been interested in boating. As a student he worked as a guide on the lakes. A veteran of former Minnesota races, he is anticipating more pleasure this time in racing the result of his own handiwork.

Lively NMS Wave Guards First Base

Spectators at any of the women's softball games here this season are well aware of the extroverted personality of M. Elaine Fowser, HM2, who guards the first base sack.

With a steady line of chatter, and a little good natured clowning, she livens up the team while doing her share of hitting, scoring and hustling in the infield.

M. Elaine Fowser, HM2

Fowser arrived at NMS in May as a student in Tissue Bank School. With less than three years of service, she has already completed boot camp, corps school, and O.R. school, and seen duty at Great Lakes, Portsmouth, and Corpus Christi.

Born in Quinton, N.J., she graduated from high school in Salem, N.J., where she first learned to play softball. Although she did participate in one game with the Corpus Christi Waves before coming to NNMC, this is actually her first experience with an organized team.

Wanting someone tall for first base, the coach selected Fowser, who is five feet nine.

Last fall she gave up basketball after falling flat on her face on the first night out, but says she's planning to try again this fall.

"I was tired of leading a dull life, working over a hot steam bath," she said, "so I joined the Waves." The "hot steam bath" was at Dupont's in New Jersey where she worked for five and one half years as a dye tester.

Remarking that she doesn't find the Navy dull, she went on to explain that she always wanted to be a nurse, and has enjoyed working in the wards, O.R., delivery room, and baby clinic.

A tennis tournament featuring both singles and doubles will be held at NNMC sometime in August. All military personnel stationed at NNMC are eligible to enter. All entries for the tournament must be in Special Services not later than 1600 on July 30th.

Grateful for the chance to travel, she quipped, "I'd probably have never gotten out of Quinton if I hadn't joined."

Always ready with a snappy answer, Fowser stated, "My life is just one spectacular event after another." If you don't believe her, ask her to tell you how it took her seven years to get a driver's license, and how she practically had a flying license before she had nerve enough to learn to drive.

The butcher was busy waiting on a customer when a woman rushed in and demanded, "Give me a pound of cat food, quick!" Turning to the other customer, she said, "I hope you don't mind my getting waited on before you."

"Not if you're that hungry," the other woman replied.

Women's Softball Team Ties for Second Spot By Trampling Ft. Myer Army Team, 6-1

Bethesda's women's softball team chalked up their fourth straight victory as they downed the Ft. Myer Wacs 6-1 on July 15, to find themselves in a three-way tie for second place with five wins and two losses.

The green-clad visitors had suffered only one defeat at the hands of Quarters K so far. They were only able to gather four hits off McQuarrie, who struck out three of them and walked two.

Meanwhile the Bethesda nine slammed 13 off the two Ft. Myer pitchers and waited out four walks, with only one strike out.

Chattering Boots Carlson smashed the only triple of the evening, while Crouch was in for a double. Allen came in as pinch hitter in the fourth, walked, and scored the second run of the game without hitting a ball or otherwise playing in the game.

McQuarrie had her hands full as she handled eight grounders, flies and bunts herself, making two sharp one-handed stops.

With the game at 0-0 and one out in the top of the fourth, Jarvi singled to center field, scoring Boots and sending Allen to third. McQuarrie then singled over the short-stop to score Allen and send Jarvi to the third sack.

Walbert was thrown out at first, but allowed Jarvi to make the third run for the inning on the play.

Fowser came to bat in the next frame with the bases loaded to score a runner on a center field error. Ellis then sent one between right and center fields to score Cox and Boots, giving Bethesda a 6-0 lead.

The Wacs went into a conference at this point, and while Ellis clowning on third, their pitcher and second baseman exchanged positions. Jarvi popped out and the umpire called it the third out.

The scorekeepers explained that it was only two outs, but before

READY FOR THE PITCH, Joyce Crouch waits for a possible hit to third, as pitcher Maggie McQuarrie winds up on the mound.

Ellis was able to reassume her running spot on third, the Wacs tagged the base and the inning was over. The Wacs eked out one run in the sixth, but could do no more.

Ft. Myer tried to protest the game in the sixth on a play by Boots who batted in the fifth. (She crossed the plate after the pitcher was in the box.) The protest was not accepted, because it was not entered immediately.

Ellis came in in the fifth in right field as Jarvi moved over to replace Salisbury in left field. All in all, it was an infield game.

R. G. Coombe, Honorman in ECG Class

ECG SCHOOL GRADUATED four students July 11. Front row: J. C. Macey, HMC, instructor; Capt. B. W. Hogan, MC, Commanding Officer, NH; and Comdr. J. B. MacGregor, MC, Head of Cardiology Department. Second row: A. C. Johansen, HM3; R. G. Coombe, HM3; R. P. Campanozzi, HN; and R. V. Stark, HN.

Attaining the highest class average since January 1947, the present class of ECG students were graduated July 11 after completing four months of study.

The course of electrocardiograph and basal metabolism techniques covers 640 hours of classroom and practical training.

Duty assignments to various wards and tower spaces while in training prepare the class members to gain a definite knowledge of ECG and BMR routines.

His determination to succeed as an honor student afforded Robert G. Coombe, HM3, USN, an average of 99.1%.

In service only 17 months since his recruit training at Newport, R.I., and Hospital Corps training techniques at Bainbridge, Md., Bob has also served in the cardiology department of the Philadelphia Naval Hospital.

So Sorry, Try Again

(AFPS)—"What's My Line?", a TV program that capitalizes on American occupations, has become one of video's most-watched programs. The contestants appear before four panelists who try to guess what the individual does for a living.

Recently the guessing took the following pattern: Q. Do you take things off? A. Yes. Q. Do people like it when you take things off? A. Yes, I guess so. Q. Well, the more things you take off, do people like it better? A. Yes, you might say so. Q. Do you also put things on? A. That's right. The panelist made the obvious guess, which was wrong. The girl was a disc jockey.

Outboard Motors, Fly Outfits, New Rods Available at Special Services for Crew

Bass, 12-16 inches in length, are being caught at Lake Seneca on over minnows, trolling and casting around the islands and falls. Catfish plentiful. Fish deep and use worms or night crawlers.

Look for a blue fish run around the bay area. Piscatorial experts in the local papers have announced runs in the Cape Charles area, Ocean City and Indian River Inlet.

At Special Services two new six horse power Wizard outboards are available to the personnel of the station. These motors, with a speed range to 16 knots, are available to all on an established schedule of commands. Reservations can be made by calling Chief Small at Extension 2, Special Services.

Chief Small also has added 11 new fresh and salt water rods to supply plus two complete sets of fly equipment—reels, rods, and tackle for the fly rod enthusiast. Remember to make your requests early for this equipment. For equipment for the weekend call over, Thursday to be sure of obtaining what you want. And remember the motors on a first come, first served basis.

The schedule for the Wizard motors for the next two weeks is:

July 28	NH-NSHA	Aug 4	NMS-NDS
July 29	NDS-NH	Aug 5	NNMC-NH
July 30	NMS-NDS	Aug 6	NMS-NMRI
July 31	NNMC-NH	Aug 7	NH-NSHA
Aug 1	NMS-NMRI	Aug 8	NDS-NH
Aug 2	NH-NSHA	Aug 9	NMS-NDS
Aug 3	NDS-NH	Aug 10	NNMC-NH
		Aug 11	NMS-NMRI

How would you like to snag into 42 lbs. of carp, or a 90 lb. black drum or maybe a 28 inch sunapee trout? These fish, all record catches, have been caught in car distance from NNMC.

The 42 pound carp was caught in the Rappahannock River in Virginia on rod and reel while the drum was snagged off Surf City in Jersey. The sunapee trout, measuring 28 inches in length and 19 inches in girth, was caught in Lake Sunapee, N. H.

Dental Explorer

by C. Connor

There's a new game out that seems to be very popular these days with Johnson (in room 128); it's called "Pedestrian Polo" or how to increase the mortality rate in three easy lessons. He inhales thru all the red lights and cruises thru the yellow ones every morning, but he makes it every time in time to answer at muster (as the rest of us root him in). QUESTION: Tell us why you don't care to leave in the morning, Bob?

Typical scene around the area of late is Ted Faulkner following Clarice around carrying her shoes. I heard a rumor to the effect that she even puts rocks in them just to feel at home. If the occasion should call for semi-formal dress why she'll break down and wear one anyway.

Anna sure has been missed around Bldg. 1, this past month, but I think she will be missed even more so next month when she closes the coffee mess she's been running in the Bks. Every night you can hear her call 'coffee is on.'

Zaia finally took the fatal step on the 26th of this month when he said "I do" to a gal from Frederick. Congratulations from all of us to Mr. and Mrs. Zaia (as Dom would say, "Terrific, terrific").

Welcome aboard to the PG class from all of us. They seem to be running a marathon in the operative dept. Haven't heard who is in the lead as yet but will inform you of the results. (I'm putting six dollars across the board on "Shanghai" Hughes myself, but if you want to play one to show, I'd suggest Dr. Rupp who is coming in on the inside rail.) While we're on the subject I wonder why Dr. Thimes is called "Beanie," and if you'd like to really see a sight for sore eyes try taking a look at the car Dr. Sorenson drives around; then you'll know why they call him and I quote "Cadillac Sorenson."

Chiefs Stinson, Neu and Bacon came through with honors when they received their commendations on the 18th. Congratulations from all of us, Chiefs.

Contribution from Dr. Moore better known as H.B. (ask him what it means): He tells me that both intern groups are very happy, now one group received its orders and the second group got paid, so as the saying goes "everybody is happy."

Walter has come up with something new in mens wear. (Have you tried contacting Esquire magazine about your new style, Walt?) It seems that instead of the conventional two-trouser legs, he prefers one and a half. Incidentally you can pick up the rest of your material from Anna at the barracks at your convenience, Walter.

This will be the last issue that Capt. Grunewald will be on board for, so I think I will have to tell him that he will sure be missed around the "green," also, as well as the dental school. His farewell message which he delivered on the 18th was appreciated by all who witnessed it. And I'm sure I can speak for all when I say "Good Luck, Captain" from all of us here at NDS.

NMRI

by R. Conaway

A welcome aboard is extended to Ltjg. W. R. Tourtellotte, MC, reporting from Strong Memorial Hospital, Rochester, and M. E. Harkinson, HMC, from USS Norton Sound. On our "farewell list" is N. D. Park, HM2, who left for Naval Research Laboratory, Anacostia; Lt. J. T. Conger, MSC, and J. A. Robinson, HM3, both of whom were released to inactive duty; and a "get well soon" wish to Bobby G. Young, HN, on sick list at NH. HM1 G. M. Allen reenlisted for four years, so I guess you know we know where he will be for the next 1,460 days.

We hear that someone down in the Animal Laboratories has earned the nickname of "Aerosol."

Guess Roy Kelly will be looking for a new alarm clock now. Those "Fourth of July" celebrations really get tough.

If you have ever had the inclination to tickle someone's feet while they were asleep, try to ignore this ignoble desire. Better still, ask Mabel why one should not do such things.

The latest excuse for bloodshot eyes comes from a certain HMC who claims he turned a Freon bomb into his. After all the mosquitoes he chased while with the FMF, this seems like a mighty lame excuse.

We hear the Chief Constable of NMRI is having his left shirt pocket fitted with hinges. 'Tis said that better "badge swinging" is had from metal support than from the present leather one now in use. Tsk, tsk, what next?

Information: Bill Downing, Local Pro: Marbois, HM2, after borrowing a set of clubs from Canterbury, returned to the barracks with a 76 for 9 holes, and the following information which he presented to the owner of the clubs: "These clubs are built to slice." Marbois, I think Mr. Downing would like to order a set of sticks with a built in "par" guarantee!

Navy Belles

by George

Just around our house: They are still making changes — first the lockers, then the beds, then luggage, then? What next Norma? Are you all ready for the coming bag inspection? Who is the night interest that keeps Kathryn Yuhas out of Apt. 10 these evenings? Lesley is singing "I Live Alone" while Henriette and Ruth are on vacation. Also vacationing is Pat DeBerry.

Mabel is packing and buying new clothes, an air conditioner, etc. Going some place, gal? Lou is doing a stretch on Ward 129. Say, what ever happened to those pajamas?

In the past few weeks Jean Lux, Eleanor Furness, Gerry Bourne, Joan Madsen and Clarice Hailey have been on the sick list. No more!

If looking for a nice cool place, come to the TV room. The set works about every other night. Welcome to all the new girls. I hear more are coming. Our softball team sure looks good on the field—Maggie sucking her thumb, Bode on a stick, Ellis sitting on third base exercising her leg, Jarvie rounding second, Elaine's little dance when she catches the ball. Then we have Al who didn't play an inning yet walked and made one run good. P.S. Our Boots can bat either right or left handed.

Put on your duds and your hat and I will see you all at the Waves 10th Anniversary party tonight. I still remain the girl from the heart of Maryland.

Ex-Deep Sea Diver CMAA of Security

The distinguished looking gentleman carrying on the duties as CMAA of the Center's Security Office since May 1951 is William Dorosz, HMC.

Hailing from the windy city of Chicago, Ill., where he made his debut on March 4, 1914, Chief Dorosz is well satisfied with the progress he has made in the service during the past 21 years.

In the wake of his travels, Chief Dorosz had traversed from the place of his enlistment in Chicago, Ill., to the Hospital Corps School in San Diego, Calif., and later to the Naval Hospital in Brooklyn, N.Y.

Curious as to the advantages afforded Naval dental technicians, he qualified for such a change in rate but soon learned that the Hospital Corps had more to offer. Upon his request, data pertaining to his technical status was stricken from his records.

The urge to participate in a field

William Dorosz, HMC

far more adventurous led to training at the deep sea diving school. Qualified as a first class diver he has been on many operations helping to raise sunken vessels.

Chief Dorosz was on the job when Adm. Halsey ordered a Japanese fleet submarine lifted, but since the boat was perforated beyond repair, the job proved unsuccessful.

While doing salvage work off the N.E. coast of Guadalcanal, his crew was fired upon by Japanese torpedoes.

From the rating of chief, he was advanced to warrant rank, and later to chief warrant officer.

The signing of the peace treaty by the Japanese had little bearing on the suicide planes which hovered over Dorosz's ship two days after Japan had surrendered, for the planes flew straight for the ship and made direct hits.

Reverting to the rating of chief, he saw duty with the 1st Marine Air Wing in El Toro, Calif., where he remained before joining the crew of an oiler. The ship offered travel and adventure since it carried oil to various Stateside and foreign ports.

Playing an average game of golf, he also enjoys stream and salt water fishing. Comedies and musicals rate high on his list of choices in entertainment from the legitimate theater.

Residing with his wife in Rockville, Chief Dorosz is studying law through a correspondence course offered by the La Salle Extension.

Upon retirement from service, he plans to settle in Florida where he will build a cypress wood modern rambler type home. To offset living expenses, he hopes to enter the field of selling in the capacity as a manufacturer's representative.

Thrift is a double virtue when you save U. S. Defense Bonds. You invest in your own future and in your country's security. Start now on Payroll Savings. Buy Defense Bonds regularly.

Optical Dispensers' Course Ends

THE FIRST CLASS of Optical Dispensing Technicians from the Naval Medical School graduated July 11. Honorman in the class was W. Disher, HM3, with an average of 98.1. Front row: J. R. Ohlin, HMC, instructor; Comdr. R. R. Sullivan, MSC, Head, Department of Optometry; Capt. E. B. Coyle, MC, Executive Officer, NMS; Lt. A. E. Mibeck, Optometric Fabrication, OinC; and G. W. Sumner, HMC, instructor. Second row: Charles H. Ryckman, HN; Carl J. Phillips, HN; James Hinckley, HN; and Ralph W. Disher, HM3. Third row: Merrill E. Noe, HM3; William H. Sutton, HN; Allan L. Rocque, HN; and Kenneth Mullins, HN. Fourth row: Wallace M. Braun, HM3; Oliver D. Sorrell, HN; John P. Smith, HN; and Robert Stahlin, HM3. Fourth row: Donald C. Smiley, HN; Ellsworth C. Maine, HN; Gary E. Greenswald, HM3; and Donald Carol, HN.

On July 11 the first class of the Naval Medical School Optical Dispensing course graduated. This school, formerly located at the Medical Supply Depot in Brooklyn, is a two month course.

In this period the students are taught physics of light, practical and theoretical optics, the anatomy and physiology of the eye plus the dispensing, fitting, and adjusting of glasses.

Lt. A. E. Mibeck, the officer in charge of Optometric Fabrication School, was one of the officers instrumental in the development of the course and the change from former location to the Naval Medical School.

John R. Ohlin, HMC, and Gordon W. Sumner, HMC, instructors are members of the first course in this type offered by the Navy in Brooklyn.

Salt Fish, Hash Enjoyed(?) by Middies At Naval Academy Before the Civil War

Everyone probably has a few gripes about the chow at different duty stations but how would you enjoy this menu, the bill of fare of the Naval Academy in 1856? The copy was obtained from Lt. T. V. Bonham, MSC, of the Food Service Division.

BILL OF FARE

For

Midshipmen and Acting Midshipmen
U. S. Naval Academy, Annapolis, Md., 1856

BREAKFAST

Tea and coffee—wheat and corn bread—butter and molasses.
Mondays—Cold and hashed meat.
Tuesdays—Fresh or salt fish from 1st of April to 1st of November; salt fish from 1st November to 1st April.
Wednesdays—Cold or hashed meat.
Thursdays—Fried hashed potatoes, with cold or hashed meat.
Fridays—Salt fish, from 1st October to 1st April;—from 1st April to 1st October, two hard-boiled eggs to each person, instead of other relishes.
Saturdays—Fried hashed potatoes with cold or hashed meat.
Sundays—Stewed oysters, from 1st November to 1st April;—cold or hashed meat from 1st April to 1st November.

DINNER

Mondays—Soup, salt beef and bacon.
Tuesdays—Soup, roast beef and mutton.
Wednesdays—Beef-soup, bouilli and pickles.
Thursdays—Soup, roast beef and mutton (poultry instead of roast beef and mutton, from 1st November to 1st February).
Fridays—Soup, (oyster soup from 1st November to 1st April);—pork and beans from 1st October to 1st April; fish from 1st April to 1st October.
Saturdays—Soup, bacon and mutton.
Sundays—Bean-soup, cold meats and pickles.
Cold wheat bread, potatoes, and at least one vegetable, daily.
Veal and lamb shall be substituted for beef and mutton from 1st May to 1st October, except Wednesdays.
Castors to contain vinegar, pepper and mustard, only.
No butter at dinner.

SUPPER

Tea and coffee, cold wheat bread, butter and molasses. No meat or fruit.
Dessert at Dinner
Sundays—Cold pies and cheese
Wednesdays—Puddings
In their season—Fruit on Fridays, from 1st August to 1st December.

JULY 28, 1951

Ex-Chief of Dental Services, Yokosuka, New Executive Officer, Dental School

Occupying the space afforded the Executive Officer of the U. S. Naval Dental School, Captain Bernard H. Faubion, DC, USN, relieved Captain A. H. Grunewald, DC, USN, in that capacity on July 28. Captain Faubion comes to Bethesda from Yokosuka, Japan, where he was Chief of the Dental Service in the Naval Hospital during the last two years. During the last 18 months of this period he had additional duty on Vice Admiral Joy's

Capt. Bernard H. Faubion

as Force Dental Officer, Command Naval Forces, Far East. Born in Los Angeles on April 17, 1911, Capt. Faubion was graduated from the University of Southern California in 1934 with B.S. and D.S. degrees. After serving his apprenticeship in the Marine Hospital, San Francisco, he developed a private practice during the following years.

He was appointed lieutenant junior grade in the Dental Corps of the Navy as a result of a competitive examination given in December, 1945. Early in his naval career he was assigned to foreign shore duty at the U.S. Submarine Base, Coco Solo, Panama Canal Zone. During an attack on our fleet at Pearl Harbor, he was aboard the USS *Sylvania*.

Capt. Faubion is past president of the Tokyo Bay Dental Society and former president of the Yokosuka Japanese Dental Society. For his contribution to the outstanding care of the Korean War casualties at the Yokosuka Naval Hospital during the period of Dec. 20, 1950 to Jan. 1951, he was awarded a Navy Citation shortly before leaving Japan.

Regarding his assignment here, Captain Faubion stated, "I am honored to be assigned duty in the U. S. Naval Dental School, National Naval Medical Center. The Dental School is recognized by the entire profession as one of the finest post-graduate schools in the world. I am fortunate to relieve such a capable officer as Capt. Grunewald and will endeavor to maintain the high educational standards and fine relationships set by him." Captain Faubion, husband of the former Mary Binford of San Francisco, Calif., and the father of Ray Sandra Faubion, resides with his family at Northfield Road, Bethesda.

LeBlanc Takes Job As Club Treasurer Replacing Reynolds

Succeeding Chief John M. Reynolds, George J. LeBlanc, HMC, USN, formerly of the station's Duplicating Department, will assume his new duties as Treasurer of the C.P.O. Mess (Open) on Aug. 15.

Since its official launching in July, 1950, the mess has offered many hours of pleasure to chief petty officers and their guests who have taken advantage of the club.

Looking more like a country club than a CPO mess, the club is located in the stone buildings which serve as NNMC's recreation headquarters. It is convenient to the parking lot, swimming pool, bowling alleys, gymnasium, golf course, tennis courts, and athletic field.

Nominated for his ability to carry out his duties in accordance with BuPers Regulations published for CPO Messes and Enlisted Men's Clubs, Chief LeBlanc has no im-

George LeBlanc, HMC

mediate plans to deviate from the regular routine.

As in the past, dances will be held for patrons every Saturday night starting in September and bingo games will continue.

Born in Louisiana in the year 1914, Chief LeBlanc enlisted into the Navy in 1935. Instructed in naval procedures at the Naval Operating Base, Norfolk, Va., he advanced to the rank of Chief Warrent Officer during his naval career.

Reverting to his permanent rate of CPO in 1946, he served aboard the USS *Bushnell*, a survey ship then surveying the Pacific islands to be used as future U. S. Submarine Bases.

Trained at the old school of duplication processes in the D. C. locality, he advanced to this station and placed in commission the new Duplicating Department. For his efforts while attached to that Department he was awarded a Letter of Commendation by Capt. B. W. Hogan, MC, USN, then Commanding Officer of the Naval Medical School.

Married to the former Josephine H. Hoover of Washington, D. C., Chief LeBlanc resides in Rockville with their two children, William and Yvette.

New Mustering-Out Payments Coming In Monthly Hundred-Dollar Checks

ISSUANCE OF MUSTERING-OUT CHECKS began at NNMC on July 24. Lt. J. I. Moon, Dispensing Officer, presents the first check to Thomas L. McGehee, HMI, who works in the Patient Record Office.

Personnel on active duty can expect their mustering out pay in \$100 installments, the Defense Department has announced. Only veterans already honorably discharged or released will receive the payment in a lump sum.

The new law stipulates that mustering-out pay will be paid to enlisted personnel and officers below the grade of major and lieutenant commander.

The exact sum of the payments are given as \$100 for less than 60 days service, \$200 for more than 60 days service without foreign duty, and \$300 for more than 60 days service including foreign duty.

For the purposes of this law, foreign duty includes any duty outside the three mile limit for any length of time after the man has completed 60 days of service.

Here at NNMC, the Dispensing Office is making payments to all those eligible whose enlistment began and ended since June 30, 1947. Those whose present enlistment began prior to June 30, 1947 must submit their claim in letter form to Field Branch, Special Payments Division, Bureau of Supplies and Accounts, Cleveland, Ohio.

All others need only to obtain a S&A form 550 from their personnel office and take that along with their form DD-214 to the Dispensing Office. They will be paid on the following work day.

Personnel honorably discharged or released after June 26, 1950 are eligible for the pay except:

1. Personnel transferred or returned to the retired list who receive retirement or retainer pay. Those retired or separated because of physical reasons are excepted.
2. Personnel who are discharged or released on their own request to accept employment and have not served outside the continental limits of the U. S.
3. Personnel whose total period of service has been as a student in a civilian institution.
4. Personnel discharged to enter the U. S. Military Academy, Naval Academy, or Coast Guard Academy.
5. Personnel whose only service has been as a cadet or midshipman.

A Case for Recreation

The tennis racket that wasn't available at Special Services, the fishing trip cancelled because of lack of equipment, the basketball that couldn't be located in the gym can be found in the lockers, trash cans, and around the barracks at NMMC.

Recreation funds come primarily from the profits of Naval Exchange. Naval Exchange profits originate partly from the profits of the coke vending machines. These profits are gauged upon the number of missing bottles. In plain words less bottles returned, less profit for recreation.

Seriously, what difference does a single lost coke bottle make? What effect does the loss of a couple or even, as in the month of June, 85 cases have?

Merely \$42 worth for that month. Or in recreation equipment, one dozen steel casting rods, 1,200 ping pong balls, 75 softballs or eight tennis rackets.

There's gold in them coke cases.

The Chaplain's Corner

by Chaplain Newell V. Brink

Asleep to God

It is quite possible to listen to the pronouncements of the tremendous truths of the gospels, calling for repentance and faith and obedience and shake the head and say "wonderful," until conscience and will power are asleep. Ezekiel said such people find the gospel a "lovely song" and not much else.

A sermon in church is not for the display of the erudition of the pastor, nor something to listen to and get an emotional glow. When church is over it is designed to go out into the world in the hearts of men and make them feel they must try harder and gloss less over their mistakes.

Sermons are constantly sounding in men's ears sickness, peril, affliction, providence, death, as they relate to the soul all of these things. Perhaps at time we grow weary while listening. Luke's descriptions of Eutychus who fell asleep and fell is parallel to some of our listening today.

Luther had a parable of Satan who sat on his throne listening to the reports of his messengers of evil and their progress in it. One said he loosed lions and killed many. There was no response. One said he cast a ship adrift and shipwrecked it; all perished. There was no response; Satan said it was their souls he was after. One said for ten years he had been trying to cast a Christian into a deep sleep and had at last succeeded. Then the Halls of Hell rang with malignant glee.

God needs wide awake Christians inside the Church and out. That is what we must be to further our part in bringing the Kingdom of Heaven.

I and E:

Information Booklet Outlines Procedure For Absentee Votes

Washington (AFPS) — Although Congress failed to pass the "Serviceman's Voting Act of 1952," there is no change in the absentee voting procedures previously outlined in the voting information booklet compiled by the Office of Armed Forces Information and Education.

The booklet describes the methods which State Legislatures have set up for absentee voting by servicemen and women. The bill in Congress would have ironed out some of the obstacles that might cause servicemen some difficulty in casting their ballots in a few states.

The Senate had passed the proposed voting measure and sent it to the House, but it never reported out of the House Administration Committee.

The bill was originally introduced in response to a President message pointing out that some servicemen might be deprived of their vote because of procedural obstacles contained in voting laws of a few states.

Some state legislators have themselves, however, eased some of the requirements. These have been announced through supplements to the original I and E booklet.

For further information see Lt. Baker, Rm. 213, Bldg. 1.

Diaper Derby

July 23—Pamela Arleen Myers, 7 lbs., 13 oz., daughter of Robert Myers, PN2, Insurance Office, Ward 102.

Lt. Shaffer Leaves Blood Donor Center To Assume Duties at USNH, Oakland

Leaving her job as senior nurse in NMS's Blood Donor Center, she has been for the last three years, Lt. Dorothy R. Shaffer, NC, will be detached tomorrow to report to the Naval Hospital, Oakland.

Coming to NMMC in January of 1949, she worked on ward 2-11 eight months before being assigned to the Blood Bank.

At that time she had just completed six months of duty in the Philippines and 18 months in Tsingtao, China, with the FMF as a dispensary nurse. Describing her chance to see the Orient as "the greatest education I ever had," she was particularly impressed by her vacation trip to Peiping, the center of Chinese culture.

Arriving here after her duty in China, she immediately noted the contrast in medical facilities. "I think every medical person in the Navy should have a tour of duty at the Medical Center," she said enthusiastically, commenting on how much she has enjoyed her stay here.

Her efforts in the Blood Donor Center have not gone unnoticed, for on Aug. 1 Capt. J. L. Enyart, CO of NMS, presented Miss Shaffer with a Letter of Commendation for her "outstanding performance of duty in the Blood Donor Center."

Originally from Pittsburgh, Pa., she graduated from the Western Pennsylvania Hospital Training School for Nurses. Entering the Navy in 1943 as an ensign, she received her lieutenant stripes in January, 1949.

Lt. Dorothy R. Shaffer

"Sold on the Navy," as she put it, the nurse plans to stay in the Navy. Recalling her own experience and travels thus far, she stated, "I think there are more opportunities for nurses in the Navy than in any other service."

"Right now, my main concern," says Miss Shaffer, "is getting a 1951 Chevrolet to California in one piece." She plans to make the thousand mile trip to Oakland alone.

Lonely Wanderer

Oh, who am I in this strange world,
But one of lonely wanderers—
Whose years destiny has unfurled
With newer and stranger wonders.

I wander over field and stream,
Gaze on nature's bounteous gift
And in my heart lies love's sweet dream,
Yet, still my life is lonely, swift.

One face among a million faces;
One life from whom the soul shall fly;
One me—void of lasting traces—
Forgotten in the grave I lie!

—GLORIA GOSNELL BURGESS, NMRI

Chief Takes Chief Scholastic Honors

COMPLETING 10 MONTHS OF STUDY, the class in Optometric Education was graduated Aug. 1. Taking highest scholastic honors was J. R. Amend, HMC, who will remain here for duty. Front row: J. R. Amend, HMC, instructor; Comdr. R. R. Sullivan, Head, Department of Optometry; Capt. E. B. Coyle, Executive Officer, NMS; Lt. A. E. Milbeck, Officer in Charge; and Gordon W. Sumner, HMC, instructor. Second row: J. Amend, HMC; H. A. Nowak, HMI, and T. R. Martin, HMC. Third row: J. Zinich, HM2, J. J. Voit, HM3, W. R. Houtz, HM3, and T. L. Mander, HMI. Fourth row: W. A. O'Brien, HMI, L. J. Flewelling, HMI, R. Sweeten, HMI, and L. R. Conyers, HN. Last row: J. W. Wilson, HM, L. A. Parkin, HM3, F. L. Hill, HMI, and H. E. Hope, HMI. Not in picture is L. F. Powers, HM2.

AUGUST 11, 1949

Five Years' Service in Navy Exchange Information Clerk Debuts as TV Star

PINS FOR FIVE YEARS OF SERVICE were awarded to six employees of the Navy Exchange by R. Adm. B. Groesbeck Jr. on July 25. Standing with Lt. Paul J. Metcalf, Navy Exchange Officer, and Admiral Groesbeck, the awarded are: Mrs. Teresa E. Nichols, office manager, Mrs. Myrtle E. Briggs, store manager, Miss M. Patricia Rooney, payroll clerk, Mrs. Violet Lechlear, stockroom clerk, Mr. Gregory Segreti, tailor, and Mr. Charley L. King, barber. Not in picture: Mrs. Emily Luehrs of the Golf Shop.

Recruiting Sergeant Now 2nd in Command Of Local Marine Casual Office, Ward 101

Hidden in ward 101 is an office seldom noticed by naval personnel but vital to the marines at NNMCM—the Marine Casual Office. This office, drawing its personnel from the Marine Barracks, Naval Gun Factory, acts in nearly every capacity for the majority of marines here.

A day's work might include personnel record problems, disbursing, filling a request for a needed uniform, giving tests for advancement, even attempting to aid a marine in martial or legal difficulties. This is one office that is happier when the volume of work lessens — it means less casualties, less wounded marines.

The first sergeant of the office, Harry H. Coff, was first sent to NMC in 1950 as the Marine Liaison NCO. When the casualties began arriving from the Korean theater, a need for an office was seen that could aid these men in all

Mustering Out

(Continued from Page 1)

in the three Service academies or in a prep school for candidates to one of the Service schools.

6. Personnel ordered to active duty merely for training or physical examination for a period of less than 60 days.

Personnel who are honorably discharged in order to reenlist will also receive mustering-out pay in \$100 monthly installments. They will have the option of collecting the money either at the time of discharge or at the end of their reenlistment period.

Personnel who have been discharged to reenlist before the passage of the K-Vet bill who are eligible for the mustering-out pay should first contact their personnel officers for verification of their separation and then their Disbursing officers to begin processing their claim for payment.

Veterans discharged or released before the passage of the bill have until July 16, 1954 to submit an informal application for the lump sum payment. Included with the application must be the original copy of Report of Separation from the Armed Forces of the United States (DD214).

The application should be on 8 x 10 1/2-inch paper and contain the following:

- a. Veteran's name and address, printed or typed.
- b. Service number, serial number or file number.
- c. Statement that he was not discharged or released from active duty to accept employment without service outside the U.S.
- d. Statement that he has not received any mustering-out payment or that he has not or will not make any other application for the mustering-out payment for service after June 26, 1950.
- e. Statement as to whether or not he has had any foreign service and the date of his return to the U. S.

'They're Off' — So's Projectionist

Lackland AFB, San Antonio, Tex. (AFPS)—A young theater projectionist was showing the last scene of "Blue Grass of Kentucky."

Shirley Temple was in the arms of the hero; the crowd was tense with expectation. Suddenly the soundtrack sounded, "They're Off!" The operator had flipped the wrong switch. Instead of the closing ballad, he had cut in the soundtrack of a horse race.

The former movie projector is now attached to a basic training squadron.

Displaying his photogenic features on the Art Brown TV program in the interests of the current blood donation drive, Edward Prise, HM3, admission clerk of the Naval Hospital, made his impromptu debut to the viewing audience last month.

Born in East St. Louis, Ill., on Feb. 5, 1930, Prise entered the Navy in 1947. After boot camp and corps school, he attended neuropsychiatric school at the Public Health Service Hospital in Fort Worth, Tex.

A qualified neuropsychiatric technician, he arrived here June 1948 and carried out his duties in the neuropsychiatric unit until his departure to the Fleet Marine Force. August 1950 he was transferred to Korea where he was attached to D Co., Second Battalion, Seventh Marines.

Shortly after going into action, his outfit was pinned down under heavy enemy fire near Seoul. A sniper's bullet buried itself in his right wrist as he went to the aid of a wounded Marine. He was evacuated, but returned to duty three days later.

Advancing to the 38th parallel,

Edward Prise, HM3

and back-tracking to Inchon, he took an active part in the invasion of Wonsan. Prise was hit in the back by shrapnel as his unit advanced to the mountains from Hungnam.

Since there was no immediate means for evacuation, Prise spent Thanksgiving Day working in the regimental aid station of H and S company near Hagaru-ri.

His left heel was damaged by Communist fire while he was moving out of the Chosin Reservoir on Dec. 3. Unconscious during periods of severe pain, Prise waited two days before being flown out of Korea to the Army Hospital in Osaka, Japan.

Arriving at the Tripler General Hospital, Hawaii, he was further transferred to Oak Knoll, Calif. He returned to duty March 1951 and has served on surgical wards as senior corpsman.

During the Annual Inter-Faith Rally held in Baltimore, Prise was presented with the key to the city and a certificate, signed by Governor McKeldin, making him an honorary citizen of Maryland.

Married to the former Rosemary Reed, and catering to the whims of their four months old son, Gerald, Prise resides with his family in the Chevy Chase area.

Theater Title Trouble

If Marilyn Monroe's two latest pictures ever play simultaneously in a double feature house, censorship may have to be extended to theater marquees. The blonde star's newest releases are "We're Not Married" and "Don't Bother to Knock."

Newcomer and Plank Owner Cut Cake

CUTTING THE ANNIVERSARY CAKE, which was donated by the Naval Hospital Food Services, was one of the highlights of the anniversary party July 28 in the Chiefs' Club in honor of the WAVES' 10th anniversary. Newest arrival at the Waves Barracks, Mary Lee, HM2, of NH, and Lenore Hill, HM2, of NMS, who has been stationed here since March 1949, were chosen to cut the cake. Back row: R. Adm. B. Groesbeck Jr., CO, NNMCM; Lt. Rita Lenahan, District Wave Representative, PRNC; and Lt. Elizabeth Wilson, Women's Personnel Representative, NNMCM.

Chesapeake, Lake Seneca, Ocean City Offer Large Variety in Fish and Water

A fisherman conversing about the favorite spots in his home state is like a new father bragging about his new son—never should be contradicted.

Each state's son feels and "knows" that there will never be an equal to his stamping grounds for real fishing.

Conceding to state pride, this general area still has many advantages—mainly its variety in waters and fish. Fresh water, salt water and streams are nearby. Marlin, sailfish, large-mouth and small-mouth bass, perch, flounder, spots, trout, kingfish, cobia, hardheads and even catfish are within car distance of the hospital.

Ocean City: 150 miles; highway 50 out of Washington; white marlin, good size flounder; trout, flounder, rock, and kingfish in the inlet, channel and off the pier.

Solomon's: Trout, weakfish and croakers; better fishing during the day than night.

Chesapeake Bay: Cobia in the Middle Grounds; rockfish, trout and hardheads in the upper bay.

Eastern Shore: Lake Garland about 50 miles from Bay Bridge; bass galore.

Lake Seneca: Bass, catfish and pan fish; use anything and everything for bait; live bait, spinners, and even, as Holda of NSHA did, a trout lure, the ruse lure; Lt. Atkinson of NNMCM caught a close to three-pound bass near the falls; Chief Klein and party of NSHA snagged 14 keepers, bass and catfish, using worms and grasshoppers, driftfishing along the banks; trolling with a daredevil, Klein hooked three.

The schedule for the Wizard motors for the next two weeks is:

Aug. 11 NMS-NMRI	Aug. 18 NDS-NH
Aug. 12 NH-NSHA	Aug. 19 NMS-NDS
Aug. 13 NDS-NH	Aug. 20 NNMCM-NH
Aug. 14 NMS-NDS	Aug. 21 NMS-NMRI
Aug. 15 NNMCM-NH	Aug. 22 NH-NSHA
Aug. 16 NMS-NMRI	Aug. 23 NDS-NH
Aug. 17 NH-NSHA	Aug. 24 NH-NMS

Picture Takers Have Picture Taken

GRADUATING JULY 8, NMS' CLASS IN X-RAY TECHNIQUE completed six months of study. Class honorman is John W. Ricketts, HMC. Front row: CWO L. J. Clark, OinC, X-ray School, and Capt. E. B. Coyle, Executive Officer, NMS. Second row: John Ricketts, HMC; Vincent Monteleone, HM3; Herman Balke, HM3; Lloyd Henry, HM3; Harry Forsha, HN; Daniel Pirkel, HN; Howard King, HM3; John Collins Jr., HM2; Evelyn Butler, DT3(W); and George Young, HMC. Second row: Eugene Marquette, HN; Leroy Howard, HM3; Jack Vickers, HM3; Franklin Moeschdorf, HN. Third row: Dennis Mason, HM3; Edward West, HM3; Robert Goldfein, HN; Asa Hinson Jr., HM2; George Guilbor, HN; Lee Williamson, HM3; and Peter Karoll, HN. Fourth row: Gerald Myers, HM3; John Coons, A/2c; Harvey Jackson, HM2; Sebastian Orifice, A/1c; Robert Coons, A/2c; Robert Randorf, A/2c; and Pickering Reynolds, A/3c. Last row: Ernest Larson, A/2c; Stanley Bergum, A/2c; Henry Kapper, A/3c; Louis Reitnauer, A/3c; and John Gates, A/3c.

Bomber Pilot, Blinded by Own Blood, 'Talked Down' by Other Navy Pilot

(AFPS)—The radio voice of one Navy pilot saved the life of another, blinded by his own blood, in the skies over Northern Korea recently. Ens. Kenneth A. Schechter, flying a Skyraider bomber from the carrier Valley Forge, was blinded by blood when ground fire tore the canopy from his plane and cut his face.

"I'm blind," he radioed. "Somebody tell me where I am."

Ltjg. Howard Thayer heard the plea, spotted the plane in a shallow dive and told Schechter to wiggle his wings if he was the one in trouble.

Ens. Schechter complied and Lt. Thayer followed close behind, guiding him through the clouds back toward South Korea. The lieutenant calmly advised Schechter to jettison his bombs, correct each wing dip, and anticipate each aerial hazard.

When they had crossed the battle line into friendly territory, Lt. Thayer suggested that Ens. Schechter bail out. The latter refused and asked to be directed to a South Korean airfield.

Under the constant strain of the terrible risk, Lt. Thayer guided the battered bomber to its destination and directed the landing as though he were setting down his own plane.

"Flaps down. Nose her down some more—left wing up. UP! Hold her steady, fellow. Throttle back more. Easy, boy, easy—that's it. You're on the ground."

Ens. Schechter landed with his wheels up because he couldn't find the controls within the plane. The bomber skidded in on its belly to a safe stop.

Seven Hundred APs Fly Navy's Planes

(AFPS)—Besides filling their primary duties as machinist mates, electronics technicians, or aerologists, a group of Navy enlisted men have earned their wings as aviation pilots.

At present there are approximately 700 enlisted aviation pilots who daily fly all types of planes, helicopters and blimps.

A typical group of "APs" are stationed at NAS Anacostia, Wash., D.C. They help to coordinate air traffic at the busy flight center there. Other billets such as airplane maintenance, operation and repair are also handled by the enlisted "APs."

One of the most famous of all Naval aviation squadrons was the carrier-based "Fighting Squadron Two" assigned to the USS Lexington during the late thirties.

Fighting Two (called the "Up and At 'Ems" in Naval circles) became famous for the proficiency and excellent flight record it maintained year after year in Naval flying competition. Most of the Fighting Two's pilots were enlisted men.

Today's "APs" still carry on with the same efficiency displayed by their predecessors.

Holding first class and chief petty officer ratings, more than 100 "APs" were recently re-commissioned to officer pilot status. Many of them held temporary commissions during WWII.

Head Sheet Metalist Constructs Cart Models

When technical aid and models were required for the heated-refrigerated chow cart mentioned in the last issue, the man seen was the Head Sheet Metal Worker of NNMC Maintenance Division, Mr. Richard E. Floyd.

Mr. Floyd, the winner of a recent \$50 suggestion award, aided in the final development of the cart and made the necessary models of the new invention.

Here since 1949, he worked in the gun factory before coming to NNMC.

Pretty Little Lass Halts Fire in Home

Mary Hogan

The quick thinking of pretty little six-year-old Mary Hogan saved NNMC from what might have been a serious fire Sunday, Aug. 3.

Mary entered the house while her father, Capt. B. W. Hogan, CO, NH, and the rest of the family were out in the garden. Entering the kitchen she discovered that flames, caused when grease from a roast caught fire, were spreading up the kitchen wall.

She ran next door to Capt. Brown's house and had Mrs. Brown notify NNMC's fire department.

Pvt. Crooks and Pvt. Jackson of the station fire department responded promptly and extinguished the blaze before any extensive damage was done.

Navy Says NROTC Exams Slated for December

(AFPS)—Tests for entrance to the Navy's college training program (NROTC) will be held for enlisted personnel Dec. 13, 1952, the Navy announces.

Personnel interested in participation in the program should apply to their commanding officers on form NAVPERS 953-A. After proper recommendations, physical exams and eligibility reviews, they will be allowed to take the test.

If they successfully complete the test, they will be sent to the U. S. Naval Preparatory School, Bainbridge, Md., before entering one of the 52 universities having NROTC units.

Sensible Sailor Seldom Sacrifices Saving Since Sagacity Soon Stops Swindlers' Sales

In the July issue of "All Hands" appeared an article "Slickers Make Hash of Serviceman's Cash." The story dealt with the confidence men and flim-flammers that live off the serviceman.

True, these bunco artists swindle thousands of dollars yearly from the members of the Armed Forces. However, the "parting of the ways" of the serviceman and his money is not confined to these racketeers.

The buyer of a car, purchaser of a home, the signer of a contract for merchandise is many times finagled by these con men's counterparts every day.

Merely two practices are used—smooth talk and a signature on a contract. Smooth talk or "puffing," as it is called, is valueless unless reaffirmed in the contract. Such claims as repairs for six months, definite estimates, and "this is your property, you can do what you

News Shorts from the Editor's Desk

(AFPS) — Marine enlisted promotions tests for the Fall of 1952 will be administered Aug. 27 through Sept. 19, for the promotion to the ranks of corporal to master sergeant. Service in-grade requirements are: Pfc. - nine months; Cpl. - 10 months; Sgt. - 12 months; S/Sgt. - 14 months. Service in-grade in either the Marine Corps or Marine Corps Reserve, active or inactive, will be included.

Lt. Comdr. Kathryn Dougherty, USN(W), has been appointed as new Deputy Director of the WAVES. A graduate of Iowa State Teachers' College, she entered the service in WWII and recently served as OIC of the Wave Recruit Training School, Great Lakes, Ill.

Three enlisted men of the Naval Medical School staff were awarded Unit Citations for their duty at USNH, Yokosuka at Saturday's inspection, July 19. The men were Lee G. Satler, HM2; Arthur L. Simon, HMC; and Ainslie W. N. King, HMC.

Nine civilian and naval scientists left recently on a trip to the North Geomagnetic Pole. Sponsored by the Office of Naval Research, the group is conducting a series of high altitude cosmic radiation experiments. Equipment will be carried to high altitude by large constant-level plastic balloons launched from naval vessels in Baffin Bay, the Davis Strait and the Kane Basin.

Red MIG-15 Stolen By UN Helicopter

(By Armed Forces Press Service) Right from under the Commies' nose, helicopter pilot Capt. Joseph Cooper brought back a MIG for UN air experts to study.

The dangerous task took place in North Korea where intelligence reported a downed MIG. Capt. Cooper's group was ordered to get the plane back to UN territory. Covering the captain in his H-19 "eggbeater" were 50 fighter planes.

The MIG was hard to dismantle. However, a few well-placed grenades made the job easier.

The valuable "junk" was loaded aboard the helicopter and returned to an Allied base. Capt. Cooper received the Silver Star for his part in the pickup.

We'll Be Back Again With You Soon

BEAUTY CHARM, AND TALENT highlighted the excellent variety show, the Art Brown Talent Revue, sponsored by radio station WWTN which appeared here July 22. The station is happy to learn that this was the first of any planned monthly appearance of the prettiest girls and the best talent in the Washington area. Art Brown, the veteran actor, radio and TV personality, and versatile master of ceremonies promises more of the same in the NNMC auditorium on the first Tuesday of each month. Some of the outstanding talent which appeared in the July revue are shown above. Upper left: Grace Haug, hula dancer; upper right: Terry Ward, singer; lower left: Richard Kimball, 11-year-old pianist; and lower right: Boyd Dumveour, the unusually talented silver tenor.

All-Purpose ID Card Adopted for Dependents

Washington (AFPS) — A single card for naval dependents' identification has been authorized for naval commands that request them, the Navy announces.

The single card will do away with the many cards issued to naval dependents for admission to such places as commissaries, movies, exchange, swimming pools. A study by the Navy showed that the multiplicity of cards was both burdensome and unnecessary.

Requests for the new card must be initiated by individual commands. The cards will be renewed on a yearly basis.

Army and Air Force officials have stated that they are working on a similar plan.

Time Lag Foreseen For Combat Bonus

(AFPS)—It will be at least several weeks before the Services begin to pay claims authorized under the Combat Pay Act of 1951.

In a special announcement, the Department of the Army explains that although rapid progress is being made in developing procedures on payment, extensive administrative information still must be compiled.

The process must first await a report from the Far East Command listing Army units whose combat service in Korea qualified their personnel for the \$45-a-month payments.

The list of eligible units must be determined before the claims of individuals can be acted upon.

The FECOM report, which required an examination of records covering more than two years' action, is expected to be received by the Department of the Army Sept. 15, 1952.

In making the announcement, the Army urged that all inquiries be withheld until further announcements. All Services are expected to begin payments at the same time.

Insurance

(Continued from Page 1)

providing a nest egg for retirement or separation.

This option is automatic in the case where a waiver is in effect lacking a letter requesting a refund. The VA pays three percent interest on national service insurance refunds (NSLI) and one-half percent on U. S. Government life insurance (G. I. Insurance) refunds.

Dividends will continue to be paid only on permanent plan policies for which no waiver has been submitted.

Further details concerning the refund are available at the finance office, ward 102.

AUGUST 11, 1952

Gals Bat 1,000 on the Photometer

LEADER OF THE WOMEN'S SOFTBALL TEAM, before the Ft. Myer game included, front row: Gerry Bourne, Marcia Scott, Maggie Carrie, Bertha Walbert, Elaine Fowser and Doris Salisbury. Stand: Joyce Crouch, Beverly Carlson, Doris Kinn, Mary Ellis, Esther Allen, Evans, Mary Cox, Marian Ulrich, Edna McCormick, Helen Jarvi, Pat DeBerry.

Minine Nine Drops 2 League Games Strong Army and Air Force Teams

The women's nine took a close 3-5 defeat at the hands of the visiting Reed team on July 29, here. Trailing 0-4 in the third, the Wacs gals brought it up to 2-4.

With one out and Ulrich on first, Fowser made first safely on a bad throw from the pitcher as Ulrich stole second. Then in a beautiful see-saw play, both runners kept stealing and as the confused Wacs tried to throw them out, Ulrich scored. Fowser advanced to third.

Fowser scored on a wild pitch from Crouch, making Bethesda's second. The cheering section cut in this inning, visibly rattling Wac pitcher, who did not recover his poise until the fifth.

In the fourth, Boots Carlson stole second and third and on a play to first for Bethesda's last run of the game. The Wacs remained 3-5 through the third innings.

M3 King, coach of the team, well pleased with the performance of the girls who made few errors against the first place league team who have lost only one game. King replaced Salisbury on second base in the sixth, making one out on a play to first, and a beautiful stop, tagging out a runner on a play from home, and relaying the ball from Cox to Fowser in the third for the second double play of the season.

McQuarrie walked two, struck out one, and gave up six hits. The Wac pitcher struck out 11, walked one and held Bethesda down to one single by Cox.

On July 22, the local gals fell to the Ft. Myer Wacs 3-13. Trailing at the end of the third, the Wacs scored one in the fourth, five in the fifth, and six in the sixth.

They slammed 19 hits off McQuarrie who managed to strike out three, allowing no walks. Meanwhile, the Bethesda nine squeezed three runs out of five hits. Wac pitcher allowed two walks and struck out five.

He relieved McQuarrie in the sixth, pitching one ball to the side retired. Crouch batted out a triple in the third and scored a run. Cox also scored in the third.

Amural Softball Resumes in Late August

A single round robin in softball will be scheduled for the latter part of the month.

Teams will again be made up of members of departments or commands wishing to form a softball team.

The defending champions will be the winners of the early season tournament, NSHA.

Check out equipment, for both defense and play, contact Chief of Special Services.

Schedule of games will be announced later.

AUGUST 11, 1952

'Local Nine' Golfers Prepare for Matches For Top Trophies

Golf again has the spotlight at NNMC with two of the three principal golf matches scheduled for this and next month.

Leading off is the R. Adm. C. A. Swanson Tourney with match play beginning next Saturday. The tournament, open to all with golf cards, expects a total of over 70 players qualified to tee off.

The first flight will begin next Saturday, the second flight, Saturday the 23rd, and the finals will be matched on the last Saturday of the month.

Prizes will be awarded to one-fourth of all entries. The winner and runner-up of each flight will be awarded prizes contributed by Special Services—golf carts, clubs, gloves, shirts, balls, and shoes.

September is the month when the personnel of the station will be vying for the station championship trophy—the R. Adm. M. D. Willcutts trophy. A qualifying round will be necessary before match play. Again a variety of prizes will be awarded winners and runners-up in all flights.

The intra-command match for individual trophies is tentatively planned for September. Command teams of 20 men will compete. Scores will be determined with handicaps.

The Capt. M. J. Crawford Tournament, designed to foster an interest in golf around NNMC, will be scheduled sometime in October. Capt. M. J. Crawford was the designer of the present course and first awarded the trophy in 1950.

The award is given to the winner of a beginner's match traditionally played in the latter part of the golf season.

(By Armed Forces Press Service)

New York—Two servicemen have been added to the U.S. Davis Cup tennis squad that will attempt to win back the international trophy from Australia this year.

Tony Trabert, SN, USN, Bainbridge NTS, Md., and Army Sgt. Bernard Barten, Ft. Sill, Okla., were named with four others for the American Zone eliminating matches with Japan.

Trabert was the American clay courts champion in singles and doubles (with Hamilton Richardson Jr.) last year.

Oslo, Norway—Sharpshooters of the Air Force Strategic Air Command paced the world's skeet champions and captured the first three places here in recent competition. The U. S. team took the international title for all pistol events, compiling a record score.

San Diego, Calif.—Workouts for the coming football season swung into full stride as only a week remained before the local bluejackets open their season with professional football's champion Los Angeles Rams.

Professional and College stars, including Jim Monachino, Vern Lillywhite, Bucky Curtis, and Wilbert Robinson were among the 60 candidates who reported for the opening scrimmages.

Two colleges and the Rams spice an 11-game schedule for the 1952 squad. Of the eight Service opponents listed, five are members of the 11th Naval District League which the Bluejackets led in 1951.

WIAL Golfers Begin Tournament

TEERING OFF, Lt. Anna Harkins, NC, NNMC, starts off the WIAL Golf Tournament. Three of the other entries are: Lenore Hill, HM2, NMS; Margaret Posipanka, HM2, NMS; and Capt. Margaret Ladd, USA, from Walter Reed.

WIAL Standings

	W.	L.	Pct.
WRAMC	8	1	.889
Qtrs. K	8	2	.800
Ft. Myer WAF	7	2	.777
Henderson Hall	6	3	.666
Bethesda WAVES	6	4	.600
Ft. Myer WAC	4	3	.571
Ft. Myer WAC Hq.	5	4	.555
Ft. Meade	3	3	.500
Quantico	2	6	.250
Arlington Hall	2	7	.222
Bolling AFB	2	8	.200
Ft. Belvoir	0	9	.000

The Story's All Wet

The Olympics at Helsinki are not solely unique in the smashing of endurance records this summer. Three lifeguards stayed on the bottom of the NNMC pool for three hours apiece on Monday morning, July 28. This was accomplished without special breathing apparatus or tubes.

Of course that the pool was empty because of repairs might have aided them a little. It seems that one of the pool lights, by fair means or foul, was broken sometime Sunday and the local swimming hole was closed for repairs. The crew used the opportunity to give the bottom a good scrubbing and reopened it Wednesday, July 30th.

This is One School That's All Wet

CLASS IN SENIOR LIFE SAVING completed 16 hours of instruction in life saving and water safety techniques. Graduates received Red Cross Senior Life Saving Certificates and emblems. The class included, front row: Mr. Ted Repplier, Red Cross instructor; Edwin Coyt, Joseph Freeman, HN, NH; Frederick Tyson, DN, NDS; John Boretos, DN, NDS; and Wally Wiggs, HN, NH. Second row: Patricia Welty PNSN, NNMC; Robert Bruntmyer, SN, NMRI; George Radigan, SN, NMRI; Patrick Barras, HN, NH; William Davis, HN, NNMC; Jonathan Johns, HN, NH; Eldon Platt, HN, NH; and William Conran HM2, NNMC. Back row: Samuel McDaniel, HA, NH; Aubrey Bice, HN, NH; Frank Waldon, HM2, NMS; Peter McLaughlin, HN, NH; Ernest Belle, DT1, NDS; Albert Wienburg, HN, NH; and Robert Cook, HM3, NMS. Insert: Instructor Ted Repplier watches as Davis breaks a wristlock on Johns.

Navy Belles

by George

The new front room at our house is fast taking shape. Furniture is arriving fast and the rest should be here soon. We've had fun playing hop scotch on the newly painted front steps. We're expanding upstairs too, as we take over some of the space formerly belonging to the Dental boys.

New girls are coming in for Physical Medicine and X-ray schools which start this month. Among the new faces so far are "Ding" Gerry, "Bubbles" Lazar, "Mother" Paul and Carol Buelow (no relation to our Bethy, tho). Also checking in is Melva King, HMI, for Hospital Command and Helen Petersen, DTGCA, for NDS.

Far too many girls are in sick bay again this month: Lou with a cast on her foot, Clarice with a hand tied up, Pat and Tillie hopping on one foot, and Hammett, McGaugh and Troop sick. Gerry is still on her special diet but back on duty again. Minnie Smith turned in last week for foot surgery.

Scotty has been writing cards to all the gang telling about her vacation on the Island. Chief Barry is our new night mother.

With Spanish class over, the conversation has gone back to English again.

Ann is looking forward to being called Mrs. Livoti full time.

I saw a poster in the lounge telling about the golf tournaments. Walter Reed copped the cup this year for the WIAL, but Ft. Myer and NNMC were also represented.

Tennis will be next on the League schedule and then it will be time for bowling, volleyball and basketball—get limbered up girls!

It looks like "Mike" will be our next bride—and speaking of brides—word has it that an old shipmate of ours now in Hawaii jumped in and took the fatal step—Marian Habel is a "Mrs." now.

Off to sleep now with a promise to my roommate to use hand lotion for sure this time.

NMRI

by R. Conaway

We hear that Willie is having an eviction party in the near future. When are you going to shave off that mustache, fella?

A certain secretary was seen at the Wave's Party in a poontang dress. Mighty chic, huh!

A bit of good news for George, "the gal from the heart of Maryland": A new redhead has been seen on the compound, and what's more, he banks his money too.

What do you do when you wear your bathing suit out Mabel?

Eldred and Hamby have developed a sudden interest in blue skirts—and brooms. What say, skid! We hear too, that Hamby has another iron in the fire; at any rate, "she" sure keeps the phone sizzling.

Griffits, Hamby, Parnham, and Allen did it again. The first three re-enlisted for six, while Allen just took a small bite of four years.

We welcome back to the Institute Ltjg. L. L. Taylor, MSC, from NMS. Mr. Taylor was once a researchite, and like the rest of us, is always glad to come "back to the fold." A hearty welcome aboard also to Ltjg. M. Walser, MC, just reporting from civilian ranks.

Ltjg. R. E. Jensen, MSC, seems to be the only transferee this issue. A fond farewell to Mr. Jensen, as he leaves for Camp Lejeune, N. C.

Red, that must have been mighty good coffee when you drove 60 miles to get it.

For the information of the MAA Force: "It isn't 'cause the payments can't be made that she no longer drives the Olds each day; a certain party needs that heavy car, when making flying trips from Charleston way!" With that bit of poetry (?), I'll say so long 'til next time.

Dental Explorer

by C. Connor

With his ears cut long and his tie cut short (and by his prize students at that) Chief Bacon bid us all a sad farewell and proceeded to make tracks for NSHA where he will attend classes for many months. He left quite a challenge for Tribble though, because, as you all know, Chief always called the roll from memory, so all eyes are upon you, Mr. T.

Among those present to help the WAVES celebrate their 10th birthday party were Capt. and Mrs. Taylor (the Capt. sure was sporting a snazzy tie). Capt. Faubion, though not at the party, did manage to enjoy a piece of the cake. (He saved a bit for his little girl who also verified it as being good.) We hope to see both Capt. Taylor and Capt. Faubion with their wives at our party again next year.

Well, Munroe is sure burning the midnight oil these days. He is writing a book on X-ray. Looks as if we'll have a celebrity on our hands one of these days.

Capt. Grunewald and Comdr. Grady also bade us adieu on Aug. 1 when they left for their next duty stations at Great Lakes. We enjoyed serving with both of them and wish them Godspeed on their new duty stations.

We are pleased to have Anna back with us again after her tour of night duty; especially a certain corpsman in partial dentures who looked real sad for the time she was away.

Cliff Holmes has been playing a little bit of "Sam Spade" of late and all because his weights are missing.... He claims to have acquired the limping from weight lifting but could be he wasn't wearing his track shoes when he spotted a blonde. How about it, Cliff?

Welcome aboard to all our latest staff members. We hope you enjoy your stay with us at NDS.

Wedding bells rang out on Aug. 2 when a guy from Georgia said "I DO" to a gal from Maryland. The guy: why Jernigan from DPT school. Good luck, Mr. and Mrs. J. from all of us.

Well, that's it for this time, so smooth sailing to all hands from THE GAL FROM THE HUB.

The Nose Have it With Dental's Izzy

That face one might see following an oversized proboscis as the rest of the body shuffles along the corridors of NDS, Bldg. 1, belongs to a native Washingtonian named Isadore (Izzy) Ettleman, DN.

Slapped upon his posterior on July 6, 1930, "Izzy" made his first outcry which afforded evidence that the Ettlemans had another mouth to feed.

Progressing through school to the second level at the University of Maryland, "Izzy" majored in chemistry before his formal introduction into the Navy at Great Lakes, Ill., in Feb. 1951.

Curiosity more than anything else led to his selection of the dental field. Since no one, not even he, believed that a mouth existed behind his oversized beak, he was overcome with joy when he finally realized that Mother Nature had not neglected her duties toward him. He then decided to investigate the oral cavities of other humans.

After being graduated from the Dental Technician's School at Great Lakes, he arrived at this station during September 1951. While

Isadore Ettleman, DN

here he has worked in the Special Services Dept. and in the facilities of NDS.

Active in high school sports "Izzy" once scored 290 points on the rifle target out of a possible 300 score. Giving full credit to his nose, he remarked, "It was like this... I used to sight along my facial projection instead of along the barrel of the rifle."

Accepted by the Tau Epsilon Phi fraternity during college days, Ettleman was initiated by being "kidnapped," clothed in tattered rags, oversized shoes, minus identification or money, and dumped out in the sticks, 70 miles from the college grounds.

On the more serious side, Ettleman proved his capabilities when he copped the Sophomore Cup as the outstanding sophomore of his class.

Once separated from the Naval service, "Izzy" hopes to return to college where he will pursue the study of chemistry, or possibly, the study of dental procedures.

"Chief, how long has Davis held that job?"

Trim Lines

UNLIKE THE LINES cluttering the deck around her, Virginia Gilmore's lines are in proper order. The Warner Bros. starlet currently is seen in "Painting the Clouds with Sunshine." She was dubbed likely to succeed by film veteran Joan Crawford.

... Movie Schedule ...

Time: 1900 — NNMC Auditorium

Monday, Aug. 11 MACAO (Robert Mitchum - Jane Russell) Last of the Wild West	Monday, Aug. 18 LAURA (Gene Tierney - Dana Andrews) Happy Valley (c.c.)
Tuesday, Aug. 12 TO THE SHORES OF TRIPOLI (John Payne - Maureen O'Hara) Plane Goofie (c.c.)	Tuesday, Aug. 19 HOT LEAD (Joan Dixon - Tim Holt) Murder in a Flat
Wednesday, Aug. 13 THUNDERHEAD, SON OF FLICKA (Roddy McDowall - Preston Foster) Good Housekeeping (c.c.)	Wednesday, Aug. 20 THE SNIPER (Adolphe Menjou - Arthur Franz) Let's Go (c.c.)
Thursday and Friday, Aug. 14, 15 THE LADY IN THE IRON MASK (Louis Hayward - Patricia Medina) Housebusters (c.c.)	Thursday and Friday, Aug. 21, 22 HERE COME THE NELSONS (Ozzie Nelson - Harriet Nelson) Bathing Buddies (c.c.)
Saturday, Aug. 16 BATTLE AT APACHE PASS (John Lund - Jeff Chandler) Blue Baron and Orchestra	Saturday, Aug. 23 INVITATION (Dorothy McGuire - Van Johnson) His Mouse Friday (c.c.)
Sunday, Aug. 17 KID MONK BARONI (Richard Rober - Bruce Cabot) Off to the Opera (c.c.)	Sunday, Aug. 24 HALF BREED (Robert Young - Janis Carter) Rail Road Special Agent

He had choked her. She was dead. There was no question about it. He had listened to her dying gasp. Now she was dead, cold as the hand of death. Yet in his anger he was not convinced. Furious still, he kicked her again. To his amazement she gasped, coughed, then began to hum softly.

"Just a little patience is all it takes, John," said his wife from the back seat.

"So," sobbed Ilma Jropotkin Vilynikovitchsky, "Ivan Ninovitchsky died in battle. Did he really whisper my name with his dying breath?"

"He did his best, lady," was the reply. "He did his best."

Philippine Dignitaries Visit NDS, Making Tour of Dental Installations

THE VISITING PHILIPPINE COLONEL first paid his respects to R. B. Groesbeck Jr., CO, NNMC, before touring the Naval Dental School on Aug. 14. L. to r.: Capt. B. H. Faubion, R. Adm. B. Groesbeck Jr., J. Miguel Fernandez, Capt. R. W. Taylor, and Capt. C. Montano.

Col. Miguel Fernandez, Chief, Dental Corps, Armed Forces of Philippines, visited the Naval Dental School on Aug. 14 and 15. He was accompanied by Capt. C. Montano, Assistant Armed Forces Attache of the Philippines in the U.S., now assigned to the Philippine Embassy.

Remarking that he had visited dental facilities in Italy, Spain, France and Belgium, the colonel stated that nowhere had he seen anything that could equal the facilities and operations of the dental service here. "They're tops," he concluded with a smile.

The five-foot-nine, heavy-built colonel is the first chief of the Philippine Dental Corps. Before the war, the ground forces, navy and air force all had separate dental services. In 1951 a special act of Philippine Congress coordinated them under the leadership of Fernandez.

Last month the colonel attended the 11th International Dental Congress in London. Now he is in the midst of a tour of dental installations of the Armed Forces in the Philippines.

Arriving in Washington on Aug. 13, he immediately called on the Chief of Dental Services, USAF. The following day he called on R. Adm. Daniel Ryan, Assistant Chief of BuMed (Dentistry), and R. Adm. Chandler, Inspector General, Dental.

He also met R. Adm. A. R. Harris, District Dental Officer of the Ninth Naval District who invited him to the dental facilities at Great Lakes, and R. Adm. H. P. Riebe, Director, Naval Dental Activities, Pacific Coast, who also extended an invitation to Col. Fernandez to the installations on the West Coast.

On Thursday Col. Fernandez dined upon R. Adm. B. Groesbeck, NNMC. After lunching with

Off Duty Classes Scheduled by G.W.U. Start in September

The College of General Studies, George Washington University, is offering off duty night classes at NNMC for all those interested in college credit, self improvement, or both.

These courses are designed to meet once a week for 15 weeks and to carry three hours college credit.

The schedule for the fall semester is as follows:

Psychology of the Physically Handicapped — Mon. 1830-2100.

Spanish II — Tues. 1830-2100.

Personnel Management — Wed. 1830-2100.

English II — Thurs. 1830-2100.

All classes will be held in Building 131.

Registration for these courses will be held at the Information and Education Office, Bldg. 102, on Sept. 3, 4, and 5 from 0800 to 1630.

All interested civilian and service personnel are eligible for enrollment. Patients must secure the permission of their ward medical officer before being allowed to enter classes.

The cost of each course is \$30.00 for service personnel and \$36.00 for civilians. One third of the tuition is due at the time of registration. This fee may be made by check or money order payable to George Washington University. If enrollment is not sufficient to begin a class, payment will be returned in full.

First sessions of these classes will meet the week beginning September 15. Further information concerning this program is available at the Information and Education Office.

Capt. B. McCandless, Honor Medal Winner, Patient on Tower 15

As Capt. Bruce McCandless, patient on Tower 15, makes his daily trip down to Navy Exchange, staff and patients alike can't help but stare at the ribbon over his left pocket—the coveted five white stars on a pale blue field, the mark of a holder of the Congressional Medal of Honor.

The citation, presented in the early stages of the second World War, was awarded "For conspicuous gallantry and exceptionally distinguished service above and beyond the call of duty as Communication Officer of the USS San Francisco in combat with enemy Japanese forces in the battle off Savo Island, 12-13 November 1942."

In the midst of a night battle with the Japanese forces, the enemy bombarded the flagship San Francisco's bridge and seriously wounded the then Lt. Comdr. McCandless and killed or wounded the Admiral in command, his staff, the captain of the ship, the navigator, and all other personnel on the navigating and signal bridges.

Seeing the lack of superior command upon his recovery, McCandless promptly assumed command of the ship and renewed orders for course and gunfire against the powerful enemy.

The latter part of the citation read: "With his superiors in other

Capt. Bruce McCandless

vessels unaware of the loss of their Admiral, and challenged by his great responsibility, Lieutenant Commander McCandless boldly continued to engage the enemy and to lead our column of following vessels to a great victory.

"Largely through his brilliant seamanship and great courage, the San Francisco was brought back to port, saved to fight again in the service of her country."

Prior to coming to NNMC, Capt. McCandless was on active duty at the Naval Academy in the Executive Department, where he was battalion and regimental officer and later headed the Academic

Capt. Hogan, CO, Naval Hospital, Selected to Rank of R. Admiral

Capt. Bartholomew W. Hogan, MC, USN, Commanding Officer of the Naval Hospital, was selected this month for rear admiral. Since Capt. Hogan doesn't expect his new rank to be in effect until next summer, the hospital will be fortunate in having him remain in command until then.

School Bells Ring For Enlisted Staff Today and Tomorrow

Today and tomorrow a large majority of the staff personnel of NNMC are returning to the school room.

Following, in general, the program of last year, the Hospital Corps Training Program will resume instruction for rated and non-rated men in the different requirements of their rate.

As in former years the course will continue until the early part of June. The revised schedule of instruction for non-rated men is: Aug. 25-Sept. 25, Military Requirements and Materia Medica; Sept. 29-Nov. 6, Military Requirements and Nursing; Nov. 12-Dec. 18, First Aid and Minor Surgery and Nursing; Jan. 19-Feb. 19, Health and Sanitation and Anatomy and Physiology; Feb. 23-Mar. 19, Health and Sanitation and Anatomy and Physiology; March 23-Apr. 23, Military Requirements and Materia Medica; Apr. 27-June 4, Military Requirements and First Aid and Minor Surgery.

For rated men, the new schedule is: Aug. 25-Sept. 25, Materia Medica and Military Requirements; Sept. 29-Nov. 6, Pharmacy and Military Requirements; Nov. 12-Dec. 18, Chemistry and Nursing; Jan. 19-Feb. 19, Anatomy and Physiology and Clerical Procedures; Feb. 23-Mar. 19, Anatomy and Physiology and Clerical Procedures; Mar. 23-Apr. 23, Health and Sanitation and First Aid and Minor Surgery; Apr. 27-June 4, Health and Sanitation.

The new instructor for nursing is Lt. E. L. Schmidt, NC, USN. Miss Schmidt has been teaching in the Navy for 10 years. Prior to coming to NNMC, she taught "Emergency Medical Care" at the advanced Hospital Corps School at Portsmouth.

Miss Schmidt has also taught in the Hospital Corps School at San Diego, instructed natives in Guam in nursing procedures and aided in the establishment in 1943 to 1945 of a training program for naval cadet nurses.

The Art Brown Talent Review sponsored by Station WWDC will appear here again Aug. 26th at 1900 in the NNMC auditorium. Admission is free.

The four other Medical Corps captains selected for rear admiral are Capt. Thomas F. Cooper, CO, NH, Great Lakes; Capt. James R. Fulton, CO, NH, Annapolis; Capt. O. B. Morrison Jr., Staff, Commander Naval Forces Far East; and Capt. French R. Moore, CO, NH, Newport.

Capt. Cooper will become DMO, 1st Naval District, Boston, and Capt. Fulton, DMO, 13th Naval District, Seattle. The other three captains will not be appointed until vacancies in flag officer allowances for the Medical Corps occur.

Dr. Hogan served as executive officer and acting commanding officer of the Naval Hospital here from 1947 to 1949. He returned here on July 28, 1950 to assume the duties of commanding officer of the Medical School. One year later, on July 16, 1951 he undertook his present duties as commanding officer of the Naval Hospital.

During World War II the captain was wounded during the sinking of the carrier Wasp at Guadalcanal. His heroic performance in caring for the wounded and

Capt. B. W. Hogan

dying won for him the Silver Star Medal. He was the carrier's senior medical officer.

He also earned the Navy and Marine Corps Medal for outstanding work in combat waters on board the destroyer USS Duncan.

Born in 1901 at West Quincy, Mass., he received his degree of Doctor of Medicine from Tufts College Medical School in 1925, and was awarded the Phi Lambda Medal for highest achievement in medical studies.

He entered the Navy as lieutenant junior grade in 1925. In 1945 Capt. Hoagan received a degree of L.L.D. (Honorary) from Mt. Saint Mary's College in Emmitsburg, Md.

Dr. Hogan is married to the former Grace Gloninger of Emmitsburg, Md.

Uniforms Different, but Same Spirit In Yeomen F, Says Finance's Mrs. Moore

"Our uniforms look pretty queer today, but we thought them pretty special at the time," says Mrs. Mary T. Moore, of the Procurement Branch of the NNMC Finance Division, as she reminisced about her tour of duty with the Yeomen F.

More often referred to as Yeomanettes, the Yeomen F were the first women selected for active duty with the naval establishment. In March 1917, Secretary of the Navy Josephus Daniels inaugurated the Naval Reserve program, under which more than 10,700 yeoman-

Mrs. Mary T. Moore

ettes served the nation in World War I.

Mrs. Moore enlisted on Nov. 3, 1917 in New York, and was on active duty until July 31, 1918. She worked at the Fleet Supply Base, which was near her home in Brooklyn.

Although she did not receive her honorable discharge until Dec. 11, 1920, she was released in July of 1918 to do the same work under Civil Service.

The Yeoman F did not attend boot camp, but they did learn to

drill, practicing on the roof of the Brooklyn Supply Base or the drill floor of the 2nd Naval Battalion in Brooklyn. "I can remember marching in many a parade down Fifth Avenue," reminisces Mrs. Moore.

Describing the uniform, she said, "We wore a navy blue Norfolk suit with dark blue blouses, a sailor hat with a large crown, and a bridle to hold it in place on a windy day, and a cover-all navy blue cape with two huge frogs to fasten it.

"The summer uniform was of white, well down to our ankles."

As for pay, it was thirty dollars a month plus two dollars a day for subsistence. By the time she reached the rate of second class she was making \$105 a month, including the subsistence money.

Speaking of the service, Mrs. Moore remarked, "I'd do it over again if I were young enough." She comes from a military family, as her grandfather was a Civil War lieutenant, her father a captain in the Spanish American War and her brother a lieutenant in World War I.

A member of the National Yeoman F, which holds an annual dinner, Mrs. Moore says there are at least two other Yeomanettes here at NNMC: Mrs. Laura Dewitt, also of the Finance Division, and Mrs. Grace Hogue of the Information Desk.

At NNMC since 1948, Mrs. Moore formerly worked for the Bureau of Medicine and Surgery.

That Ten Percent

In the Navy, it's traditional, no matter the rule, regulation or order, that a classic percentage "don't seem to get the word."

NNMC, a part of the Navy and therefore a partaker in its traditions, both great and otherwise, also is blessed with its "certain few."

Recently the ease of serviceman voting was widely publicized. Through state legislation, the procedure of registering and voting generally was simplified to where merely a post card form (Form 76) submitted to state authorities was sufficient.

In the Navy, circulars, directives, and booklets were distributed explaining the procedures. Personnel

were assigned to aid the serviceman.

Yet it seems a "distinguished few" didn't get the word. But there is still an opportunity, generally, to register for the coming election even though not registered for the primary. In most cases all that is required is Form 76. This form, the size of a post card, is available in room 213 from Lt. D. H. Baker, NNMC's voting officer. Information on individual state requirements can be found there also.

Residency in most cases is one year in the state and six months in the county.

See your voting officer and make application for your ballot. Don't be one of the certain percentage by not casting a ballot.

NDS Interns End 7-Month Class

THE FEBRUARY-AUGUST CLASS of Naval Dental School Interns graduated on Aug. 21. Front row: Ltjgs. William J. Cummings, Walter N. Johnson, Clifford J. Raimist, Frank L. Gliottone, and Dallas C. Hess. Second row: Joseph C. Coceran, Charles S. Scruggs, Robert W. Bagby, Bernard Malberg, Joseph P. Skellechock, and William S. Swift. Third row: Robert F. Fitzgerald, Irving Weber Jr., Neal A. Sprague, Milton L. Carleton, Clifford Ray Jr., and Rupert E. Fixott. Fourth row: Donald C. Rose, Clement S. O'Meara, Robert D. Stott, Harold J. Montgomery, William S. Allison, Loren V. Hickey, and Billy M. Pollard.

News Shorts from the Editor's Desk

The Defense Department has estimated that approximately 610,000 men will be inducted into the Armed Forces this fiscal year. In order to meet this military manpower goal, Maj. Gen. Lewis B. Hershey, Selective Service Director, has announced that it might be necessary ultimately to call men who have been deferred for dependency reasons. Gen. Hershey declared that there were no plans for wiping out dependency deferments in the next few months, but that a review was of the "utmost importance" because of sharply heavier induction quotas beginning in October.

Secretary of Defense Robert A. Lovett announces that the nation's Armed Forces increased 300 percent in 1951. The Army was enlarged from 500,000 to 1,500,000, the Navy from 376,000 to 900,000 and the Air Force from 401,000 to 973,000, with the Marine Corps strength tripled.

The Veterans Administration announces that post-Korean veterans who want to learn how to fly will have 75 percent of their flight training costs paid by the government under the new K-Vet bill. The rest must come out of the veteran's own pocket.

Diaper Derby

July 30—Elizabeth Jane Rupp, 8 lbs., daughter of Lt. Nelson W. Rupp, DC, USN, NDS.

Aug. 7—John Stanley Prichard, 8 lbs., 12 oz., son of Ltjg. John Elmer Prichard, MC, USNR, Orthopedics, NH.

Aug. 15—Maureen Lee Carney, 6 lbs., 11 oz., daughter of Robert D. Carney, HM1, of Pharmacy, NH.

Aug. 20—Lynn Albert Elkins, 6 lbs., 9 oz., son of Floyd A. Elkins, HM3, USNR, of Photo Lab, NMS.

If

Oh "if" is such a little word,
So small—almost obscure;
Yet, it can be the saddest heard,
The hardest to endure.

"If I could have just one more chance,"
We oft' times hear this plea;
"If only I had known, perhaps,
How different things would be."

A wayward son in anguish by
A mother's grave bends low;
"If only I had stayed at home,
She'd still be here I know."

Yes, "if" is such a little word,
But always in the way;
It's in the way of things we do,
And every thing we say.

Let us think before we utter,
A word in anger's tongue;
Let us banish "if" forever,
Leave sorrow's song unsung.

The Chaplain's Corner

by Chaplain Warren D. Trumbo

Roll With the Punches

In a recent newspaper article, Bruce Barton quoted the following from an official of the Ford Motor Company: "In the early days of the automobile, the tires were built to resist the road. We kept trying to make them tougher and tougher but, in spite of everything, the road had the best of the battle. We just couldn't make a tire that would resist for more than 3,000 to 5,000 miles.

"Then we changed our whole approach. We quit trying to build tires that could resist the road; instead we made them to absorb the shocks. And now they last 20,000 to 50,000 miles."

There is a basic truth in these statements which can be applied to life. The truth is that we cannot expect to win all the battles of life by resisting them. We are not tough enough to resist all the cruelties of life. Therefore, we must learn to absorb them.

Many of the self-sufficient, tough-skinned individuals are merely repressing their problems and over a long period of time. These problems will eventually erupt and cause serious mental disturbances.

If we seek to become tougher and tougher, as was the policy followed in the early attempts in producing automobile tires, we will find ourselves fighting a losing battle. In other words, absorbability is a more desirable quality than resistibility.

How can we develop this ability to absorb the blows of life? We can do it by attaining a strong inner moral stamina and fortitude. To express it in religious terms, we can develop this inner strength by having and practicing a dynamic faith in God.

The wise prophet Isaiah expressed it in this way: "They that wait upon the Lord shall renew their strength; they shall mount up with wings as eagles; they shall run, and not be weary; and they shall walk and not faint."

Our goal in life then should not be to escape or even resist all problems, disappointments and sorrows. A more successful policy is to develop an inner faith which will enable us to confront personal problems and absorb them without permanent damage to ourselves.

AUGUST 23, 1951

Phys. Med. Receives First Waf Student

LEARNING IN, as the Air Force expresses it, Valerie Andres, A/3c, USAF, the first Waf to report for school here, gets a run down on the barracks regulations from Lt. E. C. Wilson, Women's Personnel Representative, before beginning Phys. Med. classes.

"Everybody stares so," says 19-year-old Valerie Andres, A/3c, USAF, new student in Physical Medicine School. Now any girl five feet five, weighing 122, and with as nice a combination of blond hair and hazel eyes as "Val" has, is used to a few stares, but hardly the amount she's getting around here.

Valerie is the first Waf ever to be stationed at NNMC, and was quite a surprise to the people who were expecting the Air Force to fill their quota with men. The orders were quite a surprise to Valerie, too, who learned only five days before arriving that her new school meant duty with the Navy.

"I should have joined the Navy the first place," she laughed, "it could have been so much simpler," helpful people tried to explain the meaning of "liberty card, deck, rattlebutt, head, master at arms," etc. in about five minutes.

Although she had considered the Navy, she enlisted in the Air Force at November when she learned that the chances of overseas assignment were better there.

Leaving her home in Lodi, Calif., and the beginnings of an art major at Stockton College, she packed up her gear and reported to Lackland AFB, San Antonio, Tex., for basic training.

Her only duty station so far has been the Air Force hospital at Westover AFB in Massachusetts where she worked on the O.B. ward.

Air Force personnel have been stationed frequently in Med School since they first arrived for Pharmacy School last August, and Med School has had its share. Aug. 11 marked the first day to a Waf "clear in."

Did You Know . . .

Building 14, Material, stocks over 100 items. These range in price from a fraction of a penny (.004) to stock tags to articles for \$140. NNMC's Disbursing Office, in an average month, turns out over 10,000 checks for payrolls, bills, etc. Eighty-two pieces of automotive equipment are assigned to NNMC including such vehicles as those used for Special Services and Naval change. These include eight ambulances, nine passenger cars, four jeeps, four buses, four jeeps, four fire trucks, one X-ray mobile, thirty-five trucks, three trailers, eleven tractors, and one truck.

The Boiler Room, in the month of July, produced 12,350,000 lbs. of steam for NNMC. In an average month the Boiler Room uses over 600 gallons of oil to heat the boiler, buildings, and for refrigeration. Ice, over 35 tons per month, also made by the Boiler Room. NNMC used enough cans in the month of July to make 122 bales of 50 pounds apiece.

Photostat produces an average of 50 reproductions per month.

Bright Red Suggested For Navy Rescue Gear

(AFPS)—The Navy may be in for a gigantic paint job.

Navy researchers report that a bright scarlet seems to be a better attraction than the life-raft yellow now universally used.

"A light bright scarlet (Munsell 7.5 red) can be seen at greater distances than the chrome yellow now in wide use for rafts, lifeboats, life-preservers and similar equipment for air and sea rescue," say scientists at the Naval Medical Research Laboratory, Naval Submarine Base, New London, Conn.

Yellow was originally selected for painting rescue equipment because it is conspicuous at close-up distances, the Navy scientists report. But they maintain that yellow is likely to blend in with the sunlight at sea even at short distances.

"Moreover," they say, "under certain conditions all people, even with the best of color vision, are color blind to yellow and blue."

NNMC Offers Two Libraries for Your Spare Time Studies

With the new K-Vet Bill again allowing many servicemen to either begin or renew school, interest in re-examination or research in studies is noticeable around many service installations.

The serviceman at NNMC, in many ways, is more fortunate than those at other commands due to the two excellent service libraries here—the crew's and medical.

Most staff and students are familiar with the crew's library and know of its scope and variety offered. However, many do not realize that in the medical library, there also lies an abundant supply of books, periodicals, texts, and papers for students entering any major, with particular emphasis upon those of science.

This library, open to all students and staff, both officer and enlisted, has as its purpose the collection and distribution of non-fiction texts, to aid those in medical or allied fields.

In doing this, the library stocks many books that are useable, to list a few, for the student in mathematics, biology, chemistry, engin-

Don't Be Confused By Insurance Terms

By being a serviceman, you are granted certain privileges. One of these is government insurance, one of the most important but also the most confusing.

Terms such as G.I. Insurance, NSLI Insurance, Serviceman's Indemnity Act, free and term insurance widely used are frequently not understood.

G.I. Insurance—This is the government insurance made available to servicemen prior to Oct. 8, 1940.

NSLI Insurance—National Service Life Insurance is that coverage made available during the second World War until the Serviceman's Indemnity Act of last year. Both this and G.I. insurance are basically the same, both having possible permanent features (conversion, cash surrender, dividends, refunds, etc.).

Serviceman's Indemnity Act—This Act, passed in April of last year, provided all members of the Armed Forces with a free \$10,000 policy while in the service and 120 days after. Upon discharge, it allows the serviceman a five year, renewable, term policy. This policy a pure risk coverage, has no permanent features.

Those in the service holding either of the two previous types of term coverage (G.I. or NSLI) could waive the total premium.

Those holding permanent plans (either G.I. or NSLI) and still members of the Armed Forces are allowed to waive the pure risk portion but continue to pay premiums receiving either annual cash refunds or government savings.

Those servicemen covered by NSLI or G.I., not waiving the pure risk coverage, will continue to receive dividends if requested.

Persons carrying insurance, either free or term, under the Indemnity Act will receive neither refund or dividend.

Policy holders of NSLI or G.I. may make any one the beneficiary of their policy. Holders of insurance under the Indemnity Act are allowed only members of the immediate family.

Payments on death of the insured also differ. Beneficiaries of NSLI or G.I. may be paid in any method expressed by the insured (lump sum, monthly payments, etc.). With insurance under the Indemnity Act, payments can only be made in monthly amounts, \$9.29 per thousand per month.

engineering, law, education, physics, business administration, geography, history, English, foreign languages, philosophy, agriculture, astronomy, and naturally the medical and dental student.

In leafing through the index, subject heads for the biology major include nearly every facet of the field. Embryology, botany, zoology, genetics, anatomy, endocrinology, bacteriology, and ichthyology merely begin the list.

In the field of chemistry, texts on organic, physical, theoretical, analytical, bio-chemical, electro-chemical, micro-chemical, and, naturally, qualitative and quantitative are available.

Books include philosophy, ethics, abnormal and normal psychology, calculus and trig plus higher mathematics, thermodynamics, aerodynamics and optics for the physics student. The majority of European and eastern language texts for the language student are offered by the library.

In subjects not closely allied with medicine, still a large variety are obtainable for the students and staff: for the engineering student: electrical engineering, electronic engineering, mechanical and metallurgy. For the to-be-lawyer: com-

Air Force Authorities Probe Mystery As Reports of Flying Saucers Pour In

(AFPS)—The Air Force and the press got together recently in the Pentagon to delve more deeply into the baffling mystery of the Flying Saucers.

Maj. Gen. James A. Samford, Chief of the AF Intelligence, led a delegation of top AF authorities ready to answer any questions within the realm of reason.

Professor John Gustad Conducts NSHA Seminar

Prof. J. W. Gustad

Instructors at the Naval School of Hospital Administration are attending a seminar on Educational Measurement. The discussions include planning, test construction, reliability, validity and valuation of tests.

A study of tests and examinations with emphasis upon their construction and uses, types, purposes of testing, elementary statistical concepts and processes used in summarizing and analyzing test results is being conducted by Associate Professor John W. Gustad of the University of Maryland.

Prof. Gustad is the head of the Department of Psychology and Director of Counseling at the University of Maryland. He is a lieutenant commander in the Naval Reserve and had command of a sub-chaser during the late war.

Dr. Gustad received his undergraduate training at Macalister College, St. Paul, Minn. From there he went to the University of Minnesota where he received his masters degree and his doctor of philosophy degree.

commercial law and a set of corpus juris secundum. For the business administration major: accounting, industrial management, industrial time studies, employment management, merchandising, and labor. For the sociology student: books and papers on ethnology.

Education has its technical papers and books with such subjects dealing with the education of children, servicemen, and speech problems. Geography, history and astronomy adherents have a variety of texts, periodicals, and papers available.

The English major will find aid under the headings of writing, composition, and markets for publishing.

The agriculturist and the veterinarian have access to groupings under the headings of dairy, agriculture in various continents, and diseases of animals.

The art student, the machine shop enthusiast, and the cabinet worker even have a choice of books to utilize.

Naturally this is but a few of the many titles accessible to personnel here. No matter where your interest lies it is a safe supposition that material from either of the two libraries—crew's or medical—is available with librarians in both ready and eager to aid in finding material needed or requested.

The evidence was on the board. Since 1947, between 1,000 and 2,000 persons reported that they had seen "objects in the air shaped like a saucer." The Air Force carefully checked each one. About 80 percent of the sightings were easily explained.

The remaining 20 percent provide the mystery. What are they? Where do they come from? Are they visitors from another planet? Secret weapons of the U. S.? Of the U.S.S.R.? Or are they merely manifestations of mass hysteria?

Gen. Samford poured damp water over the theory that they are vehicles, missiles or even material objects.

"These phenomena," he said, "according to the various reported sightings, would have to possess unlimited power and no mass. No material object fits this description."

This, of course, was only an opinion, the General cautiously qualified, but it reflected a well-thought out opinion based on many bits of information.

As for the mysterious blips on the radar screen, AF officials offered some revealing facts. Radar screens, they said, have been known to pick up such incongruous articles as ionized clouds, flocks of ducks, ice formations and other perfectly natural phenomena.

Temperature inversion — when it's warmer in the air than on the ground — also does strange things to the radar screen, they added. As an example, they recounted the case of the night-fighter pilot who "locked" on to what he thought was an unnatural object. He tracked it until he discovered that what he was tracking was, in reality, on the ground. He pulled out just in time.

Top physicists, astronomers and other technical people are working continuously to get at the bottom of the mystery. The AF has in production a camera with a light-refracting lens which it hopes will eventually clear up some of the bewilderment.

As it now stands, the Air Force agrees, no known measuring devices are available to adequately explain the phenomena.

Citing the fact that strange objects in the sky have been seen since biblical times, Gen. Samford acknowledged the necessity of giving them "adequate but not frantic attention."

Thus, the only agreement reached at the conference was not what these mysterious 20 percent unexplainables were, but what they might be.

Hitchhiking Vetoed By PRNC Command

No more thumbing or hitchhiking in the PRNC area. The commandant of this naval district, R. Adm. G. H. Fort, has banned the practice of hitchhiking in the PRNC area and has instructed Armed Services Police to apprehend and place on report any Navy personnel found hitchhiking.

The object of the order is to reduce the number of car accidents due to automobiles stopping to pick up servicemen. Also, the practice of hitchhiking "is unmilitary, and dangerous and not in keeping with the dignity, high standards of conduct and self reliance expected of men in the service."

Exempted from the order are designated pickup stations and central agencies arranging for rides to distant points.

N.P. Graduates Nine Students Aug. 8

NEUROPSYCHIATRIC TECHNICIANS CLASS NO. 10 completed its four months course on Aug. 8, graduating nine students. Thomas Hoey, HN, and James McClellan, HM3, tied for first honors with a 96 average. Eugene Gregory was next with 93. Front row: Ralph Kessler, HM2, instructor; Comdr. Charles Mullin, Head of N.P. education program; Capt. E. L. Caveny, Chief of N.P. service; Capt. B. W. Hogan, CO, NH; Lt. E. T. Dorman, instructor; and Roy E. Hewitt, HMC, MAA of N.P. service. Second row: Edwin Miller, HN; James E. McClellan, HM3; John Van Vleck, HA; and Robert Bieschke, HN. Last row: Keith Banger, HN; Thomas Hoey, HN; Richard Magley, HN; Eugene Gregory, HN; and John Harrington, HM3.

I and E:

Montgomery J.C. Night Classes Open To Naval Personnel

(Editor's Note: This is the first in a series of two articles concerning educational opportunities in the Washington area.)

The old adage that you are never too old to learn is an idea that is taking the country by storm, and as a result adult education is growing by leaps and bounds. So . . . why not jump on the band wagon and join the ranks of grown-up students this fall?

In nearby Takoma Park, just a ten-minute ride by car from this activity, is Montgomery Junior College. This Junior College has a high scholastic rating and its credits are accepted by top grade four year colleges and universities.

Aside from such practical individual courses as typing, shorthand, or mechanical drawing, Montgomery Junior College offers several types of two-year curriculum plans.

A student may, for example, take a two-year course in general education, pre-dental, pre-med, pre-engineering, etc., the same thing as the first two years of a typical college program, or he may combine this general educational training with a specialized vocational program like general business management, engineering aide or medical secretarial training.

Classes are small, and the amount of individual attention per student is high. In most cases, classes offered during the day are repeated in the evening for the benefit of those students who hold full time working positions.

Of interest to personnel quartered on the station is the fact that Montgomery Junior College considers such persons as residents of Maryland when it comes to that all important matter of tuition fees. Thus all hands living on the station may take advantage of the tuition rate of \$6.50 per semester hour.

Registration for the fall term will be held at the college from 1800 to 2100 on Sept. 12 for all prospective night students. Schedules of classes for this fall are available at the Information and Education Office, Bldg. 102.

Naval personnel should also know that this Junior College will recognize successful completion of the high school level General Educational Development Test for admission purposes, and may grant as much as 24 hours advanced credit to students whose scores on the First Year College Level General Educational Development Test are sufficiently high.

Volunteer Frogmen Conclude 'Hell Week'

(AFPS)—"Hell Week" was held recently for 90 officers and enlisted volunteers who hope to qualify as Navy "Frogmen."

The training is part of the initial program set up by Underwater Demolition Unit Two, at the Naval Amphibious Base at Little Creek, Va. to select candidates for 12 weeks of intensive training.

During "hell week," the men engaged in reconnaissance and obstacle-clearing missions as well as harassment of "enemy" beaches, usually in preparation for an amphibious landing.

The volunteers, who range in rank from seaman to lieutenant, spent one day patrolling a course set with live explosives. Another day the trainees carried a seven-man rubber boat over dunes, through swamps, marshes and wooded areas.

The percentage of those who don't survive "hell week" is sometimes as high as forty per cent, but for those who succeed lies a career with one of the Navy's most colorful units.

Naval Hospital Receives Letter of Appreciation

The following letter of appreciation was received by Capt. B. W. Hogan, CO, NH, this month from Mrs. Brockholst Livingston:

"Dear Captain Hogan,
"I would like to thank you for your kind note of condolence and for the magnificent care the people of your command gave my husband.

"Especially we would like to send our thanks to Lt. Jackson who was such a splendid and gentle nurse, to Drs. Bailey, Richards and Coleman who were consistently attentive and helpful throughout what we all knew was a losing battle, and to the youngsters who stood special watch with such faithfulness.

"Of these last, I must commend the young corpsman Roland Richards, who gave my husband a devotion I had not believed possible from a stranger. There were many others who were kind, but I would be grateful if you would pass my best thanks to those I have mentioned.

"Bethesda will always stand for me as distinguished for its humane consideration as for its outstanding efficiency."

/s/ Joan B. Livingston

Lovett's Approval Hastens Combat Pay For Korean Troops

(AFPS)—Secretary of Defense Robert A. Lovett has approved regulations governing payment by the Services of \$45.00 a month combat pay, the Defense Department announces.

Service in Korea does not necessarily entitle an individual to combat pay. Generally, to be entitled to combat pay during a month, servicemen must have been subjected to hostile fire for not less than six days during the month, while in service with a combat unit.

If a serviceman is wounded, captured, killed, or enters a missing-in-action status while serving with a combat unit, he will be entitled to combat pay for a period of three months.

Servicemen who receive incentive or special pay for aviation, submarine, parachute, medical or dental duty during a month are not entitled to combat pay for that month even though they have the required service with a combat unit.

Personnel in Korea will receive the combat pay earned in July with their August pay.

A form for claiming combat pay has been designed for use by veterans or their survivors and will be available through post offices on or after Sept. 15. Veterans should not file claims until the forms are available.

Square Away Your Personal Affairs To Spare Dependents Needless Hardships

(Editor's Note: The following article, first of a series, is designed to aid men and women in their personal affairs so that relatives and dependents are spared unnecessary hardship in time of emergency. The series will deal with financial matters of specific interest to military personnel. Information in the series was condensed from Armed Forces Talk 410 titled "Your Personal Affairs."

(AFPS)—None of us can predict how long we will live. But we do know that the sooner we make careful plans for our financial and legal protection of our dependents and ourselves, the less money and grief it is likely to cost us or our dependents later.

Pretty NH Nurse Guards Second Base

Ltjg. Bertha Walbert

Ask any member of the women's softball team about this year's second baseman, and they'll have nothing but praise for the job done by nurse Bertha Walbert.

Miss Walbert could always be depended on to handle the flies and grounders coming through her territory, and with the help of catcher Boots Carlson, she tagged out many a surprised would-be base stealer.

At NNMC since September 1951, Miss Walbert now works in the O. R. On Aug. 8, she added another half inch stripe to her cap as she was promoted to lieutenant junior grade.

Born in Grier City, Pa., (a town with a population she estimates at 800) Miss Walbert took her nurse's training and obtained her B.S. degree from Wagner College School of Nursing, Staten Island, N.Y. After college she worked in the O.R. at Staten Island Hospital for a few years.

"I always wanted to be a Navy nurse — even before I went into training," she said, going on to explain that her sister was a captain in the Army Nurse Corps during the last war. Her only brother was also in the Army.

On active duty in November 1950, she took her six weeks indoctrination at Portsmouth, Va., and then remained at the hospital there for nine months of duty before coming here.

Although she has always liked softball, she stated that this was her first opportunity to play on an organized team. She's often seen on the local golf course, too, or if not there, she's frequently swimming in the NNMC pool.

Fond of bowling, the pretty nurse says she used to roll them down the alley for scores around 140, and is looking forward to being a member of the team here this fall.

Fernandez

(Continued from Page 1)

Capt. Taylor and Capt. Faubion, commanding officer and executive officer of NDS, the colonel departed at 1300 on the first day of his visit here to keep an appointment with Maj. Gen. Walter D. Love, Chief of the Dental Corps, USA.

Returning to the Naval Dental School on Friday, Col. Fernandez continued his tour of the dental school.

The colonel, who was accompanied by his wife on his Washington visit, expected to remain in Washington one week before departing for Great Lakes.

Navy's New 'Brain' Catches Own Errors

(AFPS)—The Navy now has an electric brain that catches its own errors.

A new multi-million dollar electronic digital computing machine, developed over a period of six years, not only is capable of 3,000 to 5,000 mathematical operations per second, but stops its operation when an error creeps in.

The mechanical brain is called the "Raydac," an abbreviation of Raytheon Digital Automatic Computer. It was developed by the Raytheon Manufacturing Company for the Navy Bureau of Aeronautics.

Ten different types of accuracy checks are made by the "brain." All work is preserved up to the instant an error is flashed on the control board. After the correction is made the machine immediately continues its lightning calculations from the point where it stopped.

Following acceptance tests, the machine will be shipped to the Bureau of Aeronautics Naval Air Missile Test Center at Point Mugu, Calif. There, by radar and other checking devices, the machine will receive information and act as an "intelligence center" to study the flight behavior of the missiles.

It has taken teams of workers from 20 to 30 days to perform mass calculations from a single missile's flight data. The new machine is expected to solve these problems in minutes.

"Simmer down, Moxley, simmer down."

Strong Intra-Mural Program Stressed By Senior Member, Recreation Council

"While we still plan to support varsity teams, the emphasis will be placed on promoting an active intra-mural program at NNMC," said Comdr. Clarence H. Blackstone, DC, USN, newly appointed senior member of the Recreation Council, senior member of the Physical Training and Athletic Board, and senior member of the NNMC golf committee.

Comdr. Blackstone went on to add that members of all the athletic and recreation councils at NNMC display great interest and are willing workers. He was appointed to his new duties on June 10, relieving Capt. F. E. Frates Jr. Before coming here, the commander was chairman of the golf committee at the Marine golf course at Pearl Harbor, and during WWII he was senior member of the recreation council of the Fourth Marine Air Wing in the Pacific.

Comdr. C. H. Blackstone

During 1946-47 and part of 1949 was the captain of the golf team at USNH, San Diego. Entered in Rear Admiral Swanson tournament which is underway here now, Comdr. Blackstone shoots in the high 70's and low 80's.

Born in Superior, Neb., the oral surgeon graduated from high school and attended college and dental school at the University of Nebraska. He served his internship at the University of Iowa. Entering the Navy as lieutenant junior grade in 1941, he received commander stripes in 1945. During the war he was with the 4th Marine Air Wing, serving at Twa, T.H.; Tafuna Air Station, American Samoa; and Funa Futi Station in the Ellice Islands. Prior to coming here, he was chief of the department of oral surgery at Pearl Harbor. Arriving last June he is now Chief of Surgery and Director of Clin-Services for NDS. The doctor is member of the Middle Atlantic Society of Oral Surgeons.

He and his wife, the former Miss Leora Ann Brauer of Nebraska, live with their two sons, Daniel, 8; and Steven, 3½; at 9504 1st drive, Bethesda.

Intramural Softball Begins Round Today

The single round robin in intramural softball begins this afternoon with the series of play coming from teams from nearly all commands and will continue for about two weeks with the champions, as in former rounds, awarded trophies.

Teams entered in the tourney are Pharmacy-Physical Medicine, Dining Room, Center Command, Medical Photography, Doc-NMS, Lab. 19, Cardiology, U, plus two teams from Dental Officers and Naval Dental School.

First Matches End For Swanson Trophy

With the first round over, the championship and other eight flights in the Admiral Swanson Golf Tourney continues next weekend for the final winner and for winners and runners-up in the eight flights.

In the opening rounds on the weekend of the 16th, golfers had two outstanding twosomes: Dr. Stang over Stykes with a one up on the 20th hole and Kinder over Flanery with one up on the 18th.

The total list of winners in the first matches are: Championship Flight: Kinder, Stang, Johnson, and Hill. First Flight: Burger, Blackstone, Samuels, and Sherrill. Second Flight: DiGiacinto, Hoosier, James, and Offield. Third Flight: McMillan, Blair, and O'Keefe.

Fourth Flight: Morse, McGuchin, Bishop and Duckworth. Fifth Flight: Sharp, Bachar, Anderson, and MacRae. Sixth Flight: Hogan, MacGregor, Kurtz, and McClema-than. Seventh Flight: Hall, Klein, Garrett, and Hotvedt. Eighth Flight: Reid, Boonstra, Davis, and Berley.

Winners and runners-up in all flights will receive prizes donated by special services.

Winner of the championship flight will have his name inscribed on the trophy. Golfers other than winners and runners-up will receive golf balls.

It Ain't Duck Soup But Bread Will Do

The origin of Joe and Jezebel remains a mystery, but their whereabouts certainly isn't according to Chuck Farthing, DT2, and Raymond Locke, HM3, of NNMC's golf shop.

Joe and Jezebel are two white ducks who arrived three or four weeks ago and set up residence around the golf shop. They brought a friend with them, but he (or she) came out a close second in an automobile race.

Although the pair is usually well-behaved, spending their time on the practice tee kibitzing the local golfers or taking a lazy swim in the creek, a few times a day they create quite a disturbance.

Joe and Jezebel march up to the golf shop door and set up a raucous chorus of quacking. Chuck and Ray soon put a stop to this. Armed with a few pieces of bread, supplied by Mrs. Emily Luehrs, they have little trouble quieting their noisy boarders and all is peaceful again until Joe and Jezebel decide it's meal time again.

MAISAC Golf Tourney Held Here Next Month

The National Naval Medical Center will be host to the Middle Atlantic Inter-service golf championship tournament to be held during the month of October.

Entries will include teams from the Navy, Marine Corps, Army and Air Force activities in the Washington and Norfolk areas. This will include stations as far north as Bainbridge and as far south as Camp Lejeune, N.C.

NNMC's golf committee will select a seven-man team to represent Bethesda.

Gals Finish Season With One-Point Loss To Wac Opponents

The women's softball team came out on the short end of a close 5-4 score against the Ft. Myer Wac Headquarters team on Aug. 12. This was the last league game of the season, and gave the Bethesda team a record of six wins and five losses for the year.

A look at Louise Miller's score-book shows that Bethesda was out ahead as far as pitching and hitting, but couldn't seem to take advantage of the hits.

McQuarrie was responsible for six strikeouts, allowing only five hits and no walks. The Wac pitcher was credited with only two strikeouts, three walks, and allowed ten hits.

Snatching the lead in the first inning, the Wacs scored one run. In the second Bethesda tied it up. The score stood 1-1 until the fifth when the Wacs scored two. In the bottom of the sixth they sent two more home to lead 5-1.

Bethesda rallied in the seventh. With two outs, and Scott and Allen on base, hits by Carlson, Fowser and Kinn scored Scott, Allen and Carlson to bring the score to an exciting 4-5. Crouch popped out for the last out, leaving Fowser and Kinn to die on base and ending the game.

That was the only out made by Crouch out of four times at the plate that night, as she was responsible for two triples and a single earlier in the evening.

With Walbert on duty, and Cox on leave, second base and shortstop were handled by Allen and Salisbury. The field was covered by Scott, Kinn, and Ulrich, with Bourne substituting for Ulrich in the seventh.

Service Athletes Contribute Largely To Olympic Victory

Helsinki, Finland (AFPS)—The U. S. Olympic Team, paced by athletes representing the Armed Forces, swept to a brilliant finish in the Fifteenth Modern Olympic Games here to capture seven team titles and 40 gold medals.

Members of the Army, Navy and Air Force played an important role in the American sweep. Besides winning the most gold medals (1st place), the U. S. athletes also set the most records and captured the unofficial team championship with 614 points.

U. S. servicemen personally accounted for five gold medals. The first one was gathered by speedy Pvt. Jerome Biffie, USA, who set the pace in the running broad jump.

T/Sgt. Mal Whitfield, USAF, took his third Olympic Gold Medal (two in 1948) when he led a star-studded field in winning the men's 800-meter run. His record time of 1:49.2 also tied the Olympic record he set in the 1948 London games.

The U. S. Naval Academy's rowing crew completed an undefeated season by taking honors in the eight-oared crew with coxswain event. The Middies covered the 2,000-meter course in 6:25.9. It was the Navy's seventh win in the Olympics and their 14th straight this season.

Maj. Sammy Lee, USA, displaying his usual winning Olympic form, won first place in the men's high dive with a total of 156.28 points.

The U. S. Olympic boxing team, which hadn't won a title since 1932, scored five victories in the finals, setting a new record. They were led by Ed Sanders, USN, who won the heavy-weight championship after scoring four straight knockouts.

Net Men Shape Up for Summer Matches

COMPETING FOR THE NNMC TENNIS CROWN, Douglas Powell, HMC (left, serving), and Edward Lary, HA (right, following through on a forehand drive), are entered in the local tournament which was slated to get underway last weekend. Both men, who work in the Linen Room, Bldg. 1, also entered the Washington Federal Employees Tournament which commenced Aug. 17.

Women's Softball

As of August 21:

	W	L	Pct.
WRAMC	10	1	.909
Qtrs. K	9	2	.818
Henderson Hall	8	2	.800
Ft. Myer Waf	7	3	.700
Ft. Myer Wac Hq.	7	4	.633
Bethesda Waves	6	5	.555
Ft. Meade	3	4	.428
Ft. Myer Wac	3	6	.333
Quantico	3	7	.300
Arlington Hall	2	8	.200
Ft. Belvoir	2	8	.200
Bolling AFB	1	9	.100

Net Tourney Underway

Winner of the NNMC championship tennis tournament should be determined by the end of this week. Match play commenced last Saturday, Aug. 23. Championship trophies will be awarded to the victors.

From the entries in the station tournament, a four-man team will be selected to represent NNMC in singles and doubles competition in the Middle Atlantic Inter-service tennis championship tournament.

The MAISAC tourney is scheduled for September and will be held at Ft. Lee, Va.

Some Rocks, Spots, Trout and Flounder Being Caught in Local Chesapeake Bay

In some respects fishing seems to differ here and in other parts of the country. It's odd that spinning equipment doesn't have the play around this section of the country that it does in sections such as the middle west or far west. Very seldom is this equipment seen on inland lakes or streams around the Washington-Maryland-Virginia area.

One reason might be that spinning, rather than being a new method of fishing, is really no more than a different method of delivery. Few people are interested in laying out cash these days for merely a different way to deliver a lure.

Casting fans: A good way to sharpen up your different types of casts on a duty weekend is to use the lawns around NNMC as a practice field.

Take a newspaper and fasten it to the ground with a twig on a cleared area of about 50-75 feet or more. Using a plug with the hooks removed and casting overhand, underhand and sidehand, try to spot your plug. After a few times try three or four different papers making them smaller as you progress.

Rocks, plus trout and spots are in the Bay. The best luck has been reported off Solomons and Sharp Island Light with chumming.

Blues are also reported in the Chesapeake. Flounder, weakfish, and hardheads have also been caught. The flounder are sitting deep and taking only shrimp.

A big one that didn't get away: Hugh Brannen in the Washington Post recently mentioned a fish that was a fish. On a hook and line a 1,061-pound black marlin was caught off the coast of Peru. This is the largest fish ever caught with this tackle.

Chiefs Klein and Hotvedt went to Seneca on Saturday, the 16th, where Hotvedt snagged into a 2-pound bass trolling in the middle of the lake with a spoon.

Marbois of Med School pulled in a pile of catfish in the Bay during the rainstorm on the same day using shrimp and fishing deep.

The new Wizard motors of Special Service must be bringing luck. Few fish seem to have been caught where the motor wasn't the silent partner.

The schedule for the Wizard outboard motors is:

Aug. 25	NNMC-NH	Sept. 1	NH-NSHA
Aug. 26	NMS-NMRI	Sept. 2	NDS-NH
Aug. 27	NH-NSHA	Sept. 3	NMS-NDS
Aug. 28	NDS-NH	Sept. 4	NNMC-NH
Aug. 29	NMS-NDS	Sept. 5	NMS-NMRI
Aug. 30	NNMC-NH	Sept. 6	NH-NSHA
Aug. 31	NMS-NMRI	Sept. 7	NDS-NH

NMRI

by R. Conaway

With so many of the old familiar faces disappearing from the corridors of the Institute, we sometimes think we have wandered into the wrong building. Released to inactive duty this month was Ltjg. E. F. Osserman, MC; Grant Barlow, HM1; and Mabel Eller, HM1. Chief Deal left for duty aboard the USS E. L. Lind, and Al Nicholson, HM1, for I.D. School at Portsmouth.

On board for duty from Pearl Harbor is a former member of the Research Family, J. J. Berzinskas, DTC. Also aboard is Ltjg. R. E. Lee, MC, from Great Lakes; Ltjg. S. L. Clarb, MC, from USNH, Bethesda; and R. K. Guidus, HM3, from NMS, Bethesda.

Shipping over for another six year hitch we have W. R. Furrey, DTC, M. H. Powell, HMC, and L. T. Smith, ET1.

I hate to mention this again, Willie, but we fear the "mustache microbes" will be moving in again.

Phil Eldred's new car has already been christened—by the Virginia state police, we hear.

Don Raw is applying for a job as a hair stylist in a downtown shop. We think he is out to take Chief Ashcraft's clientele away from him.

Red, Hamby and Ruberg have been dubbed the "gullible goofus trio" for the month. If you don't think they deserve the title, just ask them about the "fin" and the "fifth."

The latest vogue in the mascot line seems to be grasshoppers. Who ever heard of a tame grasshopper, Phil?

Our latest endeavor, "Operation Wing-Ding" was considered a huge success. Next time we'll substitute milkshakes for — well, we'll just substitute.

Navy Belles

by George

Our new front room really looks sharp these days with new paint, furniture, TV, and combination radio and phonograph. We see a lot more Waves and their guests enjoying the lounge now.

Spending time over in our annex in 129 this month were Margaret Williams, Minne Smith, Jane Brown, and Peggie Vantrease.

Nadine Calhoun, Lee Green, and Kathryn Barry all received orders for school at Norfolk and will then be assigned to recruiting duty. Good hunting from all of us you leave behind. Also leaving is Lenore Hill who is packing her bags for Norfolk duty after a leave in Kentucky. Some of us are hopefully looking West, aren't we, Louise?

Ruth Quire, HM1, arrived for her second tour at Bethesda—this time as a student in NSHA. The new girl with the different uniform is Valerie Andres, A/3c of the Air Force who is a student in Physical Medicine School.

Boots Carlson is back home in Minnesota on a short vacation and Mary Lou Cox is in Dodge City, Kan., on leave.

Connie Connor, who is always pressed for time, has taken up sewing seriously. The girl in the cast this week is Betty Ward. Salty Salisbury has been getting physio treatments for her thumb which she injured in the last softball game. And did you see the goose egg planted on the head of Leslie Evans from another game?

Dental Explorer

by C. Connor

If per chance you should see Clarice kneeling down and staring down at the deck, don't be alarmed. She's only working on her latest hobby, namely: catching grasshoppers and feeding them do-nuts. . . . "Life gets tedious, don't it?"

Fetting and Sullivan are really going to be sea daddies from here on in. They both received orders to sea—COM WESTERN SEA FRONTIER. I hear tell that they have exhausted the local druggist's supply of "Mothersill's Motion Pills." (They are real good for sea sickness.)

Anna, I'm sure, will never go hungry as long as she can turn on that California charm like she's been doing. Howard Johnson's, I might add, will never profit from her either. For additional information just ask her all about her midnight rendezvous at the local kitchens. . . . she might even blush.

Chief Hughes is back with us once again after a stay in the hospital (welcome home, Chief) and is playing the part of the Sheriff in Bldg. 1. . . . unlike most sheriffs, he doesn't roll his own.

A great big welcome aboard is due the following folks who have recently reported for duty here at NDS: From Bainbridge we have: W. H. McDonald, DN; K. J. O'Brien, DA; W. E. Neutzling, DA; P. J. Mackin, DA; W. D. Fitzgerald, DA; T. W. Cabral, DN; E. L. Zwierski, DA; and B. S. McCullough, DA.

Other newcomers include: J. N. Conrey, DTC, from Puget Sound, Bremerton, Washington; Comdr. W. N. Gallagher from the Naval Dispensary, Washington, D. C.; Comdr. A. Smith from the USS Consolation; C. E. Erickson, DTC, from the Naval Dental Clinic, Gun Factory, Washington, D. C.; Lt. T. J. Pape from the USS Midway; H. A. Peterson, DTC, from USNH, San Diego; and Capt. J. C. Allen, from RecSta, San Diego.

Enjoying leave in Pa. these days is Chief Stinson who was accompanied by his young son just prior to checking out on leave. Chief states that his son's ambition is to be a sailor like his daddy, but seeing him shy away from the WAVES the way he did, I doubt very much that we can recruit him.

Much Travelled Doc Resting in New Job

Paul E. Bennett, HM1

The old proverb "Ambition should be made of stern stuff" has really found a friend in the person of Paul E. Bennett, HM1, who is currently attached to the Center Personnel Office of the National Naval Medical Center.

Paul, the son of Mr. Paul E. Bennett Sr., of Greenwood, S.C., enlisted in the Navy on June 27th, 1947, to begin a career which has been both educational and enterprising and by all indications will continue to be so.

After his formal introduction to Navy life at San Diego, Calif., where he went through boot camp and hospital corps school, Paul was transferred to the U. S. Naval Hospital at Parris Island, S.C. After a tour of duty there Paul received his first look at Hospital Administration and decided that was the field he would enjoy working in.

Thus began the long period of transfers and joining of other Naval Medical Detachments. After Parris Island came the U. S. Naval Hospital at Beaufort, S.C. followed by a tour of sea duty aboard the USS Thomas Jefferson where Paul learned something of the life at sea.

Next on the list of units to which he was assigned was the Tripler Army Hospital, Honolulu where during his spare time he attended the University of Hawaii to study Business Administration. Finally Paul got his orders to report to the National Naval Medical Center.

Upon arriving at NNMCM, Paul was sent to the Navy School of Hospital Administration. He graduated July 9, 1952, and was assigned to the Center Personnel Office to handle records and correspondence.

Paul, who just shipped over for six years last June, now has five years in and is looking forward to the coming years with pleasure. During his off duty time Paul enjoys a swim now and then, but his favorite sports are football and basketball which he played while going to high school in Greenwood.

He is now going to night school at George Washington University keeping up with his Business Administration work. When he finishes there he plans to attend Montgomery Junior College for a more advanced course in Business Administration.

McCandless

(Continued from Page 1)

Section in charge of instruction in leadership, military law, etc.

Soon to be discharged, the captain couldn't help but laugh over how near his plans upon discharge agree with the traditional Navyman's retirement plans—that of having an avocado ranch somewhere in California. The Captain expects to stay, for a while, with his family, at his folks' ranch in the San Fernando Valley.

Eventually Captain McCandless wants to make his home in Long Beach.

Danish Pastry

DANISH-BORN GRETA THYSEN, "Miss Denmark of 1951," and she knows how to translate "cheesecake" as she prepares for a career in Hollywood. The brunette beauty, who comes from Copenhagen, has appeared in 12 European films.

Well-Known Artists Entertain Here

MAKING A BOW, Beatrice Lillie smiles while the audience of staff and patients applauds one of her hilarious recitations. On the right, Reginald Gardiner imitates the mechanical workings of a ship. The internationally famous comedians, currently appearing at the Olney Theater, were on the NNM stage Sept. 4.

Mrs. Rosenberg Praises New Legislation But Advocates an Additional Pay Raise

(AFPS)—Assistant Secretary of Defense Anna M. Rosenberg has declared that the pay increase given military personnel several months ago, while not adequate, was in the right direction and has a good effect on the morale of our uniformed men and women.

Mrs. Rosenberg said that she did not think the recent pay increase of approximately five percent was sufficient since the cost of living had increased more than twice that much since military pay scales were last adjusted in 1949.

She expressed the hope that when Congress reconvened, it would complete the adjustment.

Stresses Reserve Act Value
Mrs. Rosenberg also stressed the importance of the Armed Forces Reserve Act. "Up until the passage of this act," she said, "virtually all reserves, regardless of how long they served or where they served, were equally liable for a recall to other duty. This was unfair and unsound."

"Under this new act members of our Reserve Forces will be divided into two principal categories—the Ready Reserve and the Standby Reserve. The Ready Reserve may be called to duty by the President in an emergency but only in such numbers as are authorized by the Congress."

"The Standby Reserve is, however, less vulnerable to recall, and can only be ordered to duty after a declaration of a national emergency."

"The individual reservist now has an opportunity, through his own efforts and by the extent and nature of his previous service, to decrease his vulnerability to recall in the event of future emergencies." Mrs. Rosenberg also praised the action of Congress in approving the new Veterans' Bill. "It gives our new veterans readjustment benefits comparable with those enjoyed by our World War II veterans," she said.

Series of Lectures Given by Chaplains Start This Morning

With Chaplain Gatlin's lecture on "Responsibilities and Accountability" today, the five-week series of lectures being conducted by the NNM chaplains will get underway.

The lecture series originated in accordance with a directive originating with the Secretary of Defense regarding measures designed to promote the health, morals and spiritual welfare of personnel of the Armed Services.

Subjects to be covered in the series are: (1) Responsibilities and Accountability—Chaplain H. G. Gatlin, (2) Discrimination in Values—Chaplain W. D. Trumbo and Lt. E. C. Wilson, (3) Sense of Personal Worth—Chaplain A. T. McGinnity and Lt. E. C. Wilson, (4) Social Sensitivity—Chaplain D. J. Kosby, and (5) Pre-marital Counseling—Chaplain N. V. Brink.

Each subject will be covered by a 30-minute lecture followed by a 15-minute discussion period.

All enlisted personnel, with the exception of chiefs and first class, are required to attend. Taken by command, personnel will attend in groups of 30 or less.

The Waves will be treated as a separate unit, receiving three lectures from the chaplains and two from Women's Personnel Representative, Miss Wilson.

Many Lieutenants Reverting to JG's

(AFPS)—Within eight months, a "substantial number" of lieutenants will be reverted to lieutenant junior grade. In addition, all promotions within the Navy will be kept to a minimum to comply with the provisions of the "Davis Amendment" to the Defense Appropriation Bill.

Most critically affected in the limitations will be those officers in the grade of lieutenant. Not only will a number of present lieutenants be reduced in rank, but all promotions to this grade will halt in fiscal 1953.

As a result, about 1,500 Navy lieutenants junior grade who were on a planned promotion list will not get the boost in rank, and many who were recently promoted to lieutenant will be reverted to their previous rank.

According to official calculations approximately 5,000 lieutenants are being considered for reversion to lieutenant junior grade. However, reliable sources indicate that many of these might be absorbed while others might come under a new release program still in the planning stages.

The Navy will continue, as far as possible, promotions to grades higher than lieutenant in order to reduce the number of lieutenants who must be cut. But the rider does not affect officers in the grades of lieutenant junior grade and ensign.

The number of officers promoted to commander will be trimmed about 49 percent and their promotions will be delayed about five months. Proportionately, an even greater cut will be made in lieutenant commander promotions.

The Navy said it will try to persuade Congress to remove the Davis Amendment as soon as possible. The rider's restrictions center on the grade of lieutenant largely because most experienced Naval Reserve officers recalled to duty hold that rank. Official information will be promulgated at a later date.

Articles About NNM To Appear in All Hands

Reporters who say they would give their right arm for a good story have nothing on staff writer Harvey Mitchell, JO1, of *All Hands*. He returned to his office minus his right kidney, but with his brief case chock-full of notes on NNM.

As Mitchell was convalescing on ward 6-B after surgery, the editor of *All Hands* assigned him to do a story on the Medical Center to appear in the February issue.

Mitchell unearthed so much material here that *All Hands* decided to run a series of articles on the different commands. The first article, dealing with NMRI, is slated to appear in November.

Eight-pound Girl Comes Aboard To Mark 10,000th Birth at NNM

FIRST CHILD BORN at NNM, Janice Star Headley, pays her respects to little Wanda Victoria Frazier, ten thousandth infant to be delivered here.

On Monday, Aug. 25, 1952, the ten thousandth baby to be delivered at NNM weighed in at eight pounds, four-and-one-half ounces. Named Wanda Victoria Frazier, she is the first child of Thomas E. Frazier, AN, 20, from Anacostia, and his wife Alma, age 19.

Waves Rescue Victim Of Automobile Crash

Traffic accidents became more than just a statistical count heard on the morning news broadcast to two Naval Hospital Waves on Labor Day weekend.

Marcia Scott, HM2, and Betty Ward, HM2, were returning from Philadelphia early Sunday morning.

Coming south from Baltimore on highway 29, they rounded a curve to see a new Dodge had crashed into the embankment, overturned, and thrown the driver onto the pavement.

Moving the injured man off the road, Scott remained with him, giving emergency treatment for shock and head wounds. Ward drove to the nearest telephone and summoned help.

"I didn't know quite what to do," said Scott, "as I remembered that I should keep his head low to treat for shock, but also that the head should be raised because of bleeding head wounds."

She finally decided on a compromise, kept his head level, and covered him with coats until help arrived.

The first baby ever born at NNM was a girl, too. Eight years old on July 15, her name is Janice Star Headley, daughter of retired HC officer Lt. Albert V. Headley of Bethesda. Lt. Headley was formerly in charge of the X-ray Department here.

If the monthly roster of babies continues at its present pace, we can expect the next ten thousand babies to make their appearance in less than four years instead of the eight required for the first ten thousand.

Last year, 2,277 infants greeted the world here: an average of 190 per month. So far this year 1,687 births are recorded: an average of 211 per month. In July alone, a record breaking 230 deliveries were made.

Statistics show that one of every 87 births results in twins. Theoretically then, for 1951, we might have expected 25 sets. Actually there were 21. So far this year, 15 sets of twins are recorded.

As far as triplets are concerned, the hospital is keeping up with the statistical expectations. Triplets may be expected once out of every 7,584 births. This July the first triplets were delivered here.

Quadruplets? Well, they might occur any day, but the chances are very slim since they occur only once out of every 670,000 births.

Prayer of a Wave

Dear Lord, as I kneel down to pray, I have so much to ask:
My prayers are for the strength to serve a nation's mighty task.
I need the grace with which to wear in dignity and pride
My uniform and take with it its meaning in my stride.
Teach me, O Lord, obedience—that I may do my best
Until our country once again is peaceful and at rest.
And having these to guide me while our Navy's in the war,
I have but then to thank You—I cannot ask for more.
Thank You for our country, for our people free and brave,
And me ever worthy, Lord, to be a Navy Wave.

—MARY MONNETT (MARSHALL), SA, USNR (W)

Naval Dental School Notes Anniversary As Dental Corps Completes Forty Years

Presenting diplomas to a group of 24 dental officers graduating from the Naval Dental School course for interns, Capt. Ralph Taylor, Commanding Officer, observed that it was particularly appropriate for the graduation to fall on Aug. 22.

He pointed out that Aug. 22, 1952 is the 40th anniversary date of the passage by Congress, of the Act which authorized the appointment of not more than 30 assistant dental surgeons to be a part of the Medical Department of the United States Navy.

Two Washington, D.C. dentists received the first two appointments in the naval dental service. The first was Dr. Emory Addison Bryant who was given an appointment in the grade of acting assistant dental surgeon on Oct. 23, 1912.

The second appointee was Dr. William Neal Cogan, onetime dean of Georgetown University School of Dentistry, whose appointment was dated Oct. 24, 1912.

These two appointees established the naval dental service which subsequently was officially designated the Naval Dental Corps by a later act of Congress on Aug. 29, 1916.

The need for qualified dentists and proper dental care for Navy and Marine Corps personnel was recognized as early as 1870 by the first Surgeon General of the Navy, William Maxwell Wood. However, Congress did not authorize the appointment of professional dentists in the Navy until Aug. 22, 1912.

The performance of its members during World War I and II, the intervening years, and the Korean conflict is an outstanding and enviable one.

Among its many members who were decorated for extraordinary feats of heroism while serving with the Marines in France in World War I, two received the Nation's highest award—The Medal of Honor.

One is V. Adm. Alexander G. Lyle, DC, USN, Ret., who later became the first Dental Corps officer to be promoted to rear admiral.

The other award was made posthumously to Lt. (jg) Weedon E. Osborne, DC, USN, who was killed in action while serving with the Marines in France. The USS Osborne, a destroyer, was the first Navy ship to be named in honor of a Naval dental officer.

At least 27 Navy dental officers and enlisted dental men, serving with the Marines in Korea, have been decorated. Awards made to dental officers are: Silver Star - 1; Bronze Star - 5; Army Bronze Star - 1; Letter of Commendation with Ribbon and Combat "V" insignia - 8.

Awards made to enlisted dental men are: Navy Cross - 1; Silver Star - 1; Letter of Commendation with Ribbon and Combat "V" insignia - 8.

The Naval Dental School, here at NNMIC, is the center of naval dental education and training. Training for dental officers includes courses both for general post-graduate work, for specialized work in prosthodontics and oral surgery, and for intern study and practice.

Training for enlisted personnel includes specialized courses for technicians in prosthetics and in dental equipment repair.

Each department of the School can point to technical and scientific advances which it has initiated. For example, the Maxillofacial Department pioneered, during World War II, in the development of the acrylic artificial eye for Navy and Marine Corps personnel.

Recent contributions are: a new type mouthpiece for protecting teeth of athletes against injury; the facsimile arm, a device for teaching the technique of inserting a needle into the blood vessels of the arm for the purpose of drawing blood or injecting medicinal or nutrient fluids; a third molar extraction training device, and various plastic anatomical reproductions of the human body for educational and training purposes.

Cdr. Hill Reports in As O.B. & Gyn. Chief

Cdr. Harold H. Hill

Reporting in from USNH, Great Lakes, Cdr. Harold H. Hill, MC, USN, is the new Chief of Obstetrics and Gynecology for Naval Hospital, replacing Capt. L. M. Harris who was transferred to Newport, R.I.

Before college, Dr. Hill served as an enlisted man in the Naval Reserve. Earning his degrees, at the University of Illinois, he conducted a private practice for ten years in Oak Park, Ill.

He entered the Navy as lieutenant commander in 1941, with San Diego as his first duty station. He transferred to the regular Navy in 1945.

During World War II he was with Marine anti-aircraft units and served with the Sixth and First Divisions in the Pacific area. In 1945 and 1946 he was stationed at a Marine hospital in Tientsin, China.

Still a neophyte in golf, he has purchased a new set of clubs, and plans to take advantage of the local course to learn the game.

Cdr. Hill is certified by the American Board of Gynecologists, is a fellow of the American College of Surgeons, and a member of the Central Association of Obstetricians and Gynecologists.

With his wife, Virginia, and his five-year-old daughter Barbara, the new doctor resides in quarters C-1 on the station.

Congregation Beth El of Montgomery County will hold services every Friday night at 8:15 p.m. in the Social Hall of the All Saints Episcopal Church, Chevy Chase Circle. All Service Personnel are invited to attend.

The services of Rabbi Harry Kaufman, representing the Jewish Welfare Board, are available to all Jewish Personnel and Patients at the National Naval Medical Center. Rabbi Kaufman may be reached by calling the Chaplain's Office, Ext. 324, or by call direct—Office: RA. 5371—Home: GE. 0755.

Author of Inspirational Wave Poem Is Presently a Patient on Ward 128

In 1943, a ten-line poem, titled "Prayer of a Wave," (Col. 1) and swept across the country. First appearing in Cosmopolitan, it was used on radio and recruiting programs for Waves throughout the world. Navy chaplains often had it printed, and it was not an uncommon sight to see the inspirational words incorporated into Christmas carols.

Last year at the Wave reunion in Philadelphia it was recited by its author, who is presently a patient here, just prior to the playing of the Navy Hymn.

Writer of the poem is Mary Monnett Marshall, wife of Capt. John B. Marshall Jr., USMC, and she has been a patient on ward 128 for the last year.

Mary was born into a Navy family. Her father enlisted in 1901. Reaching the rank of warrant officer in World War I, he retired as lieutenant junior grade in 1931.

In 1941 he was recalled and placed on recruiting duty in Cleveland, Ohio. Later he was recruiting Waves and Sea Bees in Huntington, W. Va. Using a trailer, Mr. Monnett, with a doctor, a nurse, and a corpsman, took the recruiting office to the people.

Perhaps the fact that Mr. Monnett handled the applications of more than 800 Waves was due in part to the fact that he could produce a picture of himself and both his daughters in uniform. You see, while recruiting in Cleveland, both his daughters enlisted.

His oldest daughter, Helen, was the first Wave to be recruited in that city, and is now a reserve lieutenant on duty at the Security Station, Wash., D.C.

Mary followed suit, and the fol-

lowing January found her taking her training at Cedar Falls, Ia. A former journalism major with music minor at Baldwin Wallace College near Cleveland, it was quite natural that she pitched writing training songs and shows.

While still a seaman apprentice at the Cleveland Supply Corporation in 1943 she penned the Wave prayer. Its popularity and the publication of several of her poems were instrumental in her being one of the first women to break into the public relations field of the Navy.

As she worked her way up to specialist "X" second class, she participated in bond drives, recruiting shows, and from time to time had her own radio program.

She and two other Waves organized what grew into a Wave organization. Dean Martin, still relatively unknown, secured their first book for them.

Mary's Navy career ended in 1945 when she became the wife of Capt. Marshall, marine night fighter pilot, who had just returned from Okinawa.

Mary and Capt. Marshall have two children, Monnett, age five, and John Bryan III who is three. They have their home on Fair drive in Bethesda.

The Chaplain's Corner

Foul Language

by Chaplain Ambrose T. McGinnity

What's the world coming to? It seems as though the young people of today have no sense of morality at all anymore. Some of the filthy rotten talk one hears today is enough to turn one's stomach. Most of them tell you its being broad-minded to listen to dirty jokes and to part in them. Anyone who doesn't do so is known as a "poor sport" and a dull company.

They even tell you that you must take part in these dirty conversations to be sociable. Just how rotten and filthy does one have to get to be sociable?

Every time I hear bad language used by young men, I think of a story a prominent, successful man once told me about how his mother cured him of using "barnyard talk" when he was in his early teens. The man said he didn't approve of his mother's method, but it was effective. When his mother cured him of anything, he stayed cured.

His story is that when he was small, he knew better than to use bad words. He did not hear them at home, nor did he bring them from the street. However, when he was about 14, he swaggered into a house one afternoon, and flung about a couple of vile expressions meant to show his mother that he was all grown up. She'd have to see that was no longer a baby.

His mother reproached him severely. She said that she did not use coarse language and neither was he to do so. Whereupon he immediately informed his mother that, of course, she did not use bad words since she did not know any—it was different with him—he had been around.

His mother wheeled about and let loose a volley of words more brutal than any he had yet heard. While he stood speechless and horrified, he heard such language from the lips of his good mother, she explained to him in her childhood with a drunken father, she had heard all the abusive phrases there were. She said that she detested impurity in speech, much that it made her ill whenever she heard it.

My friend said this little scene shocked him so completely and made such a lasting impression on him that, a boy and man, he had never uttered a foul expression again.

Indecent language is sometimes used by the young in a desire to show off. Well, it shows off all right. It shows off a lack of vocabulary. Aside from the fact that the use of it is an offense against God, it shows slouch thinking on the part of the user. There are thousands of vibrant good words with which to express any idea, however strong, so the use of filthy speech only shows laziness and slovenly thinking.

As we think, so we are. Filthy language and dirty conversation and jokes lead to filthy conduct, and should be shunned as any other evil which one does not wish to become involved.

As for being a poor sport and dull company by not indulging in vulgarity, this is not true. The most popular in the right way do not resort to abusive speech. If the use of obscene expressions is required in certain social groups, then that person who indulges in them is not sociable with the wrong crowd.

Everyone admires the man who can effectively express himself in good and decent language. Why not be admired by all by the display of good language than by trying to be admired by a few with the use of filthy language?

Civ. Personnel Salute Lt. Cdr. Haslam In Letter to the Commanding Officer

The Civil Service employees of the National Naval Medical Center demonstrated their loyalty and admiration for NNMCC's Administrative Officer, Lt. Cdr. F. S. Haslam, MSC, USN, recently in a letter of salute addressed to the commanding officer.

The letter presented in an attractive portfolio, bore the signatures of over one hundred employees including foremen and supervisors representing the component commands of NNMCC.

Many others wished to sign, but space on the portfolio allowed for just that many signatures.

R. Adm. B. Groesbeck Jr., CO, NNMCC, in presenting the letter with an endorsement, stated: "The Commanding Officer desires to add his own appreciation of the executive ability and loyalty to the National Medical Center displayed by Lieutenant Commander Haslam."

The letter follows:

From: Civilian Employees
To: Commanding Officer, National Naval Medical Center

Subject: Lieutenant Commander Floyd Stuart Haslam, Medical Service Corps, U. S. Navy

We, the undersigned, Civilian Employees of the National Naval Medical Center and related activities, desire to salute the present Administrative Officer, Lieutenant Commander Haslam. It is our collective opinion that since the date Lieutenant Commander Haslam came aboard there has been a marked improvement in the morale of the civilian employees under his jurisdiction.

Never in our country's history has the need for economy been as great. Efficient use of available manpower has become a continuing responsibility. High employee morale can contribute to efficiency, not only by tending to increase job tenure, but by encouraging the best effort of each man and woman. It is in this area that the capacities of Lieutenant Commander Haslam have consistently fostered that intangible: high morale.

Lieutenant Commander Haslam has shown unusual interest in the welfare of civilian employees and has attempted in every way possible to offer the optimum in satisfaction. He has continually taken a personal interest in developing internal programs which today are achieving practical results in conserving and utilizing manpower. He has relayed a clear and clear picture of the wishes of the Commanding Officer, in such a way that employees want to fulfill these wishes. He has shown himself to be a leader rather than a driver.

Specifically, his ability and interest in our welfare has been revealed in:

- his exceptional competence and outstanding achievements relative to the establishment of the Staff Clinic;
- his contributions of basic importance to the development of the National Naval Medical Center organizational charts which now serve as definite guides to working operations and their supervision;
- his support in making the Daily Bulletin available to civilian employees;
- his efficiency in relaying correspondence and filing practices to all concerned;
- his keen interest in the Awards Program which has served as an added stimulus to employees to present their beneficial suggestions and to fight to make their organization one of which we can all be proud;
- his advocacy of the new dining hall, which has been a great booster to the employees' wish to "carry on" in a more efficient manner;
- his placement of location signs throughout the command, a great help to new employees;
- his improvements to the employee handbook, an important adjunct to a good personnel program;

And many, many other accomplishments.

He has developed effective relations with our group. He is approachable, a good listener. His own personal honesty, justice, enthusiasm and good will evoke a similar behavior from others. His confidence in others and in their work results in a capacity for getting things accomplished. His goal is for the benefit of the many, not a few. He seems to serve without fanfare and glamour, giving the job his all and letting material reward and better position come as they will. He makes it his business to know his men as far as civilians are concerned; he possesses a lively appreciation of problems he meets. He is impartial. He is loyal. He has exceptional grasp of human relationships and manifests this grasp in his day-to-day contacts.

In summary, realizing that the enormity of the National Naval Medical Center mission demands an administrative officer of great versatility and effective intelligence, we civilian employees wish to express our conviction that Lieutenant Commander Haslam has carried out the functions of his office with a great deal more than satisfactory results.

It is respectfully requested that this be made a permanent part of Lieutenant Commander Haslam's official record.

Civilian Employees

Wife: "I was a fool when I married you."

Husband: "I guess you were, but I was so infatuated at the time that I didn't notice it."

Hubby: "It's strange, but the biggest idiots seem to marry the prettiest women."

Wife: "Fattery will get you nowhere."

Three More Schools In Washington Area Offer Night Classes

Editor's note: This is the second in a series of two articles concerning educational opportunities in the Washington area.

September traditionally finds people thinking about school — adults as well as children. And the personnel at NNMCC are no exception. Actually the Washington Area is full of opportunities for the ambitious serviceman or civilian.

Aside from the extension courses offered at NNMCC by the staff of George Washington University, many other institutions offer night courses. The facilities at Montgomery Junior College were discussed in the last issue. Here are some others:

University of Maryland extension courses at Walter Reed: Courses offered for the fall semester are Educational Psychology (Mon.) Sept. 29; Speech: Staff Reports, Briefings and Visual Aids (Tues.) Sept. 30; History of American Civilization (Wed.) Oct. 1; and Principles of Accounting (Thurs.) Oct. 2.

Graduate School of the U.S. Department of Agriculture, 14th and Independence Avenue, Washington, D. C.: Courses at both graduate and undergraduate levels are available at this institution. Of special interest to personnel at NNMCC are their courses in Office Techniques and Operations, Public

AS POINTED OUT by William E. Royals, HMI of Medical Photography, there is always that ten percent who prefer to be self-educated.

Administration (including personnel administration and hospital administration) and a variety of languages.

Tuition fees range from \$9.00 to \$10.00 per semester hour and registration for the fall semester will be held as follows: Sept. 13 through Sept. 28, Saturday 0900-1600; Monday through Friday, 0900-1830.

George Washington University, G Street between 19th and 20th, Washington, D. C.: This university offers the widest variety of night courses of any of the institutions here listed. Tuition fees are \$13.00 per semester hour.

Registration will be held at the University on Sept. 24, 25, and 26, and the academic year begins Sept. 29.

Catalogs and schedules of classes for all of the above listed institutions are available at the I and E Office, ward 102.

Don't be an Idiot!

(AFPS)—The word idiot is derived from the Classical Greek *idiotes*, which meant, "those citizens who did not take part in public voting." In ancient Greece it was because they could not; in the U.S. today it is because they do not—and the word idiot is still appropriate!

Vaughn Twins Make People Look Twice As They Check in for NSHA School

SAME RATE, SAME BILLET, SAME TIME IN SERVICE, are only a few of the coincidences associated with the Vaughn twins of NSHA. That's Lee on the right (we know 'cause he's taller) and Lew on the left.

A set of twins in the Mat 5 Class at the Naval School of Hospital Administration have caused much comment since their arrival. The Vaughn brothers, Lee M. and Lew H., both chiefs, came here from the Naval Hospital, Yokosuka, Japan.

In Yokosuka, they had adjoining desks in the personnel office. Often times this created a situation where one didn't know whether he was talking to Lee or Lew.

News Shorts from the Editor's Desk

Capt. Stephen J. Ryan, MC, USN, is expected to arrive this month to assume the duties of Chief of the Eye, Ear, and Nose Department. He will replace Capt. Fred Harbert, MC, USN, who was detached on Sept. 3 to report to USNH, Philadelphia. Capt. Ryan was recently stationed at Chelsea, Mass., and is now on TAD orders for a study council.

Capt. Bernard H. Faubion, DC, USN, Executive Officer, NDS, was presented a letter of Commendation Sept. 2 by R. Adm. Groesbeck Jr. The citation was in recognition of his services as head of the Dental Department, USNH, Yokosuka, Japan, in caring for the casualties of the Korean conflict. Signed by V. Adm. R. P. Briscoe, Commander, Naval Forces, Far East, it authorized him to wear the commendation ribbon with metal pendant.

The Navy will lose its top woman officer early next year when Capt. Joy B. Hancock, Director of the WAVES retires. The Navy announced that she will retire under the provisions of the 1948 Women's Armed Services Integration Act calling for retirement at the age of 55.

Cdr. John S. Cowan, MC, USN, gave a lecture on The Naval Medical Research Program to the new student officers at the Naval School of Hospital Administration Aug. 28. Assisting Cdr. Cowan were Lt. F. B. E. Essman, MSC, USN, from the Bureau of Medicine and Surgery, and Lt. I. V. King, MSC, USN, of NMRI.

According to Public Law 567, 82nd Congress, military personnel who have been on active duty 90 days or more may ignore the payment of income tax on profits derived from the sale of their homes, provided such profits are reinvested in another home within four years.

Publication of "Korea, 1950," a 281 page pictorial history of the first six months of the conflict in Korea, has been announced by the Government Printing Office. It is available from the Superintendent of Documents, Government Printing Office, Washington, 25, D.C., (Catalog No. D 1142:K84) at \$1.25 for the paper-bound volume. The book contains 321 photographs with captions, plus several maps.

The Vaughn brothers don't know whether they are identical from a medical standpoint or not, but from observation they certainly appear identical.

Although Lee is a little taller than Lew, they don their hats in like manner, sit, stand, walk, and talk alike. They even raise their coffee with the same hand at the same time. Their resemblance at times seems uncanny.

Of interest to feminine readers is the fact that both Lee and Lew are still eligible bachelors.

The twins first enlisted in the Navy in January 1942 at Oklahoma City, Okla. They received their recruit training and attended Hospital Corps School at San Diego together.

During the late war they served at various hospitals in the U.S. and in the Fleet Hospital, Samar, Philippine Islands.

All throughout their Naval service, Lew and Lee have been together. Their promotions have come at the same time. When queried about this, they said that everyone has been extremely good about keeping them together.

The chiefs arrived in time for the Sept. 2 beginning of a new year for classes of NSHA. Forty officers and 122 enlisted men began training in the various phases of Naval Hospital Administration.

In the officers' section there are five Medical Service Corps officers of the Department of the Air Force and one naval medical officer of the Republic of Korea.

Diaper Derby

Aug. 28—Nancy Gail Brackett, 6 lbs., 10 oz., daughter of Elvern J. Brackett, HA, lab school, NMS.

Aug. 29—Roland "T." Slone, 7 lbs., 4 oz., son of Harold E. Slone, HMC, of NMRI.

Aug. 30—Nancy Maureen Jenkins, 7 lbs., daughter of Jerry V. Jenkins, HM2, of X-ray School, NMS.

Sept. 6—Kathleen Anne Haley, 5 lbs., 12 oz., daughter of John F. Haley, HMC, of NMS.

Sept. 7—Deborah Merrill Bender, 6 lbs., 2½ oz., daughter of Lt. Merrill A. Bender, Radiology Dept., NH.

Civilians Receive Awards for Achievement, Beneficial Suggestions and Length of Service

Certificates, cash awards and emblems were presented to civilian workers of NNMC on Friday, Aug. 22 in the Commanding Officer's board room.

Left: Receiving length of service awards for 30 years of government service, which consisted of a lapel emblem for the men and a pin for the ladies, were Mr. John R. Asten, clerk, Naval Hospital; Mr. David R. Ayer, leading-man gardener, maintenance division; (R. Adm. Groesbeck); Mr. Aaron R. Jones, electrician, maintenance division; and Mr. Frank L. Schweitzer, firefighter, security office. Not pictured are Mr. Oscar C. Kramer, firefighter, security office; Mr. Thomas F. Quinlan, guard, security office; and Mrs. Tempie Taylor, laborer cleaner, maintenance division.

Center: Receiving emblems and pins for 20 years of government service were: Mrs. Margaret M. Garrett, shorthand reporter, Naval Hospital; Mr. Stanley DePue, model

maker wood, Research Institute; (R. Adm. Groesbeck); Mr. Arthur J. Holden, model maker wood, Research Institute; Mr. Charles S. Kerr, firefighter, security office; and Mr. Paul H. Tanner, instructor, Naval Dental School. Not pictured is Mr. Jesse L. Mulligan, letterer and grainer, maintenance division.

Right: Miss Lanahan, Mr. Floyd, Mrs. Annie Cole, executive secretary of the awards committee, R. Adm. B. Groesbeck Jr., CO, NNMC, Mr. Cranford, Mrs. Decatur and Mrs. Wilkinson.

Miss Katherine L. Lanahan, procurement officer, finance division, received a meritorious civilian service award which consists of a certificate of merit and emblem for outstanding performance.

Mr. Frank L. Schweitzer, firefighter, security office, received a longevity step increase which is given to graded

employees who have ten years of Federal service, those which are at top of grade in which they are presently serving.

A cash award of \$50.00 went to Mr. Richard E. F. head sheet metal worker, maintenance division, for his suggestion for double deck open type carts for soup and thermos.

Mr. Niven W. Cranford, carpenter, maintenance division, netted \$50.00 by suggesting the installation of safety on trucks used for transporting workers.

Suggesting the purchase of a baby carriage to transport child patients to and from clinics, won Mrs. Hazel M. inson, ward attendant, Naval Hospital, \$40.00.

Twenty dollars went to Mrs. Oneida R. Decatur, laundryman, maintenance division, for advocating a rail for the steps beside the power plant.

To Err is Human and Often Amusing

Editor's note: These are some of Lt. Esther Schmidt's (see Col. 4 and 5) collection of mistakes made in different hospital corps classes. Many of these quotes from actual test papers and classes were products of her own students at Corpus Christi, San Diego, and Portsmouth.

Definitions

Embolus—that small depression on the stomach which we call the belly button.

Phlebitis—inflammation resulting from a flea bite.

Catheterization—has to do with amputations. The rough ends are catheterized to make them smooth and unprotected.

Sordes—a place where we can eat breakfast in Los Angeles. Also bed sordes.

Diagnosis—is what the doctor thinks is wrong with the patient before he examines him. After the examination, it is called cyanosis.

Edema—flushing out of the rectal system.

Hypotension—resistance to hypo needles.

Cystitis—information of the bladder.

Cystitis—pimples on the intestines.

Lysis—bugs crawling over the body.

Sitz bath—fill a tub with about three or five inches of water, and throw in two tablespoons of Sitz.

Sphygmomanometer—an instrument used for measuring "sphygots."

Completion

Two kinds of sterile instruments on the dressing cart are: scissors and twissors.

To relieve the bladder of residual urine, one should: put a long tube into the bladder, or turn on the faucet.

Two types of drains are: a hopper and a G. I. can.

Temperature may subside by: day or night.

To induce a patient to void: make him think of Niagara Falls.

Failure of the kidney to function is called: secession of urine.

To prevent decubitus ulcers: remove the vermin from the bed after eating.

To prevent decubitus ulcers: switch the patient frequently.

Louis Pasteur is the father of: all microorganisms.

The routes by which medications can be administered are:

Rectually

Rectumly

Subtraveniously

Student's question in class: Does it matter whether you catheterize orally or through the rectum?

Remove teeth pre-operatively. Post op. place them in the mouth

and tie a piece of gauze to them.

Teacher in hypo class: Get rid of that big air bubble in your

syringe.

Student, highly indignant: That's no air bubble; that is just the

space the solution isn't.

Interns Upset Gals In Battle of Sexes On Softball Diamond

In a game full of more laughs than thrills, the NDS Interns whisked past the Women's Softball team 20-3 on Tuesday, Sept. 9. Despite the fact that the male contenders were forced to bat left-handed, the women were unable to halt them.

The first inning saw only three batters for each side. In the second, the Interns squeezed in two runs. In the third, they seemed to get used to batting from the left and opened up for six runs.

McQuarrie stole home on a play to second in the third for the gals' first score. Later, in the sixth, Reed and Crouch scored the other two runs for the feminine nine.

Meanwhile the doctors kept sending the runs home until the game was called at the end of the sixth.

Both teams seemed slightly distracted by their opponents and the audience. Dr. Epstein, on third, had difficulty concentrating on the sport as he and his oversized costume were a constant source of comment from the bleachers.

Everybody seemed to want to get into the act, as a team supposedly of NDS Interns was sporting staff doctor Wolcott on the mound, and Dr. O'Malley behind the plate.

Should the ladies decide to challenge the men again, perhaps they will take the advice of Dr. O'Malley, who quipped, "They should have made us run backwards."

"There's only one thing that keeps you from being a bare-faced liar."

"What's that?"

"Your mustache."

"I think every man should have a hobby, don't you, Sir?"

Instructor for Hospital Corps Training Has Taught Boots, Corpsmen, and Nurses

If the friendly, cheerful nurse teaching in the Hospital Corps Training School seems familiar, don't be surprised; you could have met her at another station.

Lt. Esther L. Schmidt has instructed corpsmen in nearly every phase of training. With duty at Basic Corps School at San Diego, she taught boots beginning their hospital duty.

At Portsmouth, chiefs and first class received advanced training in medical techniques. Corpus Christi personnel met her in a program similar to the hospital training program here at NNMC.

Miss Schmidt, a native of the longhorn state, entered the Navy in 1942 and was initiated into Navy ways at Corpus Christi. Soon after she used her experiences to teach rated and non-rated men and Waves in methods of nursing and ward techniques.

The year 1943 saw the Navy in need of nurses. Miss Schmidt and a few other nurses were chosen to institute a Student Nurse program. This course, six months in length, was originated to acquaint the to-be-nurses with the inner workings of the Naval Nurse Corps.

Miss Schmidt and the other nurses acted as sisters, mothers and housekeepers for the students during the get-acquainted period. Naval methods, traditions, and terminology were taught to the future

Registered Nurses. The worth of their program can be seen in the many nurses attracted to the Navy by this plan.

In June of '45 came duty in Guam. With the Japanese invading the dispensaries and medical facilities set on Guam for the natives were destroyed. Following the island recapture, nurses including Miss Schmidt were sent to retrain men and women in nursing procedures.

Duty at Basic Corps School in San Diego and Advanced (Independent Duty School) Corps School at Portsmouth followed before coming to NNMC.

Miss Schmidt remarked that she was surprised at the extent of duties a corpsman on independent duty must perform.

Playing the piano and cooking are her main interests when off duty but she has another hobby—the collecting of humorous mistakes and errors (see box on left) by students in her classes.

Are Your Personal Affairs in a Mess? Consult Your Legal Assistance Officer

(Editor's Note: The following article, second of a series, is designed to help servicemen and women in their personal affairs so that relatives and dependents will be spared unnecessary hardship in time of emergency. It will deal largely with financial matters of specific interest to military personnel. Information for the series was condensed from Armed Forces Talk 410 titled "Your Personal Affairs.")

(AFPS)—Who can help you with your legal problems?

Many of us in the Armed Forces are not acquainted with a lawyer or are unable to pay for a lawyer's services. Yet we may need the advice of a lawyer to help in putting our personal affairs in order.

To meet this need, legal assistance officers have been appointed in most military organizations. They can help you in many ways, but don't ask them to act as process servers or collection agents.

Cases requiring the assistance of a civilian lawyer are referred by the legal assistance officer—through the appropriate state bar association—to capable legal advisers.

Whether you will be charged for services rendered by a civilian lawyer and the amount of the charges, if any, are matters to be decided by the lawyer and yourself. He is entitled to a fee, but often will charge a member of the Armed Forces a nominal fee or, for simple cases, no fee at all.

Any discussion of your problem with the legal assistance officer will

be treated as confidential and privileged in the legal rather than military sense. Superior officers may not lawfully order the disclosure of such matters.

Besides getting help with your will, you may want to get legal advice about commercial insurance claims; citizenship and naturalization; real estate problems; Federal and state tax matters; and powers of attorney.

Ready to help you here is NNMC's Legal Assistance Officer, Lt. D. H. Baker, room 213, building 1. In any case where you or your dependents are not able to contact a legal adviser, you may address a request for legal advice to the Chief, Legal Assistance Branch, Office of the Judge Advocate General of the Navy, Washington, D. C.

Kinder Wins Championship Flight in Admiral Swanson Golf Tournament

WINNER OF THE CHAMPIONSHIP FLIGHT, Lt. James M. Kinder, (1) and second-place Robert M. Hill, HN, tee off on the first hole for championship match.

Golfers from NNMC drove their way through the R. Adm. C. A. Swanson Tourney taking the winner and runnerup spots in five of the six flights and splitting with golfers from the Pentagon and Model in two other flights.

Lt. James W. Kinder, MSC, an administrative officer, NH, placed first in the championship flight. Runner-up for the match was Robert M. Hill, HN, student in Lab NMS.

Lt. Kinder was one over par for 18 holes before the match ended. Coming to a two handicap, he ended the District of Columbia Amateur golf championship this month.

Mr. Kinder won the club championship on the Navy Marine base in Hawaii in both 1950 and 1951.

Winners and runners-up of the

Match play for the station championship golf tournament, the R. Adm. M. D. Villcutts, began last weekend and will continue until the end of September. The NNMC Intramural Team Play tournament will begin sometime during the early part of October.

Other flights are: First flight: A. Samuels Jr. (Pentagon) and Burger ETC (Pentagon). Second flight: Lt. D. Hosier, MSC, and Lt. P. R. James, of NH. Third flight: E. S. Blair, patient, and Cdr. D. G. Duvig, MC, NH. Fourth flight: Lt. McGurkin, MC, NH, and Lt. L. Bishop, MC, NH.

Fifth flight: Ltjg. R. Sharp, MSC, and Lt. Cdr. C. L. Anderson, MSC, MSTs. Sixth flight: B. W. Hogan, MC, NH, and Kurtz, QMC, patient. Seventh flight: Lt. Cdr. W. H. Garrett, Model, and R. L. Klein, HMC, NS. Eighth flight: Cdr. F. V. Bertram, MC, NH, and W. C. Boonstra, NDS.

Lary Wins Local Tennis Crown

Edward Lary, HA, of Naval Hospital, captured the 1952 NNMC tennis singles crown last Thursday night when he defeated Ltjg. McKenzie, MC, USNR, of NMRI, 6-0, 6-0, 6-0, in the finals match.

Lary advanced to the finals by beating out Chief Reynolds in two sets in the semi-finals. In the quarter-finals he slipped by Chief Reynolds, 6-2, 6-2. His first round match was a bye.

Runner-up of the tourney, Lt. McKenzie, took his semi-final victory forfeit when Dr. Lucas trans-

ferred.

Next Three Months Offer Big Variety Of Sports Activity

The next three months will see a majority of the major and minor sports here at NNMC. At present, local tennis, golf, and softball hold the spotlight but October and November will see touch football (intramural), local golf tournament, the MAISAC Championship Golf Tournament, basketball (intramural and varsity, women's and men's), bowling (varsity and intramural), and women's volleyball.

In tennis the locals are finishing the playoffs for the team for the MAISAC matches. A ladder has been made and challenges for final standings will be finished tomorrow.

This issue will see the second half of the single round robin in the intramural softball league. Three teams are still in the undefeated ranks (see story in column four).

Touch football and basketball hit the field and court after the end of the present softball schedule. At present, the softball season will end on the 13th of October.

NSHA will be the defending champions in the present bowling

In all of these sports NNMC has produced good teams. Good games are to be played. The only thing missing is the occupants of the bleachers. Come out, have some fun, and support your team!

league at NNMC and play will begin on the alleys soon.

NNMC's women, in both volleyball and basketball, will take to the hardwoods sometime this and next month.

Personnel interested in any of these sports are urged to scout for possible players.

Football Once More Drawing the Crowds

Long live the King! In less than two weeks the sports spotlight will alight upon King Football. On Saturday, the 27th of September, nearly every campus across the country will pay homage again to the king of the gridirons and a prince of sports, football.

In Eastern leagues, Navy and Yale (a 7-7 game last year), Army facing S.C., Colgate and Cornell, and Penn visited by the Fighting Irish are a few of the better games.

Marquette vs. Wisconsin, Michigan State trying to repeat its 25-0 trounce of last year over Michigan, Iowa State at Illinois, Utah at Idaho, Wyoming at Montana, and Oklahoma attempting to repeat its 55-14 defeat of Colorado are a few of the better games in the Midwest and the Rocky Mountain region.

Tulane at Georgia, Maryland at Auburn, Geo. Washington at N.C. State, Rice and Texas Tech, Texas A&M versus Oklahoma Aggies and Arkansas visited by Houston are the highlights of the Southern and Southwestern sections.

In the Far West, Northwestern at So. Calif., UCLA at TCU, Washington visited by Minnesota, and California tackled by Missouri easily makes this weekend one of the better openers.

Ten weeks will be given over to this leader in the sports parade, football with most schedules over on the weekend of Nov. 29.

Softball Intramurals All Tied Up With Three Teams Still Undefeated

TEARING INTO FIRST, Lt. John E. O'Malley, DC, USN, catcher for the NDS Officers, is safe on an overthrow to first baseman Harold Ward, HM3 of the O.R. team. O.R.'s pitcher, Bill Beckman, HN, is in the background.

As of last Thursday, three intramural softball teams were still tied for first place with no losses: NNMC, NDS Officers, and NMS.

NNMC took their first win over Cardiology on the opening day of the season, with a 22-0 smear. NNMC scored five runs in the first inning. Home runs by Bennett and Alligood and four runs in the bottom of the sixth piled up a good share of the over 30 hits collected by NNMC.

NMRI and NDS were the next two wins for the Commanches. Research took their first loss at their hands with a score of 16-0 while NDS dropped an all-win record with a 9-0 game. Surprised NDS was only able to pick up five hits off Reynolds, moundman for Center.

NDS Officers secured their first win from Photography with a 22-8 score with McLaughlin and Lyon tossing for the Officers. A combination of good hits and Med. Photo's errors aided in the cleanup.

Operating Room was second in the path of the Dental Officers who cut the O.R. crew out by a 15-2 victory. The NDS Doctors took their third victory from the Doctors by a forfeit.

NMS, the third team in the undefeated position, took the first win from ECG, 7-2, with the heart technicians shut out of the runs column until the top of the seventh.

Research went down 5-0 the following week and NDS followed suit last week as NMS chalked up their third victory.

With an 11-4 win over the Pharmacy and Physical Medicine team, the NDS enlisted team opened up a new intramural attack. Behind the

Intramural Softball Results (As of Sept. 11)

NNMC	4	0	1.000
NDS Officers	3	0	1.000
NMS	3	0	1.000

(Teams on the left are home teams)

by R. Conaway

When Kelly missed the boat at Marshal Hall, he found out it was a pretty expensive ride back to D.C. Wonder if "Miss Brown" is still waiting for her cab?

Dr. Krasno's Lincoln seems to have shrunk since the rock pile he used to park it by has been removed.

They say in spring a young man's fancy, etc., etc., but here it is almost autumn and a certain (—) diver is making with the coy glances at a certain clerk in the Personnel Office.

Chief Ashcraft claims that he has two badges now.

When one sees "pink elephants," it is usually a trick of the imagination; but hearing voices is an entirely different matter as Chief Ruberg will tell you. He heard voices one night and threw a left hook in the direction of the sound only to discover 'twas his radio making with the conversation. Result—one broken radio—one mighty sore fist.

Guess Kidwell will think twice before leaving a ball game to "beat the crowd." He left at the end of the eighth inning in the game between Cleveland and the Nats, only to find out next day the game had run for another eight innings.

That sure is a cute name your gal calls you, Heye. Phil Eldred seems to be suffering from some Mexican disease these days. What was the name of that disease, Phil?

The new darling of the Institute is a four-footed one, name of "Twinkie." Twinkie may be found in various offices on the first deck, patiently following her master, Captain Willmon, as he goes about the day's business.

A welcome aboard to the new members of the staff. Ltjg. W. H. Sewell Jr. from ComTHREE; Lt. W. H. Batchelor from ComONE; R. E. Rasin, SA, and H. L. Ray, SA, from Bainbridge; W. H. Larson, HMC, RecSta, D.C.; R. M. McCabe, DT1, RecSta, San Francisco; and L. M. Jenkins, HM3, from NavMedSch, Bethesda.

On our farewell list we have D. L. Snowden, HM1, transferred to NSHA, Bethesda; H. O. Williamson, HM1, to Indian Head, Md., and Ltjg. E. J. Wallace, released to inactive duty.

O. Hon, HM1, and L. T. Smith, ET1, reenlisted for four and six respectively.

Chief Stone is the newest "cigar passer" in the Institute, with a brand new son to add to his Income Tax Deductions.

Navy Belles

by George

Fall has moved in early with September just starting and cool days and evenings. School will be starting in the very near future. More double bunks moving in—this time downstairs. Josh has tried out both and if she doesn't break her neck first, I think she will settle down.

More girls in from corps school and three more on their way. We give a very warm welcome to Edith Heinen, HA, and Lorraine Cameron, HA, both for hospital command.

After a thrilling plane trip, Kathryn Yuhas says only short trips to Boston from now on. WHY? — What is keeping Josh out these long weekends? Are you improving your cooking?

Bride of the month is Peggie Vantrease (Mrs. Stone). The new Mrs. Stone got married on her leave. Nonnie came back with a friendship ring from Texas.

Table Talk: Ellen, thinking of going overseas. —Salty, telling sea stories. —Norma—No, you didn't get any mail. —Have you seen the picture Boots brought back with her from home? —What is that thing you are knitting, Dorothy, and who is your lovely new teacher?

Lenore Hill went to Norfolk for duty. Elaine Fowser left after tissue bank school. Those last days she had her nose in the notebook or a road map leading West.

Allen does not have an office job these days, but carries a pad and pencil everywhere she goes. Not talking about it, Al?

Wanted: one red scooter to carry a heavy cast—see Minnie Smith, ward 129.

Dental Explorer

by C. Connor

Scuttlebutt has it that Mrs. Gardner has to hold inspection every morning to make sure that Dr. G. wears both shoulder boards and not just one. We should have called Sam Spade in on the case, Doctor.

Clarice is back with us again after a ten day holiday in Tennessee where she really got with it and went without her shoes again. She is now having an indoctrination course in the wearing of shoes.

In case you might have seen what you thought was a flying saucer recently, it was no optical illusion. Actually that was the homer that Capt. Faubion drove in at the recent game between the Staff and PG officers against the Interns. (The Dental School is very apt to lose their exec. officer to the major leagues next season if the word gets around.)

Welcome aboard to H. L. Foster, DT2, who reported for duty still calling, "Mush!" It might help if I told you that he came to us from Kodiak, Alaska. Also new around our house is Ltjg. P. G. Oenbrink, still dreaming of all the civies he so recently packed away in exchange for blues.

The third new member of the family is Cdr. A. L. Vogel who is San Diego's loss and our gain. We sure are glad you "came to our house" as the song goes.

Jarboe is organizing a new campaign: namely "The Sour Hour." It sounds interesting, Mr. J., but I doubt that it will ever be incorporated into our plan of the day. Was a good thought, though.

By the way, have you noticed Johnson lately? He's wearing his Sunday smile every day now and I'm sure he couldn't have a better reason.

Unique Motivation Nets Navy Recruit

Many and varied are the causes which motivate men to join the service, but Lester L. Renner, HM2, of the main lobby information desk, says simply, "I had a fight with my girl, Helen, so I joined the Navy."

That was Nov. 9, 1942 when Lester was 19. His brother Paul, who was 17, was enlisting in Baltimore so Lester went with him, and the two were off for boot camp at Bainbridge.

After destroyer escort school at Norfolk together, the brothers were assigned to Task Force 58—Lester to the USS Pillsbury and Paul to the USS Moore. Since then they became separated and Paul, who is now a BM1, is somewhere in the Korean waters.

Lester's two younger brothers, Morris and Kenneth, followed suit

Lester L. Renner, HM2

and are now both on sea duty.

After serving as a striker in Miami, Fla., Lester advanced to corps school in Portsmouth Va.

The war years saw him participating in the beachhead on Okinawa with the First Marine Division. Later he had dispensary duty in Tientsing and Peiping, China and worked with a sanitation unit in Tangchan, China.

Returning to civilian life in 1948, Renner worked at Camp Dietrich, Md. Two-and-one-half years later he found himself back in blues when the Navy recalled him and stationed him here.

On duty now at the information desk he often finds himself faced with questions a little difficult to answer, like the day someone called from Washington requesting statistics on how many Navy men were eaten by sharks.

This July Lester rented a green grocery in Buckeyetown, Md., which he plans to manage after his discharge next month. At present he commutes each day from Buckeyetown where his wife and four-year-old son Lester James live.

His wife's name? Helen, of course. He married her six months after that little fight in 1942.

"You say that it happened when you about faced during the last inspection?"

Dentalman in NDS X-ray Department Compiles Book on X-ray Procedures

Aren't we prolific? Whenever a text is required for instruction in training by the Hospital or Dental Corps, the first place to look is here at NNMC.

It was realized early this year that the Dental Corps was lacking otherwise than a small outline of dental x-ray, Ogden Munroe was, for his own studies, compiling a notebook of radiographic procedures for dental.

Astronomy & Sharks Featured in Books In Crew's Library

Perhaps with cooler weather, you will feel ambitious to do some serious reading. Crew's Library has new books on many topics, some of them written in such a light and interesting manner as to make you forget you are reading for a purpose.

One example is a new book by H. A. Rey, called *The Stars: A New Way to See Them*, in which the author has drawn the constellations with understandable outlines and given them forms to correspond to their names.

In addition, the text is extremely simple but remarkably clear and there is, for perhaps the first time ever in an astronomy book, a sprinkling of humor.

A closely allied book is Arthur Clarke's *The Exploration of Space*, written to answer a layman's questions about the new science of astronautics. This scientifically accurate, but non-technical treatment of space travel and man's place in the universe tells us what we may expect to find on the planets, what we will do when we get there, about automatic rockets surveying Mars and many other fascinating subjects. It sounds fantastic, but who knows?

Harpoon Venture is Gavin Maxwell's account of his hunt for the basking shark, the second largest existing shark, "as large as a London bus." The ordinary whaling harpoon crumples like a corkscrew when it hits him and three hundred rounds from a machine gun are like pebbles against his hide.

This true story of the four year hunt is set in the Hebrides, is illustrated with actual photographs and is full of the difficulties, thrills and dangers aboard the 30-foot lobster boat.

that the Dental Corps was lacking otherwise than a small outline of dental x-ray, Ogden Munroe was, for his own studies, compiling a notebook of radiographic procedures for dental.

A few of the doctors, asked Munroe to compile his notes so they could be used as a text.

This was six months ago.

At present the book is in the rough draft. Excerpts from Munroe's book entitled "The Elements of Dental Roentgenography" are now under consideration for publication in the Medical Technicians Bulletin.

Munroe, a citizen of the state of Illinois, rather than an Englishman, was a pre-dental in college. His interests, on the track field, rather than journalistic field, classes, were running the high hurdles in the "Little Ninety" Midwest conference.

In high school, in the same sport, Ogden made all-state mention for his 14.7 for 120 yard high hurdles in the state meet in 1949.

The new dental editor is also the holder of one of scoutings big awards — the God and Country

Ogden Munroe, DN

award — given for outstanding work in church and country.

Ogden put his O.N. Munroe on his enlistment papers for the Navy in December of 1950. The usual routine of boot camp and dental school followed. Munroe was then sent to NDS.

Last winter he was one of Capt. Frates' Fighting Five, the Dental Dukes, winners of the 1951-1952 basketball intramurals.

One tried and true method of getting your wife home soon from an out-of-town vacation is to send her a copy of the local paper with one item clipped out.

British Vice Admiral Visits Here

VISITING HERE on Sept. 16, Vice Admiral Cecil C. Hughes-Hallett, Admiral, British Joint Services Mission, Washington, D.C., (left), is shaking hands with Adm. B. Groesbeck Jr., CO, NNMC (right). The British admiral, who works in liaison with the Navy Department, visited the Naval Hospital and Naval Medical School in the morning. He spent the afternoon in the Research Institute.

Medical Center Launches Big Campaign To Participate in Red Feather Drive

With hopes of topping, or at least equalling last years' \$4,915.63 record, the annual Red Feather Campaign was launched at NNMC on Sept. 23. Last year the nearly five thousand dollar contribution came from 1,599 individual donors.

R. Adm. G. H. Fort, Commandant of PRNC, is acting as Chairman of the PRNC drive and has appointed R. Adm. B. Groesbeck Jr., CO, NNMC, as vice-chairman at each PRNC activity. R. Adm. B. Groesbeck Jr., CO, NNMC, was appointed vice-chairman here.

Under his leadership, the executive officers and administrative officers of each command were designated division chairmen and division vice-chairmen. At NSHA, vice-chairman is Lt. Floyd Belap, MSC, USN.

A key man has been appointed to each group of 15 personnel and will make the actual contacts and collect the donations.

As you make your donation, and receive your pledge card, you may designate your contribution to go to any one of the specific charities included in the Community Chest. If you don't wish to channel your donation, it will help to provide the following 16 Red Feather basic services in 1953: adoption services, hospital care, clinic care, care for the aged, care for homeless and neglected children, day care for children of working mothers, care for unmarried mothers.

Also: mental health services, nursing, care in the home, emergency direct relief, marriage counseling, counseling on personal and family problems, health education, rehabilitation of the physically handicapped, recreation services for youth development, and UDFSO services to the Armed Forces.

Four New Buildings Added to Landscape

NNMC is again experiencing growing pains. According to Mr. R. N. Corbin, master mechanic, four new buildings are being added to NNMC's landscape.

One of these buildings, however, already is going to the birds. It seems NMRI needs a coop for pigeons for experimental work, and construction has already begun on the new aviary.

The garage, material and ground forces divisions of NNMC also have new additions. Near the main garage, a rigid steel frame building is being constructed for a new automotive repair unit.

Material soon will have a new warehouse on the extreme north-east side of the base in a 40- by 100-foot one-story building for general storage.

Also located in this no-man's land will be the new building for the ground force's equipment. This two-story construction is 40 by 100 feet.

Donate to the AFPH

Next Sunday, Oct. 5, marks the beginning of the eighth annual observance of "National Employ the Physically Handicapped Week." Overall placements of Handicapped, cumulatively, since 1940 when the program began, are now in excess of 2,400,000.

The American Federation of the Physically Handicapped asks you to contribute generously to help them carry on this work.

October Staff Dance Presents Mr. Music: Harry James & Band

A notable event in the field of popular music will take place here Monday evening, Oct. 13 when Harry James and his Music Makers appear in person in the NNMC auditorium and at the staff and students dance in the gym.

The auditorium show will commence at 1900 and staff and patients may enjoy the familiar band music until 2000. The dance is scheduled for 2030 to 2300.

His local appearance will mark one of the few engagements that James will be playing outside of Hollywood this year. He has recently established permanent residence in Movieville and will confine most of his future activities to the West Coast.

Featured with the band will be one of America's favorite vocalists, Patti O'Connor.

Dress for men will be uniform of the day or appropriate civilian dress with coat and tie. Refreshments will be served as at the former dances.

The nation's number one trumpet player is now enroute here from Hollywood with his musical aggregation after appearing in a number of motion pictures.

Besides waving a stick for America's most popular band, Harry has heaped honors upon himself on records, the radio and in motion pictures. Considered the finest solo artist on trumpet, James also makes many of the band's best arrangements.

Military Surgeons Meet in Washington

Reserve officers of the medical services of the Army, Navy and Air Force will be given complete information on all new directives, including pending Congressional legislation, governing their commissions, active duty requirements and retirement benefits in one of the feature presentations of the 59th annual meeting of the Association of Military Surgeons.

The meeting will be held at the Statler Hotel, Washington, D. C., Nov. 17-19, under the presidency of Major General Harry G. Armstrong, Surgeon General of the Air Force.

Point credits for retirement will be given all eligible reserve officers attending the scientific session.

President Truman has been invited to speak at the traditional banquet of the Association on the evening of Nov. 19.

Gutekunst and DeBerry of NMS Receive Ensign Stripes and Bars

IF THE HAT FITS, wear it—and that's just what Dick Gutekunst did. His helper, Miss Patricia DeBerry had a simpler millinery problem since she only had to change the insignia on her gray hat. Both received commissions this month.

Richard R. Gutekunst, HM1, was sworn in as ensign, MSC, USN, on Saturday, Sept. 20. Six days later, on Sept. 26, Patricia DeBerry, HM1, took her oath for the same rank. Capt. J. L. Enyart, CO, NMS, administered both oaths.

Both Gutekunst and DeBerry were attached to the Naval Medical School. Gutekunst was bacteriology instructor for the lab classes. DeBerry has been a member of the staff in the bacteriology department.

Ens. Gutekunst's new assignment is Naval Unit, Biological Division, Chemical Corps, Camp Detrick, Frederick, Md. Miss DeBerry is now staff at NMRI.

Gutekunst

Gutekunst first enlisted in 1943. After duty on an LCI in Europe and an LST in the Pacific, he emerged an HM1 in 1946.

Returning to his hometown of Allentown, Pa., he earned his B.S. in bacteriology from Philadelphia College of Pharmacy and Science. He was to attend graduation exercises on June 12, 1951 — that is he was, until the Navy beckoned him five days before.

He investigated the chances of receiving a commission then, only to discover that the Navy would require 60 days to type up orders and find a replacement for him. He missed his commission by one day as he had orders to report to duty 59 days later.

His record houses a letter of commendation which tells how he accompanied the Medical School epidemiology team which traveled to Bainbridge last spring to combat an epidemic.

Ens. Gutekunst and his wife have two children, Mary Jane - 4, and

Richard Martin - 20 months, who live in Allentown, Pa.

DeBerry

Miss DeBerry also holds a degree in bacteriology. A native of Humboldt, Tenn., she became interested in the study of microorganisms while attending a lab school in St. Louis, Mo. In 1950 she had earned her degree from the University of Tennessee.

An inactive reservist, Miss DeBerry was recalled in July 1951 and has been busily employed in the bacteriology department on the third deck, isolating organisms which cause infection.

Miss DeBerry has been quite active in the NNMC sports program since last fall when she was a member of the women's basketball team. This spring found her on the diamond with the softball nine, and at present she is learning volleyball.

Unlike many of the team members, participation in sports was relatively new for the Tennessee gal, who pitched in with characteristic determination and learned to play.

Last April, both officer aspirants took 12 hours of extensive bacteriology exams which lasted two days. On Aug. 1, they received letters saying they had been accepted for their commissions.

Transition

The fragrant scent of burning leaves
Imbues the evening air;
A hint of frost is in the breeze
Yet skies are summer fair.

The chirp of crickets in the brush,
The cry of whippoorwill,
The twilight song of hermit thrush
All mingle—then are still.

The distant toll of chapel bell
Announces close of day,
As lowing cattle homeward wend
To mangers rich with hay.

A tranquil peace descends with dusk
And o'er the countryside,
The rose-dyed rays of setting sun
Rest briefly, then subside.

Now velvet sky nods overhead
With frosty stars inlaid,
As Autumn Moon begins her climb
To Summer's throne invade.

—R. CONAWAY, NMRI

BuMed Reveals Impressive Record Set By Hospital Ships Operating off Korea

Navy hospital ships operating in the Korean theater during the period July, 1950 through March, 1952 have cared for over 33,000 United Nations patients the records of the Statistical Division of the Navy's Bureau of Medicine and Surgery indicate. This is approximately 50 admissions per day for the period stated.

The three U. S. Navy hospital ships operating in the Korean theater are: the USS Consolation, which was in active service at the onset of the Korean action; the USS Repose; and the USS Haven.

The latter two ships were reactivated during the third quarter of 1950. In many instances it has been possible for these ships to operate "close-in" to the Korean coast, almost within sight of the battle lines.

This close support afforded by the hospital ships, equipped with landing platforms for helicopters, has made it possible for many of the wounded to be flown direct from the battle zone to the hospital ships in a matter of minutes.

The hospital ships handled a peak load of over 7,800 patients during the three-month period October-December, 1950. During a nine-month period (October, 1950 through June, 1951) the ships admitted an average of nearly 2,400 patients per month.

A peak load of 3,820 U. S. Navy and Marine Corps patients were admitted by the ships during the months of April, May and June, 1951. The peak load of U. S. Army and Air Force patients numbered 4,493 during the months of October, November and December, 1950.

Although no breakdown of personnel of other United Nations forces was made, over 2,000 individuals of miscellaneous categories have been cared for aboard the

hospital ships. These personnel of the miscellaneous categories hit a peak load during the period October, November and December, 1950 when a total of 723 were admitted.

Thus, more so than ever before, the Navy's modern, fully equipped, well staffed, floating hospitals are providing speedy, immediate definitive treatment and specialized care to the wounded personnel of the Armed Forces of the United States as well as other United Nations personnel.

New Catholic Chaplains Assigned to Duty Here

Two new priests have joined the chaplains here at NMMC—Cdr. David J. Kosky, CHC, USNR, and Ltjg. Ambrose T. McGinnity, CHC, USN.

Cdr. Kosky reported here Sept. 14 from the cruiser USS Manchester to relieve Lt. Marron who was detached for duty with MSTs, San Francisco. Father Kosky, whose hometown is Cleveland, Ohio, has seen duty in two other Naval hospitals. During the second World War he served at Corpus Christi and Norman, Okla.

Ltjg. McGinnity, who reported in from Navy No. 103, Argentia, Newfoundland, is a native of Gary, Ind., and was first introduced to the Navy in August, 1949. He served two weeks at NMMC in the Chaplains Training Program in 1950.

Crew's Library:

'Mature Mind' Author Produces New Book

The many readers of The Mature Mind will be eagerly looking forward to reading Overstreet's new book, **The Great Enterprise**. Here he stresses harmonious relationships with our fellow men: an outreach of mind and spirit which should be life's "great enterprise."

Overstreet reviews the meaning of psychological and emotional maturity and shows us that we can never fully develop our personalities to the fullest out of forces found only in ourselves; that we grow only if we grow outward.

A new novel, vast in scope and full of glitter and grandeur of Rome's last days, 15 centuries ago, is **The Sinner of Saint Ambrose**, by Robert Reynolds.

This is the story of Gregory Julian whose official duties brought him face to face with Saint Augustine, Saint Ambrose and the poet Claudian, as well as nobles, courtisans, emperors, soldiers and representatives of every class.

Both pagan philosopher, and Christian bishop, Gregory sampled both power and humility but never lost the savor of living and becomes to us a heroic figure of his age.

Diaper Derby

Sept. 15—Ronald Damian Colbert, 7 lbs., 3 1/2 oz., new son of John A. Colbert, HA, staff, NH.

Sept. 19—Ronald Charles Thomas Jr., 7 lbs., 5 1/4 oz., new son of Ronald Charles Thomas Sr., DT3, NDS student.

Sept. 19—Susan Beery Winefield, 6 lbs., 14 oz., new daughter of Ltjg. Frank Q. Wingfield, MC, USNR, staff, NH.

Sept. 21—James Terry Leggett, 7 lbs., 13 1/2 oz., new son of Luther G. Leggett, HM2, student, Lab 19, NMS.

Sept. 22—Hope Kathleen McGehee, 6 lbs., 11 1/4 oz., new daughter of Thomas L. McGehee, HMI, staff, Patient Record Office, NH.

Sept. 22—Deborah Sue White, 6 lbs., 8 1/2 oz., new daughter of Alva T. White, HMI, student, Pharmacy and Chemistry School, NMS.

Sept. 23—David Preston Richards, 8 lbs., 3 oz., new son of Ltjg. Lynn Stephen Jr., MC, USNR, staff, NH.

Jewish

Congregation Beth El of Montgomery County will hold services every Friday night at 8:15 p.m. in the Social Hall of the All Saints Episcopal Church, Chevy Chase Circle. All Service Personnel are invited to attend.

The services of Rabbi Harry Kaufman, representing the Jewish Welfare Board, are available to all Jewish Personnel and Patients at the National Naval Medical Center. Rabbi Kaufman may be reached by calling the Chaplain's Office, Ext. 324, or by call direct—Office: RA. 5371—Home: GE. 0755.

Admiral Praises Civilian Employees For Contributions to Medical Center

LETTERS AND CONGRATULATIONS go to Mr. John F. Bronson and Mr. Irving L. Oliff from R. Adm. B. Groesbeck Jr., CO, NMMC (story below).

Mr. John F. Bronson, Mr. Irving L. Oliff and Mrs. Estelle M. land have recently received rating step increases for superior accomplishments in their Civil Service positions here.

Mother Clarke Gives Gifts to Patients

With two carts overflowing with gifts, including nine radios, Mrs. Charles Clarke of Thurmont, Md. made another visit to the patients here Sept. 10.

Affectionately called "Mother" Clarke by patients here and at Walter Reed, she is the mother of 24 children, 12 of whom are now living. She has one son in the Navy and one in the Air Force, both in the Korean area.

Her latest campaign, which she conducts "door to door, and store to store," is collecting money for telephone calls home at Christmas.

She donated her 35th pint of blood on July 18. Unable to make another donation until later this fall, she arranged for a gentleman from Baltimore to give blood in her place this month.

Mrs. Clarke first began her blood donations and her work for the wounded servicemen in WWII. By the end of the war, she had donated 11 pints and distributed hundreds of gifts to hospitals.

Pointed Pearls

People who usually seek specks before their eyes usually need specks for their eyes.

Never trust a man who says he's the master of his own house; he may lie about something important.

Lack of appreciation usually sours the milk of human kindness.

The man who gets ahead is usually the one who can tell the difference between the knock of opportunity and that of a bill collector.

The Chaplain's Corner

by Chaplain Newell V. Brink

Many times one hears an individual say, "I know that I have done wrong—very wrong. If God will forgive me and give me another chance I'll agree to make a tithe for the rest of my life. I will become a member of the church and do all I can to right old wrongs."

People often say these things when they are desperately frightened. These are the speeches of terror rather than penitence. You cannot make bargains with God. The love and mercy of God are not for sale. They are free gifts given under certain conditions, but given just the same.

To obtain the forgiveness of God the first step is not to do something to win the attention and favor of God, but to be or to become something. The story of the prodigal son is most germane. When we come to the Heavenly Father, saying, "Father, I have sinned against Thee, my friends, against my own soul, and I am ashamed," we can find the forgiveness of God.

It is a grand thing to tithe as evidence of new feelings toward God. It is also well to engage in a vigorous program of church work. But these must be free gifts rather than the idea of payment of a debt.

God is not some sort of a proprietor seeking to build up vast holdings. He is rather a seeker after the love and loyalty of his children. He knows the difference between the honest seeker and one who merely seeks to buy off God.

God's love is a very dependable thing. You can depend upon it. If you will seek him after wrong doing and face him with an honest desire to do better you will succeed. But salvation and forgiveness can never be bought by bargaining.

Dr. Amberson Describes Research Trip Leading to 'Land of the Midnight Sun'

Cdr. J. M. Amberson, MC, USN, Chief of the Department of Tropics and Arctic Medicine of the Naval Medical School, best personifies the life of naval life, the possibility of travel. The doctor, who has traveled over a large share of the world (India, Europe, Africa, and the South American countries, including Argentina, Brazil, and Venezuela), recently returned from his second journey to the near Arctic Circle.

Dr. Amberson left for the Arctic region last May in his more recent trip as the Task Force Surgeon of Amphibious Group Four, and voyaged within 800 miles of the pole. Plus doing all the major surgery in the force, the NMS doctor did research on the reservoir of disease hosts of that land of the midnight sun.

By trapping, the doctor collected foxes and gave further proof that these canines carry rabies. Seals are caught for pathological study viscera to determine the extent of intestinal worms, thought to be responsible for the high mortality rate of the seal young.

Insects of all descriptions plus their fauna and flora of the region

EBERGS were a frequent sight in Dr. Amberson's trip to the Arctic.

are brought back to NMS for further study.

The doctor also, for the first time, blood-typed the most northern Eskimos. The lack of Type B and RH negatives and the comparatively little difference in the number of Type O's and Type A's is further proof to the assumption that these people might be related to the Mongolians rather than their prime race stocks.

In his four-month trip, Dr. Amberson took motion pictures and numerous slides, both black and white and colored, of the country described as a "sea and land of vel-blue beauty."

"The Arctic would be wonderful," he remarked. "Cool summers with complete sunlight. However, one would wonder, after some time there, what it would be like to return to a dark world."

Commenting on the future of the Arctic, he said, "Though the Arctic has few natural resources for a few people, it has natural scenery that is perhaps greater in beauty and immensity than that found in other countries."

The importance of these trips cannot be evaluated. The information being compiled will be used in a new department being formed at NNM, that of Cold Weather Medicine. Information about the flora and fauna of that land of waste, might someday aid in sustaining or saving a life.

Dr. Amberson, the holder of one of the United States' highest awards, the DSC and the SecNav's Commendation, has left NNM to gain more information on cold weather medicine and will probably be in Alaska as you read this.

"I'm in for ninety years," said the prisoner to his new cell-mate. "How long are you in for?"

"Seventy-five years," said the newcomer.

"You'll be getting out first," was the reply. "Take the bed nearest the door."

"Proud mother, holding infant, is visitor. 'He's eating solids' keys, newspaper, pencils."

SEPTEMBER 29, 1952

Assignment in Japan Nets Unit Citation For NH Staff Nurse

All those who served in the U.S. Naval Hospital at Yokosuka, Japan from Dec. 5, 1950 to Jan. 15, 1951, proudly wear the Navy Unit Commendation ribbon for their service in the treatment and hos-

Lt. Evelyn M. Hanks

pitalization of war casualties and other patients.

Despite the fact that Yokosuka was still in the process of expanding from a 100-bed dispensary to an 800-bed hospital, 4312 casualties were admitted and treated during the 10-day period from 5 to 15 December, 2022 of whom were received during the peak period of 6-7 December.

This overwhelming patient overload was caused almost wholly by the influx of wounded marines who had been trapped in the Chosin Reservoir area.

One of the nurses to meet the grueling demands made on the staff was Lt. Evelyn M. Hanks, NC, USNR, who is now on night duty in pediatrics here. Her regular assignment has been ward 134 since her arrival here last June.

Born in Morse, La., Miss Hanks was a graduate of St. Mary's School of Nursing, Galveston, Tex., before entering the Navy in 1945. After 20 months of duty at USNH, Oakland, Calif., she returned to inactive duty and private nursing at Baton Rouge, La.

Recalled in November, 1950, she was flown to Japan and remained there for 18 months.

The brown-eyed nurse found her foreign tour an excellent opportunity to utilize her Argus C-3 to capture oriental scenery on 35 mm. slides.

Navy Offering Exams To Qualified Men For NROTC Program

(All Hands)—The seventh annual service-wide competition for naval scholarships under the NROTC program is now underway. A maximum of four years of Navy-subsidized education at any one of the 52 NROTC colleges and universities in the country is provided in this program for qualified enlisted men.

The government, under this program, pays tuition, cost of textbooks, laboratory and other instructional expenses. Necessary uniforms are furnished the midshipmen, who will also receive a retainer pay of \$600 yearly.

Eligibility requirements include: Present service in Regular or Reserve (active service) component of Navy or Marine Corps.

Unmarried and never have been married.

More than 17 years of age and less than 21 on July 1, 1953. (Candidates now 21 or slightly older and possessing previous college training, may be allowed to enter under certain provisions.)

High school education or possess an equivalency certificate. (An average standard score of 45 or above on the five GED tests, USAFI, with no score on any test below 35.)

Meet the general physical standards prescribed for midshipmen.

Those who wish to apply for scholarships should see their educational officer (Ward 102) for full details.

Successful candidates will be appointed midshipmen, USNR, and will begin studies with the 1953 fall term. They may take any degree leading to a bachelor's degree or higher, except in the fields of medicine, dentistry, veterinary medicine, theology, pharmacy, music and art. Required studies include naval science, mathematics through trigonometry and college physics.

Vets Put in Priority Categories for VA Hospital Care

Eligible veterans will be admitted hereafter on a basis of nine new priority groups to Veterans Hospitals according to an announcement of the VA on August 25th.

The priorities, based on existing laws, are designed as an equitable rule governing use of vacant beds for all persons eligible for admission or transfer to a VA hospital.

Excluding emergency admission, eligible persons will be admitted in the following order of priority:

Group one—War veterans and those with service since June 27, 1950 (post-Korea) who require hospitalization for service-connected disabilities.

Group two—Peacetime veterans requiring hospitalization for service-connected or line of duty discharge disabilities.

Group three—Veterans whose hospitalization has been requested by authorized officials for observation and examination purposes.

Group four—Wartime, post-Korea and peacetime veterans with service-connected disabilities or with line of duty discharges who are currently hospitalized by VA in non-VA hospitals, but have requested transfer to a VA hospital.

Group five—Wartime, post-Korea and peacetime veterans who are currently hospitalized by VA for treatment of non-service-connected disabilities, but whose transfer from one hospital to another has been requested by authorized officials for medical reasons.

Group six—Wartime, post-Korea and peacetime veterans with compensable service-connected disabilities or discharged for line of duty disabilities requiring hospitalization for non-service-incurred disabilities.

Group seven—Wartime, post-Korea and certain veterans retired from the armed forces for physical disabilities, having no compensable service-connected dis-

Confused About Income Taxes? Here's What You Should Pay

(Editor's Note: The following article, third of a series, is designed to aid servicemen and women in their personal affairs so that relatives and dependents will be spared unnecessary hardship in time of emergency. The series will deal largely with financial matters of specific interest to military personnel. Information for the series was condensed from Armed Forces Talk 410 titled "Your Personal Affairs.") (By Armed Forces Press Service)

What income tax must you pay?

All military pay, with few exceptions, is subject to Federal Income Tax.

The exceptions are disability retirement pay or severance pay based on physical disability. Also not taxable is pay received by an enlisted person and pay not exceeding \$200 per month received by an officer for any month during any part of which the enlisted person or officer served in a combat zone or was hospitalized anywhere as the result of wounds, disease or injury incurred while serving in a combat zone.

Regular retirement pay is taxed. The tax is computed on your income as stated on your withholding statement (TD Form W-2)—plus any additional taxable income from other sources—less allowable deductions and personal exemptions for yourself, spouse and dependents.

Pay, in this case, includes all elements of pay as distinguished from subsistence and quarters allowances.

Many states, too, have income

tax laws. In some, however, service pay is not regarded as taxable income. Personal exemptions, credits for dependents and rates of tax vary in different states.

You should familiarize yourself with your obligations under State and Federal law concerning the filing of tax returns and the payment of taxes.

You should keep records showing the cost and selling price of property sold, and your pay and other income for income tax purposes.

Keep copies of returns and cancelled checks for information purposes.

You'll be doing yourself and your dependents a real favor if you make a list of all the pertinent information in your personal records and chart it in a Personal Affairs Record.

Auto Accidents Lead Cause of Death List For Navy and Marines

(AFPS) — Motor vehicle accidents during 1950 caused more than twice as many deaths of Navy and Marine Corps personnel than did all causes of death combined due to disease.

Drowning was formerly the number one cause of accidental deaths in the Navy and Marine Corps, according to information recently released by the Navy Bureau of Medicine and Surgery. By 1930, motor vehicles had caught up with drowning as the number one cause.

During 1950 there were 406 deaths due to motor vehicle accidents among Navy and Marine Corps personnel. These accidents accounted for 43.7 of all deaths due to accidental injuries during the year.

There were 5,431 new admissions to the sick list due to motor vehicle accidents in 1950, and 88 percent of these admissions involved personnel who were on leave or liberty. More than three-fourths of the personnel were in the 20-29 age groups.

Korean Med. Officer Ltjg. Koo Bok Shin Enrolled at NSHA

A Korean medical officer, Ltjg. Koo Bok Shin, is attending the Naval School of Hospital Administration under invitation of the U.S. Navy Department.

Dr. Shin, who has been in the Republic of Korea Navy for five and one-half years, is the first

Dr. Koo Bok Shin

Korean medical officer to be ordered to the U.S. for training in hospital administration.

At the outbreak of hostilities in Korea, Dr. Shin was serving as the executive officer of the Korean Naval Hospital in Inchon. He was later assigned to duty with the Korean marines for one year, and on July 5, 1951 he was transferred to Pusan, Korea where he was senior medical officer of a small dispensary ship.

In December, 1951, he came to the U.S. with a Korean naval group which picked up four ships—two patrol craft and two landing support ships large—which were transferred to Korea by the U.S.

The U.S. Naval Advisory Group of the Republic of Korea Navy issued invitation orders in March, 1952 for Korean Naval officers, line and staff, to be trained in the U.S. Lt. Shin was selected by the Korean surgeon general for training in hospital administration.

Dr. Shin was born in the North Korean town of Pyong-An-Puk and received his early education there. After graduating from the Medical College in Seoul in 1944, he practiced general surgery at the Shinigoo Provincial General Hospital near the Yalu River. He was commissioned in the Republic of Korea Navy in May 1947.

Hospital and Research Gain New Weapon for Fighting Cancer - - Two Million Volt Generator

The total available supply of radium in the world is about 2,500 grams.

In a concrete building near the loading platform of the commissary, a machine is being assembled which has an X-ray beam intensity greater than that from twice this supply. This machine is a Van de Graaff supervoltage X-ray and cathode ray generator whose radiations are produced at approximately two million volts.

NNMC first gained access to this super voltage accelerator two years ago when a naval ammunition depot, using the instrument to produce high-energy radiation to X-ray mines, explosives et al., suspended operations. R. Adm. C. F. Behrens and Cdr. F. W. Chambers of NMRI requested the machine for cancer therapy and research here, under the joint cognizance of NH and NMRI.

A year and a half ago construction of a suitable building was begun. Extending north from the doctor's office on ward 104, the 2-story structure has concrete walls 24 inches thick at the base and a chamber five feet below ground level to prevent harmful spread of radiation. Observation of the exposure area is by periscope.

Then began the second phase: a complete reconstruction of the machine. At present Woodrow Stewart, HMC, and Kenneth Hall, EFSN, are assembling the generator under the direction of Cdr. J. E. Morgan, MSC, of NMRI. Chief Stewart, previously an instructor in X-ray School and the first isotope technician in the Navy, was chosen for his wide knowledge of X-ray equipment.

Kenneth Hall, a seaman specializing in electronics, reported here

THE NEW GENERATOR, under the joint cognizance of the Naval Hospital and Naval Medical Research Institute, will have an x-ray beam intensity greater than twice the world's available supply of radium. This generator produces radiations at about two million volts. In the upper right, Woodrow Stewart, HMC, and Kenneth Hall, EFSN, check the radiation exit point of the machine while Cdr. J. E. Morgan, MSC, of NMRI looks on.

following his enlistment in the Navy, relieving John Luciani, ET2, in April of last year.

Previously Hall worked for the High Voltage Engineering Corporation, which specializes in super-voltage equipment. While working for H.V.E.C., Ken supervised electrical installation of the atomic injector for the three-billion volt "Cosmotron" generator at the Atomic Energy Commission's Brookhaven National Laboratory

in Long Island.

The Van de Graaff generator, also known as an electrostatic accelerator, accelerates electrons or positive ions by pushing the particles to a high velocity through a series of electrical kicks (each "kick" 35,000 volts) until the particles reach the desired energy.

The operating principles of the electrostatic generator can be simplified as follows: An electric charge is sprayed upon a belt (A),

moving at 5,000 feet per minute and carried to a high-voltage hemispherical terminal (B). The electrons are caught at the top of an evacuated tube (C) and accelerated down the tube by a number of uniformly charged electrodes (D), each with a kick of 35,000 volts.

The particles coming downward are focused by a magnetic field at the grounded end of the tube. To generate X-rays they are allowed to strike a gold target (E). The

X-rays are limited by a lead cones, which weigh approximately 600 pounds, to down treatment area desired.

The electrodes, terminal highly charged parts are enclosed in a tank (F) of dry compressed gases (nitrogen and carbon dioxide) at a pressure of 13 atmospheres. Such pressurizing permits reduced space and is the factor responsible for allowing this voltage equipment in such a small area.

Why two million volts rather than lesser or greater potential? With some other values disseminated damage to the surrounding tissue has been reported in radiation. With under two million the incident skin seems to be unduly. X-rays generated more than two million volts have a tendency to damage skin tissue where they leave the body. It is believed by some authorities that with a 2 m.e.v. beam, more definition and a better defined was found.

Cancer therapy, though an important objective in the machine construction, is not the only purpose of this installation.

NMRI experiments on dose levels of radiation are considered to be vital in this era of probable atomic warfare.

The future of such apparatus is unlimited: X-ray therapy for wider use in cancer, dermatology by simple interchange of cathode rays, and sterilization of foods, drugs, and bone supplies for the tissue bank (also by cathode ray).

Research here might lead to new and different approaches to many problems of medicine, both in curative and preventive fields.

Navy Now Offering Leadership Course

(AFPS)—A new officer course in "Leadership" has been released by the U.S. Naval Correspondence Course Center at the Naval Base, Brooklyn, N.Y.

Available under NavPers number 10903, the five-assignment course presents much scientific background and explanatory material, along with a series of actual situations which require explicit action and the quality of leadership.

Reserve officers may earn 10 retirement and promotion points for completing this course. To apply: Volunteer Reservists should write the Commandant of their home naval districts and ask for application Form NavPers 992.

Organized Reserve members may obtain Form NavPers 992 from their units. Regular Navy personnel make application on Form 992 through official channels.

Chief petty officers may take any officer course without further endorsement. Other petty officers must have the endorsement of their commanding officers to the effect that they are considered potential officer material.

Tower Top Relays Tale

Now we're a TV antenna.

During the National Celebrities Open Golf Tournament, held in Washington and surrounding areas, WTOP-TV utilized the NNMC tower as a relay point to televise the matches.

On the top of the tower, parabolic antennae were placed to catch signals from the nearby courses and relayed to the station for transmission.

The equipment, placed in position Thursday, Sept. 18, was used for the tournament the following weekend.

Surgeon General Praises Medical Corps For Emergency Care Rendered in Korea

R. Adm. Lamont Pugh, Surgeon General of the Navy, returned to Washington on Sept. 12, 1952 after an extended world-wide tour of Naval medical and dental facilities. While in Korea inspecting Navy medical and dental components serving with the First Marine Division, Admiral Pugh spent three days at "Bunker Hill" where he had an opportunity to observe front line medicine and fire.

In speaking of the medical care and treatment being afforded to the marines, he said, "Although the doctors out there were young in years, the surgical feats they are performing in the field of traumatic surgery would be applauded by older surgeons."

He attributes the new record-low two per cent mortality rate of those men wounded in action to the bullet resistant jacket and to skillful front line surgery in combination with the availability of whole blood and the utilization of helicopters for evacuating casualties direct to hospital ships and rear area hospitals.

But second in importance to no other single factor, the Surgeon General was convinced, has been the magnificently efficient manner in which the hospital corpsmen of the Navy are fulfilling their mission with the fighting marines.

Never, in the opinion of the Admiral, has so complete and excellent dental coverage been made available to forces in the field as is presently being afforded by a completely equipped dental laboratory within a short distance of our front lines.

Admiral Pugh also said, "I will recommend that the Navy type

"armored vest," now standard in the Marine Corps, be modified to provide additional cover for the lower pelvic region."

It was found that when the wearer bent forward the lumbar area was left unprotected. Modifications to a limited number of the present supply of vests in Korea are being made there by a Marine service unit.

"Maybe you didn't isolate the cold germ, but I'll bet the Defense Department can find a use for that odor."

News Shorts from the Editor's Desk

Lt. C. E. Smith, MSC, has relieved Lt. D. B. Scheurer, MSC, as the Personnel Officer of the Naval Hospital. Lt. Smith was formerly stationed at San Diego.

Dr. Wilbur C. Davison, Dean, School of Medicine, Duke University, opened the new series of NMS' guest lectures with an address on "Changes in Medical Education and Care." A social hour with refreshments followed the talk.

John M. Ostrowski, HN, a patient on ward 3-C, received the Purple Heart on Sept. 17 for wounds received in Korea while serving with the First Marine Division. In presenting the award, R. Adm. Groesbeck remarked that although he had presented numerous awards before, this marked the first time he presented the Purple Heart to a corpsman here.

A special discount is offered to military personnel who wish to swim in the Ambassador Hotel swimming pool, 14th and K Streets, N.W. The pool is open from 1000 until 2200 daily, including Sundays and holidays. The pool is equipped with underwater lighting and aluminum diving board.

Mixed emotions—the feeling you get when you see your mother-in-law driving your new car over a cliff.

Local DC Officers Aid ADA Convention

Clinics and demonstrations by local Naval dental officers contributed to the success of the American Dental Association convention held in St. Louis, Mo. from Sept. 8 to 11.

Cdr. Max L. Parker and Cdr. David P. Dobson, appearing on a closed television circuit, discussed "Partial Dentures: Mouth Preparation and Case Design" on the second day of the meeting.

Cdr. Paul A. Moore gave a table clinic on the same morning, explaining the training potentialities of the Navy's facsimile arm.

On Thursday afternoon, Sept. 11, Lt. Cdr. Judge C. Chapman held a table clinic on "Fall Dentures in Function."

Lt. James A. Mitchell was in charge of the U. S. Naval Corps exhibit portraying the role of dentistry in the event of atomic disaster. The exhibit drew many favorable comments, and received an honorable mention in the exhibit competitions.

NMS Resumes Classes In Basic Naval Medicine

On September 15th, the Naval Medical School resumed its Basic Course in Naval Medicine. This course, nine months in length, has as its aim acquainting the officers with the various facets of naval medicine.

Not only will the medical officer learn his duties in the classroom, but by actual experience aboard ships in the active fleet, through duty with marines in the field and by visits to and instruction at aviation, submarine, and amphibious bases he will fully appreciate the scope of the duties and responsibilities of a medical officer of the Navy.

In this year's course 23 officers are enrolled, coming from installations all over the world.

SEPTEMBER 29, 1952

A collage of four black and white photographs. The central, largest photograph shows four men walking towards the camera. From left to right: a man in a white short-sleeved shirt and light-colored trousers; a man in a dark short-sleeved shirt and light-colored trousers using a cane; a man in a military uniform with a peaked cap; and a man in a white short-sleeved shirt and dark trousers. Two other men are visible in the background. To the left, a smaller photograph shows a man in a white shirt and light trousers walking away from the camera. To the right, another smaller photograph shows a man in a light-colored shirt and trousers walking away from the camera. The bottom-most photograph is a very small, dark strip.

clinic, held on practice fairway and No. 3 green, was attended by more than 300 people of NNCM. Left to right: Julius Boros shows the crowd the Boros Style that put him in top slot in the recent Tam O'Shanter classic while Harvey O'Brien announces the shots. Talking to Admiral Groesbeck are Boros, Tommy Bolt of Durham, N.C., and Harvey O'Brien. On the right, Jim Nichols shows the crowd the techniques that have made him a golf favorite.

TEMBER 29, 1952

Navy Belles

by Norma Schrader

Your "gal from the heart of Maryland" is just back from a well-deserved and long overdue leave. All hands here in 123A missed her and were glad to see her back on her old stamping ground.

Minnie's ad in the last issue (conveyance for her cast) had such overwhelming and successful results that she packed up and went off on 14 days leave without even telling us. How's the "little red wagon" doing?

Seems as though our girls just can't stay off the sick list. Must be something that draws them to ward 129. Peggie Wilkie and Margrette Williams came back and Ruth Worlein, Barbara (night duty) Hall and Gerry Godfrey took their places. (Aside to Gerry: Joanie and I think you did it just to avoid your turn at field day.) Don't stay too long, girls; someone else may want the beds.

"Mike" Bullard and Fred Bell went and "done it." Chaplain Brink tied the knot in the chapel on the 20th.

Arrivals and departures: Barbara Bradford, Ivalee Hall and Elizabeth Hardee aboard from Bainbridge to join Hospital Command. "Cathy" Bassham back with us from St. Albans—she'll be seeing you at NNM's staff clinic.

Watch out COMELEVEN—"Clown" Fowser, our first baseman, is on her way to San Diego for duty.

Our volleyball team looks good—shaping up well under the able guidance of "Tony" Walker (NNMC NEWS). Looking for a coach now for our basketball team. Anyone interested? We've got good material!

Mary Lou Cox, when asked if she were singing in the base choir, answered, "No, I sing alto." Where was your mind, Mary Lou? Tch! Tch!

Dental Explorer

by C. Connor

Back home again from the annual meeting of the ADA in St. Louis are Capt. Taylor, Cdr. Moore, Cdr. Dobson, Cdr. Parker, Lt. Cdr. Chapman, and Lt. Mitchell, who represented the Naval Dental School there.

Latest members of our family to salute the bridge are: Ens. S. C. Peckham Jr., who came to us from Camp Detrick, Md., and R. C. Eckholm, DN, from Bainbridge, Md.

Dr. Dobson came back from the meeting with a new nickname—he is now known as "Boom-Boom" Dobson. All we lack now is a demonstration.

Another familiar face is missing from our midst. Dr. Moore (H. B. Moore, that is) left us to go downtown. We never did find out why they called him one and six though.

Also saying adieu last month was Chief J. Stinson, who was a familiar landmark here at the School. He weighed anchor and sailed off to Newport, R.I. By the way, the Stinsons were blessed with a baby girl while Chief was on leave. Now that his family numbers three, Chief will perhaps start posting cleaning details and having them fall out for quarters. I'm sure old "Stinson" will be missed by all of us.

Wedding bells chimed out on Sept. 27 when Wheeler (from the storeroom) exchanged the age-old marriage vows with a gal from West Virginia.

In the Stork Department, Dental is batting 1,000. Yep, Thomas is now a proud pop. A bouncing baby boy was the latest addition to the Thomas family, born Sept. 19. Happy two o'clock feedings, Tom. Incidentally, baby and father are doing fine.

NMRI

by R. Conaway

What's this we hear about Hamby running into a "parked cow," or was it the other way around? Didn't know they had roads running through pastures!

One gets the strangest answer when you ask Heye "how he is doing these days."

Chief Ashcraft's fishing trip was apparently a huge success. He was so busy hauling in the big ones that he didn't even have time for a "Bud."

A certain person was mighty interested when "Curley" was due back from leave.

Speaking of leave and such—our ranks are being depleted at an alarming rate. Both Lt. C. Savage and Lt. D. Spence have moved across the compound for duty at USNH, NNM; Bill Sheppard, SN, left for duty at NAS, Anacostia; and Lt. H. D. Baldridge and Bill Jaffe, HM2, were released to inactive duty.

On the incoming side of the ledger, we have Lt. Cdr. E. B. Cook from Army Medical Research Lab, Fort Knox, and J. T. Boggs, HN, from USNH, Annapolis.

Now on to the scuttlebutt department! We hear that: (a) A certain chief has doilies with his name embroidered on them. Did you do it yourself, Chief? (b) S. A. Morrison has had a change of nickname from yourself, Chief? (c) Red Davenport finally found someone to go to Baltimore with him, and (d) Phil Eldred's new hobby is riding the elevators.

Nuff sed?

W. Gardner of NSHA Ships Regular Navy

For the first time this year, a member of the Naval Reserve transferred to the regular Navy at the Naval School of Hospital Administration. On Jan. 29, 1952, Walter J. Gardner Jr. successfully passed the general service examination for advancement to chief hospital corpsman, which qualified him for enlistment in the regular Navy.

Gardner was discharged from the U.S. Naval Reserve on Aug. 28, 1952 and immediately reenlisted as a hospital corpsman first class in the regular Navy for a period of six years.

Gardner, who is attending the fifth class in Medical Administrative Technique, volunteered to return to active duty shortly after

Walter J. Gardner, HMC

the outbreak of the Korean hostilities in 1950. His father, an Army officer, persuaded Walter to enlist in the Navy in 1941.

Gardner was born in Lincoln, Neb., on April 22, 1924, and received his junior high and high school education at Shattuck Military Academy, Faribault, Minn.

He has had five years of college and holds an A.B. degree in business administration from the University of Nebraska. He has also had one year of study in law.

During the late war Gardner served on board the USS Hammondsport. The USS Alnitah, at the Naval Supply Depot, Oakland, Calif., the Naval Hospital, Mare Island, Calif., and at Base Hospital No. 7, Tulagi.

He attended Submarine School for Pharmacist Mates at New London, Conn., and the Independent Duty School at Portsmouth, Va.

Gardner came here from the Flag Allowance, Commander, Naval Forces, Far East.

Large Part of Premium Returned to Veterans

(AFPS)—Veterans of WWII who bought National Service Life Insurance received protection at bargain prices, the Veterans Administration announces.

The VA says that 67 cents have been paid out in dividends for every dollar collected in NSLI premiums.

Millions of policy holders, in effect, paid only 12 to 24 cents a month for every \$1,000 worth of insurance purchased. This rate applied only to younger men who bought the cheapest term insurance. Officials add that older veterans or those who took out more expensive policies, did not fare quite so well.

However, those with higher priced permanent policies get extra values for their money—such as loan and cash surrender rights.

The dividends resulted primarily because fewer WWII veterans died than experience indicated. Thus, a big surplus developed. This has enabled the VA to declare three dividends totaling \$3,685,000,000. Up to May 30, policy holders had paid in only \$5,521,000,000.

'Jackson' Reynolds Hits the Road

ON HIS WAY HOME this week is Chief John M. Reynolds who will be discharged Thursday. This caricature was penned by medical illustrator Melvin Hadden, HMC, and presented to Reynolds in the CPO Club where a farewell party was held for the popular chief.

Utescher to Return To Pharmacy Books After Present Hitch

The German people are labeled as a race of determination and steadfastness. A native of the Keystone State, working in the Patients' Record Office on the Survey Desk, Donald Utescher, HN, shows to an advantage these traits in his persistence to gain his one ambition—teaching pharmacology.

Don first became aware of this field working in a local drug store in his hometown, Oakmont, Pa. A friendly pharmacist, in his spare

Donald Utescher, HN

time, taught Don some of the techniques and history of the drugs.

Don soon found that the background and study proved more fascinating than the retailing of the pharmaceuticals and decided to make this his vocation.

The University of Pitt followed high school. However, Don's plans received a temporary setback in his sophomore year. Don joined the reserve program in 1949 and now Uncle Sam needed trained men. He received a summons from the court of no appeal, Uncle Sam, and in August of 1951 reported for active service.

Naturally the usual followed, boot camp and corps school.

During the early part of his introduction to "Navy ways" he filed a request for Naval ROTC and was accepted. Interested only in drugs, Don rejected the four-year scholarship when he learned that a course in pharmacy was not permitted under the program, and returned to counting the days until discharge.

While in high school, this Patients' Record Office corpsman participated in a sport little known in this country except through such men as Jim Thorpe and Bob Mathias—the decathlon. In this sport of sports, Don reached the coveted top, the 300 mark, a number of

Traffic Violations Nothing but Routine For 'Bucky' Harris

Most of us don't like to see about those little pink slips that come on windshields that say "Bucky" Harris, HM3, it's all part of his job.

That is it was part of his job at the NNM security office where he worked for the last year. This month he is working as night mater-at-arms in barracks 112.

Besides putting pink reminders on vehicles, he was kept busy wrestling with watch bills and inventory and inspection lists for Center Command.

Bucky became interested in personnel work while he was stationed on Guam from October 1948 to March 1951, which he recalls as his most interesting duty station. There he spent his duty nights in the emergency treatment room where he says he never knew what to expect next.

Born in Macon, N.C., Bucky and his family moved to Richmond, Va., where he attended John Marshall High School. In the middle of his senior year he withdrew to enlist in the Navy. Last January he shipped over for another six.

Preferring football and softball he was a member of the Center Commanders who took first honors in the intramural touch football here last year. Substituting in right field now for the Center softball team, he says he plans to turn out for football again this fall.

Irvin Harris, HM3

times and captured his letter in high school.

While learning the procedures of ward duty at Bainbridge, the music teacher was an alto sax member of an eight-piece band, placed for enlisted and officer parties.

Here at NNM, Don is continuing with his musical education at the local musical art center.

Following his discharge? Naturally, he will use the new education benefits, and continue in pharmacy.

Capt. Hays Relieves Capt. McMillan as Executive Officer, Naval Hospital

Capt. Thomas G. Hays, USN, assumed the duties of Executive Officer of the Naval Hospital last Saturday, Oct. 11. The position was formerly held by Capt. C. H. McMillan, MC, USN, who transferred Sept. 29 to become Commanding Officer, USNH, Annapolis.

Capt. Hays reported in Sept. 19, and was sent on TAD orders to the Army Medical Center for three weeks. There he attended an Inter-

Capt. Thomas G. Hays

gency Institute which consisted of lectures and panel discussions conducted by military and civilian personnel recognized in the fields of hospitals or business administra-

The new Executive Officer came from San Diego where he was Chief of Surgery. He remarked he was glad to see so many old-time friends here on the staff, and that he had served as Chief of Surgery at USNH, Philadelphia, and that Capt. Hogan was Executive Officer there.

The captain was born in Oakdale, Ill., on Aug. 5, 1903. He attended the University of Illinois in Urbana for three years and received his degree from the School of Medicine at that university in Chicago.

Commissioned as lieutenant, junior grade June 28, 1928, he was advanced by subsequent promotions to the rank of captain, to date from Oct. 20, 1943.

This is his third tour of duty at the Naval Hospital. He served here six months in 1942 and seven months in 1944. He was Executive Officer and Chief of Surgery at USNH, Annapolis in 1945. During WWII, he served aboard the USS New Jersey, which joined the Pacific Fleet early in 1944. He was aboard the New Jersey when it became a unit of Task Force 58, the fleet flagship of the Fifth Fleet, and participated in the campaigns of the Marshalls, Truk, and New Guinea.

Capt. Hays was certified by the American Board of Surgery in 1948. He is a member of the American Medical Association, the American College of Surgeons, and the Phi Kappa Phi Fraternity. In his spare time, he is fond of golf and especially "wing shooting." Taking up the net sport seven years ago, he is often found on the tennis courts.

Crowd Anticipated For Dance Tonight

A record turnout is expected at tonight's enlisted staff and student dance in the NNMCM gymnasium as America's number one trumpet player, Harry James, brings his Music Makers and vocalist Patti O'Connor to NNMCM.

The auditorium show will commence at 1900 and staff and patients may enjoy the familiar band music for a full hour. The enlisted dance will start at 2030 and last until 2300.

Patients who are confined to the wards, may also enjoy the musical aggregation which will be broadcast on channel C of the hospital radios.

Dress for the dance calls for uniform of the day or appropriate civilian dress (coat and tie for the men). Refreshments will be served.

Harry James

MAISAC Golf Meet To Start Tomorrow

The Middle Atlantic Inter-Service Golf Championship Tournament will be held on the NNMCM golf course starting tomorrow, Oct. 14, and continuing through Friday.

The tournament will be 54 holes medal play to decide team and individual championships. As of last week, 71 entries, officer and enlisted, had been received.

Teams from Marine Barracks, Camp Lejeune, N.C.; NNMCM; Ft. Belvoir, Va.; Marine Corps School, Quantico, Va.; Naval Receiving Station, Wash., D.C.; Naval Air Station, Anacostia, D.C.; Naval Air Station, Patuxent; Ft. Lee, Va.; Ft. Monroe, Va.; Camp Pickett, Va.; Ft. McNair, Va.; and Bolling AFB, D.C. will participate.

Holiday Toy Store To Open Saturday Featuring St. Nick

Santa Claus is coming to NNMCM early this year. In fact he will be here this coming Saturday, Oct. 18 in time for the 0900 opening of the toy store being set up in the far half of the Navy Exchange dining area on the first deck.

"Bring the kids," says Navy Exchange Officer, Lt. Metcalf, who promises that Santa will be on hand with free colored balloons and candy for all good boys and girls.

Open from 0830 to 1700 Monday through Saturday, the toy store will offer a large selection of toys for children of all ages. Included will be a complete line of the well-known Lionel trains, complete with all railroad accessories.

Tricycles, bicycles, dolls, mechanical and plastic toys, and paint sets will be a few of the items to choose from. Christmas tree decorations and lights are also being stocked.

Christmas cards and holiday wrapping paper will be available in the main store in the basement.

Fashions and Fun On Stage Thursday

Jelleff's Fashion Show and Entertainment, sponsored by the Scottish Rite, Mithras Lodge of Perfection, of Washington, will be on the NNMCM stage this Thursday night at 1900.

With Jack Rowzie of WWDC as emcee and Meyer Goldman and his seven piece band, the entertainment will include: Miss Barbara Roane, dancer; Ralph H. Gauker, grand organist of the House of the Temple, who will give a piano recital; and Carlin Ritchey and Paul Lawson, singers, who will be accompanied by Katin Kinsey.

There will be sandwiches, cokes and cigarettes served to all in the lobby of the auditorium after the show. No movie will be shown that night.

BEAUTIFUL YOUNG DANCER, Miss Barbara Roane will appear with Thursday's show.

Ex-Sec. of State Cordell Hull Celebrates 81st Birthday Here

CUTTING THE CAKE for her husband's 81st birthday is Mrs. Cordell Hull. On hand to congratulate the famous statesman are (l. to r.) Capt. E. F. Evans, Chief of Medicine; R. Adm. B. Groesbeck Jr., CO, NNMCM; Capt. B. W. Hogan, CO, NH, and Lt. Adelyn Yankoski, Tower 16 nurse.

On Oct. 2, the lady at the information desk in the main lobby remarked that she was well aware that it was former Secretary of State Cordell Hull's birthday when the flow of telegrams and flowers started in the early hours of the day.

They continued to pour in from across the Nation—from the President, the Secretary of State, ambassadors and numerous other friends and from relatives.

Meanwhile, on tower 16, the famous statesman met photographers, newsmen, TV cameramen, and the stream of people who came to congratulate him.

Shortly before noon he was presented with a beautiful birthday cake prepared by the Food Services Division of the Naval Hospital.

The one-time Tennessee lawyer served in the House of Representatives for 26 years, and resigned his Senatorship in 1933 to serve as Secretary of State for more than 11 years from 1933 to 1944.

In 1945 he was appointed as a delegate to the United Nations Conference in San Francisco. That same year he was awarded the Theodore Roosevelt Distinguished Service Medal and the Nobel Peace Prize for his contributions to our country.

Fleet Reserve Dance Slated This Friday

Chief Samuel E. Shepherd, who is president of the Capital City Branch 90, Fleet Reserve Association, wishes to invite all staff, patients and guests to the Fleet Reserve dance Oct. 17 at the Ice Club, Morningside, Md.

An eight-piece band will furnish the music from 2000 to 0100 and a charge of \$1.00 per person will cover admission plus a chance at the door prize.

Profits from the dance will go to the construction of a home for widows and children of deceased Fleet Reserve members.

Anyone wishing more information, call the Chief at Ext. 334.

Ensign Ranks Open To Men and Women With 2 Yrs. of College

BuPers Instruction 1120.7 explains how qualified enlisted personnel may apply for appointment as ensign in the Regular Navy.

Eligible applicants include CWOs and WO's and enlisted men and women of the regular Navy who are citizens of the U. S. and serving in the Navy at the time professional exams are given.

Eligibility requirements:

(a) Have not less than three and one-half years of continuous naval service at the time of starting applications.

(b) For preceding two-year period, have no record of conviction by a general, special or summary court martial.

(c) Age: Men—must be between 19 and 31½; women—must be between 21 and 28½.

(d) Education: Must have successfully completed two college years (four semesters) of work towards a degree, or satisfactory completion of USAFI educational qualification test 2CX, or its equivalent. In addition, the applicant must successfully qualify under a written preliminary screening examination.

(e) Must be physically qualified for original appointment.

(f) Dependents: Men—no restrictions; women—not eligible if natural or adoptive mother or personal custodian of a child under 18, or stepparent of a child under 18 who lives in the household more than 30 days per year.

K-Vet 'On His Own' For First 2 Months Of College Training

(AFPS)—Veterans who are planning to go to school under the K-Vet Bill have been advised by the Veterans Administration to take along enough money of their own to tide them over for about two months.

There are two reasons for the delay: (1) Under the law, education and training allowances cannot be paid until sometime after a veteran actually completes each month of training.

(2) The law also requires that both the veteran and his school or training establishment submit a certification to the VA—after the end of the month—in which the veteran actually was enrolled in training.

Because of these factors, and the time required to compute the allowance each veteran is entitled to, veterans should allow for two months on their first check from the government.

Subsequently, checks will be issued regularly each month, as long as the veteran remains in training and his certification is in order.

One of the most common requests received by the Veterans Administration from ex-service-men and women is information on applying for training under the K-Vet Bill. The VA has issued the following answer:

"Veterans can obtain an application form at any VA office. Fill out the first five sections completely—be sure to include your program of training and send the application, along with a photostatic copy of your discharge, to your VA regional office.

"If VA approves the application, it will send you a 'Certificate for Education and Training,' which you present at your school when you enroll."

Silver Star--From Father to Son

IT WAS A FAMILY AFFAIR when 2nd Lt. Charles Dewayne Roberts Jr., Tower 8 patient, received the Silver Star last month. On hand to participate in the presentation was Lt. Roberts' father, Col. Charles Roberts Sr., USMC, who is stationed at Camp Lejeune. Also present on the occasion was young Roberts' wife, Nancy (in picture) and his mother, Lt. Roberts received the award for conspicuous gallantry and outstanding courage in action while serving with a Marine infantry company in Korea last July.

Western Union Pyelogram

I think that I shall never see
A circus like an I. V. P.
The "couch," like Torquemada's rack,
Is pressed against your aching back;
And while you wait, and wait, and wait,
The corpsman fiddles with the plate.
"Breathe in, then let the air all out.
"Don't move a muscle till I shout!"
And then he blithely disappears.
After he's gone for years and years,
You've reached the end of this long road,
"Breathe in!" he cries, and you explode.

Act Two's a slightly different game,
Though by and large it is the same.
There comes a shot of diodrast;
It's in your arm, not in your past.
The corpsman runs the same routine
He's firm and cold, but he's not mean.
Your lungs say, "Here we go again!"
Your back says "Why do you complain?"
The Master leaves you on the stand;
You're once again at his command.
God might have made a lot of trees
But never these damned I. V. P.s!

The Chaplain's Corner

Enthusiasm

by Chaplain H. Grady Gatlin

Enthusiasm is the energy that supplies the impetus for physical and mental action. It is a force that will not be denied.

Enthusiasm has lifted man from a state of savagery and placed him on a higher plane. It oils the wheels and sharpens the tools, arouses latent powers and abilities and transforms what might be a drab existence into a life teeming with interest.

This great impelling forward urge has caused man to break with superstition and ignorance. It has led him out into new and untrodden fields—mountains of difficulties have vanished like vapor in the path of enthusiasm.

Enthusiasm in the world of commerce, art, literature, philanthropy, exploration, discovery, science, medicine and religion brings results. It is the greatest asset in the world. Enthusiasm rides over prejudice and opposition rough-shod—it responds with greater force and power when attacked by ridicule and obstacles. It actually thrives on handicaps and disappointments.

Enthusiasm impelled Columbus to sail on and on in the face of a dismal defeat until he had discovered a new continent; it took Hannibal across the Alps; it pushed Caesar across the Rubicon; it drove Martin Luther to the city of Worms. It has been the force and power back of all great movements and the controlling factor in the lives of great men.

In order to keep the fires of enthusiasm brightly burning it is absolutely necessary to tie up to some propelling purpose—a purpose that envelops and absorbs—a purpose that will make one indifferent to little hurts and bruises of life.

Great plans, beautiful dreams, worthy causes, wither and die when enthusiasm wanes. Monotony and indifference are enemies of enthusiasm and progress. But the dying embers of enthusiasm are reborn on the altar of self-sacrifice and service.

'From Army Private to Navy Officer In Six Months' - Lt. Cdr. G. L. Cantzlaar

"I worked my way up from private to 'J.G.' in six months," said Lt. Cdr. George L. Cantzlaar, recently a patient in tower 13. Mr. Cantzlaar, who has now returned to his job in the Pentagon, went on to explain:

"I applied for commissions in all three services, but was drafted into the Army in 1943 before any action was taken. In April of 1943 I was an Army private, beating my brains out at Ft. Bragg, N. C., with the artillery.

"One day we were out in the woods, and I was wearing a dirty old pair of fatigues. They read a letter to me which was addressed to the Commanding General and which inquired whether Pvt. Cantzlaar would be willing to accept a commission in the Navy!"

Needless to say, Pvt. Cantzlaar was soon Ltjg. Cantzlaar. He returned to civilian life in 1946 and until 1950, resumed his profession of medical editing.

He was recalled in 1950 "for six months," but "like the man who came to dinner," he is still in service and has been for the last 28 months. Attached now to the Publication Section of the Tactical Doctrine Branch of CNO, he edits, advises and supervises writers as the section revises a set of standard books commonly known as USF's, dealing with naval tactics.

Although most of his literary efforts are directed in a serious vein, he enjoys writing parodies for parties or occasional light verse. While a patient here, he enjoyed poking a little fun at the medical profession as evidenced by his two poems on this page.

Much of his spare time is more seriously devoted to editing the annual summaries dealing with the value of prefrontal lobotomies, a three-year project financed by the National Research Council.

NDS Gives Diplomas To Prosthetic Techs

Thirty-seven students graduated from the Prosthetic Technician course in the Naval Dental School, and received their diplomas from Commanding Officer Capt. Ralph Taylor on Friday, Oct. 3.

In addition to twenty-six USN students, eight students from the Air Force and one from the Coast Guard successfully completed the course.

Capt. Gerald Parke, DC, USN, Head of the Professional Branch of the Dental Division in the Bureau of Medicine and Surgery, was the guest speaker.

Richard E. Willaman, DT3, USN, received honors from Capt. Taylor for his standing at the head of the graduating class. Honors also went to John L. McClellan, DT3, USN, and Ernest J. LaRoue, DN, USN, who stood second and third respectively.

In speaking of the work done by the school Capt. Taylor complimented particularly the administration of Lt. Cdr. Judge C. Chapman, DC, USN, Director of Enlisted Training, and the work of C. Standish, CWO, H. J. Bacon, DTC, and D. J. Lynch, DTC, as instructors.

Tower Topics

The feeding that's called intravenous
Was invented by ghouls with thoughts heinous.
They must ask permission
Of the Inquisition,
To perpetrate things of this genus.

A patient's a calf on a tether,
Confined to a region that's nether.
For while he lies walled-up
And orders get balled-up,
The staff comes and goes like the weather.

He's a rare sort of man, the physician,
And uncommonly sage—by admission.
When symptoms are lacking
His brain he'll start racking,
And contrive some most frightful condition.

I should like to have solved by directives
A crime that's too tough for detectives:
Why do nurses and medics,
Defying esthetics,
Treat all patients like mental defectives?

—LT. CDR. G. L. CANTZLAAR, USNR

October Sees New Stripes and Bars As Well As New Enlisted Rates

NEW WARRANT OFFICER Elmer D. Jungblut is congratulated by his O. R. Adm. B. Groesbeck Jr. Lower: John W. Guinn, new warrant officer at NSHA, is sworn in by Cdr. M. E. Zimmerman, CO, Naval School of Hospital Administration. (See stories below.)

Chief E. D. Jungblut Takes Warrant Rank For the Second Time

Chief Elmer D. Jungblut accepted a temporary appointment to warrant officer rank on Sept. 26, which marked his second rise to warrant officer rank since his enlistment in 1936. Serving in that capacity from December 1944 to August of 1946, he reverted to chief.

Attached to NNMC for the past year, Mr. Jungblut is in charge of all files and distribution, and supervises the postal directory service here. He was formerly stationed at DMO, Great Lakes.

Bethesda was not new to him, as he attended Civil Readjustment Officers School here in 1945, and later served as civil readjustment officer at USNH, Great Lakes, and the U. S. Public Health Service Hospital, Fort Worth, Tex.

A graduate of St. Joseph's High School in Elkader, Iowa, Mr. Jungblut attended Loras College in Dubuque, Iowa for one year before his enlistment.

An avid hoopster, he pulled down the most valuable players' award at his high school for the 1934-35 season for his skill as forward on the local five. He was a member of his college varsity, and continued the sport for three years (1938-40) aboard the USS Relief.

From 1942 to 44 he served with the First Marine Amphibious Corps, FMF. From 1946 to 1949 he was on duty with a heavy (air) patrol squadron which traveled to New Guinea, up and down the East coast, and to Port Lyautey, Africa. Since there was no doctor attached to the group, he had the medical problems to cope with alone.

At present Mr. and Mrs. Jungblut live on Washington avenue in Silver Spring. They have one daughter, Karen Ann, age six.

OCTOBER 13, 1952

NSHA's Instructor Goes Up to Warrant After 12 Years' Duty

Sporting a brand-new caduceus and warrant officer's gold stripe is ex-Chief Hospital Corpsman John W. Guinn, an instructor in the Personnel-Records Division at the Naval School of Hospital Administration.

Mr. Guinn was sworn in as Warrant Officer Hospital Corps on Sept. 25, 1952, by Cdr. M. E. Zimmerman, MSC, USN, Commanding Officer of NSHA.

The new warrant officer was one of the first chief petty officers and petty officers first class to be appointed to warrant rank from a list of candidates recommended by a selection board which convened recently.

Mr. Guinn has been at NSHA for two and one-half years, reporting here in April 1950 from the U. S. Naval Submarine Base, Pearl Harbor. Since then he has instructed enlisted students of NSHA in clerical procedures, typewriting, office machines, and teaching methods.

Mr. Guinn enlisted in the Navy in April 1940. During World War II he served at Midway Island and from November 1943 to February 1945 he served on the USS Charrette (DD581).

He enjoys his present assignment, saying "Duty at NSHA has done much to prepare me for future assignments in administrative billets in the Hospital Corps."

Mr. Guinn is married and has three children. He and his family are presently living in Hyattsville, Md.

Chief: "Until you've seen my wife dance, you ain't seen nothin'. She dances like Ginger Rogers, Eleanor Powell and Betty Grable all put together."

HN: "Edith is that good?"

Chief: "No. She dances like she has six feet."

Rates Announced For Enlisted Men; Effective Oct. 16

The long-awaited announcements of advancements for enlisted personnel began arriving at the different commands on Sept. 29. Rates will become effective this Thursday, Oct. 16.

Names are listed below according to command and rate:

NNMC

DK2 to DK1

Claire Hoak.

HM2 to HM1

Wilbur A. Ross and Lucile Thompson (W).

PN2 to PN1

Robert L. Myers.

JO3 to JO2

Joan R. Madsen (W).

SD3 to SD2

Faustino Ferido.

HN to HM3

Bruce D. Aschim, William W. Davis, Jr., Ronald E. Devise, Joseph L. Deidesheimer, Richard C. Lampert and J. J. Salchert Jr.

NH

HM2 to HM1

Charles P. Leonard, George R. Prince, and Forrest D. Stitzel.

HM3 to HM2

James C. Shuttle.

HN to HM3

Kenneth L. Barnhart, Teddy R. Barnhart, John D. Bartlett Jr., W. J. Beckman Jr., Aubrey V. Bice, Norman E. Biberdorf, P. J. Cichanowicz Jr., Glenn E. Cox, Ralph E. Coldsmith, Joyce M. Crouch (W), Frank S. Dangelis, John R. Dean, John A. Downs, William E. Dunham, Edwin L. Ervin, R. W. Featherston Jr., Robert S. Fusca, Gene E. Giese, Edwin L. Gross, Morris Gunner, James D. Haswell, Doyle E. Harner, Robert C. Hawkins, Ernestine S. Hawkins (W), Merrell L. Henry, William C. Henry, Thomas J. Howley, Paul J. Hughes, Joseph W. Huber, Jonathan H. Johns, William L. Jones, David B. Kahle, James E. King, Major H. Kirby Jr., Clement V. Knight, Eugene A. Kostecki, Richard C. Kreisl, Billie J. Lawton (W), Charles R. Mantle, James J. May, Thomas L. McCann, Oliver P. McComas, Paul E. Mooney, Thomas J. Murphy Jr., Charles G. Oakes, James M. Pickard, Paul H. Prather, H. F. Reinhardt Jr., Robert L. Replogle, Donald F. Roach, Peter J. Sabados, Stephen T. Scott, Frank L. Schneider, Norman C. Schneider, Howard L. Smith, Robert W. Smith, Wallace P. Smith Jr., Robert E. Spradling, Charles W. Sprugel, E. G. Strawderman Jr., Alfred E. Talbot, Carroll I. (Continued on Page 6, Col. 3)

Promotions Announced For MSC and NC Ensigns

Cigars, congratulations, and new half stripes were in evidence this month as a number of ensigns received temporary promotions to lieutenant junior grade. The new ranks for MSC officers were effective Oct. 1, while the one Nurse Corps rank was effective Sept. 14.

The new list includes: Lucien E. Barkley, NNMC; Thomas N. Scales, NH; Mary A. Ellis, NC, NH; Talmadge G. McMahon, NMS; and William G. Marsh Jr., NDS.

Receiving promotions at NSHA are MSC officers: J. S. Denningham, R. F. Murray Jr., J. R. Swindal, D. L. Kelly, T. G. Leach Jr., R. W. Lee, W. C. Merrell, W. J. Morgan, R. A. Nygren, D. L. Phelps, G. G. Sandeen, T. R. Stiles, R. J. Rever, J. D. Kelly, M. E. Koepke, F. R. Bobek, and L. M. Biggs.

CONGRATULATIONS ARE IN ORDER for Chief Elsasser (top picture) and Leonard, HM3, who both received commissions. Capt. B. W. Hogan, CO, NH, administered both oaths. Cdr. R. L. Taylor (center in lower picture), who is Officer in Charge of NMS' Pharmacy School here and Head, Pharmacy Section, BuMed, was present at Leonard's ceremony. (See stories below.)

Chief E. J. Elsasser Accepts Commissions For Ensign and 'J.G.'

From chief to ensign to "J.G." in two days is the story that circulated when Edward J. Elsasser, a chief in the Patients Record Office, accepted his temporary appointments to ensign and then lieutenant junior grade, MSC, one after the other.

Unusual as it sounds, it's all perfectly legal, but rather complicated, and his ensign appointment actually dates back to May 1950 on the books.

The stripes and bars are not new accessories to Mr. Elsasser, who has over 22 years of service now. In May 1943 he was appointed warrant officer, chief warrant officer in July of the following year, and ensign in January 1945. He reverted to chief in December 1946. On his shore duty assignments, he lays claim to having helped put two naval hospitals into commission—USNH Philadelphia in 1935 and Oak Knoll in 1942.

Foreign shores have been no rarity either, as he sailed with the transport Henderson (1933-35), the battleship USS Colorado (1939-42), USS Salerno Bay (1947), and the USS Consolation (1947-48).

Serving with the FMF Third Marine Division for 18 months during World War II, he took part in the seizures of Bougainville and Guam, and wears the Purple Heart for wounds received at the former.

Recently he returned from a tour of duty in NAMRU No. 3 in Cairo, Egypt, and was a patient here before coming on duty.

He and Mrs. Elsasser have two girls and one son.

Recently discharged Wave: "I'd like to try that dress on in the window."

Clerk: "I'm sorry madam, but you'll have to use the dressing room."

Leonard Makes Grade From HM3 to Ensign; Transfers Same Day

Russell D. Leonard stepped up from hospital corpsman third class to ensign, MSC, on Sept. 25 and was transferred the same day to the Naval Dispensary, Wash., D. C. Mr. Leonard's new billet at the Dispensary is that of Pharmacy Officer.

Mr. Leonard had been attached to the pharmacy here for the past 18 months. Holding a Bachelor of Science degree in pharmacy from the Washington State College, he was unable to get his commission when he enlisted two years ago because the billets were filled at that time.

His commission came one day before he finished the second year of his hitch as he enlisted on Sept. 26, 1950 in Portland, Ore. A native of Longview, Wash., his family has since moved to Portland which he now calls home.

Taking Boot at San Diego and Corps School at Portsmouth, he was then assigned to Bethesda. He applied for his commission in June, 1951, took his exam last April, and his date of rank is July 22.

Preferring individual sports rather than team competition, the young bachelor wields either a tennis racket or a golf club in his spare time, but, "not competitively," he says.

Although he hasn't done much flying since he came East, he hopes to resume the hobby. He holds a private pilot license which entitles him to fly single engine land planes, or as he says, "little ones."

A passenger was up 15,000 feet in a plane when the pilot began laughing hysterically.

"What's the joke, pilot?"
Pilot: "I'm thinking of what they'll say at the asylum when they find out I've escaped."

OCTOBER 13, 1952

Medical Research Institute Scientists Design and Construct a New Type Gamma Ray Generator

A new type of Gamma Ray Generator (cobalt irradiator) was placed in commission Sept. 26, 1952, at the Naval Medical Research Institute. This generator was designed and constructed by members of the Atomic Medical Division and the Instruments Laboratory of NMRI under the direction of Capt. R. H. Draeger, MC, USN.

The Irradiator will be used for scientific experimental research to deliver reproducible uniform total body irradiation to large animals such as were studied at Operation CROSSROADS. The purpose of these experiments is to study the effects of gamma rays on animals as related to man.

The generator is housed in a specially constructed concrete building located behind the Diving Building at NMRI. A "T" shaped barrier of barite concrete about four feet thick runs almost the full length of the building, dividing it into three rooms; two exposure rooms and one control room. Where the top of the "T" ends, two massive steel doors are fitted close off the control room from the exposure rooms which contain the radiocobalt.

Sixty pneumatic transfer tubes pass through a five-foot barrier of loose barite aggregate separating the two exposure rooms. "S"-shaped curves in the tubes prevent the

WATCHING THROUGH A PERISCOPE, Mr. F. I. Whitten, NMRI scientist, operates the remote control keyboard directing the movement of the robot handling and loading of the radioactive cobalt into the pneumatic transfer tubes of the gamma ray generator. Lower left: Operated by remote control the mirrors aid the operator as he places a carrier in a loading position. The radioactive cobalt, in capsules, is

placed in an aluminum container and then loaded into the pneumatic transfer tubes of the generator. Right: Capt. R. H. Draeger, MC, USN, explains the position of a target (in this case a white rat) to N. J. Marbois, HM2. Radioactive cobalt in the tubes surrounds the target insuring total uniform body irradiation of the target within the generator.

radiation from entering one exposure room once the cobalt has been transferred to the other.

In exposure room No. 1, transfer tubes are arranged in concentric cylinders which form a small, high-intensity radiation chamber.

In exposure room No. 2, generator tubes are disposed in concentric cylinders, providing a cylindrical volume about three feet in diameter and five feet long, giving very uniform gamma ray dose about 33 r per minute.

The gamma rays are produced by a cobalt isotope, technically known as Cobalt-60, which was prepared in the Oak Ridge Plant. A total of 1,200 curies (in 100 capsules) is being placed in the pneumatic transfer system which connects the two radiation exposure rooms.

Safety precautions include locking of the electrical control circuit switch to the transfer system with a master key; automatic interlock on the steel doors to the exposure rooms; and a 30-second signal preceding any transfer of Cobalt-60 capsules.

Because of the new features of this gamma ray generator, the results of studies and experiments will, it is believed, set higher standards of reliability than have heretofore existed for studies in this important field of medical research.

VA Office Offering Help to Servicemen

Military personnel, patients or staff, who have problems concerning VA benefits, now have only to go to ward 102 to receive help.

Mr. Francis P. Kelly, who has been named the Contact Representative for the VA Regional Office in Washington, will answer all questions dealing with VA matters and also a few allied fields such as social security.

Mr. Kelly was formally available here only on Wednesdays, but can be contacted daily now. His files contain a quantity of forms dealing with everything from grave stones to combat pay to Civil Service retirement.

His services are available to all military personnel (including separees) throughout the morning hours of each work day. He is usually in the wards in the afternoon contacting VA patients.

So if you have a problem or an unanswered question concerning your rights as a veteran, see Mr. Kelly in the Veterans Administration Contact Office, Bldg. 102.

Navy Mutual Aid Ass'n. Reopens its Membership

The Navy Mutual Aid Association announces that membership has again been reopened and that applications are now being considered from regular permanently commissioned and warrant officers on the active lists who have completed at least seven years warrant or commissioned service in the regular Navy, Marine Corps or Coast Guard and are not over 45½ years of age.

The Association offers a \$7500 benefit paid up at ages 60, 65, 70 or 75. The extra-hazardous duty rates are \$3.75 and \$2.50 per month for aviation and submarine duty respectively.

Interested persons are advised to address their inquiries regarding membership to The Navy Mutual Aid Association, Navy Department, Washington, 25, D.C.

Overseas Xmas Mail Must Go by Nov. 15

(AFPS)—Christmas parcels for members of the Armed Forces overseas should be mailed between Oct. 15 and Nov. 15, the Department of Defense advises.

Boxes headed overseas must be of double-faced corrugated cardboard, strong wood, metal, or fiberboard. Each box should be securely tied with strong cord, and loose flaps should be sealed with gummed tape.

Unless completely packed and tightly filled, boxes may be crushed.

Air parcel post packages up to two pounds in weight should be mailed not later than Nov. 25. The Department of Defense says that no assurance can be given that air parcel post mailed after that date can be air-lifted to overseas areas or that delivery prior to Christmas will be made.

Matches and lighter fluid are banned from all parcels in addition to articles normally prohibited in the mails.

News Shorts from the Editor's Desk

The second course for the fiscal year 1953 in Medical Aspects of Special Weapons and Radioactive Isotopes is scheduled to convene at the Naval Medical School Nov. 17 and continue to Nov. 22. The course will present problems likely to be confronted and techniques to be employed by medical and dental officers in the field of radiological activity which are not available to officers in their civilian capacity.

R. Adm. Alfred W. Chandler, DC, USN, retired, the Navy's Inspector General, Dental, was released to inactive duty on Oct. 1, after more than 35 years continuous active service. Placed on the retired list on July 1, 1952, he continued on active duty for three months to complete a special assignment. R. Adm. Ralph Malone, DC, USN, most recently appointed dental flag officer, has been named as successor and orders have been issued.

New Dental Captain Reports in to NDS

Capt. Karl V. Berglund, DC, USN, reported on Oct. 8 for duty at the Naval Dental School.

Capt. Berglund comes from duty in the Korean theater aboard the U. S. Naval Hospital Ship Repose. He has been assigned at the Naval Dental School to act as Director of Officer and Enlisted training.

A westerner, Capt. Berglund completed his dental education at University of Southern California in 1933 and entered the Naval Dental Corps in 1936. His past duty assignments include Cuba, Parris Island, USS Saratoga, Naval Hospital, San Diego, and Marine Corps Depot, San Diego.

The Captain drove to Bethesda from his home in Coronado, Calif. He was accompanied on his motor trip by his wife Mrs. Anna Berglund and his two children Rustin and Brenda Berglund.

Golfing circles at NNMC can expect some good competition after the captain is settled, as he is an enthusiastic follower of the game.

Scientific Exhibits Of Naval Hospital Capture Two Awards

The Medical Society of the District of Columbia made two awards for exhibits entered from NNMC at the 23rd Annual Scientific Assembly of the Society Oct. 1.

A Certificate of Merit was awarded to the exhibit titled "The Early Clinical Use of Radioelements," and the exhibit titled "Radioisotopes in Medicine" received a Third Award.

The first exhibit on The Early Clinical Use of Radioelements was by Lt. William B. Looney, MC, Cdr. E. Richard King, MC, and Ensign Martin Colodzin, MSC. Cdr. King is the head of the Radioisotope Laboratory, Naval Hospital, and the other two officers are on his staff.

The exhibit represents a problem with which Dr. Looney has been working for the past two years as an Atomic Energy Commission Post Doctoral Research Fellow in the Medical Sciences of the National Research Council working at the Argonne National Laboratory in Chicago.

The project is now being continued in the Radioisotope Laboratory in cooperation with other departments of Naval Hospital, Naval Medical School, and Naval Research Institute.

It involves locating persons who have received small amounts of radioactive materials 20 to 30 years ago. These people will be studied to see how much, if any, of the radioactive substances are remaining in the body and to see if any changes are produced.

These people offer the best available means of estimating what late effects of such radioelements as plutonium might be, and arriving at permissible levels of exposure.

Much of the actual physical preparation of the exhibit itself was done by Allen McGinley, HN, medical illustrator of NMS.

The second exhibit dealt with the therapeutic use of radioactive substances. Many excellent illuminated slides were used for illustration.

THIS MELODIOUS FIVE-SOME, the Arrows (left), were one of the many acts brought here Sept. 23 by Art Brown and his Talent Revue, sponsored by Radio Station WWDC. The ladies on the right are: Peggy Trissell, pianist; Alice Sharon, singer; Ruth Sadler, comedian; Dotty Darndow, singer; and Carolyn

Barker, singer. In the back row are Clarence Bowden, blind singer, and emcee Art Brown. The next regular monthly appearance is slated for Oct. 28 when Art Brown promises to produce an equally entertaining show here in the main auditorium.

McNair Works Out with NNMC Team

AFTER A FAST DOUBLES MATCH, Mr. Fred McNair III, Washington's doubles star, and three members of the local team, Chief Douglas Powell, R. E. Lieurance, and Edward Lary, HN, take a breather on the NNMC court.

Doubles Champions Determined Saturday

Weather permissible, the finals in the NNMC doubles tennis tourney could have been played this last weekend. Still left in the competition at this writing were Douglas Powell, MC, and Edward Lary, HN, both of Naval Hospital, who were to meet Lt. William Looney, MC, of H, and Ltjg. McKenzie Walser, C, of NMRI in the finals. A glance at the NNMC tennis ladder over in Special Services could indicate that Lary and Powell were favored since they hold down first and second spots respectively on the station.

Also in their favor is the fact that they edged out the number one and four men (Lt. R. E. Lieurance, MC, and Philip Cichanowicz, HM3, both of EENT staff), 2-6, 6-4 in their semi-final match. Drs. Looney and Walser advanced to the finals by downing Lt. J. Atkinson, MSC, and John Reynolds, HMC, 6-1, 4-6, 11-9.

Admiralettes Ready for Winter Season with Three Sports Underway for Women

Varsity volleyball and basketball and intramural bowling are either in progress or will be soon for the women of this station. Varsity teams are composed of staff and student Waves, officers and enlisted, and Navy wives.

Anyone interested in participating in any of these activities should contact the officer in charge (listed below) or Norma Schrader at Ext. 239.

Volleyball

The local volleyball eight will play its fourth league game Thursday night in the NNMC gym when they take on the Ft. Myer Wafs. Taking a loss from Quarters "K" in their first league game, the girls came back for a decisive 22-12, 28-15 win over Bolling Air Force Base Sept. 30.

Last week they dealt the same medicine to the visiting Henderson Marines, defeating them 13-11 and 17-13. The Marines were good players individually, but didn't seem to work together as a team.

Ensign Patricia DeBerry, MSC, of NMRI, has been named volleyball officer, with "Tony" Walker, HM3, the NNMC NEWS, as coach.

Roster of players include: Betty Alexander, "Al" Allen, Barbara Bradford, co-captain, Mary Lou Fox, Joyce Crouch, Pat DeBerry, Nellie Evans, Ivy Hall, Ethel Hammett, Nonnie Hawkins, Edith Heinemann, Joan Madsen, co-captain, and

City Doubles Star Seen at Local Net

NNMC's varsity netters were fortunate in being able to have a number of practice matches with one of Washington's best doubles players, Mr. Fred McNair III.

McNair and his partner, Fred Kovalski, who was formerly ranked 15th nationally, have copped three major tournaments this season: the District of Columbia, the City of Washington, and the Mid-Atlantic.

Besides sharing the number-one doubles spot, McNair is also ranked fifth in the city singles, and is noted for his flawless net game.

Originally selected by ladder competition to enter the MAISAC tourney slated for September, the team is in good shape, but it is doubtful now if the tourney will be played this year because of court construction difficulties at Ft. Lee which was to have been host to the competition.

Josh Shook.

Games are played each Tuesday and practices held at 1800 Thursdays in the gym. Schedule for the rest of the season is:
16 Oct.—Ft. Myer Waf, here
21 Oct.—Ft. Myer Hq. Co., there
28 Oct.—Ft. Myer Waf, there
4 Nov.—Quantico, here
11 Nov.—Ft. Meade, there
20 Nov.—Walter Reed, here

Basketball

With the Women's Inter-service Athletic League scheduled to start Dec. 1, the Admiralettes have tentative plans to hold their first practice Thursday, Oct. 16 at 1900, and every Thursday thereafter.

Lt. M. J. Topercer, NC, will act as basketball officer. A coach will be announced some time this week.

Bowling

Lt. A. M. Crowell, NC, and Lt. H. M. Heikkila, NC, are in charge of the intramural bowling. To date six teams have been organized (five teams of nurses and one of Waves).

League games will start tomorrow night at 1800 in the NNMC bowling alleys with each team rolling three games apiece. There will be a charge of 25 cents per line for the pin boy.

Anyone interested in setting pins regularly should contact Schrader at Ext. 239.

Kinder Wins Again; Cops Willcutts Cup

Lt. James M. Kinder, an administrative officer for NH, won the championship flight of the R. Adm. M. D. Willcutts Golf Tournament held on the local course started in September. Runner-up for the top flight was William E. Flanery, DN, Dental Department, NMRI.

Last month, Mr. Kinder also placed first in the R. Adm. C. A. Swanson Tourney when he bested Robert M. Hill, HN, Lab 18 student.

Winners and runners-up of the six other flights are: First flight: Lt. Cdr. Donald T. Kean, Maintenance, NNMC, and Donald E. Teter, DN, of NMRI.

Second flight: Cdr. William S. Cole of X-ray, NH, and Lt. James T. McGuckin, EENT, NH.

Third flight: Lt. James E. McClenathan of NH, and Cdr. William S. Rusk of NDS.

Fourth flight: Lt. Woodrow C. Manley, Finance, NNMC, and Cdr. Douglas Giorgio of O.R., NH.

Fifth flight: Gordon W. Sumner, HMC, of NMS, and Ltjg. Earl F. Pomije, NDS intern.

Sixth flight: Robert L. Klein, HMC, staff, NSHA, and Cdr. Chalmers R. Carr of NH.

R. Adm. Willcutts, during whose command of NNMC this course was completed, made possible the award to foster local interest in golf.

Winners and runners-up of all flights will be awarded prizes by Special Services.

NDS Officers Beat Nine Enlisted Men

The NDS enlisted men took a severe beating from their officers on Oct. 1, a beating on the softball diamond, that is. Under the able piloting and pitching of Dr. Lyon, the officers bested the Techs 13-8 in spite of the fact that the EMs boast one of the best intramural pitchers, Purser.

The officers scored one run in the first inning. The Techs came back in their half and scored five runs, mostly on walks, until Dr. Lyons replaced Dr. Wolcott on the mound.

As both the game and the darkness progressed, the officers slowly tied, then passed the EMs. The Techs scored one in the fourth and two in the fifth, to increase their score, but couldn't catch the determined officers.

There were a great number of rooters, some for each side, and a great number of those who didn't know what side they were really for, but were enjoying the game all the more by yelling for both sides.

MAISAC Conference Meets Here Friday

The Middle Atlantic Inter-Service Athletic Conference will hold its quarterly meeting at NNMC on 1000, Oct. 17 in the Special Services Building.

The Conference is made up of Armed Forces installations (Army, Navy, Marine Corps and Air Force) in the middle Atlantic area, extending as far north as Bainbridge and south as far as Camp Lejeune, N. C.

Interservice athletic competition and sports programs and policies for the 1952-53 winter season will be planned. Major R. M. Schmeltzer, USA, attached to headquarters, MDW, the 1952 chairman of MAISAC, will preside.

Special Services and athletic officers of the Middle Atlantic Armed Forces installations are invited to attend.

NDS Officers Wrap up League Taking 11-4 Victory Over NNMC

The local series is over. NDS Officers are on top of the list with a 1,000 percentage. Holding down the second rung is NMS with a nine and one record with their single loss to the stripers from Dental.

In the third spot is NNMC with an eight and two record with their two losses coming from the two upper teams.

The first four weeks of the season saw a three-way tie for top position — NMS, NDS Officers and NNMC.

Two weeks before the final game, two of the top teams were matched (NMS and NDS Officers). Dr. McLaughlin of NDS allowed only five hits. Aided by a double and triple by Millard, the usual fine fielding of Epstein, Glasser, Marble and Lyons, plus the other members of the NDS Officer nine, the game ended 11-2 for NDS.

This still left a two-way tie for first—NDS Officers and NNMC. NNMC's first game with NMS, called because of darkness, ended in a nine-all game. With Fred Bell tossing for NMS and Chief O'Keefe lobbing for NNMC, Center led six to four going into the bottom of the fifth.

Through a series of Center's infield errors and difficulties on the mound, Med School grabbed four runs in the top of the sixth to lead 9-6. With concentrated batting by Suttell and Cline, NNMC picked up three tallies to tie the score before the umpire called the game.

In the second match with NMS, Center again went down in the fatal sixth when five runs were snatched from Center. In their next two chances, NNMC could only snag a single, and the game ended with a 13-7 NMS victory.

The Center boys still had a chance at first position in the final game of the series when they met the NDS Officers. A win for NNMC would have resulted in another three-way tie, each team having only one loss.

In the top of the first, Center grabbed the lead with two runs. It was lost soon after when, in the

bottom of the first, through a series of walks and two hits, NDS took a two-run lead. O'Keefe replaced "Yogi" Miller on the mound and the side was retired.

Center couldn't regain the lead; the game ended 11-4, giving NDS Officers the intramural crown with NMS in second and NNMC in third. The hustling Officers took their 11 runs off the same number of hits and two errors, while NNMC picked up four markers off five hits.

McLaughlin and O'Malley manned the mound for the winners. O'Malley insured his game in the sixth with a homer with two on. Glasser and Marble tripled bringing in two runs.

Epstein, Lyons, and Glasser played their usual flawless defensive game for the dental officers while Cline, Bennett and Allgood starred for NNMC.

Med School insured its second place standing earlier in the week with two wins—one from Lab 19 and the other from Phar-Phys Med.

The Lab. 19 game saw three NMS homeruns—Bill Hobbs blasting one, Byron Cheek securing another and the third by Dick Thornburg. The final score was 21 to 4, NMS, with Fred Bell the winning pitcher.

The game with the druggists and physio students was undecided until the end. Phar-Phys Med led in four of the innings with two runs until the top of the sixth when NMS, through a homerun and a man on base through an infield error scoring on a sacrifice bunt, sent the score to six and five, Med School. Pitching for Phar-Phys Med was Anderson while taking the NMS win was again Fred Bell.

Saturday's Classic: Navy vs. Terrapins

This coming weekend will see Navy tangling with another team in the all-win record when the Middies visit College Park and attempt to reverse the 40-21 defeat at the hands of the Terrapins in 1951.

This game, NNMC News' headliner of the week, will probably be the deciding factor on the final A.P. standings of the teams at the end of the season.

Other cross country top games are:

East—Villanova travels to Boston College, Pitt marches on Army, Colgate at Harvard, Penn attempting a repeat over Columbia, and Yale visits Cornell.

Midwest—The Illini at Minnesota, Iowa tries to stop the badgers at Wisconsin, Michigan goes to Northwestern, Missouri attempts last year's defeat of the Aggies, Notre Dame at Purdue and Washington State meets Ohio State.

South—Alabama matched with mighty Tennessee, Duke meets neighboring N. C. State, and local G. W. visits VPI.

Southwest and Rocky Mountains—Arkansas clashes with Texas, Rice meets a better SMU, TCU and Texas A&M, Utah goes to Denver and New Mexico tries to erase the 1951 41-7 defeat at the hands of Wyoming.

Far West—Santa Clara attempts to tame Cal, UCLA meets Stanford, Washington meets Oregon.

Lady who objects to tobacco: "If I were your wife I'd give you poison."

Smoker: "If you were my wife, I'd take it."

Sherin and Epstein To Coach Varsity Five

Ensign Paul J. Sherin, of the NH personnel office, has been named as head coach and basketball officer, NNMC. Ltjg. Norman Epstein, NDS intern, has been named assistant coach.

Regular practices are being held in the gym. The NNMC varsity has been entered in the Middle Atlantic Inter-Service Athletic League, and league games are slated to start Dec. 2.

Candidates are still vying for a maroon and gold suit on the varsity five.

Navy Belles

by George

With new lamps and end tables, our front room is very popular these days... and very homey! But then you go on through to where the girls live at our house? ? ? ?

The ever-moving and constant change of girls—Janie Brown singing "California, Here I Come!"... Ellen Gallagher exchanging her uniform for a grass skirt (are you gonna send a picture, Ellen?)... "Irish" O'Brien counting the days until she can be called "Miss" again.

Aleta Ault and Margrette Williams have already left the fold. Adele (Penny) Pendleton rejoining us from the sunny shores of Hawaii for a tour at the NDS... And a very familiar face here for the past many months now a member of the Hospital Command Staff... Rose Hydzyk. Mary "Murph" Mischewicz is in for Hospital Command, too.

Also aboard for USNH is a new bride, Louise Parker (her hubby's here, too)... Glad to have you with us. We are still represented on Ward 129... Ruth Worlein is back to duty, but Gerry Bourne and Minnie Smith are still holding the fort over there.

"Mike" Bullard Bell is still walking on clouds... Allen still not talking and "Possie" learning to drive that beautiful red Mercury.

Sound swell to hear good music on the new piano in the recreation room—thanks to Ruth Puffer, Peggy Brock and Pat Welty.

Seen at the bowling alley last Wednesday night were Scotty, Betty Ward, Chiefs Petersen and Puffer, Schrader, and yours truly. Results: aching backs, sore muscles and low scores! Not much time left for practice before we go out and give the nurses some competition.

NMRI

by R. Conaway

We were glad to see Chief Vezinat back at his desk in the personnel office. The Chief just returned from the Naval Hospital where he lost a bout with his appendix.

I had no idea you were an "artist," Griff, or was that just a bum steer Arlene gave me?

Instead of taking their troubles to the chaplain, we have certain people who take theirs to the Supreme Court.

Peggy Brock lost her coffee-drinking pal when Hammy Brooks left us for a month of night duty in the Wave barracks.

Elkins can hardly wait for the 24th of October, the date he expects to jump "out of the frying pan into the fire." The reason: He plans to take on a Missus when his discharge from the Navy comes through.

We hear a certain Chief is suffering from Guntheritis—and he was a confirmed "Bud" man, too.

Radigan is beginning to think all those phone calls are a put-up job; they always come in just when he has a good Pinochle hand.

Vic Carncross looks mighty good after 22 days' leave in Wisconsin. In case anyone runs short of cash, we know of a certain Chief who might be good for a loan—\$190 worth at that.

Two brand-new Ensigns recently reported aboard: Patricia DeBerry from NMS, and R. N. Rosan from EDCU No. 6, Pearl Harbor. Also from NMS we have H. R. Forsha, HN. A hearty welcome aboard to all.

Our lone transferee this issue was Ltjg J. A. Moody. He left for NROTC, Ohio State University.

Just a word to the enlisted staff of the Institute. Be sure to keep Oct. 20 open for an evening of fun when we celebrate the 10th anniversary of the commissioning of NMRI. More details later.

Dental Explorer

by C. Connor

First off, it would seem appropriate to congratulate both of our ball teams, officer and enlisted, whom, I am certain you all know, did a 4.0 job out there on the diamond. Needless to say, though, the Physio Dept. gained mucho work from our big leaguers—muscles were discovered that they had never before been conscious of, but with aching backs and arms they still "got with it." So here's hoping we don't lose any of you to your second love, namely "baseball"—oops, pardon me—softball, that is. This paragraph might well be titled "Oh, my aching back."

Dan Cupid sure got around this month. Harry Ingram and Glyn Jones are our latest bridegrooms. Looks like our boys have thrown their track shoes away.

To our latest additions for DPT school, welcome aboard to: W. K. Collins, DN, from Kwajalein; J. Vogel, DN, from New Orleans; G. B. Compton, DT3, from Bainbridge; and D. E. Jacobs, DN, from the USS Gilmore.

From Capt. Faubion we hear that Capt. Jack Sault, former head of NDS Prosthetics Dept., has been appointed special lecturer in anatomy in the University of Pennsylvania Graduate School and spent two days this month at NDS photographing material for his course.

Cdr. A. T. Smith is on TAD to Memorial Hospital, New York City, for a month. (We sure hope that he won't be suffering from "high building-itis," caused, I believe, from staring upwards.) Holding down the fort in his absence is Cdr. A. L. Vogel, who has almost been forced into directing traffic through our department. Lately it seems business has increased, but through the midst of it all, there stands Dr. V. with a telephone in one hand, signing a paper with the other, and talking to another patient at the same time. Sort of makes you dizzy, doesn't it—but he's got it down to a science.

The picnic for NDS staff held Saturday, October 4 at the Bethesda Recreation Center, was a huge success made possible by the efforts of the committee under the direction of Capt. Allen. From personal observation it seemed everyone had a good time. With games for old and young, plenty(?) of eats, and 3.2 and tonics for refreshments.

Our skipper, Capt. Taylor, Capt. Faubion, and Capt. Allen were in the thick of things. All in all, the get together was a sensational success and a round of thanks should be given to the committee who made it possible.

Vets Warned to Get Copies of Discharge

(AFPS)—The Veterans Administration has advised all veterans to have photostatic or certified copies made of their original discharge or separation papers for use in applying for veterans benefits.

Korean veterans will avoid delay in receiving their education and training benefits if they have their separation papers copied before the original is sent to the Armed Services for mustering-out payments. Both sides of the document must be submitted in photostatic copies.

The VA will accept photostats or certified copies of separation papers for most benefits. However, one exception is the VA guaranteed loans. To apply for these the veteran must present his original discharge or separation papers.

Veterans who have been released from the Reserve since June 27, 1950 should submit their reports of separation or certificates of service, since they do not get discharge papers.

Mr. Kelly Progresses from SA to Ltjg Earning Master's Degree at Same Time

Ltjg. James D. Kelly, a former North Dakota farm boy and now head of the Personnel Management Division at the Naval School Hospital Administration, proves that application and desire to learn can accomplish an objective.

After enlisting in the Navy as an apprentice seaman he worked his way to his present Navy rank and at the same time, he earned a Master's degree in business administration from the University of Michigan.

Mr. Kelly attended NSHA in 1948. At that time he recognized the opportunity for further education and he enrolled at the Montgomery Junior College for night courses.

After graduating from NSHA he was assigned to duty as instructor there. This provided the opportunity and incentive for continuing his "after-hours" education.

He received his Associate in Arts degree from Montgomery Junior College in June 1950, and he was then assigned to full-time instruction at the School of Business Administration at the University of Michigan where he concentrated on personnel management (industrial relations), accounting and education.

He received a Bachelor's degree in business administration in February 1952 and through advanced standing granted in courses which were in excess of BBA requirements, he received a Master's degree in business administration in June 1952.

Through the credits in education courses plus his MBA he qualified for a Michigan Permanent Junior College Teaching Certificate, which is an acceptable credential for teaching in public junior colleges in Michigan.

He met degree requirements in subject matter and course prerequisites with the aid of USAFI and in-service courses—through the Montgomery Junior College, the University of Michigan, as well as USAFI and in-service training and schools.

Mr. Kelly has amassed a grand total of 156 semester hours in credits. He says he will be glad to furnish interested personnel the details.

As a special student during the summer session of 1952, he devoted his attention to courses beneficial to his teaching assignment: Cost accounting, advanced public speaking and special problems in the teaching of business subjects.

Mr. Kelly was born on May 7, 1919 in the farming community of Napoleon, N. D. "The theme there was work," Mr. Kelly says. "That was when 'reveille' was at 5:30 every morning."

He graduated from Napoleon High School in May 1937 and enlisted in the Navy that October. He has had duty at the Naval Hospital, San Diego, Calif., the Naval Training Station, Personnel Separation

Ltjg. James D. Kelly

tion Center, and Naval Hospital, Great Lakes, and the Headquarters, First and Fifth Naval Districts.

Overseas, he served at the Naval Advanced Base, Cayo Franc, Cuba, and the Naval Hospital, the Naval Medical Supply Depot, Guam. He has also served on board the USS Gold Star and USS Repagan.

He was appointed to the rank of warrant officer in 1943 and earned MSC, in 1950. He was promoted lieutenant junior grade on Oct. 1, 1952.

Mr. Kelly is married and has an eight-year-old daughter. Their residence will shortly be Silver Spring, Md., where the Kellys recently purchased a home.

Story of the Week:

They Don't Call Us Bus Drivers Anyway

The civilian public is very conscious of uniforms, but not always too quick to recognize which is which. Lt. E. C. Wilson, NNMC I and E officer, can testify to this.

One day as Miss Wilson was driving through Chevy Chase residential district, a small boy toddled across the street in front of her car. Thinking the street was place for such a small child, she stopped and attempted to find out where he lived.

Her inquiry as to his residence produced only, "I live in house,"—a truthful but hardly helpful answer. By questioning the neighbors, she did determine where he lived and returned him to his home.

In the midst of her endeavor she met some little girls. With one glance they took in the blue uniform, the gold braid, the bucket hat, and the young man in tow and announced, "Oh, you must be the lady who takes care of little children!"

Group Hospital Plan Will be Explained To NNMC Civilians

Over 200 Naval Medical Center civilian employees are free from the depressing worry brought about by unexpected hospital and surgical bills.

This group of 200 employees enjoys the protection of Group Hospitalization which pays for hospital services regardless of cost.

Many employees also enjoy the security offered by the Medical Service of the District of Columbia which offers surgical protection and in many cases pays the entire cost of any surgical procedure.

These are non-profit Blue Cross and Blue Shield plans which return to their members more than 90 cents of every dollar paid to them.

More than one-half million people in the Washington area are members of these plans and NNMC civilian employees are now being offered an opportunity to insure themselves against payment of unexpected, costly hospital services and the accompanying worry.

Arrangements have been made to have Mr. Albert Hopkins (a Group Hospitalization representative) on the station in the near future to talk to civilian employees. Watch the Daily Bulletin for time and dates.

Mr. Hopkins will answer all questions after his talks and will be available for private consultation if desired.

Mr. Hopkins advises: "You cannot plan your physical well-being from day to day, but you can prepare through our group to meet the unpredictable circumstances of the future."

"You, like hundreds of others, can have your bills sent to Group Hospitalization instead of to yourself. Let them worry—not you."

Special Train Ready For Army-Navy Tilt

All civilian and military personnel of the Navy Department are advised that the Naval Academy Association of Wash., D. C. will run its annual "Blue and Gold Special Train" to the Army-Navy game to and from Philadelphia on Nov. 29, 1952.

Hostesses will serve a fried chicken box lunch, going north; coffee and sandwiches going south; set-ups both ways.

Total cost of the entire trip, including railroad fare, will be \$15.00. Tickets to the game are not included. Application blanks are available at the Special Services Office, Bldg. 23, Ext. 672 or 227.

The Responsibility of the Citizen as a Voter

by Ralph Bushnell Potts

The blood of free men stains my ballot sheet. Whatever others may do, I shall not carelessly make my mark. I vote not because I can but because I must. Those that died for this, my voice in government, had a right to expect that I would prepare with every faculty to use it wisely, honestly and courageously. They did not die that fools, blind partisans or the reckless might make a game of free elections.

Only my secret heart knows whether I justify the definition of "voter" as they wrote it in the reddening sand. If I love my country as they did, I question my qualifications again and again.

I carefully study the issues and candidates to determine what is best, not for me or my minority but for my country.

I will not be confused or deceived by propaganda, slogans or histrionics. I shield my eyes to the glitter of personalities, purge my mind of passion and prejudice, and search diligently for the hidden truth. I must be free of all influence save that of conscience and justice.

I garden for dreams, but with a realistic spade. My test is not of trend or popularity, but of principle and liberty.

I vote as if my ballot alone decided the contest. I may lose my preference, but I will not throw away my sacred vote. For within the booth I hold in my humble hand the living proxy of all my country's honored dead.

Editor's note: The foregoing essay was one of two prize-winners in a contest conducted in 1945 by the Committee on American Citizenship of the American Bar Association.

Santa Takes His Orders Early Here

SANTA CLAUS was on hand for the gala opening of the Navy Exchange toy store on Oct. 18. Located in the fountain and restaurant dining room area, the toy store will be open Monday through Saturday from 0830 to 1700 from now to the 24th of December inclusive. Tricycles, bicycles, mechanical toys, dolls, Lionel trains and all accessories are part of the wonderful selection of toys for all age groups.

Two Variety Shows and Choral Group Come to Auditorium in Next Two Weeks

Revue shows, variety, and choral arrangements of popular and classical music are on the agenda for NNMC in the next two weeks.

Tomorrow, Oct. 28, will see the return of the popular master of ceremonies, Art Brown, the congenial announcer at Radio Station WWDC in Washington, when he brings a new and different Talent Revue to the auditorium stage at 1900. Music, laughs and a variety of entertainment are slated for this free show.

The Stardust Revue will re-visit NNMC on the night of Nov. 9 in the NNMC auditorium. This variety show, with a range of talent from instruments to comedy, and from dancing to vocalizing, will be on stage at 1900.

Choral arrangements of popular

and classical music will be the bill of fare on Nov. 10 when the Washington Opera Guild, directed by Miss Dorothy Remington, will present a concert at 1900.

Sponsored by the DAV, Chapter No. 4, the program calls for refreshments and valuable door prizes for patients.

Surgeon General Praises Corpsmen For Mission with Fighting Marines

Second in importance to no other single factor, according to R. Adm. Lamont Pugh, Surgeon General of the Navy, is the magnificently efficient manner in which the hospital corpsmen of the Navy are fulfilling their mission with the fighting marines.

Speaking of the new record-low two per cent mortality rate of those men wounded in action, he

CPO Club Planning Big Family Night

Clowns, acrobats, dancers, comedians, etc., will make an appearance at the CPO Club on Sunday Nov. 9 for a special two-hour show designed to entertain the entire family.

Chief LeBlanc, mess treasurer, urges everyone to bring the kids, and enjoy an evening of fun. The show will start at 1800.

Featured for the performance will be Tiny Meeker, Washington's biggest band leader; Billy Dale, a real circus clown; George Winston (dancing and musical novelties); The Vernons (father, mother and daughter) doing ventriloquism, magic, mind reading, acrobatic dancing, juggling, and bringing their trained dog; and Kay Howard, singing comedienne.

Also on the Club's agenda is the Halloween party slated for this coming Saturday night, Nov. 1. Costumes are optional, and prizes will be awarded for the cleverest disguises.

The regular four-piece band will start the music at 2000 and play until 0100. All masked parties must show proper identification.

Appointments Open For 3 Staff Corps

(AFPS)—Probationary appointments leading to commissions in the Naval Reserve are now being offered officers and enlisted men of the Reserve, and medical, dental and theological students of approved schools, the Navy announces.

Medical and dental applicants, if accepted, will be appointed ensign (probationary) USNR. Following completion of their academic training, they will be appointed lieutenant (junior grade) in the Medical or Dental Corps.

Candidates must agree to serve two years of active duty and retain their commission in the Naval Reserve for a period of eight years following the original appointment.

Qualified dental and medical applicants of the inactive Naval Reserve and theological members of the Naval Reserve will be allowed to resign from their present commissions or be discharged if enlisted in order to accept the probationary appointments.

Theological students will be appointed ensign (probationary), USNR, and upon completion of their studies will be commissioned lieutenant (junior grade) in the Chaplains Corps, USNR.

SURGEON GENERAL, R. Adm. Lamont Pugh, illustrates his lecture by means of slides and a world map. The flashlight in his hand was used to locate points on the map.

attributes much of the credit to the bullet-proof jacket and to skillful front line surgery in combination with the availability of whole blood and the utilization of helicopters for evacuating casualties direct to hospital ships and rear area hospitals.

Admiral Pugh came to NNMC on Oct. 10, as a guest of the Commanding Officer and staff of the Naval Hospital. Speaking to a capacity crowd in the auditorium, the admiral discussed his recent world-wide tour of Naval medical and dental facilities.

While in Korea inspecting Naval components serving with the First Marine Division, Admiral Pugh spent three days at "Bunker Hill" where he had an opportunity to observe front line medicine and fire.

In one of the lighter moments of his 90-minute talk, the admiral related that his traveling companion and aide, Lt. Cdr. Brooks, believed the best looking women in the world to be found in Greece. The admiral, however, cast his vote for Stockholm, Sweden.

Navy Releases Dates Of Next PO Exams

(AFPS)—Dates of competitive examinations for advancements to pay grades E-4, E-5, E-6, and E-7 will be changed, the Navy has announced.

Tests to be held in 1953 will be conducted in February and August instead of January and July. Authorities involved in administering the exams were responsible for the change, the Navy explained.

With some exceptions, the early 1953 exams will be held on the following dates:

E-7, Tuesday, Feb. 3, 1953.

E-4, Tuesday, Feb. 10, 1953.

E-5, Tuesday, Feb. 17, 1953.

E-6, Tuesday, Feb. 24, 1953.

'Daarling, I Really Can't be Bothered; We Start Shooting at 1300, You Know'

"Now, when I was in the movies..."

If suddenly sun glasses become commonplace around NNMC, hold the Bureau of Medicine and Surgery and the Wilding Pictures Production, Inc. responsible.

Until the 30th of October, NNMC will be used for filming a nurse indoctrination movie titled appropriately, "The Navy Nurse." This movie, 16mm. and color, will use over 200 NNMC personnel before finishing the different necessary sequences around the station.

Special Services, wards, Physio, Blood Bank, Central Supply, Operating Room, Tissue Bank and the Officers Club will be included in the footage to show the duties, responsibilities and privileges of Navy nurses.

Requested by Capt. Winnie Gibson, Director of the Navy Nurse Corps, the picture is being produced by Wilding Pictures Production, Inc.

The project director, Lt. Cdr. K. J. Makie, USN, remarked that the picture, 20-25 minutes in length, will include scenes of this and other hospitals. It will include combat views, now being photographed by photo combat crews in both the Pacific and Atlantic, and views of flight nurse duties. The latter will be taken next month at Patuxent Naval Air Station.

Lt. Dorothy E. Jones, NC, from the office of Director, Navy Nurse

Corps, and technical director for the film, estimates that the release date will be sometime in the early part of 1953.

Intended for Navy nurse motivation and indoctrination, the film will be shown on TV, in theaters, civilian hospitals, colleges and at Naval installations.

Pointed Pearls

Don't believe that the world owes you a living. It owes you nothing; it was here first.

Two men who share a pup tent in time of war may be the nucleus of a great organization in time of peace.

In the old days a man who saved money was a miser; nowadays he's a wonder.

The right fellow for a job is the one who doesn't know that it can't be done.

How did the fool and his money ever get together in the first place?

The Chaplain's Corner

Selfishness

by Chaplain David J. Kosky

Selfishness is a self-love which is disordered inasmuch as centered upon oneself, to the exclusion and detriment of others. However, a balanced self-love is a normal ingredient of our human make-up. Our minds esteem the admirable qualities whether the person be oneself or another.

Excessive self-love is egotism and is wrong; the opposite extreme of self-contempt or self-hatred is unnatural and also wrong. In between extremes, there should be a balanced self-love, the norm of charity for others, referred to by Our Lord: "Thou shalt love thy neighbor as thyself." (Matt. 22:39)

Try to analyze this expression: "as thyself." What is it that you do not want others to do to you by reason of the love you have for yourself? You do not want them to think unkindly of you; you do not want them to speak unkindly to you or about you; you do not want them to injure you in any way.

And what is it that you want them to do to you? Surely, you want them to think kindly about you; to speak kindly about you and to you; and to be always ready to do kind deeds for you. All this you desire because of the love you have for yourself.

Now, simply substitute your neighbor for yourself, and for the love of Jesus Christ treat him as you wish others to treat you. Always do unto others as you wish others to do to you. In this way you will fulfill this great commandment of love of neighbor. Of course you understand that you must do this for the love of God, otherwise it will be merely the natural virtue of philanthropy.

Speaking of love of neighbor and being prepared to do kind deeds we have an excellent opportunity of practicing this in contributing toward the current Community Chest Fund.

Local DC Officers Travel This Month

Naval Dental School officers have been active this month in delivering lectures, and presenting exhibits throughout the Nation:

New Orleans

Capt. Ralph W. Taylor, DC, USN, CO of NDS, represented the Navy at the meeting of the American Society of Oral Surgeons which was held at New Orleans from Oct. 8 to 11.

Among the people with whom Capt. Taylor renewed acquaintance was Capt. T. Lesney, DC, USN, formerly stationed here. Capt. Lesney, who is now stationed at Tripler General Hospital, T.H., was a member of the Examining Board which met during the meeting.

Philadelphia

Cdr. John V. Niiranen, DC, USN, and Cdr. Robert A. Colby, DC, USN, were among speakers who addressed the Third Annual Medico-Military Symposium for the Armed Forces, which was held at USNH, Philadelphia from Oct. 20-25.

Cdr. Niiranen presented a paper on "Special Prostheses" before the Dentistry section on Oct. 21. Cdr. Colby appeared before the same group Oct. 23, when he discussed "Developmental Disturbances of the Head and Neck."

Cdr. H. J. Towle, DC, USN, was in charge of the Dental Corps exhibits. These emphasized the role of the dentist in the event of atomic disaster. They also featured some of the special prosthetic devices developed by Cdr. Niiranen, such as auricular prostheses and the facsimile arm for venipuncture training.

Other sections of the exhibit illustrated work done by the Naval Dental School.

Savannah

Cdr. Robert B. Wolcott, DC, USN, gave two addresses at the recent meeting of the Georgia State Dental Society in Savannah. He spoke on "Amalgam Restorations" on Oct. 13, and on Oct. 15 he presented a paper on "Cavity Preparations Involving the Use of High Speed Cutting Instruments."

The group discussions following the presentation of the papers, indicated a wide interest in the subjects and in Cdr. Wolcott's analysis of them.

The services of Rabbi Harry Kaufman, representing the Jewish Welfare Board, are available to all Jewish Personnel and Patients at the National Naval Medical Center. Rabbi Kaufman may be reached by calling the Chaplain's Office, Ext. 324, or by call direct—Office: RA. 5371—Home: GE. 0755.

Neuropsychiatry Graduates 14 Doctors

AFTER 16 WEEKS in a course in Neuropsychiatry, 14 doctors were graduated by the Naval Hospital. The course was aimed at familiarizing medical officers with the scope of N.P. techniques and the various phases of naval psychiatric service. Front row: Capt. C. H. McMillan, R. Adams, B. Groesbeck Jr., Capt. E. L. Caveny (Chief of N.P. service) and C. S. Mullin (in charge of course). Second row: Drs. Lenski, Palach, Lucas, Robertson and Douglas. Third row: Drs. Wilson, Bergin, Matychowiak, Harlan and Robinson. Fourth row: Drs. Cook, Strarrels, Mader and Collier.

New Rates Listed For 38 Enlisted Men

Second lists of new advancements in rate have been published by Naval Hospital and Naval Medical School. Those receiving promotions, who were not listed in the Oct. 13 issue, are:

NH

HN to HM3

Dolores J. Beck (W), Herman P. Chapman, Robert F. Clark, Robert E. Dempsey Jr., Memory H. Elmore, Norman T. Fairhurst, Darrel D. Folvag, Eugene L. Full, Alfred C. Gilliland, George T. Jepson, John W. Kersey, Laurence M. McCarty, Walter L. McMaster, Paul A. Noble, Anthony P. Tucker Jr., Charles C. Tucker, John L. Roshnaffski, and Ronald E. Yoxheimer.

Diaper Derby

Oct. 4—Michael Conrad Bonneau, 8 lbs., 12 oz., new son of Conrad J. Bonneau, HM1, student, Pharmacy School, NMS.

Oct. 8—Deborah Jayne Shuttle, 9 lbs., 9½ oz., new daughter of James C. Shuttle, HM2, staff, Allergy Clinic, NH.

Oct. 9—Kathleen Elizabeth Bransford, 6 lbs., 11½ oz., new daughter of Charles L. Bransford, HM2, student, Radioactive Isotopes, NMS.

Oct. 10—Mark William Peterson, 8 lbs., 5½ oz., new son of John W. Peterson, HM1, student, Lab 19, NMS.

Oct. 13—Linda Kay Whitlock, 8 lbs., 15 oz., new daughter of William E. Whitlock, HM1, MAA, Bks. 140, NMS.

Oct. 13—Marie Elizabeth Shirer, 8 lbs., new daughter of Ltjg. Hampton W. Shirer, MC, Biophysics, NMRI.

Oct. 15—Charles Neal Goldsborough, 7 lbs., 1 oz., new son of Charles W. Goldsborough, HM3, staff, EENT, NH.

Oct. 16—Mark Bergeron, 6 lbs., 8 oz., new son of Theodore A. Bergeron, HM2, student, Lab 18, NMS.

Personnel of NSHA Prepare for Future With Night Classes

Education, with its modern specialization, has come a long way since the days of the little schoolhouse. At the Naval School of Hospital Administration, for instance, many staff members (many of whom are graduates of the school) are taking after-hour courses which will be helpful to them in the future.

Lt. J. H. Bing, Food Service Division, is studying business administration at George Washington University. Attending the Georgetown University School of Foreign Service is Ltjg. R. R. Rever, of the Finance Department, also majoring in business administration.

Ltjg. L. M. Biggs, of NSHA's Research and Development Division, is taking a pre-law course at the University of Maryland, while A. D. Hotvedt, HMC, Personnel Management Division, is studying personnel management at George Washington University.

CWOHC R. C. Meyers, head of the Maintenance Division, is studying at Montgomery Junior College in a pre-engineering course for eventual matriculation in industrial management.

G. A. Nyman, HM1, has resumed his instruction in machine shorthand at the Stenotype Institute of Washington after returning from Fort Slocum, N. Y., where he attended the Armed Forces Information School during the summer.

For the past three weeks, members of the NSHA staff, George Hack, HMC, and Harry Peck, HMC, have been attending a workshop at the George Washington University on methods and techniques in training employees in the use of electric typewriters.

Six Men Complete Exams Given by I & E Office

Six more men from the various commands have completed successfully General Educational Development Tests. The men and the tests are:

Second year college level: Gerald O. Burnett, HMC, and Kenneth K. Eustace, HMC, both of Naval Medical School.

First year college level: John Jarboe, DT3, of Naval Dental School.

High school level: Francis J. Anama, HN, and Ira S. Mills, HN, both of the Naval Hospital, and Allan T. Jones, HM3, of the Naval Medical School.

Francis J. Anama attained one of the highest series of marks recorded in the I and E office here.

OCTOBER 27, 1953

'Mr. Bowling' Leaves For Hawaiian Duties

NNMC's "Mr. Bowling" is leaving. Lt. Cdr. Robert F. Jaeger, MSC, USN, will be detached from NMS the first of November to report to Pearl Harbor for duty as bacteriologist with Disease Control Unit No. 6.

During his two-year stay here, Mr. Jaeger was a member of the Recreation Council, the Physical Training Board, the Center Golf Committee, and Bowling Officer for NNMC.

He was also the manager and coach of the 1951-52 NNMC softball team which took runner-up honors in the PRNC-MAISAC League.

Mr. Jaeger's introduction to bowling was in 1939 when he played with a State employees' team in Illinois.

At NNMC, plus being bowling officer, Mr. Jaeger rolled with the 1951 and 1952 Med School Officers in the intramural league. In variety ball, the bacteriologist collected a final average of near 170.

In the recent MAISAC Golf Tournament held at NNMC, the sport enthusiast held the position of official and starter for the four-james.

Women's Sports:

Seven Kegler Teams In Pinfall League

Volleyball, bowling, and basketball are in full swing for the women of this station. Anyone interested in participating may still join, however, and should contact Norma Schrader at Ext. 547.

Volleyball

The local netters took their third league win last Tuesday night when they swamped the Ft. Myer Wacs at Ft. Myer, 17-12 and 13-10. A week before they dropped a match to the visiting Bolling AFB team.

With three wins and two losses to their record, the team will play the following games:

28 Oct.—Ft. Myer Hq. Co., there
4 Nov.—Quantico, here
10 Nov.—Ft. Meade, there
20 Nov.—Walter Reed, here

Basketball

The feminine cageters held their first practice last Thursday night immediately following the volleyball practice. Harry "Shorty" Edwards, HMI, has been selected to coach the six with George Ashton, M2, assisting.

Edwards coached the local gals season before last and is prepared for a good season. The first league game is scheduled for the first week in December.

Bowling

Intramural bowling kicked off last Tuesday night with seven teams entered. While the Ice-breakers took a bye, the results of the matches were:

Submarines 3, Battlewagons 0
Minesweepers 2, Carriers 1
Cruisers 3, Destroyers 0
High Single: B. Ward, 140
High Avg.: A. Crowell, 133
Pin Fall: Carriers, 1,641

Judge: "Why do you want a divorce?"

Chief's wife: "My husband is always singing 'Smoke Gets in Your Eyes' to me."

Judge: "There's nothing wrong with that."

Chief's wife: "While he holds my head in the furnace?"

Motorist: "I just ran over your cat and I want to replace him."

Housewife: "Well, get busy, here's a mouse in the pantry."

AGE FOUR

Seafaring Druggist Never Had Poor Duty

"I saw the first Bikini explosion from a distance of 12 miles. During the second explosion, where the bomb was detonated under water, we were moved twice that distance because of fear of possible contamination and tidal waves."

"It was like looking into the depths of hell. The mushroom column, following the blast, was lit by all the colors of the spectrum," remarked Kinch H. Walker, HMC, of Pharmacy, in describing the most unusual event of his naval career, observing the two atomic blasts at Bikini.

His most notable duty station was Sampson during WWII. There he made chief in August, was married in October, and naturally, like night follows day, immediately received his orders to sea duty.

Chief Walker, one of NH's Pharmacy crew and an instructor of pharmacy and materia medica in the local HC training program, was interested in the Navy life for many years, but, because of the rigid pre-war physicals, was unable to join those "who go down to the sea in ships" until 1940.

When the chance came, Chief Walker, then Mr. Walker, the owner of a drug store in Georgia, chucked the business and set sail for his first duty station.

Duty aboard the USS Ranger, carrying P-40s to the Gold Coast

Kinch H. Walker, HMC

for the British, destroyer duty and seafaring on LSTs and the APA St. Croix during the Bikini experiments familiarized the chief with the navy afloat.

Sampson, Jacksonville, Pharmacy School here, and a tour in Portsmouth, teaching pharmacy, showed the chief the Navy ashore.

This popular mariner, the "executive officer" of the Pharmacy, is another of NNMC's many fishermen. Recently, on leave, he did some angling off Florida, snagging into a mess of sea trout and one of the kings of ye olde briny deep, the snapper.

With 12 of his twenty years finished, the chief, who "never had bad duty" sees in his private crystal ball at least another eight years of the non-landlubber life.

A Woman's Prerogative

A local corpsman swears this is true: A man and woman entered the admission room and asked where the delivery room was located.

While being escorted to Tower four the usual conversation of solicitude and concern took place between the husband and the soon-to-be mother. "Is my little mother going to be all right?", etc.

Upon approaching the double doors leading into the delivery room the expectant father became more and more nervous for the little woman.

Just prior to leaving her, the father blurted out, "Now, dear tell me. Are you sure you want to go through with this?"

CWO Lawrence Hendzlik

Casual Office OinC Awarded 14 Ribbons

"Do you know he has over 25 years in the Marine Corps?" Duty? Has he seen duty! He wears campaign ribbons for duty in Nicaragua and China, battle stars for campaigns during the second world war, and has three stars for duty in Korea.

Here at NNMC "wherever particular Marines congregate" the topic of conversation often switches to the OinC of the local Marine Casual Office, CWO Lawrence C. Handzlik.

This detachment commander joined the Marine Corps in 1925 and has seen duty in every engagement since that date that Marines have entered.

Four years after his enlistment, Mr. Handzlik saw his first action during the second Nicaraguan revolution in the battle of Telepenca. In 1939 he was stationed in Peking, China, protecting Americans at the onset of the Japanese-Chinese War.

In the second and third year of the last World War he made landings with the now disbanded Fourth Marine Division in the Marshalls, Iwo, Saipan and Tinian. In Korea the CO of the local Casual Office spent 12 months in the first part of the present engagement.

When asked what he considered the heaviest action he has seen, Mr. Handzlik replied, "The now famous hill of Surabachi. Our command post was within 200 yards of where the flag was raised at the end of the battle."

The CWO's retort to the question of difference of the present Marine Corps and that of 20 years ago, was, "the only difference is size. At that time the Corps was composed of 20,000 men. At present it is over 10 times that number."

The CWO has over 14 ribbons and medals. They include the Presidential Unit Citation with two stars, the Good Conduct with six, the second Nicaraguan Campaign Medal, the Expeditionary Medal for duty in China, the Yangtze Medal, the Pacific-Asiatic ribbon, the American Defense, the Korean Defense Ribbon with three stars, the European-African ribbon for duty in Iceland, and the Victory and UN award.

"I'll be through in a minute. I'm on rinse."

Joint Bank Accounts May Help Dependents in Time of Need

(Editor's Note: The following article, fourth of a series, is designed to aid servicemen and women in their personal affairs so that relatives and dependents will be spared unnecessary hardship in time of emergency. The series will deal largely with financial matters of specific interest to military personnel. Information for the series was condensed from Armed Forces Talk 410 titled "Your Personal Affairs.")

(AFPS)—Everybody wants to safeguard his money and valuable papers but many servicemen and women don't know how.

If you have a savings or checking account in a bank, it may be wise for you to make it a joint account. There's an excellent reason for this.

Tropical Paradise Is Freeman's Home

As the cliché goes, some people are just born lucky. How is this for a paradise on earth? A jungle for your back yard, Mayan ruins for sightseeing and a nearby tropical river for swimming. Varied hunting with game ranging from gators to cats, and tapir to deer are within walking distance plus an ocean and a river well stocked with fish of all variety.

On the urology ward, 6-B, works a corpsman who was born and raised in exactly these surroundings, Joseph S. Freeman, HN. Joe's father is an American civil engineer for the United Fruit Company, a corporation that deals in commodities from Central America for the United States.

Joe was born in the U.F. Hospi-

Joseph S. Freeman, HN

tal in Quiriqua, Guatamala and raised in Bananera, the headquarters of the Guatemalan division of United Fruit, situated in the heart of the Guatemalan jungle and banana country.

Within throwing distance of the house were hunting and fishing that could only be found in South and Central America. Snook, barracuda and poca were easily caught; alligators, cats, deer and tapir were available for the hunter.

Sports were in abundance with swimming, horse-back riding and soccer which nearby Guatemalan schools favored. For sightseeing, a few miles from the town Mayan ruins were to wonder over.

Before returning to the States for college, Joe also saw a good share of the rest of Central America in travels, both business and pleasure, with his father and mother.

Upon completion of his high school in an academy, run by the company for the children of American employees, Joe traveled by the Great White Fleet, the company's ships, to the States where he enrolled at Baylor University in Texas. Abilene Christian College followed where he received his BS in chemistry.

After graduation and prior to his introduction to the life on the rolling seas, Joe was employed by the Standard Oil Company of Ohio as a chemist in the oil fields and refineries in Texas.

After his enlistment, the then Mr. Freeman expects to either continue in chemistry until his master or major in pharmacy.

If you are the only one authorized to draw from an account and are ordered to foreign service or die, your wife or dependents may find themselves deprived of money when it is urgently needed.

In some states it is possible to establish joint accounts "with rights of survivorship," so that in the event of death of one of the parties, the survivor automatically becomes sole owner of the money in the account.

But whether you have a joint account or an individual account, be sure to notify your wife or dependents about its location. Otherwise, you may forget about the account, or die without your survivors knowing of its existence.

The Bureau of Naval Personnel recently screened the unclaimed accounts in banks all over the U. S. or those belonging to Navy men. Hundreds of unclaimed accounts of officers and enlisted men were discovered. Several of these accounts were turned over to needy dependents of deceased naval personnel. One account contained more than \$2,000.

If you are married, you may be able to simplify the settlement of your estate, provided the laws of the particular state permit, by putting as many affairs as possible in joint status with rights of survivorship.

It may then be possible to make your widow the immediate and unquestioned owner of stocks, bonds, and other personal property if such property is held in the joint names with right of survivorship.

Such 'joint' ownership may have certain disadvantages. Exemptions under state laws which are extended to servicemen might not be extended to property held jointly by the serviceman and his spouse. So consult your attorney or legal officer about such matters.

Another method of safeguarding your personal property is by using deposit boxes. When available, a safety deposit box in a bank is the best place to keep valuable papers.

In most states the box may be rented in one of three ways: (1) in the name of one individual; (2) in the names of two individuals, as joint tenants; and (3) in the name of one individual, with another being an 'appointed deputy.'

'Supermen' Will Man Navy's Atomic Subs

(AFPS)—The Navy's atomic submarines will be manned by "supermen."

The USS Nautilus, first of the A subs, and expected to be completed in 1954, will have such unheard of speed, range, and underwater capabilities that human endurance will be a crucial factor in its operations. Accordingly, healthy, rugged persons will man the craft.

Living conditions aboard the Nautilus will be about the same as in ordinary submarines, according to the Navy. The latest possible comforts will be made available for crewmen—including special color schemes to reduce claustrophobic tendencies, heavy shielding to guard against atomic rays from the engines, and portable radiation equipment to be used to check each man's exposure.

Despite the hardships involved in such an assignment, many of the Navy's more than 1,500 highly selected submarine officers are clamoring for spots on the Nautilus.

NMRI Doubles in Size and Multiplies by Five in Personnel Since its Commissioning in 1942

The Naval Medical Research Institute celebrates today the 10th anniversary of its commissioning on Navy Day, Oct. 27, 1942. Since that date, the Institute has nearly doubled in size, having now about 100,000 square feet of floor space with over 100 laboratory rooms.

In support of these laboratories, there are technical shops, and glass apparatus and instrumentation laboratories and a large animal house with modern facilities for breeding and caring for laboratory animals.

Its original staff of 13 officers and 50 enlisted personnel has grown to about 300 people, both military and civilian, engaged in a wide variety of medical and biological studies peculiar to naval problems.

During World War II the Institute was concerned largely with the development and evaluation of materials and equipment to be used by the fleet, and in the prevention and treatment of disease and injury encountered by personnel engaged in armed conflict.

Studies on the use of protective clothing in relation to aviation problems and to salt water immersion were also carried out. The use of insect repellents in the field was covered in detail as well as studies on vaccines plus other means for the treatment and prevention of disease.

Problems related to the desalination of sea water, motion sickness, oral hygiene, air-sea rescue techniques, and protection against flash burn were among the variety of studies.

Today, while much of the work of the Institute deals with the behavior of men under environmental stress of many kinds, there is a great deal of effort devoted to the understanding of the normal organism.

The basic physico-chemical study of muscle is one such study underway by a group of investigators at NMRI, while two other departments have been concerned with some of the dynamic mechanical characteristics and the electrical impedance properties of muscle.

Other basic research problems include studies on the properties of frozen solutions and tissues, the facilitation of learning processes in animals and man, the biochemistry of adrenal cortical activity, and the visual perception of movement.

The program of the Institute includes studies on most stresses of importance to naval operations

Capt. William L. Mann, MC, USN
(Oct. 27, 1942-July 19, 1943)

Capt. Erik G. Hakansson, MC, USN
(July 19, 1943-Apr. 5, 1948)

Capt. Charles F. Behrens, MC, USN
(Apr. 5, 1948-June 20, 1951)

Capt. Wilbur E. Kellum, MC, USN
(June 20, 1951—)

such as heat, cold, high to low ambient pressures, mechanical shock and vibration, ionizing radiations, and toxic gases and other materials.

Much effort has been devoted to the study of disease; especially those tropical diseases such as malaria, dysentery, schistosomiasis, etc., encountered in warm climates during fleet operations.

During the past two years the Treponemal Immobilization Test for syphilis has been developed for service-wide application. The originator of this test, whose early work was carried on at Johns Hopkins University, is presently carrying on further studies here at NMRI.

The Institute was one of the pioneers in the use of preserved tissues for grafts in surgery. Together with the Naval Medical School and the Naval Hospital, the Institute has maintained a position of leadership in research of this type.

There is an extensive program in Atomic Medicine underway at the Institute covering the biological effects of atomic energy and the thermal, blast and radiation effects of atomic weapons. This work is closely correlated with laboratory and clinical studies with pharmacology, pathology and physiology of X-ray and radioactivity work.

The Institute participates with the other Commands of the NMMC in a wide range of collaborative research work. It also carries on joint research studies with many federal laboratories and with a

GLASS APPARATUS is essential and its preparation is an art as illustrated by Mr. Arthur D. Mack, of the Glass Apparatus Laboratory.

THE LINK TRAINER is not only a teaching instrument but can also be used for the study of the performance of complicated tasks.

number of colleges and universities.

The Naval Medical Research Institute has had four Commanding Officers: Captain William L. Mann, MC, USN, Oct. 27, 1942 to July 19, 1943; Captain Erik G. Hakansson, MC, USN, July 19, 1943 to Apr. 5, 1948; Captain Charles F. Behrens, MC, USN, Apr. 5, 1948 to June 20, 1951; and Captain Wilbur E. Kellum, MC, USN, June 20, 1951 to present.

Dr. A. C. Ivy served as Scientific Director in 1942 and 1943. Dr. Kenneth S. Cole has served in this capacity since 1949.

DISSECTION OF MOSQUITOES is a key procedure in many approaches to problems of malarology.

TINY PLANT CELLS make excellent material for the study of the effects of ultrasound. Studying the cells here is Dr. Wladimir W. Lepeschkin, of Biophysics.

SPECIAL EQUIPMENT is required for microscopic study of hard tissues such as this modified milling machine, operated by Capt. James A. English, DC, USN.

Langley Air Force Base Takes Top Team Honors in 1952 MAISAC Golf Tournament Held at NNMCC

the recent Middle Atlantic Inter-Service Golf Tourney here at NNMCC, awards were presented to the golfers for certain unforeseen incidents as well as high individual team scores. Receiving one of these "bunker" trophies was Col. W. D. Holmes (upper left) of the Fort Belvoir Linksters for his painful and unique follow through on a difficult

shot (see story below). Top center: Checking the day's scores with Bill Downing, Cdr. W. S. Cole, and Lt. Cdr. C. B. Stuart, members of the tourney's golf committee, is Admiral Groesbeck. Upper right: Admiral Groesbeck presents the second place individual trophy to Pvt. A. M. Nelson of Camp Pickett at the tournament banquet Friday night. Lower left: Lt. J. W. Kinder, NNMCC's top scorer, tees off on the

first hole. Lower right: Maj. G. G. Hardgrove, winner of first place in individual competition, drives off the first tee. Lower center: Admiral Groesbeck congratulates the winning team. The Langley AFB Linksters include: (top row) Lt. Lester Fields, M/Sgt. Fred Golas, and Lt. Jack Nix and (lower row) S/Sgt. Frank Thees and A/2c William Reed.

Maj. G. G. Hardgrove of Fort Monroe Bags High Individual Trophy Totaling 209 for 54 Holes

A 1946 member of the All-Army team, and a recent winner of the Third Army playoffs placed his feather in his golf cap by winning the top award in the MAISAC Golf Tourney held here at NNMCC Oct. 15, 16 and 17.

Maj. G. G. Hardgrove, of Fort Monroe, Va., slammed his way to first position with a final aggregate score of 209 for 54 holes, one under par for the local course.

The major, who ousted the place holder 11 up in 54 holes, took his 18 for even par, his second under par and two, a 72, and topped this year's bunting with a 67 on the third 18 of play.

Winning team in the three-day Middle Atlantic Inter-Service Golf Tournament was Langley AFB, of Virginia, netting a top 1185, based on a five-low team basis.

through a five-low of 391 on the first day of play, 393 on the second, and shattered to a 413 on the final eighteen of the regional service golf classic.

Grabbing the runner-up trophy for individual standings was Pvt. A. M. Nelson of the Army base at Camp Pickett with an aggregate of 220. The Californian, a former member of St. Mary's team, scored a consistent 74, 74, and 72 for the three days of play.

Tops in individual standings from the NNMCC team was Lt. Kinder, the recent winner of the station Willcuts and Swanson trophies.

The golfing MSC officer took a final of 230 for the 54 holes for seventh place in individual standings.

The NNMCC team also ended in the seventh slot in the final day of the medal play, with a stroke total of 1247 for the 54 holes.

Representing NNMCC were Lt. J. W. Kinder of NH, Capt. A. R. Woolcott of the Royal Australian Navy, Cdr. W. S. Cole of NH, Lt. Cdr. D. T. Kean of NNMCC, H. Offield, HMC of NMS, R. Hill, HN of NH, and R. Flanery, HN of NH.

Top scorer on the NNMCC seven was Lt. J. W. Kinder with a 75, 74, and 81. In second slot was R. Hill with 85, 79, and 79.

A total of 15 teams composed of 97 linksters entered the play, representing military installations from the Maryland, Virginia, Washington and North Carolina area.

Teams and individuals were competing for the top and places positions in both team and individual aggregates with team scores computed on a five-low basis. Play was medal and U.S.G.A. rules applied.

Defending champion was R. Crozier of Fort Eustis who took third slot in final 18 with a three-day total of 222, two strokes out of place position.

Defending team was Patuxent who fell into fourth place this year

with a 1206 for five-low.

Top score of the 54-hole service classic was Maj. Hardgrove's three under par for a 67, entered on the final eighteen on Friday, Oct. 17, the last day of the competition.

The major stole par on the first three holes in both the first nine and the second time around the local links. In the first nine he birdied on the fourth for a four, parred on the fifth and sixth, bogeyed on the seventh and played one under par for the eighth and even par for the ninth for a first nine total of 34.

The second top score of the three-day series was a 69, entered on the score pad on the first day of competition by Tom Burch of Bolling AFB. On the first nine the clever putting lightweight from Bolling drew a birdie and eagle, four holes par, and double bogey on the famous seventh for a two under par of 33.

On the second nine, Burch drove through a phenomenal 23, four under par, through the seventh. On the eighth and ninth, by two drives in the rough, Tom, an Air Force master sergeant, dropped a double bogey and a triple bogey on the eighth and ninth for a one over par 36 and a total of 69.

Official scorekeepers during the medal play were: Lt. Cdr. R. F. Jaeger of NMS and Lt. Cdr. C. B. Stuart of NNMCC. Starters and Rules Committee were: Cdr. W. S. Cole of NH, Lt. H. W. Lyon of NMRI, and Bill Downing, the local golf pro.

Trophies for the three-day play were awarded at a banquet held in the CPO Club Friday night. Presenting the trophies, both individual and team, to the golfers was R. Adm. Bertram Groesbeck, Commanding Officer, NNMCC.

(Cont. on Page 6, Col. 4)

We Think That We Shall Never See

Golf Hazards Quite Like a Tree

In every tournament there are stories which are told and retold long after the scores are in and the trophies have been awarded . . . stories which will be remembered long after the names of the winning teams and individuals are forgotten:

T. E. Burch from Bolling Field made the most talked about shot of the tourney with his wedge. He made it from 35 feet in the air, perched in a fir tree.

It happened in the second round on hole number five. When the ball lodged in the fork of a fir tree, spectators thought Burch would automatically lose two strokes.

Wedge in hand, Burch shimmied up the tree, played the ball from there and finished the hole one over par.

British Army Lt. Col. W. D. Holmes of the Ft. Belvoir team can boast of how no tree could come between him and his goal—although it might complicate matters somewhat.

Undaunted by the proximity of the tree to the ball, the colonel managed what he termed "a beautiful shot," but, on the follow through, his club wrapped itself around the trunk of the trees, broke, and half of it came back and struck him.

Sgt. C. Hendrickson, from Langley AFB, fared no better with a pear tree. He claimed he was hungry when he spied a juicy pear up in the tree.

Aiming at one, he tossed his club up to knock it down. No pear dropped and also no club. On the night

of the banquet, R Adm. Groesbeck presented him with three chits for pears, plus one real pear home-grown at NNMCC.

Marine Lt. F. I. Fenton, from Quantico (nephew of R. Adm. Groesbeck) was approaching hole six. Suddenly greatly distracted, he exclaimed, "What kind of people are they taking in the Navy nowadays!"

Following his gaze, the other players looked down upon the clotheslines behind barrack 123. On one line were white trousers and dungarees. Another line was sporting two small undergarments—one red, one green.

Someone quickly explained to the distraught Mr. Fenton that half of the barracks belonged to the Waves.

NMRI

by R. Conaway

With all the cigar-passing going on at the Institute, one might think that "Mr. Stork" had been working overtime this month, but 'twas only the boys celebrating those new "crows" they just sewed on. Congratulations to you all!

A welcome aboard to Jane Brown, HM3, from NMS and to Malvina Weiss, YN3, who reported from NAS, Anacostia, and a fond adieu and good luck to the departing members of the staff: W. H. Larson, HMC, transferred to the Naval Gun Factory; C. D. Sylvester, DT3, released to inactive duty; and R. C. Purdue, HM3, D. E. Teter, DT3, and R. Van Belois, DT2, discharged from the Navy.

Someone passed the remark that Harry James was just Vic Carn-cross with a mustache.

We have proof-positive that the Sunrise Club is out of bounds—to Kelly that is!

I hear that Phil Eldred went down to "qualify" just because his "buddy" had done the same.

A certain gal in the Personnel Office is wearing her heart on her sleeve since her true love departed.

Red, what's this we hear about you wanting to be called "Mr.?"

Cupid finally shot his arrow true in the case of Don Heye who took that "final step" on Oct. 16. Too bad you didn't buy that new car first, Don.

Navy Belles

by George

At our house: a new blonde desk for spending time in the newly decorated front room.

This and that from 123A: A new roommate for "yours truly" and Josh Shook, Vina Weiss, YN3, reported aboard for duty at NMRI. Janie Brown decided to stay with us and is also at the Research Institute.

"Rose" Hydzyk hard at work altering clothes... others around the barracks doing their Christmas shopping early, via the knitting needle... Leslie Evans kept busy with home permanents (or should I use the terms "barracks").

Ruth Clarkson playing interior decorator on a long-distance scale with the new form she just acquired... Norma Schrader buried in bowling and basketball schedules... Joan Madsen getting Norma up for chow every morning here lately.

Possie getting braver and braver in places she'll take her shiny red Mercury. And did you know that we have another "George" around our house? Barbara Bradford, who is now keeping up the spirits of the gals on Ward 128 during the wee hours of the morning, also goes under that "nom-de-plume."

Joyce Crouch is back from leave and in heavy training for the coming basketball season. Annette "Tillie" Tillotson will be replacing Mary Lou Cox as our daytime "mother" of the barracks.

Gerry Bourne is on leave again, recuperating from surgery... Nonnie Hawkins has changed her name to Gates and is already planning to be a housewife... couldn't have happened to a nicer couple!

Our "silent one" Al Allen is trying her best to get her voice back. Has already undergone one bit of throat surgery with another one scheduled this week. Sure will be good to hear her answer us when we call.

My roommate, Josh Shook, is absorbing Latin music so she'll be ready when that certain someone returns from Cuba. Hope to see a big turn-out tonight at our party at the CPO Club... it's "stag" or "drag" gals, so there's no excuse for not having some fun.

Dental Explorer

by C. Hailey

There IS rest for the weary. Connie is back from her old stomping grounds in New England. Anna Schuricht is still enjoying her country of California. Even our dentists, such as Dr. Millard and Dr. Chapman, took well-deserved leaves.

'52 Ford-itus seems to be catching the staff these days. Fergie and Hendrickson are proud of theirs. (Sure wish I were second class.)

Speaking of second class, a boy by the name of Whiffen is wearing a new, red attachment to his rating badge which used to be third. Dale Card, Wiggins and Zaia added a change to their old second class badges (and their pay checks). All three stripes look mighty purty. Let's not forget the DN's who struggled to third class—total—15.

While we are in the envious mood, we might as well envy Milton McCline who was transferred HOME, with no strings attached.

School bells are tolling a month late here. Oct. 13 sent 14 Air Force and 41 sailors (that included Penny) to the grind in DPT school. Chief Lynch was laid off from the hospital as a patient to shape them up and ship them in.

Chief Campbell reported back to his old hangout as a school boy again—this time in the advanced prosthetics class.

A good man to know these days is Lt. E. J. Rockett, our new administrative officer, taking Mr. Anderson's place who went west (young man) as the poem goes.

There is a beauty near Maryland by the name of Marilyn, and Tony Mugno found her (fine choice, I'd say). Paul Wheeler was a bridegroom while on leave and Grundmann is thinking over the matter of betrothal. Everytime he drives over that bridge to Va. he thinks harder on the subject.

Good-by's were said to Wm. Fitzgerald (Fitz) on Oct. 20—finally received his orders for sea duty aboard the USS Bennington. Phil Sonner is on the sick list. We'll try and get by for a few moments to say hello—he's on Ward 4-C.

Guzzetta off to Bldg. I for one month's duty in Oral Surgery. The gang in the clinic say they hope he doesn't get to like it too much and forget to come back.

If you want to see a crew of fellows really put out the work on field day, visit Bldg. 122—Dental Clinic—it really looks sharp.

Well, that's all, You All.

Lary Takes 3rd Win In Station Tennis

Edward Lary, HN, of Naval Hospital proved himself undisputed tennis king on the NNMC courts Sunday, Oct. 12 when he and his partner, Chief Douglas Powell, sewed up the station doubles crown.

This marked the third win for the young athlete, who won the station's singles cup earlier this summer and holds down number one spot on the tennis ladder in Special Services.

Lary and Powell breezed past finalists Lt. William Looney, MC, of NH, and Ltjg. McKenzie Walser, MC, of NMRI, in three sets (6-2, 6-4, 6-2). The match was well played with many good rallies from both sides.

With early darkness and cold weather on the way, tennis will be regulated to a weekend sport until spring.

Navy vs. Notre Dame In Saturday's Clash

Some of the games to watch next weekend are:

East—Army matched with VMI, Maryland has an easy one with Boston U., Penn State and Penn., Indiana at Pittsburgh, and NNMC News' game of the week, Navy meets Notre Dame in Cleveland in an attempt to erase last year's 19 to 0 defeat.

Midwest—Illinois meets Michigan, Minnesota greets Iowa, Ohio State matched with Northwestern, and Purdue attempts to stop Michigan State.

South—Georgia greets Alabama, Florida kicks off to Auburn, N. C. State marches on Wake Forest, and the game of the South, mighty Duke meet the Rambling Recks from Georgia Tech, last year a 14 and 14 game.

Southwest and Rocky Mountain—SMU and Texas, Texas Tech and Houston, New Mexico and Arizona, and Wyoming at Brigham Young.

Far West—Washington State versus Idaho, San Jose State at Stanford, and the game of the Far West, California at UCLA, last year 7 to 21, UCLA.

Service Games on TV

(AFPS)—The remaining service games that will be televised by the Columbia Broadcasting System during the 1952 season:

Nov. 1—Camp Lejeune vs. Quantico at Washington.

Nov. 8—Parris Island vs. San Diego at San Diego.

Nov. 15—Randolph AFB vs. Bolling AFB at Washington.

Nov. 22—Ft. Belvoir vs. Quantico at Washington.

Nov. 29—San Diego NTC vs. San Diego MRD at San Diego.

"Where in Naval Regulations does it say I have to sleep in my skivvies?"

Be-Witching Miss

WHO SAID WITCHES ARE UGLY? Even Hallowe'en—with spooks, bats, owls, and cats—can't seem to detract from bewitching Janis, surprised by the photographer while stirring her caldron of day brew. Vicki fits into the weird atmosphere nicely, thank you she's one of the actresses on the radio mystery show, "The Shadow."

BuPers Instruction Gives All Details Needed to Apply for Ensign Commission

With unrestricted appointments to ensign (Line, Supply and Civil Engineer Corps) now open to men and women having two years of college instead of the previous four, corpsmen have been requesting the necessary procedures. Bureau of Naval Personnel Instruction 1120.7 lists them in the following order:

If you are making the earliest possible application, a letter requesting to be considered for appointment must be submitted in writing to your commanding officer on Oct. 1, 1953.

The commanding officer will submit the request to the Bureau of Naval Personnel by the 20th of October.

Oct. 1 to Dec. 1 will be used as observation period by the commanding officer of the candidate. So during this period the applicant will be reviewed by a board of officers, and will be physically examined by a group of medical examiners.

On the first of December the respective applicant must submit a formal application plus a loyalty certificate (DD Form 98 and a) to his commanding officer.

A preliminary written exam will be given to all applicants on this date. This battery of tests will be of an objective nature and composed of the five following sections: history, science, aptitude, mathematics and English.

By the fifth of the month all papers shall be forwarded to a selection board in the Bureau of Naval Personnel.

Successful candidates will be noted in March of the following year. Successful male applicants for a Line or Supply commission will be sent to the Naval School, Ensign Candidate, Newport. Female candidates selected will be directed to the ROC School at Bainbridge.

ROC Candidates will be required to take a professional exam after six weeks study at the Sea Bee Center in Rhode Island.

A complete review of the candidate's qualifications will follow the previous courses. Candidates selected will receive appointments in the grade of ensign. Officers so appointed will compete with officers of unrestricted classification.

Thanksgiving is Theme of Next Enlisted Dance

Thanksgiving will be the theme of the next enlisted staff and student dance to be held Monday, Nov. 24, announces Chief Joe Keefe, chairman of the enlisted dance committee.

The chief promises an evening of many pleasant surprises and asks everyone to turn out.

Getting underway at 2030, there will be three-and-one-half hours of music furnished by the dance orchestra from the Navy Band of Washington.

As in the past, dress for the evening calls for uniform of the day (appropriate civilian dress (coat and tie) for the men, with evening gowns optional for the ladies.

Use of Tourniquet May Soon Change

Washington (AFPS) — The military use of the tourniquet may undergo a revolutionary change, according to a recent report prepared by the National Research Council.

Accepted by the Armed Forces Medical Policy Council, the report's recommendations represent a complete about-face from tourniquet procedures used in WWII. At that time it was the practice of the medics to release the tourniquet for five minutes every half hour.

This method, according to the report, is "unwise as well as unnecessary." Reasoning that the patient has probably lost large amounts of blood already, it is illogical to loosen the tourniquet so that he might lose more blood.

"Experience has shown," the report states, "that a properly applied tourniquet may be allowed to remain undisturbed even for three or four hours with relatively little risk."

This new concept of the tourniquet is currently being written into service training manuals.

Oral Surgery Chief Passes Board Exams

Cdr. C. H. Blackstone, DC, USN, has been receiving the enthusiastic congratulations of his associates and friends following his notification by the Secretary of the American Board of Oral Surgery that he has successfully passed the examination to qualify as a Diplomate of that Board. The examination was held Oct. 5 at New Orleans.

Since July 1951, Cdr. Blackstone has been Chief of the Oral Surgery service at the Naval Dental School, NNMC, and a member of the teaching staff.

In addition to his professional work at NDS, Cdr. Blackstone serves as Chairman of the NNMC Physical Training and Athletic Board of the NNMC Recreation Council, and of the NNMC Golf Committee. He is a member of the American Dental Association, and of the Middle Atlantic Society of Oral Surgeons.

Staff and Patients Of Marine Corps Celebrate 177th Year

Members of the U.S. Marine Corps attached to NNMC (staff and patients) will mark the 177th anniversary of the founding of their Corps with a cake-cutting ceremony on T-18 this morning and a dance this evening at Coral Hills, Md.

From 30 to 40 Marine patients are expected on T-18 this morning for the ceremony.

Tonight, all Marine personnel and their guests are invited to attend the Marine Corps Birthday Ball at Coral Hills Hall, Coral Hills, Md. The orchestra of Tiny Meeker will play from 2100 until 0100.

Col. K. B. Chappell, CO, Marine Barracks, Naval Gun Factory, will cut the birthday cake at the dance.

For further information about the dance, consult the bulletin board outside the Marine Casual Office, ward 101.

Dear Folks: I'm in The Movies Again

Dust off your autograph book — NNMC has made the movies again. When the cameras began to grind last Thursday the spotlight was focused on the Waves.

Titled "Waves at Work," the Navy training color film will depict Waves working in 25 of the 27 rates for which they may now strike.

To be released next spring, the movie will be used for instruction purposes at Waves Recruit Training at Bainbridge as well as throughout the Nation to stimulate recruiting.

Unlike "The Navy Nurse," NNMC's most recent movie venture, "Waves at Work" will use no professional actresses. Approximately 25 Hospital and Dental Corps Waves here will find the camera peaking over their shoulders this week as they perform their regular duties.

The movie will include scenes from air stations, hospitals, receiving stations, and supply depots throughout the U.S.

Lt. Cdr. Mary K. Bonds, USN, of the Training Division, BuPers, is technical advisor for the project and will accompany the production crew to the West Coast at the end of this month.

Author of the script, Lt. Kay Atwood, USN, on duty at the Navy Photographic Center, Anacostia, is also assisting with the filming. Mr. Ruddy Nelson, director, and Mr. Cliff Werlay, cameraman, both served in the Navy in World War II.

Have You Been Hospitalized Six Months? If So, You Should Apply for Free NSLI

Servicemen hospitalized for six consecutive months or more can file for a rebate of their National Service Life Insurance premiums, provided they had been paying premiums at the time of their hospitalization. Servicemen who have been receiving medical treatment for six months consecutively can file a waiver of premiums and receive from Veterans Administration cash returns for the premiums they paid during that period.

Jobless Vets Must Meet Requirements For \$26 Weekly Pay

Washington (AFPS) — Conditions which a veteran must meet to qualify for unemployment compensation have been listed by the Veterans Administration.

(The K-Vet Bill entitles eligible veterans to an unemployment allowance of \$26 a week for a total of 26 weeks, or until \$676 has been paid.)

1. You must file a claim and register for work at a local employment office in the state where you live.

2. You must meet the conditions of your particular state unemployment compensation law. These generally include:

a) You must continue to report at your local employment office; b) you must be unemployed; c) you must be able to work; d) you must be available for work; e) you must not quit your job voluntarily without good cause; f) you must not have been discharged for misconduct; g) you must not have refused a suitable job without good cause, and h) your unemployment must not be due to a stoppage of work caused by a labor dispute.

The VA said that 1,112,000 veterans were discharged between July, 1950, and August, 1952. These veterans as well as veterans to be discharged in the future are eligible for all benefits, if they qualify, under the K-Vet Bill.

Three Days Left in Red Feather Drive As Chairmen, Keymen Conduct Re-Survey

The NNMC Community Chest campaign for 1953 is still considerably below the 1952 mark (1952: \$4,915.63; 1953 to date: \$4,364.94), according to NNMC Notice 5700 of Oct. 30.

The number of contributors indicates that approximately 800 members of the civil and military staffs of NNMC commands had made no contribution as of Oct. 30.

In order that division chairmen and keymen may have sufficient time in which to conduct a re-survey of contributors, the campaign has been extended to Nov. 13.

END OF REPORTING PERIOD THREE Oct. 29, 1952

Autumn Reverie

Isn't the autumn season a lovely time of year?
Things are so colorful, though wintertime is near.
As I gaze here from my window, down below upon the lawn
The scene unfurls before me like a grand and glorious dawn.
The trees are garbed in crimson hue,
Orange, and yellow, and russet, too.
Some leaves have fallen, others yet green
Add to this beauty their velvetlike sheen.
I adore the autumn season, in its beautiful dress,
But it saddens me a little bit, nevertheless;
For winter is in the offing, just waiting to descend
And to this wondrous beauty happily put an end.
But winter can be beautiful, I will not this gainsay,
For it paints a picture, too, in its inimitable way.
Winter brings its blessings, too, along with ice and snow,
For then is the Christmas season, and a new year begins to show.

EPILOGUE

Life is like this picture; it has its beauty, too.
"Autumn" comes in glory, and "winter" will come, 'tis true
"Thanksgiving" will follow "Halloween," with happiness and cheer,
And after that comes "Christmas" and then the great "New Year."
—MILDRED HYNES, NMRI

The Chaplain's Corner

Where to Find Happiness

by Chaplain Ambrose T. McGinnity

People are inclined to be swayed by their inclinations rather than by their minds. There is proof of this in the persistence of mankind to seek happiness in the many things which experience testifies have never produced it.

After thousands of years, man, it seems, should have learned both what genuine happiness is and by what avenues it is reached. Philosophers of all ages have uniformly taught that there exists in the heart of every human creature an irresistible longing for happiness. There are few normal people who will not subscribe to such teaching. But when the definite answer is sought to the question "What makes for true felicity?" philosophers differ accordingly as they are spiritually-minded or materially-minded men.

Happiness cannot consist in the mere thrill which young men and women derive from their dreams, or from entertainment, or pleasure trips, or from the bottle, or from all-night celebrations. Other things on which the average person depends for more permanent gratification, such as money and fame, are commonly associated with grief, worry and disappointment. Such has been their history through the ages, but the lesson is never learned.

A certain wealthy Florida gentleman whose dream was financial independence from his thirteenth year on, achieved what he longed for, only to find that his children had different notions from his concerning what made happiness and contentment. They cared not for his palatial home in the north for the summer, and, when older, left him alone in his beautiful southern mansion to achieve their own interests having failed in the business their father had established for them.

After many trials he learned money could not buy happiness. Fortunately his reverses had the effect of withdrawing his mind from the things of the world and to fasten it on God, the source and end of all happiness. The industrial depression of the thirties had a similar effect on thousands of persons. They came to regard their loss of fortune as a blessing in disguise.

Well does St. Paul say that "the sensual man perceives not these things which are of the spirit of God." Since the generality of persons has always been and is sensual-minded and materialistic, the way to supreme happiness is still undiscovered. True happiness is found only in the love of God.

Suggestion Awards For Civ. Employees Are Based on Saving

Have you ever wondered how a beneficial suggestion is chosen and awarded?

When a suggestion is received from a civilian employee it is given a number and an acknowledgment is sent to the suggester.

The Beneficial Suggestion Committee, a processing group and not an adopting committee, presents the suggestion to the various divisions for consideration.

It is not the committee, but the shops or offices directly concerned with the suggestion, which evaluate and either pass or reject the idea.

If the suggestion is adopted, the division using the idea estimates the savings to be realized. The committee meets and recommends an appropriate award.

Awards are based, generally, on the savings in the first year of use. Awards, however, are also allotted for suggestions on safety, morale-building and other benefits not measurable in dollars and cents.

It has happened that a suggestion cannot be adopted without the approval of a bureau of the Navy Department. If so, it is sent there for consideration.

Other times an idea adopted locally and awarded is used by other agencies. In these cases, further awards are possible.

All that is necessary from the suggester is a clear description of the idea. The Suggestion Committee in the Civilian Personnel Division will translate the ideas into realities.

Pointed Pearls

Digging up the dirt of a person's past may destroy the flower of the present and the fruit of the future.

A successful man is one who earns more than his wife can spend.
A successful woman is one who can find that man.

Just as steel needs scrap iron, so does the world need its lowliest worker.

Congregation Beth El of Montgomery County will hold services every Friday night at 8:30 P.M. and Saturday morning at 10:00 A.M. in the Pook's Hill Auditorium, 3 Pook's Hill Rd. The services will be conducted by Rabbi Martin Kessler.

The services of Rabbi Harry Kaufman, representing the Jewish Welfare Board, are available to all Jewish Personnel and Patients at the National Naval Medical Center. Rabbi Kaufman may be reached by calling the Chaplain's Office, Ext. 324, or by call direct—Office: RA. 5371—Home: GE. 0755.

Classical and Popular Program of Music Bill of Fare Tonight in NMMC Auditorium

WASHINGTON OPERA GUILD CHORUS which will be on the stage tonight at 1930: First row—Marion Caron, Emma Massa, Kathleen Clardy, Nettie Andrews, Donis Conn, Lillian Geyster, Jane May, Fleming, Winfred Butcher and Clyde Brantley. Second row—Charles Koepf, Robert Crockett, Jimmie Smith, Ben Gruber, Max Horn, William Pruett, Ray Wallace, Martin Carr, Donald Bell, Roy Parrish, Kathleen Clardy and Roy Parrish are on active duty with the Navy.

Making its third appearance in the NMMC auditorium, the Washington Opera Chorus, directed by Miss Dorothy Remington, will present a concert tonight, Nov. 10, at 1930. The program will consist of both classical and popular numbers which have been found to be favorites of service personnel.

The program will include selections from the works of the following composers: Leoncavallo, Verdi, Debussy, Romberg, Bizet, Reginald de Koven, Victor Herbert, Halevy, Boito, Revel, Hammerstein, Youmans, Gershwin and Gounod.

Tonight's entertainment will be

sponsored by the Disabled American Veterans, King Chapter of Washington, D. C. The program will be followed by refreshments and valuable door prizes for patients.

All staff, students and personnel are invited to attend.

November 11, 1952

No Force Applied

A man can finish 30 years of military service without taking a single one of the civilian-type courses offered by the Armed Forces. No one is going to force him to enroll in one, unless he needs basic elementary grade education. But if he is interested in continuing his education as to better his chances of promotion, improve his chances at the civilian job he wants after he leaves the Service, or just for his own satisfaction it will be worth his while at least to do a little figuring.

The first step in any planning done by the prospective student is to sit down with a pencil and paper and start taking stock. How many years of school did you finish in civilian life? Have you completed any in any of the technical schools in the Service? Done a lot of reading in any particular field? Learned much on a few particular subjects the hard way through experience?

After you have answered these questions, you know where you stand. Maybe you are convinced that you know more than the number of years you spent in civilian school indicates. If so, perhaps you will want to take one or more USAFI tests to find out your real educational level and get it on your record. These steps will determine the level at which you should begin work in your civilian-type education program.

Almost any course you could possibly want is available at little or no cost, but you have to decide what courses you want and what you like best. These are problems you can discuss with your Information and Education Officer. You can give her the answers to the questions you have asked yourself, plus some idea of the field of learning which you want to specialize.

You will find that your Information and Education Officer has worked with hundreds of problems similar to yours. She has detailed information on all the educational fields. In addition, she will be able to tell you about opportunities open only in your particular field of endeavor. She knows which fields are open and which are overcrowded. From these sources she will be able to get the facts needed to help you choose an education program tailored to fit your particular interests, ability, background and ambitions.

Your Information and Education Officer may be impressed with your potentialities and encourage you to continue your education. But she will not try to force you to do so. In the words of a couple of poets, it's all up to you, and you can take it or leave it.

Ed. note: Most of the above article is reproduced from the "Page" of Stray Shots, July 1952, a Fort Leavenworth publication.

NOVEMBER 10

Successful Completion of GED Tests Meets New Requirements for Ensign

The Bureau of Naval Personnel has announced that the first and second year USAFI college qualification tests are sufficient to meet the educational requirements for the new two-year college appointees as assigned in the Regular Navy (see story on page 1).

These tests, offered by the local Information and Education Office, are designed to provide an indication of the examinee's background and to determine whether he has attained, for military purposes, an educational level equal to first or second year college level.

The first year college General Educational Development test battery consists of four parts: Correctness and Effectiveness of Expression, Interpretation of Reading Materials in the Natural Sciences, Interpretation of Reading Materials in the Social Studies, and Interpretation of Literary Materials. If a mathematics test is desired, it may be given.

The test of correctness and effectiveness of expression consists of two main sections: one on spelling and the other consisting of those passages including some of the more serious errors found in student's writing.

In the other tests, a generalized knowledge about the fields and an ability to interpret and evaluate is important.

The test is multiple choice and the prerequisite is a high school diploma or the equivalent. There is no time limit for the tests and a percentile rank determined by testing thousands of first-year college students is given for each test. The 2CX test again is designed to determine if the examinee has attained, for military purposes, an educational level equal to or above second year college level.

The 2CX, a timed test, consists of sections covering the following general fields: current social problems, history, social studies (including economics, geography, sociology, and psychology), literature, science, fine arts (including drama and music); and mathematics (college algebra, analytic geometry, plane trigonometry, etc.). It is also a multiple-choice test and a satisfactory first year of college or its equivalent is necessary to take the test.

A final mark, numerical score percentile rank is given for the 2CX test. The examinee is informed that he has either passed or failed the test.

The local I and E Office stocks the first year college GED tests. The 2CX test must be ordered from the central agency. For further information see the local Education Officer in ward 102.

'It's All in Fun' Says Don Utescher

Don Utescher, HN, of the patients record office, penned this teasing sketch of one of his Civil Service co-workers. The office force, including Arlene Keener, were so amused they submitted it for publication.

From the four bulkheads (bulkheads, i.e., walls) of the patients record office, there reverberates the familiar call, "Arlene, telephone!" From behind a stack of dictionaries and clinical and survey board writeups, rises a woman of great energy, or size, which ever you prefer.

Arlene Keener is a Silly Service employee (silly, i.e., Civil) who at present is on the survey desk, which she mans. This is most unusual since Arlene is a woman.

Arlene, of course, is only one of the many Civil Service employees of the office, all of whom have a definite reason for working here, Arlene's being most obvious.

Her primary reason is to make money, which is understandable; another is to keep her eye on her husband, Chief Keener of the personnel office, which is again understandable.

Arlene's survey desk is sometimes mistaken for a desk at the Sixth Precinct, for from across the office comes the question, "What have you got on Smith?" Other times it sounds like a betting room for the races when we hear, "Ruth, this one is scratched."

Arlene's principal job, though, is to type, endorse, and handle all medical surveys and clinical boards of the hospital, which is really quite a difficult and trying task.

Arlene has the respect of the entire office, because of her greatness. It is difficult to determine here whether this greatness is of size or ability. However, the respect is the same in either case.

Throughout this personal essay, Arlene's large body has taken a lot of ribbing, but this was possible, only because her heart is even larger. Arlene's job is a big one, but she has always managed to stay a little bigger.

Say 'Cheese'

URING THE FILMING OF "THE NAVY NURSE," a scene was shot in the Central Dressing Room. Lt. Bertha M. Kirk and Robert E. Rion, M3, show the camera some of the duties of a Navy nurse and corpsman at a naval central supply.

NOVEMBER 10, 1952

"A SLIGHT BIT of tailoring is always involved when I buy new clothes," says George Kfoury.

All Jests on Height Heard by 5-foot Doc

"How can a little guy like you drive such a big car?" is the question often hurled at George J. Kfoury, HN, X-ray student, as he steps out of his brother's '50 Buick.

And the words "little guy" are rather descriptive in George's case, for although he is 21, and does weight 125 pounds, he is only five feet tall—the minimum for entering the Navy.

Such a slight stature has its disadvantages — people constantly stare, bartenders are justifiably skeptical, and would-be jesters are seemingly unaware that there is hardly a joke to be made about the matter which George has not heard before.

'Course there's the other side of the ledger too, and such things as being excused from boot camp drill or being sent on the coffee run while the others hold field day are not to be scoffed at.

Strangely enough, "It was my eyes that gave me the trouble," says George, who had anticipated a snag in his enlistment because of his size.

After a little difficulty, he was accepted and proceeded to boot camp and then corps school at Bainbridge. He arrived here this August from Chelsea where he had worked in SOQ and the mail and file room.

George was born in Laurence, Mass. where he graduated from high school and then worked three and one half years for the local A & P store. He is not such a small fellow at home as his "Mom" is only 4 feet 10 inches and his sister is 4 feet 11 3/4 inches. However, his father is 5 feet 10 inches.

Aside from baseball (he used to play outfield on a sand lot team), George likes to spend his spare time collecting Glenn Miller and Artie Shaw records or taking pictures.

The instructor was giving a lecture on parachute jumping and concluded: "And if it doesn't open up, men, that's what is known as jumping to a conclusion . . ."

When a fellow breaks a date, he usually has to.
When a girl breaks a date, she usually has two.

Ensign Commission, Marriage, Orders Leave Center Command Ex-HM1 'Shook'

"Talk about being shook—" drawled Paul P. Bennett Jr., HM1, from behind his desk in the Center Command personnel office last week. "Everything happened at once!" Meanwhile, down in the Pentagon, Miss Mary Klonoski, who works for the Air Force, was pondering over the fact that she became engaged to a young first class and was now to wed an ensign on Nov. 8.

Six Equals Eight; Fourteen for Twelve

No more does the future O.R. Tech end his period of training as a mere uni-specialized Operating Room Technician nor is the Lab graduate permitted to know simply laboratory routines.

It has been decreed by powers from above that hence all O.R. Techs will have a bonus gift of two additional months of Tissue Bank procedures added to the now six months O.R. course.

The lab technician, instead of perspiring through a short 12 months of school, has been blessed with an additional two months to fully learn the problems of blood bank.

Previously these banks, tissue and blood, trained separate technicians, but because of the increased demand for technicians in these fields, all corpsmen entering the lab or O.R. schools will be trained in these specialties.

Floribunda Flowers Flourish Festively

No, gold hasn't been discovered at NNMC but the shovels digging on the two sides of NNMC could be searching for a rainbow.

In these two areas permanent beds are being prepared for nearly 6,000 rose bushes (hybrid teas) that are expected to last for 15 years.

These bushes and the new Floribunda rose bushes being laid near the flag pole, open the new beautification plan for NNMC's grounds. It is expected that this program will cover a span of 20 years.

Mr. G. M. Stant, the originator of the program, is NNMC's new landscape architect. Before being permanently stationed at NNMC, Mr. Stant was utilized by the Bureau of Medicine and Surgery as a naval hospital landscape consultant, and planned similar programs for hospitals at Annapolis, St. Albans, Houston, and others.

Navy Plans to Boost 1,700 1st Class to CPO

(A F P S) — Approximately 1,700 first class petty officers will be boosted to acting CPO in December, the Navy announces.

The 1,700 men will be a part of the 2,800 who passed the CPO exam held last January, but who were not promoted because of budgetary and pay grade limitations.

The new advancements will be made strictly according to multiple standings, the Navy said. Both regular and reserve personnel are on the list.

Remaining men who passed the examination but are not in the December promotion group will have to compete for the rate again in February.

'Just Tain't Right'

Korea (AFPS)—"Hey, Skipper, they're shooting at us!" the young Marine lieutenant cried into his radio microphone as Red anti-aircraft fire burst about him on his first bombing mission over North Korea.

"That's all right, son," answered his flight commander, Lt. Col. Darrell D. Irwin. "They're allowed to."

TAKING A LOOK at the new Armed Forces pay chart, Paul P. Bennett, HM1, checks to see what effect his promotion to Ensign, MSC, will have on his budget.

Nov. 3 (his date of rank is Oct. 13), and was transferred to Hospital Command.

You couldn't blame him for being a little excited over the events of the last few weeks, but a glance at his service record reveals that his entire Navy career thus far has been an eventful one.

Enlisting in June, 1947, he sewed on his first class stripes in October, 1950—three years and 12 days later! This June, Bennett graduated top man in a class of 117 from the MAT-4 Class at NSHA.

Speaking of NSHA, he considers his training there largely responsible for his passing the three days of exams for his commission.

Aside from his Navy studies, "Benny," as his friends call him, has been hitting the books in his spare time, too. Receiving 24 college units for passing the first year GED test, he has since accumulated the equivalent of three years college via night school and correspondence courses.

It hasn't been all studying, as the brown-eyed, five-foot-ten-and-one-half Southerner is very fond of sports. He leaned toward football and basketball in his high school days in South Carolina, but this summer he served as manager, coach and catcher for the Center Command nine.

Performing equally as well beside the plate as behind it, "Benny" turned in a batting average of .346.

MSTS Charges for Cars

Service personnel who wish to ship their private automobiles to overseas stations on a "space available" basis on Military Sea Transport Service vessels will now be charged according to the weight of their car.

Typical charges for shipping, computed on a "measurement ton" basis for the average vehicle, are as follows: East Coast ports to Europe, \$266.25; East Coast to Japan, \$465; California ports to Japan, \$294.50; and California ports to Alaska, \$210.

In addition, there is a port handling charge of about \$29 per auto.

Diaper Technician on T-5 Nursery Ward Is the Divine Sarah Vaughn's Top Fan

"Sarah Vaughn sings, other vocalists merely accompany," is HN Jim Lane's impression of today's vocalists. This tower five night corpsman, a native of Memphis, Tenn., believes, too, in supporting his contention.

In his locker in Building 115, this diaper specialist from the nursery ward has over 80 records by one vocalist—naturally, the divine Sarah. His favorite: "I Love the Guy."

Jim's musical training, however, has not been in the progressive field, but rather the semi-classical. In high school (St. Augustine) Jim was a member of a choral group of 40 that specialized in operettas and oratorios rather than progressive jazz and other popular works.

During his four years at this Franciscan high school, Lane sang and partly acted the Belle of Bagdad, the Gypsy Troubadour, Peter Gynt's Suite, and the oratorios Elijah and St. Paul.

Jim also managed to find time to sing in the church choir and play two years of basketball at the 500-student academy, and become vice-president of the senior class.

The high school graduate chose Roosevelt College in the Windy City for his next alma mater. There in Chicago, living at the YMCA,

Lane spent two years majoring in liberal arts for pharmacy.

However, like many others, Jim saw the shadow of Uncle Sam one summer day and soon after enlisted in the Navy.

The new corpsman soon learned that the Navy is not all "ships, and war, and times ashore." At present "diapers and pins, and baby whims" would be closer to the

James Lane, HN truth. On tower five, the nursery, Jim is learning the ins and outs of the diaper trade.

After his present enlistment, he would like to finish his education but with a change of major to sociology. Singing? That is continuing here at NNM in the Catholic choir.

Tommy Tucker Band And Blue Serenaders Supply Wave Music

When the Waves offer music at a party, mere amateur talent isn't permissible. The musical offering for the recent Halloween party consisted of a former member of Tommy Tucker's band playing the accordion and the piano, and on the trumpet was an ex-maestro of a band engaged by the St. Regis in New York. And all this was free!

To acquaint the locals with a new musical aggregate at NNM, two NDS prosthetics students, Charles Keller and Lamar Gabel, volunteered to play at the dance held at the CPO Club. Three hours of trumpet, accordion and piano renditions of polkas to symphonic arrangements followed.

The brass section of the NDS musical duet, Chuck Keller, DN, was the maestro of the Chuck Keller and Blue Serenaders group who had a long engagement at the St. Regis in New York. Chuck also played trumpet with the Russ Morgan and Bobby Sherwood bands.

Playing accordion and piano was "Doc" Gabel, an Air Force student here for Prosthetics School. Instrumentalizing for 23 years, Tommy Tucker's bandstand was Doc's duty station before answering the call of the wild blue yonder.

Know the Benefits Offered Dependents Such as Allotments, Transportation

(Editor's Note: The following article, fifth of a series, is designed to inform servicemen and women in their personal affairs so that relatives and dependents will be spared unnecessary hardship in time of emergency. Information for the series was condensed from Armed Forces Talk 410 entitled "Your Personal Affairs.")

(AFPS)—How do the Armed Services help you and your dependents?

Allotments: The Dependents Act of 1950 provides for a monthly Class "Q" allotment for eligible dependents of enlisted personnel. Class "Q" allotment represents the sum of a serviceman's basic allowance quarters plus a stipulated deduction from his basic pay.

A Class "E" allotment (known in the Navy by various special letter designations) is a voluntary allotment. It generally may be made to:

- (1) banks or individuals for savings or for support of dependents;
- (2) commercial life insurance companies for payment of premiums of insurance on the life of the allottee;
- (3) certain relief societies of the Armed Forces; and
- (4) postal savings accounts.

A Class "B" allotment is an allotment made for the purchase of U.S. Savings Bonds.

Enlisted personnel may, as a rule, allot all or any part of their basic pay for Class "E" or "B" allotments except:

- (1) the amount being deducted for a Class "Q" allotment,
- (2) the amount required to be withheld for Federal Income Tax, and
- (3) \$10.

Transportation of Dependents: Dependents of commissioned and warrant officers and certain enlisted persons are entitled to transpor-

tation at government expense when ordered to make a permanent change of station.

Exceptions to this ruling are listed members of pay grade N-1 with less than seven years of service, and personnel holding grade of E-3, E-2, or E-1. Members assigned to a school installation as students if course of instruction is less than 12 weeks' duration.

When military members, regardless of grade, die while on active duty, are injured, missing for a period of 30 days or more, interned in a neutral country, or captured, beleaguered or besieged by enemy forces, their dependents may apply for movement to permanent residence.

Your dependents should consult the local Navy supply or disbursing officer before planning such a move.

If you are ordered to an overseas station and your dependents are not authorized to travel with you at the same time, your dependents may be transported at government expense to any place in the United States that you designate.

NNMC Street Names Honor Former Surgeons General and Medical Department Medal of Honor Men

Bow low and say a short prayer for the timely demise of the practice of directing someone at NNMC by "turn left at the next crossroad, follow it for two blocks and turn right."

The Commanding Officer of NNMC has directed that the streets and roads of NNMC shall be assigned names. The streets will be named in honor of former Surgeons General of the Navy, and Medical Department personnel killed in action who were awarded the Medal of Honor posthumously.

The Surgeons General whose names were selected are:

WOOD, William Maxwell—first Surgeon General of the Navy (1869-1871).

FOLTZ, Jonathan M.—second Surgeon General of the Navy (1871-1872).

PALMER, Joseph C.—third Surgeon General of the Navy (1872-1873).

BEALE, Joseph—fourth Surgeon General of the Navy (1873-1877).

GRIER, William—fifth Surgeon General of the Navy (1877-1878).

TAYLOR, J. Winthrop—sixth Surgeon General of the Navy (1878-1879).

WALE, Phillip S.—seventh Surgeon General of the Navy (1879-1884).

GUNNELL, Francis M.—eighth Surgeon General of the Navy (1884-1888).

BROWNE, John M.—ninth Surgeon General of the Navy (1888-1893).

TRYON, James R.—tenth Surgeon General of the Navy (1893-1897).

BATES, Newton L.—eleventh Surgeon General of the Navy (1897).

VAN REYPEN, William K.—twelfth Surgeon General of the Navy (1897-1902).

RIXEY, Presley M.—thirteenth

Surgeon General of the Navy (1902-1910).

STOKES, Charles F.—fourteenth Surgeon General of the Navy (1910-1914).

The Medal of Honor winners whose names were selected are:

OSBORNE, Lt. Weeden C., DE USN, killed in action with the Sixth Regiment Marines June 1918 at Chateau Thierry, France. Posthumously awarded the Distinguished Service Cross and the Navy Medal of Honor for extraordinary heroism under fire during the advance on Bouresches, France. He was the first commissioned officer of the U.S. Navy to meet death during land fighting overseas in the first World War.

HALYBURTON, William D., Jr., PhM2c, USNR, killed in action with the Fifth Marines, First Marine Division, at Okinawa on May 1945. Using his body as a shield, this second class pharmacist protected a wounded Marine until he himself sustained mortal wounds and collapsed.

WILLIAMS, Jack, PhM3c, USNR, killed in action with the 28th Marines, Fifth Marine Division, March 3, 1945 at Iwo Jima. Assisting a Marine on the field, Williams was struck four times by enemy fire. Unmindful of his own safety, he completed his ministrations before applying battle dressings to his own wounds. Disregarding his urgent need, he remained in the fire-swept area to care for another Marine casualty. He then endeavored to make his way to the rear in search of aid for himself but was struck down by a Japanese sniper bullet.

WILLIS, John H., PhM1c, USNR, killed in action with the 27th Marines, Fifth Marine Division, February 28, 1945 in Iwo Jima. While caring for Marine casualties, Willis wounded himself, Willis hurled back eight grenades thrown by the enemy until the ninth exploded in his hand and instantly killed him.

Women's Sports

NNMC Fem Cagers Continue Court Work

Tuesdays and Thursdays are set aside for sports activities by the women on the station. League volleyball and intramural bowling clashes fill up Tuesdays, and basketball and volleyball practices are held on Thursday nights.

Basketball

With a weekly turnout of about a dozen aspirants, the season promises to be a good one. However, missing in the lineup are two last year's stars, Nonnie Hawkins, last season's star guard who was discharged, and Maggie McQuarrie who is relegated to the status of rooster through illness.

At the Oct. 30 practice, Clara Bias, local sportswoman and basketball referee, demonstrated personal and technical fouls, plus a few pointers on what to expect called by the referee.

OFF THE FLOOR, Joyce Crouch and Barbara Bradford show assistant coach George Ashton the kind of action he can count on from the team when basketball league play begins in December.

Volleyball

Last two weeks saw the locals go down in two defeats, the first against Fort Myer and the latter from the Marines at Quantico. Tonight, with a record of 3 wins and 4 losses, they play Fort Meade Wacs at Meade. Next Tuesday is the home game against the team from Walter Reed.

Bowling

Intramural Bowling goes into its fifth week tomorrow night. After last week's match the Submarines were in top position with a 6-0 record. Tied for second were the

(Continued on Page 6, Col. 5)

ARMY-NAVY TICKETS

Special Services has applications available for tickets to the Army-Navy game. This game will be held in Philadelphia on Nov. 29. To obtain the forms, contact the Special Services Office in Bldg. 23, ext. 672.

Court Varsity Tangles with McNair In First '52-'53 Season Scrimmage

The varsity basketball squad held its first scrimmage in a tangle with the Ft. McNair team on Oct. 30 at Ft. McNair. As of last week, the team roster sported 18 names, representing men from four commands, including one NMS Air Force student.

Winning NDS Team Celebrates Victory

Members of the champion NDS Officers' softball team celebrated their victorious season and league championship at a luncheon in the Officers' Club on Tuesday, Oct. 21.

Perhaps the last double play of the season was completed when Ltjg. James Lyons, DC, USN, presented to Capt. R. W. Taylor, DC, USN, Commanding Officer of the Dental School, the team trophy which he had earlier received from R. Adm. B. Groesbeck Jr., CO, NNMC. (But don't press us too hard on that metaphor.)

Anyway, Capt. Taylor completed the play perfectly, and expressed his congratulations to the team members.

Later, each member of the team received special recognition in the form of an individual trophy. Lt. Lyons, who masterminded the team to victory, received the acclaim of his teammates, and a new contract for next year from the front office.

Three Local Bowlers Supervising Alleys

Three of the station's top notch bowlers have taken over supervision of the NNMC bowling alleys on their off-duty hours in an effort to promote bowling here.

The alleys will be supervised from 1630 to 2230 on weekdays, and from 1300 to 2200 on Saturdays, Sundays and holidays.

Free instructions will be given to anyone interested, and a good supply of bowling shoes is now available for rental at a very small charge. A snack bar has been added with sandwiches, soft drinks and hot dogs for sale.

Ready to serve you are HMC C. E. Brown, of NH, a member of last year's SUBPAC championship team; HMC E. F. Meitl, of NSHA, the individual star of the past season's varsity and intramural competition; and HMC J. E. O'Keefe, of NNMC, captain of last year's intramural champions.

O'Keefe Shows Textbook Form

DISPLAYING A TEXTBOOK DELIVERY, Joe O'Keefe of the CPO team jams through a top 179 on the night of Oct. 30th.

Sitting in second position for top CPO Team kegler is Joe O'Keefe, CMAA of Special Services.

With 10 years on the alley circuit, the CPO kegler sports an overall average of 175 and has been a frequent visitor in the "200" charmed circle.

In '51, the Center Command chief captained the intramural Naval Hospital team and rolled with the NNMC varsity for a final bowling mean of 175.

O'Keefe will also utilize his 10 years' alley experience in his new duties as bowling alley supervisor of the Special Services runways.

CPO Club, Lab 19 Tied for First in Gold, NDS Officers Lead by 2 in Blue League

Three weeks ago saw the opener of the 1951-52 intramural bowling journey with over 100 keggers in two leagues of nine teams competing for team trophies.

In the first few weeks of the 9-week match, Lab 19 and CPO Club (in the gold league), each with an 8-0 record, grabbed top peg, while Dental School Officers' 7-1 record placed them on the top rung in the blue league.

In the blue league, up until the 4th of November, three locals stood in the "200" charmed circle:

Colby with 233; Miller, 214, and Hobbs, 200. Meanwhile the "500" series welcomed Miller with 560, Ferguson, 533; Colby, 507, and Boonstra with a 513.

High averages in the blue league, captained by Meitl, include Miller again with the top 171, Colby grabbing 169, Hobbs 166, and Boonstra 165.

In the gold league, marking top averages is Ranes, league captain, with a 167, Klaes with a 160, Leadford with a 158, and Rampsch with a 157.

FPS Marks Bud Wilkinson of Sooners as Leading 'Coach of the Year' Contender

(AFPS)—It's a little early to be casting ballots for the football coach of the year, but when the December tallies are made Oklahoma's Bud Wilkinson will again be the leading contender. Bud's Sooner team is undefeated in six games this season and is seeking its fifth consecutive Big Seven title.

Since the former Minnesota quarterback came to Oklahoma in 1948, the Sooners have won 51, lost six and tied two. With a 10-year contract running until 1962 as head football coach and athletic director, the capable Bud has a chance of topping Knute Rockne's all-time winning mark of 105 victories, 12 losses and five ties (860).

Last year the Sooners finished 11th in the Associated Press poll and became the only college in the country to make the top ten the last four years, in a row. Oklahoma was voted fifth in 1948, second in 1949, first in 1950, and 10th in 1951. Using the hard-driving split-T formation, Oklahoma has also set a national record of 31 straight victories, an unbroken string of 26 consecutive Big Seven victories and five trips to the Sugar Bowl during Mr. W's tenure.

Grid material has been the least of Wilkinson's worries at Oklahoma, for they grow them big and high in the Prairie states. Since 1891 Sooners have been selected first All-American teams, among those stars enshrined at

Norman, Okla., are Jim Owens, Wade Walker, Buddy Jones, and Leon "Mule Train" Heath.

Games of the week:

East—Quantico meets Holy Cross (14-39), Navy rolls against Columbia (21-7), Army attempts to drop Pennsylvania (6-7) and the Princeton Tigers go to Yale (27-0).

Midwest—Wisconsin meets Indiana (6-0), Purdue clashes with Michigan, the Fighting Irish of Notre Dame try to trip Michigan State (0-35), and powerful Oklahoma leads off against Missouri (34-20).

South—Alabama greets Georgia Tech (7-27), Maryland greets Mississippi and Duke tries to undo last year's 19-13 defeat from Wake Forest.

Southwest and Rocky Mountains—Texas meets TCU (32-21), Rice kicks off to Texas A & M (28-13), and Denver goes to New Mexico (20-15).

Far West—Mighty Cal visited by Washington State (42-35), Santa Clara greets Utah, So. Cal takes to the field with Washington (20-13), and Stanford meets Oregon (27-20).

'If the Shoe Fits' It's Very Unusual For NH's Tiny Doc

by C. Connor

Dental Explorer

As most of you know by now, our own Dr. Blackstone has been notified by the Secretary of the American Board of Oral Surgery that he successfully passed the examination to qualify as a diplomate of that board. Congratulations from all of us, Dr. B.

Looks as if the girls have it this month in our Department. Dr. and Mrs. O'Malley have added another daughter to their fold. Her name? Why, Anne Patricia, and she arrived on Oct. 24. Dr. and Mrs. McBride also have a new daughter who they have named "Jac." She arrived on Oct. 25.

And just to be different and make Dr. O'Malley envious, R. L. Anderson announced that he was the proud papa of a bouncing baby boy who is named after his daddy. I quote Richard L. (Jr.)—"Babies and fathers are doing nicely."

Bldg. 122 announces that they have undergone many changes of late. For example: goodbyes were said to McCullough, Beller, Zwierski, who, I'm sure, are looking forward eagerly to that leave they're getting prior to reporting in to their new stations.

Sonner and Zaia are both back to duty after a spell on the sick list, so hurry up and come home. We miss you. Rogers is leaving to assume the duty in recreation and Heller reports to the clinic for duty.

Dr. Parker and Dr. Chapman have just completed a two weeks course at Ohio State University. Bet they got to see all those good football games too... We're all glad to see them again.

Latest members of our staff to salute the bridge are Ltjg. M. J. Calbeck, who is here for duty from Great Lakes; J. L. Maynard from Bainbridge; H. M. Ramsey, from Bainbridge. Also from Bainbridge we have M. D. Andresen, and from Brooklyn we have J. B. Neuwirth.

By the way, we now have three bowling teams in action. Our Staff Officers, Interns and Staff Enlisted Men have really started off with a bang.

Well that's it for this time, so smooth sailing to all hands from the GAL FROM THE HUB.

P.S.: By the way, Whiffen and Montpelier have also left us to go the way of all sailors; namely to sea. Good luck to our latest Sea Daddies.

Navy Belles

by George

We all had such a wonderful time at the Halloween Party on Oct. 27th that we are looking forward to more of them.

Now, with the holiday season coming, what do you know... everyone is thinking of others and their loved ones as they carry all sorts of funny shaped boxes into our house.

Nonnie Hawkins and Eleanor Furness have gone home to be housewives. Eleanor is holding open house for her friends in New York where she and Dick will live.

Louise Miller, our senior resident here, has gone with our best wishes to the Naval Air Station, San Diego. Jane Brown, Joan Madsen and Maggie McQuarrie packed their 60 pounds of luggage before taking off on a vacation hop to the West Coast.

Hammy is back counting rabbit ears while Salty takes over as our new house mother. Our bowling teams roll every Tuesday night; such bowling you never hope to see, but we have fun.

The basketball team has begun practicing... Ruth Woerlein with aching muscles, Josh Shook playing from her usual position on the floor, and Boots on guard for early accidents... and I? I remain the girl from the heart of Maryland.

NMRI

by R. Conaway

The main topic of conversation around the Institute for the past few weeks has been (a) plans for the NMRI Anniversary Parties and, since Oct. 20th and 26th when the parties were held, (b) talk about the goings on at said parties. Needless to say, both affairs were a huge success and all hands are looking forward to the next staff party.

If there had only been a talent scout in the audience, he would have found much talent among our NMRI staff. Vocal renditions by Capt. Willmon, Lt. Cdr. Weathersby, Lt. Sabbag and Jean Jones; piano solo by Opal Nowicki; Lt. Krasno on his educated violin; and Dr. Dropkin tooting his flute.

A certain doctor at the party was seen mixing beers. Didn't you know there might have been a chemical reaction, Doctor?

Heard someone telling Peggy Brock that it wasn't the twigs you trip over—but keep your eyes on those leaves. The dance floor was slick, Peg. Arriving just in time to attend our party was Roy Boning, HM1, from NavRecSta and Leo Tiernan, DT3, from NDS.

On our farewell lists are Lts. Callaway and DeLong and E. Elkins, HM3, released to inactive duty, and Phil Eldred, HM1, enroute to Sub. Base, Pearl Harbor.

Our most junior Chief couldn't spare 10 cc. of blood because he claims he always sweats his out on the job. Better take that comic book out of your hip pocket before you make statements like that, Chief!

I hear Phil Eldred has been having meat with his morning coffee. Are you sure it wasn't your pet grasshopper in the cup, Phil?

Say George, next time you flip your coat over your shoulder, make sure you hang on to your keys. It's too bad you were locked out of your room on Saturday night.

Hambone's latest theme song seems to be "If I had the Wings of an Angel," or is it "Coming in on a Wing and a Prayer?"

Hammy Brooks is back with us once more after a month spent as "Night Mother" at the barracks. Wonder if she learned to make those Greek meatballs there.

I hear the "spooks" were really out on Halloween night.

It was quite a shock when one of the Naval Hospital interns picked up the phone and heard a voice say, "This is corpsman so-and-so, speaking, SIR." Now, after four months of duty here, Dr. Myrick has become used to just such occurrences.

Being addressed as Sir is a new experience for many young officers, but it was an unexpected one for Ltjg. Patricia Myrick, MC, USNR, the only woman intern in the present class.

She has no trouble filling what is often considered a man's billet, but the lady doctor, who stands only five-feet-three inches, most assuredly has difficulties filling the intern jackets, surgical gowns, and rubber gloves which her duties require.

Presently assigned to the O.B.-Gyn. Service, Dr. Myrick will complete her internship here next summer and then serve one year more on active duty before going into private practice. She hopes to specialize in internal medicine.

A native of Lubbock, Tex., Dr. Myrick graduated from high school in Las Vegas, N.M., and then returned to her home town to take her pre-med at Texas Tech.

By attending summer classes, she managed to also earn her BA in the three years she was preparing for medical school.

Receiving her M.D. from Woman's Medical College of Pennsylvania on June 12th of this year, she signed up in the Reserves the same day and reported here for duty in July.

Having no former association with the Navy, she was thoroughly confused for a while by the Navy slang, saying, "I thought they'd speak English."

Maintaining her apartment in Bethesda occupies much of her spare time. For hobbies she lists horseback riding and oil painting, the latter centered on still life or portraits.

Design for Loving

THIS PHOTOGRAPH of model Gwenn Caldwell was originally taken to advertise silk hosiery. The advertiser, though, turned the picture down. Reason: Miss Caldwell possessed too many distracting charms to focus attention on her stockings.

Local Navy Tailor Arrives at NNMCM From 5½ Yrs. at Sea

Most people are aware of such abbreviations as CNO (Chief of Naval Operations), PO (Petty Officer) or ONI (Office of Naval Intelligence).

However, call a person an OER and immediately those within hearing suck in a quick breath and warn you to watch your language.

Charles R. Green, SH2

(OER simply means "other enlisted rates" than those of the medical and dental departments.)

Newest OER at NNMCM is Charles R. Green, SH2, the Navy tailor in the Exchange Tailor Shop.

A native of the Coyote State, South Dakota, the ships serviceman calls Custer home, a city of 7,000 people. Custer is located in the Black Hills, near Wind Cave National Park.

Joining the Navy in 1946, Green saw five-and-a-half years of sea duty before beginning his tour on shore here at NNMCM.

His first duty on the briny deep was with the Sea Bee Military Salvage Unit No. 6. This group traveled from island to island in the Pacific collecting and returning, by Victories and Liberties, the equipment left by the U.S. forces at the end of the last World War.

In the latter part of '47, Chuck was introduced to the Amphibious Forces aboard the 450-foot Landing Ship Dock Comstock. Aboard this LSD, he returned to the islands. Eniwetok Atoll was the destination where the LSD was used for the mobile boat pool for Operation Sandstone, the second experimental atomic bomb explosion in the Pacific.

An AVP, the USS Suisun, what many consider the best duty in the Navy afloat, was next. In Chinese waters at the onset of the Korean conflict, the Suisun was pressed into duty as a seaplane tender.

"One day out and six days in" sea duty was next for the well-salted ships serviceman aboard the USS Norton Sound, a guided missile ship operating out of Norfolk. Aboard, Green became acquainted with the tailor shop and added the second bar to his third class "crow."

While aboard, and after a total of five-and-a-half years in the rol-

Court, Field, Track In D. C. Sport Scene

In the District of Columbia, King Football still reigns, but basketball and racing shortly will demand part of the sports scene. Below is a rundown of the sports and games, high school, collegiate and professional, within distance of this station.

Friday, Nov. 14—Football, Georgetown vs. Davidson, Griffith Stadium, 2030.

Saturday, Nov. 15—Football, Georgetown vs. Columbia, Annapolis, 1400.

Sunday, Nov. 16—Football, Redskins vs. San Francisco 49ers, Griffith Stadium, 1400.

Monday, Nov. 17—Racing, Baltimore Thru December 6.

Sunday, Nov. 23—Football, Redskins vs. New York Giants, Griffith Stadium, 1400.

Wednesday, Nov. 26—Football, High School Championship, Griffith Stadium, 2030.

Thursday, Nov. 27—Football, Harvard University vs. Lincoln University, Griffith Stadium, 1300.

Sunday, Nov. 30—Football, Redskins vs. Cleveland Browns, Griffith Stadium, 1400.

Insurance

(Continued from Page 1) initial medical treatment.

Servicemen should continue paying premiums by allotment or direct to the VA insurance office and officially notified by registered mail of the approval of waived premiums for total disability benefits.

Discontinuance of allotments should be requested when properly notified.

For further information, contact Mr. Kelly, Contact Representative for the VA-Regional Office in Washington. Mr. Kelly is located in ward 102, ext. 617.

Women's Sports

(Continued from Page 5)

Cruisers and Minesweepers taking a 5-1 markup. The Carriers, with a 2-4, Battlewagons with a 2-7, Destroyers with a 4-5 and the Icebreakers with 0-6 followed.

High individual series tied with Chief Puffer and Miss Pett tied with 399. Taking high average is Miss Crowell with a 211. Carriers with a 633 are carrying high team game while Minesweepers with a 1720 hold high team series. With a smashing 172, Miss Hess, in a game three weeks ago, took individual high series.

This is the Army?

Trieste (AFPS)—Into the enlisted men's barracks of the U. S. Armed Forces here tiptoes an officer these mornings.

He draws back the blinds, gently awakens the soldiers—and serves them breakfast in bed.

It's all part of the Army's charities fund drive here. Every enlisted man who contributes \$3 gets breakfast in bed for a week.

Money is pouring in.

ling seas, Green called a halt and requested duty ashore, preferably in the PRNC area.

Note of Fifty-seven Million Elects Eisenhower As New President and Commander-in-Chief

President-elect Dwight D. Eisenhower

President and Commander-in-Chief-elect Dwight D. Eisenhower, an overwhelming choice of the American people, takes office in January. Eisenhower received more votes than any previous presidential candidate in United States history. The total vote was 57,516,390 of which the new President-elect received 326,042. The previous high in total votes cast was in 1940, 49,500,000.

His electoral vote (442) again is a record, the second highest compiled by a Republican. The all-time high was accumulated by Herbert Hoover in 1928.

He will be the 12th General to serve as President of the U. S. Other Generals were: George Washington, Franklin Pierce, Andrew Johnson, Rutherford B. Hayes, James A. Garfield, Chester A. Arthur, Benjamin Harrison, Andrew Jackson, William Henry Harrison, Zachary Taylor and Ulysses S. Grant.)

Eisenhower (62) is the oldest Republican and fourth oldest President ever elected to the White House.

Additionally, he is the first native of Texas to head the Nation's highest office.

Thanksgiving Dance

Don't forget the dance tonight. Thanksgiving is the theme and all enlisted staff and students are urged to come. Three-and-one-half hours of music will begin at 2030. The music will be furnished by the Navy Band of Washington.

Dress for the evening of fun in the local gym will be uniform or civilian dress (coat and tie) for the men and evening dresses optional for the women.

Two-Step, Two-Step Turn Away & Swing Walk, Pivot, Twirl

"Sets in Order" will be the order of the day at 2000 Monday, December 1, in the Gymnasium when square dancing will get underway at NNMC.

This will be a new venture for the Special Services Division to determine the stations' interest in square dancing, to create beginner interest and offer evenings of real active fun.

The Square Dance Association of Montgomery County, Inc. supports this new venture and will lend assistance in teaching beginners.

All enlisted staff, students and ambulatory patients are cordially invited to attend. Hostesses will not be invited, so all hands are urged to bring his or her partner.

Dress: Civilian clothes or liberty uniform optional. Dungarees will not be permitted.

A professional caller will be employed. Come out and enjoy a lively evening.

Reserve Consultants To Navy's BuMed Meet Here at NNMC

The Reserve Consultants to the Navy's Bureau of Medicine and Surgery met at 9:00 a.m., November 14, at the National Naval Medical Center (picture on page two). The board meeting brought to the Washington, D. C. area many of the nation's outstanding doctors.

The Reserve Consultants, who are appointed by the Surgeon General of the Navy, meet from time to time to advise the Surgeon General on matters pertaining to the Graduate Training Program of the Navy Medical Department which is designed to provide training for Navy physicians and dentists to meet the high professional standards set by the various American Boards.

At this meeting, in addition to the consideration of problems affecting professional training, the board reviewed specialty training programs and the status of consultants to Naval Hospitals and other advisory duties. Chairman of the meeting was Winchell McK. Craig, M.D., of the Mayo Clinic.

The consultants who attended the board meeting are: Doctors Joseph Barr (Orthopedics), Boston; F. J. Braceland (Psychiatry), Hartford, Conn.; Edwin N. Broyles (Otolaryngology), Baltimore; W. M. Craig (Neurosurgery), Rochester, Minn.; A. M. Culler (Ophthalmology), Columbus, Ohio; H. K. Gray (Surgery), Rochester; Donald Hale (Anesthesiology), Cleveland; G. M. Lyon (Pediatrics), Washington, D. C.; D. F. Lynch (Oral Surgery), Washington, D. C.; Alphonse McMahon (Internal Medicine), St. Louis; J. C. Sargent (Urology), Milwaukee; Marion Sulzberger (Dermatology), New York; B. J. Tenney (Obstetrics - Gynecology), Boston; Shields Warren (Pathology), Boston; and M. G. Westmoreland (Pathology) of Chicago.

Marines Use T-18 For Corps' Birthday

Marine Corps patients celebrated the 177th birthday of the Corps Monday, Nov. 10, on T-18 with the traditional cake-cutting ceremony.

Representing NNMC was the commanding and executive officer of the hospital, Capt. B. W. Hogan and T. G. Hays.

Marine Corps officers present were Brig. Gen. N. H. Nelson and Col. K. B. Chappell.

Before the cutting of the cake Brig. Gen. Nelson gave a brief talk on the history of the Marine Corps. In it he traced the spirit of the marines from their beginning 177 years ago by a Continental Congress resolution to the present day.

S/Sgt. David R. Evans, a patient on 3-C, was awarded a Bronze Star during the ceremony.

Emergency Cases Now Brought to NNMC By 'Copters from Air Evacuation Flights

A HELICOPTER LANDS AT NNMC in new Andrews Air Force Base-NNMC shuttle service for emergency patients.

As the rotors quieted, and the side hatch opened, the first patient carried by 'copter under a new shuttle system was taken aboard a NNMC ambulance and re-transported from fairway three near the main quarters to the admission room.

Since Nov. 12, emergency casualties arriving at Andrews Air Force Base on Air Evacuation Flights destined for NNMC, Walter Reed or Fort Belvoir hospital have been shuttled to the medical facilities by H-19A helicopters.

The aircraft are supplied by the 5th Air Rescue Squadron. The service is not intended to replace but supplement existing means of transportation.

The helicopters used, the H-19s, are a Sikorsky product and can carry a maximum of eight stretcher patients, four ambulatory or a gross load of 7,500 lbs. Unlike previous models, the H-19 is practically vibrationless and noted for smooth and sustained flights.

These models have already been

used in the Korean theatre transferring patients from battalion aid stations and regimental collecting points to rear-area hospitals.

The Army has extensive plans for the new craft. Medical Service units are being trained at Fort Sam Houston, Texas in 'copter evacuation and patient shuttle service. The first such units will be sent to battle areas. Later units, however, might be utilized as these are here, carrying patients from incoming points to medical facilities.

Aiding locally in the 'copter service are personnel from the Naval Hospital unit and ambulance crews. The Security Office supplies personnel for traffic safety and fire prevention.

Local Community Chest Drive Finishes With 2,371 Contributing to Red Feather

NMRI, with an average donation of nearly \$4.00, took top honors in the recent NNMC drive for Community Chest. The Naval Medical School was second in average contributions. Their average Red Feather donation was \$2.35.

The total amount received was \$4,797.22, 97.5 percent of last year's collection. The collection in 1951 tallied \$4,915.63 at the end of the drive.

The average donation at NNMC was \$2.02. A total of 2,371 contributed to the NNMC Community Chest.

FINAL COMMUNITY CHEST TOTALS November 13, 1952

Command	Total	Contributors	Avg.
NNMC	\$ 828.70	573	\$1.45
NH	2,025.78	1,011	2.00
NMS	465.10	198	2.31
NDS	390.70	232	1.68
NMRI	913.19	231	1.95
NSHA	173.75	126	1.38
	\$4,797.22	2,371	\$2.02

The 1951 Community Chest collection, NNMC \$4,915.63

The 1952 Community Chest collection, NNMC \$4,797.22, 97.5% of last year's total.

Two Receive \$30.00 By Being Idea-Alert

By keeping their eyes open, two civilians in the Food Service Division added a total of \$30.00 to their Christmas fund.

Miss Willie M. Tyler, a cook, was presented \$20 by Admiral Grosbeck for two beneficial suggestions. The first suggestion

was to place serving plates under the steam tables on the serving lines before leaving at night. By morning these plates would be warm for breakfast. Her second \$10.00 came from the idea of posting regulations and directions on machines in the Food Service Division for their maintenance and cleaning.

Mrs. Maggie P. Gaither, chief mess attendant, is wealthier by \$10.00 because of a suggestion to attach a metal strip on the walls behind the serving lines to avoid damage by dish carts.

Oakes and Guinn New NSHA Ensigns

NSHA'S NEW ENSIGNS are congratulated upon their new appointments by the commanding officer of NSHA, Cdr. M. E. Zimmerman. The ensigns are Harry A. Oakes (shaking hands with Cdr. Zimmerman) and John W. Guinn (insert).

Two NSHA instructors were among the 34 Hospital Corps personnel who recently received appointments to the grade of Ensign in the Medical Service Corps. They are Ensign John W. Guinn and Ensign Harry A. Oakes. Mr. Guinn had just recently been appointed War Officer, Hospital Corps.

Diaper Derby

Oct. 21—**Jacqueline Ann Carroll**, 7 lbs., 5 oz., new daughter of Jake R. Carroll, HM3, student, Radioisotope School, NMS.

Oct. 24—**Anne Patricia O'Malley**, 7 lbs., 8 oz., new daughter of Lt. John E. O'Malley, DC, USN, staff, NDS.

Oct. 25—**Jac McBride**, 5 lbs., 7 3/4 oz., new daughter of Lt. William D. McBride, DC, USNR, staff, NDS.

Oct. 30—**Richard Lawrence Anderson**, 8 lbs., 10 1/4 oz., new son of Richard Lawrence Anderson, DT3, staff, Prosthetic Lab, NDS.

Oct. 30—**Deborah Gill**, 5 lbs., 11 oz., new daughter of William G. Gill, HM1, staff, NMRI.

Nov. 1—**Paul Jan Bitely**, 6 lbs., 8 oz., new son of Earl "L" Bitely, HMC, staff, Chemistry Dept., NMS.

Lutheran Chorus

Next Sunday, Nov. 30, the National Lutheran Chorus of Washington will visit the NNMCM auditorium.

All staff and patients are invited to a musical program of Christmas sacred music. The chorus, 80 voices selected from the different Lutheran churches in Washington, is under the direction of Mr. R. E. Snedrud. The time: 1800.

BuMed's Consultants Meet Here

THE RESERVE CONSULTANTS TO THE BUREAU of Medicine and Surgery recently met at NNMCM (Story on Page one). At the meeting composed of both civilians and naval representatives, were: Capt. J. Wood, R. Adm. D. W. Ryan, R. Adm. L. O. Stone, R. Adm. B. Groeschel Jr., Dr. Winchell Craig, Chairman of the Board, R. Adm. L. Pugh, R. Adm. C. J. Brown, Capt. C. L. Andrews, and Capt. M. H. Porterfield. Second row: Drs. J. Barr, J. C. Sargent, B. J. Tenny, S. Warren and A. M. Cuthbert. Third row: Drs. F. J. Braceland, H. J. Gray, Capt. G. L. Parker, Dr. Lynch, E. L. Broyles, M. Sulzberger, G. Lyon, D. Hale, and M. G. W. moreland.

The Chaplain's Corner

Holiday Perspective

by Chaplain Newell V. Brink

Thanksgiving, like most holidays, had its foundation in religion. The unhappy fact is that like most of our holidays founded in religion it has lost its religious significance and is simply one more day which to do as one pleases. Certainly a holiday should be a time of rest and relaxation, but it should partake of the nature of its original intent and purpose lest too many people become like the woman on the city bus last Christmas. She saw a poster pleading, "Let's put God back into Christmas." She sneered, "Huh, even the churches are trying to muscle in on Christmas."

The story has often been told but bears retelling of a band of men and women who desired religious and governmental freedom. They went from England to Holland and thence sailed to the wilderness of present day New England to establish it. There they built what they wanted from woods and plains.

It was built, the average individual feels, by hard work. There has to be a motivation for hard work. Their motivation was the conviction that back of all life was God. He had created His children, has a plan for them in the world. They knew that He expected them to take Him as a partner and guide on matters governmental, material and personal. With these feelings they built the foundations wisely and well that we still use.

Even when they surveyed what had been accomplished they placed first things first and said, "This is good, but let us give thanks unto God." So mindful of their obligation they established the first Thanksgiving Day.

At Thanksgiving and at all times of the year when we examine our lives and our surroundings we find much that is good and worthwhile. To boast we did it unaided is vain and idle nothingness. Let us give thanks to Him from whom all power, tolerance, altruism and goodwill come. At Thanksgiving let us first give thanks to God and render continual and unceasing thanks all the year. There are still innumerable things collectively and in each personal life to be truly and gratefully thankful for.

Lightning Does Strike Twice!

Notice something missing? Blame the missing insert on a leave and a renal calculus.

Lightening did strike on our staff. Joan Madsen, the managing editor of the local news, first received leave.

The remaining makeup, rewrite, write and circulation staff, Wade Walker, the assistant editor, decided that this was a perfect opportunity to give birth to a kidney stone and was soon turned in on the sick list.

Result? A four-pager.

Next issue, however, (we hope) the presses will again roll full time instead of 2/3s as this issue.

Madsen and Walker

Congregation Beth El of Montgomery County will hold services every Friday night at 8:30 P.M. and Saturday morning at 10:00 A.M. in the Pook's Hill Auditorium, 3 Pook's Hill Rd. The services will be conducted by Rabbi Martin Kessler.

The services of Rabbi Harry Kaufman, representing the Jewish Welfare Board, are available to all Jewish Personnel and Patients at the National Naval Medical Center. Rabbi Kaufman may be reached by calling the Chaplain's Office, Ext. 324, or by call direct—Office RA. 5371—Home: GE. 0755.

VA Provides Medical and Dental Care Free to Eligible Veterans Since Korea

(Ex-servicemen and women of the Korean Conflict are entitled to many benefits which are not contained in the K-Vet Bill. Eligible veterans, for example, are entitled to medical and dental treatment at government expense. This article is extended to give the reader an idea of just what medical-type benefits a veteran is entitled to receive.)

Hospitalization: This benefit is worked on a priority system. First, those needing hospitalization because of injuries or diseases incurred or aggravated in the line of military duty since June 1950.

Second, those veterans with disabilities which are not connected with the Service. Personnel in this category must state under oath that they are unable to pay hospital charges elsewhere. These veterans must wait until a bed is available.

Korean veterans, who develop an active psychosis (mental illness) within two years from the date of their separation may be entitled to priority for such care as presumptive Service-connected cases.

Veterans requiring emergency medical treatment may be taken directly to the nearest VA hospital. If possible, the veteran should communicate with the VA beforehand.

Outpatient Medical Treatment: Veterans with Service-connected disabilities may receive treatment at VA outpatient clinics or from authorized private physicians. Each veteran's eligibility must be determined by the VA before treatment of this type can be authorized.

Necessary drugs prescribed by a physician authorized to give outpatient treatment to the veteran may be obtained from "hometown" druggists at government expense.

Outpatient Dental Treatment: Eligibility requirements here are the same as for outpatient medical treatment. The veteran's dental condition must be determined by VA as to have been incurred in, made worse by, the veteran's active service before treatment can be authorized.

Outpatient Treatment for Pre-Service-connected Disabilities: Treatment may be provided if the VA can determine whether the disabilities actually are Service-connected.

To be eligible for dental treatment under this category, a veteran must file his application 12 months prior to the date of his discharge or separation from active service.—(PS)

Leo A. Jackowski receives Ashford Award

Leo A. Jackowski Jr., MSC, of the Naval Medical Research Institute, was honored by the American Society of Tropical Medicine and Hygiene by being presented with the Bailey K. Ashford Award in Tropical Medicine at the meetings of the society on November 14 at Galveston, Texas.

This award was established in 1925 by the American Society of Tropical Medicine, with the cooperation of the Eli Lilly and Company.

The purpose is to encourage and give recognition to those who have made significant contributions to research and have demonstrated exceptional ability, independence of thought, and originality.

Dr. J. H. Carriers Now CVA

Washington (AFPS)—The Navy has changed the designation of 29 aircraft carriers to CVA—"aircraft carrier, attack."

The change in designation and ships ranging in size from 10,000 tons to the 59,000 ton Forrestal class.

Carriers currently listed as CVL and CV will come under the new designation, which classifies large carriers according to their function as elements of fast attack

groups.

Basketball Opens with Fort Myer Hqs.; Women's Submarines Lead in Bowling

The decks will be cleared for full-scale action when the NNMC Admiralties' 1952-1953 basketball team gets underway officially on Dec. 9 hitting the backboards against Ft. Myer's Hqs. Co. at Ft. Myer.

This year's roster includes some familiar faces from last year: "Al" Allen, Joyce Crouch, Mary Lou Cox, "Josh" Shook, "Boots" Carlson, Joan Madsen, Pat DuBerry, and Shirley Skinner. In addition, Leslie Evans, Edith Heinen, Ruth Worlein, "Barb" Bradford, and, from the nurses' corner, Mary A. Ellis and Alice L. Hubbard. Coach "Shorty" Edwards thinks his girls will make a pretty nice showing.

The women's volleyball team ended the season with a five win and four loss total by taking their last game from the gals from Walter Reed. It was also the last appearance of Miss B. J. Alexander, NC, a top member of the local eight.

The Submarines are in first place with an all win record in the women kegler's league. In second are the Minesweepers with a tight .777. The Cruisers with a .833 percentage had to drop out through a change in duty hours. Following are the Icebreakers (.500), the Destroyers (.416), and the Battlewagons (.166).

This Week's Game Is Navy versus Army

Games of the week:

Naturally NNMC News' game of the week is the Navy-Army (yes, Navy-Army) classic.

East—Army versus Navy (7-42), Holy Cross and Boston College (14-19), Brown and Colgate (14-32), Cornell and Penn (0-7) and, Fordham and NYU (41-0).

Midwest—Southern Cal at Notre Dame (12-19), and Oklahoma and Oklahoma A & M (41-6).

South—Alabama and Auburn (25-7), Georgia and Georgia Tech (6-48), William and Mary and Virginia (0-46), Wake forest and South Carolina (6-21), and VMI and VPI (20-7).

Southwest—Rice and Baylor (13-34), Tulsa and Texas Tech (21-14), TCU and SMU (13-2), plus Texas and Texas A & M (21-22).

Rocky Mountain (and Far West— Colorado and Colorado A & M (28-13), Utah and Utah State (28-20), Marquette and Pacific (27-39), plus Washington and Washington State (25-27).

New '51-53 Basketball Listing Schedules All MAISAC Teams Two Games Each Week

The 1952-53 MAISAC Inter-Service basketball schedule has been released. A game away with the Naval Air Station Anacostia on Dec. 2 will open the season for the local varsity while the first home game, the following Thursday, will be against the Receiving Station at Anacostia.

A total of 11 teams will meet the locals in the coming season. These teams, representing bases in the Maryland, Virginia and D. C. area, will versus in a double round robin with one at home and one game away for a total of 22 games.

However, with the Marine Barracks scheduling all their games away, locals will have a 12-game chance to see the NNMC team in action on the local court.

Games are scheduled for Tuesday and Thursday of each week. The season will begin Dec. 2 and end in the last week of February. At least a game a week will be played on the local boards.

Assistant Coach Epstein remarked that the big squad-nipping will not take place before Coach Sherin returns from school. Before the start of the season, the working crew must be leveled at about 15 men.

The schedule reads:

December 2	Away	Naval Air Station, Anacostia
December 4	Home	Naval Receiving Station, Anacostia
December 9	Away	Army Medical Center, Wash.
December 11	Home	Marine Barracks
December 16	Away	Vint Hill Farms, Va.
December 18	Home	Arlington Hall Station
January 6	Away	Fort Belvoir
January 8	Away	Naval Air Station, Patuxent
January 13	Home	Fort McNair
January 15	Away	Andrews Air Force Base
January 20	Home	1020th USAF, Fort Myer
January 22	Home	Naval Air Station, Anacostia
January 27	Away	Naval Receiving Station, Anacostia
January 29	Home	Army Medical Center, Wash.
February 3	Home	Marine Barracks
February 5	Home	Vint Hill Farms, Va.
February 10	Away	Arlington Hall Station
February 12	Home	Fort Belvoir
February 17	Home	Naval Air Station, Patuxent
February 19	Away	Fort McNair
February 24	Home	Andrews Air Force Base
February 26	Away	1020th USAF, Fort Myer

Epstein and DeVice; Starters on Varsity

Seven years of ball at high school and college backgrounds the varsity assistant coach's experience on the hardboards.

This playing coach, Norman Epstein, an NDS intern, grabbed his first hoop letter at Chelsea High,

Ltjg. Norman Epstein

a member of the Greater Boston Conference. This letter was joined by three more before finishing high school. He was also listed as one of the top five conference scorers in his final year.

Tufts College followed. This school is scheduled against such teams as LaCrosse, B.U., B.C., Amherst, Colby, etc. There the hook shot, fast breaking local grabbed three Ts between 1945 and 1948.

When talking on his favorite subject, this year's varsity, Norm remarked that "possibilities are very good except for a lack in the height department. An emphasis on teamwork and tight play is expected to overcome this."

Ep will be leaving NNMC about the middle of December. However, he expects to have eight games under his belt before departing.

Ron DeVice, HM3

Carrying a record of 21 tallies a game in last year's season, Ron DeVice, a Center Command HM3, will again be the player to watch in the coming season.

This fast, shifty guard, the remains of the 1951-52 varsity, marked near a third of the total points scored in last year's games.

A master of the long shot, Ron (Continued on Page 4)

NOTES AND QUOTES....

Dental Explorer

by C. Connor

"LIGHTS, CAMERA, ACTION" were quite familiar terms being echoed through our passageways recently when NDS was selected as one of the depts. for the filming of the movie "Waves At Work." Chief Peterson, L. Reynolds, C. Hailey, A. Schuricht and "Yours Truly" all had our little parts to portray, and we all found it to be loads of fun. We promise not to wear dark glasses either

Not to be outdone by the females of the species were R. Thibodeau, and D. Card, who also featured in the film Capt. Allen was lacking in only a director's chair; then the scene would really have looked "for real" so to speak And so we must return to our daily routines—why "Waves At Work" of course

Well Munroe is getting prepared to leave us for Bainbridge where he will attend DPT school. He made the statement that since he has been a member of our family for such a long time he almost feels as if he is leaving home again

Dr. Gallagher will be calling bldg. 1 the old country pretty soon, as he is doing annual physicals down in ward 135 (almost like overseas duty) but he is not alone as Ettleman is also holding down the fort amidst 88's and H4s. They are bearing up fine, "always smiling" must be the password there

By the way if any of you have noticed the oversized tooth on the front desk in bldg. 1 it might very well be named the "lend lease plan item of the month" as Mrs. Haslam has eyes for it too; consequently it spends half the day in 160 and the balance of the day on the info. desk Mr. Rockett plays referee during the bouts while Mae just sits and smiles.

I understand that Foster is quite a man in the coffee dept.; for particulars just speak to Chief Campbell.

Just found out that Makkie has a nickname of which I was unaware; it seems our own fireball pitcher whom Dr. Miller always called Lefty is now known as "Their Gal Friday" . . . many sad faces and forlorn expressions while Maggie was on leave in Seattle they should all be happy now so the cocker spaniel expressions have changed to that of the Cheshire cat type . . . Welcome home to our Gal Friday.

Chief Mitchell and Mr. Tanner are on TAD to Milwaukee, Wisconsin and what more interesting city could they visit then the home of you know what.

Anna was playing Queen for a Day recently when she very proudly displayed a 3rd class rating badge I might add she removed it quite reluctantly.

Jarboe, Cliff, Hendrickson, Shuff, Bell and Mackin and Demerest seem to be organizing some sort of club it seems every Friday they all get together and discuss something that causes quite a hilarious uproar amongst them.

Well that's it for this time around so till next time smooth sailing to all hands from the Gal From The Hub.

P.S. By the way just 31 days to Xmas there sure have been some peculiar looking packages coming in and out of our house lately all the bearers seem to be wearing that "Wonder where I can Hide It Look"

Navy Belles

by George

It was a sad day at our house when our little dog, Adm. Piddle, was hit by a car and died in the local dog hospital.

New girls aboard—Lorraine Mann from Corps School and Eleanor Jorden from Camp Lejeune on the rotation plan—both for Hospital Command.

Henrietta went shopping the other day in Silver Spring with a \$1.38 and stayed all day. How's that for stretching the Yankee dollar?

Hammy glowing because sailor is home from sea for a while . . . Lou is knitting argyles and the diamonds look like diamonds . . . Kathy planning the future reading requirements for going to school . . . Mary Lou has a new job and Tillie is our new house mother.

Volleyball they call it but it looked to me to be a game of table tennis took eight girls to play the game I watched. They beat Fort Meade two out of three. Great form. I sat on one side, cheering with one arm. The other was weighted with watches, rings, and bracelets belonging to the team. Looked like a walking pawn shop.

Allen joined the crowd of you know what by playing part of the game on the floor. After the game, Bradford gave a lesson in how to play marbles at the Fort Meade Wac's quarters.

Lesley is giving lessons in biology . . . Possie and some of the other Waves along with me are deep in the corps book.

Have you seen the diamond that "Didi" Frank is sporting around? When is the day? Don't forget the Thanksgiving Dance. See you around. The girl from the Heart of Maryland.

by R. Conaway

NMRI

A welcome aboard to J. T. Chandler, HMC, from the USS Kittiwake and to J. S. Mason, HMC, from Nav Med School.

Our congratulations to Lt. Leo Jachowski, MSC, USN, who was honored by the American Society of Tropical Medicine and Hygiene by being presented with the Bailey K. Ashford Award in Tropical Medicine at the meeting of the Society on November 14 at Galveston, Texas. This award was given to Mr. Jachowski primarily in recognition of his more recent work in American Samoa in the epidemiology and control of filariasis.

They say that Chief Gillmore's last fishing trip turned into a swimming party. You're supposed to reel the fish out of the water Chief; not jump in after them.

Gosh Clancey, it must be nice to have spare ten dollar bills for cab fare. And from Bethesda, too!

(Continued in Column 3)

Steaks, Trimmings Prize for Campaign

A STEAK DINNER was the prize for winning a Food Service Division Safety Contest. Joseph Black, a Food Service cook, leans back and enjoys a cigar after the meal.

A 2/3s reduction in accidents and no time lost through injuries during October in the Food Service Division can be traced to a campaign begun by Lt. T. V. Bonnell. Lt. Bonnell, Head of Food Services, recently conducted the campaign in the galley.

The watch with the least number of accidents in a month's period would be treated to a steak dinner prepared and served by the losing watch.

In the first month of the campaign, October, the accident rate dropped 2/3s of its previous total, from about 27 to 17. During this same month a total of 0 days were entered for accident lost time.

The winner in the first month was the straight watch. This group includes butchers, food preparers and cooks.

After being congratulated by Admiral Groesbeck and Capt. Hogan, this watch was served a steak dinner and trimmings by the other watch on at the time.

Ron DeVice

(Continued from Page 3)

delivered a percentage of 60% of these for points. This plus a driving type of ball and a clever game have made him a stumbling block for the cage-honor hopes of many teams.

Born in Bellevue, Ky., Ron went to school in Covington where he played the backboards four years. Villa Maddona College followed where he was a principal threat on the basketball sanctum for three-and-a-half years, ending with number two position for points scored. Ron also played pro ball with the Bellevue Vets in Newport, Ky.

JOHNNY PRESENTS cigarettes to a patient on 3-C. Receiving smokes from the famous Johnny of Phillip Morris on his recent visit here is John M. Ostrowski, HM3, a patient on 3-C.

Personnel Should Investigate Benefits; Includes Care, Money for Dependents

(Editor's Note: The following article, sixth of a series, is designed to inform servicemen and women in their personal affairs. Information for the series is condensed from Armed Forces Talk 410 titled "Your Personal Affairs.")

AFPS)—Many members of the Armed Forces do not take advantage of the benefits provided for them and their dependents. Besides claims and transportation privileges there are such benefits as:

Medical Care for Dependents:

This privilege is extended only when facilities and sufficient medical personnel are available. Authorization for this care is in the hands of the commander of the medical facility concerned, and application should be made to him in advance.

The government does not pay the expenses connected with transportation of dependents to an Armed Forces medical facility.

Six Month Death Gratuity: If you should die in line of duty, your wife (husband) or someone in your family proved to have been dependent upon you before your death is entitled to six month's pay.

This pay is equal to six times your monthly pay, including hazard pay, but not including allowances. The gratuity is not subject to

claims, civil or military debts.

Arrears of Pay: In the settlement of accounts of deceased personnel, where no demand is presented by a legal representative of the estate, the General Accounting Officer may allow the amount of pay and servicemen's savings deposits, if any, owed by the government to go to the deceased's estate (or widower) or legal heirs.

Burial: When a member of the Armed Forces dies, the widow, widower, minor children and some cases, unmarried adult children, are entitled to burial in a national cemetery in the same adjoining grave site.

Costs of a serviceman's burial and certain expenses connected with it, such as transportation of the remains, are paid by the government—up to certain limits.

The United States Navy Band

Requests the pleasure of your company

Notes and Quotes

(Continued from Column 1)

I hear that Jeff Hamby, better known as the "Candy Bar Kid," replaced Morrison as TV President of Barracks 142. "Don't drive around much any more."

If anyone should find a pair of trouser pockets lying around, notify Mr. Eades. I hear he was looking for some the other day.

Has anyone noticed how Red Davenport's eyes light up whenever he hears "Jingle Bells?" It must be the Christmas Spirit coming.

Speaking of spirits, do you have bad dreams? Do you wake up screaming? It must have been something you ate, Roy!

A certain First Class had best revise his "late for muster" card. Too many flat tires in one day. This also applies to the Third Class the MAA Force.

Famous last words: "I can't bowl tonight; my back is killing me. Result—a score of 146. You should have an aching back all the time, Roy."

Before an "SN" can carry packages for a certain "HN," he had best ask permission of a certain "HM3."

Chief Nelson was cigar-passing last week; the event, a new mystery of the week: Who were the two white-frosted gentlemen calmly playing a game of checkers in front of NMRI? When said game was over, they packed up their checker board, climbed into their car and nonchalantly drove off. I'll sign off with a word of caution: Watch that turkey next Thursday.

Kids Have 2 Shifts for Santa and Gifts At Children's Christmas Party Dec. 20

The annual Christmas Party held for dependent children under the age of 12 years, of members of the military staffs (including students) of NNMC commands, will be conducted in the NNMC auditorium Saturday afternoon, Dec. 20. (Please note that the date has been changed from the original announcement.)

The party will consist of two sessions beginning at 1300. Children whose surname begins with A to L inclusive are invited to attend the first session from 1300 to 1500. Children whose surname begins with M to Z inclusive are invited to attend the second session from 1500 to 1700.

Children must be in actual attendance and accompanied by a parent in order to receive a gift.

The NNMC party committee and Social Services Division are doing everything possible to make this year's Christmas Party an occasion which will be enjoyed by parents and children alike.

Color cartoons will be shown, and Santa Claus will be on hand with his helpers to distribute gifts to all children present.

All military personnel attached to NNMC commands who plan to attend the party should make sure their children's names are turned in to the member of the party committee representing their command.

NNMC Christmas Party Committee: Cdr. Vernon E. Martens, chairman, NMS; Cdr. Clifford A. Iverson, USNH; Lt. William G. St. NNMC; Lt. John E. O'Malley, S; Lt. James O. Atkinson, MC; Ltjg. Leonard L. Taylor, NRI; and Ltjg. James D. Kelly, HA.

Weekly Lecture for Separated Personnel Stress Benefits, Counseling, Rights

Beginning this Friday, Dec. 12, a weekly 30-minute lecture for all personnel, whose separation from the service is scheduled for the near future, will be held in Bldg. 102 at 1030 every Friday.

The lecture will present a brief survey of the rights, benefits and services of information and assistance available to veterans. Conducting the talks will be representatives from the Veterans Administration, Maryland Department of Employment Security, the American Red Cross, and naval social workers.

The lecture is not compulsory. Each separatee will receive an invitation to attend at least one week before discharge.

Assistance on matters relating to veterans' rights and benefits may be obtained after the lecture from Veterans Administration representative, Mr. Francis P. Kelly. Kelly can be reached every morning in Bldg. 102, Ext. 628. Appointments may be made with the representative of the U.S.

Tell it to Santa; He'll be Here Sat.

Attention all boys and girls (no age limit) who missed seeing Santa Claus on his Oct. 18 visit to the NNMC toy store! Santa is making a return visit on Saturday, Dec. 20 and is prepared to take all late Christmas requests.

Arriving at 0930 (one hour after the store opens) Santa will be on hand until 1630 with free candies and balloons for all deserving kiddies.

Navy Exchange officer, Lt. Paul Metcalf, announces that both the toy store and the main store in the basement will remain open until 1700 on Christmas Eve. This affords NNMC personnel 15 more shopping days before Christmas.

Open from 0830 to 1700, Monday through Saturday, the toy store offers a large selection of toys for children of all ages. Tricycles, bicycles, dolls, mechanical and plastic toys, paint sets, and a complete line of Lionel trains are a few of the items from which to choose.

Christmas tree decorations and lights are also available in the toy store. On the adult side, the Exchange offers many gifts in its main store as well as Christmas cards and wrapping paper.

The Navy Exchange will be closed for inventory on Dec. 25, 26, and 27. It will reopen Dec. 29 at 0830.

Four to Ten Days Are Being Granted For Holiday Leaves

Christmas and New Year holiday leave periods were announced in November. In NNMC Notice 1050, Adm. Groesbeck recommended that insofar as practicable all personnel (military and civilian) be granted one week's leave of absence during the period Dec. 22 to Jan. 5.

The notice also declared Thursday, Dec. 25, and Thursday, Jan. 1, as non-work days at NNMC, with holiday routine to be observed with due regard for necessary operational requirements.

NSHA is granting 10 days leave to cover both holidays. Other commands are splitting the holidays with NDS giving seven days leave; NNMC, NMRI and NMS granting six. NH is giving four days plus Christmas or New Year's liberty from 1000 Wednesday to Saturday morning for those not receiving leave.

USCG Sets Exams For Late February

New York (AFPS)—The Coast Guard has announced that its annual competitive examination for admission to the U.S. Coast Guard Academy, New London, Conn., will be held throughout the U.S. Feb. 24-25.

The examination will consist of English, mathematics, science, and a background and adaptability quiz.

Successful candidates will receive four years of instruction leading to a bachelor of science degree in marine engineering, and a commission as ensign in the regular Coast Guard.

Members of the Armed Forces who qualify will be honorably discharged for the purpose of entering the Coast Guard Academy.

To be eligible for appointment, a man must be between the ages of 17 and 22 and a high school graduate. Additional information can be obtained by writing The Commandant (PTP), U.S. Coast Guard, Washington 25, D. C. All applications should be filed by Jan. 1.

I.D. Cards Get New Look

(All Hands)—When you get your next I.D. card (Armed Forces Identification Card), you'll notice a slight change. In the small block marked "Grade," you will find printed either "Non-rated" or "Rated" or, if you're a chief petty officer, your rate.

This change has been made so that a new card does not have to be issued each time a Navyman advances a grade in rate.

Under the new system, you'll keep your original card until you become a PO3, then get a new one with the "Rated" notation on it, then hold this until you make chief. Then you'll get the works—your actual rate typewritten in.

Variety Shows, Dances, Parties Slated for Staff and Patients

NNMC GOES ON THE AIR on the night of Dec. 17 when a choral group sponsored by the American Red Cross is presented in the auditorium.

December's entertainment schedule is packed with Christmas shows, dances and parties for the staff and patients of NNMC. Other events are expected to be scheduled between now and Christmas and will be announced in the Daily Bulletin.

First on the present list is a return performance of the popular stage show, the Stardust Revue, appearing on Sunday, Dec. 14.

Edgar Bergen (and of course Charlie, Mortimer and friends) will arrive in the late afternoon of Dec. 15 with "Operation Santa Claus," distributing gifts and entertaining patients in the wards. It is hoped that Mr. Bergen's time will permit an auditorium performance.

Dec. 15 is also the date selected for the December enlisted staff and student dance with music again being furnished by a dance orchestra from the Navy Band of Washington.

"Mother" Clarke will visit the Medical Center on the 16th to distribute gifts to patients and donate her 36th pint of blood.

On Wednesday, Dec. 17, a choral concert will be presented in the auditorium. The group is sponsored by the National Headquarters of the American Red Cross.

This choral program will be recorded for later beaming over the Mutual Broadcasting System; Voice of America; and will reach the Armed Forces overseas through the

Armed Forces Radio Service. This will also be carried here on Channel C.

Dec. 20, staff and students are urged to bring their children for the Christmas Kiddies Party (see story in col. 1).

Kopp's Musical Varieties will bring another complete show to the NNMC stage on Dec. 21.

A program sponsored by the Bethesda Junior Chamber of Commerce, featuring the Bethesda High School orchestra and glee club, plus the Chevy Chase Chanters, is planned for Dec. 22 in the auditorium. It will be broadcast on Channel C.

Art Brown promises another of his variety shows sponsored by Station WWDC, on Tuesday, Dec. 23—this one with a Christmas theme. Ward patients may tune this in on Channel C.

The Red Cross announces that Santa Claus will make his regular Christmas Eve visit to Bks. 12. Bringing gifts and food, he will be accompanied by two entertainers from the American Theatre Wing. All corpsmen on the station are invited.

Date	Event	Time and Place
Dec. 14	Stardust Revue	Wards 1400-1600, Aud. 1800
Dec. 15	Enlisted Staff & Student Dance	Gym 2030-2400
Dec. 15	Edgar Bergen	Wards in afternoon
Dec. 16	"Mother" Clarke	Wards in afternoon
Dec. 17	Choral Concert	Auditorium 2000
Dec. 20	Christmas Kiddies Party	Auditorium 1300-1700
Dec. 21	Kopp's Musical Varieties	Wards afternoon; Aud. 1800
Dec. 22	Orchestra and Glee Club	Auditorium 1915
Dec. 23	Art Brown Show	Auditorium 2000
Dec. 24	Santa Claus	Bks. 12 1900-2200

Suspense

*The shades of night were falling fast, and the hour was drawing near.
Friend to friend was calling, in whispers loud and clear.
Slowly, at the appointed place, the crowd was congregating—
This is, indeed, a gruesome tale to you I am relating.*

*Faces were pale and weary; eyes were sunken and tired,
Though some had a look of expectancy, as if they were inspired.
There was some uneasiness in the ranks of the waiting throng.
Though minutes seemed like hours, it really was not so long.*

*Occasionally some individual would make a snide quotation
About life and liberty, et cetera, which brought forth no elation.
Some leaned wearily on the wall in the ever fading light;
The leader looked at his watch again. Egad! Could that be right?*

*Three minutes to go: would the time never come?
There was movement in the crowd: voices started to hum.
As the last one minute always seems the longest,
It was a trying time, even for the strongest.*

*A hush fell over the milling throng,
As they waited intently for the final gong.
Suddenly it came, and the crowd surged ahead.
The timeclock struck four-thirty—need any more be said?*
—MILDRED HYNES, NMRI

The Chaplain's Corner

The Season of Advent

by Chaplain David J. Kosky

The season of Advent which heralds in the feast of Christmas is a period of preparation for the coming of the Messiah, Emmanuel, Jesus, the Only Begotten Son of God.

As John the Baptist, the Precursor, prepared the minds and hearts of the people for the immediate public ministry of Christ, so does Advent dispose the present generation of mankind to receive Him as their Saviour and Redeemer. St. Paul tells us: "It is now the hour to rise from sleep."

We come awake throughout the weeks of Advent in a spiritual manner by acknowledging our sins, engendering a heartfelt sorrow for them, and at the same time fostering a heaven-reaching hope, as well as an unshakeable confidence in God's mercy.

It is well to recall during these Advent hours that we become co-operators with God in the work of our eternal salvation. Only through our willingness and cooperation can the Almighty God save us. Note well that we do not, cannot for that matter, save ourselves. Only God can save us. In other words we are saved through the mercy of God and by doing our part through the submission of our individual will to His Divine Will; by bending our wills to fit His Almighty designs. "Make ready the way of the Lord, make straight His paths."

It behooves us then to listen to God's promptings and to stir up in our souls the desire for eternal salvation by repenting of our sins, by amending our lives, by doing good and avoiding evil.

In the vein and along the lines of those crowds who listened to the Baptist as he preached the necessity of penance: "And the crowds asked him, saying, 'What then are we to do?' And he answered and said to them, 'Let him who has two tunics share with him who has none; and let him who has food do likewise.'"

"And there came to him publicans and they said to him, 'Master what are we to do?' But he said to them, 'Exact no more than what has been appointed you.' And the soldiers also asked him saying, 'And we—what are we to do?' And he said to them, 'Plunder no one, neither accuse anyone falsely, and be content with your pay.'"

Over and over again throughout these weeks we can pray: Stir up our hearts, O Lord, to prepare the ways of Thine only-begotten Son, that through His coming we may attain to serve Thee with purified minds. Amen.

Crew's Library Has New Autobiographies By 3 Famed People

Three new autobiographies, eagerly anticipated and long awaited by patients and staff, have now been added to the collection in Crew's Library.

Of greatest significance is **Fleet Admiral King: A Naval Record**, by Adm. Ernest J. King. This is the story of his boyhood, his early career and his 44 years of service with the Navy.

Special emphasis is placed on the four wartime years when he was the Commander of the largest naval force ever assembled in all the world's history, the U.S. Navy in World War II.

Another autobiography by a man who made history, but of a sort totally different in scale and scope, is **Panzer Leader**, written by General Heinz Guderian. General Guderian had a great impact on the course of World War II because, without him, Hitler might have met with defeat in his offensive drive in 1939-40.

It was the Panzer force, created and trained by Guderian, and led by him on the drive to the Channel Coast, that practically decided the issue in the battle of France.

The third autobiography is **Talulah** by the famous Bankhead of that name. She tells her life story with frankness and humor and indignantly she answers the colorful rumors about her private life and friendships.

Mechanical Questions Stressed for Draftees

A greater number of basic mechanical ability questions will be found in the new aptitude tests for volunteers and draftees according to the Defense Department.

The Defense Department announced that new tests will go into use Jan. 1. The new aptitude tests will include a greater number of questions to test mechanical ability. The passing grade of 70 will remain.

One aim of the test is to make it more difficult for a man to fail deliberately. There have been complaints that the former tests made it too easy for physically fit draftees to fail the former mental and schooling test.

Jewish

Congregation Beth El of Montgomery County will hold services every Friday night at 8:30 P.M. and Saturday morning at 10:00 A.M. in the Pook's Hill Auditorium, 3 Pook's Hill Rd. The services will be conducted by Rabbi Martin Kessler.

The services of Rabbi Harry Kaufman, representing the Jewish Welfare Board, are available to all Jewish Personnel and Patients at the National Naval Medical Center. Rabbi Kaufman may be reached by calling the Chaplain's Office, Ext. 324, or by call direct—Office: RA. 5371—Home: GE. 0755.

The Best Deal

At this season of the year the idea of giving is uppermost in our minds. This year it would be well if all of us considered the value of what we give . . . not in terms of cost, but rather in terms of long-range benefits. Certainly, from that standpoint, there can be no better gift than U.S. Defense Bonds.

Defense Bonds keep on giving. As the years pass, a gift of ten percent, double and triple what banks allow, is re-presented to the recipient nine years and eight months from Christmas, or if the purchaser desires an additional 10 years, the full benefits will make a truly wonderful gift.

Maybe you are worried about buying because of the recent newspaper articles attempting to give the impression that people are getting money on bonds bought 10 years ago. They are based on the theory that the purchasing power of the dollar for a matured bond today is only half as much today as the one invested 10 years ago.

The Army Chief of Finance, Maj. Gen. Bickford E. Sawyer, announced recently. "Periods of inflation and depression," the general said, "are with us from time to time, as is evidenced by the days of 1918 and 1932; but no security, year in and year out, has ever been provided by man which approaches bonds issued by the U.S. Government in safety of principal and negotiability."

Pointed Pearls

People who know it all, never get wise to themselves.

Most People lose their temper when they need them most.

Cowards often run into greater danger than that which they seek to avoid.

Ability has a way of finding opportunity.

One does not grow old by living; but only by losing interest in life.

You're only as good as your time at bat.

Medicine and Science

Powdered Skin Promises Burn Relief; Angled Flight Decks Increase Safety

Dried and powdered skin may be the next treatment for large burn areas.

At present the best way of covering large burns is patch-grafting. This method small pieces of skin are taken from unburned areas of the patient's body and are spaced at intervals on the burn. The skin then grows, eventually meeting each other and normal skin growing in the peripheral of the burned area.

However, according to Dr. Greiff, biologist of the St. Louis University, if living skin could be dusted over the burned area, the recovery process should be speeded considerably.

The skin would, by all indications, still have to come from the patient. Skin from others gives only temporary relief in present technique. The only exception to this is skin from identical twins.

The sprinkle-graft, as this new possibility is called, arose through developments in the storage of live tissues by the freeze-dry method. In this, human tissues are quick-frozen and dehydrated.

The doctor based his predictions on his own work in keeping a strain of the influenza virus by the freeze-dry method, without continued cold storage.

(AFPS)—An angled flight deck is being tested by the Navy on one of its aircraft carriers.

Additional triangular sections of flight deck are being fitted on the Essex class carrier, USS Antietam, which returned several months from Korean waters.

One section is being constructed at the bow on the port side and another section at the stern on the starboard side. The additional sections will permit pilots to make a diagonal landing aboard the carrier.

The main reason for the conversion, the Navy said, is for increased safety. As the size of jet planes landing aboard aircraft carriers increases, the presence of the operational superstructure that towers over the flight deck amidships becomes an increasing hazard. Plans for angling the deck would clear the superstructure with more room for the pilot.

An additional safety factor also would result by returning the pilot some of the control over his aircraft that is now placed in the hands of the landing deck officer who "waves in" planes.

Under present procedures the signal officer, observing an approach, has full authority on when to tell a landing pilot to "cut" his engine. With the new deck, a pilot will be permitted to judge more for himself when to complete his landing.

The conversion of the Antietam will cost approximately \$1,000,000 and add 34 feet to the width of the carrier's flight deck.

Re-employment Rights Belong to You If You Ask for Old Job Within 90 Days

Many of us will return to our old jobs upon leaving active military service. Many more will seek new positions. This article is aimed at those ex-servicemen and women who plan to return to their former employers. It deals with the law—the Selective Service Act of 1948 as amended—and the protection it affords all veterans who intend to return to their former jobs. The information following was written by Pfc. Herb Zucker, AFPS staff writer.

Re-employment Rights

You are guaranteed your old job upon leaving active military service if you apply for re-employment within 90 days after your separation.

This guarantee has certain conditions of eligibility: You must have been in the employ of a private employer or working for the U. S. government. (Employees who worked for a state are not covered by federal law.)

The job was other than a temporary position.

You have satisfactorily completed your period of active service.

Provides for Disabled Vets

You must still be qualified to perform the duties of your position. The law has made certain provisions for disabled veterans.)

You must apply within 90 days within one year if you have been hospitalized after your discharge or your employer's circumstances have not changed so as to make it impossible for you to be reinstated.

If you meet the conditions of eligibility you are entitled to these rights: You will be re-employed in your former position, or a position of like seniority, status, and pay.

You will be considered as having been on furlough or leave of absence from your old job during your time in Service. (Service time is added as time on the job when computing seniority.)

You will participate in insurance and other benefits in effect at the time you left.

You will not be discharged within one year without cause from the position to which you have been restored.

C. Dental Society ears NDS Clinics

Hints in Amalgam Work" was the subject of a clinic presented by Cdr. Robert Wolcott, DC, USN, at a meeting of the District of Columbia Dental Society in the Georgetown University Dental School on Tuesday, Dec. 2. Cdr. Wolcott's clinic was one of eight presented by the Society to provide dentists with useful techniques they can adopt in everyday practice. Dr. Wolcott heads the Operation Section of the Naval Dental School, and, in addition to the degree of DDS, holds the degrees of MS.

Dr. Wolcott was also in charge of eight table clinics presented by NDS interns at a meeting of the Western Maryland Dental Society in Silver Spring, Md., on Monday, Dec. 1. Clinics on various aspects of dental practice were presented by the following dental officers: Improved Silicate Cementing Technique—Ltjg. James Lyman; Rubber Dam Procedures—Ltjg. Thomas Chianese and Ltjg. Lavelle; Construction of a Retentive Mouthpiece—Ltjg. Har- Glasser; Marginal Fluid Perforation of Restorative Materials—Irving Garber; Hints for Bet- Amalgams—Ltjg. Philip Oen-; High Speed Operative Pro- cures—Ltjg. Dean Hausrath; Oc- al Equilibration—Ltjg. Norman tein; Fixed Bridge Connectors—Ltjg. Donald Cook; Endodontic cures—Ltjg. Daniel Graziano; Ltjg. Mark Mendelsohn; Dem- onstration of the Navy Facsimile and Blood Typing Aid—Ltjg. Pomije.

A HELICOPTER LANDS near the hospital Sunday morning, Nov. 30, to bring a Western Maryland sailor to NDMC. The sailor, James Muir, an aviation metalsmith, was brought by the 'copter from Frostburg, Md.

President of A.D.A. Inspects Facilities Of Dental School

The president of the American Dental Association, Dr. Otto W. Brandhorst, inspected the facilities of the Naval Dental School and attended a luncheon at the Officers Club Thursday, Nov. 20.

Dr. Brandhorst came at the invitation of R. Adm. Daniel W. Ryan, DC, USN, Assistant Chief of Bu- Med and Chief of the Dental Division. He was accompanied by Dr. James Hollers of San Antonio, Tex., who is the Dental Member on the Armed Services Medical Policy Council.

Dr. Brandhorst is also Dean of the Washington University School of Dentistry, St. Louis, and enjoys an enviable reputation in the dental profession as a teacher, administrator, editor and essayist.

His favorable comments on the progressive training program offered at the Naval Dental School following his inspection were very gratifying to the staff of the school.

The luncheon guests of Adm. Ryan at the Officers Club included, in addition to Drs. Brandhorst and Hollers, R. Adms. A. W. Chandler, A. R. Harris, and H. Paul Riebe of the Dental Corps; Capt. R. W. Taylor, commanding officer of NDS, and Capt. B. H. Faubion, executive officer of NDS.

Gift Wrapping

From Dec. 8 to 19 inclusive, Gray Ladies of the Red Cross will wrap packages for the patients and staff. The gift wrapping section will be located in the solarium between wards 3-B and 5-B. No charge.

USS Buttercup Survives Bomb Attack To Sail Again - - Then Sink Once More

(Editor's Note: The following article appeared in a recent issue of "Collier's" magazine.)

The attack came just after chow.

The off-duty watch was sitting around as the cruiser loafed along through a plate-glass sea at 15 knots. Then the shrill whistle of a boat-swain's pipe came through the loudspeaker system.

"All hands man your battle stations!"

Moments later, the roar of a plane overhead drowned out the noises in the ship. Then the bomb hit—a near miss alongside. Shrapnel tore through the machine shop.

The ship heeled over. The lights went out. Water gushed from ruptured mains. Steam lines burst with an ear-splitting roar. The men could see the flames of burning bedding below.

The crew went to work. Electricians began restoring power for lights and pumps. An investigator donned an oxygen mask and descended into the burning steam-filled compartment.

He found the steam shut-off valve and stopped the flow. He sloshed over to the burning bunks, pulled off his helmet, and with it dipped water onto the fire.

The lights came on and blowers began sucking out the smoke and steam. The damage control crew descended to begin repairs. Working in water up to their necks, the men clamped patches over the holes. Water mains were plugged. Submersible pumps were lowered.

Seven minutes after the bomb had burst, Damage Control Party No. 1 reported: "All damage secure . . . water level dropping." The USS Buttercup survived—to sail and sink again.

For the Buttercup is nothing more than a two-deck section of a cruiser, 48 feet long and moored in a giant tank of water at the Philadelphia Naval Base's Damage Control School.

A sound track simulates the noises of battle. Instructors outside the ship control the flow of water and steam. The burning bunks in reality are oil-soaked rags.

The ship itself is mounted so that, when the water enters, it actually settles in the tank. The students must halt the flow before the list reaches seven degrees, or the Buttercup is considered "lost."

The Buttercup is just a mock-up ship in a make-believe ocean but what happens aboard is real.

—(AFPS)

Ailing Sailor Carried Here By 'Copter

—WASHINGTON POST PHOTO

Helicopter Sent to Western Maryland For Navyman with Ruptured Appendix

A request for aid for an ailing sailor led to the conversion of an HRS-2 helicopter into an ambulance on Sunday, Nov. 30.

James Muir, an aviation metalsmith, while home on leave in Lonaconing, Md., suffered a ruptured appendix. A serious post-operative condition developed. Potomac River Naval Command was notified and transportation was requested for the 20-year-old sailor to a naval medical facility. Because of the seriousness of the case and the distance involved, local doctors advised that the patient be flown here.

A flight was arranged. Lt. Cdr. George J. Reeves, a helicopter test pilot stationed at Patuxent, first piloted the windmill here to pick up a Naval Hospital doctor, Ltjg. George Moore, and then sped to Frostburg, a nearby city, for the patient.

The trip to the Western Maryland city took an hour and 40 minutes. Snow and headwinds were met on the 103-mile jaunt. The 'copter also landed for gas and instructions at Cumberland.

Using the Maryland State Teachers College athletic field at Frostburg for a landing area, Lt. Cdr. Reeves and Dr. Moore met the patient. Bundled in seven blankets to withstand the 20-degree temperature at flight level, Muir was brought to NDMC.

The return trip, with the former headwinds now an aid, took a mere 63 minutes. Muir, who is now a patient on 103, was home on a 10-day delay enroute when this occurred.

—Joanie and Tony

Joanie Gets Wed; Tony Goes to Bed

The "H" Bomb explosion has nothing on the NDMC NEWS office which is slowly settling down this week. The complete office staff (all two of them) found that November held much more than Turkey Day.

1) Managing editor Joan Madsen quietly embarked on 21 days leave to California.

2) Despite the fact that the pajama-clad assistant editor, Wade "Tony" Walker, claims he has just been too lazy to dress, he has been on the sick list for several weeks and was released only last week.

3) Madsen returned from leave the day before Thanksgiving and immediately announced a change on the masthead—changing Joan R. Madsen to Joan R. Mihay. Pressed for details she divulged that she became Mrs. Karl Mihay in Carmel on Nov. 15.

The staff now wishes to announce that they are ready to settle down to getting out the Christmas issue and letting other people make the news for a while.

Insurance Payments Able to Save Money

This article could be titled "How to Put Money Back in Your Pocket."

In the interest of government economy, and to the advantage of those insured, it is suggested that a less frequent means of payment be made for paying direct premiums for government insurance.

The savings in paying quarterly, semi-annually, or annually over monthly remittances will be reflected in savings in discounted premiums, postage stamps, fewer checks or money orders, less time through fewer transactions, and as a safeguard against lapsed insurance.

Your method of payment may be changed at any time by notifying your nearest VA district office or upon remittance of the correct premium required for the mode of payment selected.

Anyone desiring further information regarding the above suggestion may contact Mr. F. P. Kelly, VA contact representative, Bldg. 102, Ext. 628.

Fate of USS Edsall, Last WWII Mystery, Solved in Preparing 'Victory at Sea'

"Victory at Sea," acclaimed by the *New York Daily News* as the greatest motion picture ever attempted for television, is now enjoying a successful run on Channel Four, WNBW, every Sunday at 1500. This project, launched on the last Sunday of October, is a series of 26 half-hour films on sea warfare during World War II.

The films, presented by the U.S. Navy and National Broadcasting Company, contain historical action in all theatres of operations of the United States' and Allied Navies during the years 1939 to 1952.

A good portion of the film, which includes Japanese, German and Italian footage, has never before been made available to the public.

The last U.S. naval mystery of WWII was solved during the preparation of "Victory at Sea." The mystery was what happened to an old four-stack destroyer, the USS Edsall, which went out into the South Pacific a few months after Pearl Harbor and never was heard from again.

Ten years later, an NBC film editor, working at Anacostia at the Naval Photographic Center, came across some blurred and wavering Japanese film.

With the help of a crackling sound track and a Navy officer who was a Japanese expert, the fate of the Edsall was disclosed. The destroyer was sunk in action by a Japanese cruiser, aboard which the film had been made.

The music for the film series was written by the Pulitzer Prize winner Richard Rodgers, the composer of more than 30 top Broadway musicals. This is his first original score written especially for television. The score is the longest symphonic work ever written, comprising 13 hours of music for the 26-week series.

The schedule for the remainder of the series is:

Dec. 14—Central and Northern Solomons and Admiralty Islands.

Dec. 21—Command of Mediterranean, 1940-42.

Dec. 28—North Africa, Winter, 1942-43.

Jan. 4—War in the South Atlantic.

Jan. 11—Alaska and Murmansk.

Jan. 18—Gilbert and Marshalls.

Jan. 25—New Guinea.

Feb. 1—Normandy.

Feb. 8—Sicily, Italy and South of France.

Feb. 15—Anti-Submarine Warfare III, 1943-45.

Feb. 22—Marianas.

Mar. 1—Pelelieu and Anguar.

Mar. 8—Leyte Landings and the Battle for Leyte Gulf.

Mar. 15—Reconquest of the Philippines, South China Sea and Borneo.

Mar. 22—U.S. Submarines.

Mar. 29—Mediterranean, Black Sea and Near East.

Apr. 5—Iwo Jima.

Apr. 12—China, Burma, India and the Indian Ocean.

Apr. 19—Okinawa.

Apr. 26—Surrender of Japan, Aftermath of the War and Epilogue.

Diaper Derby

Nov. 10—George Douglas Bachert, 6 lbs., 9 oz., new son of George E. Bachert, HM1, Publications Department, NSHA.

Nov. 10—Barbara Jean Bauer, 9 lbs., 11 oz., new daughter of Richard W. Bauer, DT1, student, NSHA.

Nov. 11—Steven Alan Nelson, 7 lbs., new son of Allen A. Nelson, HMC, animal lab, NMRI.

Nov. 13—Jane Theresa Jachowski, 7 lbs., 8 oz., new daughter of Lt. Leo Jachowski Jr., MSC, Parasitology Dept., NMRI.

Nov. 14—Paula Marie Robinson, 5 lbs., 11 oz., new daughter of Paul Robinson, HMC, student, NSHA.

Nov. 15—Muriel Christine Stiles, 9 lbs., 13 oz., new daughter of Ltjg. Thomas R. Stiles, MSC, student, NSHA.

Nov. 19—Elizabeth Ann Haden, 7 lbs., 11 1/4 oz., new daughter of Ens. Hulot W. Haden, MSC, student, NSHA.

Nov. 21—John William Barrier, 8 lbs., 2 oz., new son of Ervin E. Barrier, HM1, Lab 19, NMS.

Nov. 22—Susan Lynn McClelland, 7 lbs., 7 oz., new daughter of Joseph S. McClelland, DT2, of NMRI.

Nov. 24—Robert Lee Cook, 7 lbs., 11 oz., new son of Irving R. Cook, HM1 (ret.), Material Building 14, NNMC.

Nov. 27—William Henry Phillips III, 5 lbs., 13 1/2 oz., new son of William Henry Phillips Jr., HM1, personnel office, NH.

Nov. 28—John Mains Dempsey, 4 lbs., 3 oz., new son of Lt. John J. Dempsey, MC, staff, ward 3A, NH.

Nov. 29—Patricia Ann Kuhlmeier, 8 lbs., 10 1/4 oz., new daughter of Alvin J. Kuhlmeier, HM1, Lab 18, NMS.

Nov. 30—Pamela Jarrett Carter, 8 lbs., 9 1/2 oz., new daughter of Lt. William E. Carter, MC, T-9, staff, NH.

(Continued on Page 6, Col. 5)

Illuminated Lecture Sponsored by NSHA

"Light Makes the Difference" was the topic of a lecture on illumination in hospitals presented to the class in Hospital Administration at NSHA recently. This lecture was given by Mr. Alfred Rugo.

Mr. Rugo holds a degree in electrical engineering from the University of Maryland. He has had extensive experience in electricity and has received training in illumination engineering.

He demonstrated the use of an extensive line of electrical lights, ranging from a tiny switchboard bulb, hardly the size of a pharmaceutical capsule, to a fluorescent bulb five feet long. Various types of fixtures and bases were also exhibited.

The physical and psychological effects of light were demonstrated by the application of seven shades of white light to color combinations which are common in homes, industry, and commercial establishments.

A new development in light, which may have significant use in hospitals in the future, is "Panel-escence," which involves the use of glass panels which are coated with

HOSPITAL ILLUMINATION is discussed by Mr. Alfred Rugo.

phosphorous and are illuminated electrically.

These panels, which are reported to be extremely economical in current usage, are being developed for clock and radio dials and, in hospitals, for x-ray viewers.

Mr. Rugo's services were obtained through the courtesy ofsylvania Electric Products, Inc.

Former Pa. Barber Visits NNMC

RADIO AND TV STAR Perry Como shakes hands with a patient to entertaining. The likeable Chesterfield star visited the Medical Center while in Washington for a Variety award.

Ward Patients Visited By Mr. Nonchalance

"Mr. Nonchalance" recently visited NNMC. Perry Como, visiting Washington to receive the Washington Variety Club's "Show Business Personality of the Year," took time out during the weekend of Nov. 21 to visit NNMC and Walter Reed.

The ex-Canonsburg, Pa. barber visited a few of the wards and presented his interpretation of "Twas Christmas," "Harvest Moon," and other songs.

Perry is in his eighth year as the same sponsor (Chesterfield) radio and television. He also has an eight-year association with recording company (RCA Victor).

"Mr. Nonchalance," as he is often called, is noted for his quiet, unassuming manner. Calling Canonsburg, Pa., home, the CBS-TV star armed a barbershop in his hometown before being discovered while vacationing in Cleveland.

1898-.13 to .15 Pays Feed Bill per Man

(AFPS)—If you've got any doubts about the rise in prices we can call your attention to the economic barometer of the twentieth century—the serviceman's stomach.

Take, for example, the Revolutionary War when Americans were battering the Redcoats from Trenton to Yorktown. In those stormy days it cost the Government only \$.11 a day to feed each man.

In the early days of the war between the states, servicemen were fed on \$.16 a day. By 1863 the cost was up to \$.22.

Later the price dipped again and the Services could feed a man on \$.13 to \$.15 a day during the Spanish-American War.

When WWI broke out the cost of daily rations was up to \$.34. By the last year of the war it had zoomed to \$.48 a day. But by the time the Japanese attacked Pearl Harbor, the cost was down to \$.43.

By 1945, however, it was surging upward again to a new high of \$.61. It didn't stop there and it hasn't stopped yet. At the beginning of the Korean conflict it was costing \$1.02 a day to feed one man.

According to official figures the ration price has now reached \$1.18.

Veterans Who Purchase Homes Through G.I. Bill of Rights Should be on Constant Lookout for Would-be Swindlers

(All Hands)—Navymen who leave the service and buy a home under the G. I. Bill of Rights are advised to be on the lookout for swindlers.

All former Navymen who are delinquent in payments on their G. I. home loans are warned to check carefully any offers by strangers to pay delinquent payments for them—or they might lose their vine-covered cottage!

This warning was sounded by the Veterans Administration, which has guaranteed home loans for nearly 3,000,000 veterans.

VA said such veterans should check with the holder of the mortgage or with the loan guaranty division of the nearest VA regional office to determine whether or not the offer is legitimate and sound.

In some parts of the country, a revival of the practice sometimes called "milking" or "equity skinning," has occurred.

In one form of this racket, the veteran, who is behind in his G. I. loan payments, is approached by an individual who offers to pay the delinquent installments if the veteran will just "sign on the dotted line."

The veteran soon learns that he has actually signed a deed and can get his property back only by signing a land sales contract at a much

higher price.

When the veteran finds he is unable to meet the unusually high terms of the land sales contract, legal action is taken by the swindler to obtain possession of the veteran's home.

In other instances, a low cost subdivision will be canvassed by a group of swindlers to learn whether veterans are having trouble meeting their G. I. loan payments.

If they are, these individuals offer each veteran a nominal amount for his property beyond what is owed on it—plus the privilege of purchasing another home in a lower cost area on a land sales contract. Because the offer is made to each home owner in the subdivision, veterans are less likely to suspect foul play.

In this case the veteran agrees to give up possession in 60 days and "signs on the dotted line," unaware again that he is signing a deed. When the 60 days are up, the veteran learns that no listings are available in the lower cost development as promised. The veteran is then evicted from his home.

A third variation of these crooked practices is used in states where there is a long mortgage-redemption period. A veteran, falling behind in home loan payments, is offered a nominal sum for a deed

giving up claim to his property with a verbal promise that all back payments will be made up.

The veteran moves out believing that his loan will be brought up to date. Instead, the individual holding the deed rents the house without making any attempt to make up back payments.

Most of the money these swindlers receive as rent is clear profit for them until foreclosure is made when the payments are not made up. The veteran, unaware of what has happened, still owes the original lender from which he borrowed money to purchase the house and he might possibly owe the U. S. government too, if the VA pays a claim on the loan.

Many variations of these practices are used in different parts of the country, depending on state and local laws. Although these practices may be legal, they are considered unethical by the vast majority of mortgage lenders and real estate brokers.

VA advises veterans that they will be protecting their own interests and doing other veterans a service if they report any such propositions to the holder of the mortgage and to the nearest VA regional office.

Additional information may be obtained from local VA offices.

CPO Stripes Ready For 18 Local Men

November brought good news to 18 NNMC men who were notified that as of Dec. 16 they will be advanced to CPOA(T). Seven of the men are Hospital Corps and one man is Dental.

New chiefs will be:

NMS
Forrest M. Fulton, Wesley Hardy, Tyrell L. Noblin, Paul Novak, Frederick J. Roehs, George C. Weiss, and Donald L. Win

NMRI
Lee C. Jones.

NSHA
James C. Curto (Dental), J. H. Barefoot, Dick W. Dillman, Walter J. Gardner, William Gardner, Benjamin M. Johnson, Elmen "E" McIntyre, Ralph Pedersen, William C. Soule, Richard A. Walsh.

These Gave

Checking through the names of blood donors for the week of Nov. 17-21, we find that 11 NNMC military and civilian personnel believe in the slogan, "it's easier to give than receive blood."

NNMC
Vors D. Mogan, HM3 and Al Ross, HM1.

NH
Joseph Huber, HM3.

NNMC Civilians
Henry Brinks, Peggy Holiday, Raymond Holiday, Louis Johnson, Henry Johnson, James Richard Miller, and Field

...
Doctor: "What you need, lady, is a little sun and air."
Girl: "But doctor, I'm married."

"I don't care who you are ... you only get six days for Christmas ... !"

Intramural Bowling Results . . .

Standings for men's intramural bowling as of Dec. 2 are:

BLUE LEAGUE

Team	Won	Lost	Pct.
NDS Officers	20	4	.833
NMS Lab	15	5	.750
Dental School	14	6	.700
Pharmacy School	16	12	.571
Phys. Med. School	12	12	.500
NH Doctors	12	12	.500
Research	5	7	.417
NSHA—Class F	7	13	.350
Dental Post Grads	7	13	.350

GOLD LEAGUE

Team	Won	Lost	Pct.
CPO	18	2	.900
Lab Class 19	13	7	.650
See Mats	11	9	.550
Optometry	10	10	.500
Dental Interns	8	8	.500
Operating Room	6	6	.500
NSHA Staff	11	13	.458
NMS Officers	12	16	.429
NMRI	5	11	.313
Mat Class D.	6	14	.300

Blue's Dental Officers and Gold's CPOs Head Local Intramural Bowling Leagues

Winter weather sends the sports enthusiast indoors at the Center with interest in bowling increasing every day. Individual averages in the intramural leagues are climbing as the tenpin toppers get into mid-season form.

New individual and team records have been posted in both the Gold and Blue Leagues.

Gold League

High Individual Game: Meitl (CPO)—225
High Individual Series: O'Keefe (CPO)—544
High Team Game: Operating Room—838
High Team Series: Operating Room—2310
High Averages: Meitl (CPO)—175; Klaes (See Mats)—161; Fisher (See Mats)—158; Brown (CPO)—157; Leadford (Lab Class 19)—156

Blue League

High Individual Game: Colby (NDS Off.)—233
High Individual Series: Miller (Pharm)—560
High Team Game: Pharmacy School—755
High Team Series: Pharmacy School—2171
High Averages: Miller (Pharm)—169; Hobbs (NMS Lab)—168; Ferguson (NDS Off.)—160; Zutz (Phys. Med.)—147; Hauck (Phys. Med.)—144

Instruction, Chow Offered to Bowlers

For those interested in exercise, recreational and competitive bowling offer the best. The bowling alleys are available for open bowling daily from 1700 to 2200 except on Tuesday, Wednesday and Thursday when the organized leagues are scheduled.

On weekends the alleys are open from 1300 to 2200. Pinsetters are always available and the management will serve refreshments and be glad to help beginners.

Being able to bowl is fast becoming a social asset. Why not take it up here at the Center and have fun while you practice?

People who don't stop to think usually never start.

Locals versus Quantico Marines

AFTER THE NET BATTLE with the Quantico Marines, the women's volleyball team won their next two matches to end the season with five wins and four losses.

SPORTS FLASH

NNMC Admirals dropped their game to the visiting Receiving Station, Anacostia, Thursday, Dec. 4, 55-59. On the same night the Admirals dropped their practice tilt to the Rockville Rockettes 29-42.

USAF Airman Stars As Varsity Player

Basketball for Walt Hauck is both business and pleasure. This 71-inch varsity guard expects to coach at a home town high school after graduation from college.

This USAF airman brought six years of organized hardboard experience to NNMC. A third of this was spent on CYO teams in his hometown of Brooklyn, two years on the Bishop Loughlin High School squad, and the remaining time with Queens College, a mem-

Walter Hauck, A1/c

ber of the Greater New York Conference.

At NNMC for Physical Medicine School, Walt expects to use the experience gained at the school and on the courts when coaching his own Brooklyn aggregate.

In the first varsity scheduled game (against Anacostia), Walt played two minutes short of the total game. An advocate of the fast break and set shot, Hauck, the holder of No. 15 on the local squad, is a good bet for the first team.

Submarines Leading In Women's Bowling

Still in top position in the NNMC women's bowling league is the Submarine team with a win-loss record of 13 and 2 for a percentage of .866.

With a top 172, Miss Norma Hess is holding the honors for individual game.

On the 18th of last month Betty Ward, an HM2, pounded out an aggregate of 428 for top series.

Standings and individual honors in the women's intramural league are:

Team	W	L
Submarines	13	2
Icebreakers	8	7
Minesweepers	8	7
Destroyers	8	7
Carriers	6	6
Battlewagons	5	13
High Team Game: Battlewagons—567		
High Team Series: Icebreakers—1611		
High Individual Series: Ward—428		
High Individual Game: Hess—172		
High Average: Crowell—129		

Led by Ron DeVice, Marking 37 Points, Varsity Topples NAS, Anacostia 72-63

The NNMC Admirals started off their league competition with a thrilling 72-63 victory over the Naval Air Station at Anacostia on Tuesday, Dec. 2. This marked their seventh straight win, since they already had six practice victories under their belts.

Admiraltes Ready For League Matches After Practice Tilts

Entering WIAL league play tomorrow night, the Admiraltes have three stiff practice matches behind them. Coach "Shorty" Edwards scheduled two skirmishes with the Rockville six and one with the Henderson Hall Marines.

In the first clash, on Nov. 25, the Admiraltes missed victory by two tallies, taking the lower half of a 41-40 score. For the results of the second match with the Rockettes, see the box in column three.

Despite the loss of the first game, "Shorty" was well pleased with his feminine varsity, pointing out that Rockville floors a strong team.

Assistant coach George Ashton constantly shifted the Admiraltes' positions to afford each player maximum experience, which also resulted in fewer goals than could otherwise be expected.

Trample Marines

The team fared much better last Tuesday when they swamped the Henderson Hall visitors 48-29. Trailing only in the first few moments of the game, the Admiraltes had a one-point lead by the end of the first quarter and increased it consistently.

NNMC "froze" the ball in the last two minutes of play "just for drill" in case the occasion might demand it later in the season.

Star of the night was southpaw "Josh" Shook who flipped in 19 points in the first half and completed the night with a total of 24. Mihay dropped in 15, Allen 8, and Carlson 1.

The guards picked up considerably in the second practice. Most effective defense to date has been the combination of Bradford, Cox and Crouch. Ready to relieve them are Woerline, DeBerry and Evans.

"Al" Allen, who throws some of the swiftest and most accurate passes on the team, has been playing forward mostly this year. Ltjg. B. J. Alexander racked up eight points for NNMC in the first game with Rockville, but has since transferred to Philadelphia.

Reminiscent of last year, the Admiraltes games offer plenty of light as well as exciting moments as Josh Shook continues to take her amazing tumbles on the court.

With eight minutes to go, and trailing by 12 points, the NNMC boys cut loose and fought their way to a nine-point win. With the time clock registering four minutes to play, they had a one-point edge and refused to relinquish their late-earned lead.

Starters for the night were DeVice, Epstein, Hauck, Carrobbine and Pickett, with the first three named playing practically the full 40 minutes.

Hauck, DeVice and Kreisl were all fouled out before the game ended, and Pickett was removed when he injured his ankle. This gave those sitting on the bench an opportunity to come in and save the game.

Dr. Epstein, coach and player, commented that he has never played with a squad with as much team spirit as this year's varsity displays, or seen a team where the men on the bench pull so hard for those on the court.

The reserve string of Schilling, Reed, Siltmen, Kreisl and Veneziano gave excellent support to the team. Reed did an exceptionally fine job off the backboards.

NNMC	Pos.	FG	F	TP
DeVice	F	11	15	37
Siltmen	F	—	1	1
Carrobbine	F	—	—	—
Kreisl	F	4	—	8
Veneziano	F	—	—	—
Pickett	C	—	—	—
Reed	C	3	2	8
Epstein	G	2	4	8
Schilling	G	2	2	6
Hauck	G	1	2	4

The Admirals played their first league home game last Thursday night when they met the Receiving Station from Anacostia. (See box in column three for score.)

The schedule for the next two weeks is:

Dec. 9—Army Med. Cen. there
Dec. 11—Marine Barracks here
Dec. 16—Vint Hill Farms there
Dec. 18—Arlington Hall here

A priest walked up to a young man who was obviously inebriated. He asked: "What have you been drinking?"

"Three fathers, feather," was the reply.

"I don't know who I am. I was left on a door step."

"Maybe you're a bottle of milk."

Admiraltes Take First League Clash Tomorrow Evening on Ft. Myer Courts

A game with Ft. Myer at Ft. Myer on Dec. 9 opens the women's basketball league. The 16th of December will see the first home game when the locals meet Bolling Field here in the gym at 1900.

Fourteen teams are entered in the WIAL League with play consisting of a single round robin and an elimination tournament.

Trophies will be awarded to the first place team and runners-up.

Play will end on the 17th of March.

Time	Date	Teams
1900	Dec. 9	NNMC at Ft. Myer (Hqs. Co.)
1900	Dec. 16	Bolling AFB at NNMC
1900	Jan. 6	NNMC at Patuxent River
1900	Jan. 13	NNMC at Ft. Belvoir
1900	Jan. 20	Walter Reed at NNMC
1900	Jan. 27	NNMC at Quarters "K"
1900	Feb. 3	Ft. Myer (WAF) at NNMC
1900	Feb. 10	NNMC at Henderson Hall
1900	Feb. 17	Ft. Myer (7001st) at NNMC
1900	Feb. 24	NNMC at Ft. Meade
1900	Mar. 3	Arlington Hall at NNMC
1900	Mar. 10	NNMC at Quantico
1900	Mar. 17	Andrews AFB at NNMC

NMRI

by R. Conaway

Wonder where certain people are getting their "inspection haircuts" these days?

We know someone at the Institute not interested in flying saucers—but he sure likes to see those saucers under the coffee cups.

What would happen if Havaraneck was put in a burlap bag and shook up; wonder if he would come out "Scottish"?

There are rumors going around that Boning and Clancy are practicing for the Olympic swimming team. Isn't it rather cool for outdoor swimming, boys?

Kutchara thought it was all rather funny until he remembered that Clancy was wearing his shoes.

Nice team that Michigan State has. Anyone who would like predictions on the "winning teams" just consult me. I know all the answers—the wrong ones, that is.

You know things are rough when a certain First Class is seen smoking old cigarette butts. And pay day 11 days off!

There are still some people around the Institute who should brush up on the floor plan for the second deck. I won't mention any names, but is my face red? O.K., Dr. W.?

Off for a try at civilian life once more goes S. D. Toner and also leaving us, but for a bit of sea duty, goes Lt. T. S. Ely for duty aboard the USS Kearsarge.

A welcome aboard to K. B. Radcliffe, HN, from the U.S. Naval Hospital, Bethesda, and to Lt. R. Gilder, recently reported from the Third Naval District.

Hear tell that Hamby has swapped his candy bars for a drumstick.

Anyone interested in a good story should ask Hammy Brooks what she knows about gnats. There is quite a point to that story!

Navy Belles

by George

The first of three holidays is over and what a holiday! Church first, then a turkey dinner that held us for days. On Saturday afternoon we watched the Army-Navy football game on the TV with a pan full of Mary Lou's homemade popcorn and apples and cokes.

We are all looking forward to the opening of the galley (downstairs) where they are putting in a new sink for the girls. Looks nice. I hope we all keep it that way.

Our basketball team played a fast game with Rockville: lots of stiff muscles.

Dear Santa Claus: This may be a little early but in the Navy we have learned to put our chits in early. I have a few I would like to send now. Please bring a glamorous voice for "AI"; Possie wants good grades in her classwork, likewise Eleanor and Cathy. Bring Betty Ward three brushes for car cleaning, one for her and the others for helpers if she can find any.

Please bring Josh an extra pair of knees for playing basketball. Joyce wants soup for lunch. Rose wants more dressing time in the morning; Connie and Peggie, just more time. Kay Yuhans wants more phone calls and a trip West for next Christmas. Dorothy wants to be a short timer. Betty wants to know about name changes other Waves have been making. Also, you know only 23 more shopping days in Leap Year.

Sandy and Brad want more singing time. Kitty wants reinforcements for her locker shelf. Norma wants a T.A.D. for school. My lab school friends want a good duty station.

I remain the girl from the heart of Maryland who hopes that she can bring you more news and a better column next year.

Dental Explorer

by C. Connor

Welcome aboard to all the members of the DRM class from all of us: From the USS Bushnell we have L. G. Burns Jr.; London, England sent us one H. J. Collins; from the land of grass skirts we have G. N. Limpede; from San Diego we have J. V. Black; Bainbridge, Md. sent us R. H. Eads; and from Texas we have J. H. Edgerton. R. L. Rusch came from Great Lakes; R. B. Dowdy from Pensacola, Fla.; R. P. Jordan from Parris Island; and from NDS to NDS our own F. J. Bowser. Long Beach, Calif. was the former station for A. F. Graham, and finally from Annapolis, Md. comes J. E. Millea.

Goodbyes were extended to Bell and Elliott when they left us very recently for DPT school at Bainbridge with Munroe thinking seriously about a new book.

Our sick list is certainly expanding we're sorry to note: The Johnny Come Lately is none other than Dr. Mendel who is hoping he won't have to part with his appendix. Just think, Doctor, as a last resort for conversation you would at least be able to discuss your operation. So hurry up and get well. We miss you at the old homestead.

Chief Hughes is looking mighty happy these days, and why not? He finally got his new home. Good luck, Chief. (P.S. When is the housewarming? Hint, hint.)

Marchand is receiving gifts from an avid admirer. He must have heard she does a mean polka.

Chief Petersen is really being kept busy these days. She is one of our house mothers at the barracks now and really has quite a brood to worry over. Oh well, it all counts on twenty, Chief.

Now that the political end of the news has more or less become old news, Fergie is really getting down to the business at hand: that of keeping Jarboe from doing the Mexican Hat Dance in the most ridiculous places. Don't despair, Fergie, he'll see the light one of these days soon.

Mrs. Mac and Shirley are running neck and neck in the medicine department. Every day some new mixture appears. Wonder if they've tried Hadacol yet? How about a little research on it, gals?

Well, that's it for this go round so till next time, "Smooth sailing from the Gal from the Hub."

P.S. Only 17 days till Xmas.

P.P.S. Not to be forgotten is Guy Alexander, DN, who is also on the sick list. We sure hope that your illness didn't hinder your appetite for that old Tom Turkey. Get well soon!

Former ICS Teacher Instructs in PhysMed

For the last 11 months, Ruth Clarkson, HM2, has been instructing students in the Physical Medicine Technician School of the Naval Medical School. At present, she has 28 students to whom she demonstrates the proper techniques in hydrotherapy, radiation, and therapeutic exercises.

Ruth was selected for this job after she herself completed the course last December, graduating first in a class of over 20 with a 96.4 average.

Scholastic achievements are certainly nothing new to this five-foot-one Wave. A look at her record reveals:

Born in Orient, Ill., and attending schools in Illinois, Wisconsin, and Oklahoma, she completed two years of nurse's training before college. She earned her AB degree from Greenville College, Greenville, Ill. in 1946 where she majored in philosophy and took minors in music, history and Spanish.

In the next three years she instructed for the International Correspondence Schools where she was in charge of the Spanish department.

Enlisting in July, 1949, she completed Hospital Corps School at Great Lakes, graduating first in her class of over 40 with a 99.3 grade.

This spring she attended Navy Instructors' School at Norfolk where she took second place honors with 94.5, missing first spot by two-tenths of a point.

It might seem that Ruth devotes most of her time to books, but this is not true. Last winter and spring she worked five days a week on the evening shift at Suburban Hospital in Bethesda.

Every Sunday morning you may find her singing alto in the Methodist choir in Bethesda, and evenings she often accompanies herself on the piano in the Waves' recreation room.

Right now, Ruth is engrossed in the 15-acre farm she bought in

Ruth Clarkson, HM2

Massachusetts this summer when she shipped over for six. Her father (a retired Methodist minister) and mother will live there until Ruth completes her 20 with the Navy.

A member of the women's volleyball team this season (and last year too), Ruth is a member of the Icebreakers' bowling squad, with hopes of improving her 110 average of last season.

We Said it

And We're Sorry

Thanks to Moffett News (who made the same mistake) an error in the story "MSTS Charges for Cars" appearing in the Nov. 24 issue has been brought to our attention.

The original story, released by Armed Forces Press Service, quoted prices for Service personnel who wished to ship their cars overseas. Charges will be imposed only on civilian workers attached to the Navy Department.

Military personnel may still send their cars free of charge.

We'll Take Two

"CHIMNEY CRICKETS!" If you were Santa Claus and had someone like this waiting for you, we bet you wouldn't get any stockings! She's Paula Drew, Universal-International cutie, who can leave you wreathed in rapture. Down, Donner! Down, Blitzen!

A VERY MERRY CHRISTMAS

National Naval Medical Center
Bethesda, Maryland

Chaplain's Corner

by Chaplain William G. Sodi

The Baby

Everybody loves a little baby. There is something about the rosy roundness of a child that reminds us of beauty, purity, and heaven. Christ was a child. Christmas is His birthday celebration. Christmastide is a season of kindness, love and charity.

But sometimes in the midst of all our celebrations and good thoughts, we forget that Christmas was real . . . that there was a real Christ, a baby like all of us, Who was born to Mary, and Who lived a short life for a purpose: that "who-soever believeth in Him should not perish, but have everlasting life."

His life was real. To His mother and to Joseph it meant all the hopes and aspirations that parents have for their children. To the shepherds of Bethlehem it meant the most wonderful and awesome night of their lives. To the magi it was the reason for a hard and trying journey for many miles. To Herod it meant insane and jealous fear. To His disciples later it meant devotion, loyalty and persecution. To Christ Himself it meant hard work, worry, happiness, and suffering.

To us people His life can have a real meaning, too. It must. Otherwise our revelry and gift giving and good spirits become a shameful mockery of the most solemn and striking fact of history; that God became one of us. If the reality of that fact can penetrate into our minds and living, then Christmas can become what it ought to be for us. It should be a time of happiness and good spirits. God wants it that way. But on the proper basis. If we can get rid of the abstract ideas we hold about religion, and grasp the solid fact that God is real in Christmas, we can really be happy.

Waves Barracks: 24 December

'Twas the night before Xmas as the old story goes,
And the barracks was quiet as our "Edna" knows;
For she had the duty and was set for the night,
To call out the warning when St. Nick came in sight!

The compound was covered with a blanket of white,
And was just made to order for travelling that night;
Especially when travelling was done in a sleigh,
Pulled by eight reindeer from the North far away!

Then out on the lawn such a rumpus was heard,
That "Edna" thought surely she could now "pass the word;"
She rushed to the window and what did she see?
Just some Dental Boys coming home from a spree!

'Twas now close to midnight; there were rounds to be made,
So armed with her flashlight, the dark to invade,
She made her way slowly from topside to hold,
To make sure her "children" were safe in the fold!

There were stockings of nylon hung by each sack,
And each Wave was dreaming of a gift-laden pack,
Full of French perfumes, and the soft lingerie
She would find in her stocking on that glad Xmas Day!

The Barracks "secured" now so back to the lounge,
In her soft slippers "Edna" made not a sound;
And there in the corner, crouched on one knee,
She surprised "Old St. Nicholas" putting gifts 'neath the tree!

His "tailor-mades" were of crimson and perched on his head,
Was the sauciest flat hat of bright Xmas red;
You could tell by the length of his snowy white hair,
He had not stood inspection since this same time last year!

He jumped to his feet and remarked with a grin,
"I thought I smelled coffee when I just now came in;
For you know that old Santa is a swabbie at heart,
And I must have some caffeine before I depart!"

So while "Edna" refilled the Joe pot to the brim,
Santa hitched up the reindeer that were waiting for him;
And after drinking his coffee, he called out with delight,
"Merry Xmas there shipmates, and a pleasant good-night!"

-R. Conaway, NMRI

From The President:

Another Christmas finds so very many of you far from home on battle stations or standing guard for the protection of our country, and I want you to know how proud we all are of your unselfish devotion to the great undertaking in which you are engaged.

The task you have set for yourselves is nothing less than the salvation of the world. Mankind will lay no finer tribute upon the altar this Christmas than the courage and loyalty you are showing in this bitter struggle for world peace.

The thoughts and prayers of all of us at home are with you on this day. Your victory in the fight for freedom is our hope, and indeed the hope of the world, for that day when Christmas will again be a season for peaceful rejoicing.

Harry S. Truman
President of the United States

From Secretary of Defense

During the Christmas season the thoughts of the entire nation are with the Armed Forces—our soldiers, sailors, airmen and marines. We are thinking particularly of those who will spend Christmas far away from home; many upon the field of battle itself.

In Korea our Armed Forces have accepted hardships and sacrifices with a fortitude which recognized that these are the necessary prices that we pay in the protection of our freedom. Their deeds on the battlefield have been an inspiration to the millions here at home and elsewhere in the free world.

As I send my greetings at this Christmas season, not only to our troops, but also to their families and to the thousands of civilians in the military establishment, I want to express to you the thanks of a grateful nation. Upon you and your comrades in arms the world depends for the restoration of peace on earth.

Robert A. Lovett
Secretary of Defense

From Secretary of the Navy

I extend to all the men and women of the United States Navy and Marine Corps my most cordial Christmas greetings for the 1952 holiday season.

By tradition and sentiment Christmas is our American observation most closely associated with the home and the family. Many of you will be fortunate enough to be with your families this Christmas Day but many of you will be aboard ships and stations far from your loved ones.

Those who are separated should particularly reflect on the fact that their service is in the defense of their families and our way of life. A grateful America wishes all of you the true happiness of this Day upon which Christ was born in Bethlehem almost two thousand years ago.

Dan A. Kimball
Secretary of the Navy

From Chief of Naval Operations

To all the men and women of our Navy and Marine Corps and to their families, I wish a happy holiday season and a successful New Year.

Adm. W. M. Fechteler
Chief of Naval Operations

From NNMC Commanding Officer

On the approach of the traditional season of gladness and good will, the Commanding Officer desires to extend to all personnel of the National Naval Medical Center his hope and wish for a very Merry Christmas and a very Happy New Year.

R. Adm. Bertram Groesbeck Jr.
Commanding Officer, NNMC

From NH Commanding Officer

It gives me deep personal pleasure to extend greetings for a happy holiday season.

I pray the true American spirit, one of the richest treasures of our common Christian inheritance, may pervade our hearts during this sacred season; the spirit of brotherly love and understanding, the spirit of respect for one another's integrity, race and creed, the spirit of reverence for human dignity.

In this spirit the welfare of our patients will be the primary end of all our endeavors; in this spirit our officers, our enlisted personnel and our civilian staff will continue to give their best towards the ideal fulfillment of the important task which faces us all at this hospital.

Merry Christmas to all.

Capt. B. W. Hogan
Commanding Officer, NH

Chaplain's Corner

by Chaplain David J. Kosky

The Infant King

As we celebrate the wonderful Feast of Christmas, let us hie ourselves in spirit to that Holy Night when angelic hosts poured forth from heaven with exultant singing, "Glory to God in the highest." "This day is born to you a Saviour who is Christ the Lord, in the city of David" (Luke 2:11). With lively faith let us in spirit join the throng of shepherds who hastened that night to the cave of Bethlehem so that they might see the "infant wrapped in swaddling clothes and laid in a manger."

But why did the "God of God, Light of Light, true God of true God, consubstantial with the Father," become man for us taking on the form of a Child? The Redeemer came to seek and save that which was lost; therefore, He chose to come in the form of a man to save man. But He came not in the vigor of manhood, nor as an all-conquering despot, but rather in the form of the most helpless of human kind—a child, a baby.

The love of the Son God for lost mankind drove Him with an impelling force to deprive Himself of all rank, glory and greatness so that there would be no barrier, no hindrance between the Emmanuel—God with us—and the poorest, or the lowliest of his creatures. Christ loved us to the end of love. The Church voices this infinite love of God for us in the words "O wonderful condescension of Thy love for us: O priceless favor of Thy love: To redeem the servant Thou hast delivered Thy Son."

How then shall we show forth our gratitude to the Infant King of Bethlehem? By requiting love for love. By loving Him with all our minds, heart, soul and being. Great God we praise Thee, Jesus, Infant God, we love Thee.

Men's Barracks: 24 December

'Twas the night before Christmas, the barracks was still.

The sailors were sleeping as most sailors will.

The seabags were hung by the lockers with care,

In hopes that St. Nicholas soon would be there.

The men were all peacefully dreaming in bed,

As visions of liberties danced in each head.

The chief in his skivvies and I in my sack,

Had just come from town with a quick midnight snack.

When out on the deck there arose such a roar,

I ran to the porthole to find out the score.

I pulled up the shade and I started to shout,

"Just what in the heck is this noise all about?"

A moon made for boondocking shown on the snow;

It was pretty cold out, about seven below.

What I saw looked like one of those carnival floats,

'Twas a rowboat drawn smartly by four Navy goats.

In the boat was a man who seemed quiet and moody—

I knew in an instant St. Nick had the duty.

As quickly as Monday, his billy goats came;

He whistled and shouted and called them by name.

"Now Perry, now Farragut, Dewey and Jones,

What's the matter, John Paul, got lead in your bones?

A little to starboard, now hold it up short,

No fluffing off now or you'll go on report."

I opened the porthole quite narrow and round,

The old Saint hopped in with a hop and a bound.

His eyes—they were watering, his nose caked with ice,

He wiped it with Kleenex, then sneezed—once or twice.

He opened his mouth and started to yawn,

It looked like the sun coming up with the dawn.

The stump of a pipe he held tight in his teeth,

And took a small nip from a bottle beneath.

He was chubby and plump, a right jolly old tar.

He said, "Evenin' matey; here have a cigar."

He filled every seabag with presents galore;

Tossed a whole pile of discharges there by the door.

With an "Anchor Aweigh" he climbed into his place,

A broad smile creeping all over his face.

One look at his watch and he started to frown,

"This night shift is certainly getting me down."

"Merry Christmas," he said as he drove on his way.

"Now I'll finish my rounds and sack in for the day."

-Arranged by an NNMC corpsman a few years

Local Physicist, Doctor and Machinist Combine Talents to Build New Machine

An idea of two Naval Hospital officers and the ingenuity and mechanical skill of one NNMC civilian machinist turned an ordinary over-the-bed table into an elaborate stand supporting one of the scintillation counters used by the Radioisotopes Lab.

The net result is an estimated savings of over \$2,000, plus available apparatus enabling the lab to slash the amount of radioactive materials administered to patients to a fraction of that formerly used.

For many of the diagnostic tests performed in the lab, a small amount of radioactive substance is intravenously injected into the patient. Since diseased tissue picks up more of this substance than normal tissue, readings can be taken to localize the position of the diseased tissue.

Formerly, Geiger counters were utilized for these readings. The scintillation counter is a device which counts gamma rays from radioactive isotopes more efficiently than the conventional Geiger counter.

Because of this greater sensitivity of the scintillation counter, less radioactive material is required for the tests.

Inside the counter, a crystal converts the gamma ray to a light flash. These light flashes are counted through the use of a specialized type of photoelectric tube and electric circuits.

Ens. Martin Colodzin, physicist, and Dr. L. Matthews of the Radioisotopes Laboratory conceived the idea of a collimated lead shield to convert a scintillation counter into an instrument capable of detecting radioactivity in patients.

Mr. George Kleinhenn, of the machine shop, took the idea from there and machined the lead shield and interchangeable collimators. In addition, he designed and manufactured an extremely versatile stand. The new stand enables the counter to be moved both vertically and horizontally, and be set in any one position and held there by mechanical stops. This provides a means using the instrument in the

(Cont'd on Page 6, Col. 2)

Down for the Count

OF THE SCINTILLATION COUNTER, newly installed in the Radioisotopes Laboratory, is demonstrated by Ens. Colodzin.

Gracias

The NNMC NEWS would like to thank Allen McGinley, HM3, and Chief Melvin Runkel, both of NMS, for the art work on pages one and eight of this issue.

Get in Step in the '53 March of Dimes Starting Country-wide, NNMC-wide Jan. 2

"These Americans are a peculiar people," Alexis de Tocqueville told his fellow Frenchman. "When some citizen in a community decides that something is needed, he thereupon communicates this sense of need to his neighbors. Promptly a committee is brought into existence. And, in a very short time, this committee has begun to meet the need. All of this is done without reference to any official or any bureaucracy."

This statement was made by a great student of democracy in 1832. It could serve very well as a capsule description of the fight launched against polio through the March of Dimes collection which will begin Jan. 2.

The March of Dimes touches every segment of our society: Mr. and Miss Navy who volunteer their services, the thousands who contribute money to the fight and the boys and girls, men and women who are stricken with polio and need aid—all benefit in one way or another.

Last year in the contributions to March of Dimes, NNMC almost doubled the preceding year's donations. With more people stricken with infantile paralysis in 1952 than ever before, and with the staggering patient-care bill, this record onslaught of polio should be met with a record 1953 NNMC March of Dimes.

New Housing Ruling Permits Part Rent

(AFPS)—Major changes in the Navy housing rental contract agreement have been made to reduce hardships on personnel being transferred to new duty stations.

The rental agreement has been revised to permit dependents of transferred personnel to vacate at the discretion of the commanding officer. Under the revised contract the determination of notice required prior to termination of the lease is also left to the commanding officer.

Cash benefits will be realized by tenants moving into housing after the first of the month. Previously, a full month's rent was charged for the first month.

Under the new contract the tenant will only pay for the remaining days of the month.

Civilians Win Cash When They Suggest

Cash awards totalling \$195 were made to four civilian employees this month for their suggestions to improve appliances and facilities of NNMC. Commanding Officer R. Adm. B. Groesbeck Jr. presented the awards on Dec. 8.

One hundred and thirty dollars richer is Mr. Leon Younkens, plumber, Maintenance Division, for his suggestions for a sink strainer adapter and a removable strainer for the drain of dish washing machines.

Mr. Russell L. Bray, guard supervisor of the Security Division, netted himself \$25 by suggesting hand rails on the outside steps to the basement.

Mrs. Mamie Chavies, chief mess attendant, Food Services Division, also received \$25. She suggested ledges under tops of grills.

Mrs. Hazel M. White, personnel clerk, Civilian Personnel Division, was awarded \$15 for her idea for rubber stoppers for filling ditto machines.

A letter of commendation went to Mr. Arthur A. Mack, pipefitter, Maintenance Division, for advocating a guard railing on the platform in back of Bldg. 21.

Patrick Weds a Kelley

Dack N. Patrick, HMC, of NMS and Miss Beatrice B. Kelley were married in the parsonage study of the Reverend DeLoss Scott, pastor of The National Tabernacle, Washington, D.C., on Dec. 13 at 1600.

With the Patrick and Kelley clans united, it would seem that the Irish are sticking together as usual. It is interesting to note that neither Chief Patrick nor Miss Kelley were superstitious about dates as shown by the one selected for this event—the 13th.

Mr. Bergen, Charlie & Mortimer Bring 'Operation Santa' to Wards

LOOKING OVER THE GIFTS to be given to patients, are Edgar Bergen and Charlie who brought 'Operation Santa Claus' here Dec. 15.

Last Monday afternoon, Dec. 15, Edgar Bergen and wise-cracking Charlie McCarthy in their annual "Operation Santa Claus" and GI Gift Cavalcade visited NNMC.

While here, Bergen and Charlie made a complete tour of the hospital, staging shows and distributing gifts. Mrs. Bergen and Tippy Stringer, local TV and radio vocalist, sang for the patients. Domenick Frontierre, TV and radio accordionist, played.

An hour long show, starring Bergen, Charlie, Mortimer and the others was staged in the auditorium for patients and staff.

"Operation Santa Claus," which is touring 27 cities across the nation giving shows and distributing gifts to wounded men in the Navy, Army and Air Force hospitals, will continue the tour up to and including Christmas Eve.

The idea for "Operation Santa Claus" originated with Bergen in 1951, when he read a report by the Surgeon General of the United States that 16 percent of the patients of Navy, Army and Air Force hospitals in this country were without family or friendship ties.

This prompted the CBS star to launch the first "Operation Santa Claus" drive to provide a Christmas for every hospitalized veteran across the nation. In addition to the thousands of gifts he personally donated, Bergen appealed to people in every section of the country to send gifts.

The response was instantaneous. Thousands of gifts poured into Hollywood and "Operation Santa Claus" was begun. In 1951, the ventriloquist distributed nearly 16 tons of gifts to patients in 27 hospitals across the country.

This year there are 28 hospitals on the itinerary with two in the D.C. area—Walter Reed and NNMC.

Producer of Beautiful Religious Mural Captures Second Hallmark Recognition

HIGH UPON A SCAFFOLD erected on the stage of the main auditorium, Cdr. Bookatz turns a piece of canvas into a beautiful mural to be used for religious services. Assisting the commander is C. W. Fay, HM2, formerly an illustration for NMS.

Recently Cdr. Samuel Bookatz, an official Navy artist, was notified that his painting had been selected as one of the one hundred winners in the 1952 Hallmark Competition.

These awards are made from over ten thousand entries, both from the United States and other countries. The work, entitled "Christmas Chimes," was a rosette window depicting a madonna and child.

This is the second time that this local artist has been so awarded. In last year's contest, this eminent Washington artist was awarded fourth prize. Selected was a semi-abstract drawing of a cathedral in luminous stained glass hues.

In recent weeks, a painting by this artist was also selected for one of the top shows in the United States—The Survey of Contemporary Art—held at the University of Illinois.

This is the second time that a painting of his has been designated for this exhibition. The former drawing is now a part of the permanent collection at the Milwaukee Art Gallery.

This year he was also notified that another of his paintings was chosen for top award in the Corcoran Art Gallery Exhibition for local painters. However, these are only a few of the many awards he has received in his 16-year career.

Favoring abstractions to realism, Cdr. Bookatz was one of the first local artists to have a one-man show at the Corcoran Gallery. His first show was held in Paris and another in Rome. His works are owned by many museums and private collectors. Locally his works are at Phillips, Corcoran, and the Smithsonian.

Here at NNM, the six portraits

Sodt, New Chaplain, Is Seadog, Musician And Former Editor

Lt. William G. Sodt, the new Protestant Chaplain, in his eight years of service has seen nearly every type of duty—duty ashore, afloat and with the marines.

First introduced to the Navy at Bainbridge, Md., Chaplain Sodt has been aboard CVs, CVLs, APAs and ARs, plus duty with the marines in China and shore duty at the Disciplinary Barracks at Portsmouth.

A native of Ohio, the Lutheran minister, while stationed aboard the USS Wright, organized, conducted and played in a ship's band. The orchestra, a 12-piece aggregate, played for ship's dances and Happy Hours.

The new minister used his experience gained in high school and college to manage two papers before coming to NNM. Aboard the Oriskany, Chaplain Sodt managed the ship's paper—The Patriot—a bimonthly offset.

While stationed on the USS Wright, CVL-49, the new NNM chaplain edited The '49er, the ship's paper.

Before entering the service, Chaplain Sodt went to Capital University and Ohio State. He graduated from Capital U. Seminary, an Ohio Lutheran Seminary, in 1944. Shortly after he joined the service.

Married and living in Rockville, Lt. Sodt has three children—all boys—Peter, Fritz and Billy.

Bronze Star Medal Awarded Corpsman For Duty in Korea

Thomas A. Nash, Jr., HM3, from Statesville, N.C., and now a patient on ward 103, was awarded the Bronze Star Medal on Dec. 8. The award was for achievement in connection with operations against the enemy while serving in Korea with a Marine infantry company.

The award was presented by R. Adm. B. Groesbeck Jr., CO, NNM, in the presence of the commanding officers of the five component commands here. The citation received by Nash reads in part:

"On the night of 17 August he accompanied a detail sent forward from the main line of resistance to aid in the evacuation of seriously

THE BRONZE STAR winner, Thomas A. Nash, HM3, receives his award from R. Adm. B. Groesbeck Jr., CO NNM.

wounded members of a patrol ambushed by the enemy while enroute to a combat outpost.

"While moving forward under intense enemy mortar, artillery and small arms fire, HM3 Nash was seriously wounded, forcing his evacuation. On these and other occasions, his skillful treatment of the wounded was instrumental in saving the lives of several seriously wounded men."

Nash, who is authorized to wear the Combat "V," entered the service Sept. 18, 1950. He is a graduate of Mitchell College, Statesville, N.C.

Lt. Mary Morrow Relieves Miss Moon As Disbursing and Clothing Officer

TURNING OVER THE JOB to Assistant Disbursing Officer CPCLK Eikam (center) and Disbursing Officer Lt. Morrow (right), Lt. Moon (left) explains some of the details of the work.

It's a well-known fact that women control the purse strings in America, and NNM is no exception. This month the responsibility for the Disbursing Office changed hands—and both pair of hands were feminine.

Reporting in Dec. 3, Lt. Mary R. Morrow, SC, USNR, relieved

Chance for Reserves For MSC Commission

Washington (AFPS)—Navy Reserve chief and first class hospital corpsmen and dental technicians now on active duty may apply for officer training, the Navy announces.

Selected applicants will be ordered to the Officer Candidate School, Newport, R.I., for a two-month course. After finishing the course, candidates will be commissioned reserve ensigns in the administrative and supply section of the Medical Service Corps Reserve.

Two months additional training under the supervision of the Bureau of Medicine and Surgery will follow their commissioning.

After being appointed ensign, candidates must serve on active duty for not less than 24 months. They will also be required to maintain their commissioned status in the Naval Reserve for a total of eight years after appointment.

Applicants for this program must be between the ages of 21 and 31½ and have at least two years approved college credit, or have satisfactorily completed the USAFI GED test, college level.

Other requirements include: at least one year of service in grade, active duty at a permanent station for at least two months or more, and at least six months obligated service under current enlistment upon receipt of orders to school.

Bedside Telephones Furnished on Wards

Telephone operators will be on duty from 0900 to 2100 on Christmas. Patients confined to their beds can use the bedside telephones over which to make and receive long distance calls.

Booths and other facilities are available to meet the requirements of up patients, including those in wheel chairs and with impaired hearing. This telephone center is located between wards 3-A and 5-A. In the adjacent solarium there are out-of-town directories, writing tables, stationery, magazines and comfortable lounge furnishings.

An additional wheel chair booth is located in the solarium between wards 3-C and 5-C.

The regular hours for the bedside service are 1230 to 2000, daily.

These services have been made available jointly by NNM and the Chesapeake and Potomac Telephone Company of Baltimore.

NDS Dentists End Postgraduate Course

The second class of 1952 in the Dental Postgraduate course graduated Dec. 19. Delivering the graduation address was a former member of the NDS staff, R. Adm. B. Groesbeck Jr., who is now Surgeon General, Dental, Bureau of Medicine and Surgery.

In the six months course, dentists studied a variety of subjects ranging from administrative problems to prosthodontics, public speaking and special sessions courses.

Two of the graduates were retained here. Dr. Neilson, a member of the NDS staff, Dr. Davies has been retained.

Graduating doctors are: H. Bercier, L. R. Frantz, A. H. Rodenbarger, J. T. Rodenbarger, J. A. Thimes, R. B. Thimes, Lt. Cdr. W. A. Rusk, Lt. Cdr. W. A. Rusk, R. M. Blackwood, N. W. Gray, Lt. L. A. Benson, W. Gray, Lt. L. A. Benson, Davies, R. W. Hughes, Jr., Koester III, H. B. Marble, Welden, and Surgeon Captain R. Woolcott, RAN.

Fort Belvoir Next For Women's Varsity After One Easy Win

The women's varsity cagers can lay claim to an undefeated season—at least until Jan. 13, although they have played only one match. The scheduled game with Bolling Air Force Base was cancelled at the last minute when the Air Force team unexpectedly withdrew from the league.

Patuxent River also pulled out, leaving 12 teams in the competition. This means the Admiralties will face 10 more opponents after the holidays.

Win First Match

The gals snatched their first league win on Dec. 9 when they walloped their hostesses, the Ft. Myer Headquarters team, 42-30. Despite the comparatively easy victory, the team was not clicking as well as might be, and "Shorty" scheduled a between-games practice to work out some new plays.

"Boots" Carlson, playing only two quarters of the match, was high scorer for the gals as she flipped in nine ringers and a free shot for 19 points.

Joan Mihay and Josh Shook cashed in on 14 and 7 points apiece. Allen, who sat most of the game out because of sprained fingers, contributed two counters in the first quarter.

Bradford, Cox and Crouch were the main line of defense with Evans and DeBerry relieving them. In a pre-game election, Shook and Bradford were chosen captains of the forwards and guards, respectively.

After a holiday breather, league play will resume on Jan. 13 when the Admiralties travel to Ft. Belvoir.

Local Cagers, After One Win, Drop Four To Reed, Anacostia, Marines, Vint Hill

REED SCORES TWO for the Admirals in the clash with Marine Barracks on Dec. 11, as Kreisl comes in to support him.

After starting off the MAISAC league with a decisive 72-63 win over NAS, Anacostia, the Admirals have dropped four consecutive games to league opponents. Basis of the varsity's trouble is lack of height, with Reed being the only member over six feet.

In a close match with the Anacostia Receiving Station, the local six were speedily narrowing the point margin when the final whistle left them trailing 55-59. DeVice and Schilling took the scoring honors for the evening.

On Dec. 9, the varsity went down by 10 tallies at Walter Reed, losing 58-68. Of special note was the offensive as well as defensive playing of Reed. Hauck turned in an exceptionally fine floor game.

In the tangle with the Marine Barracks, the latter got off to a 20-7 lead early in the first quarter. The Admirals tied it up before the half, but were unable to maintain the pace in the final half and lost 58-72.

Last Tuesday night the Vint Hill Farms squad took 11 long shots in the first quarter, scoring nine of

them. Trailing 2-14, the Admirals brought it up to 12-14, only to drop far behind again and be swamped 93-60.

DeVice was high scorer, as usual, with Carrobbine also hitting the boards for a good share of the NNM points. Breakdown of the evening shows:

Name	Pos.	FG	FT	F	TP
DeVice	F	4	8	4	16
Carrobbine	F	5	2	1	12
Anama	F	—	—	—	—
Siltmen	F	2	—	1	4
Schilling	F	1	1	4	3
Veneziano	F	—	—	1	—
Reed	C	3	2	1	8
Epstein	G	3	4	2	10
Hauck	G	2	3	3	7
Rutolo	G	—	—	—	—
Davis	G	—	—	—	—
Totals		20	20	17	60

The 'Cat' Returns to Aid the Yankees, Disproving Many Rumors to the Contrary

(AFPS)—The "Cat" is once again returning to the baseball wars. Johnny Mize, who broke in with the St. Louis Cardinals in 1936, has announced his return to the New York Yankees as a utility infielder and pinchhitter for the 1953 season.

Despite '52 spring training rumors that the former New York Giant first sacker was washed up, Mize fulfilled his role with Casey Stengel's champs in a commendable way.

The Demorest, Ga., slugger came close to joining the select 2,000-hit group, finishing up the regular '52 campaign with a lifetime total of 1,985 safeties, despite a .250 batting average.

The sensational play of the 39-year-old lefty in the World Series, in which he connected for three homers while batting a .400, left little doubt that he would return to the Bomber lineup next year.

By pinch-hitting a home run in Griffith Stadium last September, Mize also became the only player in baseball history to hit a homer in each of the major league's 14 parks.

The most important factor in "Big Jawn's" long career in major league baseball is that he has always followed the rule of "staying in shape."

During WWII he was in the Navy and stationed on the island of Guam. Knowing that someday he would return to the diamond game, Mize worked out daily with the only available athletic gear—wrestling mats. And when the tropic temperature reached its peak, the big guy would enclose himself in a tent and proceed to do pushups and lifts.

Major League Teams Welcome 30 Players

New York (AFPS)—More than 30 major league baseball players will be discharged from the Armed Forces in time to rejoin their clubs for the 1953 season, according to a recent survey.

Most of the performers played a great deal of baseball during their two-year service stints and many should win regular jobs next spring. Major league teams are required to keep returned servicemen on their rosters for one year, although the players are not counted in the 25-man player limit.

The New York Yankees, Boston Braves, Cleveland Indians, Detroit Tigers, and Pittsburgh Pirates stand to benefit most from returning servicemen. Among those returning to the diamond wars are: Whitey Ford, (Yanks); Johnny Antonelli, Del Crandell, (Braves); Jim Lemon, Dick Welk, (Indians); Danny O'Connell, Bill MacDonald, (Pirates); and Ray Herbert, (Tigers).

Other standout prospects include: Sam Calderone, (Giants); Preston Ward, (Cubs); and Dick Kokos, (Browns).

Fort Belvoir Next For Women's Varsity After One Easy Win

The women's varsity cagers can lay claim to an undefeated season—at least until Jan. 13, although they have played only one match. The scheduled game with Bolling Air Force Base was cancelled at the last minute when the Air Force team unexpectedly withdrew from the league.

Patuxent River also pulled out, leaving 12 teams in the competition. This means the Admiralties will face 10 more opponents after the holidays.

Win First Match

The gals snatched their first league win on Dec. 9 when they walloped their hostesses, the Ft. Myer Headquarters team, 42-30. Despite the comparatively easy victory, the team was not clicking as well as might be, and "Shorty" scheduled a between-games practice to work out some new plays.

"Boots" Carlson, playing only two quarters of the match, was high scorer for the gals as she flipped in nine ringers and a free shot for 19 points.

Joan Mihay and Josh Shook cashed in on 14 and 7 points apiece. Allen, who sat most of the game out because of sprained fingers, contributed two counters in the first quarter.

Bradford, Cox and Crouch were the main line of defense with Evans and DeBerry relieving them. In a pre-game election, Shook and Bradford were chosen captains of the forwards and guards, respectively.

After a holiday breather, league play will resume on Jan. 13 when the Admiralties travel to Ft. Belvoir.

Miss Crowell, Hess Rolling Top Honors

As the women's bowling turns into the second half, the Submarines, in first at the beginning of the season, still hold the number one position. In second, trailing the underwater mariners by three games, are the Icebreakers. Following are the Minesweepers, Carriers, Destroyers and Battlewagons.

Grabbing high team game was the Carriers with an aggregate score of 633. This total toppled the Battlewagons with a 567 into second place in high team honors.

Miss Crowell, a pinpounder from the Minesweepers, grabbed two top honors this issue and took second high in individual game. The GU nurse, with a top average of 132, took high honors in the high series bracket with a 432. Miss Crowell, women's bowling league captain, has a second place 169 in the high game listing. In first is Miss Hess with a 172.

Women's bowling has been suspended until the end of the holidays. League play ends in the second week of February.

Team	W	L
Submarines	17	4
Icebreakers	14	7
Minesweepers	12	9
Carriers	7	8
Destroyers	8	13
Battlewagons	5	16

High Team Game: Carriers—633
High Team Series: Icebreakers—1783

Individual High Game: Hess—172
Individual High Series: Crowell—432

High Average: Crowell—132

SPORTS FLASH

NNMC Admirals trounced the visiting Arlington Hall squad 60-50 last Thursday night. DeVice flipped in 18 points, Epstein—13, Reed—10, Hauck—8, Carrobbine—6, and Siltmen—5. This was Epstein's last game as he transferred to Chelsea last Friday.

Gold's CPO Club, Blue's NDS Officers Lead Alley Leagues at Mid-season Finals

Men's intramural bowling reaches mid-season this week with final matches in both the Blue and the Gold schedule. Plains are already underway for the second round and new starts for all teams. After the holidays, a single league will be formed and the scramble for the Center Championship will be in earnest.

First-half winners in both the leagues were decided before the final week.

In the Gold League, the CPO Club takes the honors even though the Mat Class D aggregation bounced the leaders in their final match. Led by Chief O'Keefe, the CPO Club team won 26 and lost only 10 to retain the lead all the way.

O'Keefe saved a match with a mately double in the extra frame when they deadlocked with Dental terms in the third game of their match.

Final Standings in the Blue League give NDS Officers a one-point margin over the fast finishing Research "Zeros" and NMS Lab. MS Lab, in their final match with the officers, pinned the first defeat on the leaders.

The steady, pace-setting accuracy of CWO Ferguson, team captain of the winners, contributed much to the team's success. Drs. Colby (233) and O'Malley (579), respectively, took high game and high series in the league.

Final standings in the Gold League will have to wait until the next issue. Second place is still in doubt with NSHA Staff, Mat Class and Lab Class 19 in a three-way deadlock for second-place honors.

NNMC Varsity Sits This One Out

Varsity Basketball Team, which will tangle with the Ft. Belvoir on Jan. 6, includes: (front row) L. K. Schilling, W. J. Hauck, N. Epstein, and R. E. DeVice. Second row: P. J. Veneziano, W. C. Siltmen, Rutolo and F. J. Ahama. Last row: R. C. Kreisl, E. B. Reed, J. A. Kett and J. Garrobbine.

by George

The T.V. set moved down about 12 inches so we can see without a stiff neck. . . . More locker space, more drawer space, so we can move around without bumping the people we live with. More Wave parties. . . . Our basketball team will win more games with less wounded fingers. . . . Joan Troop will bowl her best game when bowling with the team, not two games later. . . . Lou and Katie will be called "Miss." . . . Billie Lawton will be the first to know. . . .

NMRI

by R. Conaway

The gals in the Steno Pool gave a Christmas Party on Dec. 18th. Lunch and fruit punch were served, plus a good supply of Christmas carols for entertainment. Instead of exchanging presents this year, the gals showed a true Christmas spirit by each bringing a small toy to be turned over to some child welfare organization, in the hopes of bringing a bit of cheer to some of the less fortunate youngsters in this area.

As this is the last issue of the old year, I'd like to take a few lines to wish my shipmates the Merriest Christmas and the Happiest New Year of all.

Doolittle heads a national advisory committee which will assist communities in arranging special programs throughout the year. The observances will begin Dec. 17, 1952, the 49th anniversary of the first flight of the Wright brothers, and continue through Dec. 17, 1953.

has his application in for O.R. school. Like many others who take advantage of the opportunities offered by USAFI, he is willing to convert his spare time into preparation for the future.

Viomycin has been found especially active against certain tubercle bacillus. From the fungus of the soil of Japan comes rhodomyacin. Rhodomyacin is the new development of the Rutgers laboratory. From other fungi come the latter two, actinostreptomycin and streptothricin.

'Old World' European Cultures Serve As Basis of America's Modern Christmas

(AFPS)—American Christmas traditions, like most of our customs, are based directly or indirectly upon the cultures of "Old World" Europe. Adapted by our ancestors to fit the American mode of life, they appear to be strictly "Made in America" products; but findings of historians and scholars prove otherwise.

The word "Christmas" is accredited to the Dutch expression "Kerst-misse," and the 11th century English "Cristes Maesse," both meaning Christ's Mass, or as we say, Christmas.

The birth of Christ has been celebrated since the fourth century; but the practice of exchanging gifts, banned by the early church as a pagan custom, didn't come into practice until several centuries later, and then only as a remembrance of the Three Kings of the Orient who followed the star to Bethlehem.

The first Christmas menu in this country, that of the Puritans aboard the Mayflower, consisted of: salt fish, bacon, brussels sprouts, gooseberry tarts, and plum pudding. Quite a difference from today's Christmas repasts!

It is in this category that America can lay practically her only claim to fame, namely the Christmas turkey and pumpkin pie.

Fred Musser, the largest grower of Christmas trees in the world, is convinced that his forebears originated the Christmas tree ceremony. "The Christmas tree was born in Germany," he says, "and brought to its warm perfection here in America."

Historians seem to bear out his statement for the Saxons hung their homes with holly, ivy, and bay while the Romans ornamented their homes and temples with green boughs and flowers for Saturnalia, their season of fun.

The beginning of the Christmas tree, as we know it, seems to date from Boniface, the famed English missionary to Germany, who replaced the sacrifice to Odin's sacred oak with a green fir tree, as a tribute to the Christ Child.

Old accounts also claim that Luther introduced the Christmas tree lighted with candles.

It is a matter of historical record that German Prince Albert, after his marriage to Queen Victoria, introduced the tree to England and that later German immigrants brought the tree to America.

New Year's Day Ain't When it Used to Be

Jan. 1: the day of the Philadelphia Mummers' Parade, the Pasadena Tournament of Roses, and the Rose Bowl Game. Jan. 1: New Year's Day.

It wasn't always so. For a short time in the New England states, New Year's was Dec. 25. The ancient Egyptians began their year on the date of the autumn equinox; the Greeks used the summer solstice, June 21, as the first day.

In the United States, it had been the custom from the beginning for the President to welcome the new year by holding a reception, open to the general public. The custom was suspended by President Franklin D. Roosevelt in 1934 as his lameness made it difficult to stand in a receiving line.

The custom of gifts, cards and new resolutions dates back to the earliest times. That the year might have an auspicious beginning, the Romans offered sacrifices to Janus and exchanged gifts and greetings with kinsfolk and acquaintances. Those who sought favor with the emperors gave them presents of great value.

In many churches, the day is a religious feast. The feast has been celebrated in the Roman church since 487 and the Anglican church since 1549.

The terms of "pin money" and "glove money" are derived from this holiday. During the reign of Henry III and Queen Elizabeth, it was considered necessary for a courting young man to present the girl (or girls) of his choice with either gloves or pins on New Year's Day. Sometimes the gifts were compounded in money and from this practice we have the terms "pin money" and "glove money."

A panhandler stopped a man on the street. "Can you give me six cents for a cup of coffee?" "Six cents?" asked the man. "Why, coffee is a dime." "So who buys retail?" said the panhandler.

Happy New Year!

A NEW YEAR'S PICTURE is not complete without a pretty girl. Supplying the final touch is lovely Virginia Gibson who would give any man a good reason to celebrate.

Holiday Punch

A husband had been making the rounds New Year's Eve. Returning home full of holiday spirits, he stood in a corner, arms outstretched,

'Twas the night before Christmas, And all through the house, Not a creature was stirring, . . . no spoons.

and said over and over, "I'm a Christmas tree, I'm a Christmas tree, but I haven't any ornaments." Just then his wife came in and hung one on him.

Little Jimmy's father found him in the barn shaking his Christmas present—a pet rabbit and saying, "Five and five. How much are five and five?"

The surprised father finally interrupted the proceedings: "What's the meaning of all this, Jimmy?"

"Oh," said Jimmy, "Teacher told us that rabbits multiply fast but this fellow can't even add."

New Year's Eve drunk to S.P.: "Just because my eyes are red is no sign that I'm a drunk. For all you know, I may be a white rabbit."

"I wish I were Santa Claus." "Why?"

"Then I could run around all night with a bag and not get talked about."

Little Lucy had just returned from the children's Christmas party and had been called into the dining room to be exhibited before the dinner guests.

"Tell the ladies what mama's little darling did at the party," urged the proud mother.

"I frowned up," said little Lucy.

The lady of the house was entertaining some friends on Christmas Eve when the pattering of tiny feet was heard on the stairs. She raised her hand for silence.

"Hush," she said softly, "the children are going to deliver their Christmas prayer. It always gives me such a feeling of reverence to hear them . . . listen."

There was a moment of silence, then a shrill voice: "Mama, Willie found a bedbug."

A lady got on a bus and took the only empty seat, next to a harmless-looking drunk. Soon she opened a map of Manchuria and began to study it. The drunk gazed at the map for a while and finally addressed the lady in an interested tone: "Sure you're on the right bus?"

College Night School Starting Here For Military and Civilian Personnel

The College of General Studies, George Washington University, announces registration for the spring term evening classes to be given at NMC. All classes will be held in Bldg. 131 from 1830 to 2100 and will commence the week of Jan. 26.

Courses slated for this term are: Speech 131 (conference leadership and group techniques)—Tuesdays; Problems in Personnel Management (pre-requisite: one semester personnel management)—Wednesdays; and Introductory Economics—Thursdays.

All of these courses are designed to meet once a week for 15 weeks and to carry three hours college credit. The professors are from the George Washington University staff and classes are identical to those given by the University.

Registration for these courses will be held at the Information and Education Office, Bldg. 102, from Jan. 19 through Jan. 23. All interested civilians and service personnel are eligible for enrollment. Parents must have the permission of their ward medical officer before attending class.

The cost of each course is \$30.00 for service personnel and \$36.00 for civilians. One-third of the tuition is due at the time of registration.

This fee is to be paid by check or money order made payable to George Washington University. If enrollment is insufficient to begin class, payment will be returned full.

For further information concerning this program, contact your Information and Education Officer, Bldg. 102, Ext. 547.

Civilians May Apply for Hospital Plan

Applications are now being accepted from NNMCC civilians for group Hospitalization, Incorporated. This group plan, a parent organization of the Blue Cross, is open only to government employees.

Applications should be submitted before Jan. 20. Payment of the premium must be made at the time that the application is submitted.

The types of contracts available

Plan A—Individual—Hospital only
—\$1.70 per month

Plan C—Family—Hospital only
—\$3.70 per month

Plan D—Individual—Hospital and Surgical—\$2.70 per month.

Plan F—Family—Hospital and Surgical—\$6.90 per month

Applications can be obtained from either Mr. Joseph Almond, Chief Quartermaster, Ext. 230, or Mr. P. Dudzik, Civilian Personnel Division, in Bldg. 101, Ext. 434.

Howard of NSHA Accepts Appointment To Warrant Officer

Uniform alterations were the order of the day for HMC Vaughn Howard on Dec. 15, when he accepted a temporary appointment to Warrant Officer Hospital Corps in a brief swearing-in ceremony at NSHA.

The oath of office was administered by Cdr. M. E. Zimmerman, MSC, USN, Commanding Officer of NSHA.

The new warrant officer reported to Bethesda in August 1952 to attend the current Medical Administrative Technicians' class after a tour of duty at the Bureau of Medicine and Surgery, Navy Department (Physical Qualifications and Medical Records Division).

Mr. Howard, a native of Murphy, N.C., enlisted in 1940 as apprentice seaman and advanced to chief pharmacist's mate by 1944. One of his specialties during his war-time

WOHC Vaughn Howard

service was that of deep sea diver on board the USS Mallard (ASR-4) from 1944 to 1946.

Among his duty stations have been the Naval Operating Base, Norfolk, Va., Deep Sea Diving School, Washington, D. C., and the Navy Submarine Base, New London, Conn.

He was also stationed at the Navy Recruiting Station, Raleigh, N.C., the U.S. Naval Hospital, Coco Solo, C.Z., and on board the USS LSM-398 before returning to Washington for duty at BuMed.

Mr. Howard is married and is the father of three children. The Howards are presently making their home in Washington, D. C.

Famed Varsity Glee Club of Purdue University To Render Choral Auditorium Show Next Sunday

DIRECTING THE GLEE CLUB in Sunday night's presentation will be Albert P. Stewart (left), one

of the Nation's outstanding leaders in the field of choral music. Right: the near-50-man Purdue Glee Club.

January Drive Seeks Funds for Fighting Infantile Paralysis

The 1953 March of Dimes will be conducted nationally and locally from Jan. 2 to 31. This is the second year that a full-month campaign has been made necessary by the seriously mounting financial responsibilities of the National Foundation for Infantile Paralysis.

The increased need for money results not only from the record number of families needing assistance in the wake of 1952's worst epidemic in history, but also from the growing number of patients stricken in previous years who continue to need March of Dimes help. It is estimated that 58,000 of these "carry-over" patients are still on the rolls this January.

As the NNMCC March of Dimes campaign got underway last week, the wishing well was set up in the lobby of Bldg. 1. Outside the Navy Exchange restaurant, milk bottles are again on display and the race is on to see which state will draw the most donations.

In 1951, New York copped the race with \$11.33. (This did not include the \$1.33 deposited separately for Brooklyn.) Last year Maryland came through with \$12.50 with Illinois following with \$10.07.

Lt. E. C. Wilson, who was chairman of last year's committee, has been reappointed to the task this year. Five key men have also been named to conduct the campaign within their respective commands. They are:

Lt. G. R. Henry, MSC, of NH; Lt. Cdr. G. R. Moore, MSC, of NMS; Lt. E. J. Rockett, MSC, of NDS; Lt. I. V. King, MSC, of NMRI; and Ltjg. L. M. Biggs, MSC, of NSHA.

Last year's campaign netted \$879.66, an increase of \$378.90 over 1951. Naval Hospital led the commands, turning in contributions totalling \$130.

Musical Aggregate of Nearly 50 Voices Will Offer Wide Variety of Selections

One of the top collegiate glee teams, the Purdue Varsity Glee Club, is coming to NNMCC. Next Sunday at 1900 will see a group of some 50 men on the NNMCC stage who, according to Fred Waring, are the best he has heard.

Dividends Revealed For NSLI Insurance

(AFPS)—Another dividend will be paid in 1953 to servicemen holding National Service Life Insurance policies, the Veterans Administration has announced.

The first payments will be made in February to approximately 5,000,000 eligible veterans, including personnel now on active duty.

The size of the individual payments for most policy holders will be the same as in 1952, when an average of \$60 was paid.

To be eligible, the policy holder must have paid premiums for any three or more months between the anniversary date of his policy in 1952 and the same date in 1953.

Personnel who are eligible for the new dividend, but did not apply for the '52 dividend will have to apply to VA Headquarters, Wash., D. C. Policy holders who applied for the '52 dividend will receive the '53 dividend automatically.

Payments will be made 30 to 40 days after the anniversary date of the policy.

The method of payment will be the same as in 1952 unless the policy holder informs the VA to the contrary. In this instance he should notify the VA office to which he pays premium.

Applications for the 1953 dividend must include your full name, mailing address, policy number, serial number and date of birth. All applications must be signed in the policy holders' own handwriting.

The 1953 dividend is the second regular one on NSLI policies—the first was paid this year and totaled \$180,000,000.

The repertoire of the Purdue University glee team is boundless. During the program the locals might hear anything from a stately immortal to something in a lighter, more rollicking vein.

The group, under the leadership of Albert P. Stewart, director of Purdue Musical Organizations, is famous for its ability of wonderful informal showmanship.

It has a versatile band of soloists and specialists. The latter group even now delves into the intricate and difficult realm of pantomime with marked success, and it would be no surprise to see someone break forth with a sleight-of-hand or hypnotism while the rest of the group sings "Black Magic" or something similar.

There's no intermission in the program; action never lags. Among the group's favorites are the beautiful, stately "Spirit Immortal" by Verdi, and the oratorio-style "Hallelujah Amen" by Handel.

Then the tenor of the program may change. "Star Dust," "September Song" or the rhythmic "Dry Bones" might follow.

As the finale, there will almost certainly be that all-time favorite hymn of the American people, "The Battle Hymn of the Republic." This has become virtually a theme song of the club.

The 43-year-old director of the club, Albert P. Stewart, is one of the nation's outstanding leaders in the field of choral music. A brilliant director, with remarkable ability to make members of any group responsive to his every move, he also possesses a pleasing personality and ready wit which makes him an excellent master of ceremonies on any occasion.

The choral aggregate will be in Washington for the Inauguration.

Romance of the Seasons

"Grim Winter" they call you—no pity hath they,
They see just your frozen smile as gently you lay
Your tresses of ermine on bare hill and tree—
Left naked by Autumn's one last gay spree.

They know not the story of why your brow is cold,
Of the treachery of Springtime, your lover of old.
How you waited through snowtime, for his promised return—
How he ran off with Summer, in her bonnet of fern.

He had wooed you and won you, then broke your ice heart,
And your tears grew the green grass that gave Springtime his start.
You had sheltered his brown earth so he'd have flowers by May,
Then he gave them to Summer in a bridal bouquet.

But poor Winter take comfort—and a secret I'll share,
Summer left Spring for Autumn, with his gold-tinted hair.
—R. CONAWAY, NMRI

The Chaplain's Corner

Real Happiness

by Chaplain Ambrose T. McGinnity

People are inclined to be swayed by their inclinations rather than by their minds. There is proof of this in the persistence of mankind to seek happiness in the many things which experience testifies have never produced it.

After thousands of years man, it seems, should have learned both what genuine happiness is and by what avenues it is reached. Philosophers of all ages have uniformly taught that there exists in the heart of every man creature an irresistible longing for happiness. There are few normal people who will not subscribe to such teaching. But when the definite answer is sought to the question "what makes for true felicity?" philosophers differ accordingly as they are spiritually-minded or materially-minded men.

Happiness cannot consist in the mere thrill which young men and women derive from their dreams, or from entertainment, or pleasure trips, or from the bottle, or from all-night celebrations. Momentary satisfaction of appetite or passion is not happiness. Other things on which the average person depends for more permanent gratification, such as money and fame, are commonly associated with grief, worry and disappointment. Such has been their history through the ages, but the lesson is never learned.

A certain wealthy Florida gentleman whose dream was financial independence, from his thirteenth year on, achieved what he longed for, only to find that his children had different notions from his concerning what made for happiness and contentment. They cared not for his palatial home in the north for the summer, and, when older, left him alone in his beautiful southern mansion to achieve their own interests, having failed in the business their father had established for them.

After many trials he learned money could not buy happiness. Fortunately his reverses had the effect of withdrawing his mind from the things of the world and to fasten it on God, the source and end of all happiness. The industrial depression of the thirties had a similar effect on thousands of persons. They came to regard their loss of fortune as a blessing in disguise.

Well does St. Paul say that the sensual man perceives not these things which are of the Spirit of God. Since the generality of people has always been and are sensual-minded and materialistic, the way to supreme happiness is still undiscovered.

Episcopal and Lutheran Communion

Each Friday until further notice, Episcopal communion will be given in the Protestant chapel at 1000 by the District Chaplain, Chaplain Linaweaver. Holy Communion (Lutheran Liturgy) will be held in the Protestant chapel each Sunday at 0830.

Current Issue Marks Start of Ninth Year For Station Paper

With this issue, the NNMC NEWS enters its ninth year of publication.

Launched on Jan. 6, 1945, the NEWS began as an eight-page weekly, appearing on 8" x 10 1/4" stock. Continuing for over two years, the paper went out of existence on March 3, 1947 and was not revived until Nov. 27 of the same year. It reappeared then as a bi-monthly eight page on 5 3/4" x 9" paper.

November 1948 marked the beginning of the NEWS as we see it today, when it converted to its present size of 12" x 17". In 1949, under the editorship of Ronald Bourgea, HM2, the usual three-page plus a pictorial was increased to six pages.

Circulation increased that year from 1,500 to 2,000 copies. Bourgea introduced such standing features as Navy Belles and other columns from the different commands, recruiting volunteers to submit the material.

Bourgea departed for FMF duty in August 1951 and his assistant editor, Joan Madsen, JOSH (now Joan Mihay, JO2) assumed the job. Present assistant editor, Wade Walker, HM3, joined the staff in October 1951.

Lt. J. O. Atkinson, MSC, has been editor-in-chief of the NEWS since the fall of 1948. It is his responsibility to see that the policy of the paper is established and maintained in a manner that will bring credit and service to both the station and military and civilian personnel.

As Public Information Officer, Lt. Cdr. F. S. Haslam, MSC, also has cognizance of the content of each issue. He personally reads all material before it goes into print.

The NEWS attempts to represent equally all the commands which are combined to make the National Naval Medical Center. The mission of the NEWS is to serve as a positive factor in promoting the efficiency, welfare and contentment of personnel and to honestly reflect the prestige and character of the station.

Divine Services

Protestant

Daily—
1200—Daily Meditation broadcast from Protestant Chapel (Monday through Friday)

Sunday—
0830—Holy Communion (Lutheran Liturgy)—Protestant Chapel

Jewish

Congregation Beth El of Montgomery County will hold services every Friday night at 8:30 P.M. and Saturday morning at 10:00 A.M. in the Pook's Hill Auditorium, 3 Pook's Hill Rd. The services will be conducted by Rabbi Martin Kessler.

The services of Rabbi Harry Kaufman, representing the Jewish Welfare Board, are available to all Jewish Personnel and Patients at the National Naval Medical Center. Rabbi Kaufman may be reached by calling the Chaplain's Office, Ext. 324, or by call direct—Office: RA. 3-5371—Home: RA. 3-0755.

Welcome to NNMC

FIRST AND LAST VIEW of the tower, as seen by those reporting in and those leaving, is the first installment of a series of scenic pictures taken on the station. The series will run for several issues, depicting different views of NNMC.

BuPers Instructions Give All Details Needed to Apply for Ensign Commission

Questions are still being asked about the opportunities in the Metric, Pharmacy and Medical Allied Science sections of the Marine Service Corps of the Regular Navy.

Applicants for these MSC appointments must be officer or enlisted personnel of the Regular Navy, the Naval Reserve on active duty, officer or enlisted personnel of the Marine Corps or Marine Corps Reserve on active duty.

Age

Male candidates must have reached their 21st but not their 30th birthday at the time of appointment. Women candidates must have reached their 21st but not their 30th birthday on July 1 of the calendar year in which appointed.

Citizenship

Both male and female candidates must be citizens of the United States.

Physical

All candidates must be physically qualified in accordance with physical requirements for appointments in the Staff Corps of the Regular Navy.

Dependency

While there are no restrictions for men, women will not be eligible if the natural or adoptive mother of a child under 18, the personal guardian of a child under 18, or the stepparent of a child under 18 who lives within the household of the applicant for a period of more than 90 days per year.

Education

Applicants for appointment in the grade of ensign must have a minimum of an acceptable O.D. or B.S. degree in optometry, pharmacy or a bachelor's degree with a major (30 semester hours) in one of the sciences allied to medicine (listed below) from an accredited college or university.

These allied sciences are:

Bacteriology, pharmacology, physics (biology minor), biophysics, physiology, public health (industrial hygiene), entomology, psychology (clinical), public health (sanitation), epidemiology, psychology (experimental), parasitology, radiobiology, pathology, and chemistry (biology minor).

For appointment to Ltjg., candidates must hold an acceptable D.S. or Ph.D. degree in the subjects listed above.

Examinations

Mental, moral and professional fitness and aptitude for these appointments will be established by means of interviews, investigations and views of college and employment records.

All candidates will be required to take a professional examination. Examinations will be conducted in April of each year. Subjects to be covered in the test can be found in BuPers Instruction 1120.8.

Applications

Personnel desiring to be considered will submit a written request to their commanding officer. The commanding officer will review the qualifications and, if the applicant appears to be qualified, will direct the candidate to be physically examined.

A "Chief and First Class Petty Officer Evaluation Sheet," reflecting the commanding officer's observations of the candidate, will accompany the other papers.

Personal interviews by a local board will follow. When all documents have been assembled, the applicant will submit a formal application to the Chief of Naval Personnel via his commanding officer. Included will be a birth certificate, transcripts of all colleges attended, loyalty certificate, and papers held by the CO.

Deadline Date

All applications for consideration under the provisions of this program must be forwarded so as to reach the Bureau of Naval Personnel between the period of Nov. 1 and Jan. 1. Applications received in the Bureau prior to Nov. 1 or after Jan. 1 will be returned for resubmission.

Selection and Appointment

A professional board will convene in the Navy Department to select candidates to fill vacancies as may exist in the Medical Service Corps. Selected candidates will be ordered to appear at a designated Naval Hospital for professional and physical examination by a board of examiners. Candidates who are not selected or who are found not qualified will be notified individually by the Chief of Naval Personnel.

JANUARY 12, 1952

Mother Clarke Distributes Gifts Again As She Donates Her 36th Pint of Blood

Through persistent house-to-house and store-to-store visits, Mother Clarke returned to NNMC prior to Christmas with an automobile full of gifts and over \$200 for the patients.

The gifts, which nearly filled a station wagon, included a variety of presents ranging from the edible to the wearable. Candy, ice cream, cigarettes, five radios, a TV set, civilian attire, games, crossword puzzles, tie and collar sets, books and magazines were a few of the variety of presents distributed to all of the wards.

The money, both from individu-

FREE PHONE CALL HOME prior to Christmas is enjoyed by Pfc. Edward J. Miller, USMC, 6-C patient. Standing by is Mother Clarke, who collected \$115 for just such calls as this.

and organizations, was collected by Mother Clarke and Mrs. J. T. Maun, who accompanied Mrs. Clarke. It will be used for phone calls for the patients.

Another pint of blood was donated by Mrs. Clarke. This brings the total of her donations to the record-high of 36 pints, 4½ pints of blood.

Mother Clarke, Mrs. Charles H. Clarke of Thurmont, Md., has been visiting NNMC since the middle of April. In these nine months, the amazing woman, the mother of children, has raised and donated literally thousands of gifts for the Naval Hospital's sick.

During this same period Mrs. Clarke added two blood donations to her 34 for an NNMC near-record total of 36 pints.

This was Mrs. J. T. Maun's first visit to NNMC. From Pennsylvania, Mrs. Maun collected a share of gifts by house-to-house canvas, both foot and by phone.

Capt. of Navy is First Government Agency to Win Promotion of Suggestions Award

The National Association of Suggestion Systems' "Achievement Award for Outstanding Promotion of Suggestions" was awarded to the Department of the Navy for the calendar year 1951.

The award was made at the annual NASS convention in October, marked the first time this award has been won by a government agency.

The winner of this award is selected each year by an impartial committee which judges the over-all effectiveness of the promotion programs submitted by the member companies and government agencies. Winners of this award are:

1949—Peoples Gas Light and Coke Company, Chicago, Ill.; 1950—Gift and Company, Chicago, Ill.; 1951—Ford Motor Company, Dearborn, Mich.; 1952—Department of the Navy.

The material submitted by the Navy was a composite of the promotional efforts of the departmental headquarters and field activities. The success of the combined promotional effort is indicated in the following statistics:

	1951	1950
Number of suggestions submitted	67,076	36,823
Submission rate per 100 employees	17.1	14.4
Number of suggestions adopted	16,850	11,191
Amount of cash awards	\$456,980	\$265,620
Average suggestion award	\$27.12	\$23.74
Value of annual tangible savings	\$11,587,967	\$6,014,593

The winning of this "NASS Achievement Award" is a tribute to the splendid work of awards program administrators whose promotional efforts made such valuable contributions; to management officials and supervisors whose support of the Program was indispensable; and to the thousands of Navy employees who responded.

JANUARY 12, 1953

Taylor Cup to Bear Names of Patients Winning O.T. Contest

This month NNMC received a beautiful silver trophy from Miss Louisa R. Alger of Cambridge, Mass., in memory of her late uncle, Adm. M. M. Taylor, who spent his last months as a patient here.

The Taylor cup, which stands 18 inches high and is mounted on a black base, will be awarded for the first time next winter, shortly before Christmas, to the physically handicapped patient showing the greatest proficiency in occupational therapy.

A preliminary contest will be held before the annual Philmont Country Club Service-wide contest. A committee of three members of the staff of the Naval Hospital will judge the results of occupational therapy endeavor and the winner's name will be engraved on the cup.

In addition, the winner will receive a letter from Miss Alger congratulating him on his progress and

INSCRIPTION reads: Fortitude—In honor of—Montgomery Meigs Taylor—Admiral U. S. N.—1869-1952.

pointing out that his efforts will serve as a stimulus to all patients.

The Taylor cup will remain at the Medical Center, and each year the name of another winner will be added.

See Inauguration on TV

For many, the only "Down in front" heard during the Inauguration will be in the local TV lounges.

Televising of the Inauguration and parade will begin at 1130 and end at 1630. All networks will handle it.

According to NNMC Notice 12105, Inauguration Day, Jan. 20, shall be a non-workday for civilian employees. Military personnel who wish to observe the ceremonies shall be, if feasible, released.

Each of the networks plans to use approximately 15 cameras, some located at the Capitol and the majority along the parade route. More than 500 commentators, announcers and technicians will be used in televising the Inaugural festivals.

Two More Complete GED

The information and education office announces that two more people have successfully completed GED tests. Norma E. Schrader, YNI, passed the first year college level, while Cpl. Peter J. Bingheimer, USMC, ward 3-C patient, completed the high school level test.

Capt. Gatlin Retires from Active Duty With Over 35 Years as Navy Chaplain

"If I had it to do over again, I'd be a Navy chaplain." These were the words of Capt. Henry Grady Gatlin, CHC, USN, two days before he retired from active duty. Spoken with conviction, these words reflect the realization of a useful and satisfying career of over 35 years in the Navy's Chaplain Corps.

Messages to 'Folks' Will be Sent Free

The servicemen get a break on this two-way deal no matter how you figure it:

Several imaginative and understanding "ham" radio operators have told the Armed Services Hospitality Committee of Washington, D. C. that they will accept and transmit radio messages, free from homefolks, to G.I.'s overseas.

Messages should not contain more than 15 words and should be printed in plain English. To avoid errors, the address must include the full name, rank and serial number of the serviceman abroad, plus his APO number and city to which mail is dispatched for overseas shipment.

They will also be happy to send personal messages from servicemen or women stationed near here to their families "back home." The Committee accepted the offer and has christened the operation "Ham-Grams."

All messages must be signed with name and address of sender.

The Committee will receive such messages by mail at 1350 Pennsylvania Ave., N.W. For further information call REpublic 7-4104.

'Well Done' to Nolder For Urology Dept. Duty

A "Well Done" was recently extended to Harold L. Nolder, HM3, by Capt. B. W. Hogan.

Nolder, ex-charge corpsman of the Urology Clinic, recently was awarded a Letter of Commendation by the Commanding Officer of the Hospital.

Harold, here since his recall in March of '51, has worked in urology wards and clinics since July 1951.

The commendation read in part: "The Commanding Officer takes pleasure in commending you for the outstanding quality of work you have performed in the Urology Department since 30 July 1951.

"In addition to courtesy and tact at all times, you have shown unusual initiative and great dependability. You have often assumed duties above and beyond those required by your rate."

Nolder was released to the inactive reserve on Wednesday, Jan. 7. A native of Baltimore, the new civilian is returning to Loyola University for a pre-medicine course.

Diaper Derby

Dec. 12—Sandra Lee Snodgrass, 6 lbs., 11¼ oz., new daughter of Stanley B. Snodgrass, HMC, student, NSHA.

Dec. 14—Christopher Laue Conard, 6 lbs., 11 oz., new son of Cdr. Robert A. Conard, staff, Atomic Medical Research Division, NMRI.

Dec. 24—Charles Edwin Ranes, 6 lbs., 13½ oz., new son of William A. Ranes, HMC, student, NSHA.

Dec. 28—Kevin Lee Jones, 5 lbs., 9 oz., new son of Lee C. Jones, HMC, staff, NMRI.

Dec. 31—Joanne Knoebel, 6 lbs., 15½ oz., new daughter of Richard C. Knoebel, HMI, student, RIT School, NMS.

When he retired on Jan. 1, Chaplain Gatlin had more time on active duty than any chaplain in the Navy today. He can point with just pride to the fact that out of those 35 years, 18 years and 7 months

Capt. H. Grady Gatlin

were served at sea or outside the United States.

The chaplain was born in Lincoln County, Miss. He attended Mississippi College and Millsaps University. Ordained by Bishop E. R. Hendrix, he served as pastor of Methodist churches in Missouri for several years before coming into the chaplaincy.

Entering the Navy Aug. 3, 1917 as a lieutenant junior grade, he served aboard the USS Brooklyn, USS Georgia, USS Baltimore, USS Rigel, USS West Virginia and USS Yorktown.

In 1922 he was the first Navy chaplain to be stationed at Pearl Harbor. His duty stations abroad included duty as the Force Chaplain of Fleet Marine Force Pacific before reporting here in the spring of 1949.

Serving as senior chaplain of NNMC for the last four years, he personally covered towers eight through sixteen every working day without exception.

As he leaves the Medical Center, numerous tributes of his energy and initiative remain. He originated the system of an immediate visit by a chaplain to all patients placed on the critical or serious list, regardless of the hour.

The renovation and refurbishing of the Catholic chapel, as well as the establishment of the chaplain's office on the second deck were carried out during his tour here.

He initiated the idea for the reredos painting, now nearing completion, which will be used as a backdrop for religious services in the auditorium.

The annual Easter sunrise service in cooperation with all the Protestant churches of Bethesda, is another result of his endeavors.

He organized and participated in the character-guidance program conducted here last fall, plans for which are now being copied by many other Naval hospitals.

The chaplain will now be free to devote his time to gardening and the building of his study in the basement of his home at 8625 Irvington Ave., Bethesda.

Capt. and Mrs. Gatlin have two children and two grandchildren. Their son, an attorney attached to the Civil Aeronautics Administration, lives in Chevy Chase. The daughter, Mrs. Young, teaches at Bradley School in Bethesda.

"Now you apologize to this poor fellow for those naughty names."

"All right! Who's the wise guy with the Basso Profundo?"

'The Basic Duty of the Chaplains Is the Visitation of the Sick'

To us NNMC means a command. To five staff officers—the chaplains—the confines of this compound also enclose a parish.

"Cooperation without compromise," the unofficial motto of the Chaplains' Corps, best exemplifies these men. Of four different denominations, these men have but a single basic purpose—religious leadership.

Religious leadership, however, merely begins the long list of duties involved in being a hospital chaplain. Big brother counseling, fatherly advice and a near-motherly concern are a few, it seems, of the necessary attributes of the local padres.

The main duty of the local ministers and priests deals with religion. The collateral duties, however, deal with hundreds of subjects ranging from counseling to consoling, from advising to admonishing and from morale to morals.

The chaplains here at NNMC are: Capt. Paul Linaweaver, PRNC District Chaplain here on temporary duty, Episcopalian; Cdr. D. J. Kosky, Catholic; Lt. N. V. Brink, Methodist; Lt. W. G. Sadt, American Lutheran, and Ltjg. A. T. McGinnity, Catholic.

Worship

In Bldg. 2, three areas have been assigned for religious services. The auditorium with its large seating capacity is utilized for all Sunday services and, at other times, when a larger attendance is expected. The smaller chapels, both recently renovated, are used for most daily services and open for daily meditation.

Each Sunday, a Protestant service and two Catholic Masses are held here. Daily, a Mass is celebrated in the small Catholic chapel and a meditation service, which is broadcast to the wards, is held each noon, Monday through Friday, for the Protestants.

Besides officiating at worship, weddings and baptisms, the chaplains conduct other services. For the Catholic priests, rosary devotions during Lent, Advent, and the month of October, Holydays services plus First Friday devotions, and Our Lady of Fatima Novena prayers. During Lent a special week-long mission is held for Catholics.

Each Friday at 1000 the clerics of St. John's Episcopal administer Communion. Special holidays and Holydays are observed by the Protestant chaplains, such as Easter, and Festival of Christ the King and Armistice Day.

Services are not restricted to the auditorium or chapels. Any bed or bedside locker, day or night, may be a temporary altar for the administration of baptism, communion or the last rites.

Humanitarian Services

"The basic duty of a chaplain here is the visitation of the sick."

Each chaplain here is assigned a definite number of wards. A major part of the week is spent contacting patients.

Most of the requests are easy to fulfill. A need for a rosary or Bible can be taken care of easily. Some requests are more difficult.

An example is one patient's request for a two-month advanced outline for testament study. Three hours were consumed answering this.

In the A.M. a man in trouble with civilian authorities might have the chaplain interceding for him. A seaman before the "old man" might have the company of the minister or priest.

Sixteen-thirty doesn't end the day with the chaplains on port and starboard. Anytime, day or night, the chaplain may be called upon—and usually is. When a patient is entered on the critical or serious list, the chaplain is called. A serious accident, a difficult delivery and a baby in danger, or a critical operation pending and the chaplain is "broken out." The family of the deceased too, day or night, is consoled by the padre.

Religious Education

All ministers and priests at NNMC devote a number of hours each week to religious schooling. Under this head comes catechetical instruction, instruction for inquirers, Bible courses for patients or the distribution of religious pamphlets and articles.

These pamphlets, rosaries, prayer books, missals, Bibles and instructional material are made available, as the saying goes, "without cost to the customer."

Personal Counseling

Recently Secretary of Defense Marshall re-emphasized the importance of a moral rearmament program throughout the Armed Forces. In line with this program all of the local chaplains recently lectured to the various commands.

These lectures were not on specific religious dogma but dealt with basic moral principles.

Personal counseling, however, is usually more on an individual plane. The sailor with family difficulties, the chief about to be wed, the "Doc" with a gripe all sooner or later visit the chaplain.

Luckily, here at NNMC nearly all welfare organizations are represented. The chaplain can refer cases to the Red Cross, VFW, Navy Relief, or the Veterans Administration for solutions to many of the problems.

However, some requests are not so simple. One seaman's wife was going to have a baby. She was in Glasgow, Scotland and he was here. The chaplain decided that this called for action rather than words. By pulling strings and a series of phone calls, the chaplain arranged a seat on a military

(Continued on Page 6, Col. 3)

"You mean I missed . . . I mean . . . You've already had dinner?"

"He wants to use chapel No. 2 for a revival meeting."

"Would you like for me to hang around these last minutes, son?"

"Blessed be the little children . . ."

Local Cagers Clash with Fort McNair For First Post-Holiday League Match

After their holiday breather, the NNMC Admirals challenge Ft. McNair in a home game here tomorrow night. The scheduled game with Ft. Belvoir was cancelled when Belvoir withdrew from the league. Thursday's game with Patuxent was postponed because of weather.

Last Monday night's scrimmage with Miller's High Life team from D. C. saw the addition of three new maroon and gold cagers. Joseph Alligood, HM3 of NNMC, as forward, Ens. Paul Bennett of NH as guard, and Robert Collins, HN of NH as center, made their first appearance with the squad. No scores were kept in the scrimmage.

Head coach Ens. Paul Sherin, recently returned from TAD to Newport, R.I., was back to call the plays for the first time since the pre-league practices. The team lost its assistant coach and first-string guard last month when intern Dr. Norman Epstein transferred to Chelsea Naval Hospital, Mass.

Pre-Christmas Win

After one win and four consecutive losses, the Admirals staged a comeback on Dec. 18 when they routed the visiting Arlington Hall five 60-50.

With Epstein, DeVice, Hauck and Carrobbine scoring, the Admirals got off to an early eight-point lead. At the half, they were ahead 28-16.

With their margin dwindling to 9-35 at the end of the third, Siltanen came in to score five ringers in the last canto as the local lads closed the book on a 10-point victory.

Breakdown for the evening showed.

	Pos.	FG	FT	F	TP
DeVice	F	7	4	1	18
Feneziano	F	0	0	1	0
Siltanen	F	2	1	0	5
Carrobbine	F	3	0	1	6
Chilling	F	0	0	1	0
Seed	C	3	4	3	10
Epstein	G	5	3	2	13
Hauck	G	2	4	1	8
Manama	G	0	0	0	0
Totals		22	16	10	60

Schedule for the next two weeks includes three home games: Jan. 13—Ft. McNair, here; Jan. 15—Andrews AFB, there; Jan. 20—1020 USAF, Ft. Myer, here; Jan. 22—NAS, Anacostia, here.

An Oklahoma Texan Takes Second Chance At Coaching Waves

"I was born in Armore, Okla., but I'm still a Texas man," says Hary (Shorty) Edwards, HM1, of NMS's blood collecting department. Shorty moved to Texas at an early age and lived there until joining the Navy.

It was in Kilgore Tex., that he got his first taste of the hardwoods and backboards. A four-year varsity guard at Leverett's Chapel High School, he captained the basketball squad there his last two years.

Still going strong in his freshman year at East Texas Baptist College in 1947, Shorty again captained the varsity and still found time to coach the freshmen girls' varsity. An injury that year called a halt to his own playing the next year.

Shorty coached the women's team here at NNMC two seasons ago. Under his leadership the Admirallettes turned in a season of 27 wins and 4 losses, grabbing second spot in the WIAL league.

This year he is again calling the plays for the gals, with the assistance of George Ashton, HM1, of NMS. With a league record of one win and no losses it promises to be another good season.

At 23 now, Shorty has four-and-one-half years of service. He first arrives at NNMC in the fall of '49. Completing one year of chemistry school here, he lingered for duty in General Chemistry until June, 1951.

Going overseas, Shorty saw duty aboard the USS Haven off Korea and later served with the 1st Marine Division north of Seoul. He was also attached to the Fleet Epidemic Disease Control Unit with duty on the islands of Kije-do and others off the coast of Korea.

SPORT FLASHES

The Admirallettes squeezed out a 44-42 win from the visiting Garvin's Grill team last Thursday night in a non-league match.

In the first bowling engagement between CPO Club and NDS Officers, the latter took four straight points last Thursday.

Court Intramurals Starting Next Week

Wednesday, Jan. 21, will see the 1953 Intramural Basketball League take to the station court.

NNMC teams and departments desiring to play are advised to furnish rosters not later than Jan. 15 to Ens. Paul Sherin in the Hospital Personnel Office, Rm. 187. A copy of the schedule and rules governing play will be furnished each team representative on Jan. 19.

Generally, rules governing play are similar to those of last year. Each team shall designate one man to act as team representative. No inter-team transfers will be allowed and players must be attached to the command or department which they represent. Members of the varsity squad are again ineligible for intramural action.

All games will be played between 1630 and 1800, Monday through Thursday, on the long court. Legally postponed games are rescheduled on Friday. League play will end in April.

New 16-Team League Opens for Bowlers

Last Wednesday and Thursday saw the opener in the new 16-team bowling league, a combination of the first half's two leagues.

The league, which will bowl every Wednesday and Thursday will decide officially the championship of the Center. Play will end the 16th of April.

Opening the new league is a game between the winners of Blue and Gold Leagues. (See Sport Flashes for results.)

Teams entered are: Pharmacy School, NSHA Class F, NMS Lab, Maplebusters (NSHA), Operating Room, NMRI Blues, NMRI Golds, Lab 19, Optometry, NSHA Staff, NDS Officers, See Mats, Naval Hospital Doctors, Med School Officers, CPO Club, and Dental Interns.

Subs Still Leading In Women's Bowling

The Submarines are still holding top position in the women's kegler league with a two-game edge over the Icebreakers. Last Tuesday the Icebreakers gained ground when they snatched two out of three from the leaders.

Miss S. Holliday made her first appearance with the Carriers and ran up an average of 133.

Team	W	L	Pct.
Submarines	18	6	.750
Icebreakers	16	8	.666
Minesweepers	14	10	.583
Destroyers	11	13	.458
Carriers	8	10	.444
Battlewagons	5	19	.166
High Team Game—Carriers—663			
High Team Series—Carriers—1794			
High Game—Hess—172			
High Series—Crowell—443			
High Average—Crowell—134			

Scouts Hold Swim Meet

The Montgomery County Boy Scouts' county-wide annual swimming tournament will be held here this year. This tourney, consisting of swim meets, diving and stunts, begins at 1830 Friday night, Jan. 23, and ends about 2130. All personnel of NNMC are invited to attend.

Bowling Varsity Swamps Visiting Team Taking 3 for 3 from Cheltenham NRS

Last Monday night, the NNMC locals, operating as a high-scoring unit, swamped the visiting Cheltenham Naval Radio Station to add three points to the varsity bowling total. Taking the first game by 69 pins, the varsity hit their stride in the second and third to take the matches at 185 pins each.

Gil Klaes of NSHA, Ex-Pinsetter, Rolls For See Mat's Team

Another mineralite ex-pinsetter, presently bowling with MAT Class C, is Gil Klaes, an NSHA HMC. This 73-inch hook specialist has been blasting the pins since 1930 when he was introduced to the alleys as a pinsetter in Eau Claire, Wis.

After a stretch in city competition, the chief open bowled until 1949 when he returned to inter-team competition with the Marine Recruiting Station in St. Louis.

A constant team anchorman, this 35-year-old NSHA student has rolled with teams at Barber's

Johnay Miller, HM1, of Pharmacy, was again high man, taking top honors with a 582 series. In second for individual honors was Meitl with a 544 for the three games.

Total pinfall in the match was 2565 for NNMC, 2146 for the visitors.

Monday's win brings the point total of the varsity to seven and two. In their first match—against Anacostia—the lads lost the match, dropping two of the three. NNMC's previous match was again a three-game sweep against Walter Reed.

The varsity's next game is away with Indianhead Powder Factory. Next home game is Feb. 16 when the varsity meets their cross-town rivals, Army Medical.

Gals Resume League On Belvoir Courts After Practice Tilt

Travelling to Ft. Belvoir tomorrow night, the Admirallettes will resume basketball league play which was suspended over the holidays.

Due to the withdrawal of the Bolling AFB and the NAS Patuxent teams from the league, the girls have played only one league game with 10 in the offing between now and Mar. 17.

In last Thursday's scrimmage the gals were pitted against a local girls' team sponsored by Garvin's Grill of D. C. (see Sport Flashes).

The team welcomed the addition of two new players. Newest blue and white clad Admirallettes are: Claire Pfingsten, HN of NH, and Myra Mendez, HN of NMS.

With one league win (42-30 over the Ft. Myer Headquarters six) the undefeated Admirallettes have high hopes for the rest of the season. One week from tomorrow, Jan. 20, they will challenge the Walter Reed team in the NNMC gym.

First Wave: "I always had a premonition that I would die young."

Second Wave: "But you didn't, did you dear."

CURVE SPECIALIST, Gil Klaes, shows form in competitive bowling.

Point, Hawaii, intra-island competition at Okinawa and locally with the See Mats, an NSHA aggregate.

This 165-lb. chief's average in local kegling is 158 and he will again be pounding the alleys in the second half of play.

He professes a strong liking for both softball and swimming, although he does not have too much time to devote to them.

Chief Klaes is married and has two young sons.

Olympics, Service Talent, Tube Series Make 1952 Record Book Year for Sports

The passing of 1952 is leaving its mark in U.S. sports annals. Perhaps, it can also be called "the year of friendly competition," for at no other time has sports held such an important role in maintaining world peace.

Highlighting the '52 campaign were the traditional Olympic games at Helsinki, Finland. Not only did the U.S. team score a tremendous victory on the field, but its sportsmanlike play won the praise of many. The torch at the '52 games never glowed so brightly.

At home, the country's leading sports were given a needed injection of young talent. The huge turnover of Armed Forces athletes gave many youngsters that "minor league" experience which is sometimes lost in the rapid grooming of a potential star.

Baseball was once again a "subway" series with the tireless New York Yankees edging the N.L. champion Brooklyn Dodgers. Stan Musial and Ferris Fain repeated as batting champs. Biggest oddity of the season was Cleveland's failure to win the pennant, although its hurling staff boasted three 20-game winners.

Basketball, recovering from the "fix" scandals, again saw such familiar powers as Kentucky, LaSalle, Dayton, Illinois and Kansas maintain their hoop supremacy.

Notre Dame was finally beaten, but the Irish amazed football fans by knocking off four conference champs—making it Frank Leahy's most successful season. Biggie Munn's Michigan State gridders prepped up for their '53 inaugural into the Big Ten by winning nine straight games and the nation's top-ranking crown.

Other headliners included Vic Seixas and "Mo" Connolly (tennis), Maurice Richard and Terry Sawchuck (hockey), Ed Arcaro and Tony DeSpirito (horse racing), Rocky Marciano and Joey Maxim (boxing), and Julius Boros (golf).

As usual 1952 had its howling crowds, 15-cent hot dogs and waving banners. Something new, however, were the record audiences watching over the nation's 19-million TV sets. It gave Mr. Spectator his greatest coverage of games ever known.

This is the Way it's Done in Texas

GETTING THE WORD from coach "Shorty" Edwards are Admirallettes Joyce Crouch and Josh Shook (see story above).

Med School Daze

by T. Noblin

Most of Medical School personnel returned from their holiday vacation full of vim, vigor and high (proof) spirits. From the red noses they brought back, several of them must have been in some very cold weather. Was it that cold in Jersey, Ashton? In contrast, HMC Patrick returned from his honeymoon looking very fit. Marriage becomes you, Chief.

HMC Laurent, Serology Lab, was so enthused(?) after celebrating Archie Moore's winning the Light Heavyweight Championship that he shook hands all around, including a beer bottle.

There are movie stars in the making at Medical School this month. Stars of the epics being filmed include "Shorty" Edwards (who didn't get his commission), Hargon, Easterling, Carpenter and Weinberger, under the able direction of Movie Directors Stringer of Med Photo and Blake of Audio-Visual. Props by HMC's Burnett and Kelly.

These movies, "Making a Veinuncture," "Collecting Blood Samples," "Counting Blood Cells," "Standard Kahn Procedure," "Use and Care of Balance," and "Processing of Gross Specimens" may be the making of another Clark Gable. Watch for an early showing.

Welcome to the 10 Air Force, 1 Canadian, 8 Waves and 74 Navy men of Lab 20 class. We hope your tour of duty here is an enjoyable one and that you keep some of your New Year's resolutions.

Navy Belles

by George

The New Year came in at our house with a big bang and lots of noise. We had a grand cellar party with "Al" acting as senior hostess. We need more such parties.

Our old friend, Joyce Crouch, left us and went down to Main Navy. Eight new girls reported in for Lab School and had hardly unpacked when they found themselves being recruited for the basketball team.

From the graduating Lab Class, Ethel, Beth and, of course, Jean, liked us so much they decided to stay on for duty.

Just around our house: Things are back in the groove after the holiday. Sewing: Rose and Vina. Fencing: Salty. Reading: Mary Lee. Writing and counting days: Lou. Crossword puzzles: Boots, Jean and Maggie. Still falling on the basketball court: Josh.

Dental Explorer

by C. Connor

"Let's have a happy time" was the keynote for the NDS first Christmas office party, and I'm sure we all did just that. There was dancing to the music of that band of renown, "The Matrix Band" featuring Dr. Chapman on the drums, H. Farnham on the accordion and C. Keller on the trumpet.

Giving Mario Lanza some red hot competition was none other than our own Mr. Mark Johnson. His rendition of the 12th St. Rag really got the party in the groove.

Dom Zaia had us convinced that he's apt to leave us for TV one of these days when he gave his pantomime of Al Jolson. Dr. Pape as M.C. was really in there pitching, too. He kept things rolling along at a terrific pace.

Capt. Allen, when asked if he didn't have some hidden talent to offer or if there were some instrument he could play, answered that he did play the Shoe Horn, but that there didn't seem to be one available.

The gals from Personnel really did a wonderful job on the chow, too, to say nothing of the decorations which they also did with the aid of Chief Erickson. I understand Chief Hughes also lent a helping hand in making the Christmas cheer that we all enjoyed so much.

Of course no party would be complete (now Christmas party, that is) without mistletoe. Needless to say, everyone acted accordingly. Chief Hughes is still explaining the traces away.

The only sad note in the entire party was when we all gathered 'round to render a chorus of Auld Lang Syne to Mrs. N. Haslam, who we are sorry to say, has left us to be Mrs. Haslam, "housewife."

Capt. Faubion added his talents when he led the crew in a rousing chorus of "Fight on for U.S.C." I'm sure we're all looking forward to next year and another party which will be equally as good.

Welcome aboard to all members of the new PG Class and the Intern Class. We hope you will enjoy your tour of duty with us. Pennington, DT1, Erwin, DT2, and M. Park, DN, are also on our list of "Welcome Aboard" folks.

Now that we have all celebrated the Holiday and all the senior Lionel train engineers have worn their youngsters' trains out, and all the resolutions have been made, we would like to wish you all a very Happy New Year.

Judge: "Ten dollars or 10 days."
Defendant: "I'll take the money, sir."
Many little efforts make for one big success.

Patient: "What shall I do? I have water on the knee."
Doc: "Wear pumps."
Opportunity merely knocks—temptation kicks the door in.

What Did She See? 'NNMC' Says Alma After 8 Years Here

"Join the Navy and see the world" doesn't seem to apply to the Naval career of Alma Mae Albrecht, HM2. With almost nine years of service, Alma can boast of only one permanent duty station—NNMC.

Reporting here Aug. 1, 1944 for four weeks of Corps School, she remained for duty. First assigned to the men's dermatology ward L-5 (now 5-B), she was later transferred to dependents' service where she has been ever since.

When Alma was discharged in 1949, NNMC expressed its regard for her performance by asking her to remain to work in pediatrics. The feeling was mutual and she was employed here for more than a year as a civilian.

Recalled from inactive duty to the Receiving Station downtown in the fall of 1950, she got new orders: "report to NNMC!" However, recently she received orders again—this time not to NNMC—and she will leave for recruiting school at Norfolk the end of this month.

Alma, who now works in the Obs.-Gyn. Clinic, was the first Wave to work in the maternity ward here (1945). She was the first Wave to work in the nursery (where she remained on night duty for six months). She was also the first and only Wave here to be assigned burial escort duty.

Although she was born in Aurora, Ill., she regards Sheridan, Wyo. as home. After completing two years of high school there she became governess to a family of six children—a job which took 15 years to complete.

Many Waves marry, leave the Navy and then raise families. Not Alma. She entered the Navy after the five girls and one boy in her charge had become adults.

For amusement Alma likes dancing and has been a member of NNMC's enlisted dance committee for the past two years. She also enjoys the outdoors and lists swimming, fishing, horseback riding and hiking as strong interests.

Alma M. Albrecht, HM2

— THESE GAVE —

Military and civilian members of NNMC who donated a pint of blood during the period Dec. 15 to Jan. 2 are printed below:

NDS

LeMoyné Burns, DT3, Ralph P. Jorden, DT2, Joseph E. Miller, DT3, Arthur Graham, DT3, Ralph B. Dowdy, DT2, and James Cecilian, DT3.

NH

Barbara Bradford, HN, and Brownlow Miller, HMC.

Civilians

Werner H. Moentmann.

Medicine & Science

Atomic Sub Will be 'Most Deadly Ship' New Anti-Personnel Mine Fits in Palm

Ordinary styptic pencils containing about 90 percent aluminum powder are the recent treatment for cold sores of the lips. The pencil is used in hot water and applied when cool. Two, or three applications are usually sufficient. Proper diet, rest and general hygiene measures are also important.

The new atomic submarine will be the most stealthy ship in the Navy, it was disclosed in a recent article in Collier's magazine by R. Adm. Homer N. Wallin, Chief of the Bureau of Naval Affairs. "She will be able to stay at sea and beneath the surface of the water for months without refueling," the Admiral wrote. "She will be able to move from continent to continent under Arctic ice or equatorial waters without once showing herself. She will dive deeper and travel faster underwater than any submarine ever known."

"From a hideaway in the depths of the sea, she will be able to launch acoustic torpedoes which would speed unerringly to their target—on the surface or an enemy submarine—guided by the noise of the quarry's whirring propellers."

"She can surface briefly at night off a distant enemy shore and be able to launch guided missiles with atomic warheads at super-sonic speed against targets far inland, then silently slide beneath the waves and reappear miles away and launch a new atomic attack."—(AFPS)

Washington (AFPS)—A tiny land mine, powerful enough to blow a foot off anyone stepping on it, has been developed by Army Ordnance the Army has announced. It will soon be sent to Korea.

AFPS

Weighing only four or five ounces, it is so small it can be hidden in the palm of the hand.

Although the new anti-personnel mine is merely a shadow of the 100-pound WWII mine, it can inflict damage and costs only a fraction of the older mine. The WWII mine cost more than \$13,000 while the new one is \$2.50. Since it is non-metallic, it cannot be located by mine detectors.

Because of its neutral color and small size, it is practically invisible and can be laid quickly. Even in a draw there is usually time to see the mines over a large area, thus taking a heavy toll of the enemy.

The mine functions in all kinds of weather in all temperature ranges.

What to See Around D. C.

- Monday, Jan. 12—"The Four-Poster," National Theatre, 2030, through Jan. 24
- "Josephine," Shubert Theatre, 2030; through Jan. 24
- Tuesday, Jan. 13—Ballet, Mia Slavenska and Frederick Franklin, Constitution Hall, 2030
- Basketball, college, Uline Arena, 2000
- Wednesday, Jan. 14—Tennis, professional, Uline Arena, 2030
- Concert, National Symphony Orchestra, Bruno Walter, Constitution Hall, 2030
- Thursday, Jan. 15—Tennis, professional, Uline Arena, 2030
- Friday, Jan. 16—"The Leading Lady," Roosevelt Masquers, Center, 2030, through Jan. 17
- Ice Hockey, professional, Uline Arena, 2030
- Saturday, Jan. 17—Square Dancing, call UN 4-4175 for details; also 24, 30, and 31
- Sunday, Jan. 18—Concert, Jan Peerce, Constitution Hall, 1600
- Inaugural Concert, Constitution Hall, 2045
- Tuesday, Jan. 20—Inauguration, Capitol, 1200
- Inauguration Parade, 1330, from Capitol steps
- Concert, Vladimir Horowitz, pianist, Constitution Hall, 2030
- Wednesday, Jan. 21—Boxing, benefit program, Uline Arena, 2000
- "The Curious Savage," Unitarian Players, Pierce Hall, 2030, also Jan. 22 and 23

The Chaplains

(Continued from Page Four)

flight to England and another to Scotland. The seaman arrived in the United States in 1945. There is one problem that has not been solved by any of the chaplains yet. What counseling do you give when a man arrives with "Dear John"?

Public Relations

Liaison with various churches and church organizations in the NNMC area is a must with all chaplains. Many of the chaplains take part in civilian services.

One of the main reasons for liaison with civilian authorities is the possible need for a minister or priest of a faith not represented here. request by those of Jewish, Mormon, Christian Science or Greek Orthodox faith for a minister or priest can be answered.

All ministers and priests in the service are required to maintain contact with their church superiors. Each denomination has designated individual or group to act in this capacity for Armed Forces chaplains. An example of this is Cardinal Spellman, the Military Ordinariate of Catholic chaplains. Chaplain Sott's superior, the Executive Director of the Commission, is located in Washington.

Cultural Activities

Two of the chaplains recently re-instituted choirs for services. Catholic choir was organized by Chaplain McGinnity in time to sing High Mass during the pre-Christmas and Christmas season. The Protestant choir, under the direction of chaplain Sott, is presently being organized.

The above hardly enumerates the various works of the NNMC chaplains and ministers. The preparation of sermons, their own prayers and necessary bookwork again take up many hours. This, however, is the reason for the common saying that a minister or priest is like a machine that never works.

(The Chaplain cartoons on page four are from the Third Naval District publication THE CHAPLAIN'S BULLETIN.)

Employees Miss Judge and Mrs. McAuliffe Receive Superior Accomplishment Awards

RECEIVING LETTERS OF COMMENDATION from R. Adm. Groesbeck (center) for their outstanding work are Miss Alma Judge (left) and Mrs. Dorothy McAuliffe (right).

Miss Alma A. Judge, clerk-stenographer of NSHA, and Mrs. Dorothy M. McAuliffe, clerk-typist of NDS, were recently awarded superior accomplishment Step Increases for outstanding performance of duty.

These promotions were announced in a brief ceremony held in the office of R. Adm. B. Groesbeck Jr., CO, NNMC, on Jan. 5. Both ladies received letters of Commendation from the admiral.

Miss Judge's promotion came for faithful and efficient performance of her duties far beyond that which is normally required of her position and for conspicuously aiding in the smooth and accurate functioning of the school.

Mrs. McAuliffe, who is employed in the personnel office of the Naval Dental School, was cited for being outstanding in the performance of her duties during a period of almost a year while the office was compelled to operate with a shortage of employees.

According to the letter she received, "she cheerfully and willingly exerted herself to the utmost to accomplish the entire assigned office workload."

Next Ensign Promotions to Come Automatically

(AFPS)—The Navy announced at it promoted about 2,500 ensigns to lieutenant junior grade in 1951 and that it will make promotion automatic for other qualified ensigns when they have 18 months service.

A new Navy order lowered the in-grade requirements for promotion to lieutenant (j.g.) from 18 months. The 24-month requirement had been in effect since April 1951.

Under the new order, ensigns of the Regular Navy and of the Naval Reserve on extended active duty will be promoted the day after they reach 18 months in grade. Those promoted must first meet physical and professional requirements.

Silver Star Medal To Marine Corporal For Korean Action

Cpl. Raymond L. Bowden, USMC, was awarded the Silver Star Medal on Dec. 19 for conspicuous gallantry and intrepidity in action against the enemy while serving with a Marine infantry company in Korea.

The award, fourth highest of all military medals, was presented by Maj. Gen. M. Twining, USMC (now a patient on T-16) in the presence of the six commanding officers of the Medical Center.

His citation reads in part: "Cpl. Bowden displayed outstanding courage and devotion to duty when acting as forward point of the unit as it came under intense small arms and mortar fire. Due to casualties sustained, the unit was ordered to withdraw.

"Remaining in his position, he exposed himself in order to deliver effective fire for the unit and, at the same time, administered first aid to several comrades."

In addition to the Silver Star, Cpl. Bowden is entitled to wear the First Marine Division Presidential Unit Citation Ribbon, the Korean Ribbon with one star and the United Nations Ribbon.

Bowden was a patient on ward 5-A. He returned to duty at the Naval Gun Factory Jan. 8.

CONGRATULATIONS go to Cpl. R. L. Bowden, USMC, from Maj. Gen. M. Twining, USMC, immediately after Bowden received the Silver Star.

Variety Shows Return

Two top variety shows return to NNMC in the next two weeks. Art Brown brings his talent-laden group to the NNMC auditorium Jan. 27 at 1915.

On Sunday, Feb. 1, the Stardust Revue will again return to NNMC. The group will tour the wards from 1400 to 1600 and stage an auditorium show at 1800.

Polio Drive Extended One Week; Pennsylvania Leads State Race

THE MARCH OF DIMES is a big topic at NSHA these days, when everyone is urged to join the annual crusade for funds to conquer polio. HMC Harris M. Marshall, of NSHA's Food Service Division, answers the appeal with a contribution for this worthy cause.

NNMC's March of Dimes campaign has been extended to Feb. 6, according to Lt. E. C. Wilson, chairman of the local committee. This gives you 12 more days to contribute as the 1953 drive attempts to top last year's figures.

So far the reports indicate a very successful drive. As of last Wednesday, the movie collections had netted \$156.20, already topping 1951's total of \$107.90 and approaching last year's \$198 total.

Pennsylvania was leading the race of the states in the milk bottles outside of the Naval Exchange Restaurant with \$11.69. Following closely were New York—\$8.74, Kentucky—\$6.62, West Virginia—\$5.54, and Illinois—\$5.46. Last year Maryland copped the race with \$12.50.

Something new in this year's drive are the blue half-pint ice cream containers on the tables of the officers' and chiefs' clubs. Seal-test furnished the cartons and they were painted and stenciled "March of Dimes" at NMRI.

The winner of the state race and other early totals will be announced in the next issue.

O.T. Opens to Staff Two Evenings a Week

Hobby-minded staff members now have an opportunity to use some of the facilities of the Occupational Therapy Department, Bldg. 144, from 1800 to 2100 on Tuesdays and Fridays.

F. W. Conley, HM2, and M. L. Scott, HM2(W), both O. T. technicians, alternate watches and are on hand to supervise and instruct during these evenings.

In this case, "staff" is interpreted to mean all personnel assigned to duty in any of the six commands of NNMC.

All work is done in either the ceramic shop or the carpenter shop. Those wishing to work on leather, metals or other materials may request the tools from the technician on watch.

Small amounts of scrap material, which are available in the department may be used. Finishing materials, such as sandpaper, shellac, paint, glue, etc., are also available.

However, most supplies, such as glazes, leather, ceramic materials, paints, and lumber must be purchased by those wishing to use them. A good assortment of supplies may be found at Arts and Crafts, 934 New York Ave., N.W., Washington, D. C., and Devlin Lumber Shop, 4865 Bethesda Ave., Bethesda.

Vice President Nixon Promoted to Commander

(AFPS)—Vice President Richard M. Nixon is among 1,284 Naval Reserve officers recommended for promotion to the rank of commander, the Navy has announced.

The list also includes columnist Walter Winchell and former tennis star Helen Jacobs.

Mr. Nixon entered the Navy as a lieutenant junior grade June 15, 1942. He was released from active service in March 1946.

NDS' Crew Furnishes Music for Party With, Naturally, Top Professional Talent

WINGING INTO A LIGHT BEAT is Dr. Chapman on the drums as Chuck Keller lets loose on the trumpet. Playing the accordion in the Matrix Band is "Doc" Farnham.

Only professional talent seems to suffice for Naval Dental. At the Christmas party, the audience was entertained by the Matrix Band, NDS trio featuring no less than three professional musicians.

During the two hours of musical offering, the Toothsome Threesome, some preferred to call the musical aggregation, played selections for Christmas singing and followed with an hour of dance music.

Making up the group were Lt. Dr. J. C. Chapman on the drums, "Doc" Farnham, DT2, with his accordion, and Chuck Keller, DN, on the trumpet.

Dr. Chapman, the master of rhythm in the trio and credited with being able to play the drums in any beat, is head of enlisted training at NDS. The doctor, while at the University of Arkansas and the University of Kansas City, played sax with college and professional combos.

The staff dentist also had a 10-week stint with Jack Hoxie and Sam Mix in circus bands during the summer of '35.

The squeeze-box technician of the Matrix Band is Harold M. Farnham. "Doc," as he is better known, has been in show business 23 years. The 41-year-old DT2 has played with Tommy Tucker's and Austin Wylie's bands. In the past at the University of Ohio, Farnham "stood duty" with the

Sammy Kaye orchestra, known then as the Leu Lyman band.

Prior to the last World War the dental technician, who prefers piano but also plays organ and accordion, organized his own group and toured the U.S. and Canada.

Farnham, now working in the NDS Photo Lab, has played in nearly every media of entertainment, from vaudeville to radio, cocktail lounge to night club.

In the Navy in the second World War, Farnham was "prevailed upon" to return to the USN life in Oct. of '51.

Charlie Keller, the third member and brass section of the trio, too, is an ex-maestro. Before coming into the service Keller had his own combo with a long engagement at the St. Regis in New York. Chuck also played trumpet with the Russ Morgan and Bobby Sherwood bands. Keller recently shipped out for sea duty.

NMRI Holds Joint Meeting

MEETING OF THE JOINT PANEL ON MEDICAL ASPECTS OF Atomic Warfare of the Committee on Medical Science—Committee on Atomic Energy of the Research and Development Board, Department of Defense, was held at NMRI Jan. 7. Attending the meeting were—Front row: Drs. K. S. Cole, L. H. Hempelmann, F. C. McLean, R. R. Newell, C. Aub, R. D. Evans, Brig. Gen. E. DeCoursey, Lt. Col. E. A. Pinson, Capt. W. E. Kellum, CO of NMRI. Second row: Dr. M. C. Fishler, Lt. V. C. Tipton, Dr. C. L. Dunham, Col. J. M. Talbot, Mr. J. G. Terrill, Dr. E. J. Robinson and Cdr. E. P. Cronkite. Third row: Lt. Col. M. J. J. D. Stoeckle, Lt. Col. W. C. Burry, Lt. Col. G. M. McInnes, Lt. Col. J. E. Pickering, Lt. Col. S. A. Bach and Cdr. H. S. Etter. Fourth row: Lt. R. S. Farr, Dr. F. L. Mussells, Maj. S. E. Lifton, Cdr. R. Conard, Dr. F. P. Ellinger, Cdr. R. H. Lee, Capt. T. L. Willmon, and Lt. J. P. Pollard. Fifth row: Lt. G. J. Sabbag and Lt. I. V. King.

JANUARY 26, 1953

Three Medical Teams Aid at Inauguration

Last Tuesday, Inauguration Day, saw crowds cheering, bands playing, speakers speaking and the launching of the four-hour parade as the Nation welcomed its new President.

Behind the scenes, more than 36 doctors, nurses, corpsmen and Waves from NNMCMC were prepared to handle any emergency medical problems which might arise.

Three first aid stations were set up on the Capitol grounds. Each was manned by a team of two doctors, one nurse, five hospital corpsmen, one dental corpsman and one Wave. Also attached to each team was an ambulance and driver.

At the same time, six doctors from Naval Medical School occupied assigned positions throughout the stands.

The group was selected in response to a request by R. Adm. George Calver, attending physician to Congress. Lt. Cdr. G. E. Vaupel of NH was in charge of the NNMCMC personnel.

A working party was dispatched on the 19th to erect the three wood-decked tents which were used as aid stations for the medical teams.

Members of the teams were:

Team No. 1

Lt. W. E. Carter, MC, Ltjg. J. A. Bailey, MC, Lt. I. L. Petersen, NC, W. P. Badley, HMC, C. J. Bonneau, HM1, J. H. Levy, HM1, J. A. Burnett, HM1, R. J. Flynn, HM3, and W. Knapp, DT3.

Team No. 2

Lt. H. O. Randel, MC, Ltjg. M. Epstein, MC, Lt. M. J. Topercer, NC, J. C. Macey, HMC, S. Slade, HM1, H. N. Edwards, HM1, J. R. Vail, HM1, P. McElfish, HM3(W), B. L. Pederson, DT3, and H. J. Heydt, HN.

Team No. 3

Ltjg. E. W. Davis, MC, Lt. C. R. Sikes, MC, Lt. G. L. Mrofska, NC, P. A. Morasch, HMC, J. E. Gray, HM1, H. B. Carter, HM1, I. D. Greenhouse, HM1, M. L. Lee, HM2(W), and H. E. Ingram, DT3.

The 6 medical officers stationed in the stands were Lts. D. J. MacPherson and D. L. Spence, and Ltjgs. J. T. Findaro, R. G. Kindred, W. H. Middleton and F. C. Symonds.

NDS Starts Course In Periodontology

Periodontology, the dental science dealing with diseases of the supporting and investing structures around the teeth, is the new course recently begun by the Naval Dental School.

A definite need in naval dentistry was felt for this aspect of dental treatment. With the high incidence of periodontal diseases, both in the armed forces and in civilian work, more teeth are lost through periodontal difficulties than through all other contributing factors including decay.

The course, a year in length, is being taught by Dr. Marion J. Calbeck, a member of the NDS staff. Dr. Calbeck is a certified diplomate of the American Board of Periodontology.

The course, which began Jan. 5, offers a review of basic sciences, studies of periodic literature, instruction in the theory and practical procedures of treatment of the periodontal diseases, and clinical practice.

Students in the new NDS course are Lt. John O'Malley and Cdr. Albert L. Vogel, former members of the NDS staff.

CNO O.K.s Eighth Star

(AFPS)—The Chief of Naval Operations has authorized an eighth engagement star for the Korean Service Medal and has established a terminal date for the seventh star. The new star covers the period from May 1, 1952 to Nov. 30, 1952. The cut-off date for the seventh star is April 30, 1952.

New Navy Wives' Club Visits Embassy For Wednesday Afternoon Get-Together

MAKING THE TOUR with Mr. T. Mori, Embassy Press Attache, are (clockwise): Mrs. T. Tennies, Mrs. S. Easley, Mrs. K. Qualls, Mrs. R. Piper, Mrs. I. Beyer, Mrs. L. Dorosz, Mrs. A. Davis, Mrs. J. Hagenstein, Mrs. J. D'Angelis and Mrs. N. O'Keefe.

A tour of the Japanese Embassy was the "order of the day" for the Service Wives' Club of Montgomery County Wednesday afternoon, Jan. 7. During the hour circuit of the residence, the women were shown through the lower floors by the embassy staff.

Defense Dept. Asks 8% Base Pay Boost

The Defense Department, Jan. 15, recommended that Congress increase the base pay of the Armed Forces a flat eight percent.

This boost would raise the base pay of both active and retired Servicemen, but leave quarters and subsistence allowances unchanged.

The lowest ranking enlisted man, a seaman recruit, under the new bill, would receive an increase of \$6.24 a month.

GOP Congressional leaders emphasized that the Pentagon would have to prove their case.

Sen. Styles Bridges (R., N.H.), chairman of the Senate Appropriations Committee and a member of the Armed Services Committee, said that the plan will be studied "in the light of economy and the prospects of putting our fiscal house in order."

The last pay raise was in 1952 when Congress voted a four percent boost in base pay and 14 percent raise in allowances—an average increase of 5.7 percent.

The club, now two and a half months old, saw many of the treasures of the embassy including murals, paintings and sculpture plus the tea set of the ambassador.

This is the second tour of famous Washington homes that this group has taken. The first was a guided trip through the White House.

The organization, sponsored by the Montgomery County USO, is purposed to bring Servicemen's wives living in the county together. At present the group numbers 25 and is still open for membership.

The club meets each Wednesday afternoon at the Bethesda USO, 4911 Moreland Lane. Coffee is served and a nursery for members' children of pre-school age is maintained.

The afternoon get-together might be a talk on interior decorating, a bridge lesson or a downtown tour. On the third Saturday of each month, a dance is held by the club for the wives and husbands.

For information about the club or membership, contact Mrs. Noni O'Keefe, POplar 2-6724. Mrs. O'Keefe, president of the club, is the wife of Chief O'Keefe, MAA of Special Services.

By Screening Personnel, NSHA Stresses Importance of Selecting Each Instructor

The primary mission of NSHA is the training of personnel to help conduct the numerous administrative functions of the Navy Medical Department. Parallel with this mission, but little publicized, is filling the need for personnel who are qualified Hospital Corpsmen in the administrative field and who possess, in addition, the ability and desire to teach.

While every Navy Petty Officer is considered to be an instructor, if only in a qualified sense, NSHA offers a challenge to potential instructors in that they must expect to face students whose interests, training, and experience are highly diversified and often considerably advanced.

This challenge is met year after year at NSHA by the selection of personnel whose background in administration and motivation to teach make them desirable candidates for instructor duty. Most have graduated from NSHA and many have received specialized training in teaching methods.

This year, for example, new instructors at NSHA represent a wide field of experience and training for their jobs.

HMC John R. Connor, who has Hospital Maintenance Methods and Accident Prevention for his teaching assignments, was formerly an

instructor at the Hospital Corps School at Great Lakes.

HMC Donald A. Hotvedt, Personnel Management Division, already has extensive college training and is further preparing himself for his specialty by "on the job" training and off-duty studies at George Washington University.

HMC George E. Hack, now teaching Personnel-Records to the MAT class, is no stranger to the classroom, having instructed at NSHA before.

Those who are occupying the instructor's podium for the first time are HMC Robert L. Klein and HMC Harry Peck, who are instructing students in Personnel-Records.

In other fields, HMC Thurlo A. Galyon and HMC James T. Woodham are instructing Finance, and HMC Lewis E. Peck, Food Services. All have considerable experience in their specialties and all are graduates of NSHA.

Atomic Age Effects Medicine, Research

RESEARCH THAT LED TO THE DESTRUCTIVE FORCE let loose over Nagasaki and Hiroshima also brought many advances in industry, medicine and research. The Radioisotopes Lab, the gamma ray

generator and the new technical specialty—radioactive isotope technician—are a few of the changes wrought by nuclear fission here at NNM.

Tenth Anniversary of Atomic Reaction Shows Beneficial Services of Energy

The latter part of 1952 saw the tenth anniversary of the atomic age. It was in December of 1942 that man first demonstrated a sustained atomic chain reaction.

True, this energy was first used for war, but the humanitarian and productive services of nuclear fission have been many. Witness today the advances that have been made in the possible use of atomic power plants. Again the utilizing of tracers in industry and research proceeded to high importance.

Medicine, again, has benefited. New types of cancer treatment and a furthering of physiological research have been made possible by nuclear substances. Radioactive substances have shown promise in the treatment of leukemia. Finally an instrument to fight polychytomia vera, a disease in which the red blood cells multiply rapidly, has been found in the new isotopes.

Administration

Radioactive substances can be administered many ways. An "atomic cocktail" of radioactive iodine is the usual method in the treatment of thyroid cancer. For lung cancer, radioactive gold might be given directly into the chest cavity. Again for cancer of the skin, topical application might be better.

Presently orally, intravenously, intracavitary, and topically are the generally used methods for administration. Other ways are coming into prominence. In England, balloons have been inserted into a cancerous bladder and inflated with a solution of radioactive sodium and radioactive bromine. Again the bladder tumor could be "seeded" with pellets of gold utilizing a new instrument which looks and works like a child's water pistol.

The use of radioactive wires has been exploited. Radioactive cobalt is fabricated into a wire and surgically stitched around the deep-seated cancers.

Even the direct use of the atomic furnace has been tried and found promising. At Brookhaven, the Atomic Energy Commission's newest plant in New York, patients with brain tumors have been di-

rectly exposed to the neutron rays of the furnaces.

The Atomic Age Here

NNMC has felt the change. A new technical specialty, the radioactive isotope technician, is a result of the new age.

A new subdivision of the radiology department was begun and new weapons here against cancer and for research have been made possible.

Atomic Age and NMRI

At NMRI there is an extensive program in atomic medicine underway covering the biological effects of atomic energy. The institute is also doing physiological studies using the new isotope tracers.

Last September a gamma ray generator was placed in commission at the Institute. The generator, a cobalt irradiator utilizing cobalt-60, will permit standardized tests on gamma ray irradiation.

Radioisotopes Lab

Ward 131, the Radioisotopes Laboratory, is the base for radioactive treatment in this hospital. Here radioactive isotopes of iodine, gold, phosphorus, sodium, chromium and gallium are made ready for administering. These substances, mainly, are obtained from the AEC's Oak Ridge plant in Tennessee.

For a science that is only ten years of age, many advances have been made. Most of the basic steps have been taken. Technicians are being trained in the field and materials are becoming available. It's interesting to speculate what may be in another decade.

Want a Trib?

The Chicago Tribune is offering a free six-month daily subscription to service personnel. These subscriptions have been underwritten by middle-western business and professional men and are sent with their compliments.

If you wish to take advantage of the offer, print your name and service address clearly in a letter and mail to: Country Circulation Department, Chicago Tribune, Tribune Square, Chicago.

Basketball League Begins Play Thurs.

Action in the 1953 NNM Intramural Basketball League is slated to get under way this Thursday, with the opening game booked for 1630 at the gym.

Ten teams are entered in this year's circuit, and a spirited battle among several evenly-matched squads is expected before the loop champion is determined. In 1952 the intramural title went to Dental Command, with Cardiology taking runner-up honors.

Entered in the league are Center Command, Dental Interns, Physical Medicine (NMS), EENT Clinic, Lab 19, Lab 20, Dental Enlisted, ComPharm, Research and Naval Hospital Barracks.

Already quite a few clubs have voiced their title aspirations. Both Lab classes appear strong, while the Dental Interns and Center Command loom as darkhorse entries. An NH Personnel Office spokesman predicts a good year for the Hospital Barracks squad. ComPharm also will bear watching. League games will be played at 1630 Mondays through Thursdays with one complete round of play scheduled. This will give each team nine loop contests.

Jan. 26 to 29 will see five pre-league practice matches. Schedule for the league games begins:

Jan. 29—NDS Officers vs. NDS Enlisted; Feb. 2—NDS Enlisted vs. NNM; Feb. 3—NNMC vs. Lab 19; Feb. 4—Lab 19 vs. Lab 20; Feb. 5—Lab 20 vs. Phys. Med. School.

BuPers Announces Changes in Policy For Sea-Shore Rotation Requirements

(AFPS)—Several policy changes have been made in the requirements for transfer from sea to shore duty and in the length of sea duty tours, the Navy announces.

Bureau of Personnel Instruction 1306.20 outlines the changes, increasing the length of sea duty tours in some rates and shortening them in others. Rates affected by the changes in sea duty tours are: BMC and BM1, from four to three years; TEC and TE1, from two years to one year; RMC and CSC, from four to two years; CS2, from three to two years; SH1, SH2 and SH3, from two to four years; MM2, MM3, BT2 and BT3, from three to four years; SDC and SD1, from four to three years; and TN and TA from three to two years.

Rotation Not Automatic

The Navy stressed that these changes are merely the normal length of sea duty tours, and they do not mean that personnel will be ordered to shore duty upon completion of their designated tours.

Personnel who complete a normal tour of sea duty must apply to the Bureau for shore duty. These requests will be processed and the name of the man concerned will be placed on the shore duty eligibility list.

Another policy change requires personnel being ordered to shore duty to have obligated service equal to the length of shore duty

for his rate. Previously, two years was sufficient for all rates; seamen and firemen who had two years were required.

Must Serve Longer

Men without the required obligated service who receive shore duty orders and refuse to accept their enlistment to attain obligated service time, will be required to serve another two years or become eligible to request shore duty again.

Before this change, men in the category had to serve another tour at sea to be eligible.

Under the new policy, the way a man can decline shore duty is by not having obligated time to serve, and refusing to extend his enlistment.

In addition, when a man completes a tour of sea duty for personal convenience, under the new regulations, the tour of duty is considered completed.

Admiraltes Take Second Straight Win Torpedoing Visiting Walter Reed 37-25

Ringling down 20 counters, scrappy Josh Shook paced the Admiraltes to a 37-25 win over the visiting Walter Reed Wacs last Tuesday night. This marked the second straight win in the WIAL league for the local gals.

NNMC forwards jumped off to a 6-2 lead in the first quarter as the defense squad of Bradford, Cox and Crouch paralyzed the Army forwards.

Failing to score in the first canto, Shook opened up in the second and ripped through the Wac defense for five field goals. Still charging in furiously, Shook massed another ten tallies before being removed for fouls.

Allen, Mihay, Mendez and Carlson alternated in the forward slots with the latter running up 11 counters for the evening. Evans, Pfingsten, DeBerry and Worlein each did a relief stint in the defense lineup.

Drop Practice Tilt

The Admiraltes took a 48-21 lashing from the Rockville Rockettes on Jan. 15 in a practice game. Already lagging 21-4 at the end of the first quarter, the Admiraltes held their own in the next two, scoring 13 tallies to the opponents' 16, but could never close the gap.

In the fourth they mustered only four counters while the smooth and speedy visitors racked up 13.

Carlson garnered seven tallies and Allen six. Southpaw Shook, who can usually be counted on for at least half the ringers, could only break through for two field goals.

Barbara Bradford turned in the best performance for the local gals as she sparked the defense, but the guards found themselves pitted against overwhelming odds of height, speed and experience.

Claire Emmington, HM3, Lab 20 student, made her debut with the Bethesda six, playing guard.

Mary Jane Koiner, of the NMS personnel office, a veteran cager and member of the Rockville six, turned in eight tallies to help defeat Bethesda.

The Rockettes are entered in the class "A" District Recreation Department league.

Tomorrow night the Admiraltes will travel to Quarters K to challenge their traditional rivals. Next week (Feb. 3) will see a home game with the Ft. Myer Waf squad.

Beamer Strikes 130 For High Game Title

The Submarines still hold the pitted top spot in the WIAL bowling league as they added more wins when the Battlewagons forfeited Jan. 13.

On the same night, the Minesweepers nosed out the Icebreakers, taking all three games and claiming second position. The Carriers picked up three games from the Destroyers.

Lt. Lucille Beamer of the Minesweepers rolled the highest individual game of the league for

NEW HIGH GAME title is Lucille Beamer of the Minesweepers.

with a 180. Ltjg. Mary O'Neil of the Minesweepers, rolled a key.

Newcomer Lt. Cdr. Sue Bradford established a 139 average in her first six games with the Carriers.

DeVice Nails Up 43 Points as Fiery Admirals Sink McNair By 82-80 in Three-Overtime Thriller for 3rd MAISAC Win

Sharp-shooting Ron DeVice scored 43 points and scrappy Ernie Reed sank the winning basket as Coach Paul Sherin's NNM C eagers captured a three-overtime thriller, 82-80, from Ft. McNair here Tuesday night, Jan. 13.

A small crowd was treated to 55 minutes of court activity as the small but speedy Admirals notched their third MAISAC loop victory in seven tries. Too much cannot be said about the tremendous play of DeVice, who time and again broke around his Army guard and drove in for a successful lay-up shot.

Off to a bad start, the Center five trailed 15-5 at the quarter and 29-21 at halftime. DeVice garnered only one field goal in the first 20 minutes and the team as a whole had a shooting percentage of 18 from the floor.

Still behind, 42-39, at the three-quarter mark, the Admirals rallied fiercely in the final stanza and the fourth canto ended in a 58-58 deadlock.

A thrill-jammed first overtime period produced a 65-65 stalemate and it was 74-44 when the second extra session came to a close. Hess of Ft. McNair hit a one-hander with two seconds left to produce this tie.

NNMC fell behind at the start of the third grueling overtime, but the Sherinmen fought back to surge ahead, with two nifty hook shots by Reed proving the deciding factor.

It was one of the most exciting finishes seen on the Center hardwood in many a day and, needless to say, three overtime contests are a definite rarity.

DeVice, in addition to turning in a standout floor performance, laced the nets for 13 goals and dropped in 17 of 26 gift tosses for a total of 43 digits. Reed had 13 points for the Center.

Topping the Ft. McNair point-makers were guards Joe Montesio and Bill Newman, with 22 and 21 markers respectively. Both played outstanding games.

Only 40 personals—16 of them charged against the NNM C—were called during the cleanly-played tussle. Bill Moffett of the visitors and the Admirals' Noel Schilling fouled out in the late stages.

Also looking good for the home club were starters Walt Hauck and Bill Siltman, while Dick Carrabine and Bob Collins saw considerable action. As one Center courtman stated, "A few more games like this one would give anybody a case of heart trouble."

The McNair eagers boast four players and their manager as former members of the Ft. Myer Colonials, inter-hemispheric semi-pro baseball champs of 1952.

This loss gave the McNair squad a win-loss record of five and three for the MAISAC league.

UP FOR A SURE TWO, Ronnie Device (No. 3) leaves the court as Walt Hauck (No. 10) and Ernie Reed (No. 9) come in for the follow-up. Incidentally, your eyes aren't playing tricks. While the varsity kept their signals straight, the local press, affected by the three-overtime thriller, came up with the above "flopped" picture.

Air Force and Army Down Local Quintet Giving Admirals 3-6 Win-Loss Record

With Howie Ver Hulst's 22 markers showing the way, a rangy and accurate-shooting 1020th USAF quintet from Ft. Myer amassed 46 points in the second half to hand NNM C a 73-51 setback in a MAISAC contest here Tuesday night, Jan. 20. A mere handful of fans witnessed the tilt.

Determined to whip their much taller foes, the battling Admirals started out like a house afire and quickly piled up a 13-5 advantage. The Air Force five came fighting back but trailed 17-13 at the quarter and NNMC still led, 29-27, at intermission time.

Then the roof caved in under a steady barrage of Ft. Myer baskets. Ernie Reed, scrappy Center pivotman, fouled out early in the second half and sharp-shooting Ron DeVice carried four personals through most of the final 20 minutes of action.

DeVice, who was leading scorer of the game with 33 points, racked up 20 in the first two periods. The tiring DeVice hit five of NNMC's eight field goals in the last half as Ft. Myer's superior height turned a close contest into an easy triumph for the visitors.

The 1020th outfit hit 25 points in the third frame for a 52-40 margin at the three-quarter mark and then outscored NNMC 21-11 in the fourth canto. Helping out Ver Hulst, Ft. Myer's ace guard, were Sonny Agganis and George Exner, with 16 and 15 points respectively.

Jack Carrabine's 11 digits were second high for the Admirals, while the other four Center regulars had a grand total of 7 markers. Seeing action for the first time was 6-foot

3-inch Dick Strader, the lanky Hospital Command lad, playing almost the entire final half at center after Reed fouled out.

It was the sixth MAISAC loss in nine starts for the Admirals, who now have 11 conference games remaining on their schedule.

Lose to G-2

Spearheaded by the fine play of rangy forward Ben Odum, whose 37 points was tops for the evening, a fast-moving G-2 (MDW) quintet outscored the Admirals 75-64, in an exciting and hard-fought MAISAC tilt here Thursday, Jan. 15.

The visitors raced away to an early 11-4 start, but NNMC quickly caught them at 13-13. However, G-2 then surged ahead again and led 21-13 at the quarter and 37-31 when the first half ended.

Although the home forces, paced by speedy Ron DeVice's 31-point effort, made a valiant try throughout the final 20 minutes, they were never able to forge in front of the blue-and-white clad Army five. G-2 held at least a four-point edge all the way through a fiercely-fought final period.

Odum's terrific shooting (he rammed home field goals from every angle) and the steady rebounding of center Don Saltee, guard Leo Martini and mates proved too much for the Admirals, despite some torrid fourth-stanza shooting by DeVice and guard Noel Schilling.

This win gave G-2 a six won and three lost mark in the loop, and the defeat was NNMC's fifth setback in nine games.

"Hey, Mr. Sherin, here's another prospect for your basketball team!"

Ten Games Remain For Local Courtmen

Coach Paul Sherin's battling NNM C courtmen have a busy two weeks of activity ahead of them, starting with tomorrow night's Middle Atlantic Inter-Service Athletic Conference tussle with the loop-leading Naval Receiving Station ball club.

The game will be played on Rec. Station's small floor. NNM C dropped a 59-55 decision to RecSta here Dec. 4 and will be out to avenge that defeat tomorrow.

Then the Sherinmen entertain powerful Walter Reed's dangerous quintet. Currently second in the circuit, the Army Medical Center lads hold an early-season 68-58 victory over their Navy rivals.

A week from Tuesday, Feb. 3, NNMC hosts Marine Barracks and will try to wreak vengeance for a previous 72-58 setback at the hands of the speedy MarBar outfit.

Next comes the long journey to Patuxent River to meet the highly-regarded Naval Air eagers in the postponed tilt of Jan. 8. On that Thursday night, heavy fog prevented the Admirals from making the trip, but this time NNMC hopes to befog Pax River with a torrential downpour of baskets.

On Thursday, Feb. 5, the high-scoring Vint Hill Farms cage crew tangles with NNMC at the Center gym. In this loop clash the Admirals will be out to make Vint Hill pay dearly for its earlier 93-60 win of Dec. 16.

Coach Sherin also has been lining up several non-conference games for his hustling Center courtsters. He predicts that his team will be tough to beat during the second half of its MAISAC schedule, which starts with Thursday's Walter Reed contest. This promises to be a bitterly-waged affair.

The remainder of NNMC's revised league slate is as follows:

- Jan. 27—Rec. Sta., there
- Jan. 29—Walter Reed, here
- Feb. 3—Mar. Bar., there
- Feb. 4—Pat. River, there
- Feb. 5—Vint Hill, here
- Feb. 10—Arl. Hall, there
- Feb. 12—Pat. River, here
- Feb. 17—Ft. McNair, there
- Feb. 19—G-2 (MDW), here
- Feb. 24—Ft. Myer, there

NSHA Staff Grabs Top in Intra Bowling As League Enters Third Week of Play

The second week of the second half schedule in the 16-team Intramural Bowling League finds the competition stiffer, with the local kegers finding the strike pocket with increasing accuracy. The race for the Center championship is wide open and the present standings do not indicate the power potential of several of the teams.

NSHA staff moved into a tie with the leading NDS Officers by ramping the Dental Interns for a clean sweep of their second match, while the NDS Officers topped the third game to the unpredictable Naval Hospital Docs, presently in last place.

Operating Room wins the title "hard luck" team after dropping the point for total pins to the NMS lab boys by only three pins. O.R. pinned together games of 711-793-1 for a 2325 total, but the high-rolling lab team, led by two hot scorers, Knight and Suttelle, fought fire and posted a 795 in the middle game.

Suttelle posted games of 135-12-166 for a 523 while Knight was scoring in strikes for a 160-172-5 for a 531 total. The 134 pin handicap was too much in spite of the fast finish of the O.R. aggregation led by D'Angelis with a 496 series on games of 187-135-174.

The CPO Club bounced back to take four points from the Optometry team with Chief Brown busting loose with a weekly high series of 50 on games of 186-199-175. CPO Club team captain Joe O'Keefe broke through with a 523 series in the match.

In spite of Miller's 544 series, the Pharmacy School lost three points in the steady rolling of the NMRI Gold Team, led by Gillmore with a 176-and 135 for a 477. Other results through the second week include an easy three-point win for the See Mats over the Med. School Officers, the Maplebusters' free to one over the NMRI Blues and a close three to one victory by NSHA Class F over Lab 19.

Local Pool Reserved for Women Wednesdays

Starting this Wednesday, something new will be offered to the women personnel of NNMC when the local pool will be reserved from 1000 to 2100 for their exclusive use. Lt. H. E. Jarvi, NC, USN, has offered to give instructions in beginning and advanced swimming. Miss Jarvi holds a senior life saving certificate and is a qualified swimming instructor.

Maggie McQuarrie, DT2, also a holder of a senior life saving certificate, will assist Miss Jarvi in the instruction.

NMRI

by R. Conaway

Now that Chiefs Sylvester and Blagg have been transferred to the RecSta, D. C., things will seem pretty dull around the Pharmacology Division. Also saying farewell was HMC C. A. Baker, a recent newcomer to NMRI, who left for duty at the Armed Forces Institute of Pathology; and Lt. W. E. Huckabee, who was released to inactive duty.

A welcome aboard to Lt. E. E. Davies, Ltjg. H. S. Corey, Ltjg. W. C. Bedell, Ens. T. A. Hussman Jr., HMC M. C. Sawyer, HM1 D. G. Hartlieb, HM1 R. A. Carlsen, HM2 A. R. Haltry and HM3 S. S. Scott.

After that last weekend, Rube has finally turned over a new leaf. He is drinking his Seven-up straight now—no more iced tea!

Chandler must have been eating with the monkeys again. At any rate, he sure is doing a lot of scooting around these days.

I wonder whose new theme song is "Oh How I Hate To Get Up in the Morning"? Shades of old Nick!

Peggy Brock really seemed happy to turn in and get her tonsils out. Now she can eat all the ice cream she wants to—but no butter pecan please!

You can always tell when it is getting close to pay day; so many people go around smoking half-cigarettes, or maybe they have been picking up half-smoked butts again.

I hear Mr. McCarville is looking for a car with a large back seat, but he wouldn't say why.

Med School Daze

by Cracky

You'll notice that this column is now under new management, and before we start we'd like to make only one promise: We'll only mention Shorty once a month.

It seems as though BuPers has started its spring house cleaning a little early this year: HMC Coles to USNH, Quantico; HMC Bitely to LSD-7; HM1 Reid to NOL; and HM1 Dietch to NRL. Oh yes, COM 12 finally sent orders for the last group of Lab 18 students.

Looks like Faherty got a little confused the other night and started practicing for the Indianapolis races on Rockville Pike. It wasn't quite Memorial Day, but it's sure to be remembered for some time to come; won't it, Xaxier?

June in January: Jewett and Corbett are walking around with that old feeling. Good luck, men! It has also been bruited about that Meeker was looking for a ring, but we have it on good authority that he's given up the idea.

Marty finally had to clip the lock off his sea bag after 27 months on the third deck. He's packing for ComServLant.

Lab 20 has finally started classes, and the complement of Waves has been increased to nine by Leofsky, who reported from USNH only ten days late.

That's all till next week, but we'll have our ear close to the deck. Better watch where you step!

Dental Explorer

by C. Connor

Welcome aboard to Virginia Lux, DT2, who came to us from NMS Lab School; to W. G. Leininger and R. E. Nagel, DN, from Bainbridge; and to H. W. Griffith, DT2, who came to us from Quantico.

Cdr. Nielson has joined us as a staff member and hangs his hat in Bldg. 122. Lt. O'Malley is now a resident in Periodontia in Bldg. 1 also. (We hope that Dr. Nielson's little boy will shed his cast soon and get well.)

In our recent siege of inclement weather, the expression, and I quote, "It's a bird; no, it's a plane..." Well, they were all wrong. It was only Anna S. coming in for a three-point landing on the grinder. No thing was injured except her dignity.

Chief Pete has informed me that they have been doing some interior decorating in Bldg. 122 in the way of the X-ray and Oral Surgery Room. I hear Chief Condrey did the painting job.

As of today a traffic cop will be needed when 24 interns start to work in the clinic. One word will express Chief Pete: "Whew!"

Jarboe has his eyes on a new outfit. Take a deep breath now—it's a passion pink shirt and chartreuse green trousers! Enough said.

From way across the water in Scotland we have the news that Isel is now the proud father of a bouncing baby boy.

The students and instructors of Prosthetics School came through with flying colors when they contributed \$36.00 to the March of Dimes. Repair students and instructors also contributed generously with \$15.00 and the lads of Bldg. 1 came through with \$9.36. The competition is really hot.

We are all glad to know that Dr. Anderson is back with us again (and he threw his "harness" away at that). Dr. Stanley will also be with us for an indefinite period of time.

Navy Belles

by George

Just around our house: It was just a short time ago we had a party and opening in the cellar for our new and beautiful galley. The girls helped add to the beauty by buying some extra pieces. Miss Wilson cut the ribbon with the scissors I handed her and June Sakmar was the first to enter. A very nice buffet followed.

Minnie, Beth, Louise and Rose Mary are in sick bay. Hope you are back with us soon. Betty Hardee is our January Bride, now Mrs. Creeger. Our best wishes go to both of you.

My neighbor, Eleanor, has joined the knitting club. Jo and Diane have changed to Med. School from Hospital Command to attend school. Many of our other girls have signed up for school and at last Gerry has her orders for NP school.

Our old friend, Joyce, has orders for the next Phys. Med. class and will join us for another hitch. Some of the other girls have signed up for the off-the-campus courses so you will find us all in the books.

Newest addition to the routine is the biweekly visits of Miss DeBerry and Miss Wilson who come over for an hour to chat. If you have anything on your mind, here's the chance to spill it.

Anama Sees 6 Wards In Six Months Here

Like most corpsmen, Frank Anama was informed upon leaving Corps School that his next duty station entailed another phase of training—to engender a familiarity with ward and hospital routines.

The new "Doc" soon realized the truth in this lecture. In his six months here at the Naval Hospital, this HN "visited" and became familiar with a total of six wards: 103, 105, 106, 109, T-6 and 3-C.

This dark-haired Brooklynite is another proof that the old adage "brains and brawn don't mix" is false. The friendly NH Corpsman, now at Special Services, is a member of the varsity basketball team.

Also, recently he passed the GED high school level test with one of the highest percentiles recorded here. His average mark for the four tests was a top 92.

A rarity around NNMC seems to be Yankee fans. Frank is a rooter and supporter of the American Leaguers—except when matched with the home Dodgers in series play.

Before joining the Navy, Anama schooled at Cathedral College of the Immaculate Conception, a combined Brooklyn college and high school. The enrollment of the all-boys school totaled approximately 800.

On leaving the service, Frank is returning to school—bacteriology.

Fractional Leave Days Now Recorded on Books

Don't be surprised if the next time you go to the personnel office to ask how many days leave you have on the books, you get an answer like 21 and one-half days.

According to the new instructions in BuPers Manual, leave shall be prorated for portions of a month as follows:

- 1-6 days, inclusive — ½ day
- 7-12 days, inclusive — 1 day
- 13-18 days, inclusive — 1½ days
- 19-24 days, inclusive — 2 days
- 25-31 days, inclusive — 2½ days

Previously, leave credits were entered on the records in whole figures only. Now, fractional leave credits shall be entered as such. However, upon discharge, when leave credits are to be compensated for in cash, a fraction of a day will still be considered a full day.

Indoctrination Program Initiated for Waves

On Jan. 15, the first indoctrination program for enlisted women was launched here. To be conducted bimonthly, the program will include a tour of the station and a group of short lectures for newly arrived Waves.

The lectures deal with organization of the station, religion, station regulations, legal information, information and education, insurance, sex hygiene, disbursing information, barracks regulations and personal standards.

After years of poverty, the old miner struck it rich. He rushed home and threw a thousand dollars in front of his wife. "Now," he said happily, "you'll be able to buy yourself some decent clothes." "I will not," she exploded. "I'm going to dress just like the other girls."

King Arthur: "I hear you've been misbehaving."

Sir Gallahad: "In what manor, sir?"

France's Loss

ONLY THE BAREST ESSENTIALS are given in the black 'n white picture of French import Gaby Andre, who was signed recently to a Warner Bros. contract. A color photo would show Miss Andre to possess dark hair, green eyes and a creamy-white complexion. Use your imagination, fellas!

What to See Around D. C.

MONDAY, Jan. 26—Conference Recital, Alexander Tcherepnin, Philharmonic Gallery, 2030.

Exhibition, Merchant Marine, Truxton-Decatur Naval Museum, through Jan. 31.

TUESDAY, Jan. 27—Concert, USAF Symphony Orchestra, Department Auditorium, 2000.

WEDNESDAY, Jan. 28—Ice Hockey, Professional, Uline Arena, 2000.

THURSDAY, Jan. 29—Square Dancing, Ages 17-37, Servicemen, YMCA, 17th and K Streets, N.W., 2000, each Thursday.

FRIDAY, Jan. 30—Ice Hockey, Professional, Uline Arena, 2030. Talent Revue, D. C. Recreation Department, Cardozo Center, 2000.

"You Can Never Tell," Catholic University Theatre, 2000, through Feb. 14.

SATURDAY, Jan. 31—Tea Dance, supper, Servicemen, Capital Girls Society, Epiphany Church, 1317 G Street, N.W., 1630, each Saturday.

SUNDAY, Feb. 1—Lectures, National Gallery of Art, 1600, each Sunday.

MONDAY, Feb. 2—Weightlifting Group, Cardozo Center, 13th and Clifton Streets, N.W., 1930-2230, each Monday, Wednesday, and Friday.

TUESDAY, Feb. 3—Latin-American Dancing, Cardozo Center, 13th and Clifton Streets, N.W., 2000, each Tuesday.

WEDNESDAY, Feb. 4—Instruction, Social Dancing, men and women, Thompson Center, 12th and L N.W., 2000, each Wednesday.

THURSDAY, Feb. 5—Reading Discussion Group, men and women, YMCA, 1736 G Street, N.W., 1930, each Thursday.

FRIDAY, Feb. 6—Concert, U. S. Navy Band, Departmental Auditorium, 2000, each Friday.

—from "Do You Know?", a D. C. Recreation Department publication.

A Kiss is a Risk?

London, England (AFPS)—People who like to kiss were offered this advice by the staid British Medical Journal:

"The full blooded, passionate kiss in which lips are applied to lips with a varying degree of pressure and lasting for a very varying length of time, necessarily involves some exchange of salivary bacteria between the two persons concerned."

"The risks of kissing, although admittedly serious, can be much exaggerated, and in connection with some infections they are probably little greater than those of lesser degrees of proximity to the infected person."

Quite.

Don't Look Now - - But You May Be Subject To State as Well as Federal Income Tax

(AFPS)—Many servicemen and women will be required to file income tax returns with states, territories and U. S. possessions. Active service does not excuse payment in all areas.

Members of the Armed Forces, whose legal residence or domicile is in a state, territory or possession which has a personal income tax, will be subject to the same regulations as applies to civilian income unless specific legislation stating otherwise has been enacted.

Service personnel will be subject to taxes in the area in which they claim residence. This may be their previous permanent home address or their present military address.

The following tax charts and explanations apply only to Service members received while on active duty. Quarters and allowances are not included in taxable income.

The following have no personal state tax:

Connecticut, Florida, Illinois, Maine, Michigan, Nebraska, Nevada, New Jersey, Ohio (except in some cities), Pennsylvania (except some cities), Rhode Island, South Dakota, Texas, Washington, West Virginia and Wyoming.

The following states and territories have state taxes but have no specific regulations concerning servicemen:

Alabama—All active-duty pay is exempted during Korean conflict and for six months thereafter.

Arizona—\$1,500 of active-duty pay is exempted.

Alaska—All active-duty pay is exempted starting Jan. 1, 1951.

Arkansas—All active-duty pay is exempted.

California—\$1,000 of active-duty pay received after June 30, 1952, is exempted.

Colorado—\$2,000 of active-duty pay during a time of war or National emergency is exempted. \$1,000 exempted at any other time.

Delaware—\$3,000 of active-duty pay is exempted.

Georgia—\$1,500 of active-duty pay is exempted for 1950-51-52.

Hawaii—All active-duty pay is exempted from taxes.

Idaho—All active-duty pay is exempted.

Indiana—\$1,500 of active-duty pay is exempted until Dec. 31, 1953.

Kentucky—All active-duty pay received after Dec. 16, 1950 is exempted.

Dimes Drive Ends With Totals Topping Last Year's Figures

As the NNMC March of Dimes Campaign drew to a close last Friday, it appeared that the drive would top the totals of the two previous years.

Complete totals are being tabulated today by Lt. E. C. Wilson, chairman of the drive. However, early reports last Friday indicated a marked increase over last year.

Three commands had submitted rough reports before press time last Friday:

	Last Year	This Year
NMRI	\$105.05	\$234.65
NDS	21.99	90.00
NSHA	80.00	218.50

Pennsylvania was still leading the state race in the bottles outside the Navy Exchange restaurant with \$18.16. Next was New York—\$12.14, Illinois—\$10.93, and Kentucky—\$6.84. Last year's winner (Illinois) only totaled \$12.50.

An early complete total from the wishing well in the main lobby revealed \$139.68 (last year, \$61.70). The movies also netted an increase with \$219.00 (last year, \$198.57).

The Commissioned Officers' Mess (a new collection point this year) totaled \$23.41.

Variety Show Returns

Rohde's Musical Varieties will appear at NNMC again on Sunday, Feb. 15. The troupe will entertain in the wards from 1400 to 1600 and stage an auditorium show at 1800.

The scheduled movie will be shown at 2000.

Naval Hospital Shifts Wards and Offices Affecting Locations of Three Services

"Right now we're in the process of moving," was heard often last month as three services of the Naval Hospital changed the location of their wards and offices.

Initiated to consolidate the wards and offices of neuropsychiatry, the changes also affected the surgery and plastic surgery wards.

The moving started on Jan. 21, and by the end of the month all commands were established in their new surroundings. Changes include:

Bldg. or Ward	Previous Use	New Use
4-D	Neuropsychiatry	Surgery
6-D	Neuropsychiatry	Plastic Surgery
Bldg. 104	Surgery	Neuropsychiatry
Bldg. 133	Plastic Surgery	Neuropsychiatry
Bldg. 135	Annual Physicals	Neuropsychiatry

Tax Refund Tip

To get a speedy return of your Federal income tax overpayment, if any, write "Refund" on the envelope containing your tax form. (AFPS)

Friday Night's Staff and Student Hop To Sport Valentine's Day Decorations

Hearts and flowers (minus the flowers) will be the theme of the Valentine dance this Friday night for enlisted staff and students, according to Joseph O'Keefe, HMC, chairman of the NNMC dance committee.

Feb. 13, a Friday night, was selected in hopes of drawing a larger crowd than the previous Monday or Wednesday evenings.

A dance orchestra from the Navy School of Music is anticipated. Music will start promptly at 2030 and dancing will continue until midnight. A group of young ladies from the Capital Club in D. C. has been invited to share the fun with the enlisted staff and students and their guests.

Dress for the evening will be as usual—uniform of the day or appropriate civilian dress (coat and tie) for the men with evening dresses optional for the ladies.

Three new members were appointed to the dance committee last month: W. W. Davis, HM3 of NNMC, M. R. Ackley, PNSN(W) of NNMC, and M. L. Lee, HM2(W) of NMS.

The remainder of the regular committee includes: W. H. Glass, HMC of NH, D. M. Meyers, HM1 of NMS, R. K. Guidus, HM3 of NMRI, B. A. Stephens, HM3 (W) of NMS, F. J. Bower, DT3 of NDS, K. J. Brown, HN(W) of NMRI, and C. F. Connor, DN(W) of NDS.

New Manual - - 'The Petty Officer's Guide,' To Be Carried by Navy Exchange Store

"The Petty Officer's Guide," first edition, January 1953, has been placed on order by the Navy Exchange store and should go on sale around Feb. 15, according to Navy Exchange Officer, Lt. Paul J. Metcalf.

The fact-jammed manual is written by R. Adm. Harley Cope, USN (Ret.), and Lt. Frederick C. Dyer, USNR, authors of The Naval Officer's Manual and The Bluejackets' Manual (1950).

Hospital Ship Patients Can 'Tape' Letters Home

Patients on hospital ships unable to write may now talk a letter home.

A new service, begun on the USS Repose and extended to the USS Consolation and the Haven, allows a patient the use of a recording machine to tape a letter home.

The idea inaugurated on the Repose has spread to the two other hospital ships and will be a permanent feature on forward-area hospital ships.

It takes approximately ten minutes to make a complete recording. The patient's remarks are usually prefaced by a few words of introduction by the chaplain aboard plus a short talk by the ward nurse.

The recording equipment and mailing of the record is of no expense to the patient.

This book offers you, in more than 400 pages, the word on what you must do to hold down your present job and qualify for a higher rating, plus hundreds of other things to help you.

Its aims are expressed in the dedication which reads: "This book is particularly dedicated to Harley F. Cope Jr., Aviation Photographer's Mate First Class, USN, who first suggested that the authors take on the preparation of this long-needed manual for petty officers."

Here are the contents of some selected, valuable chapters: Advancement—the path up; How you may become a commissioned officer; Transfers and rotations; Navy Schools; Traditions, customs, courtesies.

Also: Decorations, Medals, and badges; The Navy's sea and air power; You are an instructor; Leadership; Personal affairs; Pay and allowances; Leave and liberty; Military justice; and Naval terms.

Naval Hospital's CO Nominated for Adm.

Late last month Capt. Bartholomew W. Hogan, along with 39 other captains was nominated for promotion to the rank of rear admiral by President Eisenhower. The N. H. Commanding Officer was selected for promotion in August of last year.

Here since 1950, Capt. Hogan has served as both CO of Naval Medical School and the Naval Hospital.

Capt. Hogan joined the Navy in 1925 soon after graduation from Tufts College Medical School. During the second World War, he was senior medical officer aboard the USS Wasp when she was sunk at Guadalcanal.

His heroic performance in caring for the sick and dying won for him the Silver Star Medal. He also holds the Navy and Marine Corps Medal.

Other medical officers nominated for the rank were Thomas F. Cooper, James R. Fulton, French R. Moore and Ocie B. Morrison Jr. Frederick C. Greaves and John Q. Owsley, now rear admirals temporary in the Medical Corps, were nominated for permanent rank.

The list also included Ralph W. Malone for rear admiral, temporary, Dental Corps, and Edward B. Harp Jr., the new chief of chaplains.

Thursday Honors Lincoln's Birthday

In this temple
As in the hearts of the people
For whom he saved the Union
The memory of Abraham Lincoln
Is enshrined forever.

This Thursday we celebrate the birthday of one of the greatest Americans this country has produced—Abraham Lincoln. It has been a full fourscore and nine years since he uttered the famous words of his Gettysburg Address.

In this day, when our forces are again engaged in a struggle for freedom, it is well to read and ponder over, "the brave men, living and dead, who struggled here, have consecrated it, far above our poor power to add or detract. The world will little note, or long remember, what we say here, but it can never forget what they did here . . ."

First Station Traffic Lights Appear

Three traffic lights were erected and put into operation on the station last week. Two are located on the intersection opposite the fire station. The third controls the road leading to the back of the Food Service Division.

The lights will remain in operation throughout the day in an attempt to cut the speed of station traffic, according to Lt. Cdr. D. T. Kean, of the Maintenance Department.

In the event of a fire alarm, personnel in the fire station may control the lights by simply pushing a button. This will allow the fire trucks to speed to the scene of the fire without traffic delays.

Library Installs Book Drop

Books from the Crews Library can be returned at any time now. According to Mrs. M. C. Bean, a bookdrop has been installed in the door of Crews Library allowing returns either day or night. Books dropped during the off hours will be charged off the lender's card the following morning.

Naval Dental School Announces Lectures Slated for February

Three more lectures are planned by the U.S. Naval Dental School for the month of February. These lectures, presented in the Dental School Annex each Friday at 1400, are open to all dental officers of the Armed Forces, civilian dentists and others who are interested.

"Fundamental Approach to the Treatment of Periodontal Disease" is the title of the next special staff meeting next Friday. The lecture will deal with the treatment of common periodontal problems.

Dr. Irving Glickman, who will present the talk, is the Professor of Oral Pathology and Periodontology and Director of the Division of Graduate and Postgraduate Studies at Tufts College Dental School.

On Friday, Feb. 20, Dr. John B. Erich will offer "Cancer of the Oral Cavity." This will include the diagnosis and a discussion of the treatment of various malignant tumors involving the oral cavity.

Doctor Erich currently holds the position of Associate Professor of Plastic Surgery at the University of Minnesota Graduate School of Medicine. He is also the author of many articles on plastic and oral surgery and of the textbook "Traumatic Injuries of Facial Bones."

Dr. Floyd A. Peyton, Professor of Dentistry in Dental Materials at the University of Michigan, will visit NDS on Feb. 27 when he will discuss "Recent Developments in Increased Rotary Speeds for Cavity Preparation." Dr. Peyton is the co-author of the text "Acrylics and Other Dental Resins."

Navy Band Presents Concert Each Friday

The United States Navy Band, conducted by Lt. Cdr. Charles Brendler, will present its 13th concert of the winter series on this Friday evening, Feb. 13, at 2030.

These concerts will continue through Mar. 27 at the same time on each succeeding Friday evening.

The concerts are presented at the Department Auditorium on Constitution Ave. between 12th and 14th Sts., N. W.

Divine Services

Protestant

Daily—
1200—Daily Meditation broadcast from Protestant Chapel (Monday through Friday)

Sunday—
0830—Holy Communion (Lutheran Liturgy)—Protestant Chapel
1000—Divine Worship
—Main Auditorium
1000—Episcopal Communion—Protestant Chapel—Chaplain Linaweaver

Catholic

Daily—
0715—Mass—Catholic Chapel
Sunday—
0630—Mass—Main Auditorium
0830—Mass—Main Auditorium

Jewish

Congregation Beth El of Montgomery County will hold services every Friday night at 8:30 P.M. and Saturday morning at 10:00 A.M. in the Pook's Hill Auditorium, 3 Pook's Hill Rd. The services will be conducted by Rabbi Martin Kessler.

The services of Rabbi Harry Kaufman, representing the Jewish Welfare Board, are available to all Jewish Personnel and Patients at the National Naval Medical Center. Rabbi Kaufman may be reached by calling the Chaplain's Office, Ext. 324, or by call direct—Office: RA. 3-5371—Home: RA. 3-0755.

This Issue's Scenic View

SPRING WILL SOON BE HERE. Those of you who spent last winter here, will recall the cool, green walk down the path and over the bridge from Bldg. 23 to the main building.

Medicine & Science

Emotional Strain Can Cause Diabetes: Adrenalectomy Seems to Remove Anxiety

Novocaine injected into the brain can ease pain caused by cancer. Two doctors of the University of Pennsylvania Hospital developed a technique which entails simple, painless operation consisting of injecting dentist's novocaine into the frontal lobes.

Two small openings are made on either side of the head at the forehead line. Novocaine is injected into the lobes of the brain. Patients return home after seven to ten days hospitalization.

The novocaine injections do not abolish pain—but the doctors say it reduces the severity of pain considerably. To all patients tested it brought relief, eliminating the anguish of recurring pain.

What happens when a man's adrenals are removed? In the past patients whose adrenal glands were removed died quickly. Today with cortisone given daily patients are living whose adrenals were removed.

Emotional flareups are rare in patients after adrenalectomies. Patients seem to lose their sense of fear. Anxiety is banished with the gland removal.

At present the majority of patients operated upon were breast and prostatic cancer patients, half of whom have been aided by the operation.

A new air chamber that can duplicate the conditions 100,000 feet above the earth has been built by the McDonnell Aircraft Corp. The chamber is probably the largest in the world and is designed to simulate altitude conditions of more than 15 miles above sea-level.

Emotional strain can cause diabetes, ulcers and hyperthyroidism, according to Dr. Ira L. Howell, clinical instructor in psychiatry at the University of Colorado Medical School.

A severe scare or prolonged emotional strain can increase the blood sugar to a point that cannot be controlled resulting in diabetes.

Severe and prolonged shocks may also cause hyperthyroidism, vomiting spells, mucous colitis and signs of insomnia, lethargy and dizzy spells which could be brought about either temporarily or over a long period of time.

Is a robot the answer for dangerous jobs? The magazine Nucleon says that a robot instrument is already in the planning stage that has sense of touch, human-like arms and three dimensional vision. The sense of touch is created electronically, the arms are radio-controlled manipulating agents and the vision is a binocular television camera so that a human operator from a distance can see, three dimensionally, the work being done. The robot is being planned for tasks such as dismantling bombs, and clearing radioactive areas.

The Chaplain's Corner

by Chaplain Newell V. Brink

There is in the Navy, as in all organizations, the temptation to sip. Scuttlebutt or the grapevine circulates vigorously on every ship. Persons in authority have realized for years how much damage loose talk about military matters can do. They have tried, and successfully, to press upon us, the necessity of "button your lip." Let us go one step farther and think in the realm of the personal.

Much light gossip is many times untrue. Individuals have been at times not by direct accusations but little malicious whispers spread not new. The emotional sets of jealousy, envy, frustration and for compensation have caused folk in all ages and all languages to go.

The early church fathers realized that for Christian people to go was not in keeping with what they believed. James says "The tongue is the small member of the body but it can boast great exploits." Remember Christians that:

The tongue shows where you came from
The tongue shows your educational level
The tongue shows the condition of your emotional health
The tongue reveals in your speech and speech slips the inner set of your mind.

We, as Christians do not wish to knowingly or wittingly hurt anyone. One of the best ways to guard against personal hurts and to maintain the security of the service is to guard the tongue.

Al Jolson Appears at NDS Staff Party Thanks to Pantomime Artist, D. G. Zaia

Ocular prosthesis and pantomime may not seem closely related, but apparently over at NDS they are. Tonight at the NDS personnel party, Dominic G. Zaia, a DTI and acrylic eye illustrator, will again parade his talent for imitating Al Jolson.

Clad in Tux, blackface and gloves, this dental technician has totaled over 60 "on stages" with his impression of "the jazz singer." Backed by a collection of Jolson records, Dom has performed for Elk and American Legion groups, ship's parties and, with a volunteer variety group, veteran hospitals around the Boston area. In '49 he put on a show at the Chelsea Naval Hospital.

Dom began this four years ago and in his first year auditioned for the Arthur Godfrey show. A ban on the use of records on TV, however, banned Dom's act.

Favorites of the audience never seem to vary. Leading, naturally, is "Mammy" with "I'm Sitting on Top of the World" and "Sunny Boy" in close second. Lately, Dom added Jimmy Durante's record "Inka, Dinka, Doo" which should also be a favorite.

Born in Everett, Mass., Dom attended school in Winthrop. After graduation from school and a six-month stint in Dental Prosthesis in Boston, Zaia joined the Navy (1944) and served until 1946.

School followed discharge and re-enlistment followed school. In May of '50 Dominic returned to Navy life and was stationed abroad the USS Orion, a sub tender, for his first duty.

Here at NDS, this dental technician is one of the three-man enlisted team assigned to Dental Prosthesis. Dom, who trained here in the six-month course, does everything from acrylic eye impression to insertion, plus the special fabrication of prosthetic implements when needed.

Recently married to an ex-Waf from Thurmont, Md., Dom resides in Rockville, Md.

PANTOMIME ARTIST Dominic Zaia, DTI, of NDS, reached for a high note.

Aquarium, the Zoo, Capitol, White House Open for Inspection

(Continued from Page 1)

hibit, the manuscript of his "Crusade in Europe" and his military banner.

Lincoln Memorial—foot of 23rd St., N. W. Open at all times.

Lincoln Museum—511 10th St., N. W. Open Monday through Saturday from 0900 to 2100 and Sunday from 1230 to 2100, the museum traces the life of Lincoln from childhood to the time of his assassination, and has on display articles and effects of the conspirators including Booth's gun used in the shooting. Free for children, the charge is 10 cents for adults.

Mount Vernon—south on Mount Vernon Hwy. about 14 miles. Open every day from 0900 to 1630, adults are charged 50 cents, children free. George Washington's home for 40 years, it is furnished with the original articles.

National Archives Building—Constitution Ave. between 7th and 9th Sts., N. W. Exhibition hall is open from 0900 to 2200, weekdays, and 1300 to 2200 on Sunday. On display is the Declaration of Independence, the Constitution, the Bill of Rights, World War II surrender documents, special exhibit showing scenes from the inaugurations of Washington and Lincoln and a collection from the 1952 presidential election.

National Gallery of Art—Constitution Ave. at 6th St., N. W. Open Monday through Saturday from 1000 to 1700 and 1400 to 2200 on Sundays. Classic European and American art is on display permanently while the five million dollar Japanese art exhibit is there until Feb. 21.

National Museum—10th and Constitution Ave., N. W. Open daily from 0900 to 1630, it offers arts and craft of India, gem collection and pre-historic animals.

Pan American Union—17th St. between Constitution and C Sts., N. W. Open Monday through Friday from 0900 to 1700 and Saturday from 0900 to 1200, the building is closed Sunday. The patio is decorated with tropical plants, macaws and nearby is the Hall of Americas.

Phillips Gallery—1600 21st St., N. W. Open Tuesday through Saturday from 1100 to 1800, 1400 to 1900 on Sunday and from 1100 to 2200 on Monday. Concerts most Mondays at 2030. Exhibit of paintings by Milton Avery.

Shrine of the Immaculate Conception—Catholic University, Michigan Ave. and Harewood Rd., N. E. Open from 0800 to 1730 daily.

Smithsonian Arts and Industrial Building—near 10th and Independence Ave., S. W. Open every day from 0900 to 1630, the collection offers gowns worn by early Presidents' wives, early cars and ships, first telephone and telegraph and the Wright Brothers' Kitty Hawk and the Spirit of St. Louis.

Supreme Court—First St., N. E. Monday through Friday from 0900 to 1630 and 0900 to 1200 on Saturday.

Truxton-Decatur Naval Museum—1610 H St., N. W. Open 1330 to 1730 Monday through Wednesday, 1200 to 1730 Thursday and Friday and from 1030 to 1730 on Saturday.

Washington Monument—on Monument Grounds between 15th and 17 Sts., N. W. Open all week from 0900 to 1700. Children admitted free, adults for 10 cents.

White House—open from 1000 to 1200 Monday through Saturday. Tours are through the Day, East, Blue and Red Rooms and include the State Dining Room.

Zoo—Rock Creek Park. Entrance on Connecticut Ave. above Cathedral Ave., N. W. Open every day from sunup to 1730. The buildings are open from 0900 to 1630.

Pct. of .733 Puts Submarines in First As Women's Intramural Bowling Ends

FEMININE PIN POUNDERS, Ronnie Conaway, HMI, (left) and Peggie Brock, HM3, both from NMRI, appear on the roster of the Icebreakers. At present their team holds number four spot in the women's league.

The Submarines ended the women's bowling league with first place securely tucked away. The Minesweepers edged out the Icebreakers in the last month to snatch second spot.

With one clash between the Carriers and the Battlewagons remaining in the league, the Icebreakers have a chance to tie the Carriers for third place if the latter should drop all three games to the last rung Battlewagons.

Miss Alice Crowell, of the Minesweepers, managed to walk away with the high individual series (443) and high average (135). Betty Ward, of the Submarines, rolled a close second on the high series (439) and she and Miss A. Forbord averaged a cool 125 for the league.

Miss Sue Holliday turned in the second high series of 426 and established the second high average (134), but this was only for the last 12 games of the league.

All games which were previously credited against the Cruisers were subtracted from the final totals because some of the teams were unable to compete against the Cruis-

ers before the latter withdrew.

Miss Crowell announced that entries are being taken for another league to start soon.

League standings are:

Team	Won	Lost	Pct.
Submarines	22	8	.733
Minesweepers	20	10	.666
Carriers	16	11	.592
Icebreakers	16	14	.533
Destroyers	11	19	.366
Battlewagons	2	25	.074
High Team Game—Minesweepers	—722		
High Team Series—Minesweepers	—1933		
High Ind. Game—Beamer	—180		
High Ind. Series—Crowell	—443		
High Ind. Average—Crowell	—135		

Local Feminine Cagers Drop Home Game To Ft. Myer Wafs for 2-2 League Record

The local feminine cagers took their second league loss here last Tuesday night when the visiting Ft. Myer Wafs eked out a 44-41 win making the win-lose record two-two.

It was anybody's game from the starting whistle until the final buzzer, as the lead shifted back and forth with neither team able to hold the advantage.

The Admiralettes were leading 26-23 at the half but, by the end of the third period, the Wafs had flipped the decision and led 35-34. In the last quarter they garnered nine counters to Bethesda's seven and wrapped up the match.

Shook fell, injuring her back, in the last seconds of the game and was replaced by Allen. Mihay played the full 32 minutes as forward, while Carlson was relieved by Allen during the middle of the match.

Bradford, Crouch and Cox performed the bulk of the defense work, and Mendez came in twice—once to relieve Bradford in the second quarter and one in the final period after Cox was removed for too many fouls.

Breakdown of the scoring column for the local team shows: Mihay-18, Shook-13, and Carlson-10.

The Wafs came to Bethesda with only one league defeat from the Ft. Myer Headquarters team. They now hold second spot in the league, behind the undefeated Quarters K team.

Last Thursday (see Sport Flashes on next page) the Admiralettes held a practice tilt with the gals from the Military Sea Transport Service (civilians and one officer). Mihay was absent and Shook was still recovering from her tumble in the Waf game.

First League Loss

The Admiralettes dropped a three-point heartbreaker to their long-time rivals, Quarters K, on Jan. 27 when they were edged out

42-39 for their first league loss.

The following day, the team filed an official protest with the league. Grounds of the protest were that the time clock was running during the last few minutes during what should have been time out.

Starting forwards Mihay, Shook and Carlson hopped off to a 12-7 lead in the first canto. With two personals and one technical foul on her, Mihay was removed for the second quarter.

Shook, Allen and Carlson each netted a basket in the second. Meanwhile Quarters K ran up 11 counters to whittle Bethesda's lead to 19-18.

The guard trio of Bradford, Crouch and Cox surpassed their usual fine performance, continually intercepting and blocking the opponents' plays.

Entering the last quarter after a 28-28 third stanza tie, the Admiralettes were leading 39-36 with less than two minutes to go. Then, aided by two fouls by Bethesda's defense, Quarters K sank two free shots and two goals to snatch the match 43-39.

At the end of the tussle, the scorebook revealed. Mihay-22, Carlson-8, Shook-7, and Allen-2.

Tomorrow night the gals will travel to Henderson Hall to clash with the Marines. Next week will see a Tuesday night home game with Ft. Myer and a Thursday night trek to Ft. Belvoir.

Want a Loan? Government Granting Them For Improvements, Building or Buying

The purpose of the government loan program is to encourage lending institutions to make loans to veterans with minimum down payment requirements at reasonable interest rates because the government guarantees part of the loan.

You are permitted to apply for three types of loans:

1. To purchase, construct, or improve a house.
2. To buy a farm, farm land, and farm supplies and equipment.
3. To buy a business or otherwise to enable you to undertake or expand a legitimate business venture.

You Arrange Loan

The VA is not empowered to lend money to you directly, except in rare circumstances. You must make your own arrangements through the usual lending channels, such as banks, building and loan associations, and mortgage loan companies.

The institutions lending you money for a home is guaranteed against loss up to 60 percent of the loan with a maximum guarantee of \$7,500.

On other loans, the VA guarantees the lender against loss up to 50 percent of the loan. The maximum guarantee on loans involving real estate is \$4,000 and \$2,000 on non-real estate loans.

VA Direct Loans

Direct loans are made by the VA under certain conditions when private mortgage financing at four percent is not available.

VA direct loans may only be used to purchase a home or to build or improve a farmhouse. The location of areas where VA may make direct loans can be obtained from the loan guaranty officers of VA regional offices throughout the country.

The six major steps to a government loan are:

1. Find the property or business venture you want to buy.
2. Go to a bank, building and loan association, or other legitimate loan institution.
3. Present your plan and your original discharge or separation papers.
4. Property is appraised by VA-approved appraisers.
5. Certificate or reasonable value goes to the lender.
6. If application is approved, you will get the loan.

Interest rate on VA-guaranteed loans may not exceed four percent a year. Fees and charges may not exceed those allowed by the VA.

\$160 Gift

On all government loans, the VA pays the lender—for credit to the veterans' loan—an amount equal to four percent of the guarantee, but not more than \$160. This is a gift to you during the first year of the loan.

As of July 1952, the VA reported that 3,072,811 loans for homes, farms and businesses have been approved under the WWII Bill of Rights.

The original principal borrowed by WWII veterans is more than 18.6 billion dollars. Of that amount, nearly 1.7 billion dollars already has been repaid in full. This record is considered by private credit authorities to be excellent.—(AFPS)

"I (Definitely) Do"

AN ALL-NAVY WEDDING was held in the Protestant chapel on Jan. 17 when Chaplain Brink pronounced Lt. Evelyn M. Hanks, NC, and WOHC C. D. T. Bagwell (center couple) man and wife. Mr. Bagwell is Personnel Officer of Center Command. The new Mrs. Bagwell works on ward 104. Ltjg. Marilyn Ewing, NC, (left) SOQ nurse, acted as bridesmaid while Ens. Joe W. Cloud, MSC, NSHA student, was best man.

Lt. Belknap Teaches M. D. Administration

In the busy routine of NSHA's school season, students and staff alike are often occupied from the first call of reveille until the proverbial midnight oil is gone. One of the busiest people at NSHA is Lt. Floyd H. Belknap, MSC, USN, who is in charge of instructing the Hospital Administration class in the "whys and hows" of Medical Department Administration.

Although that phase of instruction has not yet begun, Lt. Belknap has spent many weeks, indeed months, preparing for his days in the classroom.

This winter, he has attended the Instructors' School, Norfolk, Va. Since his return, he has been occupied with the planning and research necessary to develop course outlines and lesson plans, the job being made more difficult by the endless series of changes and revisions in reference material.

Mr. Belknap, who is a graduate of last years' Hospital Administration class, came to Bethesda from the U. S. Naval Hospital, Bremerton, Wash., in Aug. 1951.

A native of Osakis, Minn., where he was born 45 years ago, Mr. Belknap is a veteran of 27 years of naval service, having enlisted in March, 1926 as apprentice seaman.

He advanced through all of the Hospital Corps rates until his appointment to warrant officer in 1942. He transferred from the Hospital Corps to the Medical Service Corps in 1946.

Mr. and Mrs. Belknap are currently living in Rockville, Md., with their two children, Brenda Kay and Bruce Ray.

Meet the Officials In Your Government

(This is the first in a series of articles dealing with new government officials.)

One of the most prominent statesmen of the century, John Foster Dulles' career has also been that of a soldier, scholar, lawyer and writer.

The new Secretary of State was born in Washington, D. C., Feb. 25, 1888, being reared in an environment of high diplomacy. Both his grandfather and uncle served as Secretary of State under U. S. Presidents.

Mr. Dulles was graduated from Princeton in 1908 as valedictorian of his class. He studied international law in Paris, and began his law practice in New York with the firm of Sullivan and Cromwell, specializing in foreign affairs.

During WWI he served as a major in the Army, attached to the General Staff. Later, he attended the Paris Peace Conference as advisor to President Wilson, and worked with Herbert Hoover on European relief.

Mr. Dulles was a member of the first U. S. delegation to the San Francisco Conference on International Organization which drafted the UN Charter in 1945. Subsequently, he served as a U. S. delegate at sessions of the UN General Assembly from 1946 to 1950.

As special Presidential ambassador in 1950-51, he negotiated and signed for the U. S. the Japanese Peace Treaty and related Security

John Foster Dulles

Treaties with Australia, New Zealand, the Philippines and Japan.

Holder of 15 honorary degrees awarded by various universities, Mr. Dulles is also the author of the best-seller, "War of Peace." (AF-PS)

Bluejackets' Manual

Copies of the latest Bluejackets' Manual went on sale in the Navy Exchange last week. The new edition sells for \$1.60.

Atomic Sub's Motor Operates 1½ Years Without Breakdown

Pittsburg, Pa. (AFPS)—Westinghouse Electric Corp. officials reveal that an electric motor for the first atomic submarine has been operating for a year and a half without a breakdown.

The motor has been "canned" to prevent any leakage of radioactive water which would be dangerous within the submarine.

A similar motor is now undergoing Navy shock tests, presumably in the Idaho desert, a spokesman announced. These tests will determine how the motor will stand up under battle conditions.

Westinghouse also revealed that the machine has "survived five blows of relatively severe intensity without visible or operational damage."

Encased in a stainless steel corset, the motor operates in a continuous stream of radioactive water. The water will be pumped through the atomic furnace where uranium coals will be fired passing through the furnace.

The water will then pick up tremendous heat and flow into the boiler.

Ordinary water will fill the boiler and when the radioactive water is piped in, the regular water will turn into steam. The steam will drive the turbines that will turn the propellers.

Sightseeing is Answer to Inexpensive Liberty in Capital With Shrines, Historical Buildings and Museums Available

During this month—the birth month of two of our greatest Presidents—it might be interesting to see the many points of interest and sights in the nation's capital. Below is a list of the various buildings, shrines and museums that are open to you in Washington.

Aquarium—basement of Commerce Building, 14th and E St., N. W. The marine life display is open daily from 0900 to 1630.

Arlington Cemetery—at the Virginia end of the Memorial Bridge. Open every day from 0800 to 1700. Tomb of the Unknown Soldier. Lee Mansion—open every day from 0930 to 1630. The home furnished in period style is open to adults for 10 cents and for children free.

Armed Forces Medical Museum—7th and Independence Ave. Open 0900 to 1700.

Botanic Gardens—Maryland Ave. between 1st and 2nd Sts., S. W. Closed Sundays, the gardens are open from 0900 to 1600 Monday through Friday and 0900 to 1200

Saturday.

Bureau of Printing and Engraving—14th and C St., S. W. Open for tours from 0800 to 1100 and from 1230 to 1400 Monday through Friday.

Capitol—Open daily from 0900 to 1630. Contains Statuary Hall, Senate and House chambers.

Corcoran Gallery of Art—17th and New York Ave., N. W. Containing contemporary American art, the gallery is open from 1200 to 1630 on Monday to Friday, from 0900 to 1630 on Saturday and from 1400 to 1700 on Sunday.

Dumbarton Oaks Collection—1703 32nd St., N. W. Open from 1400 to 1700 Wednesday through Sunday.

Federal Bureau of Investigation—Pennsylvania Ave. and 9th St., N. W. Open Monday through Friday from 0930 and 1600, tours are available of the exhibits, collection of guns and other property seized in famous cases, plus the fingerprint division.

Aptitude Tests Now Given at I and E And Evaluated by Trained Personnel

ROUND PEGS IN ROUND HOLES, otherwise known as manual dexterity test, were part of the aptitude test given to Pfc. Edward Miller, ward 6-C patient, Carol Buelow, HN of NMS, and Pfc. Charles Wood 6-B patient, on Jan. 18. Miss Kennedy from the U. S. Employment Services office in Baltimore administered the test.

The two patients and one NMS Wave in the above picture were the first to take advantage of the aptitude testing now being offered at the Information and Education Office, ward 102.

The Employment Service Division of the Maryland Department of Employment Security will supply the tests, administer, grade, evaluate and discuss the results with all interested applicants.

Results are then forwarded to the applicant's local state employment service, eliminating needless delay later.

Including both manual dexterity and a written exam, the test takes one hour and 45 minutes. Any military personnel interested should contact Lt. E. C. Wilson, ward 102, ext. 547 and make an appointment for the test.

State Tax

(Continued from Page 1)

Louisiana—\$1,500 of active-duty pay is exempted until Mar. 20, 1952. No exemption thereafter.

Maryland—\$1,500 of active-duty pay is exempted starting Jan. 1, 1951.

Minnesota—\$3,000 of active-duty pay is exempted starting Jan. 1, 1951.

Missouri—\$3,000 of active-duty pay is exempted from taxes.

Montana—\$200 per month on all income is exempted while on active-duty from Jan. 1, 1951 to July 1, 1953.

New York—All active-duty income is exempted until Dec. 31, 1953, or the termination of the National emergency, whichever comes first.

North Dakota—All active-duty pay is exempted.

Oklahoma—\$1,500 of active-duty pay is exempted during the National emergency.

Oregon—\$3,000 of active-duty pay is exempted.

Vermont—Income subject to the same computations as Federal returns.

Virginia—Income subject to the same computations as Federal returns; Combat zone exemption retroactive to 1951.

Wisconsin—All active-duty pay is exempted for 1950, '51, '52. (AF-PS)

Photography Contest Scheduled for May

The Fourth Interservice Photography Contest will be held at the Pentagon on or about May 15, 1953, according to BuPers Notice 1700, dated Jan. 23, 1953.

The contest is designed to interest the amateur and beginning photographer, and encourage participation in photographic activities. All entries must be submitted before Apr. 30.

A screening board, designated by the Chief of Naval Personnel, will select the 10 best entries for final competition in the contest. These contestants will receive certificates of achievement signed by the Secretary of Defense.

Appropriate trophies will be awarded to each of the 10 winners. The Perpetual Interservice Photography Trophy will be awarded the service with the greatest number of prize-winning entries.

In addition, a trophy for the most popular entry, as determined by public ballot, will be awarded at the conclusion of the first week of the exhibition in the Pentagon.

Reds Coin 36 Ways To Call One a Bum

It seems there are 36 ways to say bum. Goaded by Moscow's desire for a violent purge, the Red word coiners, are filling their periodicals with new terms for "isms" that are heretical to the Kremlin.

The terms so far compiled are: Trotskyism, Zionism, cosmopolitanism, objectivism, particularism, bureaucraticism, unionism, diversionism, schematism, imperialism, Titism, pacifism, conciliationism, individualism, factionalism, practicalism, neutralism, relativism, critical realism, militarism, chauvinism, Social Democratism, opportunism, careerism, equalitarianism, colonialism, formalism, naturalism, collaborationism, revisionism, opposition to internal party democracy, bourgeois attitude, kulak attitude, lack of vigilance, lack of class consciousness and uncritical attitude.

Pax River, MarBar Down NNMCCagers As League Campaign Nears Completion

Lady Luck continued to frown on the efforts of our NNMCC Admirals. The local courtmen dropped recent decisions to Marine Barracks and Pax River NATC as they headed into the home stretch of their MAISAC season.

Pierre rebounding helped MarBar to a 63-56 triumph over NNMCC here Tuesday, Feb. 3, and the following night Coach Paul Sherin's ball club fell before Pax River, 41-41, on the Armen's floor.

Thursday night, Feb. 5, the Center five played host to high-scoring Vint Hill Farms. (For result of that game see Sport Flash-

Playing without the services of high-scoring Ron DeVice, who suffered an ankle injury the previous evening, NNMCC never seriously threatened Pax River's tall but erratic quintet. However the Medicals did stay within hailing distance until late in the third period. In capturing the second-division MAISAC contest, NATC led by starters 16-8, 32-20 and 50-33. For NNMCC Cecil Mitchell had nine markers and Ernie Reed eight, while Walt Hauck and Pete Vengiano turned in good floor games in a losing cause.

Admirals Drop Three In MAISAC League After Good Starts

Second half difficulties proved disastrous for the NNMCC cagers in three consecutive contests recently, as the Admirals dropped successive Middle Atlantic Inter-Service Athletic Conference tilts to Anacostia Naval Air Station, Naval Receiving Station and Walter Reed.

Everything seemed to go wrong for Coach Paul Sherin's charges in the late stages of play. It is doubtful that there are many better first half teams in the loop than NNMCC. Here's what happened to the Center five in their recent outings.

1. On Thursday night, Jan. 22, the Admirals led NAS, Anacostia, by a 38-32 count at the three-

Sport Flashes

Thursday, Feb. 5—1630: High scorers Karos and Fox led Phys. Med.'s winning opener against Lab 20, 41-27. 1830: Admirals dropped practice tilt to MSTs gals, 38-27. Allen was turned in for ankle injury. 2000: Admirals edged out Vint Hill, 66-63, after a 93-60 loss to them earlier in season.

One night earlier an aggressive Marine Barracks outfit accrued 21 points in the second stanza to take an 11-point halftime lead and then edged in front the rest of the way for a 63-56 victory. It was MarBar's eighth success in 14 loop rays.

The Leathernecks led by periods 10, 32-21 and 44-35. Cpl. Al Murphy rammed home 25 points for the winners. DeVice of NNMCC was the game's high scorer with 28 (eight coming on free throws), and teammate Silas Barton collected eight.

Lab 19, NDS Enlisted Match Early Leads in Cage Intramurals

Spearheaded by Bill Powers' 18-point output, Lab 19 began its bid for the station basketball title on Feb. 3 by dumping Center Command (NNMCC), 50-28. Jim Salchert stood out for the losers. The next day Powers and his cohorts polished off Lab 20 38-25, to move to championship contention.

Ed Corbett and Frank Smith, together with Powers, looked good for the win over Lab 20. Brandt edged the losing five.

NDS Enlisted racked up two victories by trimming the NDS Officers, 26-11, on Jan. 29 and edging NNMCC, 42-36, on Feb. 2. Pederson and Shuff starred against NNMCC, with Salchert and Deidesheim playing well for the losers. Corbett and Pederson were standouts in the Jan. 29 tilt.

League schedule for the next two weeks follows:

Feb. 9—NMRI vs. Phys. Med. School; Feb. 10—NMRI vs. Com. Arm; Feb. 16—NH Bks. vs. EE-1; Feb. 17—NDS Off. vs. NNMCC; Feb. 18—NDS Enl. vs. Lab 19; Feb. 19—NNMCC vs. Lab 20.

He arrived home at three in the morning and his wife was quite angry. "So," she said, "you finally realized there's no place like home?" "I don't know about that," he answered. "But it's the only place I've been this time of night."

FEBRUARY 9, 1953

NMS's 'Mighty Mite' Mans Guard Position For Station Varsity

One of the speediest men on the NNMCC basketball team is HM2 Noel K. (for Keith) Schilling, who is attached to the Naval Medical School while a student in the Radioisotope School here.

A native of Lafayette, Ind., this blond, blue-eyed corpsman graduated from Jefferson High of that city, earning six letters in sports during his prep days. He played baseball, football and basketball and also ran the 440 in track.

The RIT School mighty mite (he's 5' 8" tall and weighs 155 lbs.) joined the U. S. Navy on July 7, 1948. Following boot camp and hospital corps school, he spent 23 months at the USNH, Charleston, S.C.

While in South Carolina Schilling was active in service athletics, playing baseball, football and basketball. In 1950 he was a member of the Charleston Naval Base line which captured the 6th Naval District baseball title and was named to the 6th ND all-star team. He is an infielder in the diamond sport.

On Nov. 25, 1950 the subject of this story became a married man. His wife, the former Mary Musiel-ski (her nickname is "Mike") was a Navy nurse at that time. They met at Charleston NH, having reported aboard there the same day. The Schillings have a daughter, Mary Catherine (Cathy), nine months of age.

Noel served with SubPac in Hawaii (on the island of Oahu)

Noel Schilling, HM2

from May 1951 to July 1952, when he left for RIT School here. While there he was on the SubPac Raiders baseball and basketball teams.

Having studied at the U. of Hawaii while overseas, the 23-year old HM2 hopes to return to school—at Purdue—in 1956, at the end of his current enlistment. He plans to major in animal husbandry.

An Indiana U. basketball fan (he predicts a Big Ten crown for the Hoosiers this year), Noel performs at guard on the NNMCC court squad. A fiery competitor, he is a good shot and an excellent dribbler.

"It's all right, I suppose . . . but haven't you neglected something?"

No Fair Peeking!

CHECKING THE SCORE after a practice session in the home varsity bowling team. Left to right: John Miller of Pharmacy School, Gene Meitl of NSHA staff, Bill Ranes of NSHA Class "D", Joe O'Keefe of Special Services, "C." "E." Brown of USNH, and Bill Roenig of NMS Lab 19.

Maplebusters, NDS Officers Lead Play In Fourth Week of Intramural Bowling

As intramural bowling goes into the fourth week of play, again a two-way tie develops for top position. NDS Officers retained their first position with a three-point win over Research Gold while Maplebusters, in third place last issue, jammed into first with a four-point collection from the Dental Interns.

CPO Club, leader in the 1952 Gold Intramural League, again took an all point loss, this time to NMS Lab. This gives the winner of the first part of year a seven and nine record and eighth place in the present league.

Naval Hospital Doctors again dropped a four bagger with the lads from Pharmacy School picking up the tab.

Optometry and Operating Room traded one for three last week in a match that gave the Surgical Crew three points on the plus column and brought them back up again to 10th place.

Miller and Ranes continue to lead the league in individual series with Sec Mats and the CPO Club taking team honors.

NNMCC Takes Pinfall Only to Lose Match

Last Monday night, Feb. 2, the maroon-clad varsity bowlers traveled to Ft. Myer for the oddest upset of the year. When the night had ended the locals had taken total pinfall by over a hundred counters but had lost the match by two to one.

This was the first loss for the local varsity since dropping two of three to top-placed Quantico in the early part of January. With a record of nine and six, NNMCC is tied for third. Standings in the league are:

Team	Won	Lost	Pct.
Fort Myer	18	5	.781
Quantico	13	5	.731
NNMCC	9	6	.600
Rec. Sta., D. C.	9	6	.600
Cheltenham	8	10	.444
Army Medical	2	10	.166

Tonight the NNMCC team, captained by Joe O'Keefe, will travel to the Receiving Station at Anacostia. This is the second time the locals have rolled against this team, with the previous game a two-one victory for the RecSta.

Aquatic Varsity Starts

Anyone wishing to join a new NNMCC varsity—a Center swimming team—report to the gym tonight, Feb. 9, at 1700 or call ext. 581. Either boardman or swimmers are welcome. Openings are present in all competition—sprints, distance, relays or diving.

The first meet is scheduled for the latter part of March against a local school. Practice will be held each night in the local pool between 1700 and 1800.

Intramural Bowling Results

Standings from the fourth week of bowling are:

Team	Won	Lost	Pct.	Team Avg.
NDS Officers	14	2	.875	737
Maplebusters	14	2	.875	742
NMS Lab	13	3	.813	693
NSHA Staff	12	4	.750	743
Sec Mats	11	5	.688	747
Pharmacy School	9	7	.563	732
Optometry	8	8	.500	673
CPO Club	7	9	.438	778
NSHA Class F	7	9	.438	617
Operating Room	6	10	.375	744
Lab 19	6	10	.375	695
NMRI Gold	5	11	.313	690
Dental Interns	5	11	.313	644
Med. School Officers	5	11	.313	629
NMRI Blues	4	12	.250	637
NH Doctors	2	14	.125	640

League Records

High Individual Game—Klaes (See Mats), 253
High Individual Series—Miller (Pharmacy), 645
High Team Games—See Mats, 876
High Team Series—CPO Club, 2569

The two top averages are Miller (Pharmacy) with a 183 for 13 games and 2406 pins, and Ranes of the Maplebusters with a 176 for 13 games and 2294 pins.

Navy Belles

by George

Back again with a little news and a little chatter. I think everyone knows I am looking for late news this week because they all seem to go the other way. The first thing was the surprise fire drill they pulled the other night. Everyone got a blanket and a head scarf for wet heads. We looked like a group of Indian squaws just getting off of Ellis Island. Good thing it was dark outside.

With Valentine's Day coming next week, Dan Cupid and I have been looking for a Valentine bride or engagement: only a lot of whispering. I will tell you as soon as it is official.

Ding is our new night house mother. How goes the night life, Ding? We got two new girls for Hospital Command. These new girls always get a royal welcome from the other girls of our command.

I watched our girls with pride as they played Quarters "K." Such a game! We had another full team sitting on the bench. We are surely lucky to have so many good players, good teamwork and good sports. I remember not so long ago when we were going to a game we had to hunt around for enough girls to make one team. This year we have a team to be proud of. If you don't believe me, come and see. We never have enough rooters.

NMRI

by R. Conaway

King Neptune's favorite son, in the person of Lt. E. M. Neptune, MC, USN, recently joined the staff of NMRI from USS Kearsarge. From Naval Medical School we have HM1 W. R. Eckerman, HM1 R. E. Hansell, and HM3 A. S. Garrett and from the Rec. Sta., D. C. comes HMC J. I. Thomas and R. E. Costigan, SN.

Off to see the world on USS Moale goes R. E. Rasin, SA; to Naval Medical School, HMC G. E. Maddox, DTC W. R. Furrey to Rec. Sta., D. C., and Lt. M. A. Grafius to NROTC Unit, University of California.

I heard via the grape vine that Marbois' accordion doesn't play well at all; it was suggested that he send it back to the factory for a tune up. He should do it while he doesn't have the beard.

I hear our sheriff has lost his ears.

Peggy, what can you tell us about lapse of memory at the Raw Bar? Is it true that Chandler has the swab detail for 15 days?

Someone requested that I ask Miss DeBerry if she has had any pictures taken lately—so I am asking!

Red and Rube sure are ardent fight fans. Hey Rube, helloooooo!

I wonder if Pappy Clark has had any pineapples lately. With shells! Hammy Brooks is thinking of putting her car on the market. Are you interested, Mr. McC?

We all know how helpful the shock treatment can be at times, but Cantebury is wondering where he can get an anti-shock treatment right now!!

Med School Daze

by Cracky

Two whole weeks have passed since we took over, and we're still in one piece. Even thinking about cancelling that insurance policy.

The new Med. Photo class came aboard last week, and we sincerely hope everything develops as they've planned.

The passing parade: Hansell has moved his sea bag over to 142, and is now a member of NMRI, while Burnett is about to leave for NAMRU-3 in Cairo. Jenkins and Clarkson have both changed commands, and are now members of the hospital staff.

New staff members who have come aboard recently include HMC Weldon (Phys. Med. instructor), HM2 Bransford (RIT), HM2 Lina (Duplication), HMC Maddox and HM1 Hockenberry (Laboratory), HM1 Anderson and Royals (Med. Photo).

When the local pub reopened recently, the Med. School staff was well represented. Practically everyone (except the duty section, of course) turned out to inspect the new facilities. The loudest and mellowest tones seemed to come forth from those lusty Irishmen, Kelly and Faherty.

Signs of the Times: Those Bluejackets' Manuals and Corps books you see all around these days can mean only one thing. Everyone seems intent on passing those exams. Williams and Walls think they finally have the system beaten—they claim to know all the third class test by heart. Good luck to all.

Time out now, while we study for that crow. Oh, by the way, all hands are invited to the wedding of Miss Pat Welty of the Center Command to our boy Dick Jewett of X-Ray School and the Chief's Club, at the chapel on the 14th. (We hate to brag, but we told you so!)

Dental Explorer

by C. Connor

By the time this edition goes to press, we hope that Dr. Blackstone and Dr. Gardner will be back to duty and feeling fit again. The same sentiments apply to R. L. Anderson, R. Mitchell, J. V. Black and J. D. Vogel. So hurry home if by chance you are still feeling low.

Dr. Chapman and Dr. Parker are back from Indianapolis. We hope your trip was a success. By the way weren't you just a little early for the races?

Well, the dental MAA force (barracks) has combined forces with that of the Waves night barracks MAA. Results: the official engagement notice of W. Knapp to M. Ackley. Looks like you'll have to throw away your little black book, Bill. Also joining the ranks of the "Ball and Chain Society" is Bowser of Repair School, who announced his engagement quite some time ago too.

You know, if Tony Mugno doesn't stop making these daily runs into D. C. every night he is going to have to pay union dues to the bus company.—Wonder what the attraction can be?—Can she cook too, Tony?

During the recent visit of the dental wives, Phil Ferretti was so enthusiastically directing the gals to the lecture room that we had to sort our female patients from the guests.—Just goes to show you, Phil, you can't tell a thing without a score card.

From the repair shop we hear that Shirley has been getting lectures on the difference between a male plug and a female plug. Seems the boys have left her in a quandry. What is the difference, Shirley?

In the sports story this time, the NDS rolled against the NMRI—Golds, on Jan. 29 and took three out of four points—Dr. O'Malley had high game of 191. The enlisted boys beat the interns (dental) also in basketball 26 to 11.

Scrappy Southerner Leads Admiralettes In Scoring Column

"There goes a sure two," is often heard in the stands when the admiralettes' forward Shook tosses one of her left-handed hook shots at the basket.

In last month's clash with the Walter Reed six, five-foot-two Shook fought her way in for 20 of the 37 winning points of the evening. With more accuracy than grace (she invariably takes three or four tumbles) Shook presents a challenge to any opposing guard.

This is her third season with the Admiralettes. Although basketball is her forte, Shook also likes swimming, tennis, badminton and softball.

Christened Jocelyn Maxine Shook 25 years ago in Tishomingo, Miss., she more frequently answers to "Jackie" or "Josh." Attending high schools in Mississippi, Tennessee and Alabama, she graduated in 1945 at Waterloo, Ala.

Then followed over four years of indecision as to a career. During this time she moved to Atlanta, Ga., managed a record shop for three years, trained for modeling, and took an air line stewardess' course.

Returning to Alabama, she completed a secretarial course via the University of Alabama's correspondence division. Next she tried her hand at hospital work for six months in Murray, Ky.

Enlisting in February, 1950, Jackie left the Great Lakes boot camp for corps school at San Diego.

Arriving here in the fall of 1950, her travels came to an abrupt halt. Completing four months' training in N. P. Clerical, the wandering

Jocelyn Shook, HM3

Southern gal settled down and focused her brown eyes on the paper work in the N. P. Clerical office where she is still employed.

Want to see her in action? Come out to the gym Tuesday, Feb. 16 and see her captain the Admiralettes as they tussle with Ft. Myer.

"Request for transfer? . . . for Heaven's sake we just got here!"

Photographers' Queen

POSING PRETTILY with her ladies-in-waiting after she was chosen to reign at the annual ball of the Press Photographers Association of New York, is Jeanne Laverne Carmen (center). Left is Ann Schaefer, 21, and Lisa Longhlin, 22.

What to See Around D.C.

Monday, Feb. 9—Audubon Lecture Series, Bert Harwell, "Canada: A New World," Auditorium, National Museum, 1700 and 2000.
—"The Devil's Disciple," Catholic U. Theatre, Catholic U., 2030, through Feb. 14. No Sundays.
—Ice Capades, Uline Arena, 2030, through Feb. 15.
—"Gigi," National Theatre, 2030, through Feb. 14.
—"The Country Wife," Arena Stage, Hippodrome, 2030, through February.

Tuesday, Feb. 10—Concert, Philadelphia Symphony Orchestra, Constitution Hall, 2030.
—Concert, USAF Symphony Orchestra, Department Auditorium, 2000.
—Sokol Exercise Group, Men and Women, Roosevelt Center, 1930, each Tuesday.

Wednesday, Feb. 11—Informal Bridge Group, men and women, YMCA, 1915, each Wednesday.
—Orchestra Dance, Age 17 to 30, YWCA, 2030, each Wednesday, Servicemen welcome.

Thursday, Feb. 12—Concert, Boston Symphony Orchestra, Constitution Hall, 2030.
—Young Adults' Dance, Servicemen welcome, Friendship House, 2000 to 2300, each Thursday.
—Square Dance, Age 17 to 30, Servicemen, YWCA, 2030, each Thursday.

Friday, Feb. 13—Co-ed Dance, YMCA, 2100 to 2400, each Friday.

Saturday, Feb. 14—Dance, YWCA, 2100, each Saturday.
—Basketball, Georgetown U. vs. U. S. Naval Academy, Donough Gym, Georgetown University, 2030.

Sunday, Feb. 15—Recitals, Phillips Gallery (1600), and National Gallery of Art (2000).
—Lectures, National Gallery of Art, 1600, each Sunday.

Tuesday, Feb. 17—Basketball, American U. vs. Catholic U., Leonard Gym, American U., 2030.

Wednesday, Feb. 18—Ice Hockey, Professional, Uline Arena, 2030.

Thursday, Feb. 19—Washington Times—Herald Golden Gloves Tournament, semi-finals, Uline Arena, 2000.
—Basketball, Georgetown U. vs. U. of Maryland, McDonough Gym, Georgetown University, 2030.

Saturday, Feb. 21—Automobile Show, National Guard Armory, 1400, through Mar. 1.

Sunday, Feb. 22—Recital, Maryan Filar, Pianist, National Gallery of Art, 2000.

Seventy Percent of Navy's Gamma Globulin Made Available for ARC's Fight on Polio

LOOKING OVER THE GAMMA GLOBULIN supplied to the American Red Cross by the Navy is James T. Nicholson, Executive Vice President and General Manager of the American Red Cross, and R. Adm. Pugh, Surgeon General.

R. Adm. Lamont Pugh, Surgeon General of the Navy, announced Feb. 10 that the Navy is making 70 percent of its stock of gamma globulin available immediately to the American Red Cross.

This action by the Navy will enable the Red Cross to have 2,000,000 cubic centimeters of gamma globulin packaged and ready for use in inoculations in time for distribution before the 1953 polio season starts.

A token delivery of the gamma globulin was made by the Surgeon General to James T. Nicholson, Executive Vice President and General Manager of the American Red Cross, at 1130 in the office of the Surgeon General at the Bureau of Medicine and Surgery.

This is the only "quantity" three-quarters of a ton of ready source material available in the Nation that would permit immediate large scale production of immune serum globulin for 1953 use.

"The Navy," Admiral Pugh said, "is glad to return to the American public in this time of great need this by-product of the World War II blood program to which they so generously contributed."

"Its availability at this time is the result of the foresight of the Navy's Bureau of Medicine and Surgery at the end of World War II, when a decision was made to store the gamma globulin in a dry state, under refrigeration, at the E. R. Squibb and Sons Company's New Brunswick, New Jersey, plant. Cost of storage to the Navy has been only about \$4,000."

The gamma globulin, which will be consumed in the production of the immune serum globulin, would have a value of \$2,750,000 if purchased from commercial sources.

The supply provided by the Navy will be ready for distribution by May 1.

Med. Policy Council To Study Care for Service Dependents

(Navy Times)—A special commission to study medical care for dependents of service personnel was recommended this week by Dr. Melvin A. Casberg, chairman of the Armed Forces Medical Policy Council.

Observing that dependent care has become a hotly debated issue, Dr. Casberg served notice that attempts to cut it will not go unchallenged. Although he did not mention the American Medical Association directly, Dr. Casberg evidently had that organization's policies in mind.

The AMA has objected to drafting physicians to care for service families.

Top-level civilian and military medical policy makers were to meet in Washington Feb. 12 to thrash out proposals for a new doctor draft law. The present draft law for medics expires at the end of June this year.

"Were it possible to remove entirely the necessity for a draft law by eliminating medical care to dependents, there might be reason to consider such a stand," Dr. Casberg said.

"It has been demonstrated clearly, however, that this would not result and that care of dependents represents only a fraction of the projected medical work load during the National emergency."

"A practice limited primarily to young men would certainly produce a serious degree of professional dissatisfaction. The doctor draft law must be settled on its own merits. Introduction of dependent care into the debate will serve only to cloud the issue."

Chief Cox is Named As New President Of Local CPO Club

The senior petty officer in NMS's bacteriology lab on the third deck has been selected as "senior man" for the CPO Club. HMC Colin E. Cox's appointment as president of the Chief Petty Officers' Mess (Open) was made by R. Adm. Groesbeck on Feb. 3.

He relieved HMC Hollis S. Murphy of NH, who has filled the position for the last year. The versatile and popular Chief Murphy, who many times graced the CPO stage as Irish tenor and M.C., now is assigned as Chief at the O.O.D.'s desk (see picture—page 2).

Part of Chief Cox's new responsibilities will be to preside over the meetings of the Board of Governors of which he is now a member for the second year.

The Board consists of nine chiefs who are first elected by the chiefs in their commands and then appointed by the Commanding Officer of NNMC.

Meeting for the first time on Feb. 6, the newly appointed chiefs are: Rasmussen and Badley from NH, Erickson from NDS, Sumner and Cox from NMS, Chandler and Jones from NMRI, Wilkes from NNMC and Hotvedt from NSHA.

The new president is not new to the Naval Medical School as this is his second tour of duty at NMS. In 1947-48 he worked in Parasitology and Serology.

In 1948 the FMF beckoned and the chief was off to Guam and then Korea. He is eligible to wear the Presidential Unit Citation for his duty in Korea with the First Marine Division.

Back here in 1950, he has worked in the Blood Collecting, Serology and now Bacteriology departments.

The chief, who now has 14 years in, is an amateur movie man, and enjoys taking eight m.m. films for home projection.

He lives in Rockville with his wife Mary and their nine-year-old son.

Arthur Godfrey, Ed Sullivan look out! Stand aside! NNMC's own talent is taking to the stage.

The Special Services Officer announces that auditions for an NNMC All-Star Revue will be held in the Medical Center auditorium Tuesday, Mar. 3 at 1500. Any type of entertainment will be considered and all patients, students and staff, both officer and enlisted, are eligible.

Come out, join the fun and get in the act!

The show is planned for 1900, Thursday, Mar. 12 in the NNMC auditorium.

For further information call Lt. Atkinson on Ext. 672.

P.S.—An accompanist is needed for both the auditions and show.

Mrs. Eisenhower Attends Fashion Show At Navy Doctors Wives' Luncheon Here

GREETING THE FIRST LADY is Mrs. William Silliphant (left), President of the Navy Doctors Wives Club. In the center is Mrs. Robert Anderson.

Mrs. Eisenhower and Mrs. Robert Anderson, wife of the new Secretary of the Navy, were guests at the benefit luncheon and fashion show sponsored by the Navy Doctors Wives Club, Feb. 12, in the NNMC gymnasium.

The hour-long fashion show was a benefit for the Soldiers, Sailors, Marines and Airmen's Club of D. C. Mrs. Eisenhower has displayed an interest in this club for several years and just recently accepted the honorary presidency of its board of directors.

The First Lady was greeted by NNMC's Commanding Officer, R. Adm. Groesbeck, and escorted to the gymnasium by a reception committee of Mrs. William Silliphant, Mrs. Robert Anderson, Mrs. Lamont Pugh, Mrs.

C. J. Brown, Mrs. Bertram Groesbeck and Mrs. Elmer L. Caveny.

She was introduced by Mrs. Silliphant, President of the Navy Doctors Wives Club.

Fashions were presented by Garfinkle's with a scintillating commentary by Mrs. Theodore Ives Messenger. Suits, beach clothes, afternoon clothes, cocktail dresses and evening gowns were shown.

Mrs. Eisenhower wore a black tailored suit, a mink cape and a white hat trimmed with red. A diamond lapel clip, a triple strand pearl choker, pearl button earrings, white blouse and white gloves completed her costume.

At the conclusion of the show, Mrs. Eisenhower visited the nursery in the Officers Club, where the children of the guests were, and toured the Club before departing with Mrs. Anderson.

Members of the committee for the fashion show were: Mrs. Murray Ballenger, Mrs. Elmer Caveny, Mrs. Chalmers Carr, Mrs. Adolphus Dunn, Mrs. Norman Barr and Mrs. John Enyart.

The Navy Doctors Wives Club is composed of wives of Naval doctors on duty in the Washington area. Wives of Navy consultants are honorary members. Also present among the nearly 500 ladies at the fashion show were the wives of dental and MSC officers in the area.

Promotions Expected For 105,000 in May

(AFPS)—Approximately 105,500 enlisted promotions in the top four pay grades are expected after this month's fleetwide exams, the Navy has announced.

At the same time, it was announced that the Marine Corps plans to add stripes to about 25,000 men (Pfc. through T/Sgt.) in the Jan.-Feb. testing period.

Included in the Navy promotions will be about 3,000 advancements to the highest enlisted grade, chief petty officer. According to the Naval Bureau of Personnel, it is expected that 23,000 POs will compete for this boost.

According to a breakdown of the probable promotion figures made available by BuPers, about half of the men competing for a first or second class rate will be promoted.

Approximately 57 percent of those trying for petty officer third class will probably be rated.

The breakdown for each pay grade is:

Competing	Promotions
E-7 22,950	3,000
E-6 25,200	12,500
E-5 43,200	20,000
E-4 120,750	70,000
Totals 212,750	105,500

Washington's Birthday -- Feb. 22

On Sept. 17, 1796, a man who had led his nation to a rightful place in the world, published a Farewell Address to the American people.

It was a speech that endured the ravages of history, for it contained a message written with the foresight of a great President—George Washington. His words intended to show why he could not consider the honor of running for office once again. They did more:

"... in the discharge of this trust I will only say that I have, with good intentions, contributed toward the organization and administration of the government the best exertions of which a very fallible judgement was capable..."

While declining to run, Washington felt his years of duty obligated him to tell the people his hopes, dreams and advice for the young Nation. The Nation paused yesterday to remember George Washington.

—(AFPS)

NSHA Teacher Takes Personal Interest In Means and Methods of Instructing

Two of the most comprehensive and exacting fields of Hospital Administration are the preparation and interpretation of personnel records. A basic course at NSHA, Personnel Records, is taught by Lt. Lloyd W. Miller, MSC, USN, a graduate of last year's class in Hospital Administration.

Mr. Miller spends many hours every day preparing for the next day's classes, where, Mr. Miller says, "Many of the students keep reminding the instructor 'how we did it back at Gitmo.'"

A big concern, according to Mr. Miller, is not to refute the student's assertion that the "way we used to do it" is the correct way, but rather to help the future administrators recognize and accept

the concept of personnel reporting procedures in harmony with regulations, thereby serving the best interests of sound administrative practice.

Mr. Miller, a native of Somerset, Ohio, is a veteran of nearly 23 years' service, having enlisted in the Navy as an Apprentice Seaman in March 1930.

He was appointed to the rank of Pharmacist in 1943 and to his present rank of lieutenant, Medical Service Corps, in August 1951.

Spare-Time Studies By Correspondence Could Mean New Rate

Enlisted correspondence courses are becoming a more and more popular and efficient method of completing required training courses for advancement in rating.

Approximately 170 different courses are now available and they consist of standard training manual texts, together with lesson plans and aids for study.

These courses have special value for patients and for staff ratings other than hospital and dental, for a completion certification from the Naval Correspondence School in Brooklyn, N. Y., is sure proof that the candidate is eligible in this respect for the service-wide examination.

The certificate and marks from Brooklyn automatically become part of a man's official service record. Since the lessons are criticized and marked by experts, they provide excellent preparation for the examinations.

Originally designed for inactive Reservists, these courses are now open to all hands. Application blanks and detailed information are available at the Information and Education office, Bldg. 102.

GETTING THE WORD (in book form) is Chief Colin Cox (left) who relieved Chief Hollis Murphy (right) this month as president of the CPO Club (story p. 1).

Apostolic Delegate to United States Blesses NNMCM's New Catholic Chapel

DURING THE BLESSING OF THE CATHOLIC CHAPEL, His Excellency, the Most Reverend A. G. Cicognani, gave a short sermon to the assembly which included both officers and enlisted personnel from the various commands as well as clergy from the D. C. area and representatives of the Chief of Chaplains office.

The Apostolic Delegate to the United States, His Excellency, the Most Reverend Amleto Giovanni Cicognani, D.D., blessed the newly dedicated Catholic Chapel here Wednesday, Feb. 11 at 1600. Witnesses to the ceremony were various NNMCM heads of departments, clergy from the surrounding area, representatives from the Chaplains Division of the Bureau of Personnel and the Commanding Officer of NNMCM, R. Adm. Groesbeck, and his wife.

The Apostolic delegate, accompanied by his secretary, the Very Reverend Monsignor Donald M. Carroll, was met by the Admiral at the entrance to the main building and escorted to the second floor where the clergy assembled to go in procession to the chapel.

After blessing the Chapel the Apostolic Delegate also celebrated Benediction of the Blessed Sacrament assisted by Chaplain D. J. Mannion, Asst. Director, Chaplains Division, and Chaplain D. J. Kosky, senior Catholic chaplain at NNMCM.

The music and singing for the blessing of the new \$7,000 chapel was furnished by the Holy College choir under the direction of Patrick Maloney, C.S.C.

Among those present for the blessing of the Chapel was the Chief of Chaplains, R. Adm. E. B. Groesbeck, Jr., CHC, USN.

“Red Cross Wrote All My Letters for Me,” Says Cpl. Otto Smiley, Ward 3-C Patient

“Well, to tell you the truth, I never thought much of Red Cross before I went overseas, but I certainly have a different opinion of the organization now,” said a patient here the other day while discussing experiences with Red Cross.

The patient was Cpl. Otto D. Smiley, ward 3-C, and he was talking to one of the Red Cross workers stationed here. She asked him to tell her what personal experience he had had with Red Cross to change his mind and this is his story:

“I was with the First Marine Division, First Engineer Battalion, Baker Company and was wounded while on the Western Front, Aug. 10. “I was unconscious for three days and they tell me I lost a lot of blood and was given a great deal of blood during those three days. I know that it wasn't just luck that the blood was there for me!

“I was on the USS Haven awhile and then sent to a naval hospital in Japan. Did I tell you that it was my right arm which was wounded? I'm not left handed, and the Red Cross volunteers and workers wrote all of my letters for me in Japan; in fact they continued to do this until I got here and got my cast off.

“Another thing which I liked was that Red Cross gave me cigarettes, toothbrush, toothpaste, razor, shaving cream and soap in the hospital in Japan. These don't sound like big items, but Brother, when you need them, you need them! They also made me a loan until my pay accounts caught up with me.

“I flew back to the States and when we landed in Hawaii, Canteen Service met the plane with free coffee, sandwiches, milk and doughnuts. It tasted mighty good to me.

“At Mare Island, Calif., the Red Cross workers helped us make arrangements for a free telephone call home and brought lots of entertainers to the hospital. Since I have been here, I have seen the same Red Cross services provided for pa-

NNMCM's 1953 ARC campaign will be conducted Mar. 2 to Apr. 3. Chaplain D. J. Kosky will coordinate the functions of the campaign workers.

“I'll never forget the inauguration and the inaugural ball, and the party which the Regular Veterans Ass'n. had at the Mayflower. Red Cross made it possible for me to attend these activities and I won't forget it.

“Like Red Cross? Sure I do. Look what they have done for me. I'm going to donate so that my buddies can go back to my buddies still in combat and Red Cross can continue to give them the lifegiving blood and the many “little” things which make life so much happier in a hospital.”

Cpl. Otto D. Smiley
FEBRUARY 23, 1953

The Chaplain's Corner

Lent

by Chaplain D. J. Kosky

Ash Wednesday, the day on which the Church blesses and distributes ashes, ushers in the season of Lent. The word Lent comes from an old English word, “lenten,” which means lengthen. It refers to the fact that Lent is the time of the lengthening days, that is, Spring. We can also say that Lent gives us an opportunity to lengthen our days of merit and mortification in the eyes of God. It will do this, however, only if we keep this holy season well and enter into the spirit of the Church—of fast, prayer and mortification.

There are reasons why we should keep Lent well. In the first place we are Christians, that is, followers of Christ. But we cannot be genuine followers unless we are prepared to obey His teachings and instructions and follow His Holy example. Christ taught the need of penance and mortification in life. “Unless you do penance, you shall likewise perish.” He, Himself, set the example we are to emulate when He fasted forty days and forty nights. This is all the more remarkable since there was no need of His doing penance as Our Lord was absolutely sinless. He did fast and abstain, for our benefit, to encourage and set the example for us.

Another reason is that if we keep the Lent we shall encourage others to keep it also. Example speaks louder than words. It is the example of others that serves to spur us on to the doing of good. We owe it to ourselves. We all need the discipline of fasting and penance even if we are unable to live up to the letter of the law. This means we are never excused from the spirit of penance and mortification.

So we can give up an occasional movie, or cut down on our cigarettes, perhaps even the tempting dessert, or what have you. In the Armed Forces, since we are not so rigidly bound to the fasting part, we ought to adhere strictly to the mortification part of Lent. Lent devotions, therefore, ought to be well attended, and our life most exemplary during these days.

Assistant Secretary of Navy for Air Makes 8th Donation to NMS Blood Bank

WE'LL GIVE LOTS MORE says the Honorable John F. Floberg (center) as he holds the eighth pint of blood he has donated here. Marines who came to meet him are (l. to r.): Cpl. Charles A. Curtis Jr., Sgt. Peter Bingheimer and S/Sgt. William L. Tveit.

"This is just the first gallon. We'll give a lot more," said the Honorable John F. Floberg, Assistant Secretary of Navy for Air, as he donated his eighth pint of blood here on Feb. 10.

"Lots of other people are giving under much worse circumstances," said the former Navy lieutenant commander. "I know it's needed."

Mr. Floberg made his first donation here at the NMS Blood Donor center in July 1951, and has consistently returned since then.

He was accompanied by his receptionist, M/Sgt. Harris Dunkelberger, who also made his eighth donation that same day.

Three Marine patients from ward C, all veterans of the Korean fighting, who had received blood on the field and in hospitals, came down to meet Mr. Floberg. They were: Sgt. Peter Bingheimer, Cpl. Charles Curtis Jr., and S/Sgt. William Tveit.

If giving blood has any unpleasant aspects for the Secretary, it hasn't reflected in his sense of humor. "I've always heard that the fifth Marines were the best. Is there any truth in that?" he asked a visiting Marine (who were in the First and Seventh).

Before they could reply, he turned to his receptionist and asked, "Which one were you with, Sgt.?"

"Fifth, Sir."

"That must be where I heard it," quipped Mr. Floberg.

One out of two hospitals received blood donated through ARC for treatment of ill or injured servicemen, veterans and civilians in 1951-

Writer Gets Story And Bit to Boot

In this month's *All Hands* it's related how Harvey Mitchell, JO1, doing research for a recent article on NMRI for *All Hands* came back with an interesting—if painful—story.

It seems he had walked into the Parasitology Laboratory at the Institute where important work is being done to conquer the effects of malaria. It was like walking into a hornet's nest, only they weren't hornets, they were mosquitos and they were flying about the room in droves.

Although the buzzing beasties seemed not to bother Dr. Nathan Stahler, the civilian biologist working with them, they hopped on the intrepid reporter as soon as he got into the room.

But Mitchell, stalwart to the last, tried to take notes in between stings as the mosquitos settled on his hands, face, and wrists. Within minutes he was stung in a dozen places.

Finally, as diplomatically as he could, the *All Hands* journalist thanked Dr. Stahler for the interview, excused himself and eased out of the hive.

The doctor's last words still echo in Mitchell's mind: "Don't worry, you won't get malaria. And if you want any more information, come on back!"

Total Count on March of Dimes Campaign Reveals Almost Double Last Year's Net

In the last issue it was predicted that the station March of Dimes would top the totals of the last two years. This was a conservative guess. When the last pennies were counted and wrapped, the drive had netted \$59,234—almost double last year's figures.

Of special note is the splendid contribution of NMRI and NSHA who the commands in contributions. NMS and NDS are credited with the largest increase over last year. A comparison of the totals for 1952 and this year shows:

Activity Participation	1952	1953
National Naval Medical Center	\$104.57	\$144.92
Naval Hospital	130.00	147.90
Naval Medical School	47.32	170.03
Naval Dental School	21.99	91.41
Naval Medical Research Institute	105.05	234.65
Naval School of Hospital Administration	80.00	217.36
General Participation		
Wishing Well, Main Lobby	61.70	139.68
Movies	198.57	219.21
Milk Bottles (States), Restaurant	130.46	194.07
Totals	\$879.66	\$1,559.23

In her report to R. Adm. Groesbeck, Lt. Wilson, chairman of the campaign committee, commended all the keymen in the component commands for their initiative and hard work in promoting the drive.

She also made special mention of the services of Lt. Cdr. E. R. Stojil, Lt. J. O. Atkinson, CWOHC R. F. Christopher, HMC W. N. Fowlkes, AC R. L. Hudgens and Mr. Robert L. Gosselin, all of whom devoted time and energy to furthering the campaign.

FEBRUARY 23, 1953

Canadian Instructor Becomes a Student In NDS Course Here

One of the officers attending the six-month Specialized Course in Prosthodontia, conducted by the Naval Dental School, is Major Harold W. Hart, of the Royal Canadian Dental Corps.

An instructor in prosthodontia himself, Maj. Hart's home duty station is the Royal Canadian Dental Corps School, Ottawa, Canada, where post-graduate courses for dental officers and technical training for enlisted persons are conducted.

Although Maj. Hart wears a khaki uniform and the Royal Canadian Dental Corps was organized under Army regulations, it is common to all three armed forces in Canada.

A tri-service organization (the only one so organized in the world), it serves the dental needs of the Royal Canadian Navy, the Royal Canadian Army and the Royal Canadian Air Force.

Dental officers and enlisted men of the RCDC may receive orders to serve with any of the three services at home or abroad. Overseas field dental units of the Corps are now in both the Korean Theater and continental Europe.

Career planning in the Corps is set up to provide rotational duty with all three services. Maj. Hart's own career is a good example of this:

Leaving his practice in Victoria, British Columbia, he joined the war-time Canadian Dental Corps in November 1940. He was sent to the United Kingdom the following spring.

Duty in Sicily and Italy (where he was awarded Mention in Dispatches in 1944) followed. He returned to the United Kingdom in 1945 and briefly to Canada that summer enroute to the Pacific Theater.

After cessation of hostilities he was assigned to North West Europe and Germany. He was the last Canadian Dental Corps officer to leave continental Europe. He returned to Canada in 1947.

Since his return he has had four different duty assignments in Cana-

Maj. Harold Hart, RCDC

da including a posting with the Royal Canadian Air Force, and one aboard the HMCS Standacona based at Halifax, Nova Scotia.

A native of British Columbia, the major took his pre-dental courses at the University of British Columbia in Vancouver. In 1940 he graduated from the University of Oregon Dental School. Cdr. Robert Millard of NDS, as well as Cdrs. A. W. Grant, J. O. Booth and J. Arthur were classmates of his.

In 1951-52 260,000 cases and requests were served each month by ARC Home Service: 174,000 servicemen and dependents, 60,000 veterans and dependents, and 26,000 civilians.

Three Shows Scheduled for Auditorium To Range from Classical to Hilarious

ON THE NNMC STAGE in the next weeks will be: (upper left) Felice Takakjian, concert pianist appearing on Mar. 8, (upper right) Howard Shonting, card manipulator, who will be one of the acts in the Feb. 26 variety show, and (below) the cast (all-male) of "The Womanless Marriage," a mock wedding appearing here Mar. 15.

Staff and patients of NNMC will be treated to a variety show, a piano concert and a mock wedding, all slated for the NNMC auditorium within the next three weeks.

Singing, dancing, card tricks and ventriloquism are a few of the acts anticipated when the Scottish Rite presents a variety show here next Thursday, Feb. 26.

Starting at 1900, the cast will include Spanish dancer Gloria Elena, who just completed six weeks at the Old New Orleans Club. Card manipulator and club date artist Howard Shonting will attempt to baffle you with his deck of cards.

Archie O'Toole (dummy) is sure to be accompanied by Mike Melalic, ventriloquist.

Joan Fehr, the singing emcee of the show, who just completed two weeks at the Shoreham Blue Room, will also introduce vocalist Pat Sherzer and accompanist Kalla.

Another feature of the hour-long fun fest will be Milo Scott, chalk talk artist, who has appeared at the Capitol Theatre.

Prizes are promised for a few lucky ones in the audience. Sandwiches, cokes, and cigarettes will be served to all in the lobby of the auditorium after the show. There will be no movie.

Concert Pianist

Felice Takakjian, young New York pianist, will present a concert at 1900 on Mar. 8. Miss Takakjian has in a short time already established herself in recital, orchestral, and radio work as an artist of considerable appeal.

Her varied program will draw from a well-balanced repertoire of classical and modern compositions. Stimulated by her own ancestry, she has developed her interest in Armenian composers, and many of her programs have received added color by the inclusion of their works.

The New York Times had this to say of her: "Her approach seemed to be serious and her fingers capable, and she played with

pleasing dash and vitality . . .

"Both the Kabelevsky "Sonatina" and the Scarlatti "Sonata" are predominantly fast moving, gay pieces, and Miss Takakjian put them across with neatness and dispatch.

"At the other extreme, she played Bach's 'Toccata' and 'Fugue in D Minor' with a sense of its grand outlines."

Mock Wedding

On Mar. 15 at 1830, Mrs. Camille Snyder, former employee of NNMC, will bring her show, "The Womanless Wedding" to the NNMC stage.

The all-male cast is a group of volunteer Masons, all members of Capital Forest No. 104, Masonic Temple, Washington, D. C. Their leader is Grand Tall Cedar Ernest Boyden.

The show is divided into two parts—"The Womanless Wedding" and the Musical. The evening will open with a band concert from 1830 to 1900 by the Capital Forest No. 104, Tall Cedars of Lebanon band. Members of the Color Guard, Rangers, and Tuxedo Units will participate in this performance.

After the wedding there will be a community sing with much audience participation. The "Ballerina Dancers" with their escorts, a specialty number for this show, and other numbers will be presented.

The cast will include such choice parts as: the blushing bride, a chick so sweet, she can't be beat; the nervous groom whose fate is doomed; and the jilted sweetheart whose heart is broken (played by a six foot three police lieutenant).

Main participants are: Grand Tall Cedar—Mr. Ernest Boyden; Soloist—Mrs. Rosemary Buckingham; Pianist—Mrs. Evelyn Rooney; Master of Ceremonies—Mr. Clyde Linton; Co-director and Co-ordinator—Mr. Russell Edelin; and producer and directress of the "Womanless Wedding"—Mrs. Camille R. Snyder.

State of Maryland Vehicle Laws to Apply For Recently Installed NNMCM Signals

The following motor vehicle laws (State of Maryland) will apply to the recently installed traffic signals on the NNMCM reservation.

Whenever traffic is controlled by traffic-control signals exhibiting the different color lights the lights shall indicate as follows:

Green alone ("Go")

(1). Vehicles facing the signal may proceed straight through or turn right or left unless a sign at such place prohibits either such turn.

All vehicles shall yield the right-of-way to other vehicles and to pedestrians lawfully within the intersection at the time such signal is exhibited.

(2). Pedestrians facing the signal may proceed across the roadway within any marked or unmarked crosswalk.

Amber alone ("Caution")

(1). Vehicles facing the signal shall stop before entering the nearest crosswalk at the intersection, but if such stop cannot be made in safety a vehicle may be cautiously driven through the intersection.

(2). Pedestrians facing such signal are thereby advised that there is insufficient time to cross the roadway, and any pedestrian then starting to cross shall yield the right of way to all vehicles.

Red alone ("Stop")

(1). Vehicles facing the signal shall stop before entering the nearest crosswalk at an intersection or at such point as may be indicated by a clearly visible line and shall remain standing until green or "Go" is shown alone.

(2). No pedestrian facing such signal shall enter the roadway unless he can do so safely and without interfering with any vehicles.

Flashing Lights

Whenever flashing red and amber signals are used they shall require obedience by vehicular traffic as follows:

Flashing red—When a red lens is illuminated by rapid intermittent flashes, drivers of vehicles shall stop before entering the nearest crosswalk at an intersection or at a limit line when marked and the right to proceed shall be subject to the rules applicable after making a stop at a stop sign.

Flashing amber—When an amber lens is illuminated with rapid intermittent flashes, drivers of vehicles shall stop before entering the nearest crosswalk at an intersection or pass such signal only with caution.

Board Accepts Two For Prosthodontics

Lt. Cdr. Judge C. Chapman, DC, USN and Cdr. Mack L. Parker, DC, USN, were notified Feb. 16 that they had successfully met the requirements of the American Board of Prosthodontics.

Lt. Cdr. Chapman is in charge of Enlisted Training at NDS while Cdr. Parker heads the Partial Denture Clinical Services and is a member of the instructional staff of the School.

Both doctors will receive certificates testifying to their qualifications as specialists in the field of prosthodontics.

Witchcraft Legal Now

Stop your worrying; it's no longer against the law to practice witchcraft in Delaware.

The State Assembly has abolished the ancient law which read in part:

Whoever shall pretend to exercise the art of witchcraft, conjuration, fortune telling or dealing with spirits shall be fined not exceeding \$100 and may be imprisoned not exceeding one year.

Go to it, ladies and gentlemen!

In 1951-52, one out of every 10 servicemen was given ARC help. The ARC served 1,132,000 servicemen at camps or hospitals.

Guaranteed Not Catching

THE ANDREWS SISTERS make an appearance as Chief E. "Knees" Biele and D. "Sleufoot" Zala do a take off on the sisters at the NDS enlisted party in the CPO club Feb. 9.

NDS Enlisted Five Takes Three Games For First Position

Rambunctious rim-raiding by Shuff and Carrabine accounted for 44 points as powerful NDS Enlisted captured its third straight intramural basketball league tilt by ripping previously unbeaten Lab 19, 53-37, on Wednesday, Feb. 18.

A sizzling fast break and excellent ball handling aided the Dental club immensely as it stayed undefeated. Corbett and Powers played standout games for the losers.

NH Barracks, pre-season favorite to cop the loop crown, launched its campaign with an easy 46-24 triumph over EENT on Feb. 16. Bush and Young paced the winners, while Wyatt and Krause looked good for the victims.

Center Command (NNMC) notched its first victory in three tries by nudging aside the NDS Officers, 31-24, in a ragged affair Feb. 17. Alligood scored 18 points for NNMC and Magnusson topped the losers.

Phys. Med. School won its second in a row by clipping NMRI, 51-31, on Feb. 9 as Karos and Fox showed the way. Research bounced back the next day to nip Pharmacy School, 42-41 with Canterbury leading the attack. J. Miller and Bradshaw stood out for Phar. School.

NNMC met Lab 20 on Feb. 19 (see Sport Flashes for result) and NH Barracks battled Pharmacy School on Feb. 20.

League games for the next three weeks are as follows:

Feb. 24—Lab 20 vs. NMRI; Feb. 25—Phys. Med. School vs. Pharmacy School; Feb. 26—NMRI vs. NH Bks.; Mar. 2—Phar. School vs. EENT; Mar. 3—NDS Officers vs. Lab 19; Mar. 4—NDS Enlisted vs. Lab 20; Mar. 5—NNMC vs. Phys. Med. School; Mar. 9—Lab 19 vs. NMRI; Mar. 10—Lab 20 vs. Phar. School; Mar. 11—Phys. Med. School vs. NH Bks.; Mar. 12—NMRI vs. EENT.

Gals Field 4 Teams In New Alley League

Four women's bowling squads have entered a second round of play which started Feb. 17. The Battlewagons and the Destroyers (both nurse teams) have dropped out, leaving two teams of nurses and two of Waves.

The new league, which started last Tuesday, will continue until Mar. 24.

Last Tuesday, the Minesweepers and the Icebreakers were both off to a three-game sweep as the Carriers dropped three and the Submarines forfeited.

Miss Hess, who was drafted to play with the Minesweepers to avoid a forfeit, rolled a sizzling 196 which included a turkey.

Rolling her first turkey of the season was Miss Crowell, who maintained the winning average (135) in the recently completed league.

Team rosters include:

Carriers

A. Forbord, B. Lee, J. Kuenzi, F. Brown, J. Dembinski, S. Halliday and M. Harris.

Minesweepers

M. Petit, A. Crowell, L. Beamer, H. Heikkila, M. O'Neil, A. McCarthy and M. Neely.

Icebreakers

P. Brock, C. Puffer, R. Clarkson, H. Peterson, V. Conaway, P. McElfish, C. Connor and M. McQuarrie.

Submarines

B. Ward, G. Godfrey, M. Scott, J. Throop, M. Hackworth and E. Gravelle.

It's in the Basket

Gals Lose to Wacs By 4-Point Margin But Conquer Marines

The Admiralettes dropped their third league tilt 29-25 last Tuesday to the visiting Ft. Myer six to give them a 3-3 record in the WIAL.

This marks the fourth consecutive match to be determined by four or less points. The gals' three losses have been 42-39, 35-32 and 29-25, while one of their three wins was a slim 35-32.

Bethesda was off to a slow start. Picking up in the second half, they several times came within teasing distance of victory, only to see the 21-point Wac, Craig, sink another goal.

In the second quarter, Shook replaced Mendez and Crouch came in for Evans. Other starters, Carlson, Mihay, Bradford and Cox, played the full 32.

Mihay and Carlson split the scoring with 10 and 9 apiece, while Shook accounted for four and Mendez two.

The gals traveled to Ft. Belvoir Thursday night (see Sport Flashes on next page) for their second league clash of the week.

It was announced last week that the protest over the Quarters "K" game had been lost. In failing to supply an assistant timekeeper, Bethesda forfeited the right to question the accuracy of the home team's official timekeeper.

Beat Marines

Henderson Hall fell to a 35-32 defeat when the Admiralettes racked up their third league win on Feb. 10 on the Marine court.

The roster had taken quite a slash with Allen manning the scorebook instead of forward position since her ankle sprain, and Shook supposedly benched because of her back injury.

Carlson, Mihay and Mendez started off the offense trio with Bradford, Cox and Crouch setting up the defense. The Marines jumped off to a 16-10 lead.

Shook replaced Mendez in the second and she and Carlson started lacing the basket with "Boots" scoring eight and Shook seven. By the half, NNMC had established a 23-17 lead. It was 29-23 at the end of the third.

For a few minutes in the last stanza Bradford moved into Shook's forward slot and Evans joined Cox and Crouch on the defense.

The Admiralettes saw their lead whittled down to three points in the closing minutes of the game. With less than two minutes to go, the Marines were awarded five free shots, but failed to score a single one.

Score breakdown revealed: Carlson-15, Shook-9, Mihay-9, and Mendez-2.

Games scheduled for the rest of the season are:

Feb. 24—Ft. Meade there
Feb. 26—MSTS here (practice)
Mar. 3—Arlington Hall here
Mar. 10—Quantico there
Mar. 17—Andrews AFB here

ACE GUARD Barbara Bradford puts in a few minutes as forward in the Henderson Hall game. (See story in col. 4.)

Calif. Lass Likes Med., Navy, Calif.

"I was 18 on Aug. 4, 1951 and I started processing into the Navy a week later, but I wasn't sworn in until Jan. 22."

"What took so long?"

"I had to convince my parents first—that took four months," says the Admiralettes' star Barbara Ann Bradford, HN. "Brad" is attached to Plastic Surgery 6-D.

After she succeeded in convincing her parents, she packed off to Bainbridge and the Navy commenced its campaign to "convert" her.

"My boot CO figured I was a fresh young kid (which I was)," relates Brad, "so she fixed it so nobody would like me . . . she made me M.A.A. of the company!"

However, Brad did not seem to suffer from her early Navy experience, for after 22 weeks of Corps school her name was found on the honor roll, preceding a grade 95.995.

Arriving here last September, the five-foot-six HA volunteered for the volleyball team. Within a few weeks she was captain of the squad. Next she tried her hand at basketball and when the Admiralettes elected two captains, Brad was chosen to represent the guards.

The softball team can expect to see this spring—in any of the positions including pitcher. A beginner in tennis, she is no novice in the pool and competed in the boot camp swim meets.

You've no doubt concluded that the lass with the brown eyes and naturally curly hair is interested in sports. She is. But there are other equally prominent interests in her life:

One of these is medicine, facets of which fascinate her. In high school, she debated between a career in physical education

(Continued on p. 6, col. 2)

'En Garde' and 'Allez' is Heard in Gym As Salty and Rogers Begin Foil Drill

"FOUCHE" is heard in the gym as David Rogers and Doris Salisbury practice foil fencing.

The two—a Wave and a dental corpsman—walked through the gym with a carrier resembling a bull-fiddle bag. They went to separate dressing rooms and soon returned, each dressed in a white canvas jacket, a pair of white canvas trousers, and carrying a foil and wire-mesh mask. Doris Salisbury, HM1, and David Rogers, DN, were ready to begin practice session in foil fencing. Following the salute came the attack. Assuming the basic stance fencing—the right arm and blade extended and the left arm raised in an arc for counter-balance—the twosome began.

Attack and parry, followed by counter-attacks and parries, mark a half hour of practice for the NMS Lab and the NDS dental technicians.

Both of these NNMCites are under instruction in fencing, taking lessons from Nicholas Toth each Tuesday and Thursday night at Roosevelt High School. The instructor, a Hungarian by birth, also instructs and coaches the Howland University team.

Rogers, who works in the CPO Club, first became interested in the sport when he noticed a leaflet on

the Red Cross board—"Foil, sabre and epee instruction for \$1.00 a lesson." This was a year ago. This summer will see the novice in competition.

Salty, as the second member of the NNMC fencing twosome is better known, is a member of the Amateur Fencing League of America. This Wave, now working in an NMS laboratory, worked with foil for two-and-a-half years in college and has exhibited her skill in league competition.

Both fencers expect to continue with the sport after leaving Washington. Rogers, who expects to return to the University of Syracuse, desires to continue with foil there.

Salty, now an intermediate, is planning to enter the sectionals here at the YMCA in April and hopes to raise her AFLA standing.

Intramural Bowling Results . . .

Standings as of the sixth week of bowling are:

Team	Won	Lost	Pct.	Team Avg.
NMS Lab	20	4	.833	690
NDS Officers	19	5	.792	731

"200 Club"—Klaes (See Mats) with a 257, Miller of Pharmacy with a 222, 222, 233, 233, 215 and 200, Suttelle of NMS Lab with a 222 and 208, Gillmore of NMRI Gold with a 214, Klein of NSHA Staff with a 213 and Deidesheimer of CPO Club with a 212.

SPORT FLASHES

(Thursday, Feb. 19)

The Admirals overcame a five-point half-time deficit to topple the strong Ft. McNair squad 66-60 on the Ft. Myer court as Ron DeVice laced the strings for 32 tallies.

The Admiralettes handed their hosts, the Belvoir Wacs, a decisive 37-18 loss, taking the lead in the first quarter and easily maintaining it.

Center Command's intramural five grabbed their second win out of four tries, as they lashed the Lab 20 quintet 20-14.

NMS Lab Takes Win With 4-Point Loss For NDS Officers

The big news in intramural bowling last week was the victory of the Medical School Officers over first place Dental School Officers. All seven members of the NMS team contributed a share to the three-point win with Mr. Teller, with a 453, high for the winners.

The Dental Officers fell off their terrific pace to relinquish the number one spot to the onrushing NMS Lab aggregation. The lab, paced by Knight and Suttelle, turned in a neat four-point sweep over the last place NMRI Blues to take a one-point lead at the end of the sixth week in a 15-week schedule.

The hottest team in the league is Chief O'Keefe's CPO Club aggregation with their rebound up the win column after a slow start. The CPOs hold all team records to date and blasted the maples to the tune of 2534 pins as they moved into a four-way third place tie with a four-point victory over the See Mats. The big question is whether the terrific handicap of their 800 average team will catch up to them.

The Operating Room continued to gain with a two-point split against the NSHA Staff third place team. The Staff team saved total pins with a 790 game and a 120 lead in the first game of the match. Bob Klein had a 213 game for the losers while D'Angelis led the winners with a 476 series.

Naval Hospital Doctors came up with their first four-point win over NSHA Class F team in spite of an 83 pin handicap. Dr. McClenathan had a series of 515 to lead the parade.

The first tie game of the schedule occurred as Optometry missed the four-point clean sweep by only a half point resulting from a tie. Dental Interns are moving up into contention and turned in a victory over the "hard luck" Pharmacy School boys.

NMRI Gold came up with a surprising three-point win over the spirited Maplebusters from building 141. The Researchers poured in the strikes to the tune of 807 pins in the second game.

Bowling Varsity Has Splitting Good Time

Bowlers on both teams were crowding the head pin last Monday as the Center bowling team played host to the Army Medical Center. The local keggers won handily although everybody seemed to be getting more than his usual ration of splits.

High scores were missing, but there was some sweet and deadly accurate bowling as everybody tried to turn those splits into spares. Top individual performance in the "split picking" department was that of the reliable anchor man, John Miller from Pharmacy School.

In spite of his roundhouse curve, Miller managed to pick up the 4-7-10 spread twice in succession, which in any bowlers book is just about as rare as a perfect game.

The NNMC keggers are pointing toward the championship in the MAISAC League and are confident

NNMC's 68-62 Loss to Pax. Riv. Five Ends 2-Game Winning Streak for Crew

After leading the favored visitors almost all the way, NNMC faded in the final five minutes and dropped a 68-62 decision to Patuxent River, Md. NATC, in a fast-moving MAISAC contest here Tuesday, Feb. 17.

Ron DeVice, speedy forecourt ace, bucketed 13 points in pacing the Admirals to an 18-15 first quarter margin. However, late in the second stanza Pax River came from behind to assume a 31-26 halftime advantage.

Undismayed, Coach Paul Sherin's NNMC lads broke loose for a 19-point third period and held a 45-41 lead going into the home stretch. Terrific rebounding by Cecil Mitchell and Silas Barton proved instrumental in putting the home five back into the driver's seat.

With six minutes remaining, Center still had a 52-48 edge, but then NATC staged a furious comeback to rack up 20 markers in the closing moments and cart off a six-point triumph. NNMC played one of its better games of the season and it was a heartbreaker to lose.

DeVice poured in 25 points for NNMC, Mitchell had 14 and Barton 11. Mazul netted 24 for Pax River and Stan Nasonti potted 11. It was the Admirals' 12th MAISAC setback in 17 outings.

In remaining loop tussles, NNMC hosts G-2 (MDW) at 2000 on Feb. 24 and faces Ft. Myer (1020th USAF) there at 2030 Mar. 3. The Admirals tackle Fairchild Aircraft of Hagerstown, Md. there Feb. 26 in a non-league affair.

Vint Hill Farms

Obviously tired of falling before various MAISAC opponents, a scrappy band of NNMC cagers halted its seven-game losing streak recently by capturing close contests from Vint Hill Farms (66-63) and Arlington Hall (53-49). This gave our Admirals a record of 5 wins and 11 losses in loop competition.

With fiery little Pete Veneziano and Noel Schilling sparking the attack, Coach Paul Sherin's charges got the jump on Vint Hill Feb. 5. NNMC gained an 18-9 first quarter margin and increased its advantage to 22-9 before the visitors struck back to trail only 28-24 at intermission time.

Driving hard, the Army five pulled ahead 50-49 as the third period closed, mainly due to the terrific hook shots of burly pivotman Reinhold (Heinie) Hieniger. He bucketed 23 points in the last half to finish with the game's high individual total of 31.

A swift-paced final frame saw Ron DeVice, who played only the second half because of an injured ankle, hit what proved to be the deciding basket and Walt Hauck and Ernie Reed snare several important rebounds. NNMC stalled out the fading moments for a richly-deserved victory.

DeVice had 14 markers for the Admirals, Schilling 13, and Veneziano and Reed 9 each.

Beat Arlington Hall

Two free throws by DeVice with 20 seconds to go assured NNMC of a repeat win over Arlington Hall Feb. 10 after the home club's small floor had played havoc with our quintet's field goal shooting.

Trailing 14-9 at the quarter, the Admirals rallied to pull ahead 31-22, only to see Arlington Hall close the gap to 31-30 at the half. The winners held a precarious 39-37 edge at the third stanza's conclusion and were forced to battle down to the wire in getting the decision.

DeVice and lanky Cecil Mitchell topped the evening's scoring with 17 points apiece, while Bob Carlson had 16 for the losers. Schilling turned in a fine floor game for NNMC.

they can do it.

After a visit to the Cheltenham Naval Radio Station tomorrow, the varsity returns home to play host to the only two teams who lead them in the League—Quantico and Ft. Myer.

Varsity's Range Men Are Mitch and Reed

Two rangy men in the Hospital Command have been gobbling up a flock of rebounds for our NNMC Admirals in MAISAC games during the past few weeks. They are HM3 Ernest B. Reed, USN, and HN Cecil

Ernie Reed, HM3

E. Mitchell Jr., USNR, tallest players on the Center squad.

A native of Oatomba, Minn., the 23-year old Reed has been with the team all season and has shown consistent improvement from week to week. The 6' 2", 190 lb. OR techni-

Cecil Mitchell, HN

cian is especially adept at snaring balls off the defensive board and a scrappy competitor with tremendous will to win.

Following his discharge in the (Continued on p. 6, col. 2)

Med School Daze

by Cracky

If anyone these days has any doubt left as to just what a chain reaction is, we'd like to suggest the following experiment: Line up Tex Harrell, Dave Davis, and Pop Overby, one in back of the other, and just say Boo! Ask any of the "liberty hounds" that almost got trampled on the other day.

We think it's about time someone started one of those graft investigations of the MAA force. Have you noticed that shiny new chariot that Larkie is riding around in? (Please excuse the grammar. We do know that a preposition should never be used to end a sentence with!) Happy cruising, Jack.

Speaking of the MAA force, it's about time we congratulate the "new" Bowers. There's been quite a change since Ding went on night duty.

We received a hot scoop in the "hearts and flowers" division last week. It seems as though Ethel Weber, the beauty of the third deck, has finally fallen in love. We don't know his name, but we can tell you that he has shiny black hair with a few yellow streaks. Looks like a quinea pig to me.

Davidson of Lab 19 informs us that Dr. Brady's new convertible is not quite so new anymore. You'll have to see Dave for further details.

Valentine's Day took its toll last week when "Yogi" Miller married a lass named Sue Williams at the same time that Jewett and Welty were being spliced.

Chief Amend must have been modeling a new style of uniform a few weeks ago. We hear that it was really air conditioned. Don't you think you should have waited for springtime, Chief?

Be with you again soon, by cracky!

Dental Explorer

by C. Connor

"She wears red feathers and a hooley hooley skirt" will soon be the theme song for Anna and Clarice as they anxiously await their orders for Pearl Harbor. By the way, gals, rumor has it that they wear grass skirts—bare feet—and garrison caps for duty—so get your orders in early for those skirts.

Back to duty again is Jarboe who is practicing up on his dance routines for the liberties he'll be pulling soon.

Cdr. Gardner and Glynn-Jones are still on the sick list—but we all hope that they will both be back to duty soon again.

Dr. Chaisson is home again after a brief vacation in Miami where he not only caught more than enough fish, but acquired quite a tan also. And true to form, I quote, "you should have seen the one that got away."

Shirley is back with us again in Bldg. 1, but will be leaving again in March when she will be night master at arms of the Wave Barracks. Gee, Shirley, a whole month should give you more than enough time to figure out that little problem about the plugs.

The dental party was a howling success! There was dancing, refreshments and plenty of laughs. I'm sure Chief Eric couldn't find a party pooper in the entire crew. By the way, Chief—what is that under your nose...?

With two new cars in the personnel office we'll have to submit special chits to speak to the two individuals... namely Mr. Ferguson and Chief Eric. Mr. F. has informed me that he maintains a waiting list for any females who would care to Road Test his car after 1630.

Navy Belles

by George

Just around our house: The metal lockers are back like a storm and you never saw such a mess since they took them out two years ago. All cubicles now have four bunks. You can't turn around without bumping into your roommates. Good thing mine are both smaller than I am.

Pat Welty was our Valentine bride. She was married Feb. 14 in the small chapel. So she wore light blue with Navy blue accessories. Pat, we hope you will always be as happy as you were that Valentine's Day.

St. Dennis is learning to paddle her canoe dragging her feet. All of our Waves want to thank Capt. Hancock for the lovely Valentine candy. It was surpassed only by the wonderful impression she left with us on her surprise visit here a few weeks ago.

Hammy Brooks is now driving her own car. Nuff said. Casualties of the month: Al Allen has her foot in a cast and an unsharpened pencil behind her ear. Shook is nursing an ailing back after a bad fall during a basketball game.

Wanted: Barbara Bradford and Peggie Van Trease want some baby oil for well-scrubbed hands.

More girls received orders to schools: Kitty Kalke to ECG, Jean Stolz to X-Ray, and Mary Lee to Norfolk for recruiting school.

More girls are cooking in our new galley downstairs. We are certainly proud of it. On the Monday before Lent we had a Valentine party in the cellar with open house for our friends. We must have another in the Spring.

NMRI

by R. Conaway

It sure looks like the "transfer bug" has hit the Institute. We lost Cdr. M. G. Wheatcroft, DC, to NAMRU, Cairo. Lt. R. S. Farr, MC, is off to USNH, Corona, Calif. and HMC Ben Small leaves for Norfolk, Va., for duty aboard the USS Lowry.

It was an "Operation Wing Ding" for sure last Saturday night as the gang got together to bid adieu to HMC V. Carnecross. Vic leaves for Newport, R. I. and the USS Joyce. Hope she's nice, Vic!

A welcome aboard to Ens. J. F. Parker who joined the NMRI staff from ONOP, Washington, D. C. We were all glad to see W. H. Gill back to duty after an extended stay on sick list at the hospital.

I hear the two Wave bowlers from NMRI were taken to the cleaners Tuesday night, and I don't mean the dry cleaners either.

Wonder what strange fascination the Braille system has for Peggy? If you can read this, etc., etc.

Malvina, what do you do in case of fire? Fooled you Morrison, (A. T. that is). Bet you didn't expect to see your name in print, and it didn't take three months either.

I hear that Hamby is no longer the "TV" kid. Guess that explains the quivering liver, or is it love? Well anyhow, it quivered.

Say Stacy, have you been to Glen Echo lately and did she sign that chit? Someone should tell Jim Gillmore that you're not supposed to fry eggs in lima beans; grease works much better.

What's this I hear about Don Raw and the gas meter? To be or not to be—a preacher—huh Red!

Small Town, Big City Give Varsity Height

(Continued from p. 5)

fall of 1954, Ernie plans to return to Minnesota and either take up dairy farming or study physical education or agricultural engineering in college. He played football and basketball in high school and also performs at third base on the diamond.

Whereas Reed comes from a small town whose name means "nice little village" in the Indian language, "big Cece" is from New York City and graduated from Stuyvesant High School, which has the astounding enrollment of something like 17,000 students.

After competing in basketball and track (he was a miler) during his prep days, Mitchell went on to study for a year and a half at CC-NY before being called to active duty in December of 1951. He majored in bacteriology.

The tall New Yorker—he stands 6' 3" and weighs 180 lbs.—hopes to go back to college after leaving the service later this year.

A recent and valuable addition to the Admirals, Cece arrived at NNMC on Jan. 27 after completing recruit training and corps school at Bainbridge, Md., where he played on the HCS basketball team. A teammate of his there was HN Silas Barton, now a fellow member of the Center ball club.

Bradford

(Continued from p. 4)

one in medicine. Her mind is made up now, and after her enlistment she plans to earn her R. N. and return to the Navy.

The third interest? Californial! Brad is a native of Los Angeles, who never saw it snow until she joined the Navy. She thinks "the snow is beautiful—the East Coast is beautiful—Maryland is beauti..."

"Wait a minute, Brad, do you think it's better than California?" "Are you kidding?"

— These Gave —

Military and civilian members of NNMC who donated a pint of blood during the period of Feb. 2 to Feb. 16 are:

NNMC

Wilber Ross, HM1, Mr. Upton Jackson, Mr. Richard Miller and Mr. John Lazarus.

NH

Joseph Zawodnik, HN, Robert Featherston Jr., HN, Joseph Huber, HM3, Ltjg. Helen Jarvi, NC, Richard Waters, HM3, and Anthony Tucker, HM3.

NMS

Mrs. Rene Gonkel.

NDS

Paul Halter, DN, John Gray, DT3, Rodney Shuff, DN, John D. Smith, DT3, Robert F. Barton, DT1, Duane J. Lynch, DTC, and Ernest Beile,

NMRI

Lt. Leonard Bodenlos, MSC, and Veronica Conaway, HM1(W).

SCUTTLEBUTT

"That's the Old Man!"

Elevates to Stardom

CURVESOME PATRICIA HARDY, the former Times Square elevator operator who has a leading role in her first movie, "Girls in the Night" wonders about 1953. Pat was "Miss New York Press Photographer" for 1952 and she hopes the girl who succeeds her in the title spot will get the same breaks that she did. Pat's a native of Brooklyn.

Medicine & Science

Two Techniques for Third Dimension: More Than One Way to Kill a Parasite

The ABCs of "third dimension" movies can be simplified in two techniques.

The first is stereoscope, where two pictures are taken from slightly different angles. The viewer has to wear polarized glasses to see the images.

Paramount, Warner Bros. and Columbia soon will come out with this type of movie.

The second is a trick screen using sight and sound to create a third dimension illusion. A scene is flashed on an enlarged, concave screen which nearly surrounds the audience.

Both the peripheral vision and the different positioned sound aid in the illusion of depth.

Twentieth Century-Fox and Cinerama utilize this technique in their new pictures.

Trichinosis ended may be another result of the atomic age. At the University of Michigan, Dr. Henry J. Gomberg thinks radiation should be ideal for stopping the muscle-invading pork parasite, because the rays can sterilize female trichinae.

"It takes 100 times more power to kill parasites than to prevent reproduction," he said, "and the end result is the same."

What to See in D. C.

MONDAY, Feb. 23—Theatre workshop, Roosevelt Center, 13th and U Sts., N.W., 2000, each Monday.

TUESDAY, Feb. 24—Basketball, American U. versus Western Maryland, Leonard Gym, American U., 2030. —Automobile Show, National Guard Armory, 1400 to 2200, until Mar. 1.

WEDNESDAY, Feb. 25—Great Books Institute, Jewish Community Center, 16th and Q Sts., N.W., 2015, each Wednesday.

THURSDAY, Feb. 26—Finals, Washington Times-Herald Golden Gloves Tournament, Uline Arena, 2000.

FRIDAY, Feb. 27—Concert, U. S. Navy Band, Department Auditorium, 2000, each Friday.

SATURDAY, Feb. 28—Basketball, Georgetown versus Fordham, McDonough Gym, Georgetown U., 2030.

SUNDAY, Mar. 1—Lectures, National Gallery of Art, 1600, each Sunday. MONDAY, Mar. 2—Record hour, YWCA, 17th and K Sts., N.W., 1900, each Monday.

TUESDAY, Mar. 3—Hebrew Language Groups, Roosevelt Center, 13th and U Sts., N.W., 2200, each Tuesday.

When the fire inspector asked for the three causes of fire, during his visit to Bldg. 122 last week, he received a speedy answer from Faló: "Men, women and children."

The reason a dog has so many friends is that his tail wags instead of his tongue.

On a bus the other day, a fellow offered a lady his seat and she fainted. When she was revived she thanked him—and he fainted.

"Have you any good after-shave lotion?"

"Yes. Here's a number that drives the girls crazy. It smells like money."

FEBRUARY 23, 1953

Lt. Allen Dulles, Son of New CIA Head, Awarded Silver Star Medal Here Feb. 25

WATCHING WITH PRIDE, Mr. Allen Dulles sees his son, Lt. Allen M. Dulles, receive the Silver Star from Gen. Lemuel Shepherd, Commandant of the Marine Corps.

Second Lieutenant Allen M. Dulles, USMCR, was awarded the Silver Star Medal on Feb. 25 here in the NNM Board Room. The Silver Star, the fourth highest of all military medals, was presented to the lieutenant, now a patient on T-14, by Gen. Lemuel C. Shepherd, Commandant of the Marine Corps.

The presentation was made in the presence of his parents, several relatives, friends, commanding officers of the National Naval Medical Center and marine comrades who fought by his side in Korea.

Lt. Dulles is the son of the new head of Central Intelligence Agency, Allen Dulles, and nephew of the Secretary of State, John Foster Dulles.

The citation read in part: "For conspicuous gallantry and intrepidity in action against the enemy while serving with a Marine infantry company in Korea on 14-15 November 1952. Serving as a platoon commander on a forward outpost, Lieutenant Dulles displayed outstanding courage and devotion to duty."

"When enemy snipers harassed the position, he and a squad leader moved out to eliminate them. When the squad leader was wounded, and although wounded himself, he continued forward and engaged the foe at close range, firing on them until his weapon was shot from his hands."

"Later, he moved well in front of the outpost to seek the enemy and direct mortar fire on them. During this act he was again wounded, but disregarded his personal comfort and safety in order to continue directing the defense of the area."

"Finally, he fell unconscious from neglected wounds and was evacuated."

Lt. Dulles received his commission after finishing OCS school at the U.S. Marine Corps Schools at Quantico.

In addition to the Silver Star, Lieutenant Dulles has merited the Korean Ribbon, the United Nations Ribbon and two Purple Hearts.

Med.-Dental Academy

A medical and dental academy on the lines of West Point and Annapolis is the basis of a new bill submitted to the house by Rep. Louis B. Heller (D., N. Y.).

His bill, submitted Feb. 7, would provide schooling for men who later would be used in the Armed Forces, Veterans Administration and other federal agencies.

Patients Hear First AFRS Broadcast Today on Bedside Sets from 1300-1345

Today, Mar. 16, marks the kick off date for the beginning of a series of radio broadcasts for the benefit of hospitalized personnel.

Patients, who have been overseas, will recognize these 45-minute broadcasts as the Armed Forces Radio Service programs, which provide music, entertainment and information for out-of-the-way overseas bases.

Armed Forces Radio Service (AFRS) selects the best in American broadcasting, deletes the commercials, and makes the programs available to the Armed Forces overseas and to hospitalized personnel within the continental limits.

NNMC patients will find this new series on channel "C" of their bedside radios from 1300 to 1345 Monday through Friday. Selections will vary from hot jazz to symphonic music, from thrillers to straight information programs.

Weekly programs will be announced in the NNM NEWS and Daily Bulletin. All patients are urged to send requests and comments to the I & E Office, Bldg. 102, or phone Ext. 547.

Scheduled programs for the next two weeks:

Mar. 16—(1300-1330) The Story of the Armed Forces Radio Service; (1330-1345) Afternoon Rhythms.

Mar. 17—(1300-1330) Music for Moderns; (1330-1345) Hill Billy Hit Parade.

Mar. 18—(1300-1330) "Douglas of the World," ("The Disappearing Act")—Foreign Correspondent Brad Douglas takes his listeners to international capitals for adventure and intrigue; (1330-1345) Pops Concert.

Mar. 19—Concert Hall.

Mar. 20—(1300-1330) "Secret Mission" (The Dream Bus—A series of factual stories of people trying to escape from behind the Iron Curtain); (1330-1345) Musical Salute.

Mar. 23—(1300-1330) Afternoon Rhythms; (1330-1345) Fiesta Time.

Mar. 24—Music for Moderns; Hill Billy Hit Parade.

Mar. 25—(1300-1330) "Douglas of the World," ("The Disappearing Act"); (1330-1345) Pops Concert.

Mar. 26—Concert Hall.

Mar. 27—(1300-1330) "Secret Mission" (Farewell Appearance); (1330-1345) Musical Salute.

Staff Dance Brings Irish Shenanigans

A variety show, orchestra, 50 col-leens, and Miss Washington of 1952 (through special intercession to the king of the leprechauns) will be here for the St. Pat's dance on the 17th of March at 2030.

Headlined by Miss Iris Ann Fitch, the Miss Washington of 1952 as a solo singer, the show will include Mike Mehalic, in his ventriloquist act, Miss Marguerite (Sparkie) Sparks, a local night club favorite, with her dances, and Princess Lei Lani of Hawaiian fame who just finished a stint at the Wayne Room downtown.

Again refreshments will be served and all enlisted staff and students are invited.

Almost Half of Your Donation to ARC Is Returned to You and Your Dependents

Servicemen throughout the world are being asked to join with fellow Americans in the 1953 Red Cross Fund Raising Campaign.

This year's goal is \$93,000,000—the largest it has been since the end of WWII.

The reason for such a large amount is not only to process blood for the Armed Forces in Korea but to provide Gamma Globulin—a derivative of blood—to combat polio.

The Red Cross budget for the Armed Forces this year is 42% or \$39,000,000—an increase of a million over last year. The additional money will be used to provide additional recreation facilities for the troops in Europe.

The vital services which the Red Cross provides for servicemen, their

dependents and veterans, are one of its major tasks. Here is a partial list of what the Red Cross means to you:

There are 400 experienced staff workers serving fighting men in Korea and Japan. In Europe there are 200 workers providing for the personal needs of ill and able-bodied servicemen and their dependents. In addition, the Red Cross has 135 other workers stationed throughout the world with our troops.

At military installations and hospitals last year the Red Cross handled 355,000 cases a month for servicemen. In VA hospitals, volunteers served 115,000 patients a month. Chapter Home Service workers handled 174,000 requests for servicemen and their dependents each month.

In the 1951-52 fiscal year, the Red Cross procured 2,440,000 pints of blood for the Armed Forces, much of which was flown directly to combat areas.

All this and much more is what your gift to the Red Cross will supply. The need is great. Remember you are the Red Cross. Your gift will keep it strong. Give generously.

Medicine & Science

Weekly Blood Donation May be Possible; Combination EEG and ECG Now Available

A new technique might make it possible to donate blood 52 times a year. At present it is not considered safe to donate more than five or six times a year because it takes the body about two months to rebuild its red blood cell supply.

A new method, now being developed at the Children's Hospital in Philadelphia, returns the red cells to the donor immediately. The freshly-drawn blood goes to a centrifuge which whirls the blood at high speeds, causing separation of the plasma or liquid portion of the blood from the cells. The cells are returned to the donor.

A sleeping pill that wakes you up in the morning may not be too far in the future. Smith, Klein and French Laboratories of Pennsylvania are developing a pill that is composed of an outer layer of a quick-acting sedative to put you asleep, an inner coat of a slower acting drug to maintain sleep, and a core composed of a stimulant.

Electronics, the magazine, brought to attention another instrument for medicine. A recent issue of the periodical mentioned a combination electroencephalograph and electrocardiograph instrument. Depending on the way the machine is hooked up, the device can be used to record brain waves, heart action, muscle action or pulse rate. The device, worn about the shoulders, can be used with the patients in any position, standing, walking or even 100 feet away from the tester.

The transmitter, which consists of two units worn about the shoulders, is a combination pickup and transmitter. The signals are picked up on a receiver which can be as much as 100 feet away. The signals can be seen on an oscilloscope and photographed if a permanent record is desired. The machine was invented by a member of Holter Research Foundation, Inc. of Helena, Mont.

The Army Medical Service has approved a new audio-visual nurse call system.

Present plans call for installation of the system at seven new permanent-type hospitals.

The units permit a two-way conversation between the patients and nurse at her duty station. A non-locking call button within reach of the patient sounds a chime and lights a signal on his nurse's control station, thus identifying the calling patient.

The button, like the light and buzzer system here, also lights the corridor dome light, lights above the bed or quiet room and other necessary signals (galley, utility room or other work areas).

This two-way conversation enable the nurse to take care of all the patient's needs the first time without making additional trips.

Although the system costs twice as much as the light and buzzer method, the resulting benefits are such that the Army Surgeon General plans to install it in every permanent-type new hospital.

'For Enjoyment and Pleasure'

NURSES WATCH a new TV set donated to the Nurses Quarters by Mr. Eugene Meyers, Chairman of the Board of the Washington Post. The set, a 21-inch Zenith, was donated "for their enjoyment and pleasure."

Five-Day Mission Begins Next Sunday With 0830 Service

A week mission will begin here next Sunday. Opening with a sermon after the 0830 Mass on Sunday, the mission will continue to Mar. 26 inclusive.

Daily Masses will be celebrated in the Catholic Chapel at 0600, 0715 and a 1205 service in the auditorium, each followed by a short instruction period.

A Lenten service will be held each evening in the auditorium from 1730 to 1830—one hour. This period will consist of Rosary, Lenten devotions and instruction followed by confession in the Catholic chapel.

All military personnel and their friends are invited to attend.

The mission will be preached by Chaplain (Major) Angelus P. Diemer, a member of the Capuchin Franciscan Order. In civilian life he served in churches in Milwaukee, New York and Brooklyn.

In 1943 Father Diemer attended the Chaplains' School at Harvard

Chaplain Angelus P. Diemer

University and saw duty in New Guinea, the Philippines and Japan during the Second World War.

Prior to coming to Washington Father Diemer spent 32 months in Alaska at Anchorage and at the Army Arctic Indoctrination School and the Arctic Test Branch at Big Delta, Alaska. In May of 1952 he reported for duty at the Walter Reed Army Medical Center where he is stationed now.

Jewish

Congregation Beth El of Montgomery County will hold services every Friday night at 8:30 P.M. and Saturday morning at 10:00 A.M. in the Pook's Hill Auditorium, 3 Pook's Hill Rd. The services will be conducted by Rabbi Martin Kessler.

The services of Rabbi Harry Kaufman, representing the Jewish Welfare Board, are available to all Jewish Personnel and Patients at the National Naval Medical Center. Rabbi Kaufman may be reached by calling the Chaplain's Office, Ext. 324, or by call direct—Office: RA. 3-5371—Home: RA. 3-0755.

Dental Handbook Nets Commendations For Navy, Civilian Members of Staff

LETTERS OF COMMENDATION are handed out by Capt. Taylor to four NDS staff members who drafted the new dental manual. Receiving the "well done's" are Mr. Paul Tanner, Chiefs C. W. Clinton and R. C. Mitchell, and R. F. Barton, DTI.

Last month two chiefs, a dental technician first class and a dental technician second class were presented Commanding Officer Letters of Commendation for work on a new dental manual, "Handbook for Equipment Maintenance and Repair."

The four were Chief Raymond C. Mitchell, Chief Carl W. Clinton, Robert W. Barton, DTI, and Paul Tanner, civilian instructor in Dental Repair.

SPRING

(Or This Sap Wants to Run)

The open road calls to my heart
To pack my things—for somewhere
start.
I look at folders, maps and things,
For wanderlust within me sings!
A streamlined train, on gleaming rail,
Bids me follow some gypsy trail.
An ocean liner, huge and grand,
Beckons to far distant land.
I would fly o'er land and sea
To London, Rio, or Tripoli.
I know the urge that Livingston felt
When he set out to see the Veldt.
Columbus, too, and Francis Drake
Took some trips that I could take.
Since time and money, I must say,
Will not permit such holiday,
I can look at maps and things
When wanderlust within me sings . . .
Mildred Hynes, NMRI

Ninth Korean Star

The Chief of Naval Operations has announced the authorization of an additional engagement star for the Korean Service Medal for the campaign to be known as the "Third Korean Winter" which began Dec. 1, 1952. This is the ninth engagement star authorized by the Navy.—(AFPS)

Note on Your Calendar

One of Washington's top variety shows returns to NMMC on Sunday, Mar. 29 when Rohde's Musical Varieties again come to the local stage. The troupe will entertain in the wards in the afternoon and present their auditorium show in the evening.

Chaplain Sodi Begins New Protestant Choir

Can you sing a mean "Sweet Adeline"? Voices are needed for a Protestant choir now being formed by Chaplain Sodi. Catholics, service personnel and volunteers are invited to join. A choir director and a volunteer for piano are also needed.

For further information contact Norma Shrader, Ext. 585, 1 and 2 Office.

The Chaplain's Corner

Truth

by Chaplain Newell V. Brink

One of the great problems of the last two decades has been the attempts on the part of totalitarian groups to destroy and falsify history. Hitler felt that a monstrous lie told often enough would be believed. Other countries have felt that they might even rewrite history to prove that they were the inventors of all cultural and mechanical objects of progress in the last two centuries.

The problem is not new. Evil men in the time of Jesus resented the universal truths that He taught and plotted to destroy Him. They felt that dictators do today, that if they killed Him, the truth as He taught it would die. It did not work.

It was tried again with Stephen. But stoning did not silence the testimony of truth either. So consecrated men in all ages, having seen the truth in Christian terms, have not been able to abandon it in the face of relentless persecution. One of the many things that the Resurrection story points out for all time is that evil men cannot destroy truth.

As you think and read always look for truth. Search for it diligently and make it the basis of your life. What Jesus taught is your guide, and if you will find truth and all that it means in satisfaction of mind and

Beneficial Hints Put Total of \$67.50 In Pockets of Idea-Conscious Civilians

A little thought netted \$67.50 to four civilian employees and letters of commendation to two others.

On Friday, Feb. 20, the Commanding Officer of NNMC presented \$10.00 each to Mrs. Alice A. Moore, Mr. Herbert G. Ward and Mr. B. Herbert Morrow for beneficial suggestions and a check for \$37.50 to Mr. George R. Hantzman.

Mrs. Moore, ward attendant, suggested a sign on the North elevator door to prevent unauthorized persons from getting off at the Obstetrical Ward.

Mr. Ward, animal keeper, suggested that an air hose be installed in basement of building 21 to be used in inflating tires on carts.

Morrow's idea was a rack for fried meat so that excess would drain away.

Hantzman's suggestion was a board for the classroom of Training Supervisor.

Two letters of commendation were presented to Miss Helen G. Line of Military Personnel Office for her idea for facilities for ladies' wash rooms and Mr. Edward E. Donn of Maintenance for his suggestion to have signs for restrooms being cleaned.

Submarine Medicine Needs More Doctors

Applications for a course of instruction in Submarine Medicine are desired from regular and reserve medical officers on active duty in the rank of lieutenant commander and below, the Bureau of Medicine and Surgery announced. The course of instruction consists of two and a half months' instruction at the Experimental Diving Unit, Naval Gun Factory, Washington, D. C., and six months' instruction at the Submarine School, Naval Submarine Base, New London, Conn.

At present, vacancies exist in both the April and October 1953 classes. Applicants desiring the course of instruction convening on April 15, 1953 should submit their requests through official channels by mail or dispatch.

Every 6 Months Now For Rank Promotions

(All Hands)—Applications for appointments as commissioned officers in the Regular Navy of certain Naval Reserve officers and temporary USN officers will now be considered every six months instead of only once a year.

Eligible male and female officer personnel serving on active duty who meet the qualifications established by BuPers Inst. 1120.12, Dec. 5, 1952, may now submit applications through official channels on or after Jan. 1 for the Mar. 1 deadline or on or after July 1 for the Sept. 1 deadline.

Applicants shall have had not more than five years of total commissioned service on July 1 of the calendar year in which application is submitted. Active commissioned service will be computed to Mar. 1 and Sept. 1.

Total commissioned service will be computed to July 1 of each calendar year.

There is no requirement of total commissioned service for officers of the Nurse Corps Reserve.

Added Definitions For Military Terms Submitted to NEWS

Editor's note: In the Jan. 12 issue of NNMC News we reprinted an article from the Norfolk-Virginian-Pilot on military terms and their lighter definitions. CWO J. W. Wilson, Naval Hospital Patients Record Officer, seeing the collection, sent another set of explanations to us. They are:

Take necessary action—It's your headache now.

You will remember—I have forgotten.

We should confer—Send your assistant to see mine.

Forwarded—Pigeon-holed in a more ornate office.

A growing naval opinion or policy—Two brass hats have agreed.

Take immediate action—Do something in a hurry or we both will catch hell.

Your observations are desired—Do the dirty work so I can write "Forwarded."

Your department is negligent—I have just been given hell.

You are to be commended—There's a particular dirty job coming up in the next routing.

Naval tradition demands—I have been talking to an old-time chief.

Give this your immediate attention—For heaven's sake, find the papers.

You will show him every courtesy—His uncle is a four-striper or better.

Forwarded as a matter pertaining to your command—I don't know what the hell this is all about.

Action is being taken—Your letter is at the bottom of my file.

For compliance—Praise the Lord and pass the buck.

Dr. Orton Lectures On Human Relations To NSHA Students

"Human Relations in Management" was the subject of a lecture presented recently at the Naval School of Hospital Administration by Dr. Dwayne Orton, Director of Education for the International Business Machines Corporation.

Formerly dean of the General College, College of the Pacific, and president of Stockton College, Dr. Orton is an educator with long and varied experience.

He has occupied his present position with IBM since 1942, directing a training program for their thousands of employees, whose courses range from elementary to advanced engineering and management.

Their training program also included an advanced management seminar at Endicott, N. Y. for officers of the Armed Forces.

The lecture, integrated with the regular administration division curriculum, was one of the several scheduled to be given during the current term by authorities in various areas of the field of administration.

Dancing? Drinks? Snack? All This And More at Redecorated Chiefs Club

ADMIRING THE NEW PLAQUE—a part of the new CPO Club decorations—are Chief Colin E. Cox, new President of the Club, and Chief George J. LeBlanc, Treasurer. The plaque lists former and present Presidents and Treasurers of the Club.

NNMC Chiefs have practically a new Chief Petty Officers mess. Completely renovated, the club now offers, in addition to its cocktail lounge and combination dining-ball room, checking facilities, a game room and a new aluminum awning for the entrance.

The ball room has as its color theme rose and blue. Backing the stage is a new, recently finished, tri-dimensional mural by Chief M. Runkel of Medical Illustration.

The cocktail lounge, equipped with television set, sandwich grill and, most important, top bartenders, has been repainted and refinished to make it the finest in the D. C. Area with everything in the line of food, drink or entertainment available.

Care for a snack? The mess has on hand sirloins and T-bones with all the trimmings for a rock-bottom \$1.50, top fillets for \$2.00 and a more-than-you-can-eat shrimp dinner for 75 cents.

"All you can eat" theme dinners are held about once a month with Mexican, Italian or Chinese food offered. Sandwiches, coffee and soft drinks are nearly always available. Incidentally, chiefs rate free steaks on their birthday.

Maybe you enjoy dancing. An orchestra dance is held at the club every Saturday night with Bob Hume and orchestra furnishing the music. The 21st of March will herald the CPO Spring Dance with band and a four-act variety show. On other nights, a juke-box is available for the tripping-the-light-fantastic fans.

The ball room—seating about 150

people—is utilized on Thursday nights beginning at 2030 for Bingo while the cocktail lounge on Sundays from 1700 to 1900 offers any drink in the house for a low 25 cents. Furnishing music during the cocktail hour is 'Doc' Farnham, playing piano or accordion.

The mess is open from Tuesdays to Fridays, 1630 to 2300, Saturdays from 1300 to 0100 and on Sundays from 1500 to 2300. An attractive feature for the average not-so-rich CPO is the prohibition on tipping in the mess.

Great Lakes Symposium Scheduled for May 6-8

The first annual Armed Forces Medico-Military Symposium under auspices of the Commandant, Ninth Naval District, will be held at the U. S. Naval Hospital, Great Lakes, Ill., May 6-8, 1953.

Officers on active duty may be given "authorization orders" in accordance with current instructions. The complete program and full information is available at the District Medical Office, Headquarters, Ninth Naval District, USNTC, Great Lakes, Ill.

Correspondence and inquiries regarding this symposium should be forwarded to the above address.

'And Over on the Right . . .'

R.ADM. GROESBECK SAYS THANK YOU to Mr. Frank S. Pohanka Jr. for the mounted binoculars installed on T-18 Feb. 16. Mr. Pohanka is second vice president of R.O.N.S. (Washington Navy Chapter of the Reserve Officers Association). R.O.N.S. presented the binoculars to NNMC with the expressed hope of providing enjoyment to the patients and staff here.

Ex-serviceman Who Didn't Need I & E Help

Interested in College or a Commission? Answer and Send This to I & E Office

An industrious serviceman may earn high school or college credit by means of USAFI correspondence courses; may take night courses at local colleges or universities; or may qualify for officer programs through the successful completion of appropriate college level examinations.

The NNMC Information and Education Office will be better able to help you if you will check below the services in which you are interested, cut out and return the form to the I & E office, Bldg. 102.

Public Information Sometimes Means Punch and Cookies

MUNCHING COOKIES in the Enlisted Mess Hall with Lucile Thompson, HMI, are Julie Carroll and

Ginnie Good. Both eight-year-olds are members of Brownie Troop No. 583 of Bethesda.

'Kitonen, Cookies, Eighteenth Floor' Preferred by Junior-Sized Visitors

The sign on Lucile Thompson's desk says "Public Information." This is usually construed to mean informing the public by writing releases for local or home-town newspapers.

Sometimes the informing consists of answering such questions as, "Do you have any three-eyed babies here?" or "How did that man break his leg?"

This informal informing occurs when the public is a group of 20 or so children, ages 8 to 10. About five such groups (usually Cub Scouts, Brownies, Blue Birds or school groups) visit the station each month.

Lucile Thompson (HMI of Center Command) meets them in the lobby and the hour-long tour is underway. Points of interest include the observation room on T-18, chapels, galley (Where Mr. Bonnell awaits them with cookies and fruit punch), and the libraries.

A peak into the operating room usually produces enthusiasm and "Gee, it's just like a town," is often heard as they troop by the cobbler shop, cleaning and taylor shop, and Navy Exchange.

The children, who many times earn points toward merit badges by visiting the hospital, often bring presents for the patients. Sometimes they bring a scrap book of cartoons—cookies—nut cups—or hand-drawn greeting cards.

Since children are not allowed on the wards, they hold an election to decide where they would like Lucile to deliver their gifts. The Pediatrics clinic is a frequent winner.

Last month NNMC's Commanding Officer, R. Adm. Groesbeck, received letters from members of Bethesda's Brownie Troop No. 583 thanking him for their recent visit here. The letters are reprinted below just as they were written:

Feb 16 1953
Parkwood School

Dear Sir

I Liked the punch and cookies. We inJoyed going around the hospital. I inJoyed having my picture taken to. I Liked going into the kitchen, too.

I inJoyed see the meat place too. I hope all the children liked the cookies and nut cups we gave them. I Liked seeing the great big things that they cook the food in too.

I Liked Looking throwt the windows too. My grandfather was ther to once too.

Love
Susan
Jackson

Dear Sirs

I like the kitchen best of all.
Margaret

To Sirs

Thank you for the trip to the Navy Hospital. I like the place where you can look down and see everything you can. I like the co-

okies very much. thank you for ev ry thing.

Love
Martha
Petersen

Dear Sirs,

I liked the trip very much!
I liked the churchs best of all.
Love Ginnie Good

Dear Sirs

I thank you for Taking us Through the Hospital. I liked The way you cook the soup. I Want to Thank you for the cookies and punch I hope the children like the cupcakes And cookies. I liked When we want up on the eighteenth floor
From
Bonnie Huston

Dear Sirs

I liked the Kitnen.
and My mother took some girls.
from Ann T.

Dear Sirs thanK you for showing us around and for taked are I am sure we all liked it very much. When I came I was cold—But when I got near the oven I got warm.

Thank you again
Love
Linda
Russell

Dear Sirs

I like the Kitonen best. especially the big cans of soup and The operating room I wish they the light wer on so we could see in The operating room. and Thank you for Take us

Love,
Mary Jane Ivory

NDS Sends Exhibit To Minnesota Meet

Models from NDS were given on display.

At the 70th annual meeting of the Minnesota State Dental Association, Feb. 22-25, a Dental Corps exhibit was displayed including models developed by NDS for visual training aids.

There was the "Facsimile Arm" for teaching needle insertion, intravenous injection and blood withdrawal techniques; the "Facsimile Neck" for teaching the techniques in performing a tracheotomy; and a simplified method of teaching blood typing.

Also included in the exhibit, titled "The Role of the Dentist in Atomic Disaster," was a projector with strip film and slides illustrating the type of casualties to be expected in an atomic disaster, and a large photomontage showing Nagasaki and Hiroshima subsequent to atomic bombing.

Local M.D.s Complete Board Requirements

Two Naval Hospital doctors and one doctor attached to NNMC were notified recently that they had successfully met the requirements for American Boards.

The American Board of Orthopedic Surgery has certified Cdr. Clifford A. Stevenson, MC, USN, Assistant Chief of Orthopedic Service.

The American Board of Surgery has certified Lt. Nathaniel Adamson, MC, USNR, of the NH surgical staff.

Qualifying for the American Board of Pediatrics, was Lt. Robert T. Miller, MC, USNR, of NNMC's Staff Clinic.

NDS Staff and Interns Participate in Clinic

Both regular staff and interns of NDS will participate in the 21st Annual Post Graduate Clinic of the District of Columbia Dental Society this Monday and Wednesday.

Staff members participating will be Cdr. M. L. Parker, Cdr. David Dobson, Lt. Henry Scofield, Cdr. Gordon Miller, Ltjg. Lloyd Chaisson, Lt. John O'Malley and Cdr. Arne Nielsen.

Interns taking part in the clinic are Ltjgs. Edward Kemler, Jack Badner, Howard Thamasson Jr., Charles Sullivan, Seymour Brown, Wilbur Riff, Charles Restelle and Seymour Stein.

Special Weapons Course Begins Classes Today

A new Special Weapons and Radioactive Isotopes Course convenes here today. The course is two weeks in length and has a total enrollment of over a 100 with officers attending the course from Naval, Army and Canadian installations.

The first week of the course will be devoted to "Medical Aspects of Special Weapons and Radioactive Isotopes" while the second week will be a Medical Military Symposium.

Husband: "You called me your idol before we were married."
Wife: "Yeah, and you've been idle ever since."

Slighted Suitor: "If you don't marry me, I'll go and drown myself."

Pretty Maid: "Ah, go jump in the lake. It's just down the road."

Slighted Suitor: "Don't be silly. I can't swim."

Editor: "This is a well-written article, but I can't use it. Our paper only publishes articles by people with well-known names."

Writer: "That's fine. My name is Smith."

Carriers, Minesweepers, and Icebreakers In Three-Way Tie in Women's Bowling

With only four teams in the running, the women's bowling finds itself in a three-way tie for first honors. The Carriers, Minesweepers and Icebreakers are each boasting seven wins and five losses, while the Submarines have taken nine defeats to three victories. Ever, with six games to be rolled by each squad before the season ends Mar. 31, it's still anyone's race.

Gals Hand Quantico 39-29 League Loss As Season Nears End

Taking their sixth league win out of 10 attempts, the Admirallettes brought a 39-29 win home after their trek to the Quantico courts on Mar. 10.

Starters Shook, Carlson, Mihay, Cox, Crouch and Bradford jumped off to an easy 14-4 lead at the end of the first stanza. Realizing that the referee was slow on the whistle, both teams began to rough it up and the pace became faster and rougher as the game progressed.

Evans and Aiken each put in one quarter on the defense, while "Al" (Allen) Sharp took over for Shook in the second canto and finished the match.

The Marine gals had plenty of size and speed, but tossed many a potential point wild, only to have the ball snatched by the Bethesda guards.

Mihay led the Bethesda forwards with 24 tallies for the evening. "Boots" Carlson slipped in seven, while Allen and Shook contributed four apiece.

Trounce Arlington Hall

The Amiralettes had little trouble sacking the visiting Arlington Hall girls 36-13 on Mar. 3. The Army six was speedy, but very poor on the offensive, ringing only five field goals for the night.

Back for the first time since her ankle injury Feb. 5, Allen laced the baskets for 15 counters. Jackie Shook also rang up 15 for the evening, while Nancy Aiken accounted for four and Carlson two.

Aiken, who spent most of her playing time on the defense side, is a welcome addition to the roster with her hard, fast passing and all-around good ball handling.

Leslie Evans, plus the dependable trio of Bradford, Cox and Crouch handled the defense work.

Drop Practice Tilt

A practice session against the visiting MSTs gals on Feb. 26 netted a 53-41 loss for Bethesda. The Admirallettes led 12-9 at the end of the first quarter. MSTs squeezed a 20-18 half-time lead and opened up in the last two stanzas for a sound win.

Making her first appearance with the Admirallettes was Nancy Aiken, in as guard. Guards Bradford and Cox also played a few minutes as forwards.

Night's scoring was: Mihay-22, Shook-11, and Carlson-8.

Lose to Ft. Meade

Ft. Meade racked up its seventh league win on Feb. 24 as they handed the Admirallettes their fourth loss with a 37-29 match.

Bradford, Cox, Crouch and Evans were exerting themselves on the defensive side, but the Army gals were too tall to be adequately guarded.

On the other side of the court, Shook rang up 12 of her 14 for the night in the first half, while Carlson and Mihay accounted for nine and six.

Wednesday night, the gals face their last league opponents in the NNMC gym when the Andrews Field Wafs come to challenge them.

Last Tuesday, Miss Forster of the Carriers, copped high honors with a 462. Miss Crowell of the Minesweepers, rolled four strikes for a high 190 game, bringing her average up to 132.

The league will not meet on row night because of St. Patrick's Day, but will resume competition on Mar. 24.

Women's Interservice Athletic League (WIAL) bowling is scheduled to commence the first week

ANOTHER STRIKE is chalked up for Miss Alice Crowell of the Minesweepers.

April. The seven-gal team from NNMC has not been chosen yet. Members will be selected from both nurse and Wave teams according to high averages.

Monday is Swim Night For Women on Station

"Come on in, the water's fine," say the Monday night instructors for women's swimming, Miss Jarvi and Maggie McQuarrie. Ladies' night in the NNMC pool, originally Wednesday, but has been switched to Monday, Mar. 2000.

This is not primarily an instruction period, but rather a chance to improve techniques or simply splash around and enjoy swimming. However, anyone who desires individual instruction will receive it from either Miss Jarvi or McQuarrie.

Any women interested in Monday night sport might consult nurses Miss Olson, Clouse, Filtz, Schweiger, Burris, D'Ale, Ewing or Dembinsky.

Some of the Waves who have taken advantage of the swim are Evans, Cox, Bradford and Pfingsten.

Outdoor swimming is only a few months away, and this affords an excellent opportunity to learn brush up on strokes in order to keep the crowds in the swim instead of being a beachflower.

Softball Coach Needed

Women's Sports Coordinator Norma Schrader announces the women's softball team is searching for a coach and assistant coach.

Anyone (man or woman) who is interested in the job and who is free to travel with the team should contact Schrader in the E Office, Bldg. 102, Ext. 102.

March 20

RELAXING(?) DURING THEIR OFF HOURS in the weight room of Barracks 12 are Howie Stulgin (standing) and Jack Gabriel. These two NMS, both recent graduates of Physical Medicine School, are two of the near-dozen weightlifters on the station. Incidentally, in case you wish to try either of these exercises, Stulgin is pressing 135 pounds while Gabriel is doing deep knee bends with a mere 160 pounds. Anyone for tennis?

Speed and Height Added to Admirals Through Pete, Silas

Two colorful members of the NNMC Admirals cage squad, which will play in the PRNC-SRNC Basketball Tournament at the Naval Receiving Station, Wash., D. C. this week, are IIN Peter J. Veneziano of Physical Medicine and IIN Silas L. Barton, who is currently on night duty in the hospital.

A spirited competitor whose fiery floor play has often proved a tonic for a sometimes lackadaisical Center quintet, forward "Pete" Veneziano hails from Clarksburg, W. Va. where he performed in baseball, football and basketball for St. Mary's High of that city.

The 20-year-old Phys. Med. technician, who completed school here on Feb. 20, 1953 and is now a staff corpsman in Physio, was all-city and "Little Ten" Conference quarterback in his senior year of football.

He attended Salem, W. Va. College for a semester before entering service. Following boot camp at Great Lakes, Ill. and corps school at Portsmouth, Va., he went to US-NH, Quantico, Va. for duty. From there he came here for Phys. Med. School.

The 5' 8", 160 lb. lad of Italian

Peter J. Veneziano

ancestry hopes to return to college after his discharge in March 1955, obtain a degree in physical education and go into the coaching profession.

Another "personality kid" on the NNMC court club is "Sy" Barton, 20-year-old native of Wash., D. C., where he played baseball, football and basketball for Dunbar High.

The 6' 1", 168 lb. athlete attended Miner Teachers College for 2½ years before entering service on Feb. 27, 1952 and after leaving the

Silas R. Barton

Navy in 1956 plans to return to school and major in child psychology.

The prospective psychology teacher went through recruit training and corps school at Bainbridge, Md., coming here for duty on Jan. 15 of this year. After a tour of duty

(Continued on Page 6, col. 2)

Cage Varsity Closes MAISAC Season With Five Wins in Last Six Contests

The NNMC Admirals closed their 1952-53 MAISAC basketball season with a 61-50 triumph over the 1020th USAF five of Ft. Myer there Mar. 3, to give the Center cagers five wins in their last six league games and an overall mark of eight victories and 12 defeats in inter-service competition.

Main Quarters Five, Dental Enlisted Tie For Intra Honors

A pair of high-scoring ball clubs, NDS Enlisted and NH Barracks, were battling it out for first place as the station intramural basketball league reached the halfway mark of the 1953 season. Both are unbeaten to date.

NDS Enlisted had won five straight games at the time this story went to press and on Thurs., Mar. 12 sought to make Pharmacy School's scrappy crew its sixth victim in a row.

Carrabine, Eads, Shuff and Peterson all have been hitting in double figures for the fast-breaking Dental quintet.

Meanwhile, the well-balanced NH Barracks five has remained undefeated and is making a strong bid for top honors. Poe and Strader have been the big guns for the Hospital squad lately, with Bush starring on defense.

In recent contests NDS Enlisted romped past LAB 20, 51-31, while NH Bks whipped Pharmacy School, 64-36, disposed of a greatly improved NMRI outfit, 49-37, and then clipped the new Phys. Med. School class, 38-26, on Mar. 11.

Expected to determine the loop champion is the impending NDS Enlisted-NH Bks clash, tentatively slated for Mar. 30 or 31. However, NMRI and LAB 19 still have hopes of snaring the top rung before the campaign closes.

Following a 38-36 upset loss to hard fighting LAB 20, Research bounced back to trim Center Command (NNMC), 32-20 and then surprised favored LAB 19, 43-33.

LAB 19's hustling team trimmed the NDS Officers, 49-34, prior to its loss to NMRI and may still catch the leaders. Then, too, almost all the nine league clubs are battling for a berth in the post-season single elimination tournament which will include the top four squads.

Pharmacy School pulled a nip-and-tuck battle out of the fire in the last five seconds as it nipped LAB 20, 39-38, in an overtime Mar. 10. NNMC downed LAB 20, 30-14, previous to its defeat by NMRI.

EENT was forced to drop from the loop because of a player shortage and has forfeited all of its games.

Phys. Med. School's new class launched its campaign with a 38-26 loss to unstoppable NH Bks after trailing by only two points at half-time. It will replay the former Phys. Med. class' wins over NMRI and LAB 20.

Current standings are as follows: NDS Enl. 5-0; NH Bks 4-0; NMRI 4-2; LAB 19 4-2; NNMC 3-3; Phar. Sch. 2-2; Phys. Med. Sch. 1-1; LAB 20 2-4; NDS Off. 1-3 and EENT 0-9. Each team was given a forfeit win over EENT.

League schedule for the next two weeks: Mar. 16—LAB 20 vs. NDS Off.; Mar. 17—NDS Enl. vs. Phys. Med. Sch.; Mar. 18—NMRI vs. Phys. Med. Sch.; Mar. 19—LAB 19 vs. Phar. Sch.; Mar. 23—LAB 20 vs. NH Bks.; Mar. 24—P.M. Sch. vs. NNMC; Mar. 25—NDS Off. vs. P. M. Sch.; Mar. 26—NDS Enl. vs. NMRI. Games for Fridays, Mar. 20 and 27 may be scheduled later this week.

Suzie: "Well, I finally got that raise in salary."

New Stenog: "Honestly?"

Suzie: "Oh, don't be inquisitive."

Prior to the Vint Hill Farms contest of Feb. 5, Coach Paul Sherin's club had a dismal 3 won and 11 lost record, but after that NNMC gained decisions over Vint Hill, Arlington Hall, Ft. McNair, G-2 (MDW) and Ft. Myer, while losing only a 68-62 contest to Patuxent River NATC.

Bethesda stepped away to a 13-6 first period lead in the Ft. Myer tilt and never trailed. Behind 32-18 at halftime, the host team rallied to close the gap to 41-33 at the three-quarter pole but couldn't get nearer than six points during the last frame.

Although off in their field goal shooting, the Admirals rebounded well and effectively checked the losers with a tight zone defense. Ron DeVice headed the Medical-men with 21 markers, while Ernie Reed, Cecil Mitchell and Silas Barton collected nine each. Frank Connelly had 20 points and George Exner 14 for Ft. Myer.

In a pulse-pounding finish that left the fans limp from excitement, NNMC beat off a ferocious second-half threat by G-2 (MDW) to post a 65-61 win here Feb. 24.

NNMC led by periods 18-15, 33-23 and 47-46, but nine baskets in the last half by forward Junior Rasmussen of the visitors kept G-2 in contention until the final gun. Two swishers by Reed and a pair by Barton helped beat off the late MDW threat, as did six successful free throws in the fading moments of play.

DeVice meshed 25 counters for the Admirals and Rasmussen garnered 24 for the visitors. Reed and Mitchell of NNMC notched 11 apiece.

Feb. 19 at Ft. Myer, the Center courtmen overcame a 31-26 half-time deficit to cart off a 66-60 victory over well-regarded Ft. McNair. NNMC led 13-10 at the quarter and 47-42 at the third period's end.

Speedster DeVice tallied 21 points in the second half to total 32 for the evening. Paul Morosky dumped in 21 for the McNair Sentinels. Excellent rebound work by Mitchell and Reed helped turn the tide.

Amassing an insurmountable 49-28 lead in the opening half, the powerful Fairchild Packets of Hagerstown, Md. rolled to a 82-61 triumph over NNMC there Feb. 26, in a high-scoring non-conference tussle.

Fairchild connected on better than 80 percent of its shots in the first 20 minutes and the Admirals never came close after that. DeVice rammed home 31 points for the losers and Mitchell netted nine.

Cagers Go for Title In PRNC-SRNC Tilt

The NNMC men's varsity basketball team is entered in this week's Potomac River Naval Command-Severn River Naval Command cage tourney, which gets under way on the Naval Receiving Station, Wash., D. C. court Wed., Mar. 18.

At publication time six teams, all from PRNC, had submitted entries for the tournament. They included NATC, Patuxent River, Md.; NAS, Anacostia, D. C.; favored Rec. Sta., Wash., D. C.; Naval Security Station on Nebraska Ave., N. W.; Naval Photographic Center and the NNMC Admirals.

Winner of the PRNC-SRNC tourney goes to Newport, R. I. the week of Mar. 23 for the Eastern Finals of this year's all-Navy cage competition.

See Mats, CPO Club Have Up-Down 3 Weeks As NMS Lab, NDS Officers Hold Standings

Last Wednesday night, the Naval Hospital Doctors, operating as a high speed unit, again took another rung of the standings ladder by dropping CPO Club three to one. Top honors go to winning team's Montgomery with a 520 with a 221 game.

The seventh week saw another rough match for the Club lads when they met NSHA Staff. One pin won the first game for the CPO Club and they bounced back in the third game to take total pins and game after losing the second in the Building 141 instructors.

During the same week, Team Captain Maroney anchor-manned the Operating Room to a four-point sweep over the potent See Mats. His 542 series and 231 middle game was high for the match. The next week (eighth week of bowling) saw Suttelle, hitting his stride to the tune of 537, lead the NMS Lab boys to another victory this time over Lab 19.

The same night (Feb. 25) Ferguson led his NDS Officer aggregation to a three-point over the Dental Interns with a middle game of 244.

The interns came through in the finale to win by 42 sticks without handicap.

The following night NMS Officers using seven men, took three from Pharmacy. High game was Chaplain Sodd's 175.

The ninth week of play saw NMRI Gold over the Blues three to one, Dental Interns taking three from the NMS Officers and the See Mats again on their climb picking four points from the Dental Officers.

Koenig, with a 519, was an important factor in the three-point win of Operating Room over Lab 19 Mar. 4. On the same night Pharmacy School, though losing the middle game by one point, took an easy three from the NSHA Class F. High man was Miller with 550 with a 203 game.

Dental Explorer

by C. Connor

Sugar and spice and everything nice is what the Johnsons got when they learned they had a bouncing baby girl. . . . On Feb. 23, 1953 Linda Susan made her debut, complete with blonde hair, blue eyes and a dimple in her chin. . . . This paragraph may well be titled, "I'm Walking the Floor Over You."

Congratulations to Ferguson and to Pennington, who both chose the month of February to say "I DO." Yep, they both lost their track shoes and let the gals catch up with them. Sure and they've got rings on their fingers and rings on their noses. And I hear that Thibideau and Jarboe are also joining the ranks in April. . . . The old bug is sure working overtime.

Mackin, Ferretti, Terry and Shirley really had a problem on their return trip from N. Y. last week-end. . . . They ran out of cigarettes and were unable to obtain any . . . and so . . . they were reduced to, shall we say, rolling their own from some one else's old ones. . . . They should try riding the Boston train. It is certainly much more eventful than the one they chose.

Welcome aboard to Nancy Aiken, who is attending Ocular Prosthesis school here and came to us from San Diego. We wish you good luck in school, Nancy.

Mr. Marsh informs me that he rolled 227 for a 579 series recently and that Mr. Ferguson rolled 244 on Feb. 26 . . . by the way Staff won two and total pins in that game from the interns.

If you would like to, shall we say, look a little different (in regard to your hair, that is) just stop by the desk, and see what I mean.

Navy Belles

by George

Just around our house the theme song seems to be "Here Comes the Bride," and "Those Wedding Bells are Breaking up That Old Gang of Mine." Bernadine Frank started by going to New London, Conn. and coming back Mrs. King. Lorraine Cameron followed by becoming Mrs. Magill in the small chapel, and a few hours later my co-worker, Ethel Hammett, pulled a surprise on us all and became Mrs. Orrick. Ethel hopes to go to California soon. Esther "Al" Allen said "I will" to Mr. Thomas Sharp in the Bethesda Methodist Church on Mar. 5.

The social committee is planning fudge parties and a hot dog fry in the new galley soon, we hope.

With new classes starting for X-ray and Phys. Med., we see many new faces in the barracks. Some of the newest are Therese MacDuff, Margaret Mayer, Pattie Childs, Pauline Krampitz and Dorothy Jackson.

Back again is our old friend Joyce Crouch for Phys. Med. classes. The basketball team was glad to see "Jumping Joyce" back too, and to welcome Nancy Aiken, who reported in to NDS. Getting so lately that we say, "Welcome aboard; do you play basketball?"

Barbara Bradford, on night duty on 128, greeted her patients with a present the other morning—a snowball.

I remain the girl from the heart of Maryland, where I am an authority on the processing and preservation of old sticks.

Med School Daze

by Cracky

Is our face red! We've been told many times since the last column hit the stands that it's always proper for a sailor to end a sentence with a proposition.

HMC Suttelle, the CMAA, is looking around for a new laundry these days. It seems that his old one overlooked the fact that those bright red pajamas would run.

Lab 20 has finally started Chemistry, by cracky, and in the first week only 23 made the study hall list. Hope the next section has better luck.

You should have seen Meeker down at the Galley the other night. He was trying to prove to one of our scientists that the hand is quicker than the eye. Quite a sight!

Anderson, the latest housemother over at 140, is walking around with a fractured finger. He tells us that he broke both joints playing basketball. I repeat he tells us . . . Whatever it was, we hope it mends rapidly, Andy.

Welcome aboard to the new Phys. Med. and X-Ray Classes. We hope you all get thru with flying colors!

Good luck to the Staff Lab bowling team. They seem to be bowling over all opposition.

Oh, my gosh, I forgot to send in my tax return. See you in jail, by cracky!

by R. Conaway

NMRI

Heading the list of transferees this month is Lt. I. V. King, MSC, USN, Administrative Officer at NMRI since 1949. Mr. King, who is being detached for duty at Guantanamo, was guest of honor at a surprise farewell party held at the American Legion Club. Said Mr. King, "I've helped plan many a surprise party, but this is the first one ever held for me."

Also on the outgoing list are the following: HMC J. Terry to Norfolk, Va., HMC A. Ruberg, to Portsmouth, Va., HM1 D. G. Hartlieb to Com-CruDesPac., and HM1 B. E. Carson, to Portsmouth, Va.

Two re-enlistees for four and six respectively, R. Conaway, HM1 and R. McCabe, DT1. What some people won't do for a new car, eh Bob?

A welcome aboard is extended to Lt. Cdr. F. W. Brown, Lt. C. S. Hodge, Ltjg. R. L. Tuttle, HMC W. I. Capps, DT2 R. D. Russell, HM2 R. M. Gismond, HM3 W. E. Dunham and HN E. E. Wolfe.

Was that a smoke screen around the MAA Desk the other day or was it gnats?

Ladders are handy little things sometimes. Nelson, I wonder if you have been locked out of your house lately.

Has anyone seen that other shoe? She had two when she came in. I'd like to ask three young ladies how the fire situation is these days. Right fire—wrong car. You can't be too careful, can you?

PAGE SIX

Meet an NMRI Lad Who Spends the Day In Monkey Business

Richard E. Costigan, a seaman over at NMRI, has the coveted or non-coveted job (depending upon your outlook on members of the Rhesus family) of caring for the monkeys used at the Institute.

This Researchite has 14 of these imports from India to feed, watch over and generally mother.

Previous experience needed for this line of work? Costigan came to NMRI from the Receiving Station where he was under the Master at Arms force on barracks detail.

Before coming into the Navy, Dick was a high school student in Colorado Springs, Colo. During the summer, this 5' 9" seaman drove a lumber truck and had the novel job of transporting tourists up and down Pike's Peak by car.

In August of '50 he joined the reserves and soon after was called to active duty.

Discharge date is the latter part of this year. His plans are twofold: marriage and a job. The job will be either a partnership in a lumber yard or construction work with his Dad.

The wedding is with a Pennsylvanian now working for the FBI.

Richard Costigan and Friend

"Commence firing."

Beauties Vie for Flash Honors

THESE 10 BEAUTIES WERE PICKED BY the Chicago Press Photographers to compete in the finals of the "Miss Photo Flash" contest. Top row (left to right) are: Carmelita Gibbs, Betty Becker, and Len Tye. Second row: Nancy Miller, Carol Segermark, Reggie Dombeck, and Cargill. Bottom row: Lee Gaye, Myrna Hansen and Arlene Williams.

What to See Around D. C.

- MONDAY, Mar. 16—Accordion Instruction, beginners, intermediate, advanced, Roosevelt Center, 1900 to 2100, each Monday.
- Theatre Workshop, Roosevelt Center, 2000, each Monday.
- TUESDAY, Mar. 17—Golf Instruction, Roosevelt Center, 1830 to 2000, each Tuesday.
- WEDNESDAY, Mar. 18—Social Dancing Instruction, men and women, Thomson Center, 12th and L Sts., N.W., 2030, each Wednesday.
- Square Dancing, Pierce Hall, 15th and Harvard Sts., N.W., 2030, each Wednesday.
- THURSDAY, Mar. 19—Reading-Discussion Group, YMCA, 17th & S Sts., N.W., 1930, each Thursday.
- FRIDAY, Mar. 20—Concert, U.S. Navy Band, Departmental Auditorium, 2000, each Friday.
- Ice Hockey, Professional, Uline Arena, 2030.
- SATURDAY, Mar. 21—Concert, Oscar Levant with the National Symphony Orchestra, Constitution Hall, 2030.
- Dinner and Social Hour, Servicemen, Letts Home, 1830, each Saturday.
- SUNDAY, Mar. 22—Free Lectures and Concerts, National Gallery, Art, each Sunday; lectures at 1600 and concerts at 2000.
- MONDAY, Mar. 23—Lauritz Melchior, Constitution Hall, 2000.
- WEDNESDAY, Mar. 25—Ceramics; elementary, Garnett-Patterson, 1900 to 2200, each Wednesday.
- FRIDAY, Mar. 27—Annual Georgetown Tour, eight houses a day, 1800; also Mar. 28.
- SUNDAY, Mar. 29—"Adventures in Oz," Washington Ballet, National Symphony Orchestra, Constitution Hall, 1600.

—from the D. C. Recreation Department publication "Do You Know?"

Dig This Crazy Press Service

The Armed Forces Press Service must be interested in arguments.

In the Mar. 1 edition, the clip sheet made up a list of its selections for the "greatest" as far as American Jazz goes—Clarinet: Goodman; Drums: Krupa, Webb or Cole; Trumpet: Armstrong, James or Gillespie; Sax: Ventura, Lotus or Barnett; Piano: Tatum, Hines, Wilson, or Waller.

If you wish to make any additions (or subtractions) don't let us know but write to AFPS, 641 Washington St., New York City.

Also in the issue is this gag: Story about a bebop artist who was hired to play in a radio record session. When he arrived, he saw the 65-piece orchestra on a revolving stage used to produce better effects.

He gasped in amazement, around and said, "Man, dig that crazy L. P. record."

Cabin Cruiser 'Catherine' is Available for Officer, Enlisted Use After May 1

The Commandant of PRNC will operate the cabin cruiser "Catherine" as a recreation vessel for naval personnel, their families and guests, starting Friday, May 1 and continuing through Oct. 11.

The "Catherine" is normally moored between piers 2 and 3, U.S. Naval Gun Factory. Trips will be restricted to the Anacostia River west of the 11th St. Bridge and to the Potomac River area having its upper limit at Memorial Bridge and its lower limit at Quantico, Va.

Application blanks and further information may be obtained from the NNMC Special Services Officer.

The maximum number of persons allowed in each party is 12. Children over five will be counted as adult members of the party.

Use of the cruiser is restricted to officers on Mondays, Wednesdays and Fridays, and to enlisted personnel on Tuesdays, Thursdays and Saturdays. Officer and enlisted personnel may use the cruiser on alternate Sundays, commencing with enlisted personnel on Sunday, May

Commencing June 2, the first Friday in each month will be reserved for routine maintenance. Scheduling for officer dates for the entire summer will be done on or by 14 by a drawing. Requests for sailing should include name, rank and office phone number.

Requests should be received by the Special Services Officer, PRNC, prior to 1630, Apr. 13. All requests will be numbered according to receipt and the numbers dropped into a box.

The first number drawn will be assigned the first officer date, and so on until all dates are filled, except that no officer or man will be assigned more than one date.

Scheduling for enlisted personnel will commence at 0900, Apr. 14. Reservations for the "Catherine" could be made by telephone (LIncoln 7-5700 (Code 142), Ext. 1) prior to submitting written request.

Application forms should be submitted in quadruplicate to the District Special Services Officer at least two weeks in advance of date of use is to be made.

If applications are not received one week before required date, the trip is automatically cancelled. A check or money order in the amount of \$10.00, payable to "Custodian, Command Recreation Fund, PRNC," must accompany all applications. The full amount will be refunded if the trip is cancelled.

Change in Party Funds

Recreation funds will no longer be available for parties other than monthly staff parties and planned picnics. This was announced by Lt. J. O. Atkinson, Special Services Officer.

Mr. Atkinson explained that due to the increasing expense involved in maintaining the established recreation program, the funds are no longer sufficient to support the parties.

DeVice to Newport For Eastern Area Basketball Tourney

After compiling a scoring average of 24 points per game in MAISAC competition during the past cage season, HM3 Ronald E. DeVice (Center Command) of the NNMC Admirals was selected to play in last week's Navy Eastern Area Basketball Tournament at Newport, R. I.

The sharp-shooting Medical Center forward performed in the play-offs as a member of the PRNC-SRNC champion Patuxent River, Md. NATC squad.

Making up the Pax River club for the Eastern Finals were seven regular NATC courtsters and five men added from other quintets playing in the recent PRNC-SRNC meet.

Being named to the tourney squad was a fitting honor for the 21-year old DeVice, who was the

Ron DeVice, HM3

Admirals' leading pointmaker throughout the campaign.

A native of Bellevue, Ky., the 5' 10" forecourt star played three years of college ball and also had considerable semipro experience prior to entering the Navy.

His favorite foe this season was Fort McNair—he totaled 75 markers in two frays with the Sentinels. The Kentuckian averaged 21 points a tilt during the 1951-52 campaign, during which he was an NNMC teammate of the well remembered Tom Brothers and George Funk.

Other outstanding courtmen on the augmented Pax River squad included NATC standouts Hank Mazul, Stan Nasonti and Don Johnson, along with Rube Huff and Jim Hand of Naval Rec. Station's MAISAC champion team.

Blossom Time Brings Five-Day Festival To Washington Area

The Nation's Capital will offer visitors a five-day round of spectacular pageantry to celebrate the blooming of the world-famous cherry blossom trees this year.

Scheduled for Apr. 8 through 12, when the blossoms are most likely to be at the height of their glory, the Festival will get underway with a glamorous fashion show in the Statler Hotel on Wednesday, Apr. 8.

An illuminated nighttime parade on Thursday evening, Apr. 9, will feature floats, bands and marching units representing all the states in the Union. Floodlights and searchlights will play upon the parade route.

Starting at 2100, the parade will last approximately one hour. The route will be on K St., from 9th St. west to 20th St.

One of the 53 young princesses will be thrust into a national spotlight during the Festival Ball on Friday night, Apr. 10, at the Shoreham Hotel, when a giant wheel of fortune will select the 1953 National Cherry Blossom Festival Queen.

Weekend activities will bring the Festival to a climax with the traditional open-air Pageant at the Jefferson Memorial on the edge of the Tidal Basin—the cherry blossom setting. Performances are scheduled for 1330 Saturday, Apr. 11 and 1400 Sunday, Apr. 12.

Nationally famous entertainers will appear during the pageant, which is climaxed by the crowning of the Cherry Blossom Queen.

A water show on the Tidal Basin will precede the Saturday and Sunday performances of the pageant, beginning at 1030 each morning. It will include a spectacular water-skiing exhibition and other aquatic stunts.

Washington's Greater National Capital Committee, sponsor of the Festival, anticipates an influx of at least a half million visitors during the cherry blossom season this year.

The Greater National Capital Committee will arrange hotel accommodations and provide sight-seeing information on request.

Former NMRI Officer Wins Scientific Award

Former NMRI Executive Officer, Capt. Albert R. Behnke, MC, USN, now Staff Medical Officer, Submarine Force, Atlantic Fleet, was recently presented the A. Cressy Morrison Prize of 1952.

This prize is one of two competitive awards made each year by the New York Academy of Science and is awarded for the best scientific paper presented in the field of biology.

Capt. Behnke's "Lean Body Weight in Relation to (Standard) Metabolism," was concerned with the Navy Medical Research on body composition carried out over the past 14 years.

CPO Mess Features Claude Thornhill At First Annual Spring Dance Apr. 16

Claude Thornhill

Lorraine Cousins

Claude Thornhill, his piano and orchestra and vocalist Lorraine Cousins, will be on hand for the First Annual Spring Dance, sponsored by the Chief Petty Officers' Mess (Open) on Apr. 16.

The three-hour dance, which will be held in the gymnasium, will commence at 2100. Dress will be informal. All chief petty officers and master sergeants in the Washington area and their guests are eligible to attend. Tickets sell for \$2.00 per couple.

Lt. Bonnell Explains Recent Chow Change

"Why were the chow hours changed? Why were the noon and evening meals switched?" These are two of the most frequently asked questions of the last month.

To lessen the time lapse between the evening meal and breakfast for bed patients is the primary reason for the change of time, according to Lt. T. V. Bonnell, Head, Food Service Division.

Formerly, bed patients received evening chow at 1630. Now they receive their trays between 1730 and 1800.

The switch of the main meal to evening serves two purposes. First, with the approach of warm weather, it is felt that many people prefer to have the light meal at noon.

Secondly, the switch will result in a considerable monetary saving, since the evening meal serves approximately one thousand less than the noon meal.

Whites, Grays & Khakis Become Optional Apr. 13

New instructions governing uniforms in the PRNC area went into effect Mar. 23 with the dress blue, B, uniform adopted until 13th of April.

The 13th of April to May 10, uniforms will be optional. Male officers will be permitted to wear khaki or dress blue, B, and female officers gray working or dress blue, B. Khaki or dress blue, B, will be allowed for chiefs; dress blue, B, or whites for enlisted males and gray or dress blue, B, for enlisted women.

May 11 to Sept. 20 will be khaki for officers and chiefs, gray working or dress blue, B, for women and undress whites for enlisted men.

Interested?

The NNMC NEWS will have an opening in the near future for a full-time staff member. Requirements are:

1. Must have had some kind of journalistic training.
2. Must be able to type at least 30 words per minute.
3. Must be vitally interested in newspaper work.
4. Must have at least one more year of shore duty.

Personnel of any command, who are interested in the job, should contact Lt. J. O. Atkinson, Special Services, Ext. 672, immediately.

Sailor is Safer at Sea Than at Home According to Statistics of R. Adm. Pugh

The mounting toll of highway accidents involving service personnel makes it more to the point for wives and parents to pray for their men when they come home than when they go to sea, the Navy's Surgeon General has declared bluntly.

R. Adm. Lamont Pugh, MC, declared that there were 68 Navy and Marine Corps personnel killed in the United States as a result of automobile accidents during the 35-day period Dec. 1 through Jan. 4.

A check on the Defense Department's Korea casualty summaries revealed that two sailors and 35 Marines were reported killed in action during those past five weeks.

The National Safety Council reported that 38,000 persons were killed in traffic accidents on the nation's highways last year, an increase of approximately two percent over the 37,700 killed in 1951.

That war perhaps is safer than driving on our highways is emphasized by the fact that only 4,328 Americans were killed in Korea while 38,000 persons were killed on the highways during 1952. The Navy reported that 105 sailors and 785 marines had been killed in Korea last year.

Maj. C. E. McCandles, the 1st Army's safety director, announced that one accident out of every four on the New Jersey Turnpike involves military personnel, although only three percent of the traffic load on the superhighway is made up of servicemen.

The Navy, Admiral Pugh said, is, and for some time has been, aware of the loss of manpower through injury and deaths resulting from motor vehicle accidents. He pointed out that in 1923 five deaths due to motor vehicle accidents were reported, but by 1930 deaths resulting from automobiles replaced drownings as a leading cause of accidental deaths in the Navy.

"This loss of manpower is of vital concern to the Navy," Adm. Pugh declared, "because generally the victims fall within the younger age groups, a group which constitutes approximately three-fourths of the Navy and Marine Corps population."

Eighty-eight percent of these fatal accidents occurred while Navy and Marine personnel were on leave or liberty, according to the Navy Surgeon.—(Navy Times)

Medicine & Science

Parachute Sets You Down - - Sets You Up; Simulators Reproduce Space Conditions

It has been found that a parachute, rather than being an extra burden when trudging through country after bailing out, goes far in acting as a good friend.

Every part of the 'chute can be used. The nylon canopies can be utilized in building snow huts or caves for a camp. It was found also that the nylon made good camouflage in snow areas.

Moccasins, caps and packaging for equipment can be made of different parts of the canopy, while the lines are good for slingshots, rabbit snares and fishing lines.

Care to train for space? In a recent Collier's, a large section of the issue was devoted to the massive, dramatic simulators which will reproduce conditions likely to be encountered in space.

One trainer will whirl crews around at speeds equivalent to the breath-taking pressures which are to be expected from a fast rising rocket ship.

Another will train how to move around in the weightlessness of space.

"Navigators dare not be wrong in space; a fractional error may put a speeding vehicle thousands of miles off course," the scientists writing the article stated. "So navigators will have the most complicated—and most striking—trainer of all: a huge globe which will simulate the vastness and the stark beauty of space."

A high-flying, near sonic-speed target drone, the Ryan Q-2 "Firebee," has been unveiled by the Air Force. It is a joint project of the Army, Navy and Air Force.

Principal mission of the remotely controlled aircraft will be target work for defense weapons. It is designed to offer a high-speed target capable of simulating jet plane maneuvers in training for anti-aircraft crews, but it is equally adaptable for ground-to-air tracking and firing and air-to-air interception problems.—(AFPS)

New NNMCM Chaplain Is Former Corporal

Newest chaplain aboard is Ltjg. Tedford L. Shenefelt, who reported in from Newport, R. I. on Mar. 17 to join the Protestant staff here. Commissioned in January of this year, Chaplain Shenefelt is not new to the military service.

During the war years, he interrupted his journalism major at Gettysburg College, Gettysburg, Pa., to serve with the Marine Corps. "Corporal" Shenefelt saw action in both the Peleliu and Okinawa campaigns with the First Marine Division, and wears the Presidential Unit Citation ribbon with two stars for his service.

Also among his ribbons is one for his duty as part of the North China occupational force in the latter part of 1945.

It was during his three-and-one-half years with the Marines that Chaplain Shenefelt realized that his post-war career was to be the ministry.

Returning to college, he obtained his B.A. and spent three more years earning his B.D., which he received in 1951 from the Evangelical School of Theology in Reading, Pa.

Before becoming a Navy Chaplain, he had two charges at Northampton and Windsor, Pa. as an Evangelical United Brethren minister.

In his spare time, the chaplain enjoys table tennis, swimming and bowling. Another hobby is chess, which he confesses he taught his wife, Alberta, only to have her consistently defeat him.

Chaplain and Mrs. Shenefelt have one daughter, Pamela, age two.

Make Arrangements Now For Jewish Passover

The Jewish Passover season will begin at sunset on Monday, Mar. 30 and end at sunset, Apr. 7.

For those who will be unable to go home, an invitation is extended in behalf of the Washington, D. C. Community for attendance at a public Seder or for home hospitality.

To arrange for home hospitality or a public Seder, the Jewish Welfare Board, 1637 Mass. Ave., N. W., would appreciate a list of names of Jewish personnel so they might communicate with them personally. Please contact the Senior Chaplain's Office today.

Congregation Beth El of Montgomery County will hold services every Friday night at 8:30 P.M. and Saturday morning at 10:00 A.M. in the Pook's Hill Auditorium, 3 Pook's Hill Rd. The services will be conducted by Rabbi Martin Kessler.

The services of Rabbi Harry Kaufman, representing the Jewish Welfare Board, are available to all Jewish Personnel and Patients at the National Naval Medical Center. Rabbi Kaufman may be reached by calling the Chaplain's Office, Ext. 324, or by call direct—Office: RA. 3-5371—Home: RA. 3-0755.

Dr. John C. Millian to Deliver Sermon At Easter Dawn Services Next Sunday

The grounds of the Medical Center will be the setting for a special Easter Morning Service at 0630 Sunday, Apr. 5. The service is sponsored by the Bethesda Council of Churches and the NNMCM Protestant Chaplain.

Music will be provided by the Navy School of Music and the Bethesda-Chevy Chase High School A Capella Chorus.

The Easter message will be delivered by Dr. John C. Millian, District Superintendent, Washington West District, Methodist Church.

This will mark the sixth year in which this community service is held on the NNMCM grounds. Last year 1,500 persons attended.

The Sunrise Service will be held on the grounds immediately south of the main entrance. In case of unfavorable weather, the service will be moved to the gymnasium in the Recreation Building.

All service personnel and civilians of the area are invited to attend.

Other special Easter services here will include:

Protestant

Holy Week will be observed with daily services at 1200 in the Protestant Chapel. These will be broadcast over channel "C."

On Maundy Thursday, Communion will be administered to bed patients upon request.

Good Friday observance will start at 1000 in the Protestant Chapel with Episcopal Liturgy and Litany. Protestant Good Friday Devotions will be held in the chapel from 1200 to 1300.

In addition to the Sunrise Service

on Easter Morn, services will be held in the auditorium at 1000. The preacher will be Chaplain H. C. Gatlin, former Senior Chaplain, NNMCM. Lutheran Communion services will take place at 1000.

Catholic

The regular Mass schedule will follow Monday through Wednesday of Holy Week. A Benediction and Rosary will be held in the Protestant Chapel Wednesday evening at 1000.

Masses will be celebrated at 0715 Maundy Thursday and Holy Hour from 1800 to 1900. Blessed Sacrament Vigil will be held from 1400 Holy Thursday to 1000 Good Friday. Volunteers are welcome to stand part of the service.

The Mass of the Pre-Sanctification will be celebrated at 1200 on Good Friday with Three Hour Devotions following, culminating with Stations of the Cross at 1500. Services will be repeated at 1800.

(Good Friday and the forenoon Holy Saturday are days of fast and abstinence for all.)

Regular 0715 Mass will be celebrated on Holy Saturday.

Easter Sunday, there will be Masses, one at 0600 in the chapel and the other at 0830 in the auditorium.

The Chaplain's Corner

Suddenly It's Easter

by Chaplain Ambrose T. McGinnity

Almost from the dawn of history men have lived under a cloud of fear. Fear, threatening shadow of an advancing enemy, has been a constant companion. Men and women have feared the approach of disaster, feared the loss of great and prized possessions, feared, in times of peace, the terrible approach of war's disasters. They have feared the known and dreaded the unknown, and feared the thought of failure in their attempts at success.

Yet it would seem that fears are really one fear—the fear of death. That great, overwhelming, brooding fear spawns all other fears, for every other fear, whether of sickness or poverty, is a foreshadowing of that ultimate and final fear, the fear of death.

Death remains in history and, to the human race the plainest fact of the most terrible. Today, like every age in history, we have our special fear. Yet there is a means today by which we may end this greatest fear for there was One Who came especially to gain freedom for all men—grant life—eternal life. Jesus Christ came for that purpose, to deliver us from our greatest fear, and through Him the fear of death is removed.

When Christ was asked who He was, He answered in words that were the greatest possible reassurance to His followers: "I am the way, the truth, and the life." "I am come that they may have life and may have it more abundantly." To confirm His words with deeds, He performed miracles that were like well-directed blows at our major fears. His hands came the never-ending gift to life. Both His promises and His words were deeply, powerfully reassuring. He touched dead limbs and they leaped with fresh, eager life.

Then came the terrible disappointment of Good Friday. Christ, who had self felt before the always resistless enemy, death. More hung on the balance of the cross than just the life and death of a single man, Jesus of Nazareth, called King of the Jews. Suspended between heaven and earth was the hope of all mankind. Others He restored to life, now He himself died. "I am the resurrection and the life," He cried, in a glad assurance that has made the funerals of His faithful followers totally different from those of others who come to the gates of death.

What the followers of Christ now saw amazed them. They who had heard His life-giving words now saw death take Him. This, they now thought, was the end. A tomb folded its cold arms around the lifeless sacred form. Men crawled into the bleak and terrifying shadow of fear.

Then suddenly it was Easter. No need to report to those who had read and heard a thousand times the glorious facts. As dawn rolled over the dark night that covered the waiting tomb, so life opened the ulcer of death. And the Savior, who had promised Life and given it, Life, Himself came forth alive. All the things that men had hoped were proven true. This was the most glorious morning of all in history—now life had triumphed over death.

As we come to understand the heights and breadths of Easter's meaning, we come to the end of rational fears. Men at last received the answer they have asked—the guarantee of life after death. Because of Easter we are certain that we shall live as long as God is God and Christ is Christ, triumphant king.

Andrews AFB Plans Rod and Gun Club For Washington Government Personnel

Tentative plans have been made to form a Rod and Gun Club at Andrews Air Force Base for military personnel and civilian employees in the Washington area. Membership qualifications are not strict. "Any U.S. citizen 18 years of age or over, stationed with or employed by the military forces within the Washington area, or who is a dependent of any such citizen" may make application for membership. Included in the club program will be education in the safe and efficient handling of small arms, competitive rifle and pistol shooting, organization of hunting and fishing trips, wild-life conservation studies and other activities. Upon receipt of the necessary membership, it is intended to establish certain club facilities, including a club house, social activities, make necessary contracts for reasonable gunsmith service, and provide facilities for supporting equipment at reduced rates where possible.

Head of Royal Canadian Dental School Studies Educational Methods at NDS

Colonel W. E. Meldrum, Commandant of the Royal Canadian Dental School in Ottawa, Canada, has been making a study of the educational methods used at the Naval Dental School here at NNMC. Colonel Meldrum is interested in the training of both dental technicians and dental officers, and he has been studying the procedures and the aids used in various

W. E. Meldrum, RCDC

in his evaluations of "pro-implementation." During his stay here, from Mar. 27, he was an interested visitor to many courses, and discussed them with department and heads. The colonel took up his dental in the military service when he was commissioned in 1939. His training in dentistry was received at the University of Toronto, where he chose to practice in Ottawa some time before he entered military service. During World War II he served as deputy of the Dental Corps for the Navy, and following the war, he served at Dental Corps Headquarters until 1949. He served for three years as Command Dental Officer of the Atlantic Coast Command before he was appointed Commandant of the Dental Corps School.

March 30, 1953

New Course Offered In Military Justice

A new course in Military Justice in the Navy (NavPers 10993) is now available from the Naval Correspondence Course Center.

This course is based on two texts: *The Manual for Courts-Martial, 1951*, which establishes regulations for the administration of the code, and the *Naval Supplement to the Manual for Courts-Martial, 1951*, which contains regulations of significance to all persons attached to the naval service.

The course is written in two parts, each consisting of six assignments.

Applications should be forwarded on NavPers Form 992 and sent to the U.S. Naval Correspondence Course Center, Brooklyn 1, N. Y. through official channels.

Med. Research Program Needs MC, DC Officers

The Surgeon General of the Navy, R. Adm. Lamont Pugh, MC, USN, in a recent directive to all ships and stations having medical and dental officers aboard, has invited attention of qualified medical and dental officers to availability of assignments in the Navy's Medical Department Research Program.

Admiral Pugh, in the directive, expressed a desire that medical and dental officers with special aptitude, training, experience or inclination for medical or dental research apply by letter of request to the Bureau of Medicine and Surgery for assignment in research. The request should state the applicant's special qualifications and field of interest.

Navy Exchange Store Sporting New Stock For Spring, Summer

Had your fortune told recently? Somebody said you're going on a trip?

About the best place to go would be Navy Exchange to look over the new spring and summer stock recently added to the main store.

Need clothes? Lt. Metcalf, Exchange officer, has added a complete variety of slacks, sport shirts, sweaters, and sundry items for both men and women.

Sports minded? Fishing tackle, golf equipment and swimming suits are a few of the possible purchases that might add enjoyment to the coming months.

Maybe the car or the home needs a little work. A complete set of tools, lawn hose, and gardening implements have been added to existing stocks.

Incidentally, khaki uniforms for both chiefs and officers are now available in the tailor shop. Khaki shirts will again be 'for sale' in the main store.

Early Pay This Month

Payday will be next Wednesday for officers and Thursday for enlisted personnel. Due to the banks being closed on Good Friday, Apr. 3, enlisted pay has been forwarded to Thursday, Apr. 2.

Per diems will be paid on Thursday and per annuums on Friday.

Red Cross Fund Drive Ends This Week; NH Leading Commands in Latest Report

With the current drive ending this Friday, you have five days left to make your 1953 contribution to the American Red Cross. As of Mar. 20, NNMC contributions totalled \$1,730.19. The following table illustrates command participation for the last three campaigns:

Command	1951	1952	1953 (as of Mar. 20)
NNMC	\$ 867.55	\$ 431.93	\$439.70
NH	1,760.55	1,216.85	478.51
NMS	670.00	296.14	345.72
NMRI	365.50	321.60	241.50
NDS	386.10	358.75	107.25
NSHA	170.00	66.25	117.51
TOTAL	\$4,219.70	\$1,730.19	\$2,691.52

From Jan. 1, 1952 to Jan. 1, 1953 your Red Cross on this station provided certain social services for all commands, (The hospital Social Service is done jointly by Civil Service and Red Cross workers.); and recreation service for the Naval Hospital and volunteer services for all commands.

A partial report of these services, statistically speaking, shows the following:

Social Service

Eighteen percent of all new admissions to the hospital received some form of recorded social service including: 555 leave verifications; 1,020 other kinds of home reports; almost 1,000 counseling problems; 91 servicemen received \$3,714 in loans; 17 servicemen received as a grant \$323; and 1,983 servicemen used services in relation to discharge-from-service planning with use of community resources. Service in this division was also used by 195 staff members.

Recreation

The monthly average of recreation statistics shows that: 300 parties are given on the wards, 9 invitations are extended for activities off the station to an average of 360 patients, 841 patients use diversional crafts, and 149 ward movies are shown each month to an average audience of 3,127 patients.

Volunteers

An average of 746 volunteer workers give their time to the hospital each month. This represents Gray Lady service, entertainers who come to the hospital, canteen workers who prepare food for parties, motor service workers who take patients to and from outside entertainment and other facilities, staff aids who help in the business office, and a large group of production workers who, out of Navy gauze, make a large percentage of surgical dressings used in this installation.

Remember, this is only a partial report of the work of the Red Cross Unit at NNMC for the past year.

- These Gave -

Military and civilian members of NNMC who donated a pint of blood during the period of Mar. 9 to Mar. 22 are:

NNMC

WOHC Carlos Bagwell, Joseph Rose, HM2, Richard Lampert, HM3, Mr. Sylvester Dudzik and Mr. Harry Johnson.

O.T. Nurse Changes to Med. Serv. Corps; First Such Transfer at Medical Center

NNMC's NEW MSC OFFICER, Miss Elizabeth M. Carver, explains to John Goff, HM2, the problems of preparing plastic holders for lamps.

"It feels odd not to be wearing the nurse's cap any longer," was Lt. Carver's reaction to her change in status from the Nurse Corps to Medical Service Corps.

Miss Elizabeth M. Carver, officer in charge of Occupational Therapy Department, is the first officer at NNMC to utilize a directive permitting reserve nurses specializing in occupational therapy to change to Medical Service Corps.

"Why I changed? This is the field which I enjoy and specialize in and prefer to work in."

The new MSC officer requested the change shortly after the directive was released. On the 10th of March, through official notification from Capt. Hogan, the change was made.

Miss Carver has donned the Navy uniform three times. The first followed graduation from Nursing School at Heaton Hospital in Montpelier, Vt. The next was in 1946. Again, following graduation from the Boston College of Occupational Therapy, Miss Carver returned to USN life.

Her plans for the future? She hopes to stay here.

Navy Releases Dates For August PO Exams

The next examinations for advancement in rating of Navy personnel in pay grades E-4, E-5 and E-6 will be held in August, the Bureau of Naval Personnel has announced.

The following dates have been scheduled for the August exams: E-4—Aug. 11, E-5—Aug. 18 and E-6—Aug. 25.

Examinations will be held in February and August of each year. February tests will include those personnel being examined for pay grade E-7.

Operational tests, included in the examinations, are now called performance tests.

The Bureau also announced that the results of the recent February exams will be made known in the near future. Personnel promoted to chief petty officer will be rated effective June 16. All other promotions will be made effective May 16. (AFPS)

Red Cross Graduates 51 In Auditorium Ceremony

Last month saw the twentieth Gray Ladies Class and the second Class of Staff Aides of the American Red Cross here at NNMC graduate. The class included 46 new Gray Ladies, two transferees, and three staff aides.

The ladies were given certificates for completing training and probationary hours.

Present at the ceremony was Admiral Groesbeck, who addressed the graduating class, and Chaplain Sodt who gave the invocation.

Learning to Run Electric Typewriters Now Part of NSHA Student's Training

POINTING OUT the automatic carriage return, Mr. G. H. Horsnell instructs NSHA students (l. to r.) John C. Kates, HMC, Robert B. King, HMC, and Joseph F. Kzenzak, HMI, in the use of the electric typewriter. The student standing is Frank A. Krahenbuhl, HMI.

In conjunction with a course of instruction in office machines, NSHA is currently presenting a workshop in the uses of electric typewriters to the Medical Administrative Technic students.

The course is being conducted by Mr. G. H. Horsnell, whose services were provided by the International Business Machines Corporation.

Mr. Horsnell traces the development of typewriters from a device which received a patent from Queen Anne of England in 1714 to today's precision machines, which combine the performance of manual typewriters with the speed and versatility of electricity.

The lectures are intended to help the students recognize the potentials of an accepted, and necessary, office machine in the day-to-day business of naval hospitals.

In addition, each student learns how to operate an electric typewriter as a part of the training in office machine orientation.

The advantages of electric typewriters in teaching the "touch" system of typing are emphasized. Student operators need not concern themselves with manual functions such as carriage return or line-spacing or touch control because they are performed with a minimum of effort and motion. The students can then concentrate on the attainment of keyboard facility.

AFRS Platter Chatter

Bibi Johns Comes to America on Hunch And Becomes Popular Recording Star

Bibi Johns, 23-year-old blue-eyed blonde singer, came to America from Sweden last year on a hunch. "To come here has been my ambition since I first heard of the country," says Bibi.

Last year the Johns' had some company at their home in Arboga, Sweden, visitors that turned out to be relatives Bibi hadn't known anything about. They were from Minneapolis and when they asked Bibi if she'd like to come to this country, Bibi decided to take the gamble.

Anyone unfamiliar with European tastes in popular music might be surprised to learn that jazz is very popular there, especially in Sweden where the leaning seems to be particularly toward modern jazz.

Listening to Bibi sing it is hard for anyone not familiar with her to realize that she was not born and reared in America, for her pronunciation of words and her phrasing are as American as if she'd spent her life here. This is true in spite of the fact that in conversation Bibi has a decided, and very pleasant Swedish, accent.

It was Gordon Jenkins who helped Bibi get started in this country. She met him shortly after arriving here, sang for him, and won him to her cause. He was impressed with her ability and arranged for several auditions for her.

In one of these auditions, RCA Victor heard her and signed her to a recording contract. See if you don't agree with RCA Victor when you hear Bibi on "Afternoon Rhythms" this afternoon at 1300.

AFRS Schedule Channel C — Monday through Friday—1300 to 1345

D. C. Service Clubs Will Help You Plan Low Cost Weekend

Weekend liberty and no money? What to do? Where to go?

In Washington there are 175 women working day and night at information desks in service clubs who have been trained to help you plan a weekend. If you are short of cash and no payday in sight, why not see these ladies and let them map out the evening or 72-hour liberty?

Desks for information are located at the following points: USO-TA Lounge—Union Station—open 24 hours.

USO-Lafayette Square Club—719 Madison Place, N. W.—daily from 0900 to 2400.

Soldiers, Sailors, Marines and Airmen's Club—1015 L St., N. W.—open 24 hours.

Jewish Community Center—16 Q St., N. W.—open daily except Friday.

USO—YMCA—4911 Moorland Lane, Bethesda—open Sunday through Thursday 1000 to 2300 and Friday and Saturday 1000 to 1700.

Lutheran Service Lounge—927 New York Ave.—open Monday through Friday 0700 to 1000, Saturday 1300 to 2300 and Sunday from 1300 to 2100.

USO Penthouse, YWCA—17th and K Sts., N. W.—open daily except Monday.

Armed Forces Center of the Episcopal Churches of Washington—1317 G St., N. W.—open Saturday and Sunday 1400 to 2000.

The service clubs offer a variety of entertainment to choose from. For example:

Every Monday

Up-to-date dancing course—Jewish Community Center, 2030 to 2130. Bridge and open house—Bethesda USO—until 2300.

Every Tuesday

Open house and hostesses—Bethesda USO, until 2300. USO Penthouse, YWCA—Open house, crafts and games, 1900. USO-Lafayette Square Club Variety Show.

Every Wednesday

Great Books Course—Jewish Community Center, 1930 to 2100. USO-Lafayette Square Club, Variety Show, hostesses and dance 2000. Bridge instruction—Bethesda USO, 1900 to 2200. Orchestra Dance—USO Penthouse, YWCA, 2030 to 2200.

Every Thursday

Square dancing—USO Penthouse, 2100. Record Dance—Bethesda USO, 2000 to 2200. Folk Dancing—Cardozo Center (13th and Clifton Sts., N. W.), 2000.

Every Friday

Television—Lutheran Service Lounge, 1900 to 2200. Games and Contests—USO-Lafayette Square Club, 2030 to 2300. Variety show—USO-Lafayette Square Club, 2000.

Every Saturday

Dance and hot supper—Armed Forces Center of the Episcopal Church of Washington—1630 to 1930. Orchestra dance—USO-Lafayette Square Club; USO Penthouse, YWCA; Glenbrook Club (8600 Wisconsin Ave.) on the second and fourth Saturday of the month.

Every Sunday

Snack supper—USO-Lafayette Square Club, 1800.

NH Barracks vs. NDS Enlisted Today In Crucial Intramural Battle at 1700

As this story was written, the stage appeared set for today's important battle between the two unbeaten NNMCI Intramural Basketball League juggernauts, fast-breaking NDS Enlisted and smooth-working NH Barracks. These two court powerhouses collide at 1700 in the stadium gym.

Barring an upset loss to greatly-improved NMRI by the speedy Dental five in their game last Thursday, Mar. 26 (see Sport Flashes for result), both undefeated clubs will carry 7-0 loop records into this crucial contest.

The squads seem so evenly matched that the tilt looms as a toss-up affair, and both coaches have pronounced their charges ready for "the big one."

NH Bks. prepared for today's struggle by overcoming a fiery LAB 20 crew, 40-33 last week, after blasting aside outclassed NNMCI, 60-28.

Crabtree (10 points) and Fann paced the attack against surprisingly strong LAB 20, while Brown (11) and Jeter topped the losers. Bush (13), Katt (12) and Rutolo led the way past Center Command, with Salchert (10) and Allgood heading the victims.

Dental Enlisted rapped Pharma-

Canterbury and Guidus hit the court for the winning NMRI while Greer made 10 and Edwards nine for P. M. School.

In another recent contest, Pharma Med. clipped LAB 20, 43-22, as the losers completed their loop campaign. Pittard and Greer of the victors, each chalked up 10 points while Melott scored 6 for the losers.

LAB 19's latest effort in its quest for a playoff spot was a 42-25 win over Pharm. School. Powers scored 13 points, Brown 11 and Salchert 10 for the Lab. quintet, with Fann getting nine and Galuska eight for Ph. Sch. LAB 19 still must tackle NH Bks. on Apr. 2 and Pharma Med. School on Apr. 7.

The NDS Officers forfeited the last four games of the season, leaving them a final slate of 1-4.

Remainder of the league schedule will appear in the Daily Enlisted and also can be obtained by calling Ext. 672. Regular season play ends Apr. 7, with the elimination playoff games scheduled for Apr. 13, 14 and 15.

SPORT FLASHES

Undefeated NDS Enlisted won its seventh intramural win as it handed NMRI a 59-39 loss in a hotly contested affair last Thursday. Jack Carrabine netted 12 for the victors while Will Fannery bagged 13 for NMRI.

Intramural Softball Being Planned Now Varsity is Possible

Although the station baseball league will be in progress for other two or three weeks, the springlike weather has made many an NNMCI athlete start thinking about the approaching baseball season.

The Medical Center will not have a varsity hardball team this year, but an NNMCI softball nine is a finite possibility.

If either the Middle Atlantic Inter-Service Athletic Conference or Potomac River Naval Command has a softball league, indicated are that this activity will be a team in whichever circuit operates.

At present it appears that a proposed MAISAC loop would be comprised of no more than five softball clubs, as many Army posts in the area do not expect to have varsity teams. However, PRNC may have a league of its own, in which case the Admirals probably would be one of the squads entered.

Nothing final regarding a manager or coaches will be decided until it is determined (within the next few weeks) whether or not NNMCI will have softball on a varsity basis during 1953.

The Special Services Division has begun making plans for this year's station intramural softball contest and hopes that it will prove as successful as was the 1952 competition.

It is anticipated that Medical Center play will be conducted on two diamonds, starting in late May or the early part of June.

However, Diamond No. 1, the one nearest the tennis courts, requires considerable rehabilitation work at this time and will undergo major repairs of that nature in the near future. Mr. Stant, the Corps Supervising Landscape Architect, promises that his crew will be moving dirt for the project soon. Those commands or services wishing to enter teams in the station league are advised to begin organizing their squads this month.

INTRAMURAL BALL sees Russ Eads, DT3, of NDS's Enlisted squad attempting one of his tap-in shots which netted him 21 points on Mar. 12. Frantically trying to halt him are Wilber Robinson, HM3 (dun-garces), and Conrad Bonneau, HMI, both of Pharmacy School.

cy School, 54-34, prior to its Thursday tilt with Research. Eads collected 21 points and Carrabine 13 for NDS, as Bradshaw meshed nine and Parrish eight for the Pharmacists. The excellent rebound work of Eads and Shuff has sparked for the Dentalmen all season.

Meanwhile, determined NMRI continued its bid for a berth in the post-season tournament among the four teams by tripping Phys. Med. School, 50-42, and stopping the NDS Officers, 42-27, in recent out-

Hear the voices of such famous sportsmen and women as "Jack-the-Giant killer" Kramer, former Davis Cup champion; Patty Berg, women's golf pro, and many others over the AFRS, Channel "C", every Thursday at 1330.

ings. Raw notched 18 tallies and Canterbury 10 against the Dental Interns, and Flocca had 13 for the losers who trailed only 24-19 at halftime. In the Phys. Med. tilt, Raw amassed 24 markers and

Admiralettes Down Andrews AFB 35-29 As Jackie Shook Finds Basket for 19

The Admiralettes pocketed a 35-29 win over the visiting Andrews Field Wafs on Mar. 18 to end the WIAL single round robin with seven wins and four losses.

This throws the gals into a three-way tie for fourth place with the Ft. Myer Wafs and the Ft. Myer Headquarters Wac Co. Un-
defeated Quarters "K" holds first honors, while Ft. Meade, with one loss, takes second.

At present the Ft. Myer 7001st Co. is hanging on to the third slot with three losses.

Off to a slow start, forwards Shook, Carlson and Mihay could only hold their own against the Wafs, the first buzzer saw it 6-6.

In the second stanza, Jackie Shook began to find the basket with her left-handed hook shots. Bethesda led 17-12 at the half. Shook held the pace in the second half as she totalled 19 points for the evening.

Boots Carlson slipped in nine points (five of them in the last quarter) while Mihay and Sharp, who alternated positions, sank four and three apiece.

The guard trio of Bradford, Cox and Crouch found themselves busy

UNNING HOOK SHOTS like this gave Jackie Shook 19 points in the Andrews Field game.

ing to stop Andrews' Steele, who pped by them for 17 tallies. Nancy Aiken lent her experienced hands to the task in the fourth quarter, relieving Cox.

Last week the gals were practicing up for the single elimination WIAL tournament which gets underway this week.

Tonight the gals will travel to Ft. Myer to tangle with the 7001st Wac Co. there. The tournament will continue through Thursday. Regardless of the finalists, the championship game will be staged in the NNM gym this Thursday at 1900.

Boys Get Pool 6 Days

The YMCA Annual Boys Learn to Swim Week will be celebrated next week from Apr. 6 to 11 in the whole Washington area. The NNM pool will be reserved for the boys' use from 1500. to 2200 daily. The Bethesda pool, alone, is expected to accommodate 300 boys during this all important, community service project.

March 30, 1953

Varsity Takes Third In MAISAC Tourney

The NNM Varsity Bowling Team ended their 1952-1953 season with a three-point loss to the visiting Quantico team here to give the local keglers a 29-13 final for third place in the MASIC eight-team tourney, home to home play.

NNMC dropped only 13 points with five out of six to Quantico, split two and one with Ft. Myer, three to Receiving Station and two to the radio station at Cheltenham.

Individual MAISAC league honors fell to Johnnie Miller with second high average of 188.

Team average during play was 892. Individual averages were Miller with a 188, Joe O'Keefe with a 181, R. E. Daley of NH with a 177, E. F. Meitl with a 174, C. E. Brown of NH with a 172 and W. Koenig of NMS with a 166.

In first place in the league was Quantico with a 36 and 6 record, Ft. Myer in second with a 30 and 12 and NNM in third.

Carriers Take Lead In Women's Bowling

In women's bowling, the Carriers rolled their way out of last issue's three-way tie for first place, with a slim one-game lead over the second-place Minesweepers.

The Carriers gained this advantage when they took three games by forfeit from the fourth-place Submarines last Tuesday night. The same evening, the Minesweepers edged out the Icebreakers, taking two out of three.

Team win-loss records to date are:

Team	Win	Loss
Carriers	10	5
Minesweepers	9	6
Icebreakers	8	7
Submarines	3	12

With the three top teams so close, there is no predicting who will emerge final victor tomorrow night when the league concludes.

Bowling Flash

Wednesday night, Mar. 25, Maplebusters dropped the top place NSHA Staff by a clean sweep placing the Maplebusters in top slot by a point and NSHA out of top position by a half point.

Intramural Bowling Results . . .

Standings as of the 11th week are:

Team	Won	Lost	Pct.	Ave.
NSHA Staff	31½	12½	.716	759
NMS Lab	30	14	.682	701
Maplebusters	28	16	.636	736
CPO Club	27½	16½	.625	803
NDS Officers	25½	18½	.580	711
NH Doctors	25½	17	.575	694
Operating Room	23	21	.523	745
Dental Interns	23	21	.523	654
Optometry	22½	21½	.511	680
See Mats	21	23	.477	729
Pharmacy School	20	24	.455	700
Lab 19	17½	22½	.438	703
NMRI Gold	19	25	.432	677
NSHA Class F	16½	27½	.375	630
NMS Officers	15	29	.341	626
NMRI Blues	6	38	.136	605

League Honors

High Team Game: CPO Club—910

High Team Series: CPO Club—2596

High Individual Game: Klaes (See Mats)—257

High Individual Series: Miller (Pharmacy)—645

"The Big Ten"—Daley with an average of 181; Miller (Pharmacy) with 178; Brown (CPO Club) with 171; Meitl (NSHA Staff) with 168; Ranes (Maplebusters) with 167; Koenig (Lab 19) with 163.4; O'Keefe (CPO Club) with 163.1; Klaes (See Mats) with 161; Deidesheimer (CPO Club) with 159; Ferguson (NDS Officers) with 156.5; Fisher (See Mats) with 156.

"The 600 Club"—Miller (Pharmacy)—645,609.

Camera Catches Cagers in Capital Capers

BETHESDA BALLET might be more apropos than Bethesda basketball for these action shots of the Admirals' clash with the Hagerstown five on Mar. 10. Left: Leading with his right, forward Ernie Reed battles for the rebound with Hagerstown's "Skip" Hill. Center: Leaning over backwards for the play,

Cecil Mitchell of the Admirals and Fritz of Hagerstown grapple for the ball. Right: Helping or hindering, Glenn of the opposition is ineffective when Ron DeVice leaves the floor for two of his 26 points for the night.

Tight Six-Way Race Shapes up on Alleys

Equal intramural bowling is shaping up to a tight six-team race for the four top positions as play goes into the final three weeks tonight. Contending for the top positions are NSHA Staff, now in first position, NMS Lab, Maplebusters, CPO Club, NDS Officers and the NH Doctors.

NSHA took over the first slot at the end of the 11th week of play with a clean four-point sweep over NMS Lab on Thursday, Mar. 19.

CPO Club climbed back into contention with an all-point win over the Research Blues with CPO's Brown leading the night's scoring with a 216 game and 562 series.

The Maplebusters moved up fast with a four-point win over Pharmacy School aided by the Maplebusters' Captain, Ranes, hitting the strike pocket to the tune of 505 for the evening.

Admirals Drop Tilt to Patuxent River Precluding Newport Tourney Chances

Unlike most present day movies, the NNM Admirals' basketball season didn't have what could exactly be called a happy ending. It closed on a rather disappointing note as the Medical Center five bowed to Patuxent River NATC, 73-62, in the PRNC-SRNC tourney on Tuesday, Mar. 17.

For a little better than one quarter it looked as though the Medicalmen were headed for the Eastern Area Playoffs at Newport, R. I. Coach Paul Sherin's charges raced away to a 25-17 first period lead and held a 28-18 advantage with 12 minutes of play elapsed.

But then the tide of hardcourt battle turned. Pax River gradually whittled away at the 10-point deficit and suddenly surged ahead, 38-34. Undismayed, NNM rallied briefly and went ahead 39-38 at halftime.

Pax River's smooth-working outfit outscored its scrappy foe 22 to 12 in building up a 60-51 margin during the third stanza, Cogger and Mazul setting the pace with three baskets each.

Adding to NNM's woes in the third session was the departure on fouls of both Ernie Reed and Cecil Mitchell, its two lanky rebound aces. Reed rammed home 11 points before drawing his fourth personal early in the second canto, while "Big Mitch" had three fouls by the half.

With their tallest men benched by the whistle tooters, the Admirals fought back gamely in the final frame and narrowed the gap to 62-58 just before a late Pax River spurt iced the contest. Close guarding kept Ron DeVice, Harry White and Co. from getting many good shots in the fading moments.

Hank Mazul and Don Johnson led the NATC attack with 19 digits apiece, while DeVice took top honors for the game with 20 points. White collected 15 markers and turned in a superb floor performance.

Also scoring for NNM were Jim Mincey with six points; Mitchell, five; Sy Barton, three; and Pete Veneziano, two. Others on the tourney squad included Frank Anama, Bob Collins, Wayne Davis and Eddie Reynolds.

Pax River took three tussles in winning the tournament. The Airmen upset favored Rec. Station, 62-56,downed NNM and throttled Naval Photo Center, 74-65, on suc-

cessive nights. Victories over NAS, Anacostia, D. C. and Naval Security Station carried Photo Center to the final round.

Prior to the tourney the Admirals won non-loop contests from Walter Reed AMC, 71-66, and Randall A. C., 68-67. The Fairchild Packets of Hagerstown, Md. edged out NNM, 65-62, here Mar. 10 in a tight tilt that saw DeVice garner 26 points in a losing effort.

Downing Announces Spring Golf Plans

With spring literally just around the corner, that popular pastime known as golf once again moves to the front of our Medical Center sports stage.

Bill Downing, NNM professional, urges all station linksmen to start turning in their scorecards at the golf shop at the completion of each round (even if only nine holes are played) in order that handicaps may be assigned each local brassie-wielder as soon as possible.

If sufficient interest is shown, a Blind Bogey Tournament will be held on Saturdays, Mar. 28, Apr. 4, 11 and 18, Downing states. Entry fee for such affairs will be 25 cents, with this money being put into tourney prizes.

First major event of the year will be the all-member championship (for the Admiral Swanson Trophy), slated to begin May 16. An intramural team tournament (four-man competition) will start June 20.

Downing asks all golfers to write name, rank or rate, command and phone number on each scorecard before submitting it. Soon links addicts will be able to place cards in a weatherproof box, to be located by No. 9 green.

Plans also are being made to have a free weekly clinic especially for beginning golfers.

Hollywood's Best Shins

THE MOST PERFECT SHINS in Hollywood belong to Nancy Olson, as far as the West Coast Illustrators League is concerned. The group reached its decision after comparing 83 pairs of feminine legs and chose Nancy's as tops.

What to See Around D. C.

- MONDAY, MAR. 30—Concert, Chamber Arts Society Series, Catholic Auditorium, 2030.
- TUESDAY, MAR. 31—Concert, Philadelphia Symphony Orchestra, Ormandy Condr., Constitution Hall, 2030.
- WEDNESDAY, APR. 1—Great Books Institute, Jewish Community Center, 16th and Q Sts. N. W., 2015, each Wednesday.
- Orchestra Dance, Age 17-30, Servicemen, YWCA, 17th and K Sts. N. W., 2030, each Wednesday.
- THURSDAY, APR. 2—Reading-Discussion Group, men and women, YMCA, 1930, each Thursday.
- FRIDAY, APR. 3—Good Friday devotions in most of the churches.
- Concerts, U.S. Navy Band, Departmental Auditorium, 2000, each Friday.
- Instruction, ballroom dancing, beginners, 1830, advanced, 2130, Cardozo Center.
- SATURDAY, APR. 4—Dinner and Social Hour, Servicemen, Letts house, Foundary Methodist Church, 1830, each Saturday.
- Square Dancing, Servicemen, Friendship House, 619 D St. S. E., 2030, each Saturday.
- SUNDAY, APR. 5—Snack Dinner, USO-Lafayette Square Club, 1800.
- MONDAY, APR. 6—Photography classes, Arlington County Recreation Department, 2000, each Monday, call JA 7-8888.
- TUESDAY, APR. 7—Concerts, U.S. Marine Band, Department of Commerce Auditorium, 2000, each Tuesday.
- Fencers' Club, Roosevelt Center, 13th and Upshur Sts. N. W., 1930, each Tuesday.
- THURSDAY APR. 9—Choral Club, age 17-35, men and women, YWCA, 17th and K Sts. N. W., 1900, each Thursday.
- SATURDAY, APR. 10—Tea Dance, Supper, Servicemen, Capital Girls Society, Epiphany Church, 1317 G St. N. W., 1630, each Saturday.

She: "I want a shorter skirt than the one you showed me."

Clerk: "Have you tried the collar department?"

Did you ever hear of the man with Tarzan eyes? They swing from limb to limb.

It was little Bobby's first day starting to school. He started bravely out the door, then ran back to his weeping mother, put his little arm around her and said, "Don't cry, Mom, maybe I'll be deferred and not even have to go."

The other day a new father went to the infant ward of the hospital to see his brand new offspring. Looking through the window he saw row upon row of new arrivals and every last one of them seemed to be crying.

"Why are they all crying?" he asked the nurse.

"Listen," she said, "if you were only a few hours old, without any clothes, out of work and owed the government almost \$11,700 of the national debt, you'd be bawling, too."

It's the Same Ward But the Job is New For Ex-Wave Nurse

The Waves' boot camp was still at Hunter College, N. Y. when Miss Annie M. Yourex, of Alum Bridge, W. Va., joined in 1944. After working for Ship's Service at Quarters "D" in Washington, D. C. she attended Hospital Corps School in 1945.

That same year she was assigned to NNMC. Remaining on duty here until 1948, she worked on T-16, J-3 (Waves' surgical ward—now 5-C), T-4 and 126 (officers' dependents).

Miss Yourex, better known as "Millie," liked hospital work and wanted to become a nurse. She was discharged in 1948 and returned to West Virginia. She still wanted to become a nurse.

This January, almost five years later, Lt. Yourex, NC, USNR, applied for active duty and was assigned to Bethesda. At present she works on wards 5 and 3-C.

Miss Yourex, who had completed her training at St. Joseph's Hospital in Parkersburg, W. Va., and worked eight months in a Richmond, Va. VA hospital, wanted to return to the Navy, and thought she knew what to expect.

She admits, however, that she

Lt. Annie M. Yourex

didn't expect to find herself working on the same wards, and living only a few hundred feet from where she had almost five years ago.

NOTES AND QUOTES...

Navy Belles

As I sit by the window looking out you can tell spring is here. The game of catch, and the tennis court full of girls getting in shape for the coming season. The basketball team has been getting in shape for the coming tournament this week. We are all behind you, girls; hope you come out on top.

Rose has a new name: Miss Orthopedics. Lou is counting the things about her muscles that she didn't know could happen. Joyce is the morning clock checker. Dinah Lee St. Dennis has finished and Tissue Bank School and come back to Hospital Command for Welcome back.

Pauline is looking for someone to sing with her—I wonder? Joyce is the new hospital disc jockey. Possie should be back any day from school in Norfolk. Welcome back into the fold, Possie, Minnie is running a bureau for baby sitters.

The choir for Protestant Church has started, but they need more you girls, so come around and sing along. Have you seen Jean Lux turning the new little car she just bought? In the spring some girls' turns to shopping and I must be on my way. See you soon, by George!

Med School Daze

Well, the T-Men haven't caught me yet, so here I am again with dry items for old and young alike.

Ltjg. Huber's wife, Genevieve, gave birth to an eight pound, three ounce girl, Barbara Ann, at the very respectable hour of 1030 on 24th. Congratulations, and thanks for the cigar, Sir!

That great little state of Rhode Island must have finally heard of Faherty's escapade that we mentioned several weeks ago. It must have been either that, or the shortage of metal, that made them request the return of his license plates. We're told that Xavier is contemplating buying the car on blocks for the duration.

B. D. Brown of Lab 20 has finally taken that fateful walk down the aisle. His classmate, Tirelli, as well as Med Photo's Lewis, are also contemplating a similar move. By the way, what's with the night duty, Lew?

Our "three white stripe" staff club was increased by four trainees from USNH Bethesda. Osting, Brunet, Veronneau and Hamilton are the lucky men, and we hope they turn out to be just the type we've needed.

HM2 Fitzpatrick has also recently come aboard as a replacement for HM1 Oberlander, who's off to ID School. HM1 J. I. Myers has his seat all packed, and will leave soon for the LSI (L) 1091. Jim's replacement is HM1 McClintic.

Better get back to grading those papers, now. Be with you again in a very few weeks, by cracky.

NMRI

by R. Conaway

That cloud of steam boiling down the road to NMRI wasn't a Steamboat as first surmised; it was Lt. Meryman in his Model A Ford trying to dislodge a family of field mice that had taken up residence in radiator pipes.

Talk about embarrassing moments: a certain WOHC from the Institute was caught star gazing in his p.j.'s when the door slammed and he ended behind him. Of course there was no one at home to let him in again. The Missus was right beside him. Just like in the funny papers.

Then we had a chief who paid \$11.45 plus the usual fee for his mobile tags. Had something to do with the Rockville (speedway) race. I understand.

They say the gas man is still at it.

Three new arrivals at NMRI are HM1 W. E. Kyle, HM2 R. F. Deane, and HMC J. J. Redwood. On the outgoing roster are HMC R. E. L'Etoile, HMC T. E. Stephenson and HM1 R. E. Havranek.

We were all sorry to hear of Malvina Weiss' turning in for surgery. We're hoping to have you back with us in the near future, Vina.

Is it true that Chief Reavis is going to start night school after Chief Gillmore leaves?

Anyone interested in joining the Camp Fire Girls, just see Chief Allen. At any rate, he sure boosted those candy sales for his own Camp Fire Girl. Good work, Chief.

Say Hansell, have you had anything to do with the Crime Stopper lately? I hear they get pretty tough in Virginia.

Dental Explorer

by C. Conner

Casualty List For NDS: (Latest victims of that dread disease Sporadic Feveritis) . . . Dr. Hedman who keeps seeing little sailboats in front of his eyes. . . D. J. Partlo dreaming long and hard of that perfect shot he capture with his latest camera. . . J. P. Jarboe dreaming of those hot hours on hot humid days. . . C. Hailey wistfully wiggling her toes in anticipation of all the days to come when she can go barefoot again. Shirley and Louise checking their favorite spot in the back of the barracks for their daily ration of old Mr. Sol. . . Chief Hughes thinking about those nice cool breezes out Rockville way. . . Shuff dreaming the green. (He's sure to make that long hoped for hole-in-one this season) . . . Cliff dreaming of the Mt. Plaza. . . Lux, Demerast, Vic, Pete, thinking of the air conditioning in their favorite rendezvous. . . Don't look now but that bug just claimed it's latest victim. Yours truly is plain dreaming.

"There's a brand new baby at our house," is the song that Dr. Walker is singing these days. Yep, it's orchids to Mr. and Mrs. Walker from all of us "cuz it's a bouncing baby boy."

Welcome home again to Neutzling who has returned to the fold more. . . Well, Jarboe just came back from his fitting. . . not for clothing either! It's for that ring in his nose that he will start wearing on 12, when he says those two fatal words. . . Seriously though, J. P., wish you the very best of luck for the first hundred years of your married life.

Mr. Rockett and Pennington are going to have to do much better in their gardens than they have been doing to that pathetic looking plant in the office. . . Strange as it may seem, you do have to water them now, then, the plants that is.

"You're an ace now—you've destroyed five planes—all ours!"

Lt. Cdr. Paul R. Cox Assumes New Post As Administrative Officer for NNM

Lt. Cdr. Paul R. Cox, MSC, USN, assumed the duties of Administrative Officer, NNM, on Mar. 26. This position encompasses the duties of Medical Administrative Officer, Communications Officer, Public Information Officer, Postal Officer, Security Classification Control Officer and Historical Officer.

Mr. Cox comes to NNM from the Bureau of Medicine and Surgery, where he was Administrative Assistant to the Division Director, Personnel Division, for over a year.

Before that, he spent almost three years as the Administrative Assistant to the District Medical Officer at Pearl Harbor.

During his tour at Pearl Harbor, he received two commendations. The first was from the District Medical Officer for outstanding administrative ability in the performance of his duties.

The second, which came from

Lt. Cdr. Paul R. Cox, MSC

Chief, BuMed, was for planning and developing a mobile photofluorographic trailer.

Starting out as a hospital apprentice second class in 1920, Mr. Cox now has over 33 years of continuous service. During his naval career he has served on practically every type of ship in the fleet.

His first sea duty was aboard the coal-burning gunboat *Sacramento* in the Asiatic Fleet in 1922. Since then he has served on destroyers, aircraft carriers and transports, as well as accompanying the Marines in the field on three occasions.

During World War II, the MSC officer served as Administrative Assistant to the Landing Force Surgeon on the staff of the Commanding General, FMF, Pacific. He participated in operations against the Japanese in the central Pacific campaigns including the Gilbert, Marshall and Marianas Islands.

Among his ribbons is the Commendation Ribbon with V which he was awarded by Admiral Nimitz for operations against the Japanese on Saipan and Tinian from Apr. 26 to Aug. 12, 1944.

The ex-hospital corpsman graduated from the Naval Medical School in 1928 with a certificate in Laboratory Technique. He instructed hospital corpsmen in the Corps School at San Diego from 1938 to 1940.

Mr. Cox and his wife, Ruth, live with their sons, Stuart, 14, and Brian, 9, in Silver Spring.

ARC Drive Extended; NH Leads Commands

Though the recent American Red Cross Fund Campaign of this year is finished, tabulations of the final results of the campaign for NNM as yet have not been completed. However, even with partial returns, it could be seen that the drive has topped contributions of last year when the total was \$2,691.52 at the end of the campaign.

When the fifth-week results were published the total had topped last year's record by nearly three hundred dollars. Leading in total donations was the Naval Hospital with over twelve hundred collected. In second place in the total column was NNM Command with nearly six hundred dollars collected from servicemen and civilians in the command.

The campaign at that time represented donations from 1,954 individuals of the Center.

Gratitude is expressed by the Chairman of the campaign, R. Adm. Bertram Groesbeck, to all of those who contributed and especially to Chaplain Kosky, who acted as Assistant Chairman, and the various keymen from the commands.

Local Talent Wanted For All-Star Revue

The Medical Center's local talent will take to the stage soon—probably sometime next month. The "NNMC All-Star Revue" was originally slated for Mar. 12, but was postponed when the auditions failed to enlist a sufficient number of acts.

Fete Veneziano, HN of the Physical Therapy Department, and John Grant, HMI of the Security Office, have volunteered to help whip the show into shape.

Pete says that he now has located enough talent to produce the show, but could use some more—especially from the Waves or nurses.

Anyone who wants to contribute to the show, either by performing or in helping in the production, should contact John Grant at Ext. 341.

Commands Planning Open House May 14

On May 14, NNM will observe Armed Forces Day. An open house will be observed beginning at 1000 on Thursday at which time the grounds will be open to the general public. The buildings will be open from 1300 to 1700 and tours will be conducted throughout the Center.

Staff personnel and patients are urged to invite their relatives and friends to attend this open house. Liberty will not be granted to patients or staff prior to 1800.

The Commanding Officer, NNM, particularly desires that all personnel be especially smart in their appearance during the open house.

Armed Forces Sunday will be observed on May 17, and special religious services will be held in the main auditorium.

Defense Secretary Favors Draft Cuts; Does Not Plan to Raise Military Pay

Secretary of Defense Charles E. Wilson revealed recently that he was contemplating a cut in draft calls by reducing the strength of some of the divisions now training in the U. S.

Making his first official appearance before the press as Secretary of Defense, Mr. Wilson also said that he is trying to slash at least four to five billion dollars from defense spending, keeping the nation's defenses strong despite cuts.

He said that defense spending has been held to the January level of 3.6 billions and every effort will be made to cut the monthly rate even further.

Marine Commandant Presents 7 Medals For Korean Action

Sgt. Billie Warren Lynch, USMC, has recently been awarded two medals: The Silver Star award for outstanding bravery during action in Korea and a Gold Star in lieu of the third Purple Heart for

SILVER STAR winner Sgt. Billie Lynch is congratulated by Gen. Shepherd, Commandant, USMC.

injuries also received during enemy action in Korea.

Lynch, who entered service May 24, 1950, received his recruit training at Parris Island, S. C. Prior to entering service, Billie graduated from Dupont High School, Belle, W. Va. and was employed by the Conquest Produce Company, Charleston, W. Va.

The medals were presented by Gen. Lemuel C. Shepherd Jr., Commandant U. S. Marine Corps, in a ceremony here on Mar. 30. R. Adm. Bertram Groesbeck Jr., MC, USN, CO, NNM, and other commanding officers, were present for the ceremony in addition to Marine comrades who fought by his side in Korea.

Other Awards

At the same ceremonies, Gen. Shepherd awarded three Bronze Stars and two Purple Hearts to the following men: Pvt. Franklin D. Parr, USMC, Bronze Star; Cpl. Benjamin G. Kline, USMC, Bronze Star; Thomas B. McLaughlin, HM3, USN, Bronze Star; Pfc. Herman H. Arthur, USMC, Purple Heart; and Pfc. Edward K. Murphy, USMC, Purple Heart.

No pay raise is in sight for the Armed Forces, Mr. Wilson indicated. When asked about the eight percent raise as proposed by former Defense Secretary Robert Lovett and Asst. Secretary Mrs. Anna Rosenberg before leaving office, Mr. Wilson said it's a little too early to talk about it.

For latest pay recommendations suggested to Mr. Wilson by the Strauss committee, see page 4.

The Secretary also outlined the methods by which he hopes to achieve savings in the Defense Department.

1. He is striving for intelligent savings by making sure that people are effectively organized and employed.

2. He will try to hold a common front for military production, thus making sure that the Defense Department is not overstocked on some items and understocked on others, by cutting down the amount of waiting time that slows down manpower and equipment.

Secretary Wilson said that he had set the early Apr. 30 date for the final report of the Rockefeller committee because he wanted to get started on its proposals as soon as possible. He explained that the committee had concluded its first two meetings but couldn't reveal any of its findings.

Mr. Wilson said that he, himself, had found no large areas of waste and extravagance in the Armed Services. At the same time, he said that there are still plenty of areas where savings could be made.

He explained that there was some overlapping and duplication but that it couldn't be eliminated quickly.

He further said that a review of defense plans and expenditures is being made to determine how much the budget for the fiscal year 1954, beginning July 1, can be cut without giving up anything vital to the security of the country.

—(AFPS)

Honor Roll Proposed

A bill has been introduced to establish an "Armed Forces Medal of Honor Roll." Each person entered on the roll would receive a certificate of service showing why the medal was awarded. In addition he would receive a life-pension of \$250 per month, paid by the Veterans Administration.—(AFPS)

Hothouse Readies for Easter

EASTER LILIES are given a last inspection before being distributed around the station prior to Easter. Examining the croft lilies is Mr. Benedict F. Robinson, gardener.

Eleven-Year-Old Stars on AFRS Program In Iron Curtain Escapade on Apr. 24

The *Secret Mission* drama next week is the true story of the remarkable escape made from behind the Iron Curtain by a 13-year-old Polish boy. Young actor Sammy Ogg, who plays the role of the boy, is deserving of special mention for his performance.

Sammy is 11 years old and already has many performances listed to his credit. He played the part of Francisco in "The Miracle of Fatima" for Warner Brothers. He was one of the children who saw the vision. This movie is currently showing locally.

He won a **Box Office Acting Award** for this role and the Catholic people have had his name engraved in the permanent book of peace in the shrine at Fatima, Portugal, although Sammy is not of Catholic faith.

He will work in 20th Century Fox's "Kid from Left Field," starring Dan Dailey, and following that a Boy Scout story starring Clifton Webb. Sammy appeared in television's "Dragnet" program, "22 Rifle for Christmas," this year. This award-winning program is presented annually by "Dragnet."

He has played Pat O'Brien's son, Nelson Eddy's son and Alan Young's son on TV and will have a running part on Walter Brennan's new TV show, "Hickory Hill."

His favorite sport is swimming, for which he has won ribbons, and his hobby is stamp collecting. Listen in Friday, Apr. 24 at 1300 and hear Sammy for yourself as "Mr. America" on the *Secret Mission*.

AFRS Schedule—Channel C—Monday through Friday—1300 to 1345

April 23—1300—Concert Hall; 1330—Sports Program

April 24—1300—Secret Mission (Mr. America); 1330—Musical Salute

Service, Now and Then

To hear the boys in uniform now
They have quite a tale of woe.
How hard the service is on them
No matter where they go.

To one of us who served our time
In years which have gone by,
To hear them cry and gnash their teeth
We should sit right down and cry.

The uniforms they have now fit
The cloth is good and new.
The place they sleep is paradise;
The chow is real good, too.

In years ago, we took our sack
And laid it on the ground,
With pup tent raised above our head
And mud or snow around.

We'd be about some fifty miles
Away from anywhere.
We thought about the pretty girls
But we never had them there.

Now you have your quarters grand,
Pretty girls work by your side.
And after hours you're free to go
For an evening's show or ride.

You dance, drink, laugh and maybe
You hold her hand and kiss.
We know the real old timers
Never had anything like this.

So when you get to griping
About the service of today,
Think of the times of years ago.
It will wash your gloom away.

—ALBERT H. JONES, Civilian Guard

Finance Officers Meet For Three Days Here

A three-day conference for Navy Medical Department officers assigned duties in connection with the fiscal management of the Bureau of Medicine and Surgery convened here last Wednesday.

The Finance Officers of some 60 continental Naval activities under the management control of Bu-Med, as well as those officers assigned as administrative or executive assistants to the various Naval District Medical and District Dental Officers, participated.

The conference, under the direction of the Bureau of Medicine and Surgery Comptroller, Capt. Murphy K. Cureton, MC, USN, was arranged to cover all phases of Medical Department fiscal, accounting and related matters.

0830—Mass—Main Auditorium

Jewish

Congregation Beth El of Montgomery County will hold services every Friday night at 8:30 P.M. and Saturday morning at 10:00 A.M. in the Pook's Hill Auditorium, 3 Pook's Hill Rd. The services will be conducted by Rabbi Martin Kessler.

The services of Rabbi Harry Kaufman, representing the Jewish Welfare Board, are available to all Jewish Personnel and Patients at the National Naval Medical Center. Rabbi Kaufman may be reached by calling the Chaplain's Office, Ext. 324, or by call direct—Office RA. 3-5371—Home RA. 3-0755.

Protestant Choir Rehearses

THE NEWLY FORMED PROTESTANT CHOIR rehearses for service. Left to right: Jim Pickard, John Cool, Pauline Krampitz, Betty Minnie Smith, Gwen King, Warren Feterstone, Cy Ransopher, and Elaine Sadt directing. The choir practices on Monday and Wednesday 1630 and is still interested in more good voices.

Jack of All Trades and Master of Many Applies to Barracks MAA Joe Melvin

Need a poster? See Melvin. Want a cartoon? See Melvin. Written, advertising material or a sign is needed? Again the person around here to call is Melvin. Joe Melvin, the barracks master of 112, has one unique quality—his diversity.

Special Services posters, cartoons for the station paper or a sign for Ships Service ends with a call to 516, Barracks 112's phone. A short story or retouching of a photograph are a few more of the prolific offerings of this unique MAA.

Being brought into the world "at a tender age" by an Army surgeon at Ft. Totten in New York must have left a lasting impression on this first class, for at the tender age of 21 he joined the Navy.

Through correspondence courses, Joe studied cartooning and story writing and soon began turning out literally hundreds of articles and cartoons for service papers.

In Australia, an Army paper, a Navy publication and the Yank magazine were using Joe's work.

On Manus Island during the last World War, Joe did the drawings for the hospital paper, "cutting more stencils than he thought the Navy had."

When rotation to the States followed after his sea duty with the Marines recently, another flock of cartoons appeared in *Stars and Stripes* and several trade journals.

By the time he had arrived at NMMC, Joe had seen over 400 of his cartoons in publication with about 200 of them sold for "the cold, clammy, wonderful gross stuff—money" at five to twenty-five dollars a cartoon.

His future? "Doing the thing I enjoy, the way I want and want."

Mel's wife, Ann, is also working at NMMC—in the disbursing office.

The Chaplain's Corner

Spring

By Chaplain William G. Sadt

The customary time for making new resolutions about life is New Year's Day. But New Year's resolutions are most famous for soon being broken. One can't avoid speculating that perhaps the reason for this fragility is that the dead of winter is an arbitrary and unfortunate time and that Springtime resolutions, firmly made, might have more chance of survival. For Spring is a changing time, a growing time. In Spring a young man's fancy turns...

That turning need not be only toward romance, and it need not be light and fanciful either. We have just come through the Easter season, a festival of Spring, when the thoughts of most of mankind are centered on the deepest mysteries of being. Nature is at her best—fruitful, beautiful, and productive. Profound forces are at work, changing things that have lain dormant through the cold. The time is ripe for the beauty of solid resolve.

For many of us, life is superficial and meaningless. Not because it is really empty is this true, but rather because sober thought and reflection have too long been alien to our habits. Pleasure and a livelier deep beauty of God's creation, and we forget that there is something important—really important—about life.

Why not wake up, as nature does, in the Spring? Why not live that are worthwhile—surely we ought to value ourselves as highly as God does.

NDS Graduates 45 Prosthetic Techs; Meritorious Masts to 3 Top Students

Graduation exercises were held for 32 Navy and 13 Air Force students of the Naval Dental School on Friday, Apr. 3 in the auditorium of Bldg. 122. Completing the six-month course, entitled Dental Technician, Prosthetic, this class marks the last such class to be held here.

However, other schools dealing with prosthetics are expected to be started at NDS in the near future.

Meritorious masts went to the three top students in the class. Taking first honors was Edward I. Larson, DT3, from Chicago, Ill.

Adele S. Pendleton, DT2, of Freeport, N.Y. (the only Wave in the class), placed second. Third highest in the group was Frederick J. Romanowich, DT3, from New York, N.Y.

Capt. Ralph W. Taylor, DC, USN, Commanding Officer of NDS, held the meritorious masts and also presented the graduation certificates to all the graduates.

Capt. Jesse V. Westerman, DC, USN, was guest speaker for the occasion. Capt. Westerman is Head, Personnel Branch, Dental Division, BuMed.

Lt. Cdr. Judge C. Chapman, DC, USN, head of NDS's enlisted training, gave a short, introductory speech.

Chaplain McGinnity and Chaplain Sodt offered the invocation and benediction.

Navy Reveals Dates Of Training Course

Washington (AFPS) — Convening dates for the Navy's new two-week training course in the Stenomask System of court reporting have been set, the Navy has announced.

The course will be held at the Naval School of Justice, Newport, R.I. It is open to graduates of the Naval School of Justice and to seaman, personnelmen, and hospital corpsmen, second class and above, who have had extensive experience in court reporting.

Courses are scheduled for the months of June, August, September and October.

The Stenomask System has recently been adopted by the Navy to make court reporting faster and more accurate. Facemask microphones and recording devices are used instead of the old style shorthand and recording.

Navy Clothing Factory To Cease Operations

The Navy Clothing Factory at Brooklyn, N. Y., which has been manufacturing clothing for the enlisted personnel since 1917, will cease operations Apr. 30, the Navy has announced.

Future requirements for Navy enlisted clothing will be purchased from commercial clothing manufacturers by contract, the Navy said.

At present, Navy stocks of enlisted clothing have been built up to the point where foreseeable requirements are not great enough to sustain production at the clothing factory on an efficient and economical basis. — (AFPS)

Brain Tumor Exhibit Displayed in St. Louis

A Bureau scientific exhibit entitled "Unusual Tumors of the Brain," was displayed early this month at the annual meeting of the International Association of Medical Museums and American Association of Pathologists and Bacteriologists, at St. Louis, Mo.

The exhibit, prepared from material obtained from the Pathology Department of the Naval Medical School, presents, by means of X-rays, color photomicrographs and color photographs of gross specimens, 20 cases of rare brain tumors.

VARIETY SHOW

Rhode's Musical Varieties will return to the NNM stage Sunday, Apr. 19. The hour-long show starts at 1845, followed by the movie.

Civilian Employees Win Certificates For Their On-the-Job Safety Records

Civilian employees of NNM received award certificates on Mar. 16 for having safety records extending over varying periods of time. The certificates were awarded by R. Adm. Bertram Groesbeck Jr., CO, NNM, who presided over the presentation ceremonies.

Awards were made to the following drivers for consecutive years without accidents:

Nine Years

McKinley Wilson.

Seven Years

Leroy Jackson.

Six Years

Leonard T. Carter, Leonard A. Garner, Julian Gipson, Clarence L. Graves, William O. Hackey, Matthew C. Hurd, William B. Minnis, William D. Osborne, Milton B. Snowden, Fred L. Somers, William E. Wood and William T. Wright.

Five Years

Junius Dupree, Bishop W. Melvin, Martin W. Taylor and John C. White.

Four to One Year

Ruben E. Rogers, James L. Foster, Wilbert C. Carter, Walter E. Grisby, Richard Hughes and Clinton Coleman.

Receiving awards on the same day for industrial safety were:

Eight to Five Years

W. S. Armstrong, Plumbing Shop; Mrs. Oneida Decatur, Laundry; F. L. Schweitzer, Fire Department; and George Hantzmon, Machine Shop.

One Year

R. E. Floyd, Sheet Metal Shop; James Luper, Air Cond. and Ref. Shop; Claude Valentine, Pipe Shop; and J. H. Poole, Auto Mechanic.

Mr. Rizzo Wins \$25 For His Suggestion

Credit for the beneficial suggestion for the month of March goes to Mr. Gaetano Rizzo, time, leave and payroll clerk of the Finance Division.

It had always been the practice to stamp the name and title on the time card with the addressograph machine and then stamp the date by hand.

Mr. Rizzo suggested that a dater be attached to the addressograph machine so that both operations might be done at once. This resulted in a saving of many hours of time in the course of a year, and won an award of \$25 for Mr. Rizzo.

What have you done with your idea? Why not let your Committee evaluate it and reward you for its merit?

Management Association Opens Its Membership For NSHA's Students

The Naval School of Hospital Administration has obtained student memberships in the American Management Association for interested students at the School for the second semester of the school year 1952-53.

Dedicated to the science of management in all its aspects, AMA is today organized in eight divisions: personnel, manufacturing (formerly known as production), office management, insurance, marketing, finance, general management, and packaging.

Student memberships are acceptable by the AMA when five or more students from a school enroll at the same time through the individual sponsorship of a staff member of this school.

Ltjg. James D. Kelly, MSC, USN, a staff member of this school, initiated the original inquiry to have students at the School accepted into membership, and he is the sponsoring staff member who accepted the student applications.

Speed Is Keynote In Blood Demonstration

UNDER THE WATCHFUL EYE of Capt. J. L. Enyart, CO, NMS, blood is brought in to the NMS Blood Bank after the Bethesda Chevy-Chase Rescue Squad's speedy transportation. (Insert)—Some of the 50 car-

tons of blood, which were flown in from Frederick, Md. by the Civilian Air Patrol's Congressional Squadron, are unloaded by Squad members.

—Photo courtesy of Lawrence Krebs, Washington Daily News.

NMS Assists Disaster Demonstration; Mile-a-Minute Speed Highlights Drill

On Sunday, Mar. 22, a simulated disaster demonstration was held with the cooperation of the Blood Bank of the Naval Medical School, Bethesda-Chevy Chase Rescue Squad and the Civil Air Patrol.

The object of this demonstration was to see just how fast blood supplies could be transported from Frederick, Md. to the Blood Bank of the Medical School.

The cartons, which simulated blood in this drill, were flown from Frederick to Congressional Airport by the Congressional Squadron of the Civil Air Patrol's National Capital Wing.

When this squadron of light planes reached Congressional Airport the task of delivery was then transferred to the Bethesda-Chevy Chase Rescue Squad, under the direction of Capt. Harry Andrews. A total of eight round trips were made from the Blood Bank to the airport and back by the Rescue Squad in their four pieces of apparatus.

The round-trip distance is estimated to be approximately six and one-half to seven miles, and the average time per trip, including loading and unloading, was seven minutes. A total of 20 Squad members participated in the demonstration.

When the blood reached the Center it was quickly transported to the Blood Bank under the supervision of Capt. John S. Enyart, CO, NMS.

As a result of this demonstration, Col. Fondahl, Director of Civil Defense for the Washington area, is taking steps to incorporate Civil Air Patrol units in the Civil Defense set-up of Maryland, Virginia and D. C.

New Directive Shortens Involuntary Extensions

All those in the regular Navy who are now serving on an involuntary extension, and whose original date of discharge was after August, 1952, will be discharged one month earlier than previously announced, according to BuPers Instruction 1910.5A, dated 19 Mar.

In the same instruction, it was announced that members of the Fleet Reserve will be released to inactive duty one month early also. No changes were made for Reserves on active duty.

For further information, consult your personnel office.

Sliding Scale for Base Pay, Larger Re-enlistment Bonus And Other Pay Changes Suggested to Defense Secretary

An "escalator" arrangement for the base pay of Armed Forces personnel has been recommended to Secretary of Defense Charles E. Wilson.

A special commission of five citizens, headed by Lewis L. Strauss, asked that base pay be related to a cost-of-living index and be adjusted at intervals of one to two years.

The commission proposed that Congress develop a formula under which all differential pays would be computed as a percentage of base pay and that Congress authorize the use of such a formula through legislation.

The final report of the commission advised that if the escalator arrangement and other of its proposals for incentive, hazardous duty, and special pays are followed that upwards of \$200,000,000 could be saved annually.

The commission feels that this saving can be accomplished "without impairing the incentive which prove vital to our Armed Forces."

A raise in the rate of present combat pay (\$45 per month) was proposed to at least equal the lowest rates of pay provided for personnel engaged in hazardous duty (at least \$50 per month).

Personnel killed or wounded as a result of enemy action should be entitled to combat pay even though they are not attached to a designated combat unit, the commission urged.

The commission also asked that personnel on vessels suffering damage or casualties as a result of enemy action for the month in which the damage or casualties were incurred be paid combat pay for that month.

Combat pay should be authorized for personnel on minesweepers for any month in which they sweep enemy mines for a period of six or more days, the report said.

Modify and reduce the current restrictions against voluntary retirement at earlier than statutory age, the commission recommended.

Here is what the commission proposed for the other types of pay:

Flying—remove from flight status officers and enlisted men in non-crew status who do not possess technical skills contributing directly to safety or mission effectiveness of aircraft, unless they are in a supervised training program for crew member positions.

Crew members who cannot be reasonably expected to provide air leadership or to serve in an operational capacity during an emergency because of highly specialized training in fields other than aviation should be removed from flight status.

Review periodically the flying and service records of each officer to determine if he should remain on flight status even though he possesses the ability to pass a physical examination.

Flight surgeons and aviation observers, medical, who presently receive crew member flight pay should be changed to the pay scale for non-crew members—except a few flight surgeons who are actual crew members on hospital evacuation aircraft or are in specialized projects and perform duties essential to the mission of the aircraft in flight.

Rates of flying pay should be converted to percentages of base pay at existing ratios and payment at that ratio continued.

Submarine—present rates be retained.

Glider—Section 204, PL 351, 81st Congress, as pertaining to glider pay, be repealed.

Parachute—present rates be retained.

Hansen's Disease (Leprosy)—pay currently provided for duty involving intimate contact with persons afflicted be continued.

Demolition—current rates be continued.

Diving—current special pay for divers and for personnel at the submarine escape training tanks, Navy Deep Sea Diving School, and the Navy Experimental Diving Unit be continued. Pay at the rates of \$100 and \$50 per month be paid respectively to officers and enlisted engaged in helium-oxygen diving.

Foreign and Sea Duty—after June 30, 1953 no extra pay be awarded for military personnel leaving the U. S. for foreign or sea duty.

Terminate extra pay for residents of Puerto Rico, Hawaii and other territories or insular possessions, who are on duty in their places of residence or depart from such places after June 30, 1953.

Medical—limit special pay to officers who volunteer and are accepted for active duty beyond that required by law.

Re-enlistment bonus—modification of present system to provide that no re-enlistment bonuses be paid until the person involved has completed 18 months of satisfactory service, that qualifications for such bonus be based on quality of individual service, that longer enlistments deserve larger bonuses, and that a larger bonus be paid for a first re-enlistment than for succeeding ones.

Military personnel remaining on continuous service be eligible for such assistance as educational or home loan benefits which are available to honorably discharged veterans.

Overseas per diem—overseas station per diem allowance be continued, subject to periodic review. Present schedule of attaché maintenance allowances be continued with annual review by Congress.

Insurance—provide \$20,000 instead of \$10,000 for survivors of military personnel who are killed in action, die of wounds or as a direct result of voluntarily engaging in a hazardous occupation.

Make commercial type Government life insurance available at reasonable premium rates to members of the uniformed services, who are unable to secure appropriate life insurance from commercial firms because of hazardous military assignment.

The Strauss Commission was established in September 1952, by ex-Secretary of Defense Robert A. Lovett at the request of a Senate Armed Services Committee. Mr. Strauss, who holds the rank of rear admiral in the Naval Reserve, has recently been named a special assistant to President Eisenhower. —(AFPS)

To the Victors Go the Trophies

INTRAMURAL TROPHIES are awarded by R. Adm. Groesbeck to captains of the winning teams and runners-up in the men's and women's intramural bowling league. Left to right: CWOHC Hugh Ferguson, Officers, runner-up; Betty Ward, HM2, 'Submarines,' first place; R. Adm. Groesbeck; Lt. Marita Petit, 'Minesweepers,' runners-up; and O'Keefe, HMC, CPO Club, first place.

Quarters 'K' Pockets Top WIAL Honors But Loses Final League Tilt to Wafs

The Quarters "K" basketball six took its first league defeat in the WIAL Tournament finals in the NNMC gym when the Ft. Myer Wafas trounced them 59-47.

Oddly enough, Quarters "K" still pockets first-place honors in the league, since the winner was determined by an accumulation of points made both in the tournament and in the first round-robin which was completed last month.

Quarters "K," who took the top place in the first round by defeating each of the 11 other teams in the league, also downed Quantico and Ft. Meade again in the tourney to reach the finals.

Winners of the tournament finals, the Ft. Myer Wafas, placed third in the first round of play and were awarded second-place honors after their unexpected win over the Washington Waves.

The Wafas received another prize, their trophy for second place in the WIAL volleyball tourney which was completed several months ago. The Quantico Marines took first honors.

Admiralettes in Tourney

The Admiralettes had rough sledding from the start in the tourney, as their two opponents, Ft. Myer's 7001st Wac Co. and Ft. Meade, were two of the four teams which bested the Bethesda gals in the first round-robin play.

The Admiralettes upset the favored Ft. Myer 7001st Wac team on Mar. 30 when they squeezed out a tense 22-21 win. The Wacs had previously downed Bethesda 29-25 and had also taken first place in the MDW tourney.

Trailing 5-4 at the beginning of the second quarter, Bethesda tied it up 10-10 at the half. In the third, Shook scored three goals and a free shot, and with two from Carlson, Bethesda assumed an 18-16 lead.

The Wacs scored five to Bethesda's three in the last quarter, but with a one-point lead and about two minutes to go, forwards Shook, Carlson and Sharp froze the ball and saved the match.

Cox, Crouch and Bradford played the entire game on the guards' end, where most of the play was concentrated.

Lose to Ft. Meade

The next night the gals faced powerful Ft. Meade, which had suffered only one loss to date. The Admiralettes were trailing only 13-11 at the first quarter.

From the second stanza on, the tall Wacs consistently found the

loop until the final buzzer rang 51-39 win for Meade.

Shook, Mihay and Carlson, who played most of the match on the forward end, turned in 15, 12 and 11 counters, while Al Sharp, who came in in the second half, sank a free shot.

All five guards, Bradford, Crouch, Evans and Aiken, turned in good performances but could not stop the lanky Saltzer of Meade, who towered over them to effect a less score 23 points.

This loss eliminated Bethesda from the tourney and concluded the season for the gals.

Playoff Scheduled In Women's Bowling

The Carriers and Minesweepers rolled their way into a tie for first place on Mar. 31 which was scheduled for the last night of the league. With 12 wins and six losses apiece, the two nurse teams will play off the tie sometime next month.

The Carriers lost their chance for a clean victory when they dropped one of their three games to the Icebreakers. Meanwhile, the Minesweepers, who were one game behind them, chalked up three wins when the Submarines forfeited.

Final team standings are:

Team	Wins	Losses
Carriers	12	6
Minesweepers	12	6
Icebreakers	9	9
Submarines	7	11

Slade and Ashton To Coach Women's Softball

Spurgeon Slade, HMI, has been named head coach for this year's women's softball nine. Slade will be assisted by George Ashton, HM2, who also coached the women's basketball varsity.

The girls will compete in the Women's Inter-Service Softball League where they will face a dozen opponents from the Washington area.

So far, about 25 girls, Waves and nurses, have shown an interest, so the Center should have no difficulty fielding a team this year.

Medicine & Science

Volunteer Officers Describe A-Blast; Research Fighting Infinitesimal Leaks

Nine volunteer officers were within 2,500 yards of the recent Camp Desert Rock A-blast. The only humans known to have been closer to an A-blast were the Japanese people living in Nagasaki and Hiroshima during WWII.

The nine officers, Army, Navy, Marine Corps and Air Force, who crouched in trenches 2,500 yards from the steel tower where the nuclear weapon was exploded, showed no ill effects from their experience. Huddled in trenches a mile to the rear of the officers were 1,300 troops.

The volunteers reported they felt a jarring underground earth movement when the atomic device exploded. They encountered little heat because of their protected position, but heard a sound "like a thousand cannons going off at once."

Bothered with a small leak in your automobile tire? Think nothing of it. According to *Science Digest*, research men are now worrying about leaks so infinitesimal it would take 10,000 years to empty the contents of a pint bottle. Hydrogen and other gases can seek their way through solid glass and metals at these slow rates. These tiny leaks are sufficient to spoil vacuums used in scientific research.

Recently it has been found that helium leaked through the double glass walls housing a vacuum space in a bottle. Later, when liquid nitrogen was placed in the container, the minute quantity of helium caused the nitrogen to forth away. In a similar bottle that was not exposed to helium, the liquid nitrogen remained for a normal length of time without boiling.

It is known that a gas penetrates through a solid in three stages:

First, gas molecules strike the surface of the solid and form a thin film over it.

Next, they migrate into the material to form a solution inside the solid.

After dodging through the solid's molecules, the gas molecules enter the vacuum space.

CPO Spring Dance

IN PERSON

Claude
THORNHILL

HIS PIANO
AND HIS
ORCHESTRA

THURSDAY NIGHT, Thornhill's orchestra will play for the First Annual Spring Dance, sponsored by the Chief Petty Officers Mess (Open). Tickets sell for \$2.00 per couple. All chiefs and master sergeants of the area and their guests are invited. An auditorium show from 1900 to 2000 will entertain the patients. Dancing starts at 2100 in the gymnasium.

NH Crew Ends Intra-Play Undefeated; Seeded Tops in This Week's Tourney

Hospital Barracks' power-laden cage crew completed its NNMC intramural Basketball League campaign undefeated, and became the top seeded team in this week's single-elimination tournament by capturing two contests last week. Its victims were NDS Enlisted and Lab 19.

Playing its first game in two weeks, Lab 19's battling quintet was completely outclassed by the NH Bks. squad's torrid shooting and rugged rebounding in their tussle Thursday, Apr. 2. In winning 58-37, Hospital almost from the very onset and coasted through the fourth quarter. With Dick Strader, Joe Fant and Jim Bush leading the way, Hospital led by quarters 13-6, 33-13 and 42-24 in chalking up its ninth straight triumph. Strader had 16 markers, Fant 12 and Bush eight. Powers made 12 for the undermanned Lab 19 ball club and Swindle collected 8.

On Monday, Mar. 30, the NH Bks. courtmen squeezed past previously unbeaten NDS Enlisted 43-43, in a thrill-jammed contest that saw Dental's fast-moving five come from behind in the final minute to knot the count at 40-40 and carry the game into overtime.

Jim Poe and Jim Crabtree each sank a field goal and Dan Katt added a free throw for Hospital in the three-minute overtime to keep the winner's slate unblemished and hand Dental its initial loss in league tiffs. Jack Carrabine made two gift tosses and Rodney Shuff one for NDS in the extra period, but the Dentalmen couldn't connect from the floor.

After being out in front by quarters 12-6, 19-12 and 29-17, NH Bks. saw Dental employ a full court press and fast break to pile up 23 markers in the fourth stanza while limiting Hospital to 11.

Both teams seemed tense throughout the game, with NDS's high-scoring quintet being held well in check until the last canto by a tremendous NH defense.

Hospital's scoring was evenly distributed, Strader and Poe being high with 12 and 11 digits respectively. Carrabine, Dental's top shooter, and Shuff each hit 12 for the losers. Rangy Russ Eads of Dental was limited to seven points, far below his usual game average. Disappointed but undaunted by overtime loss two nights earlier, Dental came back to finish its regular schedule with eight wins and one loss by taking the measure of fiery Physical Medicine School 46-46, on Apr. 1.

Coach Erwin's speedy Dental crew held the advantage 17-16, 33-26, and 46-34 by periods, but Phys. Med. never quit battling and closed the gap to six points midway through the fourth session. It was a rough, bitterly-waged affair, with 37 personal fouls being called, 10 of them on NDS.

Carrabine was high for the fray with 22 counters. Lee Graham added 11 for Dental and Eugene Demerest nine. Bill Rivers meshed 4 for Phys. Med. School before falling out in the final frame and Dick Edmonds had 12.

The loss gave Phys. Med. a 4-3 record going into its final two games of the campaign against NNMC and Lab 19.

Pharmacy School wound up its campaign with a 4-5 slate by piling up 18 points in the fourth quarter to squash Center Command (NNMC), 46-29. NNMC led 9-7 at the quarter and lagged only 18-14 at halftime and 28-22 at the three-quarter mark, but Pharmacy ran the losers ragged in the last eight minutes.

Jim Bradshaw was outstanding for the victors, notching 18 points and turning in a superb floor game. John Miller hit 11 for Pharm. School; Joe Allgood topped NNMC with 11 counters.

Phys. Med. School staged a gar-son finish to outlast Pharm. School, 44-36, on Mar. 27, after trailing for the first three stanzas. The losers held a 22-17 edge at halftime, but a poor final frame proved their downfall.

Jim Greer starred for Phys. Med. with 19 markers. Jim Desossiers collected 8. For Pharmacy, Bradshaw totaled 11 and Miller 10.

April 13, 1953

Intramural, Varsity Take to Diamonds Next Month for Play

Announcement last week by the Middle Atlantic Inter-Service Athletic Conference (MAISAC) that its 1953 softball season will begin on Tuesday, May 26, caused NNMC's Special Services Division to hurry ahead with plans for both the start of varsity tryouts and the station intramural softball league.

At the time this story was written, nothing definite had yet been decided regarding who would be the officer-in-charge and assistant coaches of the Medical Center varsity nine, but official word on that matter was expected at any time.

It is anticipated that tryouts for the NNMC squad will get under way on Monday, Apr. 20, in preparation for the coming MAISAC campaign. At present only five clubs are entered in that circuit, but it is hoped that others will be added during the next month.

Chief Jay Bell (who will be a member of the softball varsity coaching staff) wishes to urge all interested participants to meet with him on Diamond No. 1, Monday, Apr. 20, at 1700. In case of bad weather, candidates will meet in the gym.

Present plans call for the station intramural softball loop to begin play shortly after May 1, with action slated for two diamonds. However, the proposed rebuilding work on Diamond No. 1 still has not been undertaken.

Deadline for entries in the intramural league and date of a managers meeting will be announced in the Apr. 27 issue of the NEWS.

Commands or services expecting to have teams in this year's Medical Center league are urged to start holding intra-squad practices if they have not already done so.

NNMC personnel interested in trying for a berth on the varsity squad should begin getting in shape for the coming season now. Lt. Atkinson, Special Services Officer, has stated that definite arrangements for both intramural and varsity softball competition will be announced as soon as possible.

Up, Up, and Away

FORMING A HUMAN LADDER for possession of the ball in the recent tilt between the undefeated intramural teams of NNMC—NDS Enlisted and Naval Hospital Barracks—is Richard J. Strader, HN, Russ Eads, DT3, and, with the ball, John Gregory, HN.

Intramural Bowling Results . . .

Intramural Tourney Starting Tonight With Phys. Med. - NDS Enlisted Clash

Physical Medicine School's aggressive quintet tackles the fast-breaking NDS Enlisted courtmen today at 1700 on the NNMC floor, in a first round game of this week's single-elimination tournament that will decide the 1953 intramural basketball championship of the Naval Medical Center.

Tomorrow at 1700 undefeated NH Barracks battles NMRI in the other opening round contest. Winners of the two tilts clash Wednesday night, at 1900 for the station cage crown, with the two losers colliding at 1700 that evening for consolation honors.

Center Splits Tilt With D. C. All-Stars

A combination of NNMC varsity and intramural cagers split even in two recent Sunday afternoon contests with Nick Panella's highly-regarded Scholastic All-Stars from Wash., D. C. The "NNMC Medicos" upset the All-Stars, 63-57, on Mar. 29 after losing 83-54 a week earlier.

In the Mar. 29 triumph, Jay Bell's NNMC squad overcame a 30-26 halftime disadvantage with a 26-point third period to go ahead, 52-41. After increasing its lead to 63-49 with four minutes to go, NNMC beat off a furious last-ditch rally to hand the All-Stars their first setback in 12 tussles.

For the Medical Center, Sy Barton had 14 markers, Cecil Mitchell 13, Jim Mincey 12, and Jack Carrabine and Noel Schilling 10 each. The D. C. five had proved entirely too strong for NNMC on Mar. 22 but it was a totally different story the following Sunday.

Carrabine, who played on the NNMC varsity early in the season and later starred for NDS Enlisted's fine intramural club, recently was transferred to Norfolk, Va. for duty.

His NDS teammate Paul Lee left at the same time for duty in Brooklyn, N. Y. and another Dental Enlisted performer, David Jacobs, went to Parris Island, S. C. Marine Corps Recruit Depot.

Photo-Finish End Develops in Bowling With 5 Teams Vying

As intra-bowling goes into the final weeks of play, five teams stand in contention for first position. As of the end of the 13th week, two local fives, Maplebusters and NMS Lab, each with a 35-17 record, are tied for top spot while three teams, NSHA Staff, NH Doctors and the CPO Club, are within three points of the top of the ladder.

NMS Lab made a clean sweep over the See Mats last week to move into a tie for first position.

Third place NSHA Staff grabbed two points from Pharmacy School but lost total pins for the match, due to a 783 middle game by Miller's pillpushers.

Fourth place Naval Hospital Doctors, lead by McClintan's 518, won three points from Medical School Officers, placing the doctors two points out of first.

Fifth place CPO Club pinned together three 800 games for 3½ points to drop the Dental Interns. Interns managed to tie up the first game.

Operating Room rolled over NMRI for an easy win lead by Weisskopf with a 508 game placing the O. R. troop in seventh place and in mathematical chance for first.

NMRI Gold took an easy three-point take from Lab 19 in spite of Koenig's 237, high game of the week.

NSHA Class F won by a handicap two out of three and total pins to take three points from Optometry.

Overheard: "You never kiss me anymore. Why can't you be like the man next door?"

Lessons to Patients By Local Golf Pro

As in previous years, Bill Downing, local golf pro, will offer a weekly clinic for beginner golfing patients. These lessons, which will probably be given on Tuesdays, are free for all patients hospitalized here at NNMC.

There is no green fee for patients and clubs and carts can be

Station personnel are hereby reminded that the regular golf pass (yellow) must be presented to use the local greens. To obtain this pass for yourself or your dependents, call Ext. 672.

rented here on the station at the golf shop. The charge for clubs is 25 cents and 20 cents for carts.

Also, the shop offers low price equipment including balls, clubs, golf clothes and other accessories.

Downing New Chairman For PGA Hospital Plan

Bill Downing, the local linkster pro, has been selected co-chairman of the work rehabilitation program for military hospitals in the Middle Atlantic area by the Middle Atlantic Professional Golfers Association's president, Al Houghton.

As a part of his new duties, Bill will attempt to arrange to bring well known circuit golfers and nearby course professionals to military hospitals including NNMC for guest appearances.

Bill was named co-chairman at the recent meeting of the PGA on Mar. 23.

Center Capers

by Tony

Last Will and Testament of W.W.:
To Conran: two quarts of Fleets... **Agosti:** a Chinese transfer...
Kelly: a sharper lawnmower for his next haircut... **Porter:** a recipe book...
Rose: AM and PM Daily Bulletin... **Del Carmen:** another USO...
Hoak: more children's matinees at the Hiser... **Myers:** two more years at NNMC...
Schubert: 100 rooters of all sizes and descriptions...
Luber: one-way ticket to Japan... **Demon Denny:** tool chest...
Cramer: six men and a small boy to push his new car... **Brown:** a Cadillac...
Brogdon: elevator shoes and a reducing course... **E. Green:** form-fitting dungarees...
Melvin: a police whistle and a new log...
Alligood: bigger handicaps for other bowling teams... **Almy:** a parachute jump...
O'Keefe: a flagstone walk... **Aschim:** a magic wand to make jumpers larger...
Davis: an extension... **Salchert:** two tickets to a spaghetti dinner...
Olson: an autographed picture of Jones and a crow...
Mouse: a bottle of A. wine... **Whitlock:** one round in the seventies for 18...
Wilkes: a Bethesda Claridge Bar... **Hilt:** home delivery for ice cream and another S.S. vehicle...
Rautio: half interest in Captain Tom's...
Cole Slaw: 40 acres in the country... **Harris:** one vote for mayor of Georgetown...
Gallaher: a long-sleeve dungaree shirt...
Satchel: a voltmeter for his worm machine... **Ross:** a Crosley chassis for his new motor...
Everson: a lumber yard... **Green:** one 12-hour pass...
DeVice: a chance to give beginner swimming lessons...
Joe D.: more phone calls on 672 and a better percentage of free cigarettes...
Wild Bill: less Walkers in the Navy...
Dunlop: return to port and starboard liberty...
Woody: less car trouble between the hours 2100 and 0630.

Navy Belles

by George

Just Around Our House: We have new furniture for downstairs. Looks beautiful. Now all we need is a new trophy table for the bowling award our keggers won. Three loud and long cheers for Capt. Ward, Scotty, Godfrey and Throop.

Our bride of the month is Godfrey who went on vacation and returned with a husband.

The social committee is planning a party but at this point even the committee doesn't know what kind... let you know next time.

Peggie Brock is going home to be a housewife. Good luck from all of us. "Al" Sharp is our new house mother. The girls have turned in their basketball shorts for softball dungarees for the coming season.

Brad has gone to sunny California for a vacation... Also Kathryn Yuhas, who went down West Virginia way to visit.

Downstairs, the girls are studying: Lab in one corner and Physical Medicine in another with piano and TV taking up the other two. Never did find anything for the middle of the floor.

"Come again, leave again" Penny has gone to Norfolk for duty. Good luck. The weather is getting nice and will soon be time for outings and stick hunting, by George.

Med School Daze

by Cracky

Spring has really sprung all over the compound. We've even got a touch of that old fever a little early this year. Lab 20 celebrated the event, as well as the fact that half of them had finally finished chemistry, at a picnic two weeks ago. The proverbial good time was had by all, and a few of them, including their instructors, wound up in the drink (river, that is).

Sabados has almost convinced us to join him on that diet he's been following. Nine pounds gone in the first week, but we can't see how you can live on 800 calories a day, Pete.

McClintic has finally found a substitute for that Saki he'd become so used to. It's a wine called Scuppennong (pardon us, if it's spelled wrong). Pretty good, even when mixed with beer, but beware of the morning after, by Cracky.

We've been warned to watch out for those RIT students. Degenhardt tells us that they're liable to steal your pants at the least provocation. How can you make such an accusation, George?

Welcome aboard to the new staff arrival to the Tissue Bank from USNH, W. A. Hawkins, HM3. General Chemistry's new wheel is that bronzed HMC Stock, recent arrival from FEDCU-2. Must have been all liberty and no work on the Whidbey, eh Chief?

Well, the cherry blossoms are out in all their glory, and we leave you with the pleasant reminder that it won't be long now before we have our own rose blossoms. We should have a Rose Festival, by Cracky.

What to See Around D. C.

MONDAY, Apr. 13—Opening Baseball, New York vs. Washington, Griffith Stadium, 1500.

—Concert, The Chamber Orchestra, Paul Olefsky, Conductor, Phillips Gallery, 2030.

TUESDAY, Apr. 14—Concert, Philadelphia Symphony Orchestra, Constitution Hall, 2030.

WEDNESDAY, Apr. 15—All-University Follies, Variety Show, George Washington University, Lisner Auditorium, 2030.

—Baseball, New York vs. Washington, Griffith Stadium, 1500.

SATURDAY, Apr. 18—Racing, Laurel, Md., to May 2.
—Baseball, Boston vs. Washington, Griffith Stadium, 2030; also Apr. 19, 20 at 1430.

SUNDAY, Apr. 19—Concert, Washington-Lee Choir, National Gallery of Art, 2000.

MONDAY, Apr. 20—Shrine Circus, Uline Arena, through Apr. 26. Seven evening and six matinee performances.

TUESDAY, Apr. 21—Concert, American University Chamber Music Series, Clendenen Hall, American University, 2030.

WEDNESDAY, Apr. 22—"Much Ado About Nothing," Mt. Vernon Players, 900 Massachusetts Ave., 2030, through May 9.

SUNDAY, Apr. 26—Superattractions, National Guard Armory, 2030.

NNMC Lady Keglers Face Ft. Myer Hqts. This Thursday There

The newly-formed NNMC women's varsity bowling squad will face their third league opponents this Thursday night when they travel to Ft. Myer to challenge the Wac Headquarters Company there.

Making their first appearance on Apr. 2, the Bethesda five split four points with Quarters "K." Lt. Alice Crowell took both high average and high-score honors for NNMC with a high 168 and a three-game average of 145.

Last week, the quintet dropped all four points to the Ft. Myer Wacs here. Lt. Lucille Beumer copied the highest score for Bethesda with a 145 while Miss Crowell's evening average of 128 was the highest NNMC could muster.

Team members, which include both nurses and Wacs, were selected on the basis of high averages maintained during the recent intramural league here.

The five varsity members are: Veronica Conaway, HMI, Lt. Alfield Forbord, Lt. Alice Crowell, Ltj. Nora Dixon and team captain Lt. Katherine Lopartz.

Substitutes are: Ruth Puffer, DKC, Lt. Lucille Beumer and Lt. Marita Petit.

Slow Burn

OL' SOL has a legitimate excuse to send a few rays tearing through a nasty beach umbrella held by TV actress Lucille Knoch. Nobody possessing Miss Knoch's equipment should be permitted to hide under an umbrella... it ain't decent!

NNMC's DeVice Collects 31 Tournery Points While Pax River Drops Both Area Games

Patuxent River, Md. Naval Air Test Center failed to win a game in the recent Navy Eastern Area Basketball Tournament at Newport, but NATC did give the eventual runner-up team from COM 8 a battle in the first round.

With NNMC's Ron DeVice racking up 22 points and playing the tire contest, Pax River's augmented squad led the smooth-working team, Okla. five (COM 8) by five points with less than three minutes remaining. Then a trio of bad passes by an excited NATC performer opened the gates for the Oklahomans, who rallied fiercely to surge ahead and post a 78-69 triumph.

Norman went on to upset powerful Great Lakes NTC by one point in a later round of the double-elimination tourney. That was the Lakes' only loss and the Blue-jackets, led by former Purdue ace Carl McNulty, came back to whip the Sooner State quintet, 85-64, in the final round.

Great Lakes' high-scoring outfit played host to the recent All-Navy Basketball Tournament. The winner of the Navy cage finals goes on to the All-Service court tourney at Omaha, Neb. this week.

Niagara NAS, N.Y., which made a good showing in the All-Eastern Finals, downed Pax River by 18 points in the second round of that tournament to eliminate the PRNC-SRNC champions from the running.

Playing only half the game, DeVice scored nine points, giving him a total of 31 for two tilts. He led NATC in the free throw department by making 15 of 16 attempted.

Big Hank Mazul, Pax River pivotman, did well in the All-Eastern meet, netting 20 markers in one fray and 24 in the other. Speedy Don Johnson, like DeVice a native of Kentucky, dumped in nine against Norman and 19 in the Niagara affair. He went all the way in the latter game.

Rube Huff, outstanding center from Naval Receiving Station, Wash., D. C., was hampered by an

ankle injury suffered in the PRNC-SRNC tournament a week earlier and saw only limited action in the Newport cage carnival.

On his return to the Medical Center following the All-Eastern playoffs, DeVice stated that among the best courtmen participating in the week-long tourney at Newport were McNulty of Great Lakes, Kitchens, former TCU star who performed for Norman in the tournament, and Dempsey of Bridge NTC.

The NNMC varsity's outstanding performer also said that Patuxent River's augmented squad had a fine time during its stay at Newport and "we ate like kings." DeVice added, "Our only regret was that we weren't able to do better but the competition up there was mighty tough."

My Aching Back

Maybe you heard about the patient who, while seeing a doctor began complaining about his financial problems, in-law work, and other difficulties. After finishing, he got up to leave.

The NNMC intern reminded the lad that he hadn't been examined yet for his illness.

The patient's reply was: "After thinking my problems over, I wonder if it is worthwhile being cured."

A gentleman is a man who holds the door open for his wife while she carries in the groceries.

"It's time for chow; I'll be back at one!"

Capt. Hogan Greets Field Marshal

FIELD MARSHAL MONTGOMERY OF ALAMEIN visits with Capt. B. Hogan just prior to departing for the White House where he was the guest of President Eisenhower. He came to NNMC to visit Sir William Elliott, Air Chief Marshal, R. A. F., who is a patient on T-16. Look-on is Lt. William Jacobs, Sir William's personal aide.

New M.D. and D.D.S. Draft Law Proposed; Defense Department Revises Service Periods

A new Doctors draft plan is in the offing. The Defense Department's newly proposed law would continue authority to draft doctors to fill the needs of the services through June 30, 1955, and would make some major changes in defining service obligations of some medical personnel.

The present categories one and two would remain unchanged, but category three, which includes all doctors who have not had previous service, but got their education without help, has been placed in a new order.

The services have to call up category three doctors, the first will be the youngest, with an age limit of 31 years.

Those doctors and dentists who are drafted will not receive the 20 a month incentive pay for the first two years of their service.

The new bill provides for the commissioning and drafting of dentists and also the giving of commissions commensurate with training and experience.

Category four of the new bill would include all those with previous service. Exempted from call are those who have had 12 months more of service since the start of the Korean conflict. This includes either medical or non-medical service.

New Insignia

A somewhat newly designed insignia for Submarine Medical Officers is in the offing. It replaces the stylized Medical Corps device with the center oval with the standard Medical Corps device.

Navy Will Oppose Strauss Suggestion To Banish Sea Pay

The Navy is expected to protest the proposed complete elimination of sea pay, but will go along pretty much with the rest of the suggestions of the Strauss committee. (These suggestions were outlined in the Apr. 13 issue of the NEWS.)

It is pointed out the rates such as sonarman, boilerman, etc., are mostly sea rates and the land duty for personnel in these rates is rather limited.

The Navy feels, however, that the committee is on the right track, in suggesting that sea pay be eliminated for residents of possessions such as Hawaii, who are on duty in their own territory.

The service is in favor of eliminating foreign pay in the cases where married men have their families overseas with them, but feels it is unfair to those married men who must leave their families here in the States not to get the additional pay.

It will take legislative action to bring most of the changes about, but the Pentagon raises the question as to whether some of the restrictions may be put into effect without the action of Congress.

The Defense Department has asked the services to report by May 15 what they think of the proposed changes and to include in the report any suggestions they think should be put into effect.

Defense Secretary Wilson had forwarded the report without any comments of his own. The armed services committee of the Senate will give formal study to what the commission said in the near future.

Advancement Manual Anticipated in June

All those planning to go up for rate in August should watch for the new Manual of Qualifications for Advancement in Rating which is expected to be in the personnel offices some time in June.

According to BuPers Notice 1418, dated Mar. 27, the coming exams were based on the military requirements and professional qualifications set forth in this manual.

Since the exams were made up while the new manual was still a rough draft, a few of the later changes in it will not be reflected in the tests. However, any questions which do appear in the exams, and which are not covered in the manual will be disregarded in the scoring.

At present the manual is in the process of printing, but should be ready for distribution by June.

Changes in performance tests required (formerly called operational tests) should be particularly noted.

Post-Graduate Course

A postgraduate course in hospital administration for government medical officials convened here Apr. 13. Thirty-three enrolled in the three-week course.

The program, called the Inter-Agency Institute for Federal Hospital Administrators, is under the direction of Dr. Linus A. Zink, manager of Mt. Alto Hospital.

Bob Hope Here

Bob Hope will bring his troupe (including Marilyn Maxwell, Jack Hope and John Pollock) to the NNMC stage Wednesday, May 6. The hour-long auditorium show (portions of which will be recorded) will start at 1300.

Admission is free, but tickets, available at the Special Services Office, will be required.

Election of 'Miss and Mr. NNMC' Will Net Funds for Navy Relief

An election to select Miss and Mr. NNMC gets underway this week. In accordance with NNMC Notice 1747, each command selected a male and female enlisted staff or student contestant last week and submitted the names to the Commanding Officer, NNMC.

A picture and brief biography of each contestant will be attached to a bottle which will be placed outside the Navy Exchange restaurant. Anyone is eligible to vote—officers, enlisted staff and students, patients, civilians and visitors.

Each vote will cost one cent with all proceeds from the election going to Navy Relief.

Navy Requests EMs For Recruiting Duty

The Navy is asking for requests from enlisted men and women for assignment to recruiting duty if they are eligible for shore duty, the Bureau of Naval Personnel has announced.

The requests are desired from first class and chief petty officers, the Navy said, but second and third class yeomen and personnelmen and second class hospital corpsmen also will be considered.

Education, personality, poise, and ability as a correspondent are essential for this duty, the Navy stated. A minimum grade of 50 on the GCT is necessary for the applicant to be considered.

Enlisted women with second, first and chief petty officer rates are also asked to apply for recruiting duty.

All applicants must take action to have their names removed from other shore duty eligibility lists prior to or concurrently with submitting their request for recruiting duty.—(AFPS)

All Hands Explains Final Multiple Which Determines Rate Advancements

With the announcements of advancement in rates expected any day as this paper went to press, perhaps you might be interested in knowing just how you receive that all-important multiple. Here is the explanation carried in the last issue of All Hands:

The final multiple is figured by taking the examination score (maximum of 80.00) and to this score is added credits for service and awards based on the following factors:

Total active service in years (not exceeding 20 years, score 20.00)
Total service in pay grade in years (not exceeding five years, score 5.00)

Awards credit is limited to a maximum of 5.00.

In computing credit for total service in years, continuous service is not required. Hence, broken service can be counted. Service prior to reduction in rating, for any reason, may also be counted in all computations. Compute your time-in-service and time-in-rate in months and then convert to years with the months carried to two decimal places. For example: two years, six months, equals 2.50; two years nine months, equals 2.75.

Credit for each award, to the maximum of 5.00 allowed, may be claimed toward the multiple as follows:

5.00 for each Medal of Honor; 4.00 for each Navy Cross, Distinguished Service Cross (Army), Distinguished Service Medal, Silver Star Medal, Legion of Merit, and Distinguished Flying Cross; 3.00 for each Navy and Marine Corps Medal, Soldiers Medal (Army), Bronze Star Medal, Gold Life Saving Medal and Silver Life Saving Medal.

Also: 2.00 for each Commendation Ribbon, Presidential Unit Citation (only if entitled to wear with star), Distinguished Unit Badge (Army), Navy Unit Commendation, and Letter of Commendation (without authority to wear Commendation Ribbon) addressed personally to individual from President, Secretary of Defense, Secretary of the Navy, or Chief of Naval Operations; and 1.00 for each Purple Heart and Navy Good Conduct Medal and each clasp earned.

Barracks 112 Has 'Quacks A-Plenty'; Following NavRegs is Easy for Duck

by J. F. Melvin, HMI

The latest addition on the roster of personnel occupying spaces in building 112 is an animated, web-footed ball of fur chosen by the staff corpsmen as their mascot.

This fugitive from the pin feather clan, as yet unnamed, is enjoying all of the privileges afforded the troops quartered within the barracks boundaries.

Rising at the first blast of the early morning reveille, the duckling marches into the shower room, waits for someone to turn on the water, and proceeds to bathe in luxury.

Shaking the acqua from its feathers, it takes over supervision of the cleaning details until time for muster. Taking his place in the formation, the duckling displays a relaxed stance, an attentive gaze, and what may seem to many a perfect understanding of NavRegs.

Dogging the footsteps of L. R. Almy, HM3, the duckling accompanies him towards building 14 where they take care of routine matters until time to secure.

Back to building 112, a rest, a view of the latest TV offerings, and finally to a bed consisting of an old shoe box, several rags for warmth, and the combined protection of the building 112 gang, ends the day for our mascot.

Medicine & Science

U. of Pittsburgh Develops Flu Vaccine; Details Disclosed on New Guided Missile

A new influenza vaccine which promises to give immunity for more than two years against all strains of flu was disclosed last month.

The new vaccine, developed at the University of Pittsburgh, was found by the same research team, led by Dr. Jonas E. Salk, that recently announced a promising vaccine against all three types of polio.

Mineral oil is the base of both the polio and flu vaccines. The vaccine in this base is 10 to 32 times more powerful than in water.

In emulsified mineral oil vaccine, however, the maximum effect of immunity is evident four months after inoculation. In a water base this peak is arrived at within six weeks of injection.

Details of a guided missile, designed to be launched from submarines, surface ships and shore bases, have been released by the Defense Department.

The new missile, dubbed the "Regulus," was developed by the Chance Vought Aircraft Corporation under the sponsorship of the Navy Bureau of Aeronautics.

Launching equipment for the "Regulus" can be installed in a short time and at a relatively low cost on the various type ships, with only slight modifications of the ship itself.

The U. S. submarine Tunny, recently recommissioned on the West Coast, has been specifically modified to launch the "Regulus."

One of the more important features of the new missile is the tricycle landing gear on test and training versions enabling it to be recovered upon completion of a test flight. The Defense Department points out that this will reduce from 200 to 30 the number of missile needed to complete tests.

The missile may be recovered by the use of a parachute-type brake on an average size runway.

In appearance, the three-foot "Regulus" resembles the conventional swept-wing jet fighter.—(AFPS)

Easter Wedding

SMILING HAPPILY, Mr. and Mrs. Raymond D. Brand leave the main building immediately after their wedding in the Catholic chapel, Apr. 5. Lt. Brand, SC, USN, is stationed at Anacostia Receiving Station. The bride, the former Lt. Agnes B. Poisson, NC, USN, is staff on wards 136 and 137.

Cdr. Wilde is Named New Wave Director Taking Over June 1

Cdr. Louise Kathleen (Billie) Wilde of Concord, N. Y. is taking over for Capt. Joy Bright Hancock, present director of the WAVES, on June 1, 1953.

Cdr. Wilde takes office on May 15, but will not assume official duties until June 1. The directorship carries with it automatic promotion to the rank of captain.

She has been assigned to the staff of Commander, Western Sea Frontier headquarters in San Francisco since June 1952. For four years prior to that she was administrative assistant to Capt. Hancock.

After attending the WAVES Midshipman School in Northampton, Mass., she was appointed as Lt (jg), and assigned to BuPers.

From Washington she was transferred to Pearl Harbor where she was Director, Women's Reserve, 14th Naval District. For her 'exceptionally meritorious service' in Pearl Harbor she was awarded the Bronze Star.

For her wartime work in BuPers, she received a letter of commendation from the secretary of the Navy.

A graduate of Mount Holyoke

Cdr. Louise K. Wilde

College, Conn., she received her masters degree from Columbia University and prior to entering the WAVES she served as assistant to the President of Rockford College, Rockford, Ill.

Congregation Beth El of Montgomery County will hold services every Friday night at 8:30 P.M. and Saturday morning at 10:00 A.M. in the Pook's Hill Auditorium, 3 Pook's Hill Rd. The services will be conducted by Rabbi Martin Kessler.

The services of Rabbi Harry Kaufman, representing the Jewish Welfare Board, are available to all Jewish Personnel and Patients at the National Naval Medical Center. Rabbi Kaufman may be reached by calling the Chaplain's Office, Ext. 324, or by call direct—Office: RA.

Visiting Military Women from Denmark Observe Role of Servicewomen Here

REPRESENTING DENMARK'S WOMEN in service, Capt. Elna Kjaer (left) and Col. Gerda Bruun (third from left) are greeted by Capt. Winnie Gibson, Director of the Nurse Corps, and accompanied the two.

"Our women can match anyone in spirit," said Col. Gerda Bruun of the Danish Women's Service Corps on her visit here Apr. 13. The group had just been commenting on how much more advanced the women's services were in the U. S.

What she referred to, was the fact that in Denmark the women's military organizations are strictly voluntary—the women train on weekends, evenings and without pay.

Col. Bruun and Capt. Elna Kjaer of Denmark's navy, were here observing the servicewomen at work at NNM. This was part of their month's tour of similar Army, Navy and Air Force bases in the U. S.

The Denmark's Lottekorps, (army) is the largest (approximately 7,000) of the women's military groups in Denmark. The name is derived from a story of a Finnish woman named Lotte who accompanied her husband to battle over 200 years ago.

Second in size, the navy numbers near 1,000 and is called Kvindelige Marinere, often abbreviated KM. Kvindelige means "woman" in Danish. This word appears again in the newly-formed air force called, Kindelige Flyvekorps.

As in the U. S., the minimum age requirement for women is 18, but unlike our services, there is no maximum. Also, there are no restrictions for married women or mothers.

The services make arrangements to care for children, while the mothers train. Except for a small nucleus of full-time officers, who receive half pay, the women train only in their spare time.

Col. Bruun is married to a cap-

'Post Mail Correctly' Says Local Postal Dept.

If you want to make sure your mail gets to its destination, stick it in, on, or under the post office after working hours. The NNM Postal Department announced this month that it will be responsible for improperly placed mail.

There are chutes on every floor near the tower elevators where U. S. mail boxes located on the grounds of the station.

The post office is closed 1600 to 0900 on weekdays, 0930 on Saturday and all day Sunday.

The Chaplain's Corner

Easter Aftermath

by Chaplain D. J. Kosky

Easter is over, but we are still in the Easter cycle and the question is, "What is the aftermath of Christ's glorious Resurrection?" His Resurrection is a pledge of our eternal glory. This is the greatest and foremost Easter gift from Christ to us.

What will be our response? He has given us a new, supernatural life. We are reborn in Him, raised from the tomb of sin to a glorious existence as adopted children of God. Surely our Divine sonship imposes a responsibility upon us to be imitators of Jesus, our elder Brother. Christ suffered and died for us, we in turn must be conscious of our obligations to suffer and die with Him to the world.

Conscious then of our exalted dignity, and full of joyous hope at the prospect of our heavenly reward, assured to us by the Resurrection of our Saviour, let us set to work to carry out energetically the program lined for all in the Easter theme: "If you have risen with Christ, seek things that are above!"

How Well Do You Know Your Station?

Getting acquainted with the station is a problem for any new member of NNMC. After a few days he learns to find his way to the mess

hall and Ship's Service and back to the barracks without getting lost. Inside of a few weeks he is usually familiar with all the offices and buildings which he finds it necessary to frequent.

However, we're wondering just how well acquainted the "old timers" are with the grounds of the station. Glance at the pictures on this page without reading the captions and see how many you are able to recognize. Chances are you'll miss one or two.

We became curious as to what the buildings at the end of the road running near Barracks 142 were used for. We also wondered about the two-story building near Ward 104. We began to look into the situation and we discovered many places and activities on the station that we didn't know existed.

Augmented by two photographers from NMS Medical Photography, we made the rounds again. Here are the results.

AN EYECATCHING DISPLAY OF COLOR can be found to the rear of NNMC in the NNMC hot houses. In the three large and the one small glass-enclosed buildings can be found a profuse offering of snap dragons, stalks, begonias, carnations, and poinsettias in large numbers plus hundreds of other flora for the base. In the above picture Mr. David R. Ayers, leading man gardener, is trimming some of the carnations in Building 25.

WANT TO HAVE YOUR HEAT MEASURED? Well that is what they will be doing here in the near future. This building will house the Human Calorimeter which was invented by Drs. T. H. Benzinger and C. Kitzinger of the NMRI staff. This machine is for research on heat and temperature as it relates to the human body. It is the first of its kind to be installed in this country and it is expected to be in operation in the late fall.

THIS WILL GIVE YOU A SHOCK. This building extending off Ward 104 houses one of the largest and most complicated pieces of electronic equipment at NNMC—the Van de Graaf supervoltage X-ray and cathode generator (on right). The beam of this highly controllable machine has an intensity greater than twice the total available supply of radium in the world. The building, a two-story structure, has concrete walls 24 inches thick at the base and a chamber five feet below ground level to prevent harmful leakage of radiation.

CARE TO TAKE A SWIM? NMRI's open tank located in Bldg. 119 has been used for a variety of medical tests ranging from a project determining the specific gravity of man by underwater weighing to the medical evaluation of underwater swimming gear. The tank can be filled to a depth of 12 feet and has windows located on the sides and near the bottom to study performances during the tests. The tank is also steam heated allowing results under various temperatures. Checking the tank is a NMRI seaman, H. Ray.

LOCATED TO THE REAR OF NMRI is a area strictly for the birds—the chicken coop. Chickens are an important item for NMRI primarily in influenza tests. The birds, not susceptible to the attacks of the disease, can be utilized as to the type of influenza by blood tests of the produced anti-serum. These chickens are hatched and raised at NMRI. The Institute also uses a total of 40 dozen eggs per week for NMRI work.

STONE WALLS DO NOT A PRISON MAKE, NOR IRON BARS A PRISON, or so the poets say, but this cell, one of the three in the NNMC building, which is now being used by Navy Exchange laundry for storage, was formerly manned and ready for use. In 1945, when a marine unit was stationed at NNMC, part of its duties was to stand watch the brig.

NMRI's Capps Has Interesting Duty In Research on Hoof and Mouth Disease

For some unusual duty, Columbia, South America is certainly tops. Chief Worth I. Capps, presently assisting Dr. Kingston in the Virology Department of NMRI, has seen much duty there and ought to know.

During Capps' tour of duty with NMRI he was assigned as assistant to Dr. Eric Traub, the noted virologist, and spent considerable time in Columbia, trying to find preventive measures against the dreaded Hoof and Mouth disease.

Since research on Hoof and Mouth disease is banned here in the United States, a trek to South America, where the disease is very prevalent, was undertaken.

After much effort he finally managed to adapt one strain of the virus of the dread disease to egg embryos, but returned to the United States shortly thereafter and did not continue with the research.

Because of his extensive knowledge of the work, Capps was later given duty again in Columbia. This time he was on loan from the Navy to the Food and Agriculture De-

CHIEF CAPPS is in the process of running a hemoagglutination inhibition test.

partment of the United Nations, assigned to Columbia.

Capps' job was to train the personnel in the Columbia Department of Agriculture and any other interested people in the then known methods of diagnosis and control of the disease.

According to Chief Capps, Columbia is a wonderful place to have duty. "They treat you just like civilians, and the work is very interesting too."

AFRS Platter Chatter

Afternoon Rhythms Features Ann Gibson; Spotlights Dizzy Gillespie Next Monday

Ann Gibson, born in Middletown, Ohio, in 1925, devoted most of her school days at Middletown High to singing with local dance bands. Her father, a foreman in a steel mill, objected to her dreams of a career; at 17, after she had had her own radio show over WHIO in Dayton for a year, he persuaded her to give up singing. In 1946 Ann headed for New York City to look after her kid sister who was studying dramatics. Shortly after, she married a "private eye," Charles Criss.

After her marriage Ann decided to take up her first love again and made her debut at the Penthouse Club in Manhattan in 1949 where she was discovered by the CAPITOL execs. Ann is brunette, has bright blue eyes, stands 5 ft. 4 in. and weighs 120 lbs. . . see if you don't agree with Capitol execs when you hear Ann vocalize today.

DISCOVERY Records is proud to present Dizzy Gillespie, as soloist, with the Johnny Richards Orchestra in their first appearance together under the Discovery banner.

Generally, behind any important piece of art there is a strong desire to do something good and to tell a story. Johnny and Dizzy understood each other as creators and have long wanted to interpret through one another.

The songs were picked to present Dizzy in various moods. Notice how each composition has a different approach, giving Dizzy opportunity for much colorful expression, and how the excellent woodwind section adds much beauty to the overall picture. Next Monday, on the "Afternoon Rhythms" portion of our show, especially listen to the death of feeling in Dizzy's and Johnny's moving interpretation of "Alone Together" from the stage show "Flying Colors."

AFRS Schedule—Channel C—Monday through Friday—1300 to 1345
Apr. 27—1300—Afternoon Rhythms; 1330 Fiesta Time
Apr. 28—1300—Music for Moderns; Hill Billy Hit Parade
Apr. 29—1300—DOUGLAS OF THE WORLD (Double Trouble)—1330—Pops Concert

Apr. 30—1300—Concert Hall; 1330 Sports Program
May 1—1300—SECRET MISSION (The Fortress); 1330—Musical Salute
May 4—1300—Afternoon Rhythms; 1330 Fiesta Time
May 5—1300—Music for Moderns; Hill Billy Hit Parade
May 6—1300—DOUGLAS OF THE WORLD (The Terrorists); 1330—Pops Concert

May 7—1300—Concert Hall; 1330 Sports Program
May 8—1300—SECRET MISSION (The Pact); 1330—Musical Salute

Any Resemblance To Common Sense Is Coincidental

If you ever have occasion to talk with Betty Ward, HM2 of NH's X-ray Department, and she mentions double petunia, don't get trapped into asking what it is. We did. Here's the answer we received:

"A petunia is like a begonia. Begonia is a kind of meat sausage. A sausage and battery is a crime. Monkeys crime trees. Trees a crowd. The rooster crowd in the morning and made an awful noise. A noise is on your face like your ears and eyes. Eyes are opposite from nay. Horses nay. Horses have colts. If you go to bed at night with a colt, you'll get up with **DOUBLE PETUNIA!!**"

While we were still trying to unravel this bit of logical nonsense, we were hit squarely between the eyes with a verbose explanation of why fire engines are red:

"A fire engine is a truck. It takes two people to truck. Two people have four feet. Four feet equals forty-eight inches. There are twelve inches in a standard ruler. Queen Mary was a ruler. Queen Mary is a ship. Ships sail the seas. The seas have fish. Fish have fins. The Finns fought the Russians. Russians are Red. Fire engines are always rushin'. Therefore—fire engines are red."

Help Wanted!

The Information and Education office is looking for volunteers who are qualified to teach English, mathematics or shorthand at evening classes on the station. Anyone interested should contact Lt. Wilson, I and E office, Bldg. 102.

Fair Sex Fair? -- They Still Didn't Win

SCHAKLED BY BOXING GLOVES, Ronnie DeVice appears helpless, but Boots Carlson is taking no

chances. Right: Ronnie goes up for a goal dragging Joyce Crouch and Josh Shook with him.

C. Witter of DuPont Lectures at NSHA

"The Selection, Operation and Maintenance of Office Machines" was the topic of a lecture given by Mr. Charles H. Witter to the student officers at NSHA recently.

Mr. Witter has had wide experience in production methods in industry, and office methods, systems and procedures. In his lecture, he gave particular emphasis to those office machines that have application to general office practice.

He received his Bachelor's degree in Industrial Engineering from Penn State in 1938, and his Master's degree from Purdue University in 1940.

Since then he has had extensive experience in industrial management with the Radio Corporation of America and the Curtis Publishing Co.

At the present time, Mr. Witter is with the E. I. DuPont De Nemours and Co., Newark, N. J., where he is senior consultant on office methods and equipment in the Management Engineering Section of the Engineering Department.

This lecture was made possible through the generosity of the DuPont Company.

Wacs Take 3 for 4 From Lady Keglers

The NNM women's bowling varsity took one out of four points from the Ft. Myer Headquarters Co. there on Apr. 16.

Team members Dixon, Forbord, Lopartz, Conaway and Crowell could not match the kind of kegling displayed by Chandler of Ft. Myer whose high 255 for the evening tops the league records to date.

Miss Lopartz, staff nurse from Blood Bank, was high for the Bethesda gals with 149, while Miss Dixon, NMS student, totaled a 406 for the high series of 140, 142 and 124.

Last Thursday the lady bowlers competed with the Ft. Belvoir team here. Tomorrow night they will welcome their opponents from Walter Reed and the battle will commence at 1900 in the NNM bowling alleys.

On Thursday, Apr. 7, the Bethesda squad will travel to Quantico to challenge the lady Marines.

A red corpuscle is not a Russian non-com.

Marie Wilson, of "My Friend Irma" fame, thought that a submarine was a Marine with a low IQ.

The Admiralettes Play Tricky Game But Admirals Win it Just the Same

Despite seven-to-five odds against them, and the handicap of wearing boxing gloves, the Admirals scored a 24-16 victory over to Admiralettes here in an exhibition game Friday, Apr. 10.

The seven-to-five odds arose when, in the midst of the excitement of the last half, the gals sneaked in two extra players and it was quite a time before Anama of the men's varsity noticed the "error."

Start of Softball Slated for May 12 For Feminine Nine

Women's sports coordinator Norma Schrader announced that the varsity softball nine will face its first league opponent on May 12.

With 13 teams entered, the interservice competition will consist of a single round robin. Playoffs will be scheduled only in the event of ties for the top three positions.

The season will be concluded with a picnic at which awards will be made for softball, tennis, golf and bowling.

Arlington Hall is sponsoring the tennis tournament this year, while Ft. Belvoir will handle the golf. Any women interested in either of these two sports should contact Norma Schrader at Ext. 585.

Last week softball practice began in earnest with eight members of last year's squad returning: Boots Carlson, Mary Lou Cox, Maggie McQuarrie, Joyce Crouch, Lesley Evans, Gerry Bourne, Marion Ulrich and Anna Read.

New members indicating an interest this year are: Barbara Bradford, Jocelyn Shook, Myrna Mendez, Nancy Aiken, Eleanor Gravelle, Shirley Strack, Ruth Clarkson, Pattie Childs, Marion Ackley, Claire Emmington, Margurite Edmonds, Barbara Lee, Janet Wenzling and Vivian Holdsworth.

Varsity Nine Hopefuls Have Three Weeks To Qualify for Center's MAISAC Squad

Tryouts for the NNM men's varsity softball team will continue the next three weeks, according to Chief Jay Bell of the coaching staff. He added that all personnel wishing to try out for the squad should report for practice this week without fail.

Outdoor drills began Tuesday evening, Apr. 21 and last week's workouts were devoted mainly to limbering up, calisthenics, pepper games and batting practice.

Regular infield and outfield workouts, along with periodic chalk talks, are slated to start sometime this week or next.

Daily practices will be conducted

Some might charge that this was a gross oversight of the referee (George Anama), coach of the Admiralettes, but since the referee (George Anama), coach of the Admiralettes, was obviously impartial, there are no grounds for this accusation.

The fact that the out-of-bounds balls were consistently awarded to the girls was also simply a coincidence, as George will testify.

Of course, the men resorted to foul play too. Every time forward Josh Shook prepared to score on the gals, she was surrounded by a group of laughing opponents, and usually ended up laughing instead of shooting.

Meanwhile on the bench, the Admiralette's faithful scorekeeper, "George" McElfish, was having trouble with the score board. For some reason or other, the gals were always leading, no matter how many points the men scored.

Taking up battle against the Admiralettes were Ernie Reed, Boots DeVice and Frank Anama of the Admirals. They were aided by Bush, captain of NH's intramural team, and Jim Greer, ace forward from Phys. Med.'s squad.

Challenging the men were Boots Carlson, Josh Shook, Al Shook, Nancy Aiken, Joyce Crouch, Mary Lou Cox and Lesley Evans.

With more laughs than points, the game rough and tumble through 32 minutes of unorthodox play. Asked to comment on the showing of his team, George Anama said, "My feet hurt . . . on a long court, you-know."

Wolff's Den

Editor's Note: Beginning with this issue, the NNMC NEWS will bring you each issue a sports column contributed by ace radio and television sportscaster Bob Wolff. The column will continue throughout the 1953 baseball season which got underway Apr. 13.

Sound Advice: John McGraw, the New York Giants' great manager, was as tough as they come but, according to the book "Great American Sports Humor," he was a soft touch for every grafter and panhandler in town. One day one of the characters who used to hit McGraw regularly approached him and asked, "How about slipping me a buck for coffee?"

McGraw was in a dark mood that day and turned on the brash grifter with a snarl. "A buck for a cup of coffee?" he snapped. "Are you out of your mind? That's a heck of a way to get a handout."

"Look, Mac," replied the moocher patiently, "do I tell you how to manage a ball club? Well, then, don't tell me how to panhandle!"

Gifted Player: Sportswriter Oscar Ruhl had me chuckling with this one. It concerns Johnny Evers, whose fits of rage at the umpires were always followed by remorse after the game. One day, feeling sorry

over what he had called umpire Bob Emslie, Evers asked Rabbit Maranville what to do. Maranville told him that Emslie had two daughters, and it might be nice to send them two presents. So Evers bought two baby dolls and sent them off.

Much to his surprise Emslie never said a word about the gifts. And finally Johnny broke down and asked the ump if his daughters had received the dolls.

Said Emslie: "Yes, but I'm afraid they didn't understand what you had in mind. One of my daughters is 34, and the other is 32."

Line Drives: How about the Michigan State first baseman who decided to cut baseball practice in favor of a session on the golf course? He telephoned the coach, begged off from diamond practice with a story about needing the extra time for study, and then headed for the golf course. A few hours later, the player's name was headlined in all Lansing newscasts and newspapers. He had just fired the first hole-in-one of the season. . . . Here's what broadcaster Dizzy Trout, the former pitcher had to say when a reporter asked how he got his nickname. "I got it the day I ran under an awning out in left field when it started to rain. When they revived me, I discovered the awning was just an ad painted on the brick fence. I've been 'Dizzy' ever since."

NMS Lab Takes Two Straight Matches To Cop 1953 Intramural Kegling Honors

The Med School Lab keglers made clean sweeps of their final two matches to carry off first place honors in the Center's intramural bowling league. The Lab boys led all the way in the final match over NSHA Class F.

Only three points behind the leaders, the Naval Hospital Doctors split the points in their final match with Lab 19, thanks to a sizzling center game of 871 led by Dugneaud's 204 game.

The CPO Club came through with three out of four points from the Med School Officers to move to a tie for second place with the actors.

The Maplebusters managed to win two points from Optometry to finish fourth place only one-half point ahead of NSHA Staff.

Also in the final week, NSHA Staff won three points and the match from the NDS Officers, and Operating Room took three points from NMRI Gold.

CPO Club takes the honors for rolling the highest single game and also the highest three-game series.

HMC G. K. Klaes of the NSHA See Mats team carries home high game laurels with his beautiful 257 game rolled back in February.

HMI John Miller of the Pharmacy School had the highest individual three-game series of the season with his 645 aggregate.

Final Bowling Results . . .

Final standings of the NNMC Intramural Bowling League are:

Team	Won	Lost	Pct.
NMS Lab	42	18	.700
NH Doctors	39	21	.650
CPO Club	39	21	.650
Maplebusters	38	22	.633
NSHA Staff	37½	22½	.625
Operating Room	35	25	.583
NDS Officers	31½	28½	.475
Optometry	28½	31½	.475
Dental Interns	28½	31½	.475
See Mats	28	32	.467
Pharmacy School	28	32	.467
NMRI Gold	27	33	.450
Lab 19	25½	34½	.425
NSHA Class F	25½	34½	.425
NMS Officers	18	42	.300
NMRI Blues	10	50	.167

High Game: Team—CPO Club, 910; Individual—Klaes (See Mats) —257

High Series: Team—Cpo Club, 2596; Individual—Miller (Pharmacy) —645

New Assistant Pro Has Been Linkster Since Age Eleven

NNMC's new assistant golf pro, Jim Stoffel, seems to specialize in setting golf course records.

A native of Huntington, Ind., this HN from Naval Hospital began his course records with a low of 30 on the first nine at Lafontaine Country Club and followed this with a eight under par for a 64 for the course in 1951.

In 1949, in an Indiana Knights of Columbus Open Tournament in Marion, Jim again pulled a 30 to set the course low.

This 5 ft. 10 in. 150 pounder first began playing the links at 11 years of age while working as a caddy at his brother's country club. Armed with a set of wooden shaft rentals he would make the rounds.

In his four years at Huntington Catholic, the now proud owner of a matched set, played on the high school team in all-state competition. During these four years, Jim only dropped one match.

In '47, '48, and '49, Jim added All-Huntington to his laurels.

In 1949, he went to the all-state K. C. open and took runnerup honors. In the following year he copied top prize with a 140 for the 36-hole match dropping Mike Stefanie to runnerup position.

The same year, Jim applied for membership in the PGA and was

NEW GOLF PRO, Jim Stoffel, displays the form which netted him a 78 on his second 18 here.

awarded class D standing. Jim then began working as assistant pro at his brother's club.

Mar. 7, 1952 saw the All-Indian in the Navy with boot camp at San Diego, corps school at Bainbridge and NNMC next on the circuit.

Arriving here in November, the new golf aid wasn't able to play the local nine until last month. His second 18 was a "poor" 78.

His plans for the future are tied to golf: first to return to Huntington and work with his brother and later to follow the circuit.

Softball Managers To Meet Wednesday

A meeting of intramural softball team managers will be held in the Special Services Office, Bldg. 23, at 1230 on Wednesday, Apr. 29. All commands or services wishing to enter this year's station softball circuit are asked to have representatives at this pre-season confab.

Lt. Atkinson, Special Services Officer, has announced that league rules will be drawn up at Wednesday's session, and it is hoped that loop play can begin sometime next week.

It is essential that each group desiring to compete in the Medical Center softball league be represented at the Apr. 29 meeting. If this is impossible, the Special Services Office (Ext. 672) should be notified prior to 1200 Wednesday.

NDS Enlisted Nips Unbeaten NH Bks. To Take 1953 Intramural Cage Crown

INTRAMURAL BASKETBALL CHAMPS, the NDS Enlisted squad, are (front row): J. J. Carrabine, R. H. Eads, R. G. Shuff, D. E. Jacobs and P. Lee. Back row: O. C. Erwin, E. J. Demerest, B. L. Pederson, P. J. Mackin, A. F. Graham and L. F. Thibodeau. Not in picture: Lawrence Goldman.

Spearheaded by the tremendous play of rangy Rodney Shuff, a determined NDS Enlisted five fought its way to a stunning 46-41 upset victory over previously unbeaten NH Barracks, in the final of NNMC's post-season single elimination intramural cage tourney on Wednesday night, Apr. 15.

Sports Writer Picks Two Mythical Teams For All-Star Slate

by Clyde Schubert, HMI
With the completion of this year's Medical Center intramural hardcourt season comes time to pick a mythical NNMC Intramural All-Star Basketball Team. And so this writer has gone out on the proverbial limb and selected a first and second team, each composed of three forwards, two centers and three guards.

Since in this day and age many cagers are equally adept at any position they may be called upon to play, several courtmen who customarily perform in the forecourt were named to guard posts. This was necessitated by the preponderance of excellent forwards in this season's casaba circuit.

Picked at forward on the first team are Jack Carrabine of NDS Enlisted, Don Raw from Research (NMRI) and Phys. Med. School's flashy Jim Greer. Only Greer now remains a NNMC, as Dental dead-eye Carrabine has been transferred to Norfolk, Va., and the high-scoring Raw left for sea duty last week.

Selected as first-string pivotmen are 6 ft. 3 in. Dick Strader of NH Bks. and aggressive Rodney Shuff from Dental. Named at guard on the No. 1 all-star club are scrappy Jim Bush, Hospital Bks. firebrand, his polished teammate Jim Poe and clever "Jim" Canterbury from Research.

The second team is composed of forwards Jim Bradshaw of Pharmacy School, Dick Edmonds from Phys. Med. School and Lab 19's Bill Powers—Centers: Russ Eads from Dental and Bill Rivers of Phys. Med.—guards: Jim Salchert of Center Command, John Miller from Pharm. School and NMRI's "Jeff" Chandler.

Named to the second team as a utility man is Basil Brown, Lab 20's speedy performer. Several other players came close to making the all-star teams, but there just wasn't room for any more.

Bars are something which, if you go into many of, you are apt to come out singing a few of, and maybe land behind some.

Woman (on telephone): "Is my husband at the club?"

CPO: "No, ma'am."

Woman: "But I haven't even told you who I am!"

Dogged determination to avenge an earlier 45-43 overtime loss to the Hospital Bks. quintet, coupled with crafty team play and a great all-around performance by Shuff, enabled Dental to retain the station court crown it had captured in 1952.

The undefeated Hospital ball club, gunning for its 11th straight win of the campaign, held an 8-7 first quarter edge, but counted only one point in the next six minutes as it fell behind 18-13 at halftime.

With Shuff, Blaine Pederson and Eugene Demerest setting the pace, Dental reached the three-quarter mark with a 33-30 lead and then beat off a frantic NH Bks. bid for victory in the final frame. Lawrence Goldman's lay-up shot with 15 seconds to go sewed up the contest.

Shuff, a rugged 6 ft. 2 in. DN from York, Pa., was the big difference. He racked up eight field goals and meshed eight of nine free throws attempted for a total of 24 points, high for the tourney. Pederson notched 8 and Demerest 7 for NDS.

For Hospital, Don Gregory collected 10 markers and rebounded well. Jim Poe and Jim Bush had 8 each and Howard Hamilton made 7. Only a terrific defensive game by Poe prevented the virtually unstoppable Shuff from amassing even more points than he did.

Research (NMRI) captured third place by taking a hard-fought consolation tilt from Physical Medicine School, 33-31, in a preliminary to the final tussle. NMRI led by periods 6-5, 15-9 and 26-19 but barely survived a last ditch Phys. Med. surge headed by the losers' Jim Greer.

Don Raw of NMRI hammered the hoop for 17 digits and teammate Jim Canterbury had 9. Greer stood out for Phys. Med. with 17 points. "Jeff" Chandler, veteran guard, was Research's defensive and rebounding star.

Both finalists encountered stiff opposition in the first round, Dental nosing out Phys. Med. School, 34-32, and NH Bks. nipping a surprisingly powerful NMRI five, 52-48.

NDS led Phys. Med. virtually all the way in a struggle of defenses. Shuff garnered 11 points for Dental and Greer made 10 for the losers.

A closing spurt by Hospital overcame Research after the losers had led, 48-47, with 90 seconds remaining. For NH Gregory scored 14 points, Poe 12 and Bush 10. Dick Guidus of NMRI had 16, Raw 15 and Canterbury 11.

LITTLE MISS MUFFET (Vanessa Brown) sat on her tuffet eating her curds and whey (no appetite.) Along came a spider (spiders have all the luck) and sat down beside her (is there room?) and frightened Miss Muffet away. (Shucks!)

What to See Around D. C.

- MONDAY, Apr. 27**—Song recital. Mary Alyce Bennett, mezzo-soprano, Phillips Gallery, 2030.
—“La Boheme,” Metropolitan Opera, Capitol Theatre, 2000.
- TUESDAY, Apr. 28**—“Rigoletto,” Metropolitan Opera, Capitol Theatre, 1400.
—“Cavalleria Rusticana,” “Pagliacci,” Capitol Theatre, 2030.
—Social Evening, USO-Lafayette Square Club, 2030.
- WEDNESDAY, Apr. 29**—“Sampson and Delilah,” Metropolitan Opera, Capitol Theatre, 2000.
—Variety show, USO-Lafayette Square Club, 2030.
- THURSDAY, Apr. 30**—Sidewalk Cafe Party, refreshments, USO-Lafayette Square Club, 2030.
- FRIDAY, May 1**—Instruction, folk dancing, Roosevelt Center, 2030, each Friday.
- SATURDAY, May 2**—Tea Dance, supper, Servicemen, Epiphany Church, 1317 G St., N. W., 1630, each Saturday.
—Orchestra Dance, Age 17-30, Servicemen, YWCA, 17 and K Sts., N. W., 2100, each Saturday.
- SUNDAY, May 3**—Lectures, National Gallery of Art, 1600, each Sunday.
- MONDAY, May 4**—Theatre Workshop, Roosevelt Center, 2000, each Monday.
- Weightlifting, Cardozo Center, 1930-2230, each Monday, Wednesday and Friday.
- TUESDAY, May 5**—Contract Bridge Instruction, Beginners, Roosevelt Center, 2000, each Tuesday.
- WEDNESDAY, May 6**—Golf Instruction, elementary and advanced, Terrell Recreation Center, 1st and L Sts., N. W., 2000, each Wednesday.
- Ballroom Dancing Instruction, Roosevelt Center, 2030, each Wednesday.
- THURSDAY, May 7**—Ceramics, elementary and advanced classes, Spingarn Center Oklahoma and Benning N. E., each Thursday.
- FRIDAY, May 8**—Ballroom Dancing Instruction, beginners, 1830, advanced, 2130, Cardozo Center, each Friday.
- SATURDAY, May 9**—Dinner and Social Hour, Servicemen, Letts House, Foundry Methodist Church, 1830, each Saturday.
—Servicemen's Lounge, Hostesses, Jewish Community Center, 16th and Q Sts., N. W., 2030, each Saturday.

Center Command Has Job of Fixing Radio and TV Sets

Ever wonder who has the task of repairing the TV and radio sets which are used aboard the station for your enjoyment and recreation? Well, Leo Hilt, HMI, has that thankless job, keeping all 56 TV's and innumerable radios in good working order.

Hilt came from the heavy cruiser USS Macon after completing a six months cruise in the Mediterranean area. He is a small town boy brought up on his father's farm in Herd, S. D., population 900.

After finishing high school, and working for one year on the farm, Leo joined four brothers already in the service, but unlike his Army brothers he chose Navy blue.

This coming October Hilt will have completed 11 years in the Navy, much of which has been overseas duty. During the years of 1943 through 1947 he served in South Pacific waters, the first 27 months wearing the marine green of FMF, Pacific.

In 1945 he was ordered back into Navy blue and assigned to the USS Hearold of the Morning, a transport. Following some far-from-boring shore duty in Honolulu, Leo was again gifted with orders and this time transferred to Philadelphia Naval Hospital.

There he met a very attractive Wave corpsman hailing from Colebrook, N. H., and a very short time later they were married.

After a year of wedded bliss, Hilt was again transferred, first here to NNMCM to attend school and eventually a tour of sea duty

ANOTHER RADIO is repaired by Leo Hilt.

aboard the USS Macon, from which he reported here to Center Command, NNMCM.

Hilt likes the Navy very much, but still is looking forward to the day when he can sit with his feet on the porch rail on the 50 acre farm he has his eye on, and say to his two daughters, Cassandra and Melissa, “just keep those cool drinks coming.”

“I'm supposed to entertain you until you're rescued!”

NOTES AND QUOTES....

Med School Daze

There's been such a dearth of real juicy items the past few weeks that we really don't know where to get enough information to fill this column this week. So take this as a word of advice—we all have been a little too good recently, and it's about time some of us in Med School got out and raised a little you know what.

Take Meeker, for example. He got in the spirit of things at the Med dance last week. He was really in there trying, but DeVise of Center Command stole the whole show from him. You get A for effort, anyhow.

BuPers seems to be coming alive these days, and they've tapped Cumming and Besselman for a little sea duty. Good luck, men! There are new staff members have reported aboard, also, and we'd like to welcome Weires, HM2 of Bacteriology, Perry, HM1 of the Tissue Bank, and Dube, HMC of Optical School, the best of everything during the course of their tour of duty here.

Three of our scholars have taken that fatal walk down the aisle recently. To Tirelli, of Lab 20, Lewis, of Med Photo, and Stolz, of X-ray School, we wish nothing but the best.

Mr. McQuerry has finally returned from a six week COI in the U.S. MJ, and should now be well versed in the law. Welcome back, Sir. That's about all for now, by cracky.

Dental Explorer

Welcome aboard to our many new mates. C. R. Pearson, DTI, has reported from the Gun Factory for duty here, and he is working in the lab in Bldg 1. Also we have four new Waves (we will NOT say there are waves of Waves), for duty here in clinical services: M. N. Berry, DN, D. Green, DN, G. J. Waters, DN, and P. A. Branchflower, DN. Cdr. Samman and Lt. Gossom are welcome additions to our clinical services.

Back from her job as housemother in the Wave barracks is Louise who is working in the record office (and still playing housemother). After 30 days in sunny California. A couple days later Mary Park left for the same place, and only yesterday Cdr. Millard took a plane for the West Coast making for port in Portland. (Ah me—they should know better.)

After many days of inquiring as to whether he'd had any phone calls, and after wearing a path down the main passageway, Cdr. Feder finally came in and beamed “It's a girl.” (Father and baby are doing fine.) Be Chaisson also joins the proud father list, announcing a 7½ pound son. Congrats, Pops!

Missing on the sick list are Smith, Preston, Ferguson, Martin, Borneak, Goldman, Nance, and Branchflower. A quick and safe recovery for you, mates!

Guess you all know by now that we finally got Jarboe married. Now in all his glory he's on his way to Florida, for two weeks and counting “sour hours.”

Congratulations to our Dental Technician basketball team, for winning the intramural post-season NNMCM tournament. Could be the cheering section provided the inspiration.

NMRI

The transfer bug seems to be taking larger bites each time he comes to NMRI. Latest victims, shall we say, were Lt. I. V. King, Lt. J. F. Murray, HMC F. B. Folsom, HMC A. A. Nelson, HMC H. E. Slone, HMC M. C. Sawyer, HMC R. W. Reavis, HM1 R. A. Carlsen, HM2 N. J. Marbois, HM2 D. W. Raw, SN L. C. Kelley and SN J. A. Morrison.

Off to join her husband in Chattanooga, Tenn., went Peggy Borne with an Honorable Discharge tucked under her arm.

For new arrivals, two in all, we have HM3 R. L. Replogle, and G. A. Diaz, both from NH, Bethesda, Md.

We are all aware of the many notables attached to the Institute. How did you know that “Superman” is also carried on our roster? How about that, Freddie?

It was spots before his eyes, well spots anyhow, when Lt. M. Carville turned into sickbay last week. Diagnosis? Why German Measles, of course. This proves our theory that sailors are just little boys at heart.

Next time you drive over to Chow Clancy, don't forget your car. It's a long walk back—especially in the rain.

We hear that Mr. Sabbag is taking over Mr. King's duties in a most admirable manner.

It isn't an “eye for an eye” anymore. The latest slogan around the Institute seems to be a “door for a fender.”

Chief Harkensen found out that those double lines on the highway do mean something after all, and when Chief Gillmore sees a red light now, he doesn't just hesitate; he stops. Seems like the crime stoppers have a way of making law-abiding citizens out of some people.

Navy Belles

Our downstairs has a new face lifting with a beautiful brown and yellow paint job. It now looks like a picture out of a book.

Social Events: Jean Stolz is our bride of the month. Our best wishes to you and your chief, Jean. Ethel Weber has told us she plans to change her name early in May. Tillie plans to join the happy line of spring brides late in June.

The social committee has been very busy—first planning our Institute Outside for early in May, and secondly, the first week in May we are having a late afternoon party for Capt. Hancock, who is leaving us as leader of the Waves.

Have you been voting for the Miss and Mr. of NNMCM? Let's all vote our choice and contribute to a worthy cause.

Collection of Talent: Do you dance, sing or act? You should see our collection of talent practicing in our cellar.

The softball team has been practicing and soon will be ready for a practice game, by George.

Mr. and Miss NNMC To Be Named At Variety Revue

The NNMC Variety Revue will take to the stage this Friday night at 1930 with about 16 acts estimated to run one-and-one-half hours.

The cast, which is completely composed of NNMC talent, will present dancing, comedy skits, vocal numbers and instrumentals. The show will culminate with the announcement and presentation of the winners of the Mr. and Miss NNMC Contest.

The show is entitled "Workman's Holiday" since it utilizes pre-production jitters and backstage antics for its theme.

One of the many stars of the show will be Chaplain McGinnity who will offer no less than a piano solo, a vocal selection and a jig.

Another highlight of the show will be Fred Porter, tower 7 corpsman, who, besides being master of ceremonies, will give out with the same hot trumpet which helped in a new Nash on a recent Paul Whiteman show.

Fred will offer his impersonations of such musicians as Louis Armstrong, Clyde McCoy and Harry James.

Dance fans won't want to miss Myrna Mendez, NMS student, who will dance South American style.

Jerry Goldston, tower 6 corpsman, has assumed the responsibility of producing the show, replacing HMI Grant who has been handling the Mr. and Miss NNMC contest.

Jerry says that in past experience (and he's had quite a bit of it) he has never had a more capable, or cooperative crew.

His technical advisor, Anna Schuricht, DN of NDS, has had

It is anticipated that the Commanding Officer, NNMC, will announce and award the winners of the "Mr. and Miss NNMC" contest.

Five days remain to determine who will be Mr. and Miss (or Mrs.) NNMC for 1953. Voting started the last week in April and the last pennies will be counted Friday in time for the winner to be announced at the NNMC Variety Revue May 15.

Rivalry seems to be running high among the commands.

Money began to pour into the bottles while the voting stand was still in the Security Office of NNMC awaiting the pictures of the candidates.

As soon as Medical Photography had completed the photos, HMI Grant, who originated the contest idea, placed them on the 12 individual bottles and placed the stand in the Navy Exchange fountain-restaurant in Bldg. 2.

Votes may be cast by dropping coins or bills in one or more of the 12 bottles. Every penny contributed will count as one vote for the candidate of your choice. All proceeds will go to the Navy Relief.

Commands Make Choice

Most commands held elections to determine their candidates. Those selected range in age and size from NH's 19-year-old June Sakmar to 42-year-old Chief Luber of NNMC and NDS's 5 ft. 2½ in. Clarice Hailey to 6 ft. 1 in. Chief Brandon of NSHA.

In case you haven't cast your votes yet, and are still trying to decide whom to back, here are a few facts and figures about the candidates:

NNMC

Arthur Luber, HMC assigned to the NNMC Finance Department; age 42, height 5 ft. 10 in., weight 180 lbs. (Cont. P. 6, Col. 3)

Navy Relief Drive Underway at NNMC

The period May 4 to June 6, which commemorates the Battle of the Coral Sea and the Battle of Midway, has been set aside for the annual call for contributions to the Navy Relief Society.

The Society is the Navy's own private relief organization, supported entirely by private funds, chiefly contributions from service personnel and civilian friends of the Navy.

Its sole purpose is to assist, in times of need, the personnel of the Navy and Marine Corps, those truly dependent upon them, and the dependents of deceased personnel.

Chaplain D. J. Kosky has been designated Assistant Vice Chairman for the NNMC campaign and is responsible for coordinating the functions of the campaign workers of the station.

Each command has appointed one or more representatives to assist Chaplain Kosky.

Contributions may be made before 1500 daily by command representatives and their keymen to Mrs. Margaret Fowles, financial secretary, Senior Chaplain's Office, Room 203A, Bldg. 2.

Armed Forces Day Plans for NNMC and Bolling AFB

This coming Thursday NNMC will observe Armed Forces Day. Here at the Medical Center will be featured movies, conducted tours, and demonstrations to highlight the day. Admittance to the grounds will be from 1000 to 1700, with open house in all buildings from 1300 to 1700.

Music appropriate for the occasion will be played over the station

radio broadcasting facilities and the public address system from 1400 to 1600.

Liberty will not be granted for staff or patients prior to 1800.

At Bolling Air Base in Washington, D. C. on Saturday and Sunday, May 16 and 17, over one-half million square feet of Armed Forces Day exhibits will be displayed. Hours on Saturday are 0900 to

1800, on Sunday from 1200 to 1800.

Live demonstrations of military equipment on the field and an aerial flyover are scheduled for both Saturday and Sunday afternoons. Plans for the demonstrations are as yet incomplete.

Outside the hangers at Bolling the Air Force and Navy will exhibit some of their newest aircraft.

(Cont. P. 4, Col. 4)

Staff and Patients Enter O.T. Contest

More than 70 projects, representing about 30 NNMC staff and patient entrants, were entered in the fourth Annual Armed Forces Occupational Therapy Competition held at the Philmont Country Club, Philmont, Pa., last Wednesday, May 6.

The competition, which drew entrants from all branches of the service, was divided into two general classifications: hospitalized or patient entrants, and able-bodied or staff.

Projects from NNMC were entered in 13 classes: sculpture, textiles, woodworking, leather craft, weaving, plastics, paintings, prints and drawings, jewelry, copper, ceramics, photography and miscellaneous.

Winners receive engraved silver plates. Last year Bethesda brought home 15 first and second prizes from the contest. This year's winners will be announced in the next issue.

Marcia Scott, HM2, and F. W. Conley, HM2, staff of the Occupational Therapy Department took the entries to Philmont for the competition.

A Mother's Day Tribute

*I am sending some flowers to you, Mother
On this day we've set aside as Mother's Day.
For I find myself vocally unable
To tell you of my love, so use this way.*

*I am sending this little bunch of flowers
For their sweetness reminds me of my home;
I am longing in my heart, to see you, Mother
And I'm starting back to you, no more to roam.*

*My eyes can see the beauty of the flowers
They remind me of the face of yours, so sweet.
They're as pure as the heart that's in your bosom
And glisten like your eyes, each time we meet.*

*It seems to me the softness of the petals
Reminds me of your lips upon my brow.
Although all others may sometime forsake me*

*... mother's love, will always last, somehow.
So I am sending this little bunch of flowers
And the message with them, Dear, can only say,
"As far as I'm concerned, My Darling Mother,
Each day in the year is Mother's Day."*

—Albert H. Jones, Civ. Guard.

AFRS Platter Chatter

Dixieland and Woody Herman's Third Featured on Tomorrow Afternoon's Show

That wonderful musical aggregation, Woody Herman's Third, has been captured in all its glory in the new MGM album appropriately enough entitled "Woody Herman (and the Third Herd)." Woody has had many a fine band in his career—each tops in its own way or ways. Each has a warm spot in our memory. But, the "Third Herd" remains our favorite—probably because it's nearest to us in point of time.

This polished, endlessly inventive crew is terrifically showcased in the solidly-arranged line-up of standard tunes recorded in this album. There are favorites old and newer—modern orchestral jazz at its best—cool as a frosty gin and tonic and just as inviting.

Within the ever-exciting orbit of American jazz, styles come and go. Dixieland is a basic music which retains its popularity year after year, unchanged by current and transitory fads and trends. Dixie was born below the Mason-Dixon line, in the bayou country of Louisiana, and its influence today is not only national, but world-wide in scope.

The basic honesty of this music is apparent on the recorded masters which you will hear on the Music for Moderns portion of the AFRS hour. Virtually all of America's most noted and most popular Dixieland virtuosos are represented and the selections they perform are all time-tested and proven.

This, then, will be Dixieland of the highest order, purveyed by the best, the most talented of the Dixieland devotees. So turn up the volume and hold on tight—this stuff is right from Canal Street!

AFRS PROGRAM SCHEDULE—Channel C—1300-1345—Mon. thru Fri.

May 11—1300—Afternoon Rhythms; 1330—Fiesta Time

May 12—1300—Music for Moderns; Hill-Billy Hit Parade

May 13—1300—"Douglas of the World" (The Hemlock Stunt);
1330—Pops Concert

May 14—1300—Concert Hall; 1330—Sports Program

May 15—1300—"Secret Mission" (The Stubborn Duck);
1330—To be announced

May 18—1300—Afternoon Rhythms; 1330—Fiesta Time

May 19—1300—Music for Moderns; Hill-Billy Hit Parade

May 20—1300—"Douglas of the World" (Reporter from Moscow);
1330—Pops Concert

May 21—1300—Concert Hall; 1330—Sports Program

May 22—1300—"Secret Mission" (Olympic Victory);
1330—To be announced.

Mother's Day

Once each year we take a day
And set it there—apart,
To pay homage to the one
Who is ever in our heart.

We may send flowers, a box of sweets,
Or something new to wear;
But can these trifles ever pay
For her years of love and care?

A tender guardian by our side
Through childhood's turbulent years;
An understanding comforter
Through adolescent's tears.

How often in our thoughtless way
Have we caused her grief and pain;
How many times she gladly gave
Forgiveness once again.

Why not do away with her special day
That comes just once a year,
And make every day a Mother's Day
For the one we hold so dear?

—R. Conaway, NMRI

Seeing the Sights? Ask Committee's Aid

Maybe you've been stationed near Washington all winter and have never been through the White House. Maybe you've never tried to see Baltimore from the top of the Washington Monument. They say you can, on a very clear day.

Possibly you have forgotten that Mount Vernon is so near Washington, and that its furnishings, and the view from the front porch, and its beautiful gardens are legacies to us out of Mount Vernon's historic past, when George Washington was our first President.

Alexandria, halfway between Washington and Mount Vernon, has many buildings that Washington used to know.

To save yourself time and money and to make sure you take in all these sights before you get away from here, ask for sightseeing advice at any one of the service clubs under the Armed Services Hospitality Committee. Make them your headquarters in Washington for all sorts of information.

Divine Services

Protestant

Daily—
1200—Daily Meditation broadcast from Protestant Chapel (Monday through Friday)

Sunday—

0830—Mass—Main Auditorium

Jewish

Congregation Beth El of Montgomery County will hold services every Friday night at 8:30 P.M. and Saturday morning at 10:00 A.M. in the Pook's Hill Auditorium, 3 Pook's Hill Rd. The services will be conducted by Rabbi Martin Kessler.

The services of Rabbi Harry Kaufman, representing the Jewish Welfare Board, are available to all Jewish Personnel and Patients at the National Naval Medical Center. Rabbi Kaufman may be reached by calling the Chaplain's Office, Ext. 324, or by call direct—Office: RA. 3-5371—Home RA. 3-0755

They May Look Like Golf Balls to You, But It's No Joke to the Local Ducks

SURFACELY HAPPY, these ducks are really quite upset and we don't blame them. See story below.

If you're not a golfing enthusiast you probably have not had the occasion to witness the perpetual antics of the ducks which frequent the pond down by the seventh hole of the golf course, to be rear of Bldg. 141.

Mr. Hantzmon, of the Maintenance Department, has assumed the job of seeing to their feeding and general well being. He has had quite a bit of trouble with people who think that all whitish objects (which in this case are duck eggs) are to be used for golf balls. If this is continued, the end result will be no ducks.

So far, one of the female brown ducks has outsmarted the would-be destroyers of her race, for on the weekend of May 2-3, she sallied forth with 11 ducklings in her

wake. Papa duck has as yet made no claim to his new family.

Some of our semi-aquatic friends are naturally wild, and some are here through the courtesy of the National Zoological Park. Regardless of their origin, their antics are hilarious at times.

Perhaps you and some of your friends would like to take a look at these creatures. If so, don't forget to take along some bread, and be prepared for a shoe shine when you get back; it's a little muddy around the pond.

Retail Federation Questions Exchanges; Charges Identification Not Required

The American Retail Federation is demanding a full investigation into the way the Navy Exchanges and PX's are being run and managed. Investigators were sent into 14 of the local exchanges throughout Quantico, Norfolk, and Washington for a look-see.

The investigators charged that civilians were buying goods for which proper identification was not required and in some cases the use of sales slips was lacking or non-existent.

This is nothing new in the cold war between the retailers' association and the PX's and Navy Exchanges. The association has been complaining at great length, and quite bitterly about the competition.

They complain that luxury-type items were stocked in the exchanges, that customers often resold the items they bought, and that in many ways the service stores were in unfair competition with the civilian managed enterprises.

Personnel who do take advantage of their privilege and buy goods for less and then resell them, are endangering the whole Navy Exchange system. Don't jeopardize your privileges and those of other service personnel by violating the regulations under which the Navy Exchange operates!

The Chaplain's Corner

by Chaplain Newell V. Brink

Quite frequently the chaplain counsels with someone who is anxious. He is a recipient of a letter from home, or word from a friend or relative which upsets him. One wonders if there might be standards of when to carry a tale to a friend and when not to. Some of the tests that might be made are these:

Will what I propose to tell my friend bring him a feeling of peace and well being or will I upset him terribly? If the latter, give your pulse to spread the word a stern repression.

Second: How will my story affect the group he is associated with? Will it better it or make relations worse? A story told many times is the stone thrown on the pond. The widening ripples of reaction reach many.

Third: If I pass the word on, will I solve any problems or create more? If those I create serve no potential purpose for good, might be better to let the matter drop.

Finally: As I check on the matter would God approve? True, which is done in secret is likely to be shouted from the house tops, once again one might well consider if this is something that our Lord would approve.

Much needless heartache, trouble and grief could be avoided if our anxiousness to "bear the tidings" we stopped and tested our stories by these standards.

USAFI Night Courses Starting Here With English and Shorthand Classes

Starting the second week of June, off-duty classes in high school and college English and Gregg shorthand will be available for all interested service personnel, including patients.

All those who wish to review high school grammar and composition, who need credit for high school English, who want college credit for Freshman Composition, or who are interested in learning shorthand are urged to join.

The shorthand course is designed to give some facility in note taking, a skill which is valuable for anyone, and also to provide the groundwork on which real secretarial skill can be built.

Registration will take place in the I & E Office, Bldg. 102, from 0800-1830 on May 11, 12, 13, 14 and 15. All interested service personnel should come to register with a \$2.00 money order (no checks or cash will be accepted) made payable to "The Treasurer of the United States (USAFI), Madison, Wis."

Applicants will be signed up for the appropriate USAFI correspondence course. This arrangement means that in the event of transfer, the student may continue on his own at his next duty station.

USAFI End-of-Course Tests are contemplated. Students who successfully complete this examination will be in line for a Satisfactory Completion Certificate from USAFI.

The schedule for beginning classes is as follows: High School English, Tuesday, June 9; Gregg Shorthand, Wednesday, June 10; Freshman College English, Thursday, June 11. All classes will be held in Bldg. 131 from 1830 to 2030.

Three well-qualified instructors have indicated their willingness to give freely of their time and experience.

For the College English course the instructor will be Mary Ervin, HM3, from the Naval Dispensary. Ervin is a graduate of the State Teachers College, St. Cloud, Minn., with a major in English and speech. She has also had experience teaching English in the Navy in a similar program at NTC, Bainbridge.

Norma Schrader, YN1, a member of the I & E staff here, will teach shorthand. She is a graduate of the Packard School of Business, New York City, and has had six years of secretarial experience both in and out of the Navy.

Ruth Clarkson, HM2, a physio-therapy technician, will teach High School English. She is a graduate of Greenville College, Greenville, Ill., with a major in philosophy.

Clarkson, a career-Navy woman, has also completed Navy Instructor School at Norfolk and has taught in the School of Physical Medicine here.

'How's Your EAR Balancing Out, Chief?' Is Familiar Question in NSHA Classes

At the Naval School of Hospital Administration, it is not unusual nowadays to hear a friendly feminine voice asking, "Hey, Chief! How's your EAR balancing out?"

EAR stands for Expense Analysis Register in Hospital Accounting, and the voice belongs to Ruth Elene Quire, HM1, the only Wave in this year's class of potential Medical Administrative Technicians. (See picture on Page 1.)

Actually, Ruth is only the fourth Wave to attend NSHA since its various specialized courses were combined into one curriculum in Medical Administrative Procedures in 1948.

Ruth came to NSHA from the Naval Hospital, San Diego, in August 1952, but she is no stranger to Bethesda. She attended Hospital Corps School here in 1945 and was again stationed at NNMC in 1948-49 and worked in the Office of the Chief Nurse and the Public Information Office.

With graduation—and orders—just around the corner, Ruth is hoping for an assignment to recruiting duty, but like all good Navy people, she says, with a grin, "I'll take what they give me."

Incidentally, Ruth was NSHA's unanimous choice for the title of "Miss NNMC."

New Navy EM Raincoat Will Sell for \$11.80

The Navy is now issuing the new-style enlisted men's blue raincoat.

The garment is made of lightweight navy blue cotton cloth and is double-breasted. It is now available for \$11.80 at most continental clothing and small stores.

It can be obtained in either small, large or regular, sizes 34 through 40.

The present canvas-type raincoat will not be sold after July 1, but may be worn until July 1, 1955.

The NNMC Clothing and Small Stores has not received their supply of the new coats yet. —(AFPS)

May 11, 1953

Rates Announced For Enlisted Men; Effective May 16

As this paper went to press, the only available announcements of advancements in rating were for the Naval Dental School.

A complete list of those receiving new rates will be printed in the next issue.

The new rates become effective May 16. The following personnel of NDS were notified that they will be advanced at that time.

NDS

DT2 to DT1

Margaret R. McQuarrie and Richard C. Moorehouse.

DT3 to DT2

Robert D. Johnson Jr. and Joseph E. Millea.

DN to DT3

Edward J. Bochniak, Loring L. Chrisman, Richard C. Bekhold, Isadore (N) Ettleman, Malcolm K. Law, Kim R. Shaffer, Rodney G. Shuff, Lloyd F. Thibodeau, and Theresa I. Turowski.

Auditorium Offers Three Evening Shows

Special Services Officer Lt. J. O. Atkinson has announced three shows slated for the NNMC auditorium in the next two weeks.

On Sunday, May 17, Rhode's Musical Varieties will bring another talent-laden cast to the auditorium at 1845. The scheduled movie will be shown at 2000.

On Wednesday, May 20, the International Student House of Washington will sponsor a show featuring the native fashions and dances of the countries represented.

Countries will include: Afghanistan, Hungary, Czechoslovakia, Mexico, Peru, Poland, Guatemala, Italy, Portugal and Hawaii. The show is slated for 2000. There will be no movie.

Sunday, May 24, the pageant Beauties on Parade will stage an afternoon ward show and a two-hour auditorium show at 1830.

The Pageant Beauties on Parade are a group of talented young ladies, organized to provide entertainment and further their individual talents.

The requirements necessary to becoming a member of this non-professional talent group are to hold a title for outstanding performance in any national, state, city or similar contest.

Such titled young ladies appearing in the coming show are: Shirley Harrison (Miss Maryland 1953), Iris Ann Fitch (Miss District of Columbia 1953), Edna Frances Long (Miss Virginia 1953), Maureen Quinn (Miss District of Columbia runner-up 1953), Grace Haug (Miss District of Columbia contestant 1953), Jere Ault (Miss Lancaster contestant), Dayne Long (Miss Columbia Amvet 1952) and Felicia Fawber (Miss Evinrude 1953).

The night's entertainment will also spotlight magician H. Thurston Fritz and his assistants who will present "The Great Levitation Effect" plus other feats such as "Sawing Girl in Half" and "Escape Act."

— These Gave —

Military and civilian members of NNMC who donated a pint of blood during the period of Apr. 20 to May 4 are:

NH

Joseph Huber, HM3, Donald Roach, HM3, and Galen Whitmeyer, HA.

NNMC

Lt. Leonard J. Bodenlos.

NNMC NEWS Has New Assistant Editor; Bob Mapletoft Replaces 'Tony' Walker

In the Mar. 30 issue, the NNMC News ran an ad headed "Interested?" in the hope of finding someone to replace the assistant editor, Wade C. Walker, HM3, who was discharged May 1.

Definitely interested, and now filling the job is Bob Mapletoft, HN, formerly of NH command. Bob has been working on the paper since the first part of April and assumes the position of assistant editor this issue.

A native of Caldwell, N. J., Bob was business manager and assisted with the layout and makeup of his high school paper at Montclair Academy, Montclair, N. J.

Later he wrote feature stories for the paper at Upsala College, East Orange, N. J., where he was a pre-med major for two years.

After college he spent two years as an insurance salesman. While

Supreme Court Rule Favors Servicemen

Servicemen and women are exempt from local taxes on personal property other than in their home states, the United States Supreme Court ruled Apr. 6.

The decision reversed a previous ruling by the Colorado Supreme Court against an Air Force officer, Clairborne Dameron, Denver, Colo.

City and county officials attempted to collect personal property tax on household goods belonging to Dameron, a native of Port Allen, La., who was assigned to Lowry AFB, Denver.

Dameron appealed to the higher court after the Colorado Supreme Court held that local tax exemption specified in the 1940 Soldiers and Sailors Civil Relief Act was contingent on proof that the personal property had already been taxed in the serviceman's home state.—(AFPS)

According to Navy Times, this is not to make automatic refunds of any previous taxes paid by military personnel.

A few, namely those who officially noted on their tax returns that they were paying under protest, may be able to recover the money. These should appeal to their local tax officials for the refund, citing the Dameron case as the authority.

NDS Sends Clinics To Dental Societies

Sixteen of the 24 interns of the Naval Dental School presented dental clinics last week in Virginia and Maryland.

Eight interns presented clinics before the Virginia State Dental Society at the Roanoke Hotel, Roanoke, Va., on Tuesday, May 5. The next day eight others appeared before the Maryland State Dental Society at the Lord Baltimore Hotel in Baltimore.

Interns making the Roanoke trip were: Ltjgs. G. W. Kronfeld, M. M. Brownstein, G. K. Magnusson, H. S. Watson, R. A. McIntosh, L. A. Weinberg, R. A. Fiocca and J. D. Jacobsen.

Those going to Baltimore were: Ltjgs. R. J. Eustice, A. L. Walker, R. P. Hansen, F. J. Dickson, F. F. Bork, G. B. Travers, J. R. P. Wall and R. J. Welch.

The interns, who have been at NDS since January, will complete their one year's internship the end of June. The first six months was completed at other hospitals before coming here.

VA Offers Suggestions For Veteran Students

Washington (AFPS)—The Veterans Administration has offered some time-saving suggestions to veterans wishing to attend school under the provisions of the K-Vet Bill.

The VA advises that before applying for training these two steps should be taken:

1—Get a photostat or certified copy of both sides of your discharge or separation papers (DOD form 215) to attach to your application.

2—If you are sure what you want to train for, find out whether the school or training establishment will accept you under the K-Vet Bill.

NEW ASSISTANT EDITOR Bob Mapletoft (seated) and Wade Walker discuss Walker's three favorite issues of the NEWS: the 1952 April Fools issue and the last two Christmas editions.

stationed at Bainbridge last May, he married Miss Dwane Benedict, a girl from his hometown whom he had known since 1944. Bob and Dwane now live in Takoma Park.

Tennis and swimming are Bob's main sport interests. Holder of a Red Cross senior lifesaving certificate, he acts as lifeguard at the NNMC pool on his duty nights.

Swimming is also the favorite sport of the lanky 6 ft., 3 in. Walker. Both he and Bob gave instructions in the recent "Learn to Swim Week" here in the local pool.

Walker holds certificates for senior lifesaving, water safety instructor, and functional swimming instructor. He plans to work at a beach this summer and then attend the University of Wisconsin to study medicine.

A native of Wauwatosa, Wis., he attended St. Norberts College for two years majoring in biology and chemistry before enlisting for the second time in 1948.

Walker is better known to his friends as "Tony," a name which he picked up while stationed at Coco Solo, Panama when his three Italian buddies (named Bob, Jim and Jack) decided to give him an Italian name.

Tony arrived at NNMC in May of 1951 and had been assigned to the News since October, 1951.

Last winter he coached the NNMC women's volleyball team and last spring he umpired for some of the women's softball games on the station.

Good Government Award Given R. Adm. Groesbeck

The Bethesda Junior Church of Commerce held its annual "Good Government Awards" dinner at the Bethesda Country Club, on Thursday, Apr. 30, at 2000.

At this time two scroll awards for "Good Government" were presented: one to an elective official, and one to a non-elective official. R. Adm. Bertram Groesbeck Jr., CO, NNMC, accepted the 1953 award for the non-elective official who has contributed to good government in the Bethesda community.

Navy's Damaged Truck Looks Like New Thanks to Skill of Mr. Louis Shearer

BEFORE AND AFTER view of this Navy truck reflects the skill of Mr. Louis Shearer, former Burma Road mechanic.

The wreck pictured here cost the Navy \$650.00 in time and material to repair. It happened on the corner of Channing St. and North Capitol St., N. E., a short time ago, and in one of the Transportation Department's headaches. Besides the apparent exterior damage there was extensive damage to the engine, axle, and other damage too numerous to mention.

Prep School Exams Slated for July 6

Navy-wide preliminary tests for qualified men to enter the Preparatory School as candidates for the U.S. Naval Academy, will be given July 6.

All commands will nominate enlisted men to participate in the examinations. Regular Navy and Marine Corps enlisted personnel and members of Reserve components serving on active duty other than active duty for training are eligible for nomination.

Those selected for the Naval Preparatory School must have obligated service to July 1, 1954.

Candidates will submit applications on Form NavPers 675. Completed applications and physical examinations will be forwarded to the Bureau of Naval Personnel, Attn: Pers-C1214, in accordance with BuPers Manual article D-2309(3).—(AFPS)

Medicine & Science

A-Bomb Explosion Reaches New Height; Cancer Helps in Fight Against Polio

The Atomic blast, set off at approximately 5,000 feet above the Yucca Flat (Nev.) proving grounds Apr. 6 has been called the highest altitude nuclear explosion ever set off on this continent.

It shook automobiles 35 miles away for four and one-half minutes and broke windows 75 miles away in Las Vegas for the first time in two years. The fireball following the flash lasted for 10 seconds.

An Atomic Energy Commission spokesman said that the bomb exploded at a much greater altitude than earlier experiments here or at Pacific testing areas. The bursts over Hiroshima and Nagasaki were at 2,000-foot level and the previous high at Yucca Flat was 3,000 feet.

Unlike other recent explosions, no troops were used. However QF-80 "drone" airplanes, pilotless versions of the F-80 jet fighter, carried mice and monkeys through the atomic cloud.

Cancer, the destroyer, might help in combating polio, the crippler. Polio virus can be grown on cancer cells to give an early test for polio, perhaps in time to prevent paralysis, two doctors from the University of Minnesota and another doctor from Johns Hopkins announced recently.

The discovery is that a strain of cancer cells, kept growing in test tubes, will permit rapid growth of polio virus.

To the test tube is added a sample of bowel excretions of the human. If any polio virus was present in the intestines, it grows in the test tubes.

The cancer cells, obtained from a human cancer of the cervix, is a pure strain of cells which can be kept growing without any change.

The test can be tabulated and evaluated within 24 to 72 hours. It was also found, by the doctors, that apparently, the polio virus invades intestines first, then the blood stream and later the nerves.

If, the polio can be detected early, gamma globulin or other agents, might be utilized effectively.

A two-headed calf was born on Apr. 11 to a Hereford cow owned by a Summerville, Ga. farmer and banker. Normal below the throat, the animal has two distinct heads, four eyes, two mouths and tongues. Veterinarians who have been X-raying the animal say it appears to be thriving.

Young Boy Composes Essay on Anatomy

Your head is kind of round and hard, and your brains are in it and your hair on it. Your face is the front of your head where you eat and make faces. Your neck is what keeps your head out of your collar. It's hard to keep clean.

Your shoulders are sort of sleeves where you hook up your suspenders on them. Your stomach is something that if you do not eat often enough it hurts, and spinach don't help it none.

Your spine is a long bone in your back that keeps you from folding up. Your back is always behind you no matter how quick you turn around.

Your arms you got to have to pitch with, and so you can reach the butter. Your fingers stick out of your hand so you can throw a curve, and add up arithmetic.

Your feet are what you run on. Your toes are what always get stubbed.

And that's all there is of you except what's inside and I never saw it.—The Lutheran Youth.

One-Arm Golfer Here

TRICK SHOT ARTIST, Jimmy Nichols, demonstrates his links skill on the NNMC practice tee. The one-arm pro exhibited his talents here on Apr. 24.

VA Cuts Premiums On NSLI Policies

Holders of National Service Life Insurance policies with the disability benefits provision will be interested in BuPers notice No. 1741 dated 10 Apr. 1953.

This notice acquaints the holders of such policies with the reduction in premium rates charged for the total disability benefits on five-year level premium term policies.

Persons who have previously taken out five-year premium term policies containing the total disability benefit will have their insurance accounts adjusted to the new rates.

These persons will receive a personal letter from the VA explaining the adjustment that has been made to their account and what action must be taken on the individual's part.

Checks for reimbursement for the amount overpaid for this benefit will be mailed to each individual. The VA requests that individuals refrain from initiating correspondence on this matter other than to reply to the inquiries propounded in VA Form Letter 9-484.

President Invites All Service Patients To Cruise Down the Potomac in Style

'Fit for a President,' is the recreation offered to patients of the Hospital when they accept the invitation to cruise down the Potomac on the Presidential yacht Williamsburg.

The trip which leaves the Naval Gun Factory at 1300 twice weekly, features a stop for entertainment and greetings from the Marine Corps, Quantico; dinner on the Potomac; and docks at the Gun Factory again at 1900.

All Services Help With Bolling's Show

(Continued from Page 1)

Ordnance equipment from Army, Air Force, and Marine Corps will be on display also.

The Marine Corps display will consist of a number of panels depicting the Air Ground Team coordinating of a close air support mission for front line troops. A recording of actual communications between units will be played to give the public an idea of what transpires during a strike.

The centerpiece of the Navy's exhibits on the ground outside the hangers will be the sweptback-wing, tailless F7U Cutlass, a jet carrier based fighter plane. This plane is on exhibition in the Washington area for the first time.

Two other aircraft new to Washington will be the FJ2 Fury, Navy counterpart of the Air Force F-86 Sabre Jet, and another sweptback-wing fighter, the F9F-6 Cougar.

The Divers from the Navy Deep Sea Diving School will again perform underwater cutting and welding in a tank outside the hangers. Of local interest will be a Gun Factory display of salvage equipment rushed to Union Station in January minutes after the train crashed into the concourse.

Air Force exhibits on the ground will include the jet bomber, the TB-45, and these jet fighters: the F-94 "Starfire" interceptor night fighter; the All-Weather F-89 Interceptor; the F-86D, holder of the official world speed record of almost 699.9 mph with a full combat load of arms and ammo; and the F-84.

Visitors will be able to enter the "Lucky Lady," the B-50 which circumnavigated the world in 94 hours. Among attention-getters will be the spacemobile, which illustrates the radio control principle of pilotless aircraft, and the XF-85, the world's smallest jet fighter.

The Coast Guard's Armed Forces Day exhibit will consist primarily of three portable Loran Trailers, which, when working coordinately, are able to operate as a stationary Loran unit. The trailers carry all basic Loran equipment, and will furnish a first hand example of the theory on which Loran operates.

Army exhibits at Bolling will include a mobile radio broadcasting station and printing plant brought to Washington from the Psychological Warfare Center, Ft. Bragg, N. C.

The Chemical Corps will display techniques for detecting chemical and radioactive agents. Portable housing and tents will be set up by the Quartermaster Corps.

One of the large sections of the Army's exhibit will be a complete hospital train. A Transportation Corps diesel locomotive and Quartermaster kitchen car will be attached.

Saturday Tea Dances Open to Enlisted Gals

Enlisted women of all the services are invited to drop in at the Saturday afternoon tea dance at the Armed Forces Center of the Episcopal Churches.

This popular dance is free, has military orchestras, and is followed by a free hot dinner served by one of the Episcopal parishes.

Everyone will have plenty of dance partners. The time is 1630 every Saturday. The place is 1317 G Street, N. W.

Trips are scheduled for Tuesday and Wednesday nights, 30 when the yacht will be in mothballs. Space is allotted for 15 patients from the Naval Hospital who will be joined by patients from Walter Reed and Ft. Belvoir.

The first group from NNMC left on the Apr. 22nd cruise. Many of them have asked for repeat chance. All requests are handled on a first come, first served basis. A doctor and a first sergeant accompany the crew on each trip.

The day commences with lunch at 1030 in the NNMC mess hall. The Montgomery County and Prince Georges County Red Cross Chapters furnish the transportation to the Gun Factory.

Red Cross Recreation Supervisor Miss Cabell, urges all patients to take advantage of the opportunity. Patients may make applications to the Red Cross Recreation Office, Room 102, or phone Ext. 821. The Cross will help in arranging for the special liberty required.

These trips were arranged in cooperation with the Entertainment Instruction Services of the Washington, D. C. Red Cross Chapter.

Applicants Desired For Radiobiology

The Bureau of Medicine and Surgery desires applications from interested active duty medical officers, below the rank of captain, for a one-year course of instruction in radiobiology.

The course, under the auspices of the Armed Forces Special Weapons Project, will convene on Aug. 1, 1953. It consists of four parts, the first two of which will be given at Reed College, Portland, Ore.

Part three will be given at Sandia Base, Albuquerque, N. M., and part four will be given at Ridge, Tenn.

Requests for this instruction must reach BuMed before June 1, 1953. Each request must contain the applicant's agreement to serve on active duty for a period of two years following completion of the course of instruction.

Well-Trained Crew Stages NNMC Revue

(Continued from Page 1)

over a year's experience in make-up and costuming with the San Jose Light Opera Company, California.

Clarice Hailey, DN of NNMC, in charge of the stage crew, was in charge of her dramatic group in high school and has been behind-the-scenes TV experience.

Bob Collins, an NNMC patient, handling the music problem, has played and sung with several combos.

Also lending a hand backstage with the painting and setting is Lorraine Mann, Physical Therapy student, and Tom Driscoll, X-ray student.

The whole cast is grateful to Bob Williams of the Camp Store who has lent a helping hand to practically every phase of behind-the-scenes work with the vice, assistance and materials.

Freak Flood Drowns Hopes of Victory for NNM Lady Keglers at Quantico

WOMEN'S VARSITY BOWLERS take a moment out for the camera. Members are: team captain Lt. Katherine Lopartz, Ronnie Conaway, Lt. Nora Dixon, Lt. Alfred Forbord and Lt. Alice Crowell. Not in picture: Ruth Puffer, DKC, Lt. Lucille Beumer and Lt. Marita Petit.

The freak storm and resulting flood which struck Arlington, Alexandria and parts of D. C. on May 5 occurred just in time to seriously hamper the feminine varsity bowlers.

The team, in two private cars, was trapped by the flood water on the Shirley Highway as they were proceeding to Quantico to compete with the Marines.

Bumper-to-bumper traffic for 10 miles, plus the fender-high water level, resulted in the team's arriving late, missing chow and being considerably upset.

After several scores below the 100 mark in the first round, the girls settled down in the last two games, but could not catch the Marines. This four-point loss gives the girls a 13-win, 11-loss league record to date.

With a score of 87 at the end of the seventh frame, Miss Crowell rolled a strike in the eighth and followed it up with three more strikes and a three to post Bethesda's high score of 170.

Miss Forbord's 132-123-133-388 series was high for NNM.

On Apr. 28 the ladies took three of four points from the visiting Wacs from Walter Reed. Miss Dixon pulled down all the local honors for high game, high average and total pins with her 120-13-173 series.

On Thursday, Apr. 23 the five—of Lopartz, Conaway, Dixon, Forbord and Crowell gathered four

easy points when the Ft. Belvoir squad failed to show up and forfeited the match.

This coming Thursday, the Marines from Henderson Hall will challenge the NNM keggers here at 1900 in the local alleys.

Next week, on Tuesday, May 21, the team will travel to Arlington Hall to pit their skill against the Wacs there.

Slade Needs More Gals For His Feminine Nine

HMI Slade, head coach of the women's varsity softball nine, says he is still looking for more team members. So far, the Tuesday and Thursday evening practices have seen only nine or ten girls out.

Slade is looking forward to a lineup of sluggers this season with the return of Mary Lou Cox and Joyce Crouch, plus newcomers Nancy Aiken and Barbara Bradford.

Both the league opener (with Bolling AFB May 19) and the second game with Quantico May 26 will be home games for the girls. Last year the Admiralties subdued the Bolling nine 9-5 and edged out the Quantico squad 5-4.

Intramural Nines Play 3 Week Nights In 10-Team League

Once again another softball season has rolled around, and more than 150 men are expected to participate in this year's NNM intramural competition.

The Medical Center Intramural Softball League officially opens its season today, but the loop schedule was not available at the time this story was written. Present plans call for games to be played Monday through Wednesday of each week.

Nine teams have entered the NNM circuit. They include Pharmacy School, Lab 20, NSHA, NDS Enlisted, X-Ray School, Center Command, Naval Hospital Doctors, Lab 19, and NMRI. It is probable that NH Barracks will become the 10th member of the loop.

The Dental Interns won the 1952 title, with Lab 19 taking second place and Center Command finishing a close third. Most of the squads seem about evenly matched this year and a spirited battle for top honors is expected.

Schedule and results of league games will appear regularly in the Daily Bulletin, and the May 25 issue of the News will carry an up-to-date report on contests played to that time and also the slate for the following two weeks.

As drafted in its tentative form by Chief Joe O'Keefe of Special Services, the schedule calls for each loop member to play every other team one time, making a total of nine frays for each club.

Little is known about the relative strength of the various squads at this time, but the News will carry an early-season league forecast in its next edition.

Local Golf Tourney Starting Saturday

Attention, all NNM golfers!

The initial tourney of the current links season will get under way this coming weekend, May 16-17, when first-round matches in the annual Admiral Swanson Trophy Tournament take place.

All qualifying rounds (18 holes) must be played prior to Saturday, May 16. Bill Downing, Medical Center professional, has stated that entrants will be placed in flights according to their qualifying scores. There will be eight competitors to a flight.

This tournament is open to all persons possessing NNM golf cards (either the yellow-colored unrestricted pass or the red-colored restricted permit) and there is no entry fee.

Prizes will be awarded the winner and runner-up in each flight even though no entry fee is being charged. First-round matches must be played May 16 or 17, semi-final duels by May 24, and final-round matches no later than May 31.

Early qualifying scores included the following: R. H. Stang 78, W. J. Gardner 79, B. W. Dorosz 81, E. P. Kelly 82, A. Samuels 86, J. A. Webster 95 and A. Griffiths 96.

All NNM golf enthusiasts are urged to enter this year's Admiral Swanson Trophy tourney. The 1952 winner, Lt. James W. Kinder, is expected to defend his title and it will take a good round of golf to defeat the amiable MSC officer.

First Wave: "Are you going to let that redhead steal your boy friend?"

Second Wave: "Never! I'll dye first."

Women who swear they've never been kissed can't be blamed for swearing.

Varsity Nine Tangles with Cheltenham In MAISAC League Opener Here May 26

Men's varsity softball practice enters its fourth week Wednesday, with Coach Jay Bell working his charges hard in preparation for the MAISAC opener here Tuesday, May 26 against Cheltenham, Md. Naval Radio Station.

On Thursday, May 28, NNM travels to Patuxent River, Md. Naval Air Test Center for its first game of the season with the airmen. The following Tuesday, June 2, Walter Reed Army Medical Center opposes the Admirals here.

Tryouts are still being conducted and all positions remain open, according to Chief Bell who has stated that candidates will be welcome at the regular 1700 drills Wednesday through Friday of this week.

This year the MAISAC softball circuit will start its campaign with four teams, Walter Reed, Cheltenham, Patuxent River and NNM. However, it is possible that one or two other stations will enter the loop before May 26.

The present league schedule lists 24 games for each member, with the Admirals slated to play four contests at home and four away with each of the other three clubs. Patuxent River will be host to the post-season MAISAC tournament from Aug. 26 to Aug. 29.

Between 25 and 30 men have been reporting regularly for weekday practice sessions here, and Chief Bell reports that the squad is shaping up fairly well. He added that there is room for much more improvement before the regular campaign opens.

MAISAC rules limit team rosters to 16 men, including coaches and manager. Bell expects to cut his squad to 20 players on May 15 and then will make the final slice to 15 performers on May 22.

Pitching candidates showing promise to date include Jim Crabtree, Ray Jeter, Jim Mincey and Bill Beckman. Three men, Paul Bennett, Pete Veneziano and Ray Gismondi are battling for catching berths.

A number of hopefuls currently are trying for infield or outfield posts on the 1953 Admirals team. They include C. V. Bennett, R. A. Brandt, K. C. Brown, C. J. Bush, J. T. Des Rosiers, R. E. DeVice and J. W. Hamby.

Other candidates are H. A. Friend, J. J. Greer, R. K. Guidus, W. L. Lewis, M. A. Pilcher, J. E. Poe, J. Pushkin, G. E. Radigan, E. B. Reed, P. J. Sabados, N. K. Schilling and H. G. White.

Several practice tilts will be played prior to the season lid-lifter on May 26. These affairs will give the coaching staff a chance to observe how each man performs under actual game conditions. At the present time it appears that NNM will be able to field a strong men's varsity nine this year.

STARTING STANCE is exhibited by Bob Replogle, local wrestling champ.

was an all-state selection at half-back in his senior year. Following graduation, he enrolled at Cornell College in Mount Vernon, Iowa on a football scholarship. There he first became interested in wrestling.

For many years Cornell has had one of the best collegiate mat squads in the nation, so it was only natural that "Rep" should decide to try his hand at the sport. He didn't do badly, either, earning a numeral in his freshman year and his varsity letter as a sophomore.

Entering the Navy in January of 1951, the Iowan took boot training at San Diego and went through hospital corps school at Bainbridge, Md. He came to the Hospital here for duty in Sept. 1951, went through O. R. School and then did duty in EENT Surgery. In March, 1953 he was transferred to NMRI.

Having won 16 of 17 dual meets last year, the 5 ft. 9 in., 160 lb. corpsman already is looking forward to next season's mat competition.

After discharge from service in Jan. 1955, Replogle plans to return to Cornell and complete pre-med and then go to medical school at Iowa U. or some other Midwest institution. His main ambition is to eventually become a general practitioner in his home town of Clear Lake.

Cagers Lose Coach; Ens. Sherin Leaves

The Naval Medical Center lost its men's varsity basketball coach when Ens. Paul J. Sherin, MSC, USN, departed recently for duty in Japan.

He will report later this month to the Commandant, Twelfth Naval District, for transportation to Yokosuka, Japan. Upon arrival there Sherin will report to the Commanding Officer of the U. S. Naval Hospital for duty at that activity.

His 1952-53 NNM cage squad won five of its last six games in the MAISAC loop after being hampered greatly almost all season by a lack of height. The Admirals finished their league slate with eight wins and twelve losses and later dropped a hotly-contested affair to Patuxent River, Md. NATC in the PRNC tourney.

The popular young Medical Service Corps officer was attached to the Naval Hospital command here before his recent transfer. Prior to his departure, members of the NNM cage team joined his many friends on the station in wishing Sherin a pleasant tour of duty at Yokosuka.

Wolff's Den

The Ump: Everybody roots for one of the competing ball teams, but nobody ever roots for the umpire. Sometimes the umpire is even sore at himself, if he knows within his heart that he booted one. It's a darn tough business, calling them fast and accurately, and demands a thorough knowledge of the rules, a knowledge of where to be at the right time, quick thinking, courage and honesty.

Bob Wolff

Umpires who arrive on the big-league scene have undergone intensive scouting before they are signed. They are watched closely not only for their work on diamond, but also for their conduct off the field. The prospect's living habits, his personality, his temperament, his reliability, his character qualifications, these and a host of other similar items are carefully checked and rechecked before the contract is offered.

Away from their work, I can tell you from personal experience, as a group you'll never meet more congenial fellows. On the field, they're all business, which is as it should be. A quiet business when all is going well, but when something goes wrong, and production increases. Then the fans give them the business, too.

Mud-Slinging: When the American League umpires get together in the dressing room before each game nowadays, there's a lot of mud-slinging involved. . . . but it's all aimed at the baseballs. The umps have a special can of soil to which they add water. The resulting mud is applied to the baseballs. After it dries, the mud is rubbed off, taking the shine off the baseball with it. The baseballs are now ready for the game. Fans grabbing foul balls may still detect the tell-tale smudge.

Mouse-Trap: In Amsterdam, N. Y., there's a pitcher who's buying up all the mouse-traps he can find. The pitcher's name is Harry Owens, and he's on the unlucky gentleman who was on the mound when the opposing team—Gloversville—got men on first and third. Just as Owens got set to pitch, a small field mouse ran across the diamond. Owens shied away—the umpire called a balk—and the Gloversville runner on third was waved home—probably the first run ever driven in by a mouse.

May 11, 1953

Newcomer!

Before Donna Lee Hickey could catch her breath she was lifted from the chorus line at New York's Copacabana night club and hustled off to 20-Century Fox in Hollywood. Indications are she'll remain there. Her first picture was "The Girl Next Door," with Dan Dailey and June Haver.

What to See Around D. C.

- MONDAY, May 11**—Weight Lifting Group, Cardozo Center, 13th & Clifton, N. W., 1930 to 2230 every Mon., Wed. & Fri.
—Painting classes, still, portrait, Friendship House, 619 D St., S. E., 1900 to 2200 every Mon., Tues. & Wed.
- TUESDAY, May 12**—Broadcast of Town Hall, Cardozo Center, 2000
—Baseball, Washington vs. Detroit, Griffith Stadium, 2030—also May 13, same time.
- WEDNESDAY, May 13**—"Night of January 16," Room 12, Campus U of Maryland, 2015, also May 14 and 15.
—Orchestra Dance, age 17 to 30, servicemen, YWCA, 17th & K Sts., N.W., 2030 each Wed.
- THURSDAY, May 14**—Baseball, Washington vs. St. Louis, Griffith Stadium, 2030, also May 15, same time.
—Young Adults Dance, service personnel welcome, Friendship House, 619 D St., S.E., 2000 to 2300 each Thurs.
- FRIDAY, May 15**—Archery Instruction, 16th & Kennedy, N. W., 1800 'till dark, each Friday thereafter commencing May 15.
—Instruction, Ballroom Dancing, Beginners, 1830 to 1930, advanced 2130 to 2230, each Friday.
- SATURDAY, May 16**—Armed Forces Day.
—Baseball, Washington vs. St. Louis, Griffith Stadium, 1430.
—Eastern Collegiate Sprint Rowing Championships Regatta, off Hains Point, all day 0930 on.
- SUNDAY, May 17**—Baseball, Washington vs. Chicago, Griffith Stadium, 1430—also May 18, 2030.
—Sailing Races, off Hains Point, 1300 to 1700, also scheduled May 24.
- MONDAY, May 18**—Harness Racing, 20 night meeting, Rosecroft Raceway, Md.
- TUESDAY, May 19**—Barnum & Baily Circus, Benning Rd. & Oklahoma, N. E. Scheduled through May 24.
—from the D. C. Recreation Department "Do You Know?"

Outboards Available At Special Services

Two six horsepower outboard motors are available to the various NNMCM commands on a first come, first served basis, in accordance with a schedule published by the Special Services Division.

This schedule makes available one motor to two commands daily, with special arrangements being made for weekends.

The motors may be checked out only between the hours of 0800 to 1500 Monday through Friday.

For specific information, you may obtain a copy of the schedule from the Special Services Division office.

Laff It Up

Never expect the naked truth in a modest statement.

Plastic surgeons can do almost anything with a human nose except keep it out of other people's business.

Never go around with a married woman unless you can go 10 rounds with her husband.

More lies are told about the age of liquor than the age of women.

A women's byword is: If at first you don't succeed, cry, cry again.

The average country cottage has five rooms and a path.

The rabbit is an animal that grows the fur that other animals get credit for when a woman wears it.

Five Days Remain To Elect Winners

(Continued from Page 1)

155, eyes—brown, time at NNMCM—since Jan. 1953 (this is his third tour here), time in Navy—since Oct. 1940, hometown—Washington, D. C. The chief is married and has two sons ages nine and eight.

Annette (Tillie) Tillotson, HM3, NNMCM Staff Clinic: age 23, height 5 ft. 4 in., weight 130, eyes—brown, time at NNMCM—since Oct. 1950, time in Navy—since Apr. 1950, hometown—Santa Barbara, Calif.

NH

Paul Eaton, HM3, night corpsman on ward 137: age 20, height 5 ft. 7 in., weight 150, eyes—brown, time at NNMCM—since Dec. 1952, time in Navy—since June 1951, hometown—Brockton, Mass.

June Sakmar, HN, corpswave on ward 6-D: age 19, height 5 ft. 2½ in., weight 120, eyes—brown, time at NNMCM—since Apr. 1952, time in Navy—since Aug. 1951, hometown—Wilmore, Pa.

NMS

William Randels, HM3, student, Lab 19: age 22, height 6 ft., weight 160, eyes—brown, time at NNMCM—since Nov. 1951, time in Navy—since Mar. 1951, hometown—Roxana, Ill.

Margaret Mayer, HM3, Physical Medicine student: age 26, height 5 ft. 7½ in., weight 128, eyes—hazel, time at NNMCM—since Mar. 1953, time in Navy—since Apr. 1951, hometown—St. Peter, Minn.

NDS

Dale Luxon, DT3, MAA office, Bldg. 1: age 20, height 5 ft. 6 in., weight 140, eyes—brown, time at NNMCM—since Jan. 1952, time in Navy—since May 1951, hometown—East Brady, Pa.

Clarice Hailey, DN, dental assistant, Bldg. 1: age 20, height 5 ft. 2½ in., weight 115, eyes—brown, time at NNMCM—since Mar. 1952, time in Navy—since Sept. 1951, hometown—Nashville, Tenn.

NMRI

William Flanery, DN, lab tech in Dental Research Department: age 24, height 5 ft. 10 in., weight 162, eyes—hazel, time at NNMCM—since Apr. 1952, time in Navy—since Mar. 1946, hometown—Washington, Yes, he's married.

Veronica (Ronnie) Conaway, HM1, secretary to CO, NMRI: age 28, height 5 ft. 3 in., weight 107, eyes—blue, time at NNMCM—since Aug. 1950, time in Navy—since June 1944, hometown—Maywood, N.J. She has a sailor husband.

NSHA

Dan Brandon, HMC, student: age 30, height 6 ft. 1 in., weight 180, eyes—brown, time at NNMCM—since Aug. 1952 (second tour), time in Navy—since Sept. 1941, hometown—Brewster, N.Y.

Ruth Quire, HM1, student: age 28, height 5 ft. 6½ in., weight 130, eyes—hazel, time at NNMCM—since Aug. 1952 (third tour), time in Navy—since Nov. 1944, hometown—Indianapolis, Ind.

"Too much starch!"

NOTES AND QUOTES....

NMRI

There must be some truth in the statement that some people forget their heads if they were not attached to their bodies. Who heard of driving your car downtown and then forgetting where you parked? Did you ever find it, Clancy?

Don't you laugh Red; I hear you can't remember where you left your topcoat. Second offense, too!

And how about Eckerson; where was it you left your jumper the night of the staff party?

Wonder what the Bacteriology Division has against red light. by one they seem to delight in running through them. Latest offense, Dr. Tuttle.

The Dental Division has a new name for one of its chiefs. They call him Fritz, now.

Griff, I hear you like to go out to dinner.

We welcome two new arrivals aboard: HMC A. Pollak, from a tour of duty in Palestine and DM2 R. N. Larkin, from USN Photographic Classification Center, Receiving Station, D. C.

Farewells are in order to HMC J. D. Gillmore, DT2 R. D. Hume, HM3 A. S. Garrett and HN J. T. Boggs.

Hear tell R. R. Jennings has turned in to sickbay; we think it is just a bad case of Spring Fever.

We were all glad to see Vina Weiss back to duty. Hear tell that convalescent leave was worth being sick for.

Dental Explorer

Back from Florida with a terrific tan and the usual fish stories, Calbeck—still trying to convince us of how big the sailfish was that won a twelve minute battle finally got away. Now, how big did you say it was, Doctor??

While we're on the subject of fish stories, there was another one caught recently. This one didn't even try to get away. Yep, L. Thibodeau, DN, returned to the fold after being married while on leave. Congratulations from all of us, Mr. and Mrs. T.

Shirley, Lesley, Terry, Anna and Clarice and of course Maggie are all discovering muscles they didn't even know they had. The girls all came out for the Waves softball team this year. We just hope they don't use all their energy in practice.

Capt. Allen is holding down the fort while Capt. Faubion is recovering in the hospital. Looks like our Exec. rooted that last basketball game in too enthusiastically. We all hope to see him back soon feeling well again.

At the time this column comes to you, Chief Pete should have returned from California. Bet she is sporting a far away look in her eyes too.

Still on the sick list are C. D. Smith, D. R. Ferguson, B. M. Martin, W. J. Bochniak, P. A. Branchflower, G. J. Waters and our latest victim, Dr. Mc Bride. We sure hope that you will all be well and back with us again soon.

Dr. O'Malley is on TAD to Memorial Hospital, New York, for a month too.

Understand the grass in the Chief's back yard is just about waist deep now. Is that right, Chief?

Well that's it for now so till next time, smooth sailing to all hands.

Med School Daze

Here we are again, sitting at the old typewriter trying to remember all the little scraps of information we've picked up in the past two weeks. Hasn't been very much, but here goes:

Lewis is back from his honeymoon looking quite cheerful, but thinner than ever. In all, though, he must have had a better time than Tom, who spent his first week of married life in study hall.

Nolin, of Special Services, has been running around like a chicken with its head cut off. His wife's been in and out of Tower 4 so often the past week that he's worried that the Fire Marshall will complain about all the false alarms. Seriously, though, we hope the baby's born before we go to press, Paul.

The third deck has recently acquired three new staff members: F. Keyes, HN (W), R. W. Horrobin, HM2, and C. L. Vanderveer, HM1, to help relieve the personnel shortage. Welcome aboard!

X-Ray School is losing Tex Harrell to COMNAVEF, and the print shop will soon say good-bye to Jones, who's leaving for Kwajalein in the very near future. Good luck, men.

The arrival of J. D. Parrish, HM2, for X-Ray School staff gave Mary Jane, the mainstay of the Enlisted Personnel Office, quite a headache until she discovered that the first and middle names were simply, "JD".

Now comes the saddest part of all, by cracky. We're going on a few days leave, and then some TAD to Norfolk for you know what. So, for the next two or three issues the Daze will be under the new management of our sidekick, by Jimminy. So it's so long for awhile, by cracky.

P.S.—Just learned that Nolin is now the father of a 5 pound, 8½ ounce son named David Allan, born on Saturday, May 2.

Navy Belles

Just around our house: Sports have taken over here; I'm not sure it's the weather or just a case of follow the leader. The tennis courts are packed and Nancy Aiken says she will teach beginners.

Salty and Pessie are car washing. Maggie got Mary Lou to help her wash her car and claims she gave M. L. the easy side. Clarice is adding flying lessons and Pauline is learning to drive a car.

The dancing school in our cellar should be on Broadway—we see the waltz to the mombo, Charleston to the Minuet. I'm just waiting to see a cake walk.

Our old friend "Al" has put the Mrs. permanently in front of her name and left our home to make one of her own. Our bride of the month, Ethel Weber Hagan, who was married last Saturday in the Catholic chapel. Our best wishes go to you both.

We have a new house mother in the person of Rose Hydzik. She has gone back to the Staff Clinic, and Cathy has joined the Hospital Physio staff. Hope you all like your new duties.

Here's hoping more of you will find time to attend the Thursday afternoon free-for-all discussions with Miss Wilson and Miss DeBorja. We bring a lot of questions and we get a lot of answers.

Don't forget to cast your votes for Mr. and Miss NNMCM, by George.

Staff and Patients Capture 12 Prizes At Occupational Therapy Competition

PRIZE WINNING ARTICLES of the recent occupational therapy contest were on display in the main lobby of Bldg. 1 from Armed Forces Day to May 20.

If you happened to pass through the main lobby on Thursday, May 14, when this station celebrated Armed Forces Day, you could not help but notice the exhibition of the prize winning handiwork of the Armed Forces Occupational Therapy competition held at the Philmont Country Club, Philmont, Pa.

This handiwork is characteristic of the fine work done by the hospitalized and the able-bodied personnel here at NNMC.

Silver plates of all descriptions were given for the excellent work of the personnel the following day. Capt. B. W. Hogan, CO, NH, at special presentation in the lobby of the Naval Hospital.

The following personnel won prizes for their work: Cyrus Livoti, PT3, received both the Vice-President's Trophy, and the first prize in the hospitalized section for woodworking.

Also receiving first prizes in the hospitalized section were: Sgt. Clyde L. Hall, USMC—metalwork, Frank J. Bubli, CSG1—weaving, and E. M. Berry, AD2—leather.

Those receiving second prizes in the hospitalized section were: Capt. George G. Herman—metalwork, on Hatfield, SD2—plastic, Ltjg. Waldo D. Groom—weaving, and Lt. Cdr. Donald J. Seigel—ceramics.

In the able-bodied section first prizes were awarded to: T. F. Williams, HMC, — plastic, George Burge, HMC3—woodworking, and Cannon Sapp, HM2—photography. The only second prize in the able-bodied section went to Lt. Cdr. G. E. Vaupel for woodworking.

Last Enlisted Dance Slated for Tonight

Tonight's enlisted staff and students dance will mark the last of its kind until sometime next fall. For the occasion, Willis Conover, the jockey for station WWDC has arranged for "The Septet" to supply the music.

The Septet is a jazz combo composed of members of Joe Theimer's band. It is anticipated that Willis Conover will be on hand to add to the festivities.

Dress for the dance will be as usual—uniform of the day or coat and tie for men and dress optional for women.

Music will start at 2100 and continue until midnight. Refreshments will be served.

Capt. W. E. Kellum Given Lyster Award By Aero Med. Assn.

At the Twenty-Fourth Annual Meeting of the Aero Medical Association, Capt. Wilbur E. Kellum, MC, USN, CO, Naval Medical Research Institute, was the recipient of the Theodore C. Lyster Award for outstanding and pioneering achievement in the field of aviation medicine.

This is an annual award of the Aero Medical Association which is now an international organization of physicians and scientists interested in aviation medicine. Dr. Kellum served as President of the Association, during 1949-1950.

The Lyster Award is named in honor of the late Colonel Theodore C. Lyster who was a prominent pioneer in this field. This award was established in 1947, and is represented by a handsome gold trophy of original design.

The Aero Medical Association grants two other annual awards, the Raymond F. Longacre Award for outstanding contributions in the field of aviation psychology and the Arnold D. Tuttle Award for best research article published in the Journal of Aviation Medicine during the past two years.

The Longacre Award is named in honor of the late Major Raymond L. Longacre who was an early leader in the fields of psychiatry and psychology in aviation. The Tuttle Award is offered by the

Capt. Wilbur E. Kellum

United Air Lines in honor of the late Medical Director of the Company.

Presentation of the awards was made at the "Honors Night" Banquet which terminated the Twenty-Fourth Annual Meeting.

Melvin Sells Cartoon

Cartoonist Joe F. Melvin, HM1 of the NNMC Finance Department, has crashed the publication market again. His latest cartoon creation may be seen in the May edition of the Writers' Digest.

'Mr. and Miss NNMC' Winners Are June Sakmar and Paul Eaton

TITLE WINNERS, June Sakmar and Paul Eaton, receive gifts from Capt. E. F. Evans at the conclusion of the local variety show.

Two members of Naval Hospital, June Sakmar and Paul Eaton were named Miss and Mr. NNMC at the conclusion of the NNMC variety revue on May 15.

Variety Show Stars All-Local Talent; Good Crowd Attends

The long-awaited NNMC variety revue entitled "Workman's Holiday" drew a responsive crowd Friday, May 15 in the auditorium.

A variety of scenes, including solos, duets, instrumentals, comedy skits and dancing, were staged by the all-local cast, under the direction of Jerry Golston, HN, now a patient on ward 6-D.

Rendering vocal solos were Gwen King, HN, corpswage on ward 129, and Bob Collins, HM3, N. P. staff corpsman. Gwen first sang "Red Sails in the Sunset" and later returned to deliver "Stormy Weather."

Bob, who besides his vocal selections on stage, was in charge of music for the entire show and handled the base in several of the combo numbers.

Also strumming the base for the combo was Monroe McLaughlin, HM3 of Lab 20. Manipulating the drums for both combos was Roland E. Swanson, HM3 of NMS.

On the keyboard was Arthur R. Luther, HM3 of NMS, and Harold

After an introduction by Lt. J. O. Atkinson of Special Services, Capt. E. F. Evans, acting executive officer for NH, introduced them and presented them with pen and pencil sets.

"You're very fortunate to be designated Mr. and Miss NNMC," quipped the captain; "think how easy it would have been to be Mr. and Miss Bedpan of 1953!"

HM1 John Grant of the NNMC Security Office was also brought to the stage and publicly acknowledged for originating the idea for the contest.

When the last count was taken on May 13, \$189.82 had been placed in the voting bottles, which was turned over to Chaplain Kosky for the Navy Relief drive.

June drew 4,910 votes (\$49.10) to easily take winning position. Paul accounted for 2,997 votes to edge out Chef Luber of NNMC for the winning male title.

June, who works in the Plastic Surgery clinic, says she thinks her patients had a lot to do with her winning the title. The dark-eyed Wave, who will celebrate her 20th birthday the 14th of next month, had another bit of good news this

Painter's Cart Saves \$483 Per Year

THIS IMPROVED CART FOR PAINTERS, conceived and built by Mr. Richard S. Tavenner, modelmaker in the Maintenance Division, won a \$50 beneficial suggestion award and also was selected as the beneficial suggestion for April. This cart has a smooth top which can be used as a work table and shelves of suitable dimension which hold cans of paint up to five gallon size. A metal tray holds brushes, while a wire to hang them upon is provided on one end with a rack for carrying ladders on the other. It is estimated that one of these carts will save \$483.60 per year in labor and time. The Navy plans to build more like this.

A Father's Day Tribute

On this day the world will pay him homage,
We will each try to prove, in our own way,
Our love for the great man we call Father
On this day we've set aside as Father's Day.

I can remember the days when we went hiking
How his face would light up in smiling joy;
When I did something which would please him
His hand would pat the shoulder of his boy.

I learned from him to be honest and truthful,
To be a loyal friend and pal in every way.
Next to and equal to our darling mothers
Are the fathers we are honoring here today.

If you are lucky, have your father with you;
Tell him how glad you are to have him there.
Thank God for the blessing which he gave you
When he placed you within your father's care.

—Albert H. Jones, Civilian Guard.

The Chaplain's Corner

The Word of Faith

by Chaplain T. L. Shenefelt

"But what saith it? The word is nigh thee, even in thy mouth, and in thy heart; that is, the word of faith, which we preach; That if thou shalt confess with thy mouth thy Lord Jesus, and shalt believe in thine heart that God hath raised him from the dead, thou shalt be saved. For with the heart man believeth unto righteousness and with the mouth confession is made unto salvation."

Romans 10:8-10

It has long been my conviction that the Bible is the most important book our lives. The dictionary is necessary. The numerous encyclopedias are helpful. Novels help us pass the time. Books about the Bible can stimulate our thinking. However, there is one definite and decisive act, common to all of these books, which must be performed if they are to help us. . . . the act of reading. Is it not true that much of our lack of understanding the Bible is because we do not read it?

Looking at the several verses quoted from Romans we find two familiar terms . . . mouth and heart. These two organs are closely associated with some of the deepest spiritual realities and teachings of the Christian church . . . confession and belief. The early church grew only as one Christian took time and interest enough to tell a non-Christian about the Lord Jesus Christ.

We are amazed today as we consider the world-wide effect of this word-of-mouth witnessing. The word of faith, planted in love in the needy soul, will still bring forth the fruit of belief in the living God today! The results of this two-fold action are salvation.

Our world is dominated by a fear of this term. Men continue to try to escape it by avoiding the church and the Bible. The word has been taken out of its context in recent years and the world uses it in many ways. The Bible uses the term only in relation to the individual soul's eternal salvation.

What are you confessing with your mouth? The Bible calls us to confess the Lord Jesus. We spend too much time telling others of our accomplishments or of the accomplishments of our church and too little time telling what the Lord has done for us! What do you believe in your heart? Will you take time to learn of Him by reading your Bible? "For with the heart man believeth unto righteousness; and with the mouth confession is made unto salvation."

G.W.U. Gives Courses In History, Speech; Register Next Week

Registration for two college level courses to be given at NNMC under the auspices of George Washington University will be held at the Information and Education Office, Bldg. 102, on June 1, 2, 3, 4 and 5 from 0830 to 1630.

All interested civilian and service personnel are eligible for enrollment. Patients must secure the permission of their Ward Medical Officers before being allowed to enter classes. The schedule for these courses is as follows:

The Development of the Civilization of the U. S. (71-72), Monday and Wednesday, 1830 to 2100, Bldg. 131.

Effective Speaking (1), Tuesday and Thursday, 1830 to 2100, Bldg. 131.

These courses will run for seven and one half weeks and will carry three hours of college credit. The cost of each course is \$30 for military personnel and \$36 for civilians.

A deposit of \$10 payable to George Washington University (check or money order, please—no cash) will be required on registration.

If enrollment is not sufficient to begin a class, payments will be returned in full.

First sessions are scheduled to begin Monday, June 8 and Tuesday, June 9. Further information regarding this program is available at the I and E office, Bldg. 102, or call Ext. 547.

—These Gave—

Members of NNMC who donated a pint of blood during the period of May 4, to May 18, were:

NNMC

Sylvester Dudzik and Raymond Howard.

Divine Services

Protestant

Daily—
1200—Daily Meditation broadcast from Protestant Chapel (Monday through Friday)

Sunday—
1600—Holy Communion (Lutheran Liturgy)—Protestant Chapel
1600—Divine Worship
—Main Auditorium

Friday—
1000—Episcopal Communion—Protestant Chapel—Chaplain Linaweaver

Catholic

Daily—
0715—Mass—Catholic Chapel

0630—Mass—Main Auditorium
0830—Mass—Main Auditorium

Jewish

Congregation Beth El of Montgomery County will hold services every Friday night at 8:30 P.M. and Saturday morning at 10:00 A.M. in the Pook's Hill Auditorium, 3 Pook's Hill Rd. The services will be conducted by Rabbi Martin Kessler.

The services of Rabbi Harry Kaufman, representing the Jewish Welfare Board, are available to all Jewish Personnel and Patients at the National Naval Medical Center. Rabbi Kaufman may be reached by calling the Chaplain's Office, Ext. 324, or by call direct—Office: RA. 3-5371—Home RA. 3-0755

Capt. Hancock Honored at Wave-Part

A FRIENDLY CUP OF TEA (there was coffee too) started the afternoon festivities when Capt. Joy Bright Hancock visited with the local Wave-Part on May 6. Ruth Quire, HMI of NSHA, Nancy Aiken, HM3 of NDS, and Gerry Bourne, HM3 of NH, chat with the Captain. The tea was held to say goodbye to Capt. Hancock who will retire as Director of the WAVES on June 1.

AFRS Platter Chatter

Hot and Cool Jazz, Moldy Fig, Bop All to be Debated on 'Hot vs. Cool'

Have any of your friends ever bothered you with questions about the difference between Hot Jazz and Cool Jazz? Or Dixieland and Birdland? Traditional and Modern? Moldy Fig and Bop? Whether you're square or already aware you'll find the answers immediately following "Douglas of the World" this week and next.

To point up the differences between these two sharply contrasting schools of jazz, two bands were assembled at Birdland, the Broadway jazz spot, and both were let loose on the same four tunes.

Heading the modernist faction is John Birks "Dizzy" Gillespie, a product of Cheraw, S. C., who rose in the mid-1940's to become an international symbol of what was then known by the disarming name of bop, but has since evolved into acceptance as "Cool Jazz."

Leading the Dixielander's is Jimmy McPartland, the youthful veteran whose horn was a highlight of 1927-28 recordings of pioneers like McKenzie & Condon's Chicagoans, Ben Pollack's orchestra, the Wolverines, and Benny Goodman's first recording combo.

Whether your tastes in jazz run to the hot or cool, whether or not you can define Dixieland Jazz or Birdland Jazz in words, you're bound to find something of major interest in the music on these records. And, incidentally, it ought to help settle a lot of arguments!

AFRS Schedule—Channel C—1300-1345—Monday through Friday

May 25—1300—Afternoon Rhythms; 1330—Fiesta Time
May 26—1300—Music for Moderns; Hill-Billy Hit Parade
May 27—1300—"Douglas of the World" (The Flame);
1330—"Hot versus Cool"
May 28—1300—Concert Hall; 1330 Sports Program
May 29—1300—"Secret Mission" (Roadblock); 1330—to be announced
June 1—1300—Afternoon Rhythms; 1330—Fiesta Time
June 2—1300—Music for Moderns; Hill-Billy Hit Parade
June 3—1300—"Douglas of the World" (The Sixth Column);
1330—"Hot versus Cool" (continued)
June 4—1300—Concert Hall; 1300—Sports Program
June 5—1330—"Secret Mission" (The Homesick Angel)
1330—to be announced

Advancement in Rate Brings Good News To Enlisted Personnel Effective May 16

The advancements in rate began coming in on May 7 and most of them were announced by May 8, with the exception of the Naval Dental School (which was printed in the last issue). Here are the names (by command and rate) of those receiving promotions on May 16.

NNMC
HN to HM3
Walter R. Green, Hugh C. Smith and L. W. Zoller Jr.

NH
HM2 to HM1
Ruth E. Clarkson (W) and Forest W. Conley Jr.

HM3 to HM2
George M. Atkins, Ruby C. Bassham (W), Lloyd E. Davis, C. W. Goldsborough, Halden P. Smith and James W. Stephens.

HN to HM3
James H. Akers, Robert H. Allen, Francis J. Anama, Edwin R. Annable, Robert R. Auger, Richard A. Ayd, David A. Bain, Edward F. Baker, C. C. Barker, Claude A. Behrens, Delano W. Bolter, John A. Briggs, Kenneth C. Brown and Bobby J. Burge.

Also: Robert H. Cagle, Robert P. Calhoun, Bud W. Cammack, Arden H. Carpenter, Hazel P. Carpenter (W), Francis T. Carr, James M. Catania, Thomas E. Chambers, Robert L. Collins, John C. Cool and Henry I. Cross.

Also: Theodore E. Davey Jr., Albert E. Delorimier, Leonard A. Dibrango, Ray W. Dinmore, Malcolm G. Doliber, Don M. Drake, Jerome L. Draucker, Donald C. Easton, Everett J. Eggers, Herbert Erickson, Charles R. Foster Jr. and Joseph S. Freeman.

Also: Franklin C. Gardner, Walter S. Gass, Rodney E. Gates, Paul Gatterdam, Frank G. Gayle, Guy T. Germana, James A. Gibbons, William S. Gosney, Mickey I. Greenfield, Boyd A. Harris Jr., John N. Healy, Roy M. Hedlund, Edith E. Heinen (W), Betty L. Herrod (W), Henry J. Heydt, Ralph A. Holbrook, James L. Houser, Charles J. Husha and John H. Howard Jr.

Also: Grady J. Icard, James W. Jones, Richard P. Kim, Bernadine King (W), Richard J. King, David A. Koenen, Joseph R. Krause, Joseph M. Laterza, George Lenhoff Jr., John F. Loftis, David L. Lottes and Arthur R. Luther.

Also: Allen B. MacAller, Loraine C. Magill (W), Kendall D. Martin, Robert E. Middleton, Mary Misiewicz (W), James R. Moore, Charles E. Murrell, Reginald E. Newman, Richard A. O'Connor, Harry C. Owens and Claire P. Pfingsten (W).

Also: Cyril G. Ransopher, Charles A. Robbins, Paul L. Rodgers, Richard M. Rockwell, Peter F. Russo, Jack H. Ryan, June M. Sakr (W), James P. Seachord, Gerine J. Sharp (W), William Wehrin, Verdon R. Skipper, Kenneth R. Snyder, Richard J. Strad, Clarence Stevens Jr., Billy E. Thorne and Donald Utescher.

Also: Pete J. Veneziano, William Vinson, Charles R. Vitello, Edna Vogel (W), Edith L. Weatherall (W), R. M. Whithurst, Clarence W. Williams, Charles O. Womack, David E. Wolfe, Joseph H. Zawodnik and George A. Zink.

NH Patients
(AD3 to AD2) Eugene K. Kiser, (AM3 to AM2) Leo D. Newman Jr., (AEAN to AE3) John C. Welch, (CDCN to CD3) Robert W. Merritt, (CSSN to CS3) Bennie D. Gott, (EMFN to EM3) James W. Newbrough, (HN to HM3) John J. Keeney, (SKSN to SK3) Charles Ribelin and (TESN to TE3) Perry P. Chapley.

NMS
HM2 to HM1
Melvin A. Bendixen, William R. Hew, Robert L. Davis Jr., Eugene Evans, Arthur Marshall, Lester McKee, M. C. Posipanka (W),

May 25, 1953

Joan Mihay Leaves; Managing Editor To Become Civilian

The words head, bank, galley and deck have meaning for all Navy people, but to Joan R. Mihay, JO2, they have an entirely different meaning as they are part of the long list of newspaper lingo.

Joan, who will be discharged this Thursday to join her husband in California, has been associated with the NNMC News since January of 1951 when she started writing women's sports stories.

In May of that year she became assistant editor and the following August she moved into the job of managing editor, which she has held up until now.

If the newspaper lingo, with such words as galley, lead, slug, captions and dummy, sounds unfamiliar to Medical Department personnel, Joan says she was equally baffled by such terms as N.P., U., EENT and ECG, which she found herself writing about.

Joan was a philosophy major at the U. of California before joining the Navy in the spring of 1950. When the Navy informed her that

Joan R. Mihay, JO2

they had no billets for philosophers, she chose journalism. After a three-month's course in Navy journalism at Great Lakes, in which she placed first in her class, she was assigned to NNMC. Except for a six week course in Public Information in New York last spring, she has remained here since then.

Fond of sports, she had been a member of the women's basketball, softball, volleyball and tennis teams on the station.

Joan was married while home on leave last November and will pack her trusty 1941 Chevrolet "Henry" this week and start on the three-thousand-mile trip home.

Assistant editor, Bob Mapletoft will take over the News until a replacement is found. He will be aided by sportswriter Clyde Schubert, who will double as editorial advisor.

CPO Rates Come in For 4 Station POIs

Advancements from first class to chief petty officer were published in BuPers Notice 1430 dated May 1. Of the 32 new dental chiefs in the Navy, one is staff at the Naval Dental School here: Robert F. Barton.

Of the 46 newly rated chief hospital corpsmen, three are members of the Naval School of Hospital Administration and one of the Naval Medical School.

New Chiefs at NSHA are George F. Brueggeman, James J. Foti and Raymond Grim. Newest chief at NMS is John H. Austin.

He Shouted 'Bridge-Hard Right Rudder!' Saving His Ship and Earning the DSM

GOOD CONDUCT MEDAL is awarded to David Hollifield, HM1, wearer of the DSM ribbon (see story below) by Capt. J. L. Enyart, CO, NMS at the May 9 personnel inspection.

When David J. Hollifield, HM1, now a student in NMS's Optical School, received his good conduct medal and ribbon at the May 9 personnel inspection, it marked the sixth ribbon he is entitled to wear.

Besides wearing four frequently-seen ribbons for his naval duty in WWII, Hollifield wears the blue and yellow Distinguished Service Medal ribbon. The DSM is the third highest Naval award given. Hollifield received it for saving his ship from a torpedo in 1942.

"Holly," as his friends call him, was a seaman second class. He had joined the Navy in his hometown of Richmond, Va., the previous December. He had been aboard the USS North Carolina since January.

On this particular September day, the ship was in the waters off the Solomon Islands. As Holly tells it:

"I was walking around the ship one afternoon—up toward the bow. I saw this wake heading toward the ship on the port side. I ran up to the gunnery watch, grabbed the earphones off his head and bawled 'Bridge—hard right rudder!'"

"The ship made the turn and the torpedo missed the bow by about five feet. Planes of the carrier Enterprise were overhead. As soon as the torpedo missed our ship they sighted it and a Japanese sub and sank them both in a matter of minutes."

Asked if he were frightened, Holly admitted he was "plenty scared." However, he added that he was "even scarier" shortly after when he was summoned to see "the old man."

"You see," he explained, "no one is supposed to use those earphones without permission from the O. D., and I was a little worried about the results." Holly's worries were needless, for the captain sent in the report of the incident which resulted in his receiving the DSM.

Holly will never know the extent of the damage that torpedo might have caused had he not seen it when he did. He has an idea, though, judging by the damage incurred a few months later when a torpedo did strike them, killing five of the crew.

All this was in 1942. Since that time, Holly has been married, become the father of four children, been in and out of the Navy two times and worked his way up to hospital corpsman first class.

At present he and his wife Mary Theresa live in Rockville with their three daughters and one son. Holly will graduate from Optical school the end of July.

Former HN Commissioned

George Edmondson, former HN in the Naval Hospital's Pharmacy Department, was commissioned as a line ensign at his graduation from OCS in Newport, R. I. on May 7. Ens. Edmondson is now assigned to an LSD-5 in the Pacific.

Local Cast of Workman's Holiday Presents Top Notch Variety Show

NSHA to Graduate 41 At June 17 Exercise

Graduating exercises for the Fourteenth Officers Class of the Naval School of Hospital Administration will be held on June 17, Cdr. Max E. Zimmerman, CO, NSHA announced.

The exercises will terminate a ten months' course for the 35 officers of the Medical Service Corps and Hospital Corps of the Navy, five MSC officers of the Air Force and one Naval Medical Officer from the Republic of Korea.

R. Adm. C. J. Brown, MC, USN, Deputy and Assistant Chief of BUMED, will be the principle speaker for the occasion. Following his addresses, Cdr. Zimmerman will present diplomas to the graduates.

The school was established on Aug. 3, 1942 and as of June 17, 1953, 612 officers will have graduated. The next class will convene on Aug. 31, 1953.

New Interest Rate Authorizes 4.5%

An increase of one-half percent in the maximum allowed interest rate on GI loans guaranteed by the Veteran's Administration was announced the first of the month. This action raised the rate from four percent to four and one-half.

The new rate will apply only to loans made in the future. All existing loans will be continued at the four percent rate under which they were negotiated.

Lenders in many areas have insisted on large down payments and frequently would only make loans for comparatively short periods. VA believes the new rate will encourage many lenders to make loans with small down payments, or no down payment, and that more loans will be available on 25-year or even 30-year terms.

Versatility Shown in Varied Skits

(Continued from Page 1)

"Doc" Farnham, DT2 of NDS' photo lab. Farnham appeared alone to offer several keyboard selections early in the show. Later he staggered on stage in the Dirty Mug scene to join George Gray, HN of NH, in an accordion duet. George appeared first with an accordion solo.

Two of the most delightful scenes were staged by the vocal duet of Pauline Krampitz, HM3, Phys. Med. student and Cyril Ransopher, HM3, N. P. student. Pauline and Cy first appeared with "Desert Song" and later with "I Need Sympathy." They were accompanied by Dave Lottes, HM3 from Food Services Division.

Pauline has appeared in operettas as well as an accapella choir in her hometown of Denver, and studied both voice and guitar off and on for five years.

Cy is a veteran of two opera company productions in Cleveland and was a member of the Akron Civic Chorus for two years.

In the "Red Sails Scene," Sid Green, civilian employee from the Food Services Division, rose to offer several harmonica selections. He was followed by Joseph A. Dressler, HN from NH, with "Five Foot Two" on the uke.

Fred Porter, HN, T-7 corpsman who M.C'd the show (and incidentally had quite a bit of unexpected ad libbing to do due to backstage difficulties), also offered trumpet impersonations of Louis Armstrong, Harry James and Ray Anthony.

Chaplain McGinnity, who was originally slated for a song, piano selections and a jig, was injured before the show and was taken to the stage in a wheel chair. The chaplain carried on (excepting the jig, of course) and after his piano selections, sang several numbers including the Irish favorite, "A Little Bit of Heaven."

Annette Tillotson, HM3 of staff clinic, and Frank Anama, NH HM3 attached to Special Services, wrote and enacted most of the comedy skits. In the crime scene they were assisted by Roy "Tiny" Tandy, Lab 20 HM3, (complete with diapers) and Joe Zawodnik, EENT's HM3. Joe also appeared in several other comedy bits, including his portrayal of "Digger O'Dell."

The three dance numbers were as varied as the rest of the acts. First to appear was Myrna Mendez, HN of Lab 20, who danced South American style. She returned for an encore in the "Red Sails Scene."

Four Waves (Margaret Mayer, HM3 of Phys. Med. School, Clarice Haily and Anna Schuricht, DNs of NDS, and Claire "Sandy" Pfingsten, HM3, staff on ward 130) presented a dance in pantomime to "Lucky Old Sun."

Anna, who was technical advisor for the production, and Clarice, who was in charge of the stage crew, worked out the choreography themselves.

The third dance number was the hilarious rendition of the Charleston by Barbara Bradford and Shirley Strack, both HNs on ward 128. Dressed in flapper costumes (which really flapped) the girls had the audience roaring.

Not appearing on stage, were Lorraine Mann, HN from Physical Therapy, who helped with the painting and settings backstage, and N. P. student Jim McCloud, HM3, who handled the lights.

Both Title Winners From Large Family

(Continued from Page 1)

month when she learned she had made third class.

June is fond of dancing, movies, bicycle riding and occasionally tries her hand at tennis or swimming. After disclosing this much about herself, she said, "Let's talk about somebody else," and proceeded to talk about her family.

She is the second oldest of a family of nine children—three boys and six girls. Although none of the boys have reached the age for military service yet, her sister is A/3c Sakmar, USAF, now stationed in New York.

Paul, who is also an HM3, comes from an even larger family than June—four girls and six boys—of which he is the youngest. Two brothers are now veterans of the Marines, one of the Air Force and one of the Navy.

Paul, who is a staff corpsman on the N. P. service, hopes to major in psychology when he is discharged in 1955.

Right now, Paul spends most of his spare time in Alexandria with his fiancée Miss Barbara Emerson, a student nurse. Paul and Barbara hope to be married next summer.

Regarding the contest, he says that he thinks the voluntary campaigning of HM3 Butler, Barracks 12 MAA, HM1 Mayhugh of Food Services Division, and the entire N. P. staff are responsible for his winning.

National Press Club Honors Combat Vets

Members of the National Press Club played hosts to four members of this station on Friday evening the 15th, at a special party honoring four staff members who have seen combat.

Those attending were; Fioramante G. Baggio, HM2, of NH; Russell E. Armstrong, HMC, and Emmett E. Houston, HM1, of NSHA, and Paul E. Bentley, HMC, of NMS.

Those attending were treated to cocktails and dinner.

Med. Support Team Helps with Parade

This station celebrated Armed Forces Day on Thursday, May 14, with guided tours and movies depicting the work here on this station. The following Saturday marked the large display and showing at Bolling Air Force Base, preceded by a parade.

The Naval Hospital detailed Cdr. C. A. Stevenson, MC, USN, to Washington to serve as officer in charge of the medical support team from the Naval Hospital during the parade. Cdr. Stevenson was also in charge of the first aid station at the corner of 4th St. and Constitution Ave.

The first aid station was staffed by William P. Badley, HMC, James L. Houser, HN, Don C. Eastern, HN, Gerald A. O'Rourke, HN, and Henry J. Heydt, HN.

Also participating in the parade were patrolling ambulances which circulated throughout the area and rendered assistance where necessary.

Five Marine patients, undergoing treatment here at NNMHC, were honorary reviewers, and were special guests of the Armed Forces Day Parade Committee. They were Pfc. Kenneth W. Martin, Pfc. William T. Tallent Jr., Cpl. Bobby Patterson, Sgt. Jack D. Smith, and Cpl. Robert G. Spain.

EM's Dances Halted Picnics Take Over

Regular monthly enlisted staff and student dances will be discontinued for the summer, according to Special Services Officer Lt. J. O. Atkinson.

During the summer months, special Services will sponsor picnics and outings for individual commands and departments.

With the goal in mind that each station staff member will be able to attend at least one such picnic outing, Lt. Atkinson stated that financial assistance from the station recreation funds will be available based on the number of military personnel who will attend.

May 23, 1953

Two Unbeaten Intramural Teams Left; NSHA Shows Great Promise for Future

NSHA and NMRI were the only clubs in the Medical Center Intramural Softball League to knock off their first two foes, every other outfit in the ten-team circuit losing either its first or second game.

Power-laden NSHA chalked up victories No. 2 and 3 of the yet-young season by whipping Lab 19, 9-2, on May 15 and dumping Pharmacy School, 13-1, May 18. NMRI's hustling ball club scored its second straight win by squeezing past Pharm. Sch., 12-11, in a tight battle May 20.

Blazin' Bob Hartley, ace NSHA moundsman, hurled a pair of two-hitters in his squad's recent triumphs and has yet to yield more than two safeties in a loop contest. Galuska of Pharmacy School collected his team's lone brace of bingles in the loss to red-hot NSHA.

Four runs in the last of the sixth pushed NMRI past Pharmacy, with Hamby the winning pitcher and Blount the loser.

Dental rebounded from its initial loss to crush Lab 20, 26-8, on May 18, piling up ten tallies in the seventh stanza. Lab 19 notched its second win in three tries by nosing out Center Command, 10-9, May 20. The deciding run was scored in the final frame. Rampsch got the win, Zoller the loss.

Tennis Ladder Play Designates Players For Summer Tourney

Now that the weather is getting a bit more on the warm side, the tennis courts are beginning to be populated more frequently. In the Special Services Division office there is a ladder for budding Jack rammers and so far there are 10 names on that list.

This year there are hopes that a team might be organized with matches against other bases in the immediate vicinity. This, however, still in the planning stages, and will of course depend on the interest and willingness of the bet-players to participate in such matches.

Are you interested in a good, friendly game of tennis, or do your steps run more in the competitive field? Whatever your desire, why not sign up for the matches and see how you come out?

With the ladder system presently in operation, from your place on the ladder, you are allowed to challenge the first or second person immediately above you.

For example, let's say that you are number eight on the ladder. You can challenge either number seven or number six. Let's say that you win the match; you take your opponent's place and he takes yours.

The ladder is presently working, and matches are being played. There are only a few rules to abide by, and these are very simple. The challenger furnishes the balls for the match, and the match must be played within two working days of the time when the challenge was made.

For example, if you were challenged to a match on a Friday you could have until the following Tuesday to play. Also if you were challenged to a match on a Wednesday you would have until Friday to play. Should the challenger lose his match he cannot re-challenge the same opponent for a period of seven days.

So far there are 10 names on the tennis ladder: 1. D. Powell, HMC, Ext. 371, 2. Lt. R. E. Lieurance, Ext. 226, 3. P. S. Cichanowicz, Ext. 51, 4. R. M. Hedlund, Ext. 226, 5. Lt. W. B. Lookey, Ext. 615, 6. Lt. J. Walser, Ext. 519, 7. W. S. Gass, Ext. 350, 8. K. D. Martin, HN, Ext. 459, 9. F. E. Weldon, HMC, Ext. 344, 10. R. W. Mapletoft, HN, Ext. 581.

May 25, 1953

Intramural Leagues Start Season Play With Hits Galore

Base hits were a dime a dozen during the first week of play in this year's NNMC Intramural Softball League, with many home runs being belted by both winning and losing teams.

Notching triumphs in their opening loop games were Lab 20, NMRI,

That Special Urge

BREATHES THERE A MAN with soul so dead, who never to himself has said, "My bat shall rest upon upon his head!"—the umpire, that is.

Lab 19, Center Command and NSHA. The last-named squad looked especially good in walloping Naval Dental School, 25-2, on May 11.

Hartley of NSHA hurled a two-hitter against NDS, while his mates were blasting the ball all over the field. May and Fisher led the Victor's batting barrage, each rapping the pellet hard several times. The game was called after four-and-a-half innings because of the one-sided score.

Lab 20 launched its campaign on May 11 by edging out Pharmacy School, 4-2, as McCarey bested Blount in a pitchers' duel. The latter chucker's wildness cost him the game. Lab made three hits, Pharmacy five.

A pair of slugfests on May 12 saw Center Command clip X-Ray School, 21-15, and Lab 19 outlast the NH Doctors, 20-18, as the basepaths took a real beating.

Center Command outhit X-Ray School, 24 to 8, both clubs committing many errors afield. Salchert, Suttelle and O'Keefe homered for the victors, with slow ball O'Keefe netting the win in a relief role. Wangarden, plagued by poor support, went the route for the losers.

Lab 19 hammered out 22 safeties in its hitting battle with the NH Doctors. The losing nine garnered 21 bingles, including five circuit clouts.

John Rampsch hurled the entire tilt for the Labmen and also slammed two of the winners' eight round trippers. Kerby and Johnson also collected two homers apiece. Doohen and Durden shared mound duties for the doctors.

Tallying five times in the third frame, NMRI went on to rack up a 10-6 decision over NH Barracks on May 13. Hamby was the victorious twirler and Hedlund the victim. This completed the first week of league play.

Girl on subway reading death statistics: "Do you realize every-time I breathe someone dies?" "Why don't you try using chlorophyll."

Admirals Clash with Cheltenham Here On Diamond One in Tonight's Opener

Varsity softball officially returns to NNMC tomorrow evening when Coach Jay Bell's Admirals open their 24-game MAISAC schedule. Cheltenham, Md. Naval Radio Station will provide the opposition in a game slated for 1800 on Diamond No. 1.

Naval Medical's initial road trip of the 1953 campaign will take place Thursday afternoon, May 28, when NNMC travels to Patuxent River, Md. to encounter the strong Naval Air Test Center in a MAISAC contest.

Coach Bell has indicated that he will start either fastballer John "Scratch" Crabtree or Lefty Ray Jeter in tomorrow's loop inaugural, with Paul Bennett or Ray Gismond doing the catching. At this time the hurling and receiving staffs seem to be the least of Bell's worries.

In the outfield for NNMC will be Ron DeVice, left field; Joe Allgood, center field, and Jim Bush, right field. Around the infield it will be big Jim Des Rosiers at first base, speedy Noel Schilling at second, slick-fielding George Radigan at shortstop and hard-hitting Jim Greer at third base.

The probable batting order will be: Allgood, Schilling, Greer, Des Rosiers, DeVice, Bush, Radigan, the catcher and the pitcher in that order. Coach Bell hopes that a combination of steady hurling, heads-up fielding and smart base running will make up for an expected lack of heavy stickwork on the club's part.

Also on the NNMC varsity softball squad are Pete Veneziano, fiery little catcher-base coach, infielders Ken Brown and Mort Pilcher and outfielder Ernie Reed. The latter possesses a tremendously strong throwing arm.

Bell, who plays first base or the outfield, also will be on the active playing list but hopes he can confine his duties to that of a bench manager.

Behind the reliable pitching of Crabtree and Jeter, the Admirals won two recent exhibition games with little trouble. They downed National Institute of Health, 5-2,

and erected an early 8-0 lead in whipping Al's Tree Service of Silver Spring, 9-4.

NNMC's league slate for the first three weeks of the season is as follows:

May 26—Cheltenham, here (1800).
May 28—Pat. River, there.
June 2—Walter Reed, here (1800).
June 4—Cheltenham, there.
June 9—Pat. River, here (1800).
June 11—Walter Reed, there.

Marines Drop Match To Women Keglers

The Women bowlers took the lead in their game with Henderson Hall, on the evening of the 14th. Miss Dixon holds all honors for the evening, both for the high game with a 169, and the high series with a three game average of 149.

They made up for their last tussel with Quantico, by winning all of the four games. League standings are still not available, but to date they have 17 wins and 11 defeats.

The team still has one game to play, the 7001st WAC on June 4th. This game is to be played here at NNMC, but the 7001 WAC outfit have no home court so they will bear the cost of the pin boys that night.

A dumb girl counts on her fingers but a smart one counts on her legs.

One husband claims his wife is celebrating the third anniversary of her 29th birthday.

He admired the dress of the leading chorus girl.

"Who made her dress?"
"The police."

Wolff's Den

Progress Report: I worked out at Griffith Stadium the other day with Gil Coan. And it's a close race as to who's more anxious to have Gil back in the line-up. . . the left fielder or the ball club. His loss has hurt the club tremendously. Gil was the Nats' top hitter in exhibition games with a .378 mark, and his bat had sparked the team to a sparkling exhibition record. Then came the Sunday in Charlotte on the trip North, the broken ankle sustained in a crash into the left-field wall, and the sudden dampening of all the high hopes.

Bob Wolff

It is little satisfaction to Gil to recall that back in 1950 he was also sidelined for a long time, yet snapped back to do better than ever. That was the year he suffered a fractured skull as the result of a collision at second base. Gil was out from June 2nd till July 14th, but when he came back to action, he boosted his average 54 points and it was still climbing when the season ended.

So injury-wise, Gil has now run the gamut from head to toe. Meanwhile, Nats' first-division hopes are caught in the middle.

For Your Sports Reading: An unusually large number of good sports books and magazine articles have come out in the past week. Here are some I believe you'll enjoy:

Radio and TV Baseball. . . . 160 pages which includes a digest of rules, glossary of baseball terms, full schedules, rosters, ballpark diagrams, names and numbers of the players, and pictures and biographies of the major-league announcers. Edited by Hy Turkin, published by A. S. Barnes and Co., New York, and sold at practically all news stands for 50 cents.

Sport Magazine (June issue) . . . "Bucky, the Ballplayers' Manager" by Shirley Povich. "I like to play for Bucky Harris," has been a familiar line in the majors for years. The ex-Boy Wonder is still winning friends—and ball games. This is the story of the boy who came out of the pits at the Pittston, Pa. coal mines to play his first baseball during the miners' lunch hour, and continued on to big-league fame as player and manager.

NMRI

by R. Conaway

Now that we are getting into the "dog days" of summer, we begin to hear many "my dog is smarter than your dog" tales. Chief Redwood claims that his dog is smart, you have to spell words you don't want him to understand. Don Heye topped that with the statement that his pup was so clever, they couldn't even spell in front of him. Now I've heard everything.

The next time Chief Pierce has the urge to ask someone to move his car from a "No Parking" zone so he can get by, we know he will think twice before he does. Did that admiral ever come out to move his car Chief?

Jane Brown walked the "middle aisle" on May 8 when she became Mrs. Wesley Jennings. Wes is attending Optical School here at NNMC. Congratulations to both of you from all of us at NMRI.

Back to duty after a pleasant (?) stay at the Naval Hospital comes Stacy, Costigan and Jennings. Glad to see you boys looking so well and eager to be back on the job.

Congratulations are in order to the men who made new rates! (see list on page 3.)

We welcome aboard HMC R. A. Alexander, HN R. E. Boyle, DN D. E. Westerman, SA J. C. Dougherty, SA W. F. Williams and SA W. T. Weber, while Lt. H. W. Lyon, DC, USN and BM3 D. Heye depart for duty aboard the USS Wasp and the USS Randolph respectively.

Dental Explorer

Congratulations:

by C. Connor

To: Mr. and Mrs. D. Zaia, on the arrival of their son, John Vincent who was born on May 9, weighing 7 lbs. 12 ozs. I might add he was the only baby to arrive rendering a chorus of "Dixie" (like father, like son).

To: Mr. and Mrs. R. Barton on the arrival of Anne Elizabeth who made her debut on May 7, and weighed 6 lbs. 5 ozs., and like the old saying, she 'is sugar and spice and everything nice.'

To: Neil Ondracek and Pat Mackin who will both be married on June 27. Don't know about Mackin, but Neil has toured the area for an apartment in vain. . . . Last I saw of him he was trying to price tents.

To: Tony Mugno who, I just learned, is also planning on getting married on June 28. . . . Guess those D. C. trips have finally paid off.

To: All these who made new rates. (I think Terry should show us all where she sewed her rate on a piece of clothing that is not required.)

To: P. A. Branchflower, (better known as "Petunia") who finally made it, and graduated from ward 129, and to D. R. Ferguson who also received his diploma from the sick list and came back to the fold.

Now that everyone has been congratulated, let's see what else has happened. We should extend a hearty Welcome Aboard to Cdr. Sandman and R. Russell DT2.

We soon will be saying bon voyage to Dr. Pape who will be leaving us for Great Lakes, to Dr. Anderson who is going to Cocoa Solo and to Dr. Miller who is going to Port Lytautey.

If you're troubled with difficulty in pronouncing names just see Dr. Smith and Mary Park. They breeze through the most difficult with no effort at all. Of course it might not be exactly the way it was intended, but they can almost convince the party concerned.

Med School Daze

by Jiminy

While my associate, By Cracky, takes a few days leave and goes to Instructors School at Norfolk, I'll try to keep you posted on the latest events.

Seems Like Everyone's Doing It Department: Hargan, of Lab 19, who broke half the hearts in Med School at one swoop by marrying Ethel Weber; Jennings of Optometry School, and Merrill of Lab 19. Congratulations and best wishes to all.

Coming Events: Schurtz of Lab 19, and Lee of the same class, who rumor has it is going all the way to Chattanooga for his ball and chin.

Welcome aboard to our new staff men: HMC Dodson, HM1's Strout and Sperry. A special welcome home to our Cloak and Dagger boys, "Shorty" (Just call me Tex) Edwards and "Gregory Peck" Bradley. (Finally got your name in print again Shorty, after all these months!)

Goodbye to Pharmacy Class, who graduate on the 22nd, and to Possie, who is leaving the RIT department brokenhearted to take up new duties at St. Albans. I hear her place at RIT will be taken by Degenhardt. May-be some of the RIT men can clear up the situation for me. Also heard that Bethany Floan is to become a civilian on the 26th. Good Luck to all!

Rumor has it that one of our lab students look the pledge the other nite, after almost not making it. Seems her reformation came about after a series of WCTU lectures by "Mother" Insley! If you can believe it, we can most certainly print it!!!!

Congratulations to all who got promotions, especially CHIEF Austin. Till next time, be good, By Jiminy.

Navy Belles

by George

Just Around Our House: Ruth Clarkson is our new house mother. Rose did a fast pack and left for duty at Bainbridge via Norfolk Instructors school. Another oldtimer to leave our happy home was Possie, who went to St. Albans for duty, and among our other short timers we have Joan, Fitz and D. King.

Jane Brown Jennings is our bride of the month. We miss her back in our corner; see her only on duty nights now. Note to "Jackie" Jackson: when Maggie is pitching and you are batting, that is no time to be watching bugs go flying by.

Josh and Nancy were going to go play a game of early-morning tennis but as far as they got was a talk over the cubicle net. Les just hopes next time they wake up the right person. We thought June made a good showing as Miss NNMC and we are sorry all our grade A Waves could not have won.

The show did come and the show did go, and the things we will miss you never will know, and that funny old sun has nothing to do—Who broke that record? Dances in the Rec. room, the ironing of ruffles, and the humming of songs in the wee hours of the morning with the girls fixing the lights and paintings, are all over now.

Our girls played softball last Thursday and look real good. We play our first league game tomorrow night, so come and root for us. I still remain the girl from the heart of Maryland.

Nancy Aiken Named Sports Coordinator

This month Nancy Aiken, DT3, the only student in NDS's class, Acrylic Eye Illustration Course of Instruction, received a letter from the CO, NNMC.

The letter appointed her as Enlisted Representative, Women's Inter-Service Athletic League, with additional duties of coordinating all sports activities for women on the station.

Actually Nancy was appointed to this task after an election indicated that she was the girl the Waves thought best suited for the job.

A native of Coronado, Calif., Nancy says, "I don't ski or ice skate." Name any other sport and Nancy is familiar with it—basketball, softball, volleyball, tennis or horseback riding.

The latter spot rates highest with Nancy who taught riding for over two years at St. Francis Riding Academy in San Francisco. During her civilian summers she used to help pack, conduct and guide pack trips into the Sierras.

Nancy, who jokingly says, "The more I see of people, the better I like horses," even tried her hand at herding cattle on a friend's ranch in the Merced Valley.

Aside from sports, art rates high with her. She majored in advertising at the University of California and now uses her talents creating cartoons, working with abstracts in water colors, or drawing posters.

The daughter of a retired line commander, Nancy entered the Navy in the fall of 1950 and was striking for communications technician for a year before she switched to dental.

Nancy Aiken, DT3

A famous psychologist had finished his lecture and was answering questions. A meek little man asked: "Did you say that a good poker player could hold down any kind of executive job?"

"That's right," answered the lecturer. "Does that raise a question in your mind?"

"Yes," replied the meek little man. "What would a good poker player want with a job?"

"Okay, what's your excuse for being late this morning?"

"There were eight of us in the house, and the alarm clock was only set for seven." (This joke is celebrating its centennial.)

Navy Nurses Celebrate 45th Anniversary Corps Originated with 'Sacred Twenty'

The Navy Nurse Corps observed the 45th anniversary of the establishment of the Corps on Wednesday, May 13, 1953. A comparatively small Corps, it has less than 3,000 members on active duty.

The birthday of the Corps occurs within a day of the anniversary of the birth of Florence Nightingale, the mother of modern nursing and the first woman to engage in systematic care of the casualties of war.

The original group of nurses consisted of a superintendent, a chief nurse and 18 nurses. This group, now referred to by members of the Corps as the "Sacred Twenty," by August, 1908, had been appointed and had reported to the Naval Hospital, Washington, D. C., for indoctrination and duty.

River Bird

CURVACEOUS Connie Russell sings and dances too. Connie is a TV and recording star. You'll see her first movie performance in the technicolor musical "Cruisin' Down the River."

A congressional order designated the Navy nurse group as regular officers, nor enlisted personnel, although they were given military status, officially recognized members of the naval service and were subjected to naval discipline.

By Dec. 7, 1941, Navy nurses were serving at Pearl Harbor, Kaneohe Bay, the Philippines, Guam and aboard the hospital ship USS Solace.

When Guam fell, five nurses were captured and were repatriated after six months internment in Japan.

In addition to these five, Navy nurses were taken prisoner in the Philippines and were liberated until 1945 after 37 months of captivity.

For distinguished service during the present Korean conflict, Navy nurses have been awarded the Bronze Star Medal and have received the Letter of Commendation with Ribbon.

One of the two nurses receiving the Bronze Star is Lt. Cdr. I. I. Lange, assistant chief nurse here.

In December 1942, Navy nurses were accorded relative rank with Sue S. Dauser, then superintendent of the Corps, being appointed to the rank of Captain. She was the first woman in the history of the U. S. Navy to wear the four stripes of Captain.

What to See Around D. C.

MONDAY, May 25—Baseball, Washington vs. Philadelphia, Griffith Stadium, 2030

TUESDAY, May 26—Fencers' Club, Roosevelt Center, 13th & Upsher sts., N. W., 1900 to 2200 every Tues. & Thurs.

WEDNESDAY, May 27—"See How They Run" Unitarian Players, Pearce Hall, 2030, also May 28 & 29.

THURSDAY, May 28—"Ring Around The Moon," Theatre Lobby, 14th st., Matthew's Ct., 2045, each Thurs., Fri., & Sat. for three weeks.

FRIDAY, May 29—Baseball, Washington vs. Boston, 2030 Griffith Stadium. Also May 30, 1330 double header.

SATURDAY, May 30—Tennis, City of Washington, Edgemoor Club, all day.

Dinner and Social hour, Servicemen, Letts House, Foundry Methodist Church, 1830 each Saturday.

SUNDAY, May 31—Horse Show, Hyattsville Lions Club, Fletcher's Park, Hyattsville, 1000 on all day.

Lectures, Nat'l Gallery of art, 1600 each Sunday.

MONDAY, June 1—Weight Lifting Group, 13th & Clifton, N. W., Carnegie Center, 1930-2230.

TUESDAY, June 2—Fencers' Club, 13th and Upsher sts., N. W., 1900-2200.

THURSDAY, June 4—Young Adults Dance, service personnel welcome, Friendship House, 619 D st., S. E., 2000-2300.

SATURDAY, June 6—Tennis instruction, 16th & Kennedy, N. W., 1200, each Saturday.

Orchestra Dance, age 17-30, servicemen, YWCA, 1701-18th sts., N. W., 2100, each Saturday.

SUNDAY, June 7—Senior Dance, Jewish Community Center, 16th & Q sts., N. W., 2100, each Sunday.

WEDNESDAY, June 10—Square Dance, Pierce Hall, 15th & Harvard sts., N. W., 2030.

SATURDAY, June 13—Tea Dance, supper, servicemen welcome, Catholic Girls Society, Epiphany Church, 1317 G. st., N. W., 1830.

Capt. E. B. Coyl Assumes Duties As New Commanding Officer of NMS

Capt. Edwin B. Coyl, MC, USN, assumed his new post as Commanding Officer of the Naval Medical School here last Wednesday. He relieved Capt. J. L. Enyart who will become Commanding Officer of the U.S. Naval Hospital, Newport, R.I. Capt. Coyl is quite familiar with the new task since he has been Executive Officer of the NMS since Dec. 7, 1951. The Captain was born in Washington, D. C., and began his education at the Washington Missionary College in Takoma Park, Md.

Capt. Coyl began his Naval career as a Ltjg. in 1930 after receiving his M.D. from the College of Medical Evangelists in Los Angeles, Calif. He was promoted to Captain in 1945.

His first overseas duty was on the USS Memphis from 1932 to 1934. Since that time he has served with a destroyer division out of Honolulu; on the USS Memphis in the South Atlantic Patrol; on the USS San Francisco in the Pacific (Fifth Fleet); the USS Benevolence which went to China and the Far East, and on the USS Repose off Korea. As Officer in Command of the Naval Hospital on board the USS Repose just prior to coming to

Capt. Edwin B. Coyl

NMC, he had command of 25 doctors, 30 nurses, 3 dentists and 200 corpsmen, a crew which treated more than 10,000 patients in the first year he was in charge.

For this exceptional administrative ability while Officer in Command, Capt. Coyl was awarded the Bronze Star Medal. The award was presented to him last week.

"As Officer in Command of the Naval Hospital on board the USS Repose, Capt. Coyl displayed exceptionally meritorious conduct in the performance of outstanding services."

"He exhibited outstanding executive and administrative ability and thorough knowledge of medical supplies and equipment while supervising the expeditious and efficient reactivation of the USS Repose."

His exceptional abilities were in large measure responsible for the subsequent smooth operation of the hospital aboard the USS Repose during the early critical months of hostilities in Korea.

Wilson States Plan To Reduce Services

Secretary of Defense Charles E. Wilson, testifying before the House Military Appropriations Subcommittee, disclosed plans to cut draft calls by 50 per cent and to reduce the total of men in the Armed Forces to 3,356,000.

Secretary Wilson stressed, however, that his new budget would maintain the combat forces at safe levels and allow for their modernization despite the reduced spending and cuts in manpower.

The budget for fiscal '54, which starts on July 1, would:

Reduce by 150,000 the number of personnel in the Armed Forces by June of 1954.

Reduce the draft calls by 50 per cent. In light of recent calls this would appear to bring the total to about 25,000 men a month.

Provide for 114 "substantially well equipped" Air Force wings by June 30 of next year. Air Force manpower will be cut by 10,000 from approximately 970,000 at present.

Continue the maintenance of 20 combat divisions and 18 regimental teams in the Army and improve their combat readiness by speeding up deliveries of new weapons and equipment. Manpower cuts in the Army will total 79,000. Present strength is about 1.5 million.

The Navy will have the same number of ships and planes as are now in service—408 ships and 9,000 planes. Manpower in the Navy will be cut by 55,000 from about 800,000 at present.

The Marine Corps will continue with three divisions and air wings. Marine manpower, which is now about 245,000, will be cut by 15,000.

Secretary Wilson concluded that better planning would improve military strength "without spending quite so much money." His total request was for 36.2 billion dollars as compared to the proposed Truman administration budget of 41.4 billion dollars.

Some EM Due for Early Separation; BuPers Notice 1910 The Authority

The Navy has initiated a program of early separation for enlisted personnel who are due to be discharged or separated between June 1, 1953 and Aug. 31, 1954.

The authority, BuPers Notice 1910, is set up in two parts. One, a period when the early release will be up to the discretion of those commands which have distribution control and second, a period commencing Nov. 1, 1953 when the provisions of BuPers Notice 1910 shall be mandatory.

The Discretionary Phase—Beginning June 1, 1953 and continuing through Oct. 31, 1953, enlisted personnel may be released early in accordance with directives and instructions, action of which will be implemented by the commands.

Separation will be effected according to the following:

(A) Regular Navy personnel whose normal date of expiration of enlistment or enlistment as voluntarily extended occurs during June, July or Aug., may be separated during June 1953.

(B) Regular Navy personnel whose enlistments expire during the months of Sept. through Dec., 1953 may be separated two months early.

(C) Naval Reserve and Fleet Reserve personnel, including those who entered into agreements to remain on active duty for 24 months, whose separation date occurs during June, July or Aug., may be separated during June 1953.

(D) Naval Reserve and Fleet Reserve personnel, including those who entered into agreements to remain on active duty for 24 months, whose separation date occurs during the months of Sept. through Dec., 1953 may be separated two months early.

Mandatory Phase—Commencing Nov. 1, 1953 and continuing through June 30, 1954 it shall be mandatory to separate personnel as follows:

(A) Regular Navy personnel whose normal date of expiration of enlistment or enlistment as voluntarily extended occurs during Nov. and Dec. shall be separated during Nov. 1953. Personnel whose enlistments expire during Jan. and Feb. shall be separated during the period 1-15 Dec. 1953.

(B) Regular Navy personnel whose enlistments expire during the period Mar. 1, 1954 through Aug. 31, 1954 shall be separated two months early.

(C) Naval Reserve and Fleet Reserve personnel, including those who entered into agreements to remain on active duty for 24 months, whose separation date occurs during Nov. and Dec. shall be separated during Nov. 1953. Personnel whose separation date occurs during Jan. and Feb. shall be separated during the period 1-15 Dec., 1953.

(D) Naval Reserve and Fleet Reserve personnel, including those who entered into agreements to remain on active duty for 24 months, whose separation date occurs during the period 1-15 Dec., 1953.

(Continued on Page 6, Col. 5)

NNMC's CO Receives Achievement Award

R. Adm. Bertram Groesbeck, Jr., CO, NNMC, was the recipient of an Alumni Achievement Award from George Washington University at the 132nd Annual Commencement Exercise held at the University on Wednesday, May 27, 1953. This award was made on the recommendation of the General Alumni Association of George

R. Adm. Bertram Groesbeck

Washington University for notable achievement in medicine and for conspicuous service to the University.

R. Adm. Groesbeck graduated from George Washington School of Medicine in 1917 and has been active in medical circles since that time. His interest in aviation medicine won for him the Lyster Award from the Aero Medical Association in 1951. Since assuming command of the Naval Medical Center in April 1952, R. Adm. Groesbeck received the Good Government Award of the Bethesda Junior Chamber of Commerce for his outstanding contribution to the community.

A colorful Naval career draws to a close for the popular commanding officer. Orders have recently been received effecting his retirement from active duty on 30 June 1953. We shall all follow with interest his achievements in civil medicine following his retirement.

Gala Entertainment Slated at Woodmont For Service Patients

A big day is planned for more than 500 hospitalized service personnel at the beautiful Woodmont Country Club, Rockville, Md. This event will take place on Monday, June 22 and will include the club's fullest course of fun, frolic and big-time name entertainment.

The hospitalized servicemen will enjoy every club facility, including awards for individual merit in competition and a specially prepared picnic lunch.

For the active men there will be golf, swimming, tennis and softball, while the less active may enjoy excellent fishing or watch exhibitions by top professionals in golf, tennis, swimming, fancy diving and fly-casting.

A galaxy of noted stars from the night club, radio and TV worlds will provide additional hours of delightful and varied entertainment.

This big event will be sponsored and supported exclusively by the membership of the Woodmont Country Club, and the salaried help are giving their time free for this occasion.

Any patients who are interested in attending should contact the Red Cross, ext. 621, or go in person to the Recreation Office, Room 201 near the entrance to Ward 3B. The Red Cross is making all necessary arrangements for transportation.

Woodmont Pool Looks Inviting

SWIM . . . TENNIS? Take your pick. This luxurious pool and court await hospitalized patients of Walter Reed Army Medical Center, Fort Belvoir, NNMC and Bolling Air Force Base during a gala Field Day sponsored by the Woodmont Golf and Country Club, June 22.

AFRS Platter Chatter

Adventure Thrillers, Varied Music, Sports Interviews Share Spotlight

This next series of programs over the AFRS network offers a wide variety of entertainment . . . Brad Douglas is flying back to New York on his way to a new assignment . . . Jack Moyses stars in the exciting adventure of "The Death Trap," the latest DOUGLAS OF THE WORLD story this week, while next week you will hear of the escape made from behind the Iron Curtain by Karel Douba, the ping-pong champion of Czechoslovakia, during August 1951, on SECRET MISSION, with Hy Averbach starring as Jonathan West.

Getting along in the week there will be an interview with the Cleveland Indian pitcher, Lou Brissie, and TV sports commentator Bill Symes: your interviewer . . . Fred Hessler, on the INSIDE TRACK Sports Program immediately following the Thursday CONCERT HALL period. Fred Hessler will also interview New York Giant Hank Thompson and pro basketball star George Mikan on his show on the 25th of June.

In the musical line such performers as Mindy Carson and Guy Mitchell, Eddie Fisher, Shep Fields, Bette McLaurin, Alvino Rey, the Dinning Sisters, and Dean Hudson will appear on "Bud's Bandwagon" during the "Afternoon Rhythms" session this week, while Kay Malone, Tony Martin, and the Four Jokers will join Michel Perriere and the AFRS Orchestra during the "Music for Moderns" period. Lina Romay continues to hold forth with her sparkling Latin rhythms during FIESTA TIME and Carolina Cotton brings you her Hill-Billy Hit Parade.

So for mid-day listening pleasure, tune in to Channel "C"—1300 every day, Monday through Friday—the AFRS Broadcast Channel . . . Bob Hudgens officiating.

AFRS PROGRAM SCHEDULE — CHANNEL C — 1300-1345

Monday through Friday

- 15 June—1300—Afternoon Rhythms; 1330—Fiesta Time
- 16 June—1300—Music for Moderns; Hill-Billy Hit Parade
- 17 June—1300—Douglas of the World (The Death Trap); 1330—Pops Concert
- 18 June—1300—Concert Hall; 1330—Sports Program (Inside Track)
- 19 June—1300—Secret Mission (Full House); 1330—To be announced
- 22 June—1300—Afternoon Rhythms; 1330—Fiesta Time
- 23 June—1300—Music for Moderns; Hill-Billy Hit Parade
- 24 June—1300—Douglas of the World (Money to Burn); 1330—Pops Concert
- 25 June—1300—Concert Hall; 1330—Sports Program (Inside Track)
- 26 June—1300—Secret Mission (The Game); 1330—To be announced

The Chaplain's Corner

by Chaplain Newell V. Brink

Father's Day has as many interpretations as there are people. We respect our earthly fathers when they perform their duties and responsibilities. When we have grown up in a home where we saw religious living, a security of moral understanding and the unfailing leadership of an upright father, we have some concept of God, the Eternal Father of us all.

Fatherhood, in its best sense, is the term that Jesus used in an attempt to give us a concept the human mind could understand of the spirit of God. As we respect and love our earthly father who gives us good things, how much more should we respect the God and Father of us all from which all things come.

There is a dual lesson in Father's Day. A respect for our own father and what he stands for. A determination, if we are one, to do as well and a measuring of our own attempts by the eternal spiritual standard of God the Father.

Capt. B. W. Hogan's Departing Message

Capt. B. W. Hogan

TO ALL OFFICERS, ENLISTED PERSONNEL AND CIVILIANS
OF THE NAVAL HOSPITAL:
"PARTIR C'EST DE MOURIR UN PEU"
"Parting means to die a little."

"Leave-taking," as the French epigram expresses it, "means a little something of the pangs of death." There is a reason for such emotion. When we work together for weeks, months and years, in quest of an ideal, we develop more than the spirit of companionship; we come to look upon each other as members of a single family.

Like the sons and daughters in a family, we learn to share our joys and sorrows, our sacrifices and our progress, our failures and our triumphs. We discover, in the course of this great adventure in human affections, that there are people who really care. Our eyes are opened to the tremendous capacities which the U.S. Navy has to unite, to lead and to win.

The Navy, like our own family, does care about what may happen to us. And this Hospital is living, eternal proof that the U.S. Navy wants the best for its members. Every advance in research, in treatment, in operative procedure, or in diagnosis has been made possible by teamwork.

This Navy family has been a success, because, as a gifted writer once remarked, "a family that labors together is indivisible."

This may help to explain two truths: (1) That it has been a privilege to have been associated with this Naval Hospital family, and (2) That separation from the team means pain. In my leave-taking, my anguish is alleviated, to no small degree, by the loyalty of the military and civilian personnel.

To each and every one, in every station, I would like to extend not only my personal thanks, but also the Nation's gratitude for jobs well done. Every performance of duty, each act of devotion and kindness, every sacrifice made for the service of others has been recorded in the Book of Life. When least expected, the reward will come. And I would like to make part of that reward my own sense of deep appreciation.

We owe a large measure of thanks to Admiral Pugh, Admiral Brown, and the Bureau of Medicine and Surgery, for their constant support and advice.

To Admiral Groesbeck and staff for their wise direction and assistance; the maintenance department has been exceptionally willing and prompt in filling requests made.

We have enjoyed from Captain Enyart and the Medical School staff, Captain Kellum and the staff of the Research Institute; Captain Taylor and the staff of the Dental School, and Commander Zimmerman and the staff of the School of Hospital Administration, great cooperation and assistance.

To all of these, we express our warm thanks.

B. W. Hogan

Award of Merit to NNM By D. C. Chapter of ARC

NNMC recently received an Award of Merit from the District of Columbia Chapter of The American Red Cross in recognition of loyal service during the 1953 Red Cross Drive.

Contributions from the various commands of NNM totaled \$3,037.35, with approximately 2,000 military and civilian personnel participating.

R. Adm. Bertram Groesbeck, CO, NNM, extends his "well done" to all commands of the Center and expresses his appreciation to the chairman of the NNM drive, Chaplain D. J. Koskey, and his fellow workers who labored tirelessly to make this drive a success.

Wives Vote Desired

According to a recent release of "The Navy Times," the Senate's sole woman wants the servicemen's voting law amended to extend its benefits to wives of service personnel who are away from their home voting places because of their husbands' assignments.

Sen. Margaret Smith (Re., Me.) has introduced a bill, S-1654, which would extend every benefit in the voting law to wives of service personnel.

Jewish

Congregation Beth El of Montgomery County will hold services every Friday night at 8:30 P.M. and Saturday morning at 10:00 A.M. in the Pook's Hill Auditorium, 3 Pook's Hill Rd. The services will be conducted by Rabbi Martin Kessler.

The services of Rabbi Harry Kaufman, representing the Jewish Welfare Board, are available to all Jewish Personnel and Patients at the National Naval Medical Center. Rabbi Kaufman may be reached by calling the Chaplain's Office, Ext. 324, or by call direct—Office: RA. 3-5371—Home RA. 3-0755

Inspection

My shoes are shined—my uniform's white,
I'm set for the inspection.
My hat is squared—my hair's been cut
Quite a display of perfection.
My neckerchief's rolled—everything's right
There can't be any question.
Got bars on my chest—smokes out of sight
No room for imperfection.
Here's the Man now, lookin' us over
Not even a smile on his face.
He races along, glancing at all
How does he manage that pace?
It's almost over—just two more to go,
Me and the man on my right.
No doubt that I'll pass, for after all
I conquered the problems last night.
Till three in the morning I ironed my clothes—
Made sure that my shoes were shined.
But I'll pass . . . no doubt about that,
They say that the Man is kind.
He's in front of me now—why the scowl on his face?
I hear him mutter, "You're a disgrace!"
His finger presses my chin—he continues to rave.
Good heavens! Oh, gosh! I neglected to shave!
—J. F. MELVIN

Human Brains Now Are Being Wired: Mechanical Mind Makes Math. Easy

Human brains are being wired, by using electric wires that are placed as deep as three inches inside of the brain. These wires are connected to a machine to carry a slight electric current through chosen parts of the brain. These electric currents seem to get the hormones into action.

According to Dr. Robert G. Heath, professor of psychiatry and neurosurgery at Tulane University Medical School, such wires have brought one bed-ridden woman freedom from the pain of hopeless cancer. The woman hasn't needed a morphine shot for six weeks, and is anxious to get up and see a movie.

A new mechanical brain, which may take part of the problem out of the Navy's logistics headache, was recently shown at the George Washington University. Its purpose is to provide highspeed calculations in the handling and remembering of data.

The electronic computer's most unusual feature is a giant capacity for remembering, compared to other mechanical brains in existence. Because of the fabulous number of items in military supply, this machine was especially developed to retain at one time 23,000 numbers of digits each. Any numbers that are stored are usable in the future at any desired time.

VA Clarifies New Credit Control Rule; No Down Payment Asked for Home Loans

The effect of the recent removal of credit controls on government loans to WWII or Korean veterans for home buying has been clarified by the Veterans Administration.

The credit controls which were first applied to Veteran loans in 1950 shortly after the beginning of the Korean War have now been completely lifted. This action, made effective as of Apr. 25, 1953, was authorized by the Housing and Home Finance Agency.

Thus it is possible for veterans now to obtain home loans with no down payment and with a repayment term up to 30 years. It was emphasized, however, that since the loans are made by private lending institutions, the lenders will be the ones who make the decisions on the actual terms.

Also, there is no longer any restriction on how the four percent gratuity payment may be applied. Formerly it had to be applied to reduce the principal amount of the loan. The payment equals four per cent of the guaranteed portion of the loan up to a maximum of \$160.00.

The Veterans Administration also advised those seeking government loans to apply to the VA regional offices in advance for certificates of eligibility. This will reduce delays in processing loan applications later. The certificates are necessary proof to lenders that VA will guarantee or insure a loan if all other usual loan requirements are met.

This is a change from the past when the lending institution was able to obtain the certificate on behalf of the veterans. Additional information is now required such as: whether the applicant is a veteran of WWII or the Korean action, or both, and what prior use he has made of his loan guaranty benefits or any prior government loans.

The final date by which most WWII veterans must apply for home loans is July 25, 1957, while those who have had service since the beginning of the Korean War have until 10 years from the end of the current emergency. (AFPS)

Capt. J. L. Enyart Expresses Gratitude

Capt. J. L. Enyart

I wish to take this opportunity to convey to all my friends, both military and civilian, sincere appreciation for your cooperation and support during my tour of duty at the Naval Medical School. You have made our difficult tasks easier and I only regret that I may not be able to see each of you personally to express my gratitude. The best of good wishes to you all.
Signed, J. L. ENYART

Local Acridiidae Offer Commentary On World Affairs

Just the other day two locusts were overheard commenting on the affairs of the world. One of them had just burrowed his way out of terra firma and was for the first time in seventeen years viewing Ol' Sol. The other, an old hand around the world, watched his companion with interest.

"Boy, does it ever feel good to stretch," remarked the first locust, emerging from his earthly domain. "What's new in the world?" he asked.

"Oh, nothing much," replied the other. "We had a world war; somebody by the name of Hitler decided he wanted to run things." "A war?" said locust No. One. "The last time I was up we were just finishing a war to end all wars; what happened?"

"Nothing much," returned the second. "This fellow Hitler started taking over small countries and somebody had to stop him, and before you knew it everybody was in the act."

"That name sounds familiar," rejoined the first. "Wasn't he just beginning his monkey business the last time I was around?" "That's right," said No. Two, "but the world has gotten itself pretty well straightened out—we shouldn't have much trouble now."

"You mean the whole world is a democracy?" said No. One. "Well, not exactly," replied the second, "there still are a few people who don't believe in democracy; matter of fact, there's a little 'police action' going on in Korea now. It's kind of just like before World War Two."

"What are folks doing about it?" inquired the first locust. "We could start a third World War I guess," commented his friend. "But people don't want that. They would rather settle it peacefully."

"Sure hope they have more success this time," replied No. One. "Guess I'll be going now; see you again in seventeen years."

"Hope I'll be around then," said the second. "It all depends on whether or not folks can figure out some way to get along with each other without having a war every generation."

"Let's hope they can," said the first one, as he crawled back into his hole.

Public Speaking Group Very Active at NNMC

If you feel weak and shaky when you get up to speak before an audience, NNMC Toastmasters No. 1234 is the group for you. A group of officers decided that they needed regular practice in public speaking and formed the NNMC branch of this international speaking club.

Each person speaks at every weekly meeting in an extemporaneous manner and takes his turn at five minute speeches. All are subject to a friendly criticism at the hands of the evaluator and grammarian. All functions within the club rotate; thus, every member participates.

Additional work is done in problems of parliamentary law. To get rid of that clammy feeling when asked to rise and speak, join the NNMC Toastmasters. Lt. C. Levich at ext. 597 has full information.

Gorgeous Gals, Bob Hope Appear Here

THE BEVY OF BEAUTIES includes (upper photo, l. to r.): Joice Pettyjohn, Jere Ault, Maureen Quinn, Iris Fitch (Miss D. C. of 1953), Dayne Long and Felicia Farber. They were featured in the "Pageant Beauties on Parade" presentation here Sunday, May 24. Also appearing on the NNMC stage that evening was H. Thurston Fritz (lower left) in "An Hour of Magic." Bob Hope (lower right) is shown making an attempt to get a refund on his income tax from T. Colman Andrews, Collector of Internal Revenue, during his show here May 6.

Personnel Pleasure Salient Objective Of Special Services

Many persons aboard this station, especially newer members of the various commands, are unaware of all the recreational facilities that are available to them.

In addition to such sports as intramural and varsity softball, tennis, golf and swimming that are currently in season, there are many other activities that come within the scope of the Special Services Division.

Your station newspaper, published twice a month, is one of these. Movies are shown in the auditorium almost every night at 1930 and stage shows are presented frequently on Sunday or weekday evenings. Other events such as staff dances, parties and picnics are scheduled for your pleasure.

For those athletically inclined, an intramural softball league now is in progress, with each command having a good turnout of players. Also, there is a men's varsity softball squad (the Admirals) and a women's varsity team (the Admiralties).

In the way of tennis, there is presently a "ladder" for those interested in intra-station competition. Two sets of courts are available, one across from the Recreation Building (Bldg. 23) and the other by the Nurses Quarters.

The Medical Center's nine-hole golf course is open to staff and patients from 0800 to sunset daily. Links equipment and a snack bar

VA Sharply Restricts Home Loan Discounting

The practice of discounting in the financing of G.I. home loans by lenders and builders will be sharply restricted by the Veterans Administration.

Discounting is the act of a builder selling a mortgage to a lender for less than the face value of his loan. This results in the lender receiving the same as a higher interest rate since he would get the same total return but at a smaller initial investment. Thus it has been possible for a lender to receive more than the former four per cent maximum interest rate.

Under the higher four-and-a-half per cent interest rate the VA figures there should be no need for a continuation of the discount arrangement. The usual result of this has been the veteran-borrower has to absorb the cost of the discount either by paying a higher price or by taking lower quality construction. (AFPS)

are located in the Golf Shop, just across the road from No. One tee.

NNMC's popular indoor swimming pool is open daily from 0800 to 2100 and is a favorite meeting place of station personnel during leisure hours.

The above are only some of the facilities available. Many of these are at the disposal of dependents of staff and student personnel. For full particulars obtain a copy of the recreation schedule at the Recreation Bldg. or call the Special Services Office, ext. 672 or 227.

Senate Committee Amends Dr. Draft

The Armed Services Committee of the Senate is expected to approve this week an amended version of the House-passed version of the Doctor Draft. This measure will aid in the speedy release of many doctors now on active duty.

The consensus of opinion is that it will be even more liberal than the House version.

The Senate Armed Services Committee is giving serious consideration to two changes. They are:

1. Extending the authority of the extra \$100 so that any doctor coming in the services during the term of the act would get the money.
2. Setting up a type of "graded recall" which provides that any doctor having served 18 months during WWII would have to serve no more than nine months now.

SPORTS FLASHES

Walter Reed downed NNMC, 10-3, in a MAISAC Softball League game Thurs., June 11. The Admirals gained an early 3-0 lead, but that soon vanished. Intramural softball action saw Lab 19 trample NH Bks., 23-3, on June 11.

Both NNMV Varsity Ball Teams Win; Women Undefeated in Three Contests

Tuesday, June 9 was a happy day for NNMV's varsity softball teams as the Admirals and Admiralettes overwhelmed league foes in home games. Coach Jay Bell's men's squad thumped Patuxent River NATC, 9-1, while Spurgeon Slade's heavy-hitting women's nine squashed Fort Belvoir, 21-10.

John "Scratch" Crabtree pitched a masterful two-hitter as the Admirals amassed seven runs in the first inning to zip past Pat. River. NNMV rapped out six hits in its early splurge and coasted from there.

The Admirals met Walter Reed there June 11, host Cheltenham June 16, go to Patuxent River June 18, entertain Walter Reed June 23 and travel to Cheltenham June 25. All MAISAC games begin at 1800.

Admiralettes chucker Maggie McQuarrie settled down after a shaky start to dispose of Ft. Belvoir, as the NNMV girls scored in every inning. Jan Fick, Barbara Bradford, Claire Emmington and Boots Carlson all starred at the plate. Unbeaten in WIAL play, NNMV has amassed 50 runs in three contests.

Coach Slade's forces oppose powerful Fort Meade there Tues., June 16, journey to Henderson Hall June 19 and host Quarters "K" at 1830, June 23.

Vocation Nursing, Avocation Painting

by Gerald Beatty, HN

From nurse to interior decorator are the plans of Miss Helen T. Kryskiewicz, Ltjg., NC, who is presently working on ward 5-B.

"Kris," as she is known by her friends, is a graduate of Long Island Nursing College. Following graduation in 1949, she spent one year of postgraduate work on contagious diseases. Due to the shortage of nurses caused by the Korean conflict, she decided to enter the Navy.

"Kris" has been interested in painting since the age of 12, and has always made this her favorite hobby, along with swimming, bowling, hiking and dancing.

Starting with water colors and working up to oils, she came a long way in art with no outside instruction.

With little time to spend hunting landscape, which is her favorite subject, most of the painting now is from magazine covers and other pictures she can reproduce.

Her prized work is a self portrait which she named "The Great Profile." This painting required one year to complete—six months painting and six months drying.

When it comes time to decorate for parties, "Kris" usually finds herself the head of the decorating

committee and always receives the same compliment: "a job well done."

When she puts aside the white uniform in January of next year, her plans are to go right into interior decorating. When asked of any other plans such as marriage, Miss Kryskiewicz stated, "I have an iron in the fire."

Grandfather Clock In Modern Setting

If you ever have occasion to visit the office of Capt. B. W. Hogan, CO, NH, you will undoubtedly notice the old grandfather-type clock

which occupies a very prominent position in one corner of his office.

This clock was built by R. Adm. A. Farenholt, at the U. S. Naval Hospital, Great Lakes. It was presented to the Medical School shortly after it was completed in 1926.

Somehow during the next few years the clock became seriously damaged, and eventually found its way into oblivion in some remote corner of the storeroom.

When R. Adm Stone (then Capt. Stone, CO, NH) took command, he somehow located this long lost treasure, and started it on its way to its present prominent position.

As the clock was in need of much repair, it was put in the hands of Mr. Ernest H. Hancock, a civilian worker, presently assigned to NMRI. He had the monumental task of overhauling the entire mechanism.

Next it was turned over to the paint shop which completely restored its original beautiful outward appearance.

The landlady brought in a plate of thinly sliced bread. "Did you cut these?" inquired a boarder.

"Yes," said the landlady. "Okay," said the boarder. "I'll deal."

Wolf: A big dame hunter. A guy who enjoys life, liberty and the happiness of pursuit.

Hangover: Something to occupy a head that wasn't used the night before.

James Kinder Sets New Course Record In Winning Tourney

Lt. James W. Kinder successfully defended his Admiral Swanson Trophy Golf Tournament title and smashed the NNMV course record in the process as he blasted aside Lt. H. J. Civiello, 9 and 7, in the Championship Flight final June 4.

Hotter than the recent weather, Kinder didn't lose a hole as he stroked a two-under-par 33 on the front nine, while Civiello carded a 42. The defending champion then won the 10th and 11 holes to close out the match.

His five-under-par 65 for the 18-hole distance shattered the old course mark of 67 by two strokes. The sharp-shooting Medical Service Corps officer birdied the 5th, 8th, 11th, 12th and 14th holes, and parred the remaining 13 holes as he established a new record.

In advancing to this year's final, Kinder disposed of R. M. Bouvier and R. H. Stang. Civiello downed N. M. Martin and W. E. Flanery in gaining the final round. The co-medalists, J. F. Byrne and Martin,

Lt. J. W. Kinder, MSC

both were sidetracked in the first round.

First Flight honors went to J. E. Fitzgerald who beat W. J. Gardner, 4 and 3, in the final. His earlier victims were P. R. James and B. W. Dorosz, while Gardner defeated C. H. Blackstone and F. P. Kelly.

C. R. Sikes met D. J. Doohen in the Second Flight final, and A. Samuels nipped D. L. Phelps, 2 up, for Third Flight laurels. H. E. Reitz battled J. C. Kurtz for the Fourth Flight title, with G. W. Sumner topping E. F. Evans, Jr., 6 and 5, for Fifth Flight honors.

D. J. Giorgio and R. A. Isles tangled for the Sixth Flight title, while J. Brown edged out F. V. Berley, 1 up in 19 holes, for the Seventh Flight championship.

- These Gave -

Members of NNMV, both civilian and military, who donated a pint of blood during the period ending May 30, were:

NNMC

Maywood Prather, William Nolan, George Browne, Thomas Davis and Henry Browne.

NH

Ed J. Flanagan, HN, Joseph Culen, HN, James Dowler, HN, and Arrie Watson.

NDS

Couan Tribble, DT1, Ralph Dowdy, DT2, Ralph Jordan, DT2, and Arthur Graham, DT3.

NMRI

Ernest Testerman.

NSHA

Jack Storms, HMC.

NSHA Regains Intra. Softball Lead By Halting NMRI's Streak, 19-7

NSHA's hard-hitting nine regained first place in the Medical Center intramural softball league by walloping previously unbeaten NMRI 19-7, on Wed., June 10, as May of the victors blasted two home runs and a double to lead a 15-hit batting barrage.

Hartley, the MAT nine's reliable hurler, notched his sixth win in seven starts by chucking a six-hitter and garnered 12 strikeouts in the process.

Tennis Tournament Will Start June 22

Deadline for entries in the station tennis tournament is 1200 Friday, June 19, with first round play in the men's singles division slated to begin June 22.

All men now on the NNMV tennis ladder will be automatically entered in the tourney, being seeded according to their position on the ladder.

Those who are not as yet on the ladder and wish to compete in the tournament should call the Special Services Office, ext. 672 or 227, prior to the Friday noon deadline, to have their names placed on the ladder.

All matches will be best two-of-three sets affairs except for the final. This will be a best three-of-five sets duel.

Deadline for entries in the doubles division is also 1200 Friday. Winners and runnerups in both the singles and doubles will receive awards for their success.

No special arrangements have been made for a women's tourney, but if sufficient interest is shown a tournament for female netsters will be held.

Defense Service Medal

The National Defense Service Medal has been established to be awarded all members of the Armed Forces of the U.S. who served during any period between June 27, 1950 and a terminal date to be fixed by the Secretary of Defense. Each service will draw up its own regulations authorizing award of the medal. (AFPS)

BuPers Sets Limits Of Overseas Duty

The length of overseas duty tour at naval activities has been set forth by the Bureau of Naval Personnel in Instruction 1300.15.

According to the announcement, tours of overseas duty for naval personnel are established at 24 months, except as indicated below:

Alaska (18), Eniwetok (6), Eritrea (12), *Formosa MAAG (12), *Germany (24), Greenland (6), *Iceland (12), Indo China MAAG (12), Kashmir (12), *Japan (24).

Also the Chi Chi Jima, Okinawa (12), Guam, Saipan, Tinian (18), Mid-way (12), *Morocco (18), Newfoundland (18), Persian Gulf (12), Poland Attache (18), Red Sea Area (12), Ryukyu (12), Saudi Arabia (12), Tripoli (12), and US-SR Attache (18). (*—varies according to dependents status.)

The tour in Korea is set at 12 months followed by rotation to Japan to complete 24 months in the area. A tour as attache in Korea is set at 18 months.

Overseas duty on non-rotated ships and staffs afloat in the Asiatic Area has been set at 15 months while duty with non-rotated ships and staff afloat in the European area is 18 or 24 months if dependents are on station. (AFPS)

Wave: "I certainly don't like all these flies."

Sailor: "You just pick out the ones you like and I'll kill the rest."

Roscoe Ates Entertains Patients

ROScoe ATES, famous stuttering comedian, talks things over with a group of patients during his tour of wards here May 8.

Infield Miscues Prove Disastrous Admirals Lose First Four Games

Plagued by a multitude of infield errors, especially at shortstop, the NMC Admirals dropped the first four games of their MAISAC Softball league season but hope to get a winning streak going in the near future. Cheltenham Naval Radio Station's well-balanced squad downed NMC, 5-1, on the winners' diamond June 4 after squeezing past the Admirals, 9-7, here May 26, in an 11-inning season's opener.

The first road trip of the year by Coach Jay Bell's charges bow Patuxent River Naval Air Test Center, 9-5, on May 28. The following Tuesday, June 2, Walter Army Medical Center tripped NMC, 6-2.

In the June 4 tilt at Cheltenham, Medicalmen could muster only three hits off fireballer Breyman of victors, while the home forces selected nine safeties off NNM's Crabbtree and were aided by errors. Noel Schilling and Ernie Reed garnered the losers' pair of bingles.

Vilusz of Walter Reed held Chesda to five hits in his club's triumph here June 2. Haley, AMC shortstop, slugged a home run in the 6th inning. Crabbtree of NNM allowed only six safeties but five miscues at shortstop betrayed him. He notched two hits while hurling a creditable game.

Patuxent River piled up an early lead in trimming the Admirals May 28. The NATC nine battered Bethesda pitcher Harold Perkins for four runs in the first frame, as first baseman O'Neal led a round tripper.

Errors at shortstop and wildness of Lefty Ray Jeter, second of three NMC twirlers, helped Pat. River another quartet of tallies in the 2d. NNM rallied to score two runs in the 6th and another pair the 7th off NATC's Brown, but far short of catching up.

The Admirals, who outthit the men, 9 to 4, were guilty of eight errors in the field. Ray Gismond hit three hits and Jim Des Rosiers and Ron DeVice two each for NMC.

Four infield errors helped Cheltenham tally twice in the seventh to gain a 7-7 tie in the MAISAC opener here May 26, and the women picked up two more runs in the 11th to send NNM to a heartbreaking 9-7 defeat.

Cheltenham finished with 14 hits and three errors, while Bethesda had 11 bingles and six miscues. Breyman went all the way for the victors, striking out 18 batters, while Crabbtree hurled the distance for NNM.

Jim Greer had a homer, triple and single for the losers, DeVice a double and single, and Ernie Reed a home run.

Today NNM's lineup has seen DeVice, Jim Bush and Reed in the field, Des Rosiers and Bell at base, Schilling at second, Breyman playing great defensive ball at third, and George Radigan and Walter Lewis having nothing but trouble at shortstop.

Crabbtree has pitched fairly reliably in three pitching starts, every time shoddy fielding has helped his downfall. Gismond, catcher on the squad, has been good behind the plate.

"I don't think I look 30, do you?" "Not any more," dear."

"The judge asked why the case wasn't settled out of court. That's what we were doing, for honor," Timothy answered, until the cops interfered.

A housewife was granted a divorce on grounds of allergy to animals. She testified her husband had scratched her face with a cat, kissed her face with a fish, and had her in the pantry with a mouse. —APPS

JUNE 15, 1953

Admiralettes Whip Bolling, Andrews in Initial Two Frays

Thanks to lots of heavy hitting and the steady pitching of Lefty Maggie McQuarrie, the Admiralettes got off to a successful start in their bid for WIAL softball laurels by winning their first two league games handily.

Coach Spurgeon Slade's ball team had too much power for Bolling Air Force Base as the NNM gals whipped the Wafs, 17-9, in their opening contest here May 28 before a good crowd.

On Tuesday, June 2, the Admiralettes made their initial road trip of the year a winning one by spanking Andrews AFB, 12-7. Andrews scored three runs in the fourth inning to go ahead, 7-6, but six big markers by NNM in the top of the fifth sewed things up as McQuarrie shut out the Wafs the rest of the way.

A host of base hits by Mary Lou Cox, Nancy Aiken, Janie Childs and associates overwhelmed Bolling in the league inaugural on May 28 after rain had twice postponed Bethesda's opening game.

Coach George Ashton had a merry time waving base runners around third base and in to score as the Admiralettes built up a 15-3 lead by the end of the fifth session. McQuarrie eased up then and allowed six runs in the last two stanzas, but that still left the losers far behind.

Against Andrews the local girls saw an early 4-0 lead vanish in the third inning when the Wafs tied the score at 4-all. After falling behind 7-6 one frame later, Coach Slade's charges rallied fiercely their next time at bat to decide the issue.

Barbara Bradford hit a home run on a hard smash to center that scooted past the fielder. Cox, Lesley Evans and Joyce Crouch also came through with timely hits as the Admiralettes made it two in a row.

The game with Quantico, originally slated to be played here May 26, was postponed because of wet

Margaret R. McQuarrie

grounds and rescheduled for July 31. Henderson Hall asked a postponement of the contest of June 5, and that tilt will take place on the Marines' field Friday, June 19.

Boots Carlson, NNM's alert catcher, performed well behind the plate in the first two games and is a dangerous left-handed swinger at bat. As expected, McQuarrie has been hurling good ball and is very fast on the base paths.

ERNIE REED, NNM FIELDER, crosses the plate after blasting a home run in MAISAC Softball League opener here May 26. Gasbarre, Cheltenham catcher, vainly awaits throw from teammate as Reed scores. Cheltenham won an 11-inning thriller, 9-7.

NSHA Nine Dumped By Center Command In Stunning Upset

Center Command sprang the biggest upset of the intramural softball league campaign by nipping previously unbeaten NSHA, 10-9, in a thrilling 8-inning contest Thursday, June 4. This left NMRI the lone undefeated team in the loop and sitting at the top of the standings.

Research kept its record untarnished by racking up victories No. 3 and 4 of the season, while highly-rated NSHA now has five wins and one loss. This was how things stood as of Monday, June 8.

Following its 12-8 loss to NMRI on June 3, Center Command was rated a definite underdog against NSHA the next afternoon. But Joe Deidesheimer's team overcame a 9-6 deficit, knotted the score in the 7th frame and then tallied the deciding marker in the 8th.

With two out in the 7th, Deidesheimer walked and Joe Allgood tripled to bring home the tying run. Relief pitcher Joe O'Keefe, who held NSHA scoreless the final three heats, slammed a sinking liner to left-center in the 8th. When the fielder failed in his attempt to make a shoe-string catch, the ball went through him and O'Keefe circled the bases. That did it.

After taking the measure of Lab 19, 14-8, NMRI overcame an early 4-0 deficit to trip Center Command. Jeff Hamby racked up his third and fourth straight wins as Research remained unstopped.

Improving X-Ray School made its record two and one by outlasting the NH Doctors, 19-17, and trampling NH Barracks, 19-4. Jim Mincey hurled good ball in the latter tilt as his mates hit the ball hard and often.

Prior to suffering its first reverse, NSHA dumped NH Barracks, 11-8, and clouted Lab 20, 20-7. Center Command crushed Lab 20, 18-1, behind the good pitching of Anderson.

Pharmacy School's revamped squad won its first game in four starts by clipping Dental, 10-5. NDS later rebounded to beat Lab 19, 21-16. The Hospital Doctors racked up their first victory by capturing a 25-15 marathon from NH Bks., which is still seeking its initial win.

The infield, consisting of Bradford at first base, Aiken at second, Cox at shortstop and Crouch at third, shapes up as one of the league's best and includes several good hitters. All four girls are capable of giving the ball a long ride when they connect.

Starting in the outfield have been Jan Fick in left field, Claire Emmington in center and Evans in right. The outfield is showing improvement and the team as a whole has displayed fine spirit.

INTRAMURAL STANDINGS

Wolff's Den

Going on relief can mean steady employment for the right man—especially if that man is a Joe Page, Jim Konstanty, Hoyt Wilhelm or Sonny Dixon.

Page wore a path from the bullpen to the mound for the Yankees until an ailing arm took the zip away from his fast ball. Jim Konstanty of the Phils set the record for appearances in one season when he appeared in 74 games in 1950.

Knuckle-baller Hoyt Wilhelm relieved in 71 games last season, and has started off this season as if he's on the way to a new record. Hoyt appeared in 12 of the Giants' first 18 games.

And Nats' Manager Bucky Harris is ready to call on rookie Sonny Dixon whenever the situation warrants a tough, cool trouble-shooter.

A good relief pitcher can be the making of a ball club. When one realizes that every club strives to have four route-going starting pitchers, yet top relief men may see action in almost half the games over the full season, one can get some idea of the worth of these rubber-armed handymen.

A pitcher who develops into a relief ace is a tremendous weapon for a ball club to have. He can apply the finishing touches to a good performance by a dependable pitcher who is faltering late in the game. On the other hand, he can rescue a weak pitcher who has run into trouble and seems to be heading for disaster.

His purpose is thus two-fold. He can protect leads, and avert defeat. And from a psychological standpoint, the relief star is just what the doctor ordered.

When the opposition batters are hot, the defensive team knows that help is no farther away than the bullpen. And enemy batsmen who have learned to respect and fear the fireman's appearance know that it takes just a wave of the manager's hand to bring on the ace and put a crimp in their fun at the plate.

For good relief men are confident, poised and courageous. Trouble is their business. They personify authority from the moment they're called upon until the situation is dealt with to the best of their capabilities. They're the Mr. Big when the chips are down, the take-charge guys. The good ones live their part.

Perhaps the most spectacular debut in many years into this category of pressure artists belongs to John "Sonny" Dixon, the 28-year-old rookie of the Washington Senators. Dixon strode to the mound against the St. Louis Browns with the Nats leading by only one run in the ninth inning, and with the Browns having the tying run on third, the winning run on first and nobody out.

The headlines the next day proclaimed the thrilling results. Dixon not only shut the door on St. Louis, but struck out the side to do it, whiffing two left-handed pinch-hitters, walking a man, and then striking out clean-up batter Vic Wertz with the bases loaded to preserve the Washington win.

Most top relief men have checkered careers before attaining stardom. Very few have previously enjoyed similar success in starting roles. Some are tried in relief almost as a last-resort maneuver, and only then show their true worth.

Although the Nats have gotten off to a slow start, Dixon makes their future look brighter. When the days get hotter, and tiring pitchers need support, Sonny will be on the job.

It's been a long climb for the soft-spoken North Carolinian who was signed at 16, and made the grade at 28. But it looks like he'll be employed for a long time to come. Dixon has gone on relief, and he's on his way to major-league stardom.

Will wonders never cease? Dom Zaiia has taken up masonry . . . Yep, just about any Saturday or Sunday, and even after working hours during the week you can find him out in his back yard building an outdoor fireplace. Dancing before his eyes are visions of bar-b-cued hot dogs, etc. Sounds good, Dom.

The picnic proved to be a great success. The children enjoyed the many games and the artist, and the grownups enjoyed the relaxation of that good old country atmosphere and the refreshments.

Russell and Dr. Pape and Dr. Anderson worked their fingers to the bone over a steaming kettle of hot dogs and rolls, while Chief Erickson came away with a brand new radio and everyone had mucho fun.

Terry and Shirley have joined the worry club; they invested in a new car. Now they discuss tires, gasoline and oil instead of dresses and hats, etc. We hope you enjoy yourselves with many trips. But Shirley, I think I'd think it over about that cross country trip; it's a long walk.

Mrs. Mac comes in every day with a new species of flowers. Looks like she spends all her spare time in her garden. Mrs. Mac, you might help Capt. Taylor out with his potatoes. He's having a little trouble, so you might render your expert advice on potatoes, tomatoes and what have you.

Marchand and Leslie are dreaming wistfully about their trip to Idaho. Don't know what you're going to do about your Boston accent, Marchand.

Congratulations to Mr. and Mrs. Bowser who were married on the 28th of May. We wish you lots of happiness.

Well, yours truly is taking her marriage vows on the 20th of this month. As of that date I'll be Mrs. Clifford J. Holmes. Cliff and I will be away for awhile, so Miss Branchflower, better known as "Pat", will write the next column for you. So, till next time, smooth sailing to all hands from: The Gal from the Hub.

(Editor's Note: Good luck, Connie.)

Med School Daze

by Jiminy

Rumors Are Flying: The whole Lab 19 class seems to be giving the staff clinic a run on sedatives while sweating out their orders. One of the boys rotating on the third deck has a novel idea about it: he's keeping what he calls a "rumor log." So far he's filled up about three pages!

Casting Anchor: Hello to Keller, HM3, our new deputy sheriff, who came to us courtesy of FMF LANT and to Simmons, HM1, from the USS Haven.

Weighing Anchor: So long to Erwin of the Tissue Bank and Williams of the Print Shop who are off to see the world via COMSERVLANT.

Launchings: Congratulations to Chief King and Osting, HM3, on their new arrivals. Both pops are doing very well.

Seems that one of the boys in Optometry School is taking quite a ribbing. Serutan spelled backwards is Natures; Rekrapp spelled backwards is ———. Oh, by the way, how's your golf game?

Bowers: "Where, oh where has my little dog gone," etc. Is that what they call a dog watch?

Some of the boys in Lab 19 had quite a party the other night. Too bad the Galley doesn't stay open until two a.m. It sure would save wear and tear on the golf course—right, Dave?

I hear Lab 19 wants to buy a new softball pitcher. How much am I offered for Maggie? Until next time—be good, By Jimmy!

Navy Belles

by George

The new help-your-neighbor plan is working out fine at our house. You can see more of it every day. A few weeks ago we had a long weekend and everyone took advantage of it. Two examples were Lorraine Mann and Ivy Hall, who were lying on the beach with a box of chocolates.

Hammy started leave to visit her Chief who is home from sea. Norma was on leave back home in New Jersey. Anna has gone on leave too; maybe she will find that "lucky old son with nothing to do." Ruth Clarkson has a new song: "I'm on the trail of the long lost mops."

Now double E and T have a girl from Texas named Betty. She only comes around on duty nights, but her tales are the size of Texas and that's where she wants to go. Sandy has been seen straining dirt to get the weeds out before she planted her flower.

Ethel is our new night house mother and Minnie is back on the hospital staff. Do you write poetry, Ethel? Five new Waves just arrived from Bainbridge for Hospital Command and they are gladly welcomed by the rest of us.

My roommate was sick in the hospital with her back bothering her. Tillie was at "talking rest" when she had her mouth wired shut. Eleanor was nursing her knee and, of course, there is Gwen, still in a leg cast.

I still remain the girl from the heart of Maryland, by George. P.S.—Have you seen Scotty's hat anywhere?

Dr. A. J. Cardall Lectures at NSHA

Dr. Alfred J. Cardall, a well-known management consultant with considerable experience on the technical phases of personnel selection, training, executive development, systems and procedures work, was a recent lecturer at the Naval School of Hospital Administration.

In his topic, "Building Incentives through Proper Job Description, Evaluation and Performance Ratings," Dr. Cardall presented certain basic principles in the construction and use of job descriptions in management.

One of the greatest motivating forces in getting people to use their abilities to the fullest extent, according to Dr. Cardall, is to let them know what they are supposed to do and the standards of performance they are expected to meet.

Hence, well prepared job descriptions form the basis for proper introduction to the job and for the recognition of differences in job content.

Dr. Cardall received his Bachelor's and Master's degrees from Boston University, College of Business Administration. After fifteen years in office administration, specializing in personnel and systems work, he went back to school to receive his Doctor's degree in Psychology from Harvard.

Following the war years, he became a director of industrial relations for a nationally known organization, but subsequently returned to consultant work as head of his own organization.

EM Clothing Prices Slated for Change

A new clothing price list is in the offing. This list is slated to affect Navy, Marine and Coast Guard personnel, and will become effective July 1.

The new prices are expected to reflect the changes in current procurement costs to the services. They are expected to affect the basic uniform allowances, but Defense officials declined to mention which items are scheduled for increase or decrease in cost.

This is to prevent personnel from going on a buying spree to purchase items scheduled for increase.

Last July 1 the clothing prices took between a 15 and 20 per cent drop. This resulted in cuts in clothing allowances given to new recruits and also in the monthly maintenance allowance.

The Difference Between Optical and Optometry

Difficulties in nomenclature of the technical terminology of the Navy is excusable when so many of the words in our English language are the same but have different meanings. The difference between the Optical and Optometry Departments of the NMS should be of interest to everyone, as the latter is located here.

"Optical," in the Navy, consists of the care and installation of optics of all binoculars, telescopes, range finders and other instruments. The technicians who do this work are rated as "Opticalmen," and they work under Bu-Ships.

In another category are the "Optometric Technicians" who are trained in the Optometry Department of the Naval Medical School to fabricate ophthalmic spectacles from prescriptions. This is a relatively new program in the Navy.

(Editor's Note: This article by Lt. S. H. Burgess clarifies an erroneous statement in the last issue of the NEWS.)

Navy Hospital Corps Celebrates 55th Anniversary on June 17

The Navy Hospital Corps will celebrate the 55th anniversary of its establishment on June 17, 1953, the Bureau of Medicine and Surgery has announced.

Although the Hospital Corps was not officially established until 1900, there were predecessors to today's corpsmen as early as 1798, according to the Bureau's records. These were known in the old days as lolly boys.

Eye Easer?

AFPS

ARLENE DAHL, as you can plainly see, is a sight for any kind of eyes. In view of this she has been named "Miss Save Your Vision Week of 1953"—which should be just the thing for those tired eyes, men.

The first lolly boy on record in the U.S. Navy was John M. who was recruited for the crew of the Frigate Constellation. His job was to help the surgeon and the surgeon's mate care for sick and wounded seamen.

In June 1861 a Navy Department General Order replaced the lolly boy with the male nurse. Then in 1873 the rating of "lolly man"—personal attendant on sick—replaced that of nurse.

The Navy Hospital Corps was established by an Act of Congress June 17, 1898. Congress reorganized the Hospital Corps in 1916 providing for the pharmacist ratings which continued until 1948 when the title was changed to the present Hospital Corpsman.

The honor of being the first man to join the Hospital Corps of the regular Navy went to Ensign Flora, HM1, who was sworn in at a ceremony in the office of the Secretary of the Navy July 7, 1944.

At present there are 23,655 Hospital Corpsmen on duty with the Navy, of which 865 are Waves and 4,423 dental technicians.

During WWII, seven Corpsmen were awarded the Congressional Medal of Honor. There has been one awarded to a Navy Corpsman in the Korean War along with 15 Navy Crosses. (AFPS)

A tomahawk is what if you go to sleep suddenly and wake up without hair there is an Indian with. (Bursts and Duds)

What to See Around D. C.

MONDAY, June 15—"Showboat," Washington Festival, Inc., Carter Barron Amphitheatre, 2030; through June 21, nightly.

TUESDAY, June 16—Baseball, Washington vs. Chicago, Griffith Stadium, 2030; also June 17 and 18, same time.

WEDNESDAY, June 17—June Ball, Social Dance Groups (D. C. Rec. Dept.), Roosevelt Center, 2030.

FRIDAY, June 19—Baseball, Washington, vs. Cleveland, Griffith Stadium, 2030; also June 20, same time.

SATURDAY, June 20—Dances for Service Personnel, Capital Girls (D. C. Rec. Dept.), outdoors, Thomson Center, 2030 each Saturday.

SUNDAY, June 21—D.C. Rec. Dept. District Women's Amateur Golf Tournament, Langston Course, 1000 on. Baseball, Washington vs. Cleveland, Griffith Stadium, 1400; also June 22 at 2030.

MONDAY, June 22—"The Merry Widow," Washington Festival, Inc., Carter Barron Amphitheatre, 2030; through June 28, nightly.

TUESDAY, June 23—Recital, "Accordioneers of 1953," Roosevelt Center, 2000.

Baseball, Washington vs. St. Louis, Griffith Stadium, 2030; also June 24 and 25, same time.

Fencers' Club, Roosevelt Center, 13th and Upshur Streets, N.W., 1900 to 2200 each Tuesday and Thursday.

THURSDAY, June 25—Young Adults' Dance, service personnel welcome, Friendship House, 619 D Street, S.E., 2000 to 2300 each Thursday.

SATURDAY, June 27—Square and Ballroom Dancing, Mt. Vernon Place Methodist Church, 900 Massachusetts Ave., N.W., 2030 each Saturday.

SUNDAY, June 28—Sailing Races, Potomac River Sailing Association, Hains Point, 1300 to 1700 each Sunday.

SCUTTLEBUTT

"I was in the service, too."

EARLY SEPARATION

(Continued from Page 1)
curs during the period Mar. 1, 1954 through Aug. 31, 1954 shall be separated two months early.

Nothing in this directive is to be construed to lengthen the service of Fleet Reservists or Naval Reserve veterans whose period of active service is equal to or less than 22 months as provided in BuPers Instruction 1910.5A, to prevent extension of active duty in accordance with paragraph 4.E, BuPers Instruction 1910.5A, or to conflict with the provisions of Article 1402 and C 10317, BuPers Manual. TO:

R. Adm. Leslie O. Stone Takes Over As Center CO

Change of Command Ceremony Tomorrow R. Adm. Bertram Groesbeck Retires

R. Adm. Bertram Groesbeck

TO ALL OFFICERS, ENLISTED PERSONNEL AND CIVILIAN EMPLOYEES OF THE NATIONAL NAVAL MEDICAL CENTER:

On the 30th of June I am relinquishing command of the National Naval Medical Center to Rear Admiral Leslie O. Stone, Medical Corps, U. S. Navy, and at the same time I am retiring from active duty in the Naval Service.

I regret the necessity for both of these actions. It is obvious, I think, that I should regret leaving an outfit in which I have served for better than 36 years. My sorrow in leaving the Medical Center, however, is entirely your fault. Your individual loyalty to the Navy, to the National Naval Medical Center, and to myself as Commanding Officer, has made my tour of duty here one that I shall always remember and cherish as the outstanding highlight of my Naval career. Naturally, I hate to give it up.

I cannot personally thank each of you for your contribution to the good of the command, but I can tell you as a group that it is your efforts which maintain the deservedly splendid esteem in which the Medical Center is held, both in and outside the Navy.

I know you will continue your efforts under the new Commanding Officer and will increase the distinguished reputation of this great institution.

My thanks and good wishes to all of you.

B. Groesbeck

NSHA Officers Class Graduates

Graduation exercises for the Fourteenth Officers Class of the Naval School of Hospital Administration were held on June 17. Rear Admiral J. Brown, (MC), U. S. Navy, and Deputy Assistant Chief of the Bureau of Medicine and Surgery, was the principle speaker for the occasion.

The exercises terminated a ten-month course of instruction in hospital administration. The class consisted of thirty-five officers of the Medical Service Corps and Hospital Corps of the U. S. Navy; five officers of the Medical Service Corps of the U. S. Air Force, and one Naval Medical Officer from the Republic of Korea.

Following the exercises the graduates departed for newly assigned duty stations.

R. Adm. Leslie O. Stone, Medical Corps, U. S. Navy, will assume command of the NNMC on Tuesday, June 30, 1953 at 1100. R. Adm. Stone relieves R. Adm. Bertram Groesbeck, Jr., Medical Corps, U. S. Navy who will be placed on the retired list at that time, following more than thirty-five years continuous Naval service.

Change of Command ceremonies appropriate to the occasion are planned and honors to the outgoing and incoming commanding officers will be rendered by component commands of the NNMC with the assistance of the U. S. Marine Band, Marine Honor Guard and Color Guard made available by the Commandant, U.S. Marine Corps.

Following the time-honored ceremony of reading of orders by the outgoing and incoming commanding officers and the ceremonial lowering and raising of flag officers' flags, R. Adm. Stone will inspect and review military formations of the separate Naval Medical commands.

Immediately following his retirement, R. Adm. Groesbeck takes up his new duties in civil life as Director of the Department of Public Health of the state of Indiana, with headquarters at Indianapolis. His appointment to this post was recently confirmed by Governor George N. Craig.

In addition to his contribution to military and aviation medicine over the past thirty-five years, R. Adm. Groesbeck received the 1951 Lyster Award. This award is presented annually by the Aero-Medical Association for outstanding achievements in aviation medicine.

He recently was presented with the 1952 Good Government Award of the Bethesda Junior Chamber of Commerce and the Alumni Achievement Award of George Washington University for 1953.

R. Adm. Stone, (MC), U. S. Navy, was born in Kittrell, N. C. on June 21, 1895, the son of John C. Stone and Mrs. Serdia Stone. He attended the University of North Carolina and received his medical degree from Jefferson Medical College, Philadelphia, Pa. in 1918.

He was appointed Assistant Surgeon with the rank of Lt. (jg) in the U. S. Naval Reserve Force on July 6, 1918. On December 20, 1920, he was transferred in that rank to the Medical Corps of the U. S. Navy and subsequently attained the rank of Rear Admiral to date from April 1, 1944.

R. Adm. Stone's service of the past thirty-five years has included a wide variety of assignments both ashore and afloat. During World War II he served as Medical Officer in Command of the U. S. Naval Hospital, Pearl Harbor, T. H. For "exceptionally meritorious" service in that command from August 17, 1944 until September 2, 1945, he was awarded the Legion of Merit.

The Citation states that "he provided maximum care to the large number of patients received and evacuated during a critical period of the war (and) when the load

R. Adm. Leslie O. Stone

increased 150 per cent in fifteen days following the Iwo Jima invasion, he maintained a high standard of service to the casualties despite adverse conditions . . ."

Remaining in Hawaii, he served from October 1945 until September 1946 as Medical Officer in Command, U. S. Naval Hospital, Aiea Heights. He returned to the United States and reported on September, 1946 as Medical Officer in Command of the U. S. Naval Hospital, Bethesda, Maryland, where he served until July 1948.

Reporting on July 8 for duty as District Medical Officer, First Naval District, Boston, Mass., he served in that capacity until April of 1951.

He was next ordered to duty as Inspector General, Medical Department Activities, Navy Department, Bureau of Medicine and Surgery. On March 10, 1952 he was named Assistant Chief of the Bureau of Medicine and Surgery for Personnel and Professional Operations. It is from this assignment

that he comes to his new duty as Commanding Officer of the NNMC.

In addition to the Legion of Merit, R. Adm. Stone has the Victory Medal (World War I); the American Defense Service Medal; the American Campaign Medal; the Asiatic-Pacific Campaign Medal, and the World War II Victory Medal.

R. Adm. Stone is a Fellow of the American College of Surgeons; a Diplomate of the American Board of Otolaryngology, and a member of the American Academy of Ophthalmology and Otolaryngology and the American Medical Association.

His official address is Kittrell, N. C. He and his wife, the former Irma Rose of Kenly, N. C., and their son, Leslie Ogburn II, are currently residing at 6810 Denton Road, Bethesda, Md. He will move to Quarters "A", NNMC immediately following his assumption of command.

AFRS Platter Chatter

Musical Versatility Essential Factor In AFRS Program Planning for You

The Music Transcription Library of the AFRS contains a wide variety of musical selections varying in mood from sweet and hot to long-hair; from spicy Latin rhythms to yodeling hill-billy, and from military fan-fare to jumping polka.

The artists range from popular gal vocalists like Sarah Vaughn, Doris Day and Mary Small to swoon-getters like Johnny Ray, Eddie Fisher and Al Martino and concert and operatic stars Ezio Pinza, Jan Peerce and Roberta Peters.

To entertain you in the orchestral field are old standbys like Sammy Kay, Guy Lombardo and Woody Herman; rising newcomers like Camarata, Mantovani and Percy Faith; Latin tempos of Lina Romay, vivacious Latin songstress, and "Mambos Designed for Dancing" by Ramon Argueso.

"Little" Jimmy Dickens, Tennessee Ernie, and Roy Acuff and his Smoky Mountain Boys set up the square-dances, while the very popular U. S. Air Force Dance Band, Lawrence Welk, the Six Fat Dutchmen, or Eddie Habat play the very fine polka music that is becoming so popular.

The AFRS hour is for your listening pleasure. Send your requests to HMC "Bob" Hudgens, your AFRS Disc Jockey, c/o the I & E Office, Bldg. 102, and then sit back and listen for your favorites.

AFRS PROGRAM SCHEDULE — CHANNEL "C" — 1300-1345 Monday through Friday

The Chaplain's Corner

By Chaplain William G. Sodi

People are always saying that we ought to get back to the old days when men and women were better than they are now. We might assume from the newspapers and the "pious pronouncers" that the moral fiber of society has suddenly started to rot. I don't believe that that is true.

This is not to say that everything is crystal pure in the department of morals. But people these days are much like they have always been. The moral level does not vary more than a degree or two through the centuries.

The critical point of the matter is that present day technology and communications make the effects of badness so much greater. In the old days we heard just rumors of the wickedness of the "fast" set; now lurid magazines give us details—and we are tempted to follow. In the old days a tyrant spoiled a country and few people knew it. Now the press tells us, and wars result.

All this technical advancement can be a good thing, if we have the people to go with it. What we need are not men like those of the old days, but better men—honest men, considerate men, humane men. And this last sentence points at each one of us. We can all well pray this ancient prayer: "Lord, make the world better—and start with me."

Payroll Savings

Mr. Joseph M. Almond, Chief Quartermaster, Engineman says: "My many years of purchasing through the Payroll Savings Plan are helping to insure the welfare of the U.S.A. as well as my own future. On this Fourth of July, why not join the ranks of the Patriots who strengthened the Bonds of Freedom! Buy U. S. Defense Bonds the Payroll Savings way."

Memphis, Tenn.—J. Boyd Mason is a firm believer in the saying "When it rains it pours." After buying a TV set he won two others within two months of drawings.

Instruments for Ship's Band Obtained by Much Cumshaw on DE USS Nicholas

The Navy is resourceful. They make ships out of steel — and ever heard of steel floating? But this is just one of their many "Good Old American Ingenuity" — in the Navy they call it Cumshaw — has again reared its head.

The men of USS Nicholas, a destroyer escort on duty in the Far East, have risen to the challenge.

No ceremony is complete without the strains of a military band. The men of the Nicholas were well aware of this fact and decided to do something about it.

By cumshawing (def.—scrounging, hustling, liberating) around here and there, six musician-sailors of the crew were able to come up with enough equipment to complete a band.

The drum was bought second hand in Honolulu, but a drumstick was lacking. A broken swab handle was cumshawed and whittled down to size.

The trombone is the culmination of the efforts of several artists. A metalsmith on the ship welded several of the parts together and somebody, equally adept with adhesive tape, did the rest.

The saxophone was formed from two useless broken ones. The trumpet they had. It's held together with rubber bands — occasionally one slips and a valve falls off.

The sousaphone, resembling a big hunk of shell fragment rather than a musical instrument, was acquired from a cruiser where it was about to be thrown away. A little dent pounding, welding and hole plugging, and it was ready to go.

And that's how the Nicholas gave birth to the blues.

The name of the group, naturally enough, is "The Cumshaw Band." And the name is not an idle one. In the words of band-leader Ens. John Wetherall, "constant cumshawing is necessary to keep our instruments working."

The crew is delighted by the appearance of the volunteer music-makers. However, Navy bands on bigger ships are not quite so delighted, particularly when they are caught by surprise.

Frequently, when two Navy ships having bands meet, the band of the junior ship renders honors and the senior ship's band returns them. When the Nicholas draws near a battleship or cruiser the bands on the bigger ships rarely form, figuring that the smaller ship would not be carrying a band.

And then the fun begins. As the Nicholas' six-piece band pops out on deck and starts to sound off, the fur flies as the members of the other ship's band hustle to get into position to return the honor.

Total casualties among tuba players forced to doubletime through hatches and up ladders have not yet been released. (AFPS)

Chief O'Brien Owns Three Race Horses Plans for Future

Some people bet on horses and lose their shirts. Some people race horses, race them and can afford to buy a new Lincoln. The latter is true of Chief J. J. O'Brien who works in the I & E Office.

At present the HMC owns three horses. They are Big Bo, a trader who has a record of 2:06 1/5, Big Bo Counsel, a pacer with a record of 2:06 4/5, and a horse which has yet has not raced. This one is a yearling filly named Jackie O'Brien.

Big Bo Counsel has been the Chief's best money maker to date. In five starts so far this year he has two firsts, two seconds and one third to his credit. He is presently racing at Bay Meadows Raceway in San Mateo, Calif.

Chief O'Brien is restricting his racing this year to the west coast but he has nominated for almost all of next year's stake events at large raceways throughout the country, the yearling filly Jackie O'Brien.

He anticipates that Jackie, who will be pacing in 1954 as a two-year old, will be the fastest of his three horses.

The amiable Chief has been engaged in the harness racing sport since 1947. During the early part of his turf career he used to race his own horses.

However, now that he is so far from the racing areas, he is not able to do so.

Currently pulling his second tour of duty here at NMMC, Chief O'Brien has 13 years of Naval service behind him. On retiring from the Navy he hopes to have his own stable and make racing his second career.

Chief J. J. O'Brien of the I & E Office with his pacer Big Bo Counsel who has a mark of 2:06 4/5.

Cdr. Calkins New CO of NSHA; Relieves Cdr. M. E. Zimmerman

Commander Willard Charles Calkins, MSC, USN takes over today as Commanding Officer of NSHA, relieving Commander M. E. Zimmerman, MSC, USN. Cdr. Zimmerman will become Administrative Officer of the District Medical Officer of COM ONE, with headquarters in Boston, Mass.

Cdr. Calkins was born in New Haven, Conn. on Sept. 30, 1899 and graduated from Central High School in Syracuse, N. Y. prior to enlisting in the U. S. Navy on April 1, 1919.

On October 1, 1929 he was appointed Pharmacist, and six years later was advanced to Chief Pharmacist. On June 15, 1942 he received his commission as Lt. (jg) in the Hospital Corps, U. S. Navy, and subsequently advanced to his present rank of Commander on July 1, 1951. He transferred to the Medical Service Corps in Aug. 1947.

Following his enlistment in the Navy in 1919 he was assigned to the Hospital Corps Training School, Great Lakes, Ill. After this duty, he served with the Marines, aboard the USS Relief and USS Bobolink, and eventually wound up at the U. S. Naval Hospital, Washington, D. C.

After more Marine duty and attending the Naval Medical School in Washington, D. C., he became Property and Accounting Officer at USNH, Newport, R. I. This task he undertook from 1930 to June 1931.

Following an assignment as Property and Accounting Officer at the Naval Hospital, Pearl Harbor, he reported in Sept. 1941 as Administrative Assistant to the Commanding Officer of the USNH, Philadelphia, Pa.

He remained there following the U. S.'s entry into WWII and in

Cdr. M. E. Zimmerman

Upon relinquishing the command of the Naval School of Hospital Administration I wish to express my deep gratitude to the many individuals of the commands of the National Naval Medical Center for their cooperation and untold services in support of our training program.

Without their generous contributions of time and effort, it would not have been possible to carry on the work of the school.

M. E. Zimmerman

Navy Doctor Honored For Pocketknife Operation

Niagara Falls NAS—The pilot-victim of an air crash near here last July recently presented a decoration to Navy doctor, Lt. Samuel A. Youngerman, who performed an emergency pocket-knife operation at the crash scene and saved his life.

Air National Guard Capt. Alton A. Massey pinned the Navy and Marine Corps Medal on the doctor who crawled through wreckage, used a pocket knife to open the pilot's throat and remove dirt and debris causing strangulation.—(AFPS)

Shown making the jokes is the emcee of variety show presented in the NNM auditorium Thursday evening, June 11. Sponsored by Twentieth Century Models, Inc. of Wash., D.C., this show featured some of the top models in the nation's capital.

Manual Lists Musts To Advance in Rate

Excerpts from the latest revision of the "Manual of Qualifications for Advancement in Rating" as they apply to enlisted personnel attached to the Hospital Corps, are now available through the Hospital Corps Training Office in Building 131.

The requirements, both practical and military, are outlined in this 15-page booklet, and include all enlisted rates through Chief.

The military requirements are those generally applicable qualifications which all enlisted personnel are expected to demonstrate as a minimum for advancement to specific pay grades. Many operational factors are also listed in this booklet.

Arterial Surgery Reduces Amputations

Lt. Frank C. Spencer, a 27-year-old Navy Doctor presently serving with the 1st Marine Division, is making medical history by the use of a new operation which reduces the necessity of amputations by about two thirds.

According to Dr. Spencer, "When an artery is wounded, the missile destroys a section of it. What is needed is a tube to reconnect the two ends—to bridge the gap resulting from damage to the blood vessel."

"The artery grafts are sewed in place with very small stitches so that the connection will be watertight to let the blood pass through. The operation takes from two to four hours."

These spare parts are supplied from the "artery banks" which are kept stocked from limbs so badly damaged that amputation was necessary.

Some sources believe that one third of all amputations during WW II resulted from the inability of the doctors to repair the blood vessels of the wounded men near the front.

Lt. Spencer has performed more than 80 such operations while with the Marines. The appendage of the wounded man has been saved in more than 65 cases.

This particular arterial repair operation is new in the Korean War and was begun in August of 1952.

Capt. J. H. Sault Assumes Duties As NDS Executive Officer July 3

On July 3, Capt. J. H. Sault DC USN will relieve Capt. B. H. Faubion DC USN as Executive Officer of NDS. Both Capt. Sault and Capt. Faubion attended the University of Southern California's College of Dentistry. They graduated only one class apart and entered the Naval Dental Corps together in 1936.

Capt. Faubion departs to become head of the Dental Professional Branch, Bureau of Medicine and Surgery, Navy Department, Washington, D. C.

Capt. Sault has had considerable administrative and practical experience in dentistry, with the field of Prosthodontics being his specialty. He was licensed by the California State Board in July, 1933 and was an Oral Surgery Intern in the Los Angeles General Hospital from Sept. 1933 to Apr. 1935.

During this period he maintained a private practice in the Roosevelt Building in Los Angeles, until his entrance into the Navy in Apr. 1936.

He participated in six major campaigns aboard the USS Lexington during 1943 and 1944, and was the Executive Officer at the Pearl

Capt. J. F. Sault

Harbor Naval Dental Clinic from Oct. 1946 to June 1950. Prior to coming to Bethesda he was Chief of Dental Service at the Naval Hospital in Philadelphia, Pa.

During this tour of duty he served as a visiting lecturer to the graduate students in Prosthodontics in the Graduate School of Medicine, University of Pennsylvania, and also to the senior seminar group of the School of Dentistry of Temple University.

Listing swimming and golf as two of his favorite sports, he enjoyed playing a few holes with our present NNM golf champion, Lt. J. W. Kinder, a few years ago.

Promoted to Lt. in 1940, he attained his present rank of Capt. in January 1951. He wears the Presidential Unit Citation Ribbon, WW II Ribbon, Defense Ribbon, American Zone Ribbon and the Asiatic-Pacific Ribbon with six stars.

He was elected to the American College of Dentists on Oct. 29, 1950, and was certified a Diplomate of the American Board of Prosthodontics in Feb. 1952.

Capt. Sault is married and has three children. They are Lawrence, age 17, Richard, age 13, and Douglas, age 5. At present he is living at the BOQ, but he plans to bring his family here shortly.

Indigestion?

Cornith, Miss.—One mistake cost Mrs. G. B. Voyles' children their vegetable garden. They used cement instead of fertilizer.

Memphis, Tenn.—Detectives are looking for the person who cashed a check drawn on the "East Bank of the Mississippi" at a local department store.

Sounds Sensible

Los Angeles, Calif.—Quizzed by a reporter about his formula for a long life, Joseph D. Louzier, who claims to be 121, advised: "Just keep breathing, son. Just keep breathing."

(Armed Forces Press Service)

Navy Research Team Off for Africa To Study Giraffe's BP

Three Duke University medical scientists, backed by the Office of Navy Research, are planning to set out for Africa in quest of a giraffe which they hope will solve some flying problems.

The tie-up between flying and giraffe research is this: an adult giraffe normally has a neck of from 10 to 14 feet in length and requires a lot of pumping to get blood from his heart to his head.

Lack of adequate blood supply to the pilot's head causes blackouts in flight. The effect of centrifugal force on the pilot is the same as if his head were removed some distance from his body. The giraffe is actually built that way.

According to Dr. James V. Warren, head of the research team, the first step will be to take the blood pressure of the animal by a series of pressure gauges.

If the giraffe's blood pressure is only slightly higher than the adult human, they hope to find evidence of a U-tube effect or siphon or of some other hemodynamic mechanism the giraffe has of getting blood to his brain.

Studies with pilots have suggested that the flow of blood to the brain might be aided by the U-tube idea which uses the weight of the descending fluid to force the blood back up.

On the other hand, if the scientists find extremely higher blood pressure in comparison with humans, it will be established that the U-tube effect is not used by giraffes and further studies will be made on the kidneys, blood vessels and heart tissues.

The expedition chose Africa for finding an experimental giraffe after efforts to borrow one in the U. S. failed. (AFPS)

— These Gave —

Members of NNM, both civilian and military, who donated a pint of blood during the period ending June 20, were:

Boston (AFPS)—A housewife was granted divorce on grounds of allergy to animals. She testified her husband hit her in the face with a cat, rubbed her face with a fish, and locked her in the pantry with a mouse.

Chiefs Initiate New Member to Fold; 'Black Bart' Tested on Navy Regs

Robert Franklin Barton, better known to the staff of NDS as "Black Bart," after much effort finally made Chief. To commemorate this happy event in his life, the chiefs of NDS decided that they would initiate him into their influential midst by a bit of hazing. This took place Monday and Tuesday, June 15 and 16.

On Monday morning, the new Chief Barton reported to the senior chief of NDS in full uniform of the day, including medals, and was posted as sentry in the rear of Bldg. 122. He was instructed to march in a military manner back and forth for 20 minutes.

Every 10th trip he was to carry with him a field dental repair kit (weighing about 40 lbs.). The reason his 'superiors' gave was to make sure he could carry out his duties and knew the Navy regulations on how the kit should be handled and carried.

During his 10-minute break, he was told to go throughout Bldg. 122 and obtain the initials of every chief aboard, to make sure he was in proper uniform to be standing sentry duty.

At 1100 he was again inspected by the CMAA who found that his haircut exceeded the maximum

Chief Barton at chow time.

regulation length by $\frac{1}{8}$ of an inch, and he was promptly granted a half hour absence to get this irregularity corrected.

He was then mustered again. Following this last muster he was granted 10 minutes for chow and was then put back on sentry duty.

The following day as chow time neared, he was 'properly attired' and escorted to the mess hall by several members of the staff. That evening a dinner was held in his honor at the Chiefs' Club.

Following these festive events, Chief Barton was allowed into the fellowship of his brother chiefs. He is now waiting anxiously for another up-and-coming chief so that he can return the 'favor' that was so graciously bestowed on him.

Military Menagerie

"Clean sweep down—that's all that guy knows!"

Wright Gives Talk Before NSHA Class

Mr. Moorehead Wright, a management consultant with a well-known national organization, was a guest lecturer at the Naval School of Hospital Administration recently.

Speaking to the student officers, Mr. Wright discussed the development of managerial talent to meet present and future requirements. A research program in this field has exhibited certain basic principles which appear to have substantial validity and wide applicability to the work of management and the development of plans in any type of operation.

Mr. Wright graduated from Cornell University in 1927. His experience includes both engineering and sales activities at headquarters and in the field.

Most recently, after a tour of duty as Manager of Employee Relations of Hotpoint, Inc., in Chicago, he was promoted to the position of Assistant to the President of that Company, in which position he organized and executed a comprehensive program of organization and management development.

For the past year he has been a consultant in the Management Consultant Services Division of General Electric in New York, carrying on a research program in the field of management development.

Entertainers Here for Ward Tours and Staff Pleasure

Above are a group of photos taken here on Monday afternoon, June 15, when three separate units of big-name entertainers toured wards of the Naval Hospital. Among those appearing was Eddie Bracken, famous movie star. This special attraction for NNMC patients was presented under the auspices of the Professional Entertainment Branch, Special Services Division, Department of Defense.

Man, Check That Scorecard

Bill Downing, NNMC golf professional (left), and Lt. James W. Kinder look over the latter's scorecard following Kinder's 9 and 7 triumph over Lt. H. J. Civiello in final round of Admiral Swanson Trophy Golf Tournament here. Kinder fired a five-under-par 65 to break the old course record by two strokes.

Home Buying Guidebook Now Available for Vets

A 32-page guidebook for veterans planning to build or buy homes through the GI Bill is now available at all Veterans Administration offices.

The booklet, entitled "To the Home-Buying Veteran," is designed to aid the WW II and Korean War veteran. It covers the cost of home ownership, contracts, final settlement or closing of the loan and what to expect before and after moving into a new home.

Every veteran applying for a certificate of eligibility will be sent a copy. Copies may also be obtained by writing to the nearest regional office of the VA. There is no charge. (AFPS)

Invitation Extended By Local Bible Class For Moonlight Cruise

The Christian Fellowship, sponsored by the NNMC Layman's Bible Class, invites all hands to attend a moonlight cruise on the Potomac. During the evening of singing, refreshments and fellowship, there will be featured Cliff Barrows and Ted Smith, both of Billy Graham's Evangelistic Crusade team. Don Rosenberger, director of the Washington, D. C. Youth for Christ, will emcee the program.

The Wilson Line ship, SS Mt. Vernon, will leave Maine Avenue at N. St., SW on Monday, July 6, at 2000. The cruise will end at 2330. Tickets (\$1.25 per person) can be purchased from Jim Gibbons in Bldg. 12, Clint Mitchell, Bldg. 140, and Bill Dunham, Bldg. 142.

NSHA Clinches Tie For 1st Half Title; Pharmacy Moves Up

NSHA clinched at least a tie for the first half championship in the station intramural softball league by edging out X-Ray School, 8-7, and battering the NH Doctors, 17-0, to complete its season with a record of eight victories and one defeat.

Only an upset 10-9 loss to Center Command prevented NSHA from going through its entire nine-game schedule unbeaten. Second place NMRI must win all four of its remaining contests to tie for the first half title.

Chief Ranes' ball club had to overcome an 11-8 deficit with four all-important runs in the seventh inning to nip surprisingly tough X-Ray School, but the NH Doctors proved much easier as Bob Hartley pitched a shutout.

Having had both of its last two games postponed because of bad

weather, NMRI will see its hopes for a tie with NSHA vanish if it loses any one of the four tilts that lie ahead.

Fast-rising Pharmacy School now has won five straight games in its battle to finish third in the first half race. Chief Watkins' reorganized squad recently squeaked past X-Ray School, 8-7, erased a seven-run disadvantage in dominating the NH Doctors, 15-9, and polished off LAB 19, 20-7.

Heavy hitting by Walt Gelein, Bill Rivers, Harry White and associates, coupled with slick fielding by speedy shortstop Chief Brown and the rest of the Pharm. School ball club, has made it one of the toughest teams in the loop. It now has five wins and three losses.

LAB 20's bustling nine moved to fourth place with a four-and-three record by nipping LAB 11, 17-16, and employing two big six-run innings to throttle NH Bar racks, 12-6, in recent outings. Both LAB 20 and Pharmacy have hopes of gaining top honors in the second half race.

She was Out, but Admiralettes Won

George, Fort Belvoir catcher, prepares to tag out Claire Emmington, NNMC Admiralettes Outfielder, in WIAL softball game here June 15. But the local women scored enough runs to chalk up a 21-10 victory.

JUNE 23, 1963

Crabtree Prepares To Take a Cut

John "Scratch" Crabtree, ace hurler for the NNMC Admirals, waits for the pitch while batting against Patuxent River, Md. NATC in recent MAISAC Softball League game here. Greene is the Pat. River receiver. NNMC whipped the Airmen, 9-1.

Admirals Crush Patuxent River, 16-2, Following 2-0 Loss to Cheltenham

Undismayed by losses to Walter Reed and Cheltenham, Coach Jay Bell's NNMC Admirals came back to crush Patuxent River, 16-2, there June 18, thus notching their second victory in eight MAISAC Softball League tilts.

NNMC scored in every inning save the second and seventh as they routed the Airmen for the second straight time. The Medicalman collected only eight hits, but made errors, walks and alert base running pay off in their largest run production of the campaign.

John "Scratch" Crabtree, ace NNMC moundsman, went all the way to post his second win in six starts. He was touched for seven safeties but never permitted Pat. River to cluster its base knocks.

Ron DeVice, Jim Greer, Noel Schilling and Wayne Davis all hammered the pellet fiercely for the winners, with DeVice getting two doubles and driving in six tallies. In conducting its track meet around the bases, NNMC piled up five runs in the third and four in the fifth.

Although outthit four to three, league-leading Cheltenham racked up a 2-0 triumph over the Admirals here June 16. Chief Breyman of the victors hurled masterful ball scoring his third win in a row over NNMC.

Lefty Ray Jeter started for Bethesda and gave up one run in the opening session and another in the second. Crabtree chucked the last four frames. Walks got Jeter into trouble, although his fast ball was working well.

Walter Reed overcame an early 2-0 disadvantage in clipping NNMC, 10-3 at Forest Glen Section June 11.

Infield hits, bloopers and Texas league singles, and some slow fielding by the Admirals enabled NNMC to tally three times in the second and five in the third to sew up the contest.

NNMC got all its runs in the second chapter. Jim Wilusz held the visitors to four hits, while Crabtree of the losers was strafed for 11.

Guys and Gals Both Drop Loop Contests

Both the Admirals and Admiralties fell before league foes here Tuesday, June 23. Walter Reed blanked the NNMC men, 6-0, while Quarters "K's" strong squad trounced the local women, 12-3.

Five runs in the fifth frame gave Walter Reed its third win in a row over Bethesda. Each team made five hits. Jim Wilusz was the winner and John Crabtree the loser. Quarters "K" scored eight times during the first two innings to win easily. Barbara Bradford and Mary Lou Cox homered for NNMC.

Intramural softball action on Wednesday, June 24 saw Center Command trip NH Bks., 6-1, NDS thump the NH Doctors, 22-7, and X-Ray School trim LAB 19, 21-8.

JUNE 29, 1953

Men's Singles Play Under Way in NNMC Tennis Tournament

Play in the singles division of the NNMC men's tennis tournament got under way last week, with eleven men entered in the competition.

The top five men on the station tennis ladder received first-round byes and automatically advanced to the quarterfinal round. Weather permitting, the winner of the singles division should be decided later this week.

First round matches pitted Chief Weldon against R. W. Maplettoft, M. Walser against A. Somano and K. D. Martin against H. Scofield.

The Weldon-Maplettoft winner was to meet top-seeded R. E. Lieurance, with the Walser-Somano victor going against third-seeded P. J. Cichanowicz, in upper bracket quarterfinal duels.

Fourth-seeded R. M. Hedlund tackled fifth-seeded W. B. Mooney in one lower bracket quarterfinal match. Both drew first round byes. Winner of the Martin-Scofield tussle was to face second-seeded D. Powell in the other lower bracket quarterfinal.

All matches are of the best two-of-three sets variety except for the final, which is slated to be best three-of-five sets.

No men's doubles or women's singles competition has been arranged as yet, owing to lack of interest. However, entries still are being accepted for these divisions. Interested persons should contact the Special Services Office, ext. 672 or 227.

Starting Times for Weekend Golf Play Can Be Reserved

Starting times for weekend and holiday play on the NNMC golf course now may be obtained by phoning the golf shop, ext. 477, or registering in person with the golf shop attendant.

This new policy of starting times went into effect on Saturday, June 27. They may be made as much as one week in advance.

These starting times will be restricted to threesomes and foursomes. It is anticipated that the inauguration of starting times will help relieve the crowded condition of No. One tee on Saturdays, Sundays and holidays.

Final round results in the lower flights of the recently completed Admiral Swanson Trophy tourney are as follows.

C. R. Sikes edged out D. J. Doo- hen in the Second Flight final, 2 up. H. E. Reitz downed J. C. Kurtz, 5 and 4, to take the Fourth Flight title. D. J. Giorgio defeated R. A. Isles, 3 and 1, for Sixth Flight laurels.

Evans Swings Hard

Right Fielder Lesley Evans of the Admiralties takes a healthy cut at the ball in tilt with Fort Belvoir. NNMC rapped out innumerable base hits in walloping the Wacs.

X-Ray Runner is Safe at the Plate

Typical of the spirited play in this year's station intramural softball league is this home plate action in the recent Dental School-X-Ray School tussle. An X-Ray runner slides safely across the platter as Dental's pitcher gets the ball too late to make a play. X-Ray was the winner, 21-15.

Wolff's Den

Bob Wolff

HOOSEGOW: Phillies Manager Steve O'Neill has the unusual distinction of having been put out of his first game in organized ball before he ever got in.

The scene was Elmira, New York, back on July 17, 1910. The 17-year-old rookie was out on the field doing a little warming up before playing his first professional game.

Among the other early arrivals were the sheriff and a couple of deputies. In a matter of minutes, O'Neill and three other players were on their way to jail. It seems that July 17th was a Sunday, and Sunday baseball was forbidden in Elmira at that time.

Four days later, Steve and his fellow players were freed, and O'Neill caught his first game that following afternoon.

QUESTION: What major-league player led the league in strikeouts, grounded into the most double plays, made more errors than anyone else playing his position, and still won the Most Valuable Award in his league?

The answer is Joe Gordon with the Yankees in 1942. Joe committed all the crimes listed above, but he also batted .322 and knocked in 103 runs that season.

TALE OF THE WOODS: Players have been brought up to the major leagues under strange circumstances. For example, the New York Yankees had to send the sheriff after Vic Raschi. The pitcher was hunting at the time the New Yorkers bought his contract and no one knew where he was or how long he'd been gone.

So the sheriff was dispatched into the woods to find Raschi and tell him the Yankees had just called him up to the big leagues. The rest you know. Raschi went from hunting game to finding fame in short order.

SMART MOVE: Did you ever hear of Casey Stengel's famous "freeze play?" Casey developed it at Brooklyn many years ago when he was trying desperate measures to aid his daffy Dodgers.

The freeze play required a right-handed batter. When a runner was on third the Brooklyn pitcher would throw the ball right at the batter's head, yelling a warning as he threw. The idea was that the batter would hit the dirt and the catcher would have a direct throw to third base. The runner, off the bag, would "freeze" when he saw the batter hit the dirt, and would be an easy out.

What happened? "I finally had to discard the play," says Stengel. "It seems the bright fellow I had playing third for me would freeze right along with the runner. By the time he thawed out, we'd be a run behind."

GRIPPING RESULTS: Next time you see Boston's George Kell in action, notice how he holds the bat. Kell uses a hands-apart grip, with his hands placed about two inches apart on the bat handle.

This was Ty Cobb's style when Ty was burning up the league. But Kell thinks he is the only one now playing in the American League who uses the unique grip.

George explained to me that he adopted the grip to help himself become a pull hitter. And evidently it worked, for Kell pulled himself right up to the American League batting championship in 1949, and at this writing is again leading the league.

Dental Explorer

by Petunia

This month is one of great turn-over for the Dental Clinic. While we are very sorry to have lost Dr.'s Anderson and Pape, we are glad to welcome aboard Dr.'s K. K. Bridge, S. Holmes and E. So-bieski—also Captain Sault, who has arrived to replace Captain Faubion, who will soon be going to the Bureau. Best of luck to you, Captain; we'll miss your smiling face very much.

Also leaving us is Cy Livoti, bless his soul; he was discharged today. Good luck in the Golden Gate State to him and his Mrs., who was once one of us, too.

Neil Ondrecek has already left on leave to take the final step and then to return to Bainbridge to attend Prosthetics School. Speaking of final steps, Connie Connors and Cliff Holmes will be on their honeymoon by the time this goes to press.

John Pappas, better known to all as "Pappy," will also be leaving at the end of the month for school at Bainbridge.

Advanced schools will soon be starting here. Not many of the new students have reported aboard as yet, but they are coming in gradually. Those who have reported aboard so far are Hall, Waller and Schaeffer. We hope you enjoy your stay, boys.

NMRI

By R. Conaway

Some people must have taken to heart that article about a pending change in uniform prices. At any rate, there has been a steady stream of officers and chiefs between the Institute and the "white" uniform shop—or could it be the "white" inspection we had last Friday that sent them on a buying spree?

Chief Redwood is all engrossed in his victory garden these days. Don't you know, Chief, you can't farm Texas style in Maryland?

Hear tell that liberty is slow at NMRI. Could be too many special request chits lately!

We all know it isn't safe to play with fire—but Bruntmyer found out the hard way. He lighted one match too many—and was fired for it. At any rate, that's the story he tells.

Hamby, we hear that Clancy is the latest applicant for your "D.D." Club!

One of our HM2's is desperate for an apartment. I think if he should ask, Chief Ashcraft may have a spare pup tent he could borrow. Congratulations to Dr. Shulman (baby girls are nice), and to Chief Cordova and Mr. Mauser (little boys also)!

Off to try their hands at being "sea-going" sailors went LT R. D. Murray to the USS Currituck, A. S. Evans, HMC, to the USS Markob, and J. A. Milo, HM2, to the USS Whidbey.

A welcome aboard to LTJG F. C. Spencer; M. J. Padavic, HMC; C. E. Angle, HMC; G. M. Malakatis, HM1; W. R. Belew, HM1; R. A. Nelson, HM3; H. R. Hill, HN; J. A. Dressler, HN; J. R. Plante, SA, and A. M. Franjione, SA.

Navy Belles

by George

JUST AROUND OUR HOUSE: The month of June has taken its toll in new brides. Connie and Josephine have taken the walk down the aisle to become housewives. Our best wishes to you both. A few of the girls are still sewing, so no doubt more material is still coming. Rose came to visit us during her leave. She is on her way to Bainbridge to be a Boot Camp Instructor.

Jerry Bourne told us all a happy good bye (I don't think) as she took off for the west coast by way of Boston. We sure hope you like Oakland as your new duty station. We are glad you took the well known advice, "Go west young lady — go west."

The June quarter party at our house was very nice, and everyone had a grand time in the back yard cooking hot dogs and in the parking lot dancing. Can't we have more? Sports: Betty Ward and Ruth Clarkson surprised themselves by winning a game of horseshoes. Now they are willing to give lessons. You may see either one.

Salty, who has been on leave, went to New York for some fencing competition. The softball team is making quite a showing. How about coming out to see them—they are great.

I understand Pauline is studying languages. That particular language has been dead for years. Why not just let it rest? See you around in Maryland, by George.

What to See Around D. C.

MONDAY June 29 — Tennis, Middle Atlantic Tournament, Columbia Country Club, all day.

"Of Thee I Sing," Washington Festival Inc., Carter Barron Amphitheatre, 2030, through July 5, nightly.

TUESDAY June 30 — Fencers' Club, Roosevelt Center, 13th & Upshur Sts., NW, 1900 to 2200 each Tuesday and Thursday.

WEDNESDAY July 1 — Instruction, Social Dancing, Men, Women, Thompson Center, 12th & L Sts., NW, 2030 each Wednesday.

THURSDAY July 2 — Square Dancing, age 17-30, servicemen, YMCA, 17th & K Sts., NW, 2000 each Thursday.

FRIDAY July 3 — Co-ed Dance, 1736 Club, Roof YMCA, 1736 G St., NW, 2100-2400 each Friday.

SATURDAY July 4 — International Speakers' Club, YMCA, 1736 G St., NW, 2000 each Saturday.

SUNDAY July 5 — Nat'l. Capital Casting Club — West End Reflecting Pool, Lincoln Mem., Sunday, 1000.

Sailing Races, Potomac River Sailing Assn., off Hains Point, each Sunday, 1300 thru 1700.

MONDAY July 6 — Weight Lifting Group, Cardoza Center, 13th & Clifton, NW, 1930 to 2230 each Monday, Wednesday and Friday.

TUESDAY July 7 — Choral Group, Adults, Garnet-Patterson Center, 10th & U Sts., NW, 2000 each Tuesday.

THURSDAY July 9 — Young Adults' Dance, Service personnel welcome, Friendship House, 619 D St., SE, 2000 to 2300 each Thursday.

SATURDAY July 11 — Square and Ballroom Dancing, Mt. Vernon Place Methodist Church, 900 Mass. Ave., NW, 2030 each Saturday.

SUNDAY July 12 — "Picture of the Week," Nat'l. Gallery of Art, 1430 and 1830 each Sunday.

Va. Courts' Decree In Car Tax Action Favors Servicemen

A Pentagon officer living in nearby Alexandria, Va., who protested paying the community car license tax, received a favorable decision from the city's civil and police court last week.

It was the latest of several recent legal decisions handed down by various courts giving tax relief to service persons under the Soldiers' and Sailors' Relief Act.

Air Force Capt. Francis Smith, a permanent resident of Tennessee who, because of his Pentagon duty, now lives in Alexandria, has Va. license tags on his car. Alexandria wanted him to buy the local auto tag, but he took the matter to court. The judge said he did not have to pay.

Other military persons living in Alexandria, whose permanent homes are outside the state and who have out-of-state auto tags, have been exempt from the local car tax right along.

Virginia's attorney general earlier announced that military persons whose cars are registered in the state but who live elsewhere need not pay the State's advalorem personal property tax.

Such servicemen need not report their cars on the personal property tax forms furnished by Arlington County, Fairfax County and Alexandria.

To take advantage of the Virginia decision, personnel must advise taxing officials they are (1) on active duty; (2) domiciled in another state, and (3) that they claim exemption under Sec. 514 of the Soldiers' and Sailors' Civil Relief Act. (Navy Times)

Navy's School of Music Now Accepts Applications

The Navy has many openings for qualified musicians who wish to continue their musical careers while in the service, the U. S. Naval School of Music has announced.

Enlisted personnel who are interested in applying for the Navy Music Career Program are advised to check with their Personnel Officer or I & E Officer for entrance application forms.

The application should be submitted to the Bureau of Personnel via Commanding Officers.

Those accepted will receive a six-months course of musical studies and performance work at the Naval School of Music in Washington, D. C. Graduates will be assigned to one of the Navy's 64 unit bands. (AFPS)

Mice Replace Monkeys in Polio Diagnosis Living Human Organs Latest TV Addition

Mice prove to be a cheap way to diagnose polio, according to two Doctors of the Virus and Rickettsial Laboratory in Montgomery, Ala.

Drs. C. P. Li and Morris Schaefer were able to produce Brunnin, the third known strain of polio virus in mice. This strain of the polio virus is believed to cause most of the polio in humans.

Upon completion of this phase of the experiment, all three polio strains have been adapted to mice at the Nat'l. Institute of Health, Bethesda, Maryland.

This research has several definite results. Now the expensive and difficult to handle monkeys and chimpanzees that were formerly used can be replaced by mice. This will cut down drastically the expense and time formerly required for the test.

Fluoridation of public drinking water supplies is safe, according to the American Dental Association's councils on dental research and dental health. The ADA journal said that fluorides have no harmful effect on bone structures and tend to slow down the growth of cancer cells.

The Journal added that one part of fluorine per million parts of water is helpful in reducing tooth decay among children. The fluoridation process now operates throughout 730 cities in the U. S.

Televised living human organs, both diseased and healthy, is now possible because of a new development of the Westinghouse Electric Corporation. This was not possible formerly due to the inability of the TV camera to project the image of the dull picture produced by the fluoroscope.

A new X-ray machine now overcomes this obstacle by producing a moving picture of the person's organs 200 times brighter than was formerly possible. This advancement is believed to make possible the viewing by "groups" of widely-separated specialists who will not even have to leave their offices.

Clamping of Artery In the Brain Calms Violent Trembling

A doctor from New York recently described in Atlantic City how if a tiny artery in the brain were clamped off, trembling that is common in Parkinson's Disease would be calmed.

Dr. Irving S. Cooper, who is presently an Assistant Professor at New York University, told how one seemingly helpless patient was

greatly improved after doctors had clamped off one artery in the brain. This patient now is so much improved that he is able to play golf.

Dr. Cooper stated that the anterior choroidal artery was the particular artery he clamped off. In ten test cases, all persons having Parkinson's Disease.

"Each patient in this group was disabled by tremor, rigidity of the muscles, and slow movements both prior to being operated upon. Marked improvement in every case was noted after treatment," added Dr. Cooper.

Capt. R. S. Snyder, Jr. Heads Corres. Course Division at NDS

Recently welcomed aboard by the Naval Dental School was Capt. Robert S. Snyder, Jr. He has become Director of the Dental Correspondence Division, which is an entirely new addition to NDS. Formerly this task was handled by the Bureau of Medicine and Surgery's Dental Division, but with Capt. Snyder's arrival all this work now will be done by NDS.

This includes the preparation and assembling of material, course content and distribution of all Dental Correspondence Courses. These courses are designed principally for those individuals, both officer and enlisted, in the Dental field who wish to further their education. The courses also will help members of reserve components earn "points" toward qualifying for advancement in rank or rate and retirement.

Capt. Snyder attended Muhlenberg College in Allentown, Penn., and received his DDS from the University of Pennsylvania in 1932. Following private practice from 1932 to 1936, he entered the Navy and was ordered to the Naval Dental School, Washington, D.C.

He has since served with the USN at Quantico, Va., aboard the USS San Francisco, USS Indiana, USS Princeton, USS Prairie and at numerous shore stations. Capt. Snyder also attended the Industrial College of the Armed Forces, graduating recently. He lives with his wife and two children in Bethesda.

Adm. Leslie O. Stone Honorary Grand Marshal

Rear Admiral Leslie O. Stone, USN, Commanding Officer of NDMC, was selected as Honorary Grand Marshal of the Fourth of July parade, sponsored by the Takoma Park, Md. Independence Day Committee.

This parade is an annual event led by Takoma Park citizens and is participated in by civic groups of the community and units of the Armed Forces. The parade started at 1000 on the Fourth at Holl and Ethar Allen Avenues Takoma Park.

Dental School Now Is Offering Three Advanced Courses

Capt. R. W. Taylor, Commanding Officer of the Naval Dental School, officiated at the opening of three new classes at NDS for Dental personnel, in Bldg 122 Monday, July 6.

His welcome aboard talk, combined with the other official ceremonies, served to enlighten everyone present as to the changes.

Lt. Cdr. J. C. Chapman, Director of Enlisted Training for NDS, also was present for the ceremonies. He was directly responsible for setting up the courses as directed by the Dental Division of BuMed.

According to Lt. Cdr. Chapman, the Naval Dental School has been offering two basic courses, Dental Repair and Maintenance and Dental Prosthetic (Basic).

The course in Dental Repair and Maintenance will continue in operation here, but the Dental Prosthetic (Basic) course has been transferred to the USNTC, Great Lakes, Ill., and the USNTC, San Diego, Calif.

The three new schools being started here are Class "B" advanced schools of six months duration. They are designed for DT2, DT1 and DTC with the necessary obligated service.

These three advanced schools are, Dental Repair and Maintenance, Advanced Prosthetic, and Advanced Dental General.

Spaces in Building 122 have been redesigned to accommodate the schools. Combined with the new correspondence courses being offered by NDS, they produce a great expansion in the facilities of the Naval Dental School.

Command Change Ceremonies Viewed By Many Visitors

On June 30 R. Adm. Leslie O. Stone assumed command of the National Naval Medical Center at impressive ceremonies held in front of the main building at 1100. Representative groups from all six NNMC commands were present to welcome aboard the Center's new Commanding Officer.

Many distinguished visitors were on hand. They included V. Adm. (Ret.) and Mrs. J. T. Boone; Maj. Gen. and Mrs. George E. Armstrong, Surgeon General of the Army; R. Adm. and Mrs. C. J. Brown, Deputy General of the Bureau of Medicine and Surgery, and R. Adm. and Mrs. H. L. Pugh, Surgeon General of the Navy, to mention only a few.

The ceremonies commenced with the departing message of R. Adm. Bertram Groesbeck, who stated his regret at leaving NNMC. He then read the orders retiring him to civilian life and his new position with the Indiana Department of Health.

R. Adm. Stone then read his orders relieving R. Adm. Groesbeck as Commanding Officer of NNMC. The new C.O. inspected the troops, after which they passed in review to conclude the ceremonies.

The weatherman favored NNMC with a perfect day for the change of command and a large crowd was present for the event.

NIH Clinical Center Now Officially Open

Neighbors directly across Wisconsin Avenue, the Public Health Service's new Clinical Center was formally dedicated by the Secretary of the Department of Health, Education, and Welfare, Mrs. Oveta Culp Hobby, at ceremonies July 2. Four days later, on July 6, the first patients were admitted to this 14-story medical research center.

The building is unique in structure. It is a set of laboratories wrapped around a 500-bed hospital. The patients will be located on the south side of the structure, with usually thirteen two-bed wards in each nursing unit, and with two nursing units on each typical floor—one on each side of a solarium.

On the north side, directly across from the patient area, will be the clinical research laboratories investigating problems directly related to the patients under study.

The wings of each floor will contain basic laboratory research units, where fundamental work in each of the major disease problems will be conducted.

The new clinical center was five years in planning and construction. It is designed to strengthen the Public Health Service's efforts to solve the problems of cancer, mental illness, arthritis, heart disease, and other long term illnesses that will under the research programs conducted by the National Institutes of Health.

Capt. Gordon Bennett Tayloe New Commanding Officer of NH

Capt. Gordon Bennett Tayloe, new Commanding Officer of the Naval Hospital, officially assumed his duties June 30.

Capt. Tayloe was born in Aulander, N.C., son of Martin and Carrie Tayloe. Following his graduation from Aulander High School, he enlisted in the Hospital Corps of the U. S. Navy and served throughout World War I.

On Sept. 10, 1919 he was honorably discharged from the service, having attained the rate of Pharmacist's Mate second class. Re-

June 27, 1927, he was assigned to the Naval Hospital, Brooklyn, New York. For a year, July 1928-29, he served on the USS Dobbin, and in September joined the staff of Commander Division Twenty-Three, Destroyer Squadrons, Scouting Fleet.

His most unusual tour of duty was with the Chinese guerrillas during the latter two years of World War II, when he was assigned to the Sino-American Cooperative Organization (SACO). This was a far flung organization that operated in eastern China, but also had units in India and Burma.

Capt. Tayloe was in charge of the SACO medical facilities, which supervised the medical care of 70,000 Chinese Guerrillas, 400 officers and 2,000 enlisted men from the U.S. Army, Navy and Marine Corps.

Included under his direction were three mobile field hospitals and 20 smaller dispensaries located in practically every province of non-Japanese occupied China.

Despite the fact that 2,400 Americans were operating in one of the most disease ridden areas of the world, not a single American died as the result of disease in the two years Capt. Tayloe was Senior Medical Officer of SACO.

For this accomplishment Capt. Tayloe was awarded the Legion of Merit with Combat V by the Secretary of the Navy and the Yon Wei (Clouds and Banner) Medal

(cont. on page 2, col. 4)

Capt. G. B. Tayloe

turning to school, he attended Wake Forest College, (N.C.) where he received the degree of Bachelor of Arts in 1923. Following this he was awarded the degree of Doctor of Medicine from the University of Maryland School of Medicine, at Baltimore in 1927.

Following his graduation from Medical School he reentered the U.S. Navy, and was commissioned Ltjg. in the Medical Corps June 6, 1927. He subsequently progressed in rank, attaining that of Captain on June 1, 1943.

Reporting for active duty on

Capt. Tayloe Assumes Hospital Command

Present for the ceremonies at which Capt. G. B. Tayloe became the new Commanding Officer of the Naval Hospital were, (L to R) Capt. T. G. Hays, Capt. G. B. Tayloe, Cdr. M. W. Mason, Cdr. R. L. Wagner, and Cdr. H. H. Hill.

North view of the new 500-bed Clinical Center for medical research. This roadway leads to the entrance of the Center.

SUNDAY—July 26—Regatta, Capital Power Boat Association, Potomac River, off West Potomac Park, all afternoon.

WATER SKIING instruction is available at the Beverly Ski Club, near Mayo, Md. Those interested call the Club, West River 4083, or Mrs. Dorothy Wallace, TE. 6-8528, for details.

Have a Good Time At the Bethesda 'Y'

Looking for some fun? Need someone to enjoy it with? Or do you need the place? Here's one easy answer to those problems. At the Y Cottage, 4911 Moreland Lane, Bethesda, many plans for good times are under way.

Come to the Cottage any Sunday night for supper. When the weather permits, picnics in the yard are planned. After this there is dancing, ping-pong, badminton, singing and a general planning session to see what's to follow.

If you are an early riser or enjoy horseback riding enough to get up and be at the Cottage at 6:00 A.M., join our pre-breakfast constitutional.

On July 18 we are scheduling a big square dance to be held at the Bethesda Women's Club. There will be a caller and refreshments, and all it costs you is 25 cents to help cover the costs.

For complete information on the schedule of summer activities that the Bethesda "Y" offers you, call OL 4-3632 and talk to Polly Bul-lard or Peggy Rogers. They can help you in your quest for liberty time good times.

Seabees See Sense To Special Rates

Davistown, R. I.—Harassed yeomen and personnel men can stand by: the Advanced Base Depot "Yardarm" thinks there aren't enough specialized rates to have a really well organized Navy.

They're suggesting a few new ones, including:

"Poet's Mate"—For those with a poetic soul who feel misplaced in the Navy. This way the tedium of the humdrum existence can be escaped—legally and in keeping with your job code number. Journalists' insignia is recommended, with the addition of a small "P" on the scroll.

"Gardener's Mate"—For sailors who have a fondness for the shore. This rate carries long terms of shore duty, mostly with the Seabees. Chief Gardener's Mates are assigned to the Garden of Eden. Sea duty is taken on aircraft carriers, where they work in "green-houses."

"Bee Keeper"—A Seabee rate. The Bee Keeper's primary duties are to maintain the hives, cure and purify honey and act as seeing eye bees for old Seabees. An occupational danger of the bee keeper is that he usually appears to be dodging something and answers most questions with a "bzzzzzz!"

And finally, "Wave's Mate"—Well ??? —(Navy Times)

Service Personnel Given Prizes For Best Letter Written on America

Freedoms Foundation, at Valley Forge, Pennsylvania has just published a new category of cash and George Washington Honor awards for "Letters from Service Personnel," it was announced by the Department of Defense. Subject of the new awards, category "What America Means To Me."

Servicemen and women, at home and abroad, will be asked to submit letters of not more than 500 words on what America, as a whole, means to them. Entries will be judged on soundness of ideas and clarity of expression, rather than literary form.

The awards are offered to all Army, Navy, Air Force, Marine and Coast Guard men and women on active duty, wherever stationed. Reservists and National Guardsmen are eligible to submit letters while serving on active duty.

Closing date for this year's entries is 15 October 1953. Letters received after that time will be entered in the 1954 competition. Recipients' names will be announced by Freedoms Foundation at Valley Forge on George Washington's Birthday, February 22, 1954.

Freedoms Foundation will grant a principal award of \$1,000 and an honor medal for the best letter in the opinion of the Freedom Foundation Awards Jury. Twenty awards of \$100 and George Washington Honor Medals and ten or more additional Honor Medals will be given to this year's award recipients.

Judging will be by the Awards Jury of Freedoms Foundation at Valley Forge, assisted by a panel of Congressional Medal of Honor winners.

Letters submitted in nomination for the announced awards must be sent to: AWARDS EDITOR, ARMED FORCES RADIO SERVICE, ANGELES 38, CALIFORNIA and received before midnight on October 15, 1953. Letters must bear the signature, rank, service number and organization of the entrant.

A contest similar in some respects to the new Freedoms Foundation awards category has been conducted over the Armed Forces Radio Service weekly "JUBILEE" program for the last several years. Hundreds of letters have been received in this contest, which has been on the general subject "What America Means to Me."

The AFRS will continue to select each week one letter to be read over the weekly "JUBILEE" program. The writer of the winning letter receives a recorded reading of his letter by some star on "JUBILEE."

All of the letters submitted in the AFRS "JUBILEE" program will be entered in the Freedoms Foundation competition. This includes all of the letters previously submitted to the program.

Freedoms Foundation at Valley Forge is a non-profit, non-political, non-sectarian organization which was chartered in 1949 for the purpose of making annual awards of George Washington Honor Medals and cash to Americans who make outstanding contributions to a better understanding of the American Way of Life.

AFRS PROGRAM SCHEDULE—CHANNEL "C"—1300-1345

Navy Relief Drive Nets \$1337.22 Better 1952 Total by \$355.44

The 1953 Navy Relief Fund Drive at NNM was a big success story, \$355.44 more being contributed this year than during the 1952 campaign. Following is a breakdown of the 1952 and 1953 contributions to the annual drive.

	1952	1953
Command		
NH	462.12	492.34
NNMC	\$88.00	\$108.00
NMS	111.40	146.46
NDS	159.56	194.54
NMRI	80.20	119.26
NSHA	80.50	137.00
Mr. and Miss NNM Contest		182.20
TOTALS	\$981.78	\$1337.22

The NNM committee and members concerned extend their efforts thanks to all hands who so generously volunteered their efforts and financial support toward this most worthy cause.

Special thanks and acknowledgement go to Chief Runkel for poster work; the Printing Department for expeditious copy work; to YN2 Jerry Porter for his publication of Navy Relief items in the Daily Bulletin.

A sincere "well done" also goes to the Security Office, especially HMI John Grant, for the successful Mr. and Miss NNM Contest, to the cooperative participants who lent their talents and names to the venture.

Last, but far from least, the Special Services Division is thanked for its cooperation in preparing and running movie slides during the drive.

If there are any who have not been thanked for their part in this year's Navy Relief Fund Drive, let this serve as an acknowledgment of their help.

Capt. G. B. Tayloe

(cont. from page 1, col. 5)

by the President of the Republic of National China, Generalissimo Chiang Kai-shek.

Capt. Tayloe is married and has

two sons, Gordon Bennett Tayloe Jr., and Hinton Lee Tayloe. He is presently a Cadet in the Marine Corps Officers Candidate School, Quantico, Va. The Tayloes are now occupying Quarters 3.

JULY 13

The Chaplain's Corner

"Prayer"

by Chaplain D. J. Kosky

We look about us and see teeming thousands straining with all their might and main to achieve some definite purpose and goal. This goal or end or purpose varies with the individual. Some have power as their end, others wealth, while the rest—who knows—only God knows.

But how are these goals and purposes of their ambition to be accomplished? Most of the multitude think to do so by their own strength and power. These people forget that "those labor in vain unless they labor with God."

St. Peter, the chief of the Apostles, with his helpers labored in vain throughout the night. But when at the command of Christ they cast into the deep, their nets were stretched unto bursting with the draught of fishes which they caught.

Remember the words of St. Peter, "Depart from me O Lord for I am a sinful man." We strive and strain with all our strength only to accomplish nothing. While our Lord, by one word, caused the Apostles' nets to be filled with the fishes of the deep.

Right now we are aiming with all the power at our command and with all human resource to obtain a lasting, just peace in Korea. The force of arms and human device has not been able to accomplish this purpose, this goal.

However, the Chief Executive of our country, knowing and realizing that our puny efforts are of no avail, summoned the nation to its knees on July 4 as a day set apart for prayer, in order that God may bring about the peace which we have failed to accomplish.

When all else fails we know that God in His infinite mercy will listen to our pleas. "Ask and you shall receive."

Top row: R. Adm. B. Groesbeck, Jr. relinquishes his command to R. Adm. L. O. Stone. Second row: Salute to the Colors: R. Adm. Stone inspects his new command. Third row: The Inspection Party led by Cdr. J. V. Niiranen, DC USN, followed by R. Adm. L. O. Stone; R. Adm. B. Groesbeck, Jr.; Capt. E. B. Coyl, CO, NMS; Capt. G. B. Tayloe, CO, NH; Capt.

R. W. Taylor, CO, NDS; Capt. W. E. Kellum, CO, NMRI; Cdr. W. C. Calkins, CO, NSHA. NNMCM Waves pass in review with Ens. Pat DeBerry as Company Commander. Fourth row: NMS executes eyes right with Lt. (jg) McMahon as Company Commander. Music for the ceremony was excellently furnished by the Marine band led by T/Sgt. G. D. Durham, USMC, Marine Band.

Mrs. Closson Honored

Mrs. Elsie B. Closson is presented a letter of commendation by R. Adm. Bertram Groesbeck, Jr.

Mrs. E. B. Closson Receives Letter Of Commendation

Mrs. Elsie B. Closson, Supervisory Administrative Assistant in the Naval Medical Center Administrative Office, was recently presented with a letter of commendation by Rear Admiral Bertram Groesbeck, Jr., (MC) USN for outstanding service in the performance of duty.

Award of the letter of commendation was made with appropriate ceremony in the office of the Commanding Officer, National Naval Medical Center. The citation reads in part:

"For outstanding service, above and beyond that normally required or expected of your classification, grade and experience as Supervisory Administrative Assistant in the Office of the Commanding Officer, National Naval Medical Center, Bethesda, Maryland, during the period 30 April 1952 to 30 June 1953."

Mrs. Closson has served in her present capacity at the Naval Medical Center for the past eight years. Her service during this period has encompassed the tours of duty of six commanding officers of the Naval Medical Center.

Mrs. Closson resides with her husband, Mr. W. Harley Closson and their daughter, Judy, at 4553 North Chelsea Lane, Bethesda, Md.

Letter from a Former NH Corpsman

The following are excerpts from a letter written to a Naval Hospital doctor by a former staff corpsman here who now is serving overseas. It is felt that the content of this letter may prove of interest to many doctors, nurses and corpsmen stationed at NNMC.

"Even now as I find myself becoming adjusted to my new environment I still look back on the last few days at Bethesda and realize with regret that I was unable to bid you all farewell and likewise express my gratitude for what was accomplished in my own life while attached to the Naval Hospital.

"Certainly, I cannot express appreciation enough for your thoughtfulness for the letter of Commendation awarded.

"Each Doctor that I have worked with has made definite impressions on my mind, from which I have acquired potential traits which I strive to perfect in my own character. Although it may not have been evident, all those 'with' whom I worked were under observation, in the capacity of teachers, working associates, and friends.

"Truly, I enjoyed and considered every day as a 'stepping stone' toward final goals and aspirations, and eventual leadership (or should I say 'exampleship'); all were incentives to reach for 'bigger things' in my own development.

"The friendly cooperation of all staff—doctors, nurses and corpsmen—provided stimuli for any initiative that I might have shown. For the things I give a hearty THANKS!!"

Texasman visiting in New York held up by a bandit. Give me your money or I'll blow away your brains out. A man can live in New York without brains but not without money."

NSHA's Fifth Class Of Medical Admin. Techs. Graduates

NSHA has "battered down the hatches" for a while after the fifth class of Medical Administrative Technicians graduated on Friday, June 26, with graduation exercises held in the School auditorium.

The principle speaker at the occasion was Commander W. C. Calkins, MSC, USN. Commander Calkins has since assumed command of NSHA, relieving Commander M. E. Zimmerman, MSC, USN, who was ordered to Headquarters, First Naval District, as Administrative Officer to the District Medical Officer.

Most of the 118 graduates are now on the road, or enjoying delay enroute ("such delay to count as leave") before reporting to their new duty stations all over the world. Some are staying at the School as instructors for next year's class.

The NSHA staff is now preparing training schedules and curricula for an indoctrination course for a class of Naval Reserve officers of the Medical Service Corps, which will convene on July 13.

The next regular classes in Hospital Administration and Medical Administrative Technic will convene on August 31.

Notes of Interest From I & E Office

Here are a few notes of interest from the NNMC I & E Office. Beginning with this issue, the NEWS will run this column as a regular feature.

The following men have successfully completed the high school level General Educational Development Test: Thomas J. Dowd, ADAN; Francis B. Hughes, HN; Thomas D. Keating, SN; Roland E. Gamet, EM3; Richard Z. Oszewski, FA, and Ralph W. Todd, SHSA.

All of the above-named men are Naval Hospital patients except for Hughes, who is a staff corpsman in the Hospital Command.

Ronald J. Hoddap, YN2, a patient in the hospital here, recently completed his college level GED Test (1CX), while William V. Stradmann, HM1, and Francis G. Dascoll, HN, completed their 2CX Tests in successful fashion. Dascoll is a hospital staff man, Stradmann a patient.

Completing the "End of Course" Test (USAFI) in "Radio for Beginners" was Arden R. Carpenter, HM3. The Hospital staff corpsman passed the test "with distinction."

The Nation's Railroads Continue Furlough Fare

Reduced furlough fares on the nation's railroads for military personnel traveling in uniform at their own expense have been extended until Jan. 31, 1954. The reduction was to have expired on July 31 of this year.

This action will continue the tax-exempt round-trip fares for military personnel on furlough, at the rate of 2.025 cents per mile or less, good in coaches, which means a saving of up to one cent per mile and includes stopover and baggage privileges.

White stands for joy and the wedding day is the most joyful occasion of a woman's life."

The skeptic then asked, "Why do the men wear black?"

Cdr. M. W. Mason to Yokosuka, Japan To Become Chief of Radiology at NH

Cdr. Malcolm W. Mason, Chief of Radiology at the Naval Hospital, Yokosuka, Japan, where he will become the new Chief of Radiology.

Relieving him on July 1 was Cdr. W. S. Cole, who was formerly Assistant Chief of Radiology.

During Dr. Mason's five years and four months tour of duty at NNMC, he was instrumental in many advances in the field of medicine, particularly as it pertains to the radioactive field.

He was the instigator and founder of the Radio Isotope School, presently in operation at the rear of Bldg. 131.

Cdr. Mason also is the individual who compiled and arranged information for the textbook, "An Outline of the Fundamentals of Radiation Physics," which is currently used throughout the Navy in its various hospitals for the use of technicians and residents in Radiology.

He began his military service career as a Buck Private in the U. S. Army in 1918 and rose through the ranks until in 1927 he received his commission as a First Lieutenant in the Medical Corps of the Army.

In 1935 Cdr. Mason was commissioned as a Lieutenant, MC, in the USNR. He now is a full Commander in the Medical Corps of the Regular Navy, having held his present rank since 1945.

He graduated from Cornell University Medical School in 1927, fifth man in his class, and also a prize as the outstanding student in Obstetrics.

A Diplomate of and certified by the American Board of Radiology, Cdr. Mason is married and has one daughter and two grandchildren. His hobby is gardening and he hopes to be able to do considerable of this at his next duty station.

Cdr. M. W. Mason

Aiken and Gravelle Lose to Qtrs. 'K' In Tennis Tourney

Nancy Aiken and Eleanor Gravelle, NNMC's two entrants in the recent WIAL tennis tournament at Arlington Hall Station, had the misfortune of playing top-notch performers from Quarters 'K' in their first matches and were eliminated from the tourney in quick fashion.

Chief Norris of Qtrs. 'K' downed Aiken, 6-1, 6-1, in singles competition, while Gravelle had to forfeit in the singles division because of being unable to appear for her first match.

In doubles play, Aiken and Gravelle lost out in the first round to a strong duo from Qtrs. 'K', 6-1, 6-2. The local girls performed well, but simply were up against superior opponents.

Woodmont swimming pool and tennis courts being utilized by the service patients at the recent outing sponsored by members of Woodmont Golf and Country Club. Lower left—Chief D. R. Gardner and J. E. Connolly enjoy a game of cards with two of the many hostesses present during the Woodmont outing. Lower right—At the recent White House outing, at which the President greeted patients, are (l. to r.) Lt. Bertha M. Kirk, NC USN; Clyde Johnson, HN; Lt. (jg) V. J. Fontana; Sam Drew, HM3; Lt. Cdr. E. Lane, and J. LaBonde, HM3. Lt. Cdr. Lane, a patient at the Naval Hospital, was first in the receiving line to greet the president.

SPORTS FLASH

John Crabtree hurled a brilliant 2-hit shutout as the NNMC Admirals blanked Patuxent River NATC, 10-0, there on July 9.

Luckless NNMC Men's Varsity Nine Drops Three Games by Total of 4 Runs

Hard luck and failure to hit in the clutch plagued the NNMC Admirals in three straight MAISAC tussles during the last two weeks, Coach Jay Bell's men dropping a trio of games by a total of four runs.

Two of them were real heartbreakers, just to make matters worse. Walter Reed nipped NNMC, 6-5, in nine innings at Forest Glen Section on Thurs., July 2, two days following the Admirals' 6-5 loss to Patuxent River NATC here in nine heats.

These reversals came on the heels of a 3-1 defeat by Cheltenham Naval Radio Station, there June 25.

After three losses in a row to Walter Reed, NNMC seemed destined to whip the Army club on July 2 when the Admirals scored three runs in the top of the sixth to go ahead, 5-3. Singles by John Crabtree, Dick Gilbert and Ron DeVice drove in those markers.

But Walter Reed rallied for two runs in its half of the sixth to tie the score at 5-5. Three Texas League singles and an NNMC infield miscue did the damage.

WRAMC won it in the ninth on two infield hits, both on bunts, a wild pitch following a pop out to the catcher, and an infield roller by Schaefer that pitcher Crabtree fielded poorly as Klein scored the winning run.

After scoring all its tallies in the first session, the Admirals saw Patuxent River tally twice in the seventh on June 30 to tie the score at 3-3 and then chalk up the deciding run in the top of the ninth.

Jim Greer's throwing error while trying to start a double play with one out in the seventh opened the gate and Pat. River took advantage of this misplay to knot the count. Bell's throw to the plate to cut down a Pat. River in the ninth was true but got by Ray Gismondi, NNMC catcher. That was it.

NNMC managed only two hits off Perry of the visitors, a single by Noel Schilling in the first inning and one by Crabtree in the seventh. Pat. River made four hits, three of them after the sixth stanza. This gave each team two wins in their eight-game 1953 series. On June 25 Charlie Breyman, Cheltenham's fastball pitcher, beat NNMC for the fourth straight time, on this occasion by a 3-1 count. The losers notched four hits, the winners two.

The Medicalmen had the tying runs on second and third with two out in the seventh, but Wayne Damsis grounded out to end matters. Cheltenham scored once in the first frame and twice in the second. Crabtree, who relieved Norman Turner in the first inning, took the loss.

Greer, Gismondi and Gilbert each hit a single for NNMC, with DeVice getting a double.

Research Has Key To 2nd Place in Intramural League

Action on the intramural softball front has slowed down considerably, now that the winner of the first half title has been decided.

X-Ray School's 7-2 victory over NMRI on June 25 gave NSHA a very welcome graduation present in the form of the first half championship. Members of the MAT club, which won eight of its nine games, now are scattered to the four winds so to speak, headed for their new duty stations.

Chief Ranes' team graduated on June 26, less than 24 hours after being assured of top honors in first half play by virtue of Research's second loss of the season.

Jim Mincey hurled steady ball for X-Ray School as it notched its fifth win in eight starts and dealt

Starting times for week-end and holiday play on the NNMC golf course may be obtained by phoning the golf shop, ext. 477, or registering in person with the golf shop attendant. Reservations may be made as much as a week in advance.

Admiralettes Weak at Plate In Two Recent WIAL Setbacks

The NNMC Admiralettes bumped up against some terrific pitching in two recent WIAL Softball League games, dropping one-sided decisions to strong teams from Quarters "K" and Walter Reed Army Medical Center.

Dr. Haycock, a woman Army medical officer, baffled the Bethesda girls with her blazing fast ball at Walter Reed on Tuesday, June 30. She racked up 16 strikeouts in posting a two-hit shutout triumph.

Lone NNMC safeties were Jan Fick's single to left field in the second inning and Mary Lou Cox's infield single in the seventh.

Four errors by the Admiralette infield helped Walter Reed to five unearned runs in the second stanza, and WRAMC scored three more in the fourth and another trio in the fifth.

Boots Carlson, capable NNMC catcher, was struck in the jaw by a bat swung by Dr. Haycock in the second frame and had to be carried from the field. She is now hospitalized with a fractured jaw and is out for the season. Mary Lou Cox, regular shortstop, finished the game behind the plate.

This accident occurred shortly after right fielder Lesley Evans suffered a heel injury while chasing a fly ball. Coach Spurgeon Slade sent Glee Biddle in to play right field and installed Josh Shook at shortstop when Cox took

over the catching chores.

All in all, it was a sad game for the Naval Medical women, who were fatigued from standing under a broiling sun during the NNMC change of command ceremony the morning of the contest.

Laura "Apple" Core, clever Qtrs. "K" twirler, held NNMC well in check here on Tues., June 23 as her mates chalked up a 12-3 victory over the Admiralettes.

The visitors sewed up the fray early with four markers in the first inning and four more in the second. Another three counters came in the fifth.

Lead-off hitter Barbara Bradford of NNMC slammed a home run to deep center field on the first pitch in the home half of the opening canto. The host team's other two runs scored in the sixth when Joyce Crouch tripled to left center and Cox followed with a homer to the same region.

Just Before the Battle

Posing at the net just before their recent match in the station men's intramural singles tennis tourney are (L to R) LT Richard E. Lieurance, MC, USN and Frank Weldon, HMC. Lieurance bested his worthy opponent, 4-6, 7-5, 6-0, after Weldon had forced the winner to match point during the second set.

NMRI its second setback in six outings.

However, Research bounced back on June 29 to trim Lab 20, 11-5. Jeff Hamby was the winning pitcher and McCarey the loser. This was Lab 20's fourth loss against as many wins.

Pharmacy School scored its sixth straight victory the easy way on June 29 by getting a forfeit from NH Barracks. NH Barracks did not have a full team ready to play by the time deadline and so was forced to forfeit the tilt.

This gave Pharm. School a 6-3 record and assured it of no worse than a tie for third place. It was NH Bks. eighth defeat in as many games.

On July 1, Center Command upped its mark to 5-3 by outscoring Dental, 14-7, in a battle of base hits. Joe O'Keefe went the route for the winners, with Dan Suttelle's home run aiding his cause. NDS now has a 3-4 record.

Research holds the key to second place in the first half race. Wins in its remaining two tilts would give NMRI undisputed second place with a 7-2 mark. One loss would deadlock it with Pharmacy School, and possibly X-Ray and Center Command as well, when the smoke of first half battle has cleared.

A diamond is one of the hardest substances known to man, particularly to get back.

Powell and Lieurance Clash in Final Of Men's Singles Tennis Tournament

Chief Douglas Powell of the Commissary emerged from the lower bracket as a finalist in the singles division of the NNMC men's tennis tournament by scoring straight set triumphs over Lt. H. Scofield and R. M. Hedlund.

Seeded second in the tourney, Powell took the measure of Scofield, 6-4, 6-3, and then disposed of fourth-seeded Hedlund with little trouble, 6-0, 6-2. This put him in the final against the winner of the upper bracket semi-final round match between Dr. Richard E. Lieurance and P. J. Cichanowicz.

Lieurance won that duel, 6-1, 6-3.

Cichanowicz, seeded third, downed M. Walser, 6-2, 6-4 to reach the semi-finals, while top-seeded Lieurance had to go all out to eliminate the dangerous Chief Frank Weldon of Physical Medicine School.

After winning a hard-fought first set, 6-4, Weldon led in the second one, 4-0 in games and later, 5-1. He had Lieurance at match point but couldn't quite finish the job. The Naval Hospital Doctor rallied to take the second set, 7-5, and then breezed through the deciding one, 6-0, as Weldon tired badly.

It was a terrific duel between two of NNMC's top-ranking netsters and could well have been won by Weldon in straight sets.

Hedlund, semi-final loser to Powell, staged a rally to trip fifth-seeded W. B. Looney, 6-8, 6-4, 6-2 in his quarter-final round match.

In first round tussles, Weldon bested R. W. Mapletto, Walser whipped A. Somano and Scofield won by forfeit from K. D. Martin, who has been transferred from this station.

Lieurance Serves

Smashing a serve across the net is Dr. R. E. Lieurance, one of NNMC's leading tennis players. He battled Chief Douglas Powell for the Medical Center men's singles title last weekend.

Wolff's Den

Bob Wolff

That's the opinion offered by Nat's coach Heinie Manush, outfielder Clyde Vollmer, and pitchers Walt Masterson and Frank Shea.

Contrary to the opinion held by many that a ball pulled down the line carries the maximum power of the hitter, these four will tell you that the drives which carry the farthest usually end up over the wall or in the seats in left-center or right-center.

Former pitching great Carl Hubbell gave his opinion earlier this season. Carl was quoted as saying that the longest drives usually go to center field or slightly to one side. And this year's records back up the statement. Micky Mantle's mighty 565-foot blast in Washington was to left-center and Joe Adcock's record-breaking 475-foot homer in the Polo Grounds went into the bleachers just a little to the left of center.

Hubbell puts it this way: "I think a ball hit straightaway goes farther than one pulled down the right or left field foul lines. It's the same as hitting a golf ball which if sent directly down the middle goes farther than one hooked or sliced."

Incidentally, the rash of record-breaking homers in the majors has brought something of a classic remark from Phil Cavaretta, manager of the Chicago Cubs.

Cavaretta said: "We'll soon reach the point where a guy who hits one into the first row of the bleachers will be asked to go back and try again. Like catching an illegal fish—it's too small to count."

WILD STORY: One of Casey Stengel's favorite stories concerns the pitcher who was troubled by wildness throughout his career. One day, the pitcher was brought to court on a charge of striking his wife.

The judge asked the wife how long they had been married. Two years, was the answer. The next question: Had he ever struck her before?

Replied the wife: "Well, he's been aiming at me ever since we were married. But last night was the first time he ever connected."

NOTE OF OPTIMISM: An encouraging sign for the future is the performance of the Washington pitching staff this season. If it's true as many will tell you, that pitching is seventy-five per cent of the game, the Nats have a solid core to build on.

A few more timely hits, especially in those one-run margin games, could provide a big difference in the Washington standings before the season is over.

Center Capers

by Clyde

Lots doing in Center Command lately, with many new faces in our happy little group. But enough of this idle chit-chat—on with the show. Last week we welcomed aboard as our new Chief Master at Arms, William P. Slaughter, HMC. Some of us knew Chief Slaughter some years back when he was in Hospital command and we're glad to have him with us now.

Greeted with open arms in the Special Services Office was George W. Behrle, HMI, who has just returned from an interesting 18-month tour of duty on Formosa. George tells us he never did quite go Asiatic.

Melvin D. Falley, HMC, came to our command from the recently graduated MAT class over at NSHA. He's working in Center Personnel. Also new on the second deck is June M. Sheets PNSN(W), a recent arrival from the Receiving Station, Wash., D.C. She is assigned to Center Files at present.

Also learning the tricks of the trade in Special Services is Dwight C. Spencer, HM3, while Jerry Boyles, HM3, has joined the Postal Directory force. Glen R. Smith, HM2, is working in the Center Personnel Office and doing a fine job there. All three men came from the 2nd Marine Division, FMF, Camp LeJeune, N. C. and seem glad to be at NNM.

John W. Ford, SH2, arrived not long ago from the Rec. Sta., San Diego, Calif. and can be found during working hours in the Officers' Barber Shop. Glad to have him among the ranks of our Ships Servicemen.

Bill Conran, HM2, has shifted over from Staff Clinic to Special Services, where he is the new bookkeeper and really "having a ball" on his new job.

Bruce Aschim, HM3, and Joe Deidesheimer, HM3, both old Spec. Serv. Div. standbys, left us for duty aboard the USS Consolation. They were feted at a farewell party that broke up shortly before dawn. All their many friends were sorry to see them depart.

Bob Agosti, HN, and Bob Green HM3, now stand movie operator watches and both tell us that it's no picnic. That's for sure.

Due back off leave this week are Floyd Wood, SHSN, and Chief Beckstead, our one and only Teleman. Hope they've had a pleasant time at home.

Just received word that Haywood W. Brogdon, SD2, has left us for Hospital Command and that Bob Gallaher, HMI, our Barracks 112 MAA, leaves soon for the next class at NSHA. That wraps it up for now—but we'll have more dope next issue.

NMRI

By R. Conaway

Anyone still without "whites" should see Boats. He has been spending so much time at the sewing machine in the canvas shop we think he's been taking orders to make whites.

A certain person from the Glass Apparatus Lab has been sending his friends post cards from California, with postage due on them. How are you going to get that card, Mr. George—go to California and pick it up between 0900 and 1700?

It was Bon Voyage to a few of the old timers from NMRI: J. R. Cassidy, R. L. Bruntmyer, LT L. R. Krasno, G. E. Radigan, A. C. Allen, J. S. Otto and C. R. Biles.

Released to inactive duty we have F. A. Wild, Ltjg J. W. Pate and Jane (Brown) Jennings.

A welcome aboard to Ltjg. D. M. Hume, Ltjg D. L. Walker, HMC C. P. A. Strome, HMC L. B. Lacey, HM1 W. H. Mackey and HM1 R. L. Pruitt.

Seems that "George", the electric eel in the Physical Biochemistry Division, turned out to be a female, so he (I mean she) is now known as "Electra".

Our "Sheriff" feels that turn-about is fair play, so when his "man-eating" dog took a bite out of his ankle, the chief calmly bit him back. Guess those Toy Manchesters are really ferocious, aren't they Chief?

From here on in, your NMRI reporter will be J. J. Clancy, ET2, so I'll bid one and all adieu. It was so nice bringing the scuttlebutt from NMRI to light.

Med School Daze

By Cracky

Here we are again, back from Norfolk where we've just spent a most enlightening month. Learned all about instructing, and quite a bit about the biological effects of overexposure to the sun's rays. Virginia Beach and Lewter's are still going strong.

It seems as though BuPers has been pretty active during our absence. So many have departed and arrived that it's almost like a new station. Welcome aboard, men. Hope your stay is long and pleasant, by cracky.

Ran into Bob Cumming down south. He'd only been aboard the "News" a few days, but looked saltier than a 20-year bosun.

Thanks a million for pinch-hitting for us, George, and the best wishes we can muster are extended to you and the new Mrs. Now that Ashton's taken that fatal step, there are very few of us diehard bachelors left.

We understand that Lab 19 spent their last week aboard in a flock of parties, and that everyone received their orders in high spirits.

Meeker got his gear all packed, and departed for Newport. Good luck, Jim.

HMCA Austin informs us that he's having a tough time with those new clothes. Can't scratch his neck anymore without getting all tangled up in a tie and collar. Stick with it, Chief; you'll get used to it.

Congratulations are also in order for Mr. Walker and Mr. Duane. These new stripes look very good indeed. Good luck!

Well now, that's the 30 mark for this week. Be with you again soon and in the meantime try and keep cool, by cracky.

Waves Play Host to Arl. Hall Tuesday; Men's Team Altered

Only three home games remain on the NNMCM Admiralties' WIAL schedule, while the Admirals have five home contests left on their MAISAC slate for 1953.

The Medical Center women's varsity softball team plays host to Arlington Hall Station (Army) on Diamond No. 1 at 1830 tomorrow evening, July 14, and entertains the Quantico Marines at 1830 on Friday, July 31, in its last home game of the campaign.

All the Admiralties' remaining road games are at Fort Myer. On Tuesday, July 21 NNMCM plays the Ft. Myer WAF's there, on July 28 the 7001st WAF's of Ft. Myer host the Admiralties, and on July 28 the local women travel again, this time to meet Ft. Myer's WAC Hq. Co. there.

Mary Lou Cox, regular short-stop, will catch the rest of NNMCM's games. Boots Carlson, regular receiver, is out for the year with a fractured jaw suffered in the game against Walter Reed on June 30.

Next week the Admirals, currently in the MAISAC cellar, host Patuxent River NATC on Tues., July 21 at 1800. Walter Reed AMC plays here at 1800 on July 23 and Cheltenham will be hosted by the Admirals on July 28.

Lost to the NNMCM men's varsity through transfer in recent weeks have been Outfielders Jim Bush and Ernie Reed and Infielders Jim Des Rosiers, Kenny Brown and George Radigan. Radigan received orders to sea. All the others went to Camp LeJeune, N.C. for duty with the FMF.

Recent additions to the squad have been first baseman Lou Kovarik, a member of the Medical Center hardball team in past years, outfielder Dick Gilbert, pitcher Norman Turner and catcher George Mickens.

Mickens, latest man to join the club, did a good job behind the plate against Walter Reed on July 2 and laid down two good sacrifice bunts. He also can play in the infield or outfield if need be.

Proving himself a good glove man at shortstop is Wayne Davis, fiery little native of Baltimore, Md. A better than average hitter, "Dave" has solved the Admirals' pressing shortstop to everyone's satisfaction.

The lineup for the recent Walter Reed game had Kovarik at first base, Noel Schilling at second, Davis at short and Jim Greer at third. Mickens was behind the plate, with Crabtree pitching. Ron DeVice was in left field, Coach Jay Bell in center and Dick Gilbert in right.

Later, Jack Pushkin went into center and pitcher Ray Jeter played right, in place of Gilbert, who injured a leg while running the bases.

"Guess what I've got in and I'll give it to you."

Cheltenham Trips Naval Medical, 6-5

Cheltenham, Md. Naval Radio Station downed NNMCM for the fifth straight time this season, 6-5, in an 8-inning MAISAC thriller here Tues., July 7.

The Admiralties' home game with Patuxent River, Md. NATC was postponed by the visitors and will be played here later in the year.

Fort Meade will host the NNMCM women in a practice game Thurs., July 16. The WACs hold two previous decisions over the local club.

In the recent Cheltenham fray, NNMCM managed only one hit (a single by Ray Gismond) in the first six frames. The visitors led 5-0 going into the bottom of the 7th, having tallied four times in the 4th and once in the 6th.

Then the Admirals erupted for five runs to knot the count. Noel Schilling led off with a two-bagger to right center; Wayne Davis got an infield hit; Ron DeVice singled through the box for one run; Jim Greer doubled off the left field screen, and Jay Bell's mighty home run to right tied it up.

Cheltenham scored once in the top of the 8th and that won the game. It was the third extra-inning loss in a row for NNMCM and pitcher John Crabtree.

In intramural games on July 8, X-Ray School scored five runs in the last of the 7th to edge out LAB 20, 8-7, and NDS topped winless NH Bks., 7-2. X-Ray now has a 6-3 record, LAB 20 a 4-5 mark, and Dental a 4-4 slate.

Navy Belles

By George

JUST AROUND OUR HOUSE: Watermelon parties are much in order, both inside and outside of the dorm, on these hot summer evenings. Some of the girls are presently on leave and more are going shortly. Loraine Mann has gone to get some new angles on her New England accent. Lesley took Henrietta out west to sleep under the stars and eat rare steaks, just like the cowboys do.

The happy faces you see around belong to the Lab. and Physio. girls, who will be doing practical work for the remainder of their school days here.

SICK LIST: Boots is at voice rest these days, since she was hit in the jaw at the Walter Reed Softball game. Wanted—One hair cutter to take over while Lesley is on leave.

Weddings: Billie Lawton, is our new bride and our best wishes go with you through your happy years ahead. Thank you.—Gone: Norma, for her evening ice cream runs. Going and Gone: Jane Jennings and Gerry Sharp put the Mrs. in front of their names and left.

Katy Yuhas is counting and starting to send things home. Scotty is making a will for everything she is leaving behind. (Does some one have an old tank suit she can take with her?) Sports—The sport of the month is Ruth Woerlein, and her fishing. She catches, cleans and cooks them, and beside that they are good to eat.

I remain the girl from the heart of Maryland, by George.

Dental Explorer

by Petunia

It would seem as though John Pappas isn't the only one to have departed for Prosthetics School. K. Shaffer and R. Boylan went along with him. R. L. Smith has left us for cooler Newfoundland... the lucky boy.

Of course all the interns and P.G.'s are on their way to new duty stations, but the clinic wasn't quiet for long—a new crop of P.G.'s has already arrived.

Our three schools, Advanced Prosthetics, Advanced General and Repair have all begun classes—there were a lot of reunions of old shipmates as the students were reporting in from their previous duty stations.

Two of our mates, Mugno and Pete Pederson, have left to take their final step. Marchand and Lesley Evans are on their vacations, too.

Captain Sault is already getting into the swing of things—he's as busy as a little bee—always buzzing somewhere.

Connie and Cliff are back and we're sure glad to see them around again. We'll all go out to see their new home right soon now.

What Lines!

Attractive Toni Cooper doesn't seem interested in swimming as she smiles prettily for a photographer beside a pool in Las Vegas, Nev. Hiding such obvious assets under H2O would be criminal anyway.

She's an excellent housekeeper. Every time she gets divorced she keeps the house.

Capt. Ted Williams Now Patient Here; Hopes to Play for Red Sox Next Year

Capt. Ted Williams, USMCR, now is a patient on Tower 13. The famous Boston Red Sox baseball star and Marine flyer, shown above with Fred Corcoran, his business manager, currently is undergoing treatment here for an ear condition. Corcoran was Tournament Bureau Manager of the Professional Golfers Association for many years.

Yes, he's still the same old Ted Williams and it appears that he will be back in the Boston Red Sox lineup next spring, stroking home runs the way he used to do frequently before being recalled to active duty with the Marine Corps in May of 1952.

That was the impression gained during a short but memorable interview last week with baseball's most famous hitter of the present era. His countless fans will be pleased to know that the "Splendid Splinter" looked sound as a dollar and is anxious to get back to the major league wars.

Williams, who will reach his 34th birthday in October, currently is undergoing observation and treatment here for an ear ailment that sent him home from Korea. He is a patient on Tower 13. The doctor handling his case is Cdr. Richard A. Gaillard of the Naval Hospital's EENT staff.

It is impossible to say at this time how long Ted will remain at NNMC. He may require treatment for his present ear condition and then again this may not prove necessary.

Williams is due to be released from active duty this coming October. However, there is a possibility that he will receive his release prior to that time. It all depends on the findings and recommendations of the doctors here. The famous Red Sox outfielder and Marine flyer told the Center news writer last week that he likes the New York Yankees and Brooklyn Dodgers in the major league pennant races this season. The Captain just doesn't see how those two teams can miss meeting in a subway World Series.

Ted expressed great pleasure at the way Boston's young team had moved past Cleveland into third place in the American League flag race. "Boy, that's really something, isn't it?" he replied with a smile when the reporter mentioned the Red Sox overtaking the Indians on July 19.

(Cont. on Page 3, Col. 2)

New Govt. Life Ins. Has Low Premiums

The special post-Korea term life insurance policies now are held by nine times as many veterans as a year ago, according to the VA.

These policies are the five-year non-convertible, non-participating type for which a person is eligible if he or she has served with the Armed Forces of the United States anywhere in the world since June 27, 1950, was ordered to active service for a period of more than 30 days, and is entitled to the free indemnity protection of the law.

Eligible veterans must apply to the VA within 120 days after date of discharge or separation to receive policies.

These policies do not entitle the veteran to dividends nor may they be converted to any other type of insurance. But the cost is the lowest of any type of GI insurance administered by the VA.

The Servicemen's Indemnity and Insurance Acts of 1951, which set up this insurance, also provide for another kind of policy.

This applies to the post-Korea veterans discharged on or after April 25, 1951 with service-connected disabilities that would entitle the veteran to 10 or more per cent disability compensation.

Likewise, it does not pay any dividend. However, both term and permanent plans with conversion rights are provided.

New Third Dimensional Movie Camera Used in Eye Surgery Here at NNMC

Another first at NNMC has been revealed in the EENT Clinic. Lt. (jg) H. J. Norton, MC, USNR, prior to his entrance into the Navy was working on the process of developing the third dimensional addition, (the one that Hollywood is presently so enthusiastic about) into the field of medicine—primarily the field of eye work.

Prior to this experiment, the fundus portion of the eye has been handicapped by the inability to obtain clear and detailed pictures, from the standpoint of raised or depressed lesions.

The use of extremely bright lights and the curvature of the eye itself did not lend itself to the taking of the standard motion pictures.

Dr. Norton obtained on loan from a distributor in New York a Bolex Motion Picture Camera for use in this medical experiment.

Since the camera, as it was originally equipped, could only take pictures at a distance of no closer than 20 inches, Dr. Norton inserted into the camera a new set of prisms of his own design. This permitted a 3D picture to be taken at a distance of as close as 12 inches.

The success of this experiment is believed to make possible the observation of particular eye functions or irregularities that it was heretofore impossible to observe, except by the individual doing the particular examination or operation.

(Picture on Page 4)

Rasmussen New CPO Mess Treasurer; Chandler Takes Over as Club President

In case the word hasn't already gotten around to all hands, the Chief Petty Officers' Mess (Open) at NNMC now has a new Mess Treasurer and President of its Board of Governors.

James T. Chandler, HMC, or NMRI has relieved Colon E. Cox, HMC, formerly of NMS, as President of the Chiefs' Club, while Alan E. Rasmussen, HMC, of NNMC has replaced George J. LeBlanc, HMC, as Mess Treasurer. Cox has gone to COM 14 for duty and LeBlanc to Bremerhaven, Germany.

James T. Chandler, HMC, is shown shaking hands with Colon E. Cox, HMC, after relieving the latter as President of the Chief Petty Officers' Mess (Open). Chief Cox has left for duty in COM 14.

Chief Chandler, whose nickname is "Jim," has had a long and interesting Navy career that began back on Sept. 9, 1939. Born in 1920, the tall affable native of Pattoon, Texas entered service 19 years later and took his Hospital Corps School training at San Diego, Calif.

From there he went to USNH, Mare Island, Calif., and then moved to the East Coast. After three weeks at the Rec. Sta., Boston, Mass., Chandler went aboard the USS Ancon (then a transport, now a communications ship) for duty with the Atlantic Fleet.

While aboard that ship he participated in the North African Campaign, being in on the landing at Casablanca in November of

1942. Leaving the Ancon at Norfolk, Va., he went from there to the Naval Operating Base Dispensary in Bahia, Brazil.

Next came a tour aboard the USS Micka, a DE, and later "Jim" served on the USS McNulty, another DE, in Pacific waters. After that he was stationed at the Marine Air Base, Santa Barbara, Calif., following which he came to NNMC to attend Pharmacy and Chemistry School.

Later he worked in the Pharmacy and as Chief Master at Arms of the U. S. Naval Hospital, Camp Lejeune, N. C. This was followed by duty in Norfolk and ID School at Portsmouth, Va.

Chandler then attended Deep Sea Diving School at the Naval Gun Factory, Wash., D. C., after which he went to the U. S. Naval Sub Base, New London, Conn., for duty. Next came a tour aboard the USS Orion (AS-18) and then two years on the USS Kittiwake (ASR-13), which he says was ideal sea duty.

From the Kittiwake Chief

Alan E. Rasmussen, HMC, new Treasurer of the CPO Mess (Open), receives the keys from his predecessor, George J. LeBlanc, HMC. Chief LeBlanc has gone to Bremerhaven, Germany for duty, while Chief Rasmussen formerly was in the Hospital command here.

Chandler came on Nov. 9, 1952 to NMRI, where he works in the Submarine and Diving Medicine Unit. He is a qualified diver first class.

The new President of the CPO Club lives at 1310 Crawford Drive in Rockville, Md. with his wife, Zula (a native Virginian) and their four daughters. They are Joy Ann, age 7; Vera Mae, age 6; Frances Lynn, age 3½, and Jimmie Marie, who will be 2 in October. His official home address now is Long View, Texas.

Chief Rasmussen, new Mess Treasurer of the CPO Club, hails from far north of Chandler's home, being a native of Rochester, Minnesota. He still lists this as his legal address and visited in the Gopher state last month.

The Chaplain's Corner

'Strength for Living'

by Chaplain T. L. Shenefelt

"Finally, my brethren, be strong in the Lord, and in the power of his might. Put on the whole armor of God, that ye may be able to stand against the wiles of the devil. For we wrestle not against flesh and blood, but against principalities, against powers, against the rulers of the darkness of this world, against spiritual wickedness in high places. Wherefore take unto you the whole armor of God, that ye may be able to withstand in the evil day, and having done all, to stand."

Ephesians 6:10-13

Have you ever seen a midget? The Lilliputians of fiction, the pigmies of Asiatic countries, and the professional midgets of the carnival midway have taken the attention (and the money) of many American people.

Despite the amazing scientific and medical advancements of recent years, we still have the opportunity to observe the living habits of real midgets.

Remember the first time you paid the admission fee and hurried through the canvas-walled corridor to see the midget family? You saw the little chairs, a small table, doll-sized plates, cups and saucers. The eating utensils were smaller than your fingernail file! How inadequate these little people seem to be to live in a world which worships size and strength!

We leave such a scene with a sense of pity. We have a strange impression that, because of their diminutive stature, they are missing something in life. This is not only a physical or glandular phenomena. America is well-populated with another type of midget—the spiritual midget.

We have some here at Bethesda. Are you one of them? The spiritual midget does not recognize his soul as the most important part of his life. Therefore, he feels no compulsion to go to church to feed his soul.

He does not take time to read the world's best seller although he seems to have time to read every modern novel. Often we find the spiritual midget does not pray. He cannot remember if he was ever baptized or if his church still has the same pastor.

Finally, the spiritual midget does not have a preference about his religion. His philosophy seems to be "one-is-as-good-as-another." Occasionally, if he does have the courage to prefer a denomination, he can't spell it!

The physical midget has his handicap for life. He cannot overcome it. If you have symptoms pointing toward "spiritual midgethood" you can do something about it. Paul, the first Christian missionary, recognized the need for spiritual giants. He knew from his own experience the powers which war against the spirit and soul of man.

Put on the whole armor of God. The Bible says it is truth, righteousness, peace, faith and salvation. Are you willing to grow in the knowledge and grace of our Lord, Jesus Christ?

Commuted Rations Lowered Slightly

The belt-tightening economic swing of the Navy is now hitting general Navy personnel.

A series of orders, the first of which was issued by Assistant Navy Secretary R. H. Fogler, has reduced certain ration allowances.

The commuted and leave allowance was cut for enlisted personnel from \$1.20 to \$1.10 per day.

The Defense Department suggested in its budget for fiscal 1954 that the present \$1.20 value of the commuted ration be reduced to \$1.15, and the House Appropriations Committee slashed the figure to \$1.10.

The new cut is effective immediately for those on commuted rations. Here at NNMC the new rates are: breakfast \$.25, noon meal \$.30, and dinner \$.55.

Navy spokesmen said that the commissary officers are responsible for the prevention of waste of food. In some cases the mess hall master-at-arms is assigned to survey the garbage and keep it at a minimum.

Discharged Veterans Keep on with USAFI

Ever wonder what would happen should you be taking a USAFI correspondence course and were discharged prior to completing your course? Well—if you meet certain conditions, you may continue your course up to nine months after your separation from the armed services.

You are not allowed to start any new courses, but provided you have sent into USAFI one lesson prior to your discharge, you will be allowed to continue, up to a maximum of nine months.

A certified copy of the veteran's discharge certificate must accompany the first lesson submitted to USAFI after discharge. This certified copy should be sent to Director, United States Armed Forces Institute, Madison 3, Wisc.

Once discharged, a veteran cannot change the type of course he is taking or enroll in new courses. These privileges are only available to veterans who are honorably discharged or discharged under honorable conditions.

This is the first in a series of articles pertaining to those rights and benefits to which veterans of the Korean conflict may be entitled and which their dependents or survivors may be entitled and the steps they should be taken to get them and to protect them from loss.

Also covered to some extent will be the obligations and responsibilities that will rest on the veteran upon separation.

These are some things that should be done immediately: (1) Have your Report of Separation from the Armed Forces of the United States (DD Form 214) photostated and notarized. Have at least three (3) copies made. Then the originals should be put in some safe place along with other important papers. Apply for re-employment if you plan to go back to your old job; (3) Arrange to apply for new insurance, or to continue, resume or convert your old Government (USGLI or NSLI) insurance as the case may be and make premium payments; (4) Apply for disability compensation if you intend to do so.

Your records are available now but may not be so readily so at a later date. (5) Find out what financial or legal adjustments you must make if you have availed yourself of the protection of the Soldiers' and Sailors' Civil Relief Act during your service.

(6) Decide what use you want to make of either the Korean GI Bill of Rights or the WWII GI Bill of Rights. Some veterans may find themselves eligible under both. (7) Check into your status in the Reserve program of your Service. (8) Register for Selective Service.

And these are the items that should be done on a continuing basis: (1) Know the deadlines that affect you. (2) Keep your insurance and government loan payments up to date.

(3) Notify the Veterans Administration, your Draft Board or any other government agencies which hold your records or administer your benefits, of any changes of address. If you are a Navy veteran, notify the Commandant of the District to which you have moved.

(4) Carry out to the letter instructions or directions received from any government agency from which you are receiving benefits. (5) Notify any government agency from which you are receiving benefits of any change in the size of your dependent family.

A variety of courses is offered by the U. S. Armed Forces Institute, more familiarly known as USAFI. These courses extend from the elementary level through college level, plus a group of correspondence and self-teaching courses in the Vocational-Technical field.

Besides such stand-by subjects as English, Mathematics and History, all pre-requisites to college entrance, there are courses in Freehand Drawing, which cover the fundamentals and techniques used, and Carpentry as a trade, with emphasis on basic materials, tools, preparation for construction, and plan reading.

The follow-up course includes thorough training in carpentry principles as they apply to construction of actual houses.

For those individuals desiring to take correspondence courses offered by college extension programs, forty-six colleges throughout the United States offer their extension programs to service per-

sonnel through USAFI at approximately half the tuition cost.

A comparatively new angle in preparing for advancement in the program of correspondence courses based on the latest Navy Training Manuals.

The Naval Correspondence Course Center in Brooklyn, New York processes the requests, answers and the Completion Certificates which are awarded to those enlisted personnel who successfully complete (with a mark of 3.2 or higher) these courses.

A current list is maintained in the Information and Education Office, Bldg. 102, and requests will be forwarded immediately by the office.

If you have not finished your high school education and want to don't let the fact that you cannot attend classes regularly stop you. The I & E Office can help you on your way by way of the USAFI High School Level General Educational Development tests.

While this does not guarantee that your school will issue you a diploma, it does put you on a par with high school graduates throughout the armed forces and is acceptable by many institutions of higher learning for admission.

The following personnel of the Naval Hospital command have recently completed these tests successfully:

PETERS, Thomas J., HA; HOFER, Donovan D., HN; MAGILL, Robert P., HM3; DREW, Samuel L., HM3; and CICCARELLI, Nicola, BM3, a patient.

A new series of these tests is now available in the Information and Education Office. Drop by and see Robert Hudgens, HMC, or call Extension 547 for an appointment.

Cdr. J. M. Amberson Leaves NMS To Study Diseases in Korean Area

M. Amberson, MC, USN, departing Chief of the Department of Tropical Medicine. The Doctor, who has traveled over a large share of the world, typifies the lure of Naval life. His new assignment, which is with the Commander, Far Eastern Frontier, will enable Dr. Amberson to study the causes and possible controls of Epidemic Diseases primarily as they relate to the immediate Korean Area.

Dr. Amberson has been head of the Department of Tropical Medicine for the last five years. He arrived here late in 1947 and departed officially on July 18. Dr. Amberson has been on many Navy Medical Dept. Missions, those to India, Africa and South America being only a few.

During his India expedition, which was during WWII, he did research in Cholera. In Africa he

Cdr. J. M. Amberson

took an entire expedition overland from Cairo to Capetown, studying diseases that pertained to the immediate area. In South America he studied the dread Bubonic Plague for the Venezuelan government.

In May of 1952 Dr. Amberson left for the Arctic Region as the Task Force Surgeon of Amphibious Group 4, and voyaged within 100 miles of the North Pole. Besides doing all the major surgery for the force, he did research on the reservoir of disease hosts of the Arctic region.

By trapping, the doctor collected foxes and gave further proof that these animals carry rabies. Seals were caught for pathological study of viscera to determine the extent of intestinal worms, thought to be responsible for the high mortality rate of the seal young.

The Doctor, also, for the first time blood-typed the most Northern Eskimos.

The lack of Type B's and RH negatives and the comparatively little difference in the number of Type O's and Type A's gave further proof to the assumption that these people might be related to the Mongolians rather than other prime race stocks.

All-NNMC Wedding

Pictured following their wedding at Marine Barracks, Henderson Hall on Saturday, July 11 are Mr. and Mrs. Richard A. Davies. The groom is a SH3 in Center Command, while his bride, the former Miss Pat Malloy Fox, is a SN(W) in the same command.

JULY 27, 1953

School Starts For Lab 21 Class

Med. School started its 21st class for prospective clinical laboratory and blood bank technicians on July 13. It presently has 63 members who are quickly becoming familiar with the tasks that will be assigned to them as future lab. techs.

W. S. Hardy and J. E. Littleton will handle the class efforts as regards the Pathology portion of the course. M. E. Dodson and Lt. F. Spears (W) will do the instructing in Serology. The 14-week course in Blood Bank will be handled by Dr. L. W. Fix and R. Spivey.

A. Bucki and D. K. Lawless will take the class through Parasitology. Bio-Chemistry will be taught by our favorite columnist, M. C. Reder, and his able co-worker, H. M. McClintic.

Last but by no means least, the Bacteriology phase of the course is being taught by E. Lampley and D. M. Myers.

This course is one of the longest in the Navy's scholastic program. It comprises 14 months of rigorous work on the part of the students and instructors.

Music Maker

H. M. Farnham, DT2, plays the accordion for a group of NNMC patients. Farnham, presently head of the Photo Lab. at NDS, plays at the Chiefs' Club every Sunday evening from 1700 to 2000 and will furnish musical highlights for the Waves' 11th Anniversary celebration tonight.

AFRS Platter Chatter

'Billboard's Top Ten' on Musical Hits; For Hours of Listening Pleasure, Tune AFRS

Your Armed Forces Radio Service continues the presentation of a very interesting and pleasurable line of entertainment over Channel "C" daily, Monday through Friday at 1300. If you haven't listened, you've missed something. So we invite you to be with us each day at 1300 for forty-five minutes of listening pleasure.

"The Break," another of the true, modern adventure stories about the people who are risking their lives every day to escape from behind the Iron Curtain, will be presented on SECRET MISSION Friday of next week.

In November of 1946 Kirrill Mikhailovich Alexeev, an official of the Soviet Embassy in Mexico City, broke with the Communist regime and escaped to the United States and freedom.

The true story of his daring escape will be dramatized in "The Break," on SECRET MISSION at 1300 on Friday, Aug. 7. Don't miss it. Hy Averback stars as Jonathan West.

In the musical line, we have listed below "Billboard's Top Ten" musical hits: 1—Song From Moulin Rouge; 2—I'm Walking Behind You; 3—April In Portugal; 4 Ruby; 5—I Believe; 6—Say You're Mine Again; 7—Pretend; 8—Anna; 9—Seven Lonely Days; 10—Your Cheatin' Heart.

Defense Citizens Advisory Commission Suggests Civilian Med. Care Program

If the Defense Citizens Advisory Commission has its way about things, a civilian medical care program would be set up to care for the dependents of service personnel.

In its report the Commission stated that there are 1,400,000 military families, or 2,700,000 dependents, for all services.

There is no insurance system involved, the group stated, but certificates which would be issued could be presented to civilian hospitals and/or doctors of the patients' own choice.

CHIEFS' CLUB

(Cont. from Page 1)

mand to Center on June 20 of this year to relieve Chief LeBlanc, Rasmussen is finding his new job a real challenge and states that he enjoys the work a great deal and thinks the CPO's here at Naval Medical "have a club of which they can well be proud and which they should enjoy and patronize."

Enlisting in the Navy at Chicago, Ill., on August 12, 1940, Rasmussen saw World War Two service with the 2nd Marine Division, participating in the invasions of Tarawa, Saipan and Tinian with that outfit. Later he had shore duty at the Naval Air Station, Miami, Fla.

Then came duty on a tanker, the USS Mattaponi, during which time he went on several Persian Gulf runs. Later he was with the Task Force which paid a special visit to Sydney, Australia. From there the ship "Ras" was aboard left the Task Force and went on around the world.

The 38-year-old HMC got off the Mattaponi in Norfolk and came to the Naval Hospital here in June 1948. From there he went aboard the tanker, USS Allagash (AO-97), in Apr. 1951, for 18 months duty prior to coming back to this hospital in Nov. of 1952.

During his varied Naval career, Rasmussen also has had a tour of duty with the Naval Officers Procurement Dept. in Chicago, Ill.

He met his wife, Lillian (a Canadian girl) while working at the Mayo Clinic in Rochester, Minn., prior to entering service. They have a daughter, Karen, age 11, and two sons, Tommy, age 5½, and Peter, age 3½. The Rasmussens live at 12120 Selfridge Road in Silver Spring, Md.

This plan was suggested because of the number of dependents who are unable at present to secure care at service hospitals because of their inaccessibility to them.

Under this plan families who live more than 25 miles from a military hospital installation, or because of crowded conditions in military hospitals, would be eligible for this civilian care. The estimated cost for this dependents care would be about 30 to 40 million dollars yearly.

To discourage possible demands for excessive care, the first \$10.00 would be paid by the family for each illness, not including maternity cases. Also, to discourage the selection of the most expensive places, the family would have to pay 10% of the remainder of the bill.

There are certain items which the dependents would not receive: (except under emergency or similar circumstances.)

1. Home calls and care, except where recommended.
2. Chronic disease hospitalization.
3. Treatment for nervous or mental diseases.
4. Medical and surgical treatment of your own choice.
5. Artificial appliances of all types.
6. Dentistry.

No new military medical personnel or installations would be added, according to the commission, but all VA hospitals and Public Health facilities would be available.

Service Uniforms May be Tax Exempt

A plan is in the offing to allow exemptions up to \$200.00 per year in addition to the usual exemptions for servicemen's uniforms.

Rep. R. H. Poff (R. Va.) offered the proposal with the statement that service personnel should get the same tax benefits that are now enjoyed by policemen, nurses and other civilians who must wear uniforms.

The bill, as presently submitted by Poff, would limit the uniform deduction to \$200.00.

"I would love to share your troubles," she cooed.

"But, darling, I have none."

"No, I mean after we're married."

"I don't care what you were in civilian life. Around here you wear a uniform!"

Loosen Strings on Reserve Call-ups Defense Department Asks Congress

Washington—The Defense Department has asked Congress to loosen the strings it tied last year to Reserve call-ups. But reaction to the proposal is expected to be cold.

While giving authority to order up the Ready Reserve, the Defense-sponsored legislation would be limited so that no reservist with more than 30 days' service since June 25, 1950 could be called under it.

It would extend for two more years call-up power generally paralleling that about to expire in the Universal Military Training and Service Act. Under this, the President can call reservists for tours up to two years.

Without the extension, the services after July 1 will have to resort to section 233 (b) of the Armed Forces Reserve Act. In it, the Ready Reserve cannot be called until Congress has approved the numbers of men requested. Retired persons and inactive-status reservists are exempt until active-list reservists are exhausted.

The strings on the Ready Reserve were tied by Congress in the Armed Forces Reserve Act last year.

Defense's acting general counsel John G. Adams, in letters accompanying the new bill, pointed out

that:

1. After July 1 "the President will have no authority to order members of the Reserve components, other than doctors, dentists and allied specialists to active duty to meet any changes in world conditions . . ."

2. "This would mean that if the Congress is not in session, the President could not order reservists to active duty without their consent in a future emergency until the Congress could be convened and additional legislation enacted . . ."

Call-up authority, he noted, is not only needed on a standby basis for emergencies, but also is needed now "to obtain a relatively limited number of members of the Reserve components who possess military specialties which are not otherwise available." (Navy Times)

Chief Powell Wins NNMC Tennis Title From Dr. Lieurance

Chief Douglas Powell of the Food Services Division defeated Dr. Richard E. Lieurance for the NNMC tennis championship by whipping the Naval Hospital doctor, 3-6, 6-3, 7-5, 6-4 in the tourney final on Friday, July 10.

The smooth-swinging blond HMC outlasted the top-seeded Lieurance after dropping the first set. Both of the final two sets were

Douglas Powell, HMC, is shown in action during his victory over Dr. Richard E. Lieurance in the final of the NNMC men's singles tennis tourney. The Food Services Division CPO downed top-seeded Lieurance in four sets to take the title.

hard-fought affairs, with Powell having just a bit too much for his worthy opponent.

The new champ wore Dr. Lieurance down with an assortment of good placements, angle shots and chops that proved difficult to return well. The four-set duel lasted a little over two hours and a half.

Roy Hedlund of EENT captured the consolation match for third place laurels in straight sets by downing P. J. "Chick" Cichanowicz of O.R., 6-3, 6-2.

In reaching the finals of this year's men's singles tournament, second-seeded Powell had disposed of Lt. H. Scofield and Hedlund, both in straight sets.

Lieurance outlasted Chief Frank Weldon in three torrid sets and then whipped Cichanowicz easily, to gain the final match. But there he met his Waterloo in the person of a determined Powell.

It is hoped that a station intramural men's doubles tourney can be started in the near future. Doubles entries should be phoned in to the Special Services Office, ext. 672 or 227. It is desired that at least eight duos be entered in this competition.

Varsity Golf Team Loses First Match To WRAMC, 6½-5½

NNMC's golf team lost its first match of the season to Walter Reed Army Medical Center, 6½ to 5½, at Argyle Country Club on Wednesday, July 15. Two of Naval Medical's top club-swingers, Bill Downing and Jim Kinder, were not on hand for the duel.

D. T. Kean and Joe O'Keefe of NNMC whipped their WRAMC foes, 3-0, while Will Flanery and Bill Dorosz gained a 1½-1½ split for the 18 holes they played against Walter Reed golfers.

Jim Stoffel and C. H. Blackstone were defeated, 2-1, and K. V. L. Berglund and K. K. Bridge, both of NDS, were blanked, 3-0. Bridge was low man for NNMC with a 73, while Stoffel posted a 75. Paul Fako of WRAMC took medalist honors for the match with a fine 71.

Naval Medical will host Walter Reed in a return duel here next month, and also is lining up several other inter-station matches for coming weeks.

The next NNMC tourney will get under way the first week in September. No definite plans have been made for that as yet.

NSHA Slated to Begin New Classes Writer Reminisces on Past Happenings

This is the time of year when things slacken up a bit at NSHA. It has been almost a month since the last class of students graduated and the mighty quiet nowadays.

At the end of another academic year, and before the beginning of another, thoughts turn back in a reminiscent vein. Last year at the anniversary of its tenth anniversary, which was published in the NEWS (July 28, 1952).

It was a review of "ten years of achievement in education" and traced the development of the original Hospital Corps Officers School into the diversified plant that NSHA is today.

Appropriately, one might ask, "What has happened since?"

NSHA lost a commanding officer and, as is usual in such a case, gained another.

Another group of 150-odd students "had it" and departed.

The NSHA Nine won the first half NNMC intramural softball championship again.

A new eight-weeks course was installed to indoctrinate newly commissioned MSC officers of the Naval Reserve in Medical Department Administration.

The Bureau was busy. HMC's Hofsetter, Rogers, Meitl and Marshall, and Tom Holda, HMI, all re-

ceived their sea duty assignments. Art Critchett, HMI, is packing up to go to Oakland, Calif., where he will attend environmental education school.

And the mystery of the missing golf balls below the seventh was solved. The ducks didn't eat them.

As for the future, orders for next year's classes are already coming in and NSHA will welcome aboard several potential students from other NNMC commands.

LT J. O. Atkinson and Robert Gallaher, HMI, have been ordered from the Center Command and LTJG T. G. McMahon and R. R. Ruffin, HMI, from the Naval Medical School. M. P. Alvarez, HMI, is coming from the Naval Hospital.

The old-timers will be glad to hear that Lenora Hill, HMI, attached to NNMC until about a year ago, will represent the Waves at NSHA this fall.

Maggie McQuarrie Hurls No-Hitter As Women Trim Arlington Hall, 6-3

Maggie McQuarrie, NNMC's steady southpaw twirler, outlasted fastballer Metz of Arlington Hall as the Admiralettes racked up their fifth triumph in eight WIAL contests by whipping the Army invaders, 6-3, here Tues., July 14.

The Medical Center's little lefty hurled her first no-hitter of the season in snapping a two-game losing streak for the local girls. NNMC overcame a 3-2 deficit with four runs in the late innings to send their fans home happy.

All three Arl. Hall tallies came in one inning, a couple of infield errors by the home forces contributing to these scores. Josh Shock, NNMC shortstop, performed well afieid and came through with two clutch hits that helped turn the tide.

Jan Fick, Admiralettes left fielder, also proved hard to get out. She has shown an ability to get on base one or more times in almost every game this year. Mary Lou Cox turned in a good defensive effort behind the plate.

Coach Spurgeon Slade's spirited squad meets the highly-regarded Ft. Myer 7001st there tomorrow evening at 1830, and will entertain the Quantico Marines here on Diamond #1 at 1830 Friday, July 31.

The NNMC women wind up their regular season next week when they travel to Ft. Myer to play the WAC Hq. Co. at 1830, Tuesday, August 4, and then are at home to Patuxent River, Md. NATC at 1830 on Thurs., Aug. 6.

Playing for the WIAL All-Stars in the ASA District Softball Tournament at Richmond, Va. the past weekend were NNMC stars McQuarrie and Cox. "Maggie" was slated to see action at either first base or on the mound, with Mary Lou due to work behind the plate for the WIAL team.

In recent practice tilts, the WIAL club lost a 9-5 thriller to Quantico "K's" strong squad, 9-5, at Andrews Field, and then defeated Fort Lee, Va., 6-1, behind the no-hit pitching of Arlington Hall's Metz.

New 3-D Camera at Work

Shown above is the new 3-D camera just prior to its use in a recent operation here at NNMC.

SPORTS FLASH

NNMC nipped Walter Reed, 1-0, in an 8-inning thriller here Thurs., July 23. Crabtree pitched a 1-hitter and scored the winning run on DeVice's hit.

JULY 27, 1952

What To See Around D. C.

MONDAY July 27—"Brigadoon," Washington Festival Inc., Carter Barron Amphitheatre, 2030 through Aug. 2 nightly.

Ballroom Dancing, Banneker Community Club, 2500 Georgia Ave., NW, 2100 to 2300 (each Monday).

TUESDAY July 28—Baseball, Washington vs. Detroit, Griffith Stadium, 2030 (also July 29, same time).

Tennis Instruction (D. C. Rec. Dept.) Each Tuesday, 16th & Kennedy Sts., 1800 to 2000.

WEDNESDAY July 29—"The Happiest Days of Your Life," Players Inc., Olney, Md. 2030 through Aug. 9, also Sunday Matinees.

Instruction, Ballroom Dancing, Roosevelt Center, 13th & Upshur Sts., NW, 2030 (Each Wednesday).

THURSDAY July 30—"The Marooning of Marilla," Masquers of Roosevelt Center, 13th & Upshur, NW, 2030.

Baseball, Washington vs. Detroit, Griffith Stadium, 1400.

FRIDAY July 31—Baseball, Washington vs. Chicago, Griffith Stadium, 2030, also Aug. 1 same time.

Archery Instruction, (D. C. Rec. Dept.) Each Friday, 16 & Kennedy Sts., NW, 1800 (until dark).

SATURDAY Aug. 1—District Open Golf Tournament, Langston Course, all day, Also Aug. 2.

Orchestra Dance, servicemen, age 17 to 30, YWCA, 17th & K Sts., 2100 (each Saturday).

SUNDAY Aug. 2—Barbecue, service personnel, age 17 to 30, YWCA, 17th & K Sts., NW, 1830 (each Sunday).

Baseball, Washington vs. Chicago, Griffith Stadium, 1400, also Aug. 3, 2030.

TUESDAY Aug. 4—Baseball, Washington vs. Cleveland, Griffith Stadium, 2030. Also Aug. 5 at 2030.

THURSDAY Aug. 6—Baseball, Washington vs. Cleveland, Griffith Stadium, 1400.

FRIDAY Aug. 7—Baseball, Washington vs. St. Louis, Griffith Stadium, 2030, also Aug. 8, at 2030.

SATURDAY Aug. 8—D. C. Tennis Championships, Kenwood Club, through Aug. 16.

SUNDAY Aug. 9—Baseball, Washington vs. St. Louis, Griffith Stadium, 1330 doubleheader.

MONDAY Aug. 10—"Rio Rita," Washington Festival, Inc., Carter Barron Amphitheatre, 2030 through Aug. 16 nightly.

TUESDAY Aug. 11—Baseball, Washington vs. New York, Griffith Stadium, 2030—also Aug. 12 & 13 at 2030.

FRIDAY Aug. 14—Stock Car Races, Lanham Speedway, Lanham, Md. 2045 each Friday during July and Aug.

SUNDAY Aug. 16—Sailing Races, summer series, Nat'l Yacht Club, from Washington Sailing Marina, each Sunday 1300 on.

Wolff's Den

Bob Wolff

AIR CONDITIONING . . . The Nats beat the heat by putting cabbage leaves in a bucket of ice water, then inserting the wet leaves under their caps when they take the field. When they return to the dugout, back go the leaves into the water. For those who need further aid, Doc Lentz, the Nats trainer, has an oxygen machine among his many gadgets.

SNAPBACK . . . One of the first lessons the new player in professional ball has to learn is that "tomorrow is another day." Wins and losses, good days and bad days, have to be taken in stride.

With a long 154-game season, a player has to keep himself in top condition mentally as well as physically, and that means taking the breaks as they come and forgetting them as soon as possible once the game is over.

It's not always easy, but the fellow who can concentrate on each game as it develops without worrying about yesterday's headlines usually has the best chance of creating the top headlines for the morrow.

LOCKER ROOM LOWDOWN . . . His teammates say that Connie Marrero has developed the first three-dimensional pitch in baseball. It's not denying that Marrero is tough to hit—in any dimension.

Frank Shea can be depended on for plenty of laughs to bolster the team's morale. His antics range from bursting forth in a gay tune to impersonations in various voices, all done good-naturedly.

Shea got Dick Kryhoski of the Browns laughing so hard one day that Manager Marty Marion had to caution his first-baseman to try and control himself lest the laughter destroy his full concentration at the plate.

The Nats have batting styles well-suited for the A's Connie Mack stadium. They have hit eight home runs there, one more than they had through July 5 in Griffith Stadium.

Drawing raves throughout the league are rookie shortstops Bill Hunter of St. Louis and Harvey Kuehn of the Tigers. Both look like they'll be making headlines for many years to come.

TEAR AND TEAR . . . Hopping from city to city, as we've been doing throughout the current baseball season, we've watched our luggage become more and more battered. Yogi Berra, who does a bit of traveling himself through the season, apparently is suffering the same troubles.

The other day a teammate, noticing the bruised condition of Yogi's luggage, made a tactful suggestion. "Don't you think, Yogi, that you can use some new suitcases?"

"No sense in that," answered Yogi. "I only use them for traveling."

Four-Team Tie for Second Place in Intramural Softball League

X-Ray School and Center Command recently scrambled up the standings in the station intramural softball league by joining Pharmacy School and Research in a four-way tie for second place.

This turn of events made necessary a single-elimination playoff among those four teams to decide second and third place in first half play.

All four clubs finished the first half with six wins and three losses. NSHA won the championship with eight victories and one defeat.

Pairings for the single-elimination tourney pitted X-Ray against Pharmacy on Field #1 at 1700 on Monday, July 20 and Center Command against NMRI on Field #2 at 1700 the same day.

The two victors were to battle it out for second place on Field #1 at 1700 today.

Naval Dental School took sixth place with a 5-4 slate by upsetting Research, 14-11, on July 14. This dropped the losing nine into the four-way snarl for the second spot. NMRI won its game from NH Doctors by forfeit.

Pictured above are the members of our NNM Admirals women's varsity softball team, which has a winning record in this year's WIAL competition. In the photo are, front row—(L to R): Nancy Alken, Joyce Crouch, Barbara Bradford, Josh Shook, Mary Lou Cox, Marian Ackley and Maggie McQuarrie. In the back row are—(L to R): Glee Biddle, Shake Nakikian, Jan Fick, Claire Emmington and Marge Edmonds.

Improved Admirals Halt Cheltenham; Greer Homers Twice Against WRAMC

Acting Manager Jim Greer's NNM Admirals moved to within one game of third place in the MAISAC Softball League by upsetting Cheltenham, Md. Naval Radio Station, 5-2, there Thurs., July 9, behind the steady five-hit hurling of John "Scratch" Crabtree. Coach Jay Bell will be on leave until July 30.

Although this was only the fourth win in 16 loop contests for Naval Medical, the local team has shown great improvement of late and may prove a strong contender in the MAISAC tourney at Patuxent River, Md. in late August.

NNMC scored first in the 4th inning on hits by Greer and Mort Pilcher, but Cheltenham came right back with two runs in the bottom of the 4th. Then the Admirals tied it in the 5th on bingles by Noel Schilling and Ron DeVice.

With one out in the 7th, Schilling doubled to left, Wayne Davis lived on a fielder's choice and error by the second baseman, and Ron DeVice dumped a Texas Leaguer to short right center. After Greer popped out, Ray Gismond singled sharply to center, bringing home two more markers.

Crabtree quickly retired Cheltenham in order in the 7th to notch his 4th win of the campaign. For NNM, Schilling and DeVice paced an 11-hit attack off speedballer Charlie Breyman with three safeties each, while Gismond notched two hits. Ouellette and Meyers paired hits for the losers.

Walter Reed Army Medical Center made three 3rd-inning tallies do the job in edging out the Admirals, 3-2, at Forest Glen Section on July 7. An error by the catcher accounted for the first counter.

Greer slammed two home runs, one over the right fielder's head and the other past the center fielder, to account for both Naval Medical scores. It was a tight mound duel between Crabtree and the winners' Jim Wilusz.

"Scratch" chucked a sterling two-hit shutout as his mates pounded out a 10-0 victory over Pat. River there on July 2. NNM rapped Perry of the Airmen freely, while NATC could do little with Crabtree's offerings.

New members of the Admirals seeing action recently were Dan Bova at first base, Dolf Caesar in right field and at shortstop, and Dick Suever in the outfield.

INTRAMURAL LEAGUE FINAL STANDINGS (first half)

NSHA	8	1	.889

LAB 19	3	6	.333
NH Doctors	1	8	.111
NH Bks.	0	9	.000

* Tied for second place.

Naval Medical Belles Top Athletes

Becoming a Catcher No Trouble at All For Mary Lou Cox

When Boots Carlson sustained a fractured jaw in the game with Walter Reed on June 30, Mary Lou Cox was called in from her regular shortstop position on the NNM Admirals softball team to go behind the plate.

Those on the station who know Mary Lou well were certain that she would do a good job receiving Maggie McQuarrie's pitches, even though the friendly PNSN(W) had caught a game only once before in her entire life.

She did not disappoint them that day and went on from there to perform well as a backstop in the game here with Arlington Hall on July 14. An all-round athlete, the native of Great Bend, Kansas has proved her ability at basketball, volleyball and softball.

Mary Lou, who will be 21 years old on August 14, spent her early years in Great Bend, moving to Dodge City, Kans., in 1942. Her family still makes its home in that community, which is located about 150 miles from Wichita and is only a two-hour drive from the Colorado border.

In high school, the jovial Cox lettered in basketball, volleyball and softball, playing forward on the hardcourt and shortstop in the diamond sport.

After graduating from high school, she worked for one year in the offices of Fairmont Foods Co. in Dodge City and then joined the Navy on Sept. 4, 1951.

Following recruit training at Great Lakes, Ill., Mary Lou attended Personnel School at Norfolk, Va. and came to NNM from there on Feb. 28, 1952. Since then Dodge City's contribution to Center Command has worked in Special Services, the Waves Barracks and Finance. She likes her present job in Finance "just fine."

Since arriving here the PNSN (W) has played on the Admirals' softball, basketball and volleyball teams. She was regular shortstop on the 1952 softball club and last winter performed at guard on the cage squad.

While home on leave last year, Cox played softball for Ferguson's Appliances of Dodge City, which won the Kansas State Class "B" women's softball championship.

Mary Lou and Maggie were named to the WIAL softball all-star team this year and participated with that group in last weekend's ASA district tournament at Richmond, Va. A better than average hitter, Mary Lou was named to the squad as a catcher, Maggie as a pitcher-first baseman.

Cox expects to be discharged from the Navy in September of 1955, at which time she probably will go back home to Kansas and do office work.

Admirals' Catcher

Here's Ray Gismond, fiery little catcher for the NNM Admirals varsity softball team. A single by "Gis" drove in two decisive runs during recent 5-2 victory over Cheltenham.

NNMC Men Down Another Loop Foe; Waves Take Loss

John Crabtree twirled a four-hitter as the NNM Admirals took a 6-4 decision from Patuxent River NATC here on Tues., July 21, as newcomer Dolf Caesar belted a home run for the winners.

NNMC was out-hit, 4 to 3, but scored four times in the 1st inning on only two safeties and added two runs in the 3rd frame. Jim Greer's sensational stab of a fierce grounder in the 7th was converted into a fast double play that ended the game. Greer and Wayne Davis had singles for Naval Medical.

The Admirals, minus pitcher Maggie McQuarrie, who was sidelined with a pulled leg muscle, fell before the strong Ft. Myer WAFS, 19-4, there on July 21. Ft. Myer got 11 runs in the opening stanza to win easily. Coach Slade of NNM barely was able to field nine players for the WIAL tilt.

Center Command and Pharmacy School won intramural games on July 20, to gain the final of the four-way playoff for second place. NNM crushed NMRI, 25-7, collecting four homers, and Pharmacy topped X-Ray School, 13-7.

Ready for action in recent MAISAC softball game here with Cheltenham are NNM Admirals infielders (L to R): Jim Greer, Wayne Davis, Noel Schilling and Jay Bell. The fleet-footed Schilling also performs center field on occasion, while heavy-hitting Greer now is acting manager of the ball club while Bell is on leave.

Super Cooper

AFPS

Attractive Toni Cooper doesn't seem interested in swimming as she smiles prettily for a photographer beside a pool in Los Vegas, Nev. Hiding such obvious assets under water would be criminal, anyway.

Medicine & Science

Cell May Not be Smallest Living Thing World's Industry Makes Earth Hotter

Dr. Oscar Kanner, pathologist of the VA in Oteen, N. C., reported a recent lecture before the American Tuberculosis Association that cells making the bodies of animals may in reality not be cells as previously thought but invisible virus-like organisms.

This theory, if established, would eliminate the long established belief that the cell is the tiniest unit of animal life. According to Kanner, tests demonstrate that virus-like diseases can be produced in healthy guinea pigs by injecting them with invisible parts of cells taken from diseased guinea pigs.

These experiments indicate a whole new field of cell theory may have to be considered.

A Johns Hopkins physicist reported that the world's industry, pumping its gasses into the air, is contributing to making the earth a warmer place to live.

So much CO₂ has found its way into the earth's atmosphere that the average temperature has risen one and a half degrees (F).

Dr. Plass, assistant professor of physics at Johns Hopkins University, theorized that two billion tons of coal and oil are burned per year "forming six billion tons of CO₂."

CO₂ in the air is similar in action to the glass panes of a greenhouse. The glass prevents the escape of heat waves of long wave length but permits the entrance of heat radiations of short wave length.

That cigarette smoke causes test cancers was revealed by Dr. C. Rhoads. Before a congressional subcommittee, Dr. Rhoads explained that "the chemicals which cause the cancer in animals are being extracted from the tar, and their identification is expected in the near future."

Dr. Rhoads also stated in his talk that "there is a correlation between the smoking and the amount smoked and the occurrence of cancer of the lung."

Dental Explorer

By John

Hot off the grapevine comes the news of two frustrated life-savers in our midst—namely, Guzzetta and Tyson. Too bad "Isaac" Walter beat you to the draw!

Cdr. Millard, on leave and in transit from NDS to the USS *Arcton* at Newport, R. I., still spends as many hours in Room 166 as he did while he was on our staff. The best to you, Cdr.

Chief Hughes and family have joined the ranks of beachcombers at Daytona Beach, Fla., for 21 days. We hope the sun, fishing, swimming and \$400 holds out, Chief!

Another traveler left last weekend. Mr. Ferguson took his family to Ohio, via Canada and Minnesota. That's taking the long way home, Mr. F.

What with Mr. Ferguson and Chief Hughes on leave, somebody has to take the wheel, and the man with the grip is Chief Erickson.

Someone should let Anna S. in on what to do with one of Gallagher's Marine patients. It seems as though this one keeps getting lost, even in a dental office!

Which new groom is furnishing his bride with "Pep loaf" and logna sandwiches?

Speaking of B's and G's, the little bird says that Pederson's mate is a terrific home-maker. Congrats, Mr. and Mrs. Pete.

Another new car has turned up in area "F." Didn't Ingram say it was a '39?

Greetings are in order for Dr. Gianmusso, our Oral Surgery Resident from ComServPac, 1st MarDiv., FMF, and Dr. Losee, from NMRL.

Well, that's the way it goes—from the one who nose.

Med School Daze

By Cracker

Things have been happening so fast around here for the past few weeks that we really don't know where to begin. But here goes.

Jim Bowers has been wearing that shineing badge for such a long time that he finally decided to try out a horse last Saturday. It wasn't really a horse—just a pony.

Everything was going fine, until "sheriff" Jim decided to stop. He gave out with a big "Whoa" and the pony stopped. But not Jim—he kept on going, head over heels, right between the pony's ears. Major injuries, luckily; just a few minor abrasions.

We almost lost half of the new Isotope class the other night. It seems as though a tree bumped into Russell's car on the way back from Great Falls. No serious damage to the occupants, but the car is now ready for the scrap heap.

It's out in back of 140 right now, where it serves as a vivid reminder to all that we must drive carefully.

They tell us that Doyle of Optometry School was standing by Andy in the Quarters last Friday, wearing quite an original field uniform. You'll have to get further details from Keyes.

Said goodbye to Dave Greenhouse last week. He's on his way to FMFPAC. Goodman has taken over the wheel in P&A. Good luck, Dave, and welcome aboard, Goody.

Walls, at this writing, is still waiting for those orders. He's beginning to doubt that they are really coming.

We understand that Ruffin of Med. Photo, had a slight run-in with the MCPD recently. He claims that it was really "Tillie" who threw the bottle out the window.

That's about it for now. Be with you again real soon, by cracky.

Center Capers

By Clyde

Great deal to report about Center Command activities this time, so without further ado we'll get right with it.

Word has reached your kolumnist that Maurice Wertley, HMC, and Roy L. Wilkes, Jr., HMC, both are due to leave us soon. They are to be assigned duty by COMSERVLANT. Our best wishes for the future go with them.

WOHC Joseph R. Renard, well remembered when he was an HMC in the Hospital command several years ago, joined our command not too long ago. Recently his wife gave birth to Renard offspring number six, a bouncing baby girl. Heartiest congratulations on the new member of your family, Joe.

Currently on leave are Chiefs Everson and Slaughter, Bob Gallaher, HMI, Bob Maplettoft, HN, and also Chief Schellhammer, the amiable RMC of our Communications Office.

WEDDING BELLS rang out in the recent past for R. J. Agosti, HN, J. W. Ford, SH2, and R. A. Davies, SH3. Agosti and Ford each took the big step on July 4, while Davies was united in marriage with the former Pat M. Fox, SN(W) of Center Command at Mar. Bks., Henderson Hall on July 11.

Best wishes go to all these fine folks for many, many years of wedded bliss.

Almost forgot to mention that LT L. D. Farmer is enjoying a well-earned rest while on leave until August 1. Also, Alvin Real, HM2, well known to all for his efficient Guard Mail runs, now is on the sick list. We hope he'll be back with us, hale and hearty, before too long.

Recent additions to our family are Robert L. Worthington, HM3, and James J. Stoffel, HN. Worthington, now assigned to Bks. 112, came from the 3rd Mar. Div., FMF Camp LeJeune, N. C. Stoffel, formerly in Hospital command, works in the Golf Shop and always has a smile and pleasant word for all.

As of this writing, Ronald Bourgea, HM1, is due to arrive soon from the 2nd Mar. Div. at Camp LeJeune. He used to edit the Center NEWS. We'll all be glad to have Ron back with us again.

In late June, Alan E. Rasmussen, HMC, came to us from NH to relieve Chief LeBlanc as Treasurer of the CPO Mess (Open). Some of us have known "Ras" before and it's good to have him in Center.

NOTES AND QUOTES: Ask Ron DeVice of the Golf Shop about his current social activities in the Rockville area. Hear it's quite the thing. Several members of NMS' Phys. Med. Class also can supply interesting info on this subject.

They tell me "Snake" Alligood is making money hand over fist these days—he has a snazzy new set of golf clubs to show for his efforts. And Mrs. Maplettoft wonders about her hubby's statement that it's "all work and no play standing life guard watches." Seems she thinks differently. Hmmm!

NMRI

By Clancy

Well shipmates, your fledgling reporter has come forth with his first column. So please bear with me while our former "Louella Parsons" takes a well deserved rest. "Ronnie" said she was getting writers cramp, so I decided to give her a break. Anyhow, it's more fun to give than to receive.

Former shipmate "Rube" was guest of honor at a recent tea party sponsored by "Red Eye Red." Too bad "Colonel Jeff" was vacationing in his native Southland at the time. Jeff says that the softball team can relax now, as the situation will be well in hand from here on in.

We hear from a certain Chief that his dog is getting to be a hot rod '37 Ford driver.

Rumor has it that our new office boy doesn't like that Southern climate.

It seems that our local draftsman is buying stock in a used car lot. There's nothing like private enterprise!

Say Ray, we hear that you are in the market for a "Hi Fi" system to play your "Be Bop."

They tell me, Smitty, that the last laugh is best (Concerning Wrecks).

Recently departed are Cdr. Lee and Lt. (jg) Corey to Florida, and Grey, HMC, to inactive duty. Also Lauritzen, HM2, went to join the boys at sea.

Soon to report for another tour of FMF duty is "Willie" Williamson, HMI, formerly of NMRL. Good Luck Willie.

That's all folks, so like the Sheriff says, drive carefully!

Navy Belles

By George

There are lots of new little sisters at our house as the new Lab class gets underway, bringing us six new girls. Also arriving to augment the complement of NDS are two more girls, and of course Hospital gets its few but welcomed girls.

Goodbye and farewell to our old friend Scotty. She has gone back to civilian life. Will sure miss her when next I take to the woods for stick hunting.

Minnie Smith left our happy home to go down town to the Main Dispensary. We all hope she will be very happy down there. Glenna told us all farewell, since her school ended, and has shoved off for Philly. You know our old friend Kitty stayed here.

Peg Wilkie bid us all goodbye, got into her grass skirt, and took off for the land of Hawaii. On leave: Betty Ward is touring Martha's Vineyard; Edith Weatherall has gone to Mississippi, and Edith Abblett is back from her hurried honeymoon—hope she will be happy.

Sports: Car sanding Keys has a new car. She made a sport out of sanding and painting it.

We are proud of our all-stars, Maggie and Mary Lou. We are happy to have our Waves and NNMC, represented on the WIAL all-star softball team. The play of the week was made by Josh, who batted the ball, but then didn't know which way it went.

Pat Frank now has a golf dress and hat, so she thinks she may take up the sport. Don't forget our Waves Birthday party tonight. The committee has big plans, so I'll see you there, by George.

G. I. Bill Now In Ninth Year

The WWII GI Bill is nine years old now and each of its three major benefits is in a different stage of completion.

The program of guaranteed loans for homes, farms and businesses is still in effect and has four more years to run. Thus far some 3,300,000 veterans have obtained GI loans, with 90 percent of them going to veterans who wanted to buy or build homes.

The education and training benefits reached the cut-off point for most veterans July 25, 1951. Those who are in training now are veterans who started before the cut-off date and who have remained in training since. A total of 7,800,000 persons have taken some form of training under this program.

The readjustment allowances for unemployment and self-employment have all but passed out of the picture. About 9,000,000 veterans drew this allowance, but only one in 10 used the full one-year authorized.

June Hutton Featured for Wednesday Billboard's Top Ten Listed in Order

by R. L. Hudgens

It is with regret that I have to announce the conclusion of the DOUGLAS OF THE WORLD and SECRET MISSION series. They will not be replaced. However, a substitution for these parts of our weekly program has been made and I think that you will enjoy such listening pleasure just as much as you have the former schedule.

We have a few recordings by June Hutton which you will hear on Wednesday of this week and I'm sure that you will like them. In fact, one of her numbers, SONG FROM MOULIN ROUGE, is still in first place on "Billboard's Top Ten." June is backed by hubby Axel Stordahl on this Capitol release. June is the kid sister of bandleader Ina Ray Hutton and got her start in the music business when she replaced Jo Stafford with the Pied Pipers.

On Wednesday of next week Sammy Kaye's recordings will be heard. For years Sammy has been doing a lot of singing and very little, if any, swinging. Just for laughs the Columbia people persuaded Sammy to forget his sweet style on just one record and he's come up with a thing called "The Midnight Ride." Although there's no mistaking the Kaye reeds, the brass and rhythm sections drive remarkably well and the jazz solos are performed very tastefully. Give a listen.

BILLBOARD'S TOP TEN

- | | |
|--------------------------|-------------------------|
| 1—Song From Moulin Rouge | 6—No Other Love |
| 2—I'm Walking Behind You | 7—Say You're Mine Again |
| 3—April in Portugal | 8—Lullaby |
| 4—Ruby | 9—Believe |
| 5—Vaya Con Dios | 10—P.S. I Love You |

COMING UP

The Chaplain's Corner

Lift Up Your Eyes

By Chaplain N. V. Brink

The majority of people in this world are prisoners of small aims. Perhaps the most usual small aim is the self. Someway or other they expect God to preside over these prisons and that He releases to do.

Some folks are prisoners of intellectual narrowness. To them anything new under the sun in the realm of ideas is automatically suspect. Some folks are prisoners of the idea that to live this material life is enough and sufficient and nothing more.

Jesus taught that when we tried to make the ultimate end, confidence of intellect or materialism we usually ended up with one of the many forms of self-loathing. The Psalmist bids us lift our eyes up from whence our help does come.

The glorious experience of the Christian religion is the fact that men can grow and grow in Christian experience. Their growth is predicated on their outward look for others and for God.

If you have not given your outward look recently, they might stand a bit of overhauling. Check up on them by testing them against Jesus words in the form Gospels. If they don't measure up, make some changes. You will be happier for it.

Crew's Library: History Books in Various Moods

There are many ways of learning and enjoying history: you may like it straight, diluted with nonsense, or sparked up with fiction. In any case Crew's Library has history to suit your taste.

For Naval History, try the newest volume in Samuel Eliot Morison's series called THE HISTORY OF U.S. NAVAL OPERATIONS IN WORLD WAR II. Volume 8, recently published, including the Battle of the Philippine Sea, thought to be one of the decisive Naval battles of the war.

For a humor packed little book, try IT ALL STARTED WITH COLUMBUS, written by Richard Armour. This parody on history ridicules the usual historical footnotes, genealogical tables and self-examinations with hilarious results.

THE FLORENTINE, by Spinatelli, skillfully mixes the history of the Renaissance Italy with the romance and pageantry of the times and the suspense and excitement, escapades and escapes of that artistic genius, Benvenuto Cellini.

Canadian Lab. Tech.

(continued from page 1)

Coastal bombardments and supported carriers in the Yellow and Japan seas. Armstrong tells of an instance of perfect UN cooperation when an officer from his ship was taken seriously ill with an attack of appendicitis. The officer was transferred immediately to a nearby British Carrier where he underwent an operation. The officer still in serious condition was then transferred to a Dutch destroyer, then to an Australian or New Zealand destroyer to be transported to the US Army Hospital in Sasebo, Japan. Five nations took part in the treatment of this officer who later returned to the "Huron."

Of the laboratory course here, Armstrong states that it is "tops" and that it is highly desirable by all Canadian laboratory technicians.

Armstrong, his wife and their two sons, Greg and Kirk, are presently residing in Rockville, Md.

In this second article on rights and benefits of the veteran, two major categories will be covered.

The agencies generally available and authorized to assist veterans in their readjustment problems include the offices of the Veterans Administration, the offices of the American Red Cross, the American Veterans' Service Organizations such as the American Legion, Disabled American Veterans, etc., Reserve organizations, Student services, and for Navy veterans specifically, the District Readjustment Offices located in appropriate Naval Districts.

Public Law 550, 82nd Congress, better known as the Veterans' Readjustment Act of 1952, provides for mustering-out payments to eligible veterans ranging from payments of \$100 to those who have served less than sixty days to \$300 to those who have served for sixty days or more, with part of that service outside the continental limits of the United States or Alaska. Mustering-out payments are restricted to personnel below the rank of major or lieutenant (commanded whose discharge or release) under honorable conditions after serving occurred during any part of the Korean conflict period (on or after 27 June 1950 and prior to date to be determined by the President or Congress).

The following persons are NOT eligible: (1) veterans discharged under conditions other than honorable, (2) veterans separated on their own request to accept employment, IF they have not served outside the continental limits of the U.S. or Alaska, (3) those transferred to the reserve list with retired pay or to a similar status (unless retired for physical disability or having received severance pay by reason of physical disability as provided under Title IV of the Career Compensation Act of 1949), (4) members of the Armed Forces whose total period of service has been a cadet in one of the service academies, or in a prep school after nomination for admission to one of the service academies, or a civilian institution, (5) any member of the Armed Forces discharged for the purpose of entering the of the Service academies and (6) any person ordered to active service for a period of less than 60 days or for the sole purpose of training duty or a physical examination.

What To See Around D.C.

- MONDAY Aug. 17—"Rose Marie" Washington Festival Inc. Baron Amphitheatre, 2030 Through Aug. 23 nightly Finals, Miss Washington Contest, Capitol Theatre.
- TUESDAY Aug. 18—Tennis Instruction, U.S. Rec. Dept. at the Kennedy Courts, 1800 to 2000 each Tuesday.
- THURSDAY Aug. 20—"A Husband for Breakfast," Masquers of the velvet Center, Roosevelt Center, 13th & Upstar St., 2030
- FRIDAY Aug. 21—Stock Car Races, Lanham Raceway, 2045 each Friday during Aug.
- SUNDAY Aug. 23—Baseball, Washington vs. Boston, Griffith Stadium, 1400.
- Potomac River Sailing Assn., off Hains Pt., each Sunday 1300 to 1700.
- MONDAY Aug. 24—Ballroom Dancing, Banneker Community Club, 2500 Georgia Ave., NW, 2100 to 2300 each Monday.
- THURSDAY Aug. 27—Fencers' Club, Roosevelt Center, 13th & Upstar Sts., NW, 1900 to 2200 each Thursday.
- FRIDAY Aug. 28—Archery Instruction, U.S. Rec. Dept., Kennedy place, NW, Each Friday till dark.
- SATURDAY Aug. 29—Montgomery County Fair and Horse Show, Poolesburg, Md.
- SUNDAY Aug. 30—Sailing Races open to all classes, Nat'l Yacht Club, from Washington Sailing Marina, each Sunday 1000 to 1700. Boats are for rental there, call OT 4-7783.

"Thanks for the fine memories" — Joe Melvin

Presidential Order Removes 1st Marines; Replaced by 3rd Div.

Gen. Lemuel C. Shepherd recently announced that by Presidential order the 3rd Marine Division will "eventually" replace the 1st Marine Division in Korea. The "eventual" date as to the actual replacement was not announced, but according to Gen. Shepherd all veterans of the 1st have already been replaced by rotation. White House press secretary James C. Hagerty made the announcement to the press that the shipping orders for the 3rd division have already been given. The 3rd's eventual destination has not been revealed, but the decision as to its ultimate destination was being left up to Gen. Mark W. Clark. Except for a few weeks this past summer, the 1st Marine Division has been in the lines since the early days of the war.

The 11th Marine Air Group was also ordered to accompany the 3rd to Korea. The 3rd is presently at full strength with 22,000 officers and men. It was activated at Camp Pendleton early in 1952, and has been undergoing training ever since. It takes its name from the WWII unit which fought on Iwo Jima.

MSTS Sea Billets Available for Waves

On the eve of the Waves' eleventh anniversary, the Navy announced that it will call for volunteers from the enlisted women of the Hospital Corps to fill 63 billets on ships of the Military Sea Transportation Service. This move marks the first time that military billets aboard ships have been opened to enlisted Waves.

Twenty four officers of the Navy Nurse Corps will be replaced by the enlisted hospital corps Waves in the dependent-carrying MSTS vessels. The nurses then will be available to meet the needs of Navy hospitals ashore.

Wave hospitalmen and petty officers, other than chief petty officers, may request this duty and state their preference for either the Atlantic or Pacific. The applicants must be 21 years of age and must have to serve at least 24 months. The tour of duty aboard these ships is 21 months. Of the 63 billets available, 28 are in the Atlantic and 35 in the Pacific.

Cash, Pins, Commendation Awarded 18 Civilians

Ten dollar cash awards for beneficial suggestions were given the following: Paul E. Hoffman, guard supervisor; Norman Garvin, encephalogram; Myrtle Snowden, chief mess attendant; Fred R. Johnston, modelmaker wood; Ernest C. Shiflett, animal keeper and James E. Thomas, chief cook.

Miss Katherine L. Lanahan, Procurement Officer, was congratulated for her outstanding performance rating.

Long service awards were given ten civilian workers. Thirty-year service pins went to Oneida Decatur, chief laundryman and Thomas C. Bean, head modelmaker wood, while the following received twenty-year service pins: Raymond E. Haliday, modelmaker wood; George J. Kleinhenn, machinist; Grace M. Koob, supervisory fiscal accounting clerk; Margaret McGuire, supervisory fiscal accounting clerk; Frances J. Ryan, clerk (stenographer); Walter B. Paris, toolmaker; James H. Workman, supervisory fiscal accounting clerk, and Thomas S. Biscoe, chief mess attendant.

"Operation Starlift" Featured Here

The NNMC auditorium recently rocked with laughter with the antics of comedians Johnny Grant (upper left) and Pat Moran (inset). Grant MC'd the review which starred himself along with Ginny Simms (upper right). Peggy Detrick (lower right) gave with the vocals while Eddy Samuels (lower left) presented some of his original compositions and acted as musical accompanist.

A. H. Luber, NNMC, Named to CPO Club Board of Governors

Arthur J. Luber, HMC, recently replaced Roy Wilkes, HMC, as Center Command's representative on the Board of Governors of the Chief Petty Officers' Mess (Open) here.

Other members of the CPO Club's Board of Governors, which has been performing its duties in an excellent manner of late, include W. P. Badley, HMC, and K. H. Walker, HMC, Naval Hospital; D. A. Suttelle, HMC, and G. W. Sumner, HMC, Naval Medical School, and D. Hotvedt, HMC, NSHA.

Also on the board are C. E. Erickson, DTC, Naval Dental School, and L. C. Jones, HMC, and J. T. Chandler, HMC, Naval Medical Research Institute. Chandler is now President of the Chiefs' Club. A. E. Rasmussen, HMC, of Center Command is Treasurer of the CPO Mess.

Taking an active interest in station recreational matters these days is the enlisted Recreation Committee, of which J. E. O'Keefe, HMC, of Center Command, is chairman.

In addition to O'Keefe, other members of the committee are L. J. Reber, HMC, NMRI; D. A. Suttelle, HMC, NMS; T. F. Williams, HMC, USNH; P. Mobbs, HM1, NSHA, and D. G. Zaia, DT1, NDS. Heretofore a great many people on the station did not know who the members of this committee were.

NEWS BRIEFS

A completed statistical report indicates that 7,940 were admitted to the Navy's sick list during the year as a result of motor vehicle accidents involving Navy and Marine Corps personnel. These accidents exacted a toll of 603 lives, the second highest death rate due to motor vehicle accidents in recorded naval history.

Cdr. James L. Fuelling, MC, USN has recently been certified in his specialty by the American Board of Ophthalmology.

The Navy has announced that there are 200 positions open to enlisted personnel on active duty to participate in the college aptitude test for entry as midshipmen into the NROTC.

To qualify a candidate must be between the age of 17 and 21, unmarried, physically qualified and a

high school graduate or the equivalent.

The President has ordered a study of the need for Universal Military Training. A chief objection of the President to the present system is the fact that men who have been called to fight in Korea are discharged with a six-year Reserve obligation, whereas those who have not been called have done no fighting nor have they any Reserve obligations.

The Pacific site of the Marshall Islands may prove to be the next testing area for the H-Bomb tests. In the AEC's semi-annual report which hinted that these tests were in the offing, also stated that the past tests that were held in Nevada were so successful that it would not be necessary to conduct further tests at that main proving area.

New York (AFPS) The Daily Worker, communist newspaper, printed a story about an Ohio professor's protest against the execution of "atom spies" Julius and Ethel Rosenberg. Later the editors explained their slip-up in calling the Rosenbergs atom spies because "the story was a reprint from a capitalist press clipping."

Blessed is he that runneth around in circles for he shall be called a wheel.

Schools Graduate; Much Shifting of Personnel Here

The past month and a half has found NNMC busier than a University on graduation week. Students have been both coming and going. Graduating classes included Medical Photography, Optometric Fabrication, Neuropsychiatry Technician School and Radio Active Isotopes; while convening for the first time were three advanced classes in Dental Prosthetics, Repair and General. A class in Basic Dental Repair also convened recently.

Shutter Shuts on Photogs

Six months of fixer and developer and wash, wash, wash (one student said that it reminded him of the poem "Song of the Shirt") culminated in final projects for five photogs. The students, R. E. McGinnis, HMC, J. V. Wilson, HM1; R. E. Berry, HM1; L. L. McKee, HM1; and T. L. Nelson, HM2 will be transferred to various new stations as Medical Photography technicians. The class, under the direction of J. T. Stringer, Jr., graduated August 7.

Spec's Grind Ground

After ten months spectating, twenty-four enlisted men graduated on 31 July from NMS's Optometric Fabrication School. The school is headed by Cdr. R. R. Sullivan, MSC, USN and directed by Lt. S. H. Burgess, MSC, USNR (recently released to inactive duty). The instruction of such subjects as Anatomy of the Eye, Physiologic Optics, Mechanical Optics, Surface Grinding, Fabrication and Edging and Spectacle Fabrication was carried by HMC's Amend, Dafoe and Sumner.

Graduating students: C. B. Bennett, HM3; P. J. Melanson, HM3; L. E. Ballew, HM3, F. C. Moore, HM3, J. Peterson, HM3, R. M. House, HM2; W. J. Gelien, HM3; B. J. Street, HM2; F. R. Longway, HM2; J. D. David, HM1; P. E. Petrie, HM2; J. D. Blount, HM2; R. Troglin, HM3; W. B. Clifton, HM1; J. H. Levy, HM1; D. J. Hallifield, HM1; W. V. Jennings, HM3; C. R. Parker, HM2; C. F. Robinson, HM2; R. J. Doyle, HM1; J. E. Streetman, HM3; J. Heath, HM1; L. D. Hicks, HM2, and G. J. Otis, HM2.

Radioisotopes School Finish

Seven enlisted men recently completed the rigorous eight month course in Radioisotope School. For HMC F. J. Roehs, HM2 N. K. Schilling, HM2 B. R. Wesson, HM3 D. D. Albright, HM3 L. A. Freedman, HM1 H. B. Carter, Jr. and HM1 F. Crabtree such subjects as calibration, general and radiation chemistry, radiation safety and health physics, clinical isotope procedure, theory of nuclear physics and isotope laboratory technique were business but soon became second nature.

The course, which is in many subjects equivalent to one and two years of college work is directed by Cdr. W. S. Cole, MC, USN.

NP's Finish

Sixteen students graduated recently from NH's Neuropsychiatry Technician School. The course included ten weeks of class work and four weeks of observing patients at St. Elizabeth's.

Graduating students were: F. J. Ford, HN, honor man; J. J. Burbol, HN; C. W. Carter, HN; N. J. DesJardin (W), HN; O. R. Edgar, HM3; J. N. Fant, HN; J. Fick (W), HN; J. T. Goodrum, HN; A. E. Grenz, HM3; R. N. Kime, HM3; J. W. Kirkendoll, HM3; H. M. Olson, HN; C. G. Ransopher, HM3; R. R. Radtke, HN; R. K. Stephenson, HN and C. D. Hareng, HM3.

Admiralettes Whip Patuxent River, Quantico in Recent WIAL Contests

NNMC's hard-hitting women's softball team captured two of three recent WIAL contests to make its league record for the season seven wins and five losses.

The Admiralettes' last game of the year was against the Fort Myer WAC Hq. Co. there Monday, August 10. Naval Medical won that one, 18-5. This completed what proved a successful softball campaign for the local Waves.

With lefty Maggie McQuarrie hurling excellent ball, Manager Spurgeon Slade's ball club crushed Patuxent River, Md. NATC, 16-2, here Thursday, Aug 6, in its last home game of the season. Almost everyone in the NNMC lineup hit safely in the easy victory.

Kelly and O'Brien of the visitors were rapped freely by the home team, as the Admiralettes sewed up the tiff early. NNMC made 3 runs in the first inning, 5 in the second, and 4 in the fourth to romp home.

Mary Lou Cox, Boots Carlson, Jan Fick, Barbara Bradford and McQuarrie all had their hitting clothes on in the one-sided affair. Fick's Texas League hit to short right field brought in Carlson with the winning run as the Admiralettes nipped Quantico, 13-12, here Friday, July 31.

After piling up a 7-0 lead, NNMC was buried under an 11-run Quantico third frame. However, Quantico managed only one more marker off McQuarrie from then on and the local women scored five times in the fifth to tie the count at 12-12.

Quantico missed a chance to go ahead in the top of the seventh, and then Fick sent Carlson home from second base with an out in the bottom of the second inning and darkness closing in fast. The lanky left fielder's clutch hit in the gathering gloom provided a happy ending for the exciting tussle.

Cox slammed a home run for NNMC with the bases loaded in the second inning. Kalama of Quantico made several nice catches of hard hit balls later in the contest to halt scoring threats.

A number of fine fielding plays by enemy outfielders, coupled with some poor defensive work on Naval Medical's part, helped the Ft. Myer 7001st WACs to a 10-5 win over NNMC there July 28.

Coach Slade's charges led early in the game 2-0 and later 4-2, but Ft. Myer rallied strongly to take the WIAL tilt. Four runs by the hosts in the sixth frame broke up what had been a close affair.

McQuarrie played first base for the WIAL All-Stars in the Virginia women's district softball tourney at Richmond, Va. on July 25. The All-Stars lost, 6-4, to the Polyannas of Richmond, who went on to win the tournament. Metz of Arlington Hall hurled creditable ball for the All-Stars.

Vacation Sources Run Many Courses

Summertime is vacation time at the Naval School of Hospital Administration, when practically everyone who has it on the books can take leave. All that's required is money.

Money is a wonderful thing, and with it strange things can happen, even on vacations.

For instance, the NSHA correspondent collected his share from Uncle Sam and then left on fourteen days' leave. He was going to the Wolverine State for some fishing—or something. Sad to relate, he reached Rockville Pike and that sounded like fish, so he got no further. (Reminds him of the time his father started to drink Canada Dry and got only as far as Montreal.)

On the other hand, "Sam" Hotvedt, NSHA's inveterate golfer, went fishing in Montana's Georgetown Lake and caught quite a mess of trout, which made a fine meal.

He admits, though, that the shrimp at the CPO Club on August 4 was tasty, too.

Of interest to Marylanders, Sam says, is that the temperature around the lake went down to 32 degrees some nights, and he slept under blankets every night.

Chief Mecartea claims he spent his entire leave at home and developed insomnia. That is, he couldn't sleep after 6:30 in the morning.

Another vacation tale comes from Chief "Red" Galyon, who discovered a huge butterfly in his desk drawer when he came back. His only comment: "That's the easy way to get your wings."

A customer sat down in a smart restaurant and tied his napkin around his neck. The manager asked the waiter to make the man understand that such a thing wasn't done here, but told him to be tactful.

"Shave or haircut, sir?" the waiter asked.

An officer was inspecting a Southern base when he asked a civilian secretary, "What is the normal complement of this office?"

"Ah believe the most usual complement is 'Howdy, honey, you're sure luscious-lookin' this maw-nin'!"

Top-Seeded Duo Lead Advance in Doubles Tourney

Top-seeded Douglas Powell and Frank Weldon have reached the semifinals of the NNMC men's doubles tennis tournament, as has the second-seeded duo of Richard Lieurance and Roy Hedlund.

After a first round bye, station singles champion Powell and his veteran partner disposed of Jim Greer and Bob Walters in their quarterfinal round match, 6-1, 6-3.

Lieurance and Hedlund followed a first round bye by whipping Foelker and Samalones, 6-1, 6-1, in their quarterfinal round match.

Greer and Walters had downed Child, and Lovin in the first round 6-1, 6-4, while the Foelker-Samalones combination tripped White and Edmonds, 6-2, 9-7.

Powell and Weldon are in the upper bracket, Lieurance and Hedlund in the lower one. Bridges and Mapletto tripped Todd and Baker in another upper bracket first round affair, 6-1, 6-4, and will meet the Walser-Looney vs. Smith-Becker winner in the quarterfinals.

In other, lower bracket action, fourth-seeded Knud-Hansen and McClenathan won their first round tussle with Rivers and Mincey, 7-5,

6-4. They were next to meet Replogle and Guidus, who clipped Ward and Pittard, 6-3, 6-0.

With Hedlund expecting to be transferred last week, Lieurance was faced with the possibility that he might have to switch partners from Hedlund to P. J. Cichanowicz, since it appeared that Hedlund might be transferred before the tourney's completion.

COACH WANTED

The NNMC Admiralettes are seeking a volleyball coach, either male or female, for the coming season. The Waves are anxious to line up an experienced coach for their volleyball team as soon as possible. Interested persons should contact ENS Pat DeBerry, ext. 549, or Nancy Aiken, DT3, ext. 317.

July 27 Red Letter Day for Two Boys That's When They Met Ted Williams

Ted Williams, Boston Red Sox baseball star and former Marine Corps jet pilot, presents an autographed baseball to two of his young fans. They are Steve Mitchell and Jack Reges, both 12 years old, of Silver Spring, Md.

The morning of Monday, July 27, 1953 will be long remembered by two Silver Spring, Md. youths—Steve Mitchell and Jack Reges, both 12 years of age—because on that day they had a personal meeting with their baseball idol, slugger Ted Williams.

It seems that the previous week these lads had made two trips to the Naval Medical Center expressly to see Williams and present the Boston Red Sox hitting star with a gift.

Both times, after the two boys had walked the five miles from their homes to NNMC, they found that Ted was gone from the station. But they were not easily discouraged.

With the help of Lt. (jg) V. J. Fontana, MC, USN, of the Naval Hospital Allergy Clinic, it was arranged for the youths to meet Williams at the clinic on the morning of July 27.

Everything went off like clockwork. The boys arrived at the Allergy Clinic and anxiously awaited Ted's arrival. Pretty soon who should come through the door but the BoSox ace himself. And lo and behold, a Navy photographer from the NNMC Photo Lab. arrived a few moments later.

Steve and Jack had a long talk with their diamond hero and presented him with a fine silver key chain. Ted, in turn, thanked the boys for their generous gift and for coming all the way over from

Silver Spring to see him—and autographed a new baseball with a copy of the NNMC NEWS to each boy. Then they all had their picture taken together.

As the happy lads were about to leave, their faces all aglow, Ted called them back and told Steve and Jack to be sure and phone him up at The Woodner when the Red Sox come to Washington Aug. 11 for a three-game series with the Washington Senators. He said he would see to it that they obtained good seats for one of the contests.

Steve and Jack doubtless were quite elated at the news that Ted hit his first home run of the season for Boston as a pinch hitter in the game with Cleveland Sunday, Aug. 9.

For them, their personal talk with Williams, former Marine Corps jet pilot now back in a Red Sox uniform again, was a dream come true.

Waves Anniversary Celebrated

(L to R) Capt. Louise K. Wilde, USN, Director of Waves, Thelma Stone MC, USN, Phyllis McElfish, HM3, and RAdm. Leslie O. Stone MC, USN, jointly participating in cutting the anniversary cake at the Waves anniversary party held July 27th at the Chiefs' Club.

The old man in the corner wept as the hostess sang "My Old Kentucky Home."

"Pardon me," asked another guest, "are you a Kentuckian?"

"No, a musician," was the reply.

Doc: "The pain in your leg caused by old age."

Man: "Old age nothing; the old leg's the same age and it doesn't hurt."

New Air Force Ambulance

A high lift ambulance which eliminates the need for carrying litters from ambulances to evacuation planes and protects patients in bad weather has been developed by the AF. A hydraulic lift mechanism is attached to the chassis and ambulance body, and can lift the 16-litter body to a height of 13 feet.

NNMC Men Notch Several Victories

Here are the NNMC Admirals who will compete in the MAISAC Softball Tournament at Patuxent River, Md. Aug. 26-29. Front row (L to R): Dick Suever, John Crabtree, Dolf Caesar, Mort Pilcher and Wayne Davis. Back row (L to R): Manager Jim Greer, Ray Gismond, Jack Pushkin, Norman Turner, Dan Bova, George Mickens, Ray Jeter and Ron DeVice. Not in picture: Bob Hartley, Leo Heid and Bob Schenck.

After winning five of their last six MAISAC games, Manager Jim Greer's NNMC Admirals found the absence of ace pitcher John Crabtree too much to overcome on Thurs., Aug. 6 and dropped a 11-4 decision to Cheltenham, Md. Naval Radio Station on the winners' diamond.

Fastballer Bob Hartley, who hurled NSHA to the first half intramural title, made his initial start for the varsity and allowed only four hits. However, his own wildness and assorted NNMC errors helped Cheltenham net 5 runs in the third inning, 2 in the fourth and 3 in the sixth.

Wayne Davis' double drove in one Naval Medical marker in the third and walks gave the losers three tallies in the seventh stanza. NNMC's other three safeties were made by Ron DeVice, Mort Pilcher and Hartley. The defeat gave NNMC a league record of 8 and 4, with two tilts remaining.

Crabtree, who reports to the 2nd Marine Division, Camp LeJeune, N. C. for duty on Aug. 16, out-ruled Frank Barham as the Admirals outlasted Walter Reed AMC, 3-1, in a 9-inning thriller at Fort Glen Section Aug. 4.

NNMC scored once in the opening canto and twice in the fourth, while WRAMC got all its runs in the third, during which it collected three of its five hits for the contest. In the ninth, Greer doubled, stole third and came home after Dick Suever fled out to right field.

Crabtree hurled superbly in the clutch to notch a richly deserved win, his 8th of the MAISAC campaign as against 11 losses. NNMC had five bingles, two each by Dan Bova and Greer and one by Ray Gismond, who turned in a fine defensive effort behind the plate.

Perry of Patuxent River, Md. NATC was in rare form as the Admirals downed Naval Medical, 3-2, at Pat. River on July 30. The victors got to Crabtree for five hits and all three of their counters in the fourth frame, while NNMC tallied in the second and fourth. Patuxent River had 9 hits, NNMC 5.

The Admirals scored once in the second chapter and twice in the third to nip Cheltenham, 3-2, here on July 28, as Crabtree scored his second straight win over Charlie Breyman in another of their good round battles.

Held to three hits, Cheltenham scored two runs in the top of the third for a short-lived lead. It was the fourth loop triumph in a row for NNMC and curveballer Crabtree.

Crabtree chucked his best game of the campaign here on Thurs., July 23 as he twirled Naval Medical to a pulse-pounding 1-0, 8-inning win over a stubborn Walter Reed nine.

Ron DeVice's blooper to short right center brought Crabtree in with the winning marker. One infield roller downed the third base line was WRAMC's lone safety.

"Zeke" Zimmermann of Andrews (Continued on page 6, col. 5)

Boots Carlson One Of NNMC's Top Feminine Athletes

One of the outstanding woman athletes on this station is an exuberant blue-eyed blonde named "Boots" Carlson. Actually the energetic HN(W), who works in the SOQ Admission Office of the Naval Hospital Command, has the given name of Beverly but she much prefers "Boots" and all of her friends and acquaintances here call her by that name.

Boots joined the Navy on June 20, 1951 and took her recruit training at Great Lakes, Ill. and Hospital Corps School at Bainbridge, Md.

She came to the Naval Hospital here for duty on Feb. 15, 1952 and since that date has worked on Wards 126 and 127, in the OB Clinic, Plastic Surgery, NP Clerical, Neurological Clerical and now can be found at the SOQ Adm. Desk. She has been on her present job since March of this year.

The writer was fortunate in finding out the origin of her colorful first name. It seems that as a child she persisted in calling her shoes "boots", and as a result that word stuck with her—so it's been "boots" ever since.

A native of Thief River Falls, Minn., Carlson still calls that Gopher State community of slightly over 10,000 persons home and says that she will always be a Minnesotan at heart.

Active in girls' softball, basketball, volleyball and tennis during her days at Lincoln High School in Thief River Falls (320 miles north of Minneapolis), she worked for a lawyer following graduation from high school and before entering the Navy.

This 22-year old Wave of Scandinavian descent fondly remembers her days as catcher for the Thief River Falls All-Stars women's softball team which did very well for itself in tournaments at Fargo, N. D.

Since coming here Boots has been active in basketball as a forward and in softball as the Admir-

Jim Greer

Second Half Begins In Station Intra. Softball Circuit

Second half play in the NNMC intramural softball league got underway recently, with Hospital Barracks, Research and Center Command scoring victories in their initial starts.

NH Bks. notched a 13-4 win over the loop's new member, Lab 21, on August 3, and NMRI clubbed out a lowing day. Darter made his pitching debut for Center Command a successful one on Aug. 5, as his mates won from X-Ray School easily, 14-6.

The scheduled Aug. 5 meeting between Naval Dental School and Hospital Doctors was postponed when the latter club found itself unable to assemble nine men for the game. Pharmacy School had no game slated for the first week of second half activity.

Since Bill Beckman pitched both NH Bks. and NMRI to victories during the opening week of play—and no man may perform for more than one team—at least one of those squads probably will have to replay its game, although a forfeit ruling also is possible in this unusual situation.

At this writing, league action on the matter was awaiting receipt of complete information on fastballer Beckman's strange actions.

Center Command's strong nine won the four-team playoff for second place in first half play by whipping Pharm. School, 5-2, in the final on July 27. Smiley hurled NNMC to victory, with Schubert the losing moundsman.

It was the first defeat of the year for Schubert, who yielded a home run to Suttelle and a triple to Allgood of the winners. Center Command overcame an early 2-0 disadvantage and a triple play in the second inning by Pharmacy to cop the contest.

Admirals Stun Strong Andrews Field; Waves End Season with Easy Triumph

John Crabtree hurled the NNMC Admirals to a thrilling 9-8, 11-inning win over powerful Andrews Field there Mon., Aug. 10, in the clever curveball artist's final start for Naval Medical before his recent transfer to Camp LeJeune, N. C., for duty with the FMF.

Two NNMC markers in the 7th inning overcame a 6-4 deficit, and each team made one run in the 9th. Then the Admirals got two in the 11th to sew it up, Stevens homering for Andrews in the bottom half of that frame. Wayne Davis collected three of the victors' 11 hits.

Crabtree's season record for NNMC was 10 wins and 12 losses.

Patuxent River, Md. NATC downed the Admirals, 6-3, in a MAISAC game here Aug. 11. Norman Turner of NNMC allowed 7 safeties while his mates made only 2. All three Med. Ctr. tallies came in the first stanza.

The Admiralettes closed their WIAL campaign with a thumping 18-5 victory over the Fort Myer WAC Hq. Co., there Aug. 10. Maggie McQuarrie was very effective

in all but the 2nd canto, while her mates scored 9 times in the 1st session and 6 in the final inning. NNMC clubbed the ball to all fields.

Intramural league action saw Anderson hurl X-Ray School to a 16-12 win over Dental on Aug. 12. Two Days earlier Center Command crushed LAB 21, 23-0, on Smiley's shutout pitching, and NH Doctors forfeited to LAB 20.

Fort Belvoir trimmed the NNMC golf team here Aug. 12, 6-3. K. K. Bridge was low for the losers with a 74.

Wolff's Den

Bob Wolff

GREEN SOCKS: Nick Fornoro, one of the nation's leading racing drivers, showed up at the radio station for an interview, with his wife but without his green socks. He had his lucky picture in his wallet though, and the session on the mike was a huge success.

Seems that Nick, like ballplayers, broadcasters and most readers of the column, has his superstitions. And they're rigidly observed, especially in a life-and-death sport like auto racing where it's often too late to go home for the good-luck charm.

The charming Mrs. Fornoro does more than just prevent Nick from getting lonely as he zooms around the country. Back in September of 1950, she missed a race, the only one since she's known Nick. That afternoon, Nick suffered his first crack-up, emerging with broken bones and severe burns.

She hasn't missed a race since then, and is now almost as well-known around the tracks as is her famous husband. Nick won't race without Betty in the stands.

The color green is taboo amongst racing drivers. This applies to anything from clothing to cars. Many will refuse to drive in a race if someone has been foolhardy enough to enter a green car. It's pretty serious business.

But a few years ago, Nick won a big race only to discover that by mistake he was wearing green socks. Having defied the superstition and won, he's been reluctant to change. His suitcase is now crammed with them. Naturally, Nick is careful to avoid exposing their sight to others, but he won't race now unless he's wearing a pair.

Nick also believes in number 13. In keeping with his belief in this regard, he and Betty were married on Nov. 13, 1948.

Before the marriage vows with his understanding wife came a gentleman's agreement. "Racing is in my blood," he told Betty. "When I quit I want it to be of my accord. Let's have an understanding now that you'll accept racing along with me for better or for worse." Betty agreed, and has lived up to the bargain.

Betty forgot, however, to extract a similar promise in regard to her role behind a wheel. "I can't even drive the family car," she confides. "Nick always says he's going to teach me, but he never gets around to it."

"How about that, Nick," I asked. "What's the hold up?" "Too dangerous," countered the personable pilot. "She might get killed out there on the highways."

Fornoro, who's 32, says that the best training for future racing drivers is to drive a truck, the poorest to drive a taxi. "Truck drivers have a tremendous responsibility," he says. "They've got to have good reflexes, and they have to practice courtesy."

"Some cab drivers fall in that category too, but there are too many of them who get drunk with power when they're on the road. They hop in and out of traffic as if they're competing in time trials. It's all right to gamble with your own life when you're driving professionally in a race, but I'll be darned if I see any reason for gambling with lives on city streets."

The 1950 Midget Racing Champion speaks rather nonchalantly of injuries. "You're not really initiated in this business until you get the first one," Nick said. "Funny thing. I kept waiting for that first one to see how I'd react. Mentally, that is."

"When it happened, I was pretty well racked up physically, but my mind was more occupied with how long it would take to patch me up till I could race again. That's when I knew that racing was really in my blood. You've got to feel that way, or your nerves will beat you more than the other drivers will."

"I guess my ambition is to some day win that Indianapolis Speedway and I can't wait too long to fulfill that ambition, because you can't stay in this game past a certain age. When those reflexes start slowing down, that's the time to get out in a hurry."

"When I'm on the track, I react automatically. I can't ponder decisions. I instinctively shoot to the left or right, try to make an opening, gauge a distance and act fast. You're either right or wrong, and there's no second chance."

"With my son's picture in my wallet, Betty in the stands and my green socks on, I've got a lot riding with me, though. All I've got to do is drive."

ettes' regular catcher both this year and last. A fractured jaw suffered in a game on June 30 of this year failed to halt her for long, Carlson being back in the lineup against Quantico July 31.

Her main hobby is collecting phonograph records. Regarding her plans for the future after discharge from the Navy in June 1955, Boots says, "I can't say for sure about that right now. I do hope I can be stationed somewhere else before my Navy time is up, although my duty here has been very good."

Tokyo (AFPS) Japanese police have printed English-language leaflets for tourists explaining traffic, safety, which they place under the windshield wipers of any parked American car.

One leaflet read: "Traffic rules help your safety. Car is easy to speed upside down on this road so that the traffic accidents wants to break out oftenly."

"Please drive in safety and avoid miserable accident."

CENTER CAPERS

By Clyde

Three of our HMCs in Center Command left us recently, while one second class joined the fold. Chiefs Dorosz, Wertley and Wilkes all departed not long ago for sea duty, and Stanley W. Gibson, HM2, arrived for duty from Air FMF PAC, El Toro, Calif., and is a welcome addition to our fold.

Bill Dorosz, formerly CMAA of the NNMC Command, has gone to MSTs, Brooklyn, N. Y. (for further transfer), Chief Wertley also to MSTs, Brooklyn, and Chief Wilkes to the USS Pittsburgh for duty afloat.

Also leaving us were C. R. Green, SH3, and Richard Scarson, HM2. Green now is at the Rec Sta, Wash., D. C. and Scarson, who was in Hygiene & Sanitation here, is going to the 2nd Marine Air Wing, Cherry Point, N.C.

Leo S. Hilt, HM1, well-liked Property man in Special Services, has joined the new Pharmacy School class at NMS, and Bob Galaher, HM1, will go to NSHA for 10 months of school when he reports back off leave. W. A. Ross, HM1, is now on leave and then will attend X-Ray School over at NMS.

Recently enjoying well-earned rests while on leave were J. E. O'Keefe, HMC; LTJG A. T. McGinnity, CHC, and LCDR C. B. Stuart, MSC. Robert Kosterman, HM1, and Donald Kelly, SHSN, now are home on leave. Kelly is visiting his family in Waterloo, Iowa, which just happens to be your columnist's home town.

Mrs. W. H. F. Howard, Miss Wilson's relief, has arrived from COM 4, and has been welcomed aboard by the Waves. She is a Lt. USNR. We are all glad to have Mrs. Howard with us, but will hate to see Miss Wilson leave on Aug. 26.

June M. Sheets, PNSN(W) of Center Personnel Office, will be married today at Andrews AFB to Airman Second Class Ralph Wilson of Bolling Air Force Base. The personnel of our command wish them many years of married happiness.

Lt. J. O. Atkinson, MSC, is leaving us to attend NSHA. Lt. L. D. Farmer, MSC, has relieved Lt. Atkinson as Special Services Officer, pending the arrival in September of Lt. M. E. Whitt, MSC. WOHC J. R. Renard is now handling Lt. Farmer's duties in Maintenance.

NOTES AND QUOTES: Ron DeVice has requested that this writer make no further mention of his activities (social) in the Rockville area. Okay, Ronnie, it's a deal.

Setting a torrid pace these days is Chief Jack O'Brien. He's turned out to be an excellent third base coach for the Waves softball team (among other things). And we're hoping that George Behrle, genial Bks. 112 MAA, gets into the local social whirl very soon.

Bill Conran was initiated into our exclusive "C. Lodge Society" a short time back—take it from this columnist, IT'S GREAT.

New Blood Transfusion Method Unveiled

A new method of Blood transfusion was recently demonstrated to 17 Army Doctors by the man who probably knows the technique better than anyone else.

Dr. Henry Turkel, Detroit, has spent 20 years perfecting an instrument for injecting blood directly into the bone marrow, a system which would save many lives during a disaster such as an atomic bombing. He is a consultant for the Education and Training Division, Surgeon General's Office of the Army.

In explaining bone marrow infusion, Dr. Turkel said there are small blood vessels in the bone which carry blood immediately into general circulation. "It is an alternate procedure to be used when transfusion of blood or fluids into the veins may be impractical or impossible," he declared. (AFPS)

MAISAC STANDINGS

(Includes games of Aug. 11)

	W.	L.
Cheltenham	14	9
Walter Reed	14	9
Fat. River	10	13
*NNMC	8	15

*One league game remaining for each team.

Navy Belles

by Phyllis McElfish

With deep regret and a memory of forty-five happy months with you I take my leave. Before I go I have a few things I would like to leave behind . . . to Vina I leave my lower bunk . . . for Josh, a drawer of her very own . . . my speed for getting started in the morning to Judy Kliner . . . my singing key is for Norma to carry on . . . my place in the Saturday morning inspection parade belongs to Lorraine Mann . . . to Nancy Aikens, my love for ice cream, one pint at a time . . . for Barbara Bradford my ability to march . . . my pencil and score book for Julia Klaus and may our team go on winning . . . to Norma I leave the clock for the games because she always has the time . . . Can only think of one more thing to say . . . do not let today upset you, because tomorrow will be better . . . until we met again remember me as your old shipmate, the girl from the heart of Maryland, by George. Ed's Note: Phyllis started writing for the NEWS as a temporary affair which actually lasted for over two and a half years. Replacing George will be NDS's Anna Schuricht.

Diaper Derby

With this issue a revival of an old NNMC News standby is started. The diaper derby will run again, and include the names of the new arrivals, and future rulers of the households they have entered, along with as much of the vital statistics as are obtainable.

1351 on 4 Aug.—James Wallace Ridgway, Jr., new son of James Wallace Ridgway, HM3, NMS.

1815 on 5 Aug.—James William Parnham, new son of Arthur L. Parnham, HM1, of NMRI.

2239 on 6 Aug.—Mary Margaret Schneida, new daughter of Lt. Peter W. Schneida, MC, USN of NH.

Coaching a women's softball team often has its fascinating facets. For Spurgeon Slade, HM1 of the Naval Hospital's Mechano Therapy Department, it culminated in marriage with his third baseman, the former Joyce Crouch, HM3 of Physical Medicine School. The two however, knew each other for a year previous to their marriage. The ceremony took place at the Center's Protestant Chapel on Saturday, August 1. Chaplain N. V. Brink officiated and Clyde Schubert, HM1, NNMC and Pauline Krampitz, HM3, one of Joyce's classmates, served as Best Man and Bride's Maid.

Medical Center Golf Team Routs Receiving Station

Naval Medical's varsity golf team chalked up its first triumph in three matches by walloping Naval Receiving Station, Wash., D. C., 20½-6½, on the local course Wednesday, August 5. Jim Kinder, NNMC's No. 1 shotmaker, took medalist honors for the day with a sizzling four-under-par 66.

Kinder and K. K. Bridge whipped their Rec. Sta. foes, 8-1, Will Flannery and Jim Stoffel scored a 6½-2½ win, and Jim Byrne and K. V. Berglund downed their opponents, 6-3. Stoffel fired a 72 over the 18-hole distance.

The Medical Center links squad played host to Fort Belvoir here Wed., Aug. 12, and will meet the Ft. Belvoir golfers there Aug. 19. Walter Reed comes here for a match Aug. 26, while the Receiving Station club-wielders play NNMC here Sept. 2.

Fort Myer will be here for a duel Wed., Sept. 9, with Naval Medical going to Ft. Myer for a return match Sept. 16.

The Naval Receiving Station edged out NNMC, 5-4, in a match played here July 22.

Fit To Be Tied

Petite Lynn Shannon stands on the edge of a pool wearing an outfit designed for bow-ling the boys over. The suit also is made for swimming, or so the manufacturer says.

SPORT FLASH

Walter Reed edged out NNMC, 6-4, in a MAISAC softball game here Thurs., Aug. 13. Jim Wilusz was the winner, Bob Hartley the loser. All four NNMC runs came in the 3rd inning. Naval Medical's final mark: 8 won-16 lost.

MED. SCHOOL DAZE

by M. C. Reder

We received a letter from Barratta the other day. He's out at Camp Pendleton in the Third MAR DIV along with Miller and Caggiano. They all send their regards.

Speaking of Marines, Walls finally got his orders to FMFLANT. Good Luck at Camp Lejeune, Wal-ly.

Bob Schroeder came back from leave last week with a shiny new ring on his finger. We'd like to extend our very best wishes to you and the new Mrs., Bob.

Our spies inform us that Benny Clark has been sneaking off to a Dance Studio for some time now. Better watch out at the next staff dance, girls, he's going to be a real "gone" guy.

"Baby," Biochemistry's favorite guinea pig has just given birth to two little "piglets." She really had five, but she must have decided against such a large family, because there are only two left. Bradley has named them Ike and Mike, 'cause they look so much alike.

We finally became mechanized last week, so you had better beware. Our ears can now move out and get the scoop from the hinterlands.

We were just introduced to our new Personnel Officer, Lt. Eddington, by the CMAA. Welcome aboard sir. We hope our association is long and pleasant.

We keep hearing from all sources that Chief Suttelle has been making quite a few trips to Baltimore recently. They tell us she's a beautiful blonde. What's the story, Dan?

Flash: We've just had a personal interview with Horrobin, and he assures us that he is NOT getting married on his forthcoming leave. Have lots of fun, anyway, "Horrible."

That's it for now, by cracky.

Men's Varsity

(continued from page 5)

AFB threw a no-hitter at NNMC as the visitors whipped the Admirals, 13-0, here on July 29. Lefty Ray Jeter of NNMC pitched the first four innings and was plagued by wildness. Andrews hammered reliever Norman Turner for six runs in the seventh stanza.

NNMC met Andrews there Monday, Aug. 10 in a night game, and was slated to close its MAISAC season with home games against Pat. River on Aug. 11 and Walter Reed on Aug. 13. Crabtree was to make his last start in Admiral livery on Aug. 10, with Hartley slated to hurl the Aug. 13

DENTAL

EXPLORE

by R. D. Johnson

Olleh, ydobyreve! Many of us are answering the call of the (wood). Can't seem to pick up stories down, as they are upon return. It must be down there!

Mary Park discovered that will be the owner of a set of earned encyclopedias (win, draw), without a place to them. Going to the highest der, Mary?

Welcome back is in order for Watson, after spending a few in Pahokee, Fla., where the shines.

The Crown and Bridge ment threw a "wig-ding" of a nic recently. Photog's Mate ker got a few shots while led the choir and Tyson demonstrations.

Cdr. Fridley challenged youthful athletes to a match. Later made a special to the area for something Anything for 75 cents!

The picnic ended when the salad and hot dogs rgn What'd he say?

Brownbaggies be on the for a scavenger who answers "the Nug." He usually eats ghetti, meatballs and hot dogs fervor. He's vicious!

"Mrs. Mac" bace us all adew a position in the Patient Office. Best of luck to someone will all miss.

Congratulations to Hollingshead, who, on the 25th, absolved his entrepreneurship for a partnership on a 50-50 basis. Now it's Mr. and Mrs.

Tyson seems a bit "green" with envy over the deal he passed up Guzzetta and Troiano. Something to do with golf?

If anyone is looking for Dr. Beck, he can be found on T-3. Ry back, Doctor.

Welcome back is due for who spent some time with us '51.

So long and hurry back to Isel (again), and D. Rosenberg.

Clarice Hailey recently out just how large those out west really are. Now tell us we didn't warn you!

Well, that's the way it from one who nose.

Weekend and holiday play on the NNMC golf course is now limited to threesomes and foursomes. Reservations for starting times on Saturdays and Sunday may be obtained in person at the Golf Shop or by calling ext. 477.
